## EXPLANATORY NOTES

**1. New and Recent Changes in Presentation**

(*a*) *Standard Regions, Conurbations, Density Summaries*

Standard Regions have been adopted in Tables **A4, E, E1, F, M, BB, HH, JJ, PP and RR.** Their constitution is set out on page vi.

In 1950 five conurbation areas were introduced in Tables **A4, E and E1.** For definition of "conurbation" and the list of conurbations, *see* Note 11 on page vii.

The allocation of areas for density summaries is based on the 1951 census provisional populations.

(*b*) *New Tables introduced in* 1950

At table **N** a new serial table shows the monthly incidence of marriages in each year from 1947.

Table **O** has been extended to show the numbers of new divorce petitions filed in addition to the numbers of decrees made absolute.

Table **P** has been superseded by a series of four tables showing for England and Wales as a whole :—

(1) The numbers of decrees absolute granted, analysed by the cause set out in the original petition and stating whether the petition was filed by the husband or the wife.
(2) The numbers of dissolutions and annulments made absolute analysed by age of wife in relation to age of husband.
(3) The numbers of dissolutions and annulments made absolute analysed by age of wife and duration of marriage.
(4) The numbers of dissolutions and annulments made absolute analysed by age of wife and number of children.

The analysis of adoptions has been extended to show :—

Table **T4**, the number of children adopted in 1951 showing the adopter relationship, type of court, and distinguishing legitimacy, sex and age.

Table **T5**, the number of children adopted, by legitimacy and sex for each year from 1927 to 1951.

Table **T6**, the number of children adopted by legitimacy, sex, and age in six calendar periods from 1927 to 1951.

**2. Populations**

The estimates of population appearing in Tables **A1, A2, A3, A4 and E,** and described as " Home " or " Total " populations, have the following significations:—

*Home population*—the population, of all types, actually located within England and Wales, distributed by area according to residence.

*Total population*—the home population *exclusive* of members of the Armed Forces of the Commonwealth or Foreign Countries temporarily in the country, together with its own Armed Forces and Merchant Navy serving overseas.

In preparing the mid-1951 estimates, advantage has been taken of the 1951 Census populations of each sex published in the Census 1951, Preliminary Report*.

**3. Births**

The births recorded and analysed for England and Wales for periods from 1939 onwards are those which occurred during the period. The numbers registered in 1951 are shown in the footnote to Table **B.**

For the classification by regions and local areas (Table **E**), the births have been assigned to the home address or area of permanent residence as in previous years.

**4.** (*a*) **Birth Rates**

The national rates for 1951 shown in Tables **C** and **D** are obtained by relating birth occurrences to the *total* population, while the rates in Table **E** are based on birth occurrences and *home* populations (*see* Notes 2 and 3 above).

The birth rate areal comparability factors and the ratios of the local adjusted birth rates to the national rate shown in cols. 9 and 10 of Table **E** serve a similar purpose to those shown for death rates, as explained in Note 7 below.

(*b*) **Fertility Analyses**

The fertility analyses in Tables **AA-YY** are based on information obtained under the Population (Statistics) Act, 1938, which operated from the 1st July, 1938. Tables **AA** to **SS** and Table **YY** are based upon birth occurrences. Tables **VV, WW** and **XX** are based upon death registrations.

**5. Marriage Rates**

The national marriage rates of Tables **C** and **D** are based upon *total* populations while those of Table *F* are based upon *home* populations (*see* Note 2 above).

**6. Deaths**

The deaths recorded (Tables **E** and **VV** to **XX**) are the total registered (i.e. including non-civilians) in the calendar period, the time lag between the date of occurrence and

*H.M.S.O. price 5s. net (by post 5s.2d.)

the date of registration being usually only a day or two. They have been assigned to the area of residence of the deceased.

**7. Death Rates**

The general death rates of Table E are based upon total deaths and home populations. The Infant Mortality rates for the local areas of Table E are based on estimates of the related live births in the current and preceding years.

The crude death rates for local areas in Table E (col. 14) are not validly comparable by reason of the fact that the areal populations on which they are based may be of widely differing age constitutions. With a view to eliminating this element of variation, a comparability factor is provided in column 15 of the table for each area and this, when multiplied by the crude death rate of the area, produces an adjusted rate which may be regarded as comparable from a mortality point of view with the corresponding adjusted rate for any other area or with the crude death rate for England and Wales as a whole in which the comparability factor is unity. A guide to the relative incidence of mortality in different areas is provided by column 16 which expresses each local adjusted rate as a ratio of the national rate. For a fuller description of the comparability factor, reference should be made to the Statistical Review, Text, 1938/1939, page 5.

**8. Register of Electors**

The number of parliamentary electors for each parliamentary constituency, together with the number of votes cast at bye-elections held on the March, 1951 Register, are set out in Table U. The numbers of local government electors are shown in Table V together with an analysis of local elections.

**9. Changes in Boundaries**

Areas which have undergone a change of boundary during the year are identified in Table E by an asterisk (*). Statistics for these areas are composite figures combining the " before change " and " after change " positions for the respective periods involved. The population of each area as constituted after the change of boundary will be found in the *Appendix* (page 178). The populations in column 2 of Table E are constructed figures, appropriate only for use with the mixed records of births and deaths.

**10. Significance Indication**

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experiences may affect their significance.

**12. Conurbations**

The conurbation areas used in this volume were agreed by an interdepartmental committee, representing the principal Departments preparing statistics, as a means of securing uniformity and comparability in statistics published by Government Departments in the United Kingdom.

Conurbation is the word used to describe those areas of urban development where a number of separate towns have grown into each other and become linked by such factors as a common industrial or business interest, or a common centre of shopping, education, etc. The conurbations are each made up of a collection of complete local authority areas, constituted as follows :—

# FERTILITY ANALYSES

**TABLE AA.—Maternities and Births of all Types,** distinguishing legitimacy and, in the case of births, sex and whether live or stillborn. — **England and Wales** 1951 Occurrences.

*Note*: The term "Maternity" is used to denote a pregnancy which has terminated in the birth of one or more live or stillborn child(ren), the criterion of stillbirth being that defined in the Births and Deaths Registration Act, 1926. The Maternity record differs from the Birth record in that multiple births from a single pregnancy are counted as one maternity, while for the birth record each child born is reckoned as a separate unit.

*Note* :—*Interval since marriage* As the month only and not the day of the mother's marriage is obtained at a birth registration, the interval between marriage and birth of child has been calculated on the assumption that both events take place at the middle of a month ; and the true interval may accordingly be a month greater or less than the calculated interval. The groups thus overlap, though the records are not duplicated thereby and for statistical purposes the calculated intervals as shown in the tables may be regarded as equivalent to mutually exclusive intervals as follows :—

0 month(s) = 0—$\frac{1}{2}$month(s).
1 month(s) = $\frac{1}{2}$–1$\frac{1}{2}$ month(s).
2 month(s) = 1$\frac{1}{2}$–2$\frac{1}{2}$ month(s), etc.

0 year(s) = 0–11$\frac{1}{2}$ months.
1 year(s) = 11$\frac{1}{2}$ months–1 year 11$\frac{1}{2}$ months.
2 year(s) = 1 year 11$\frac{1}{2}$ months–2 years 11$\frac{1}{2}$ months, etc.

**England and Wales** 1951 Occurrences.

*Note*:—Statements of numbers of children which were incompatible with the duration of present marriage were not questioned and are recorded without modification. Such children, if incorrectly stated, were presumably illegitimate or offspring of a previous marriage. *See* also Note to Table OO.

**TABLES TT and UU.—Suspended.**

**TABLE VV.—Infertility of Deceased Married Women distinguishing certain Causes of Death.** — **England and Wales 1951 Registrations.**

*Note.*—The columns distinguish deaths according to whether the deceased was reported
(*a*) as having had no children by any husband, i.e. Infertile,
(*b*) as having had children by a husband, i.e. Fertile.
Deaths in which the record of fertility was not reported are excluded from the table.
In view of the unreliability of inferences based upon small numbers, proportions based on less than 50 cases (Infertile plus Fertile) have been omitted, and proportions based on between 50 and 250 cases are shown in italics.

## SAMPLE TABLES

A sample was taken of one per cent. of the 1951 Census records and analysed in advance of the main Census operations in order to present as quickly as possible a preview of the pattern of the main results which would not otherwise be available for some years. The tables relate to Great Britain and, with correspondingly less detail, to various smaller areas according to the size of their populations.

In particular, the information contained in these volumes will be of great value to Public Health Departments for Administrative Counties, County Boroughs, Metropolitan Boroughs and some of the larger urban areas in their work.
