# **Business Monitor**

Report on the Census of Production

Sugar and sugar byproducts

#### PRICE INCREASES

Prices of Business Monitors in 1982 have been set to make some contribution for the first time to the costs incurred at the Business Statistics Office in the preparation of Monitors.

#### SPECIAL NOTE FOR PURCHASERS

Reports on the Census of Production for separate industries are being published in the Business Monitor series. These Monitors have a code P (for production) followed by A (indicating an annual series) and then by a number indicating the industry covered by the report.

Commencing with the 1980 census, the first Annual Census of Production to be conducted on the Standard Industrial Classification (Revised 1980), separate reports will in general appear for each 3 digit Group of the new classification. Results for 1980 will include 1979 back data but more detailed 1979 figures based on the new classification will be published as a single separate Business Monitor (PA1002.1). This will also include the results of the 1979 Purchases Inquiry. Reports on the Census of Production for the years prior to 1980 are available at the Minimum List Heading, or sub division of a Minimum List Heading, of the Standard Industrial Classification (Revised 1968).

The Census of Production (PA) reports are available on standing order from HMSO, PO Box 569, London, SE1 9NH, Tel No: 01-928-6977. A standing order ensures that selected titles in the annual series are supplied automatically on publication. A £20 deposit will open an account.

Additionally single copies of the reports can be obtained from HMSO Bookshops and are individually priced.

### **GOVERNMENT STATISTICAL SERVICE**

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

PA420

The following is a list of 1980 Industry Reports based on the Standard Industrial Classification Revised 1980. The number of the Monitor will indicate each 3 digit Group industry of the new classification. This will produce about 110 Monitors in this series compared with around 165 Monitors in recent years.

HMSO will automatically supply the nearest comparable, and, if necessary, supplementary Monitors to all account holders. If your requirements are not fully met please consult the list printed below and advise HMSO.

# PA420 SUGAR AND SUGAR BY-PRODUCTS

The information in this report relates to establishments classified to the Sugar and sugar by-products industry, Group 420 in the Standard The Information Revised 1980. The industry Group covers the following Activity Heading:—

## 4200 Sugar and sugar by-products

For a full description of the 1980 classification see Standard Industrial Classification Revised 1980 obtainable from Her Majesty's Stationery Office, price £2.50.

> In interpreting the data in the tables it is essential to bear in mind the notes and definitions which commence on page 9.

PA420 NOTES

ese notes give the main information needed for interpreting the hese notes give the main information needed for interpreting the jures in the industry Business Monitors: more detailed information out the census is given in a separate Business Monitor - PA1001 ntroductory Notes) of the Report on the Census of Production,

SENERAL INFORMATION

CHANGES MADE FOR 1980 ne 1980 census differed from the 1979 in three main respects. estions relating to standard cost stocks and road transport costs ere removed from the questionnaire. Motor cars have been separrely identified in the capital expenditure questions in order to ist in the 1980 rebasing of national accounts. Sampling arrangessist in the rock locating of national accounts. Sampling arrangements were extended as detailed in the para headed Coverage. there are also two major changes in the presentation of census esults. Publication of the Business Monitor PA1000 showing proional results has been discontinued, and industry reports are being ued, whenever possible, for each 3 digit Group of the SIC Revised A limited range of information for most 4 digit Activity

leadings is published in the Summary Volume (PA1002). Regional sults are restricted to 2 digit class level, and appear only in the mmary Volume.

INDUSTRIAL CLASSIFICATION

The 1980 census is the first being conducted on the SIC (Revised 980). The United Kingdom SIC was first issued in 1948 and evised in 1958, 1968 and 1980. It exists to promote uniformity and comparability in the official statistics of the United Kingdom. rior to the 1980 revision the general principles followed were those of the International Standard Industrial Classification of all onomic Activities of the United Nations Statistical Office but for the 1980 revision an attempt was made to align the United Kingdom classification as closely as practicable with NACE, the classification use by the Statistical Office of the European Community. The SIC is a classification by activity and not a commodity classi-

STATISTICAL UNIT

The statistical unit for the purpose of the census is the establishnent, which is defined in the SIC as the smallest unit which can provide the information normally required for an economic census, for example, employment, expenses, turnover, and capital formation. Usually the principal activities carried on in an establishment fall within a single heading of the classification (e.g. steel making or sugar refining). Typically the establishment embraces all the activities carried on at a single address e.g. a mine or factory, including those which are ancillary to the principal activities. Frequently distinct activities characteristic of different industries are carried or at one address, but normally these are not classified separately and the whole establishment is classified according to the main activity. If, however, the required range of data can be provided for each activity, each is taken to constitute a separate establishment. Sometimes activities which are conducted as a single business are carried on at a number of addresses. Where this is so, businesses are asked to provide the full range of information in respect of each address, whether or not the activities are different. Their activities may, however, be intergrated to such an extent that they constitute a single establishment. In the latter case the establishment is defined to cover the combined activities at these addresses (termed local units). Separate figures of employment and net capital expenditure are obtained for each local unit in order to compile regional tables. Efforts are made by the BSO to ensure, by negotiating with respondents, that the return from an establishment does not cover local units in more than one of the countries of the United Kingdom.

Establishments are asked to exclude from their returns particulars relating to any department not engaged in production e.g. mer-chanting, transport or warehousing, for which they keep a separate set of accounts. Transfers of goods produced to such departments are treated as sales and respondents are asked to value them as far as possible as if sold to an independent purchaser. Where separate accounts are not kept, responders are asked to include details of all these activities in their return. Particulars relating to head offices mainly engaged in the administration of the production units within the scope of the census are included. Where more than one return is made the information in respect of the head office is apportioned among them. For certain purposes in the censuses of production (e.g. for disclosure testing and the preparation of the enterprise analyses shown in Business Monitor PA1002) related establishments are combined to enterprise level. An enterprise group is defined as a business consisting of either a single establishment or two or more establishments under common ownership or control. Information about relationships between establishments, the changing structure of groups of companies and about common ownership links is obtained from many sources, including the Stock Exchange Year Book, company reports, press reports, and information supplied by

A computerised register of about 120,000 production units throughout the United Kingdom is held in the BSO. This register provides the basis for a wide range of BSO inquiries mailed to the production sector. For each production unit the register contains identification particulars and information about a units eligibility for inclusion in an inquiry; its relationship with other units in common ownership; industrial classification; nationality of parent company if foreign owned and location indicators permitting regional analyses. Regional and size analyses of manufacturing local units are published each year in Business Monitor PA1003 (Analyses of United Kingdom Manufacturing (local) units by employment size).

The inquiries provide a major source of information for keeping the register continuously up-to-date and act as a check on its structure. For the establishments on the register making returns to the quarterly inquiries into manufacturers' sales, industrial classification is derived from an analysis of their commodity sales and is reviewed annually. For any other establishments for which no up-to-date information was available classification to SIC Revised 1980 was made on a pro-rota basis in line with the reclassification pattern by industry of establishments for which actual product sales data was held. Employment data are entered on the register from the quarterly inquiries and the censuses of production. Where establishments do not make a return to these inquiries the employment data are based on information provided by the Department of Employment from censuses of employment.

New additions to the register are obtained from various sources including Value Added Tax records, the Census of Employment and register proving forms.

The census covers United Kingdom establishments engaged in production and construction industries (Divisions 1 to 5 of the SIC (Revised 1980)). The Channel Islands and the Isle of Man are

Under the sampling arrangements agreed for the 1980 census, forms were despatched to samples of 1 in 4 and 1 in 2 for the 20 to 49 and 50 to 99 employment size bands respectively for most production industries. For a limited number of production industries, where there were very few units in the sample size bands, all establishments with employment of 20 or more were included. Units employing fewer than 20 continued to be exempt from selection. All units employing 100 or more were subject to a full coverage The total number of forms mailed was 18,965.

In the construction industry all undertakings employing 50 or more were selected. The 1 in 2 sample for undertakings with 20 to 49 employees introduced for the 1979 census was repeated, but the 5 per cent sample of undertakings with fewer than 20 employees was discontinued. This resulted in a reduction in the number of forms sent out to 6,500, which is about one half of the average mailed for the years upto 1978.

SUPPRESSION OF INFORMATION RELATING TO

INDIVIDUAL UNDERTAKINGS

Subsection 9(5)(b) of the Statistics of Trade Act, 1947 states that: "The following provisions shall have effect with respect to any report, summary or other communication to the public of information obtained under the foregoing provisions of this act

in compiling any such report, summary or communication the competent authority shall so arrange it as to prevent any particulars published therein from being identified as being particulars relating to any individual person or undertaking except with the previous consent in writing of that person or the person carrying on that undertaking, as the case may be; but this provision shall not prevent the disclosure of the total quantity or value of any articles produced, sold or delivered; so, however, that before disclosing any such total the competent authority shall have regard to any representations made to them by any person who alleges that the disclosure thereof would enable particulars relating to him or to an undertaking carried on by him to be deduced from the total disclosed".

Where the publication of any figure is likely to disclose particulars relating to an individual undertaking, either the contributor is approached to seek consent for publication or the figure is sup-Where convenient, suppression takes the form of compressed bining the disclosive figure with adjacent cells. Steps are also taken to avoid the release of figures which may lead to disclosure by deduction when compared with other census results.

SYMBOLS USED

The following symbols are used throughout the PA series of **Business Monitors:** 

nil or less than half the final digit shown

figures cannot be shown owing to the risk of disclosing

information about individual enterprises. revised

#### **ROUNDING OF FIGURES**

Figures in the tables have, where necessary, been rounded to the nearest final digit. Where figures have been so rounded, the sum of the constituent items may not always agree exactly with the total

#### **EXPLANATION OF TERMS USED IN THE CENSUS REPORT**

The notes and definitions given in this section are mainly based on the general instructions given to respondents as to the way in which

#### CAPITAL EXPENDITURE

Capital expenditure during the year in respect of production units where production had not started before the end of the year is included. Establishments were asked not to deduct from the value of capital expenditure amounts received or expected to be received in grants or allowances from the Government or any statutory body or local authority. Establishments with 100 or more employees were asked to include a total net capital expenditure figure for the calendar year.

a. New building work
This represents the cost incurred during the year of new building
and other constructional work to be used in connection with the
business covered by the return. The value is that charged to capital account during the year of return; it includes expenditure on new buildings and on the extension or reconstruction of old buildings, the value of works of a capital nature carried out by the establishments own staff and the cost of any newly constructed buildings purchased. Figures shown include legal charges, stamp duties, agents commissions, etc.

b. Land and existing buildings
The items shown are the capital cost of freeholds purchased and the capital cost or premium payable for leaseholds acquired (excluding the value of assets acquired in taking over an existing business), and the amounts receivable for freeholds or leaseholds disposed of. The value is that charged to capital account during the year of return.

#### Plant, machinery and vehicles

The items shown are the value of plant and machinery and of vehicles acquired both new and second-hand, and the amount received for items disposed of during the year. The value of plant and machinery acquired includes plant, etc. which firms produced for their own use in connection with the business covered by the return. The value of plant, etc. acquired is the expenditure charged to capital account during the year of return less any discounts received, but including the cost of transport and installation. Deductable value added tax is excluded but nondeductible value added tax on motor cars acquired and Customs and Excise car tax are included. No deduction is made for depreciation, amortization or obsolescence. The proceeds of items disposed of during the year exclude amounts written-off for items

#### CAPITAL GOODS PRODUCED FOR AN ESTABLISHMENT'S OWN USE

This includes all work of a capital nature carried out during the year by the establishment's own staff for their own use.

#### COST OF INDUSTRIAL SERVICES

This includes amounts payable to other firms for work done on materials supplied by the establishment, payments for repairs and maintenance (including those in respect of rented buildings) and amounts paid to other firms for contracts which have been sublet. Payments to outworkers are excluded.

#### COST OF NON-INDUSTRIAL SERVICES

This includes rents of industrial and commercial buildings, hire of plant, machinery and vehicles (excluding vehicles hired with drivers), commercial insurance premiums, bank charges and amounts paid for professional services, post office services, transport (within the United Kingdom), advertising, etc. Amounts payable on royalties for the right to use patents, trademarks, copyrights, etc., manufacturing and quarrying rights and technical "know-how" are also included

#### **EMPLOYMENT:**

#### AVERAGE NUMBER EMPLOYED

Establishments were required to state the average number of persons on the pay roll during the year of return. Separate figures were required for

- administrative, technical and clerical employees
- all other employees (operatives)

Averages could be calculated from the figures relating to the last week of each calendar month. Establishments were also require to state the number of working proprietors where appropriate and these are included in total employment figures. Full-time and part time employees are included but outworkers (i.e. persons employe by establishments who worked in their own homes, etc. on material supplied by the establishment) are excluded. The figures include persons engaged on merchanting or factoring and canteen worken where particulars in respect of these activities could not be excluded from the return.

#### WORKING PROPRIETORS

These include all persons regarded as "self-employed" for national insurance purposes and members of their families who work in the business without receiving a wage or salary; but such persons who work less than half the normal number of working hours are excluded. Directors working in the business but not in receipt of a definite wage, salary, or commission are included under this heading: directors paid by fee only are not included.

#### **EMPLOYEES**

Administrative, technical and clerical employees include director in receipt of a definite wage, salary, or commission, managers and works foremen; research and design employees (other than operatives); draughtsmen, editorial staff, advertising staff, traveller and all office employees.

Operatives include all other classes of employees, that is, broadly speaking, all manual wage earners. They include operative employed in power stations, inspectors, maintenance workers and cleaners. Staff engaged in transport (including roundsmen), or employed in warehouses, stores, shops and canteens, should be included only where separate accounts are not kept. Operative engaged in outside work of erecting, fitting, etc. are also included,

EMPLOYERS' INSURANCE AND WELFARE CONTRIBUTIONS This item includes employers' contributions to national insurance under the Social Security Pensions Act, 1975, as well as commercial insurance premiums to provide pensions, superannuation or other retirement benefits, sickness benefits, personal accident benefits, disability or death benefits for employees or former employees or their dependants.

Contributions to the running costs of canteens, social centres, children's and holiday homes, etc. for employees, former employees and their dependants are also included.

#### **GROSS OUTPUT**

In the calculation of gross output the value of total sales and work done is increased by the rise (or reduced by the fall) during the year in the value of work in progress and goods on hand for sale.

#### GROSS VALUE ADDED AT FACTOR COST

Gross value added at factor cost is calculated by deducting from net output the cost of non-industrial services e.g. rent of buildings, hire of plant, machinery and vehicles (excluding vehicles hired with drivers), commercial insurance premiums, bank charges and amounts paid for professional services, post office services, transport (within the United Kingdom) and advertising, rates (excluding water rates) and the cost of licensing motor vehicles. This estimate of gross value added approaches more closely than census net output to the definition of net output or value added in national accounts

### GROSS VALUE ADDED AT FACTOR COST PER HEAD

The figures of gross value added at factor cost per head are derived by dividing the gross value added by the average number of persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

Net output, a customary census measure, is calculated by deducting from gross output the cost of purchases (reduced by the rise, or increased by the fall, during the year of stocks of materials, etc.) the cost of industrial services received and where applicable, duties,

#### NET OUTPUT PER HEAD

The figures of net output per head are derived by dividing the net output by the average number of persons employed (full and part time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

## ON-INDUSTRIAL SERVICES RENDERED

his includes rents received for commercial and industrial buildings, ants charged for hiring out plant, machinery and vehicles and er goods and amounts charged to other organisations for the ision of transport. It also includes amounts received for the ght to use patents, trademarks, copyrights etc., manufacturing d quarrying rights and technical "know-how" and revenue from ch staff facilities as canteens.

#### PERATING RATIOS

ne operating ratios shown are obtained by dividing the estimate of a industry total for the quantity shown in the numerator by the esponding estimate for the quantity shown in the denominator. responding estimates cover all establishments classified to each industry, juding establishments not selected and non-respondents. Within industry, it is possible to compare ratios for an individual firm th the ratios shown for the relevant industry. However, it is portant to bear in mid that various factors may affect the results differences in definitions, treatment of depreciation (which is it identified in the census data) and varying practice with regard to ock valuation, may affect comparability in some respects.

#### IRCHASES

chases include the cost of raw materials, components, seminufactured goods and workshop materials; of replacement parts d consumable tools not charged to capital account; of packaging aterials of all types; of stationery and printed matter; of fuel, ectricity and water; of materials to be used by the establishment given out to other establishments for the production of chinery or other capital items for the establishment's own use; f materials for use by the establishment when working on goods pplied by customers; and of food, etc. for any canteen covered the establishment's return. Transfers of goods to the estab-ment from another department of the same firm not covered by ne establishment's return are included at a cost corresponding to estimated selling value recorded by the other department, nounts payable to transport firms or credited to the firm's own nsport department for delivery of materials are excluded, as are purchases of machinery and plant charged to capital account. rchases of goods for merchanting or factoring have been collected parately since 1973. The values shown exclude VAT. They clude, in addition to the actual purchase price, the value of packing material charged to the establishment. The value of returned ods or packaging material returned to the suppliers and any trade iscounts are excluded. Materials purchased duty-paid are included scounts are excluded. In their duty-paid value, less any drawback, rebate, etc. The cost of ansport is included only if it is included with the purchase price the firm's accounts. Imported goods are included at their full elivered cost. If in the firm's accounts the transport from docks or irport is not included in the cost of goods purchased, the cost is itered at cif plus duty (if applicable).

## RECEIPTS FOR WORK DONE AND INDUSTRIAL SERVICES

igures for work done represent the amount charged for work pried out on materials supplied by a customer and include repair work. Within certain industries this heading covers a wide variety of ctivities, for example, within the food sector - butter packed on nmission; within the textile industries — making up of garments, r dressing and textile finishing; within printing and publishing preparatory work on type-setting, block making and binding. Work done is also significant in the electrical machinery and heavy gineering industries, covering erection, installation and repair and obbing work. Other activities within this heading include exploration work, research and development, glass-cutting and essing and planing of timber.

ndustrial services rendered include repairs and maintenance, installtion work, and technical research and studies for other organ-

#### REMUNERATION PAID TO OUTWORKERS

The remuneration paid to outworkers (i.e. persons employed by the establishment who do their work in their own homes) is generally on a piece-work basis. Only amounts paid to outworkers whose mes appear on the establishment's payroll are included. Amounts paid to outworkers by sub-contractors are excluded.

#### SALES OF GOODS PRODUCED

les for the purposes of the annual censuses means deliveries on sale of goods made by establishments in the United Kingdom covered by the inquiry. Sales of goods made for these establishnents by outworkers or by other establishments from materials iven out to them and sales of waste products are included. orward sales and canteen takings are excluded. All sales in the period of the inquiry are included irrespective of when the goods were manufactured

Goods produced in one establishment and transferred either to ancillary departments not engaged in production for which there are separate accounts, or to another establishment of the same firm not covered by the return are treated as sales by the producing establishment and valued as far as possible as if they had been sold to an independant purchaser. Goods transferred to wholesale or retail selling organisations, for which separate accounts are kept, are valued on the same basis.

The value shown for sales is the "net selling value" defined as the amount (excluding VAT) charged to customers, whether on an exworks or delivered basis, after any trade discounts and agents' commissions have been deducted. The cost of packing materials less allowance for returnable cases is included. In industries where products attract Excise Duty the value stated is usually inclusive of duty if sold duty-paid and exclusive of duty if sold in bond or

#### STOCKS AND WORK IN PROGRESS

Values are given of stocks of goods on hand for sale and of materials, stores and fuel at the end of the year of return and of the change during the year, including any stocks of goods held for

merchanting or factoring.

Work in progress is defined as materials which have been partially processed by the establishment but which are not usually sold or transferred to another establishment without further processing The values include the cost of materials consumed and labour used Progress payments made to sub-contractors are excluded and progress payments received from other organisations are not

#### WAGES AND SALARIES

These are amounts paid during the year to operatives and to administrative, technical and clerical employees. Payments to working proprietors, whether called salaries or not, are excluded. The values shown include all overtime payments, bonuses and commissions, whether paid regularly or not, and no deduction is made for income tax, insurances, contributory pensions, etc. The value of redundancy payments less any amounts reimbursed from Government sources is included. The values of any payments in kind, travelling expenses etc. is excluded.
