## HISTORICAL RECORD OF THE CENSUS OF PRODUCTION 1907 to 1970

The reports of the censuses of production, which the Board of Trade and successor departments have conducted since 1907, together form the most comprehensive set of available statistics on industrial production in the United Kingdom. Data from the first census in 1907 up to the first of the new system of annual censuses for 1970 have been collated into one volume by the Business Statistics Office to form a unique reference work for all those interested in the growth of United Kingdom manufacturing industry since the start of the century.

The aim of the Historical Record is to classify firms mainly engaged in the same activities as consistently as possible to the same industries throughout the years. The method adopted has been to reclassify industries or parts of industries en bloc and bring them into line with the 1968 revision of the Standard Industrial Classification.

The data are published in 11 main tables:

- Table 1 Analysis by census industry, 1907 to 1970
- Table 2 Standard Industrial Classification Orders in percentage terms of all manufacturing industries, 1907 to 1970.
- Table 3 Analysis by industry. Import Duty Inquiries, 1933, 1934 and 1937
- Table 4 Capital expenditure and stocks and work in progress by census industry, 1948 to 1970
- Table 5 Capital expenditure and stocks and work in progress by industry group, 1959 to 1970
- Table 6 Analysis of employment, wages and salaries, within industry, 1907 to 1970
- Table 7 Analysis by employment size of establishment within industry, 1930 to 1970
- Table 8 Country analysis of employment and net output, within industry, 1907 to 1970
- Table 9 Sales of selected products by larger establishments, including sales by establishments classified to other industries, 1907 to 1968
- Table 10 Analysis by total employment size of enterprise, 1958 to 1970
- Table 11 Analysis by net output size of enterprise, 1958 to 1970

Further information about the Historical Record can be obtained from the Librarian of the Business Statistics Office, Newport, Gwent NPT 1XG Telephone Newport (0633) 56111 ext 2399.

The "Historical Record of the Census of Production 1907 to 1970", 467 pages, is published by Her Majesty's Stationery Office and is available from Government Bookshops or through booksellers, price £10 net (ISBN 0 11 512132 3).

### The Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

Enquiries about statistics in this publication should be made to the Business Statistics Office, Cardiff Road, Newport, Gwent, NPT 1XG Telephone 0633-56111 ext 2455.

## SUMMARY TABLES: ENTERPRISE ANALYSES

## NOTES

1 This Business Monitor presents summary information of the Censuses of Production for 1974 and 1975 at enterprise level. The Censuses of Production for 1974 and 1975 are the fifth and sixth respectively in the annual series, which forms part of a system of industrial statistics mainly brought into operation between 1970–1973. The rest of the system comprises selected monthly inquiries into manufacturers' sales, orders and production, quarterly inquiries into the product sales of manufacturing industries and less frequent inquiries into additional subjects including details of purchases of goods and services by industry. The notes below give the main information needed for interpreting the figures, more detailed information about the censuses is given in a separate Business Monitor – PA1001 (Introductory Notes) Report on the Censuses of Production 1974 and 1975. Separate results for each census industry were also published in Business Monitors in the PA series. Summary establishment analyses were published in volume 1 of Business Monitor PA1002.

2 *Suppression of information relating to individual undertakings*

The summary tables have been prepared in conformity with the disclosure provisions of the Statistics of Trade Act, 1947. In order to avoid disclosing information about individual undertakings it has in some cases not been possible to publish information in the full detail in which it was collected.

3 *Symbols used*

The following symbols are used throughout the PA series of Business Monitors:

.. not available

– nil or less than half the final digit shown

\* figures cannot be shown owing to the risk of disclosing information about individual enterprises

R revised

4 *Rounding of figures*

Figures in the tables have, where necessary, been rounded to the nearest final digit. Where figures have been so rounded, the sum of the constituent items may not always agree exactly with the total shown.

5 *Order and higher aggregation*

Where no footnote is given against an Order or higher aggregation the reader should nevertheless refer to and take into account any notes given against the constituent industries or Orders.

6 *Industrial classification*

The United Kingdom Standard Industrial Classification (SIC) was first issued in 1948 and revised in 1958 and 1968. It exists to promote uniformity and comparability in the official statistics of the United Kingdom. The general principles followed are those of the International Standard Industrial Classification of all Economic Activities of the United Nations Statistical Office but the United Kingdom SIC reflects the organisation and structure of industry and trade as it exists in the United Kingdom. The SIC is a classification by activity and is not a commodity classification. However, an index of all commodity headings for which sales data are provided in the Quarterly Business Monitors is published in Business Monitor PQ1000.

7 *Statistical units*

The main statistical unit for the purpose of a census is the establishment defined in the SIC as the smallest unit which can provide the information normally required for an economic census, for example, employment, expenses, turnover, capital formation. Sometimes activities which are conducted as a single business are carried on at a number of addresses. Where this is so, businesses are asked to provide the full range of separate information in respect of each address, whether or not the activities are different. Their activities may, however, be integrated to such an extent that they constitute a single establishment. In that case the establishment is defined to cover the combined activities at these addresses (termed local units). Separate figures are obtained of employment and net capital expenditure at each local unit.

In this volume an enterprise group is defined as a business consisting either of a single establishment or two or more establishments under common ownership or control. For enterprise analyses at industry level, establishments belonging to the same enterprise group and classified to the same industry are treated as one enterprise. For analyses at higher level of aggregation (for example at Order level) such parts of an enterprise group in different industries are brought together as one enterprise.

8 *Coverage*

The censuses for 1974 and 1975 covered United Kingdom establishments engaged in manufacturing, mining and quarrying, electricity, gas and water supply (Orders II to XIX and XXI of the Standard Industrial Classification (revised 1968) (SIC)). Since 1974, the censuses have been extended to cover the construction industry (Order XX). A return was required from each establishment with 20 or more employees. In the construction industry where firms employing less than 20 persons account for a relatively high proportion of total employment and output, a sample was taken of undertakings with less than 20 employees.

## TERMS USED IN THE CENSUS REPORT

9 *Average number employed*

Establishments were required to state the number of persons on the payroll on average during the year of return, whether full-time or part-time employees. Separate figures were required for:

- a. administrative, technical and clerical employees

b. all other employees (operatives)

Averages could be calculated from the figures relating to the last week of each calendar month. Establishments were also required to state the number of working proprietors where appropriate and these are included in total employment figures. Outworkers (i.e. persons employed by establishments who worked in their own homes etc. on materials supplied by the establishment) are excluded. The figures include persons engaged on merchanting or factoring and canteen workers where particulars in respect of these activities could not be excluded from the return.

10 **Working proprietors**

These include all persons regarded as "self-employed" for national insurance purposes and members of their families who worked in the business without receiving a wage or salary; but such persons who worked less than half the normal number of working hours are excluded. Directors working in the business but not in receipt of a definite wage, salary or commission are included under this heading: directors paid by fee only are not included.

11 **Employees**

Administrative, technical and clerical employees include directors in receipt of a definite wage, salary or commission, managers, superintendents and works foremen; research, design employees (other than operatives); draughtsmen, editorial staff, advertising staff, travellers and all office employees.

Operatives include all other classes of employees, that is, broadly speaking, all manual wage earners. They include operatives employed in power stations, transport (including roundsmen), warehouses, stores, shops and canteens, inspectors, maintenance workers and cleaners. Operatives engaged in outside work of erecting, fitting etc. are also included, but outworkers are excluded.

12 **Capital expenditure**

Capital expenditure during the year in respect of manufacturing units where production had not started before the end of the year is included in the figures. Establishments were asked not to deduct from the value of capital expenditure amounts received or expected to be received in grants or allowances from the Government or any statutory body or local authority. Establishments with 100 or more employees were asked to include a total net capital expenditure figure for each calendar year.

(a) **New building work**

This represents the cost incurred during the year of new building and other constructional work to be used in connection with the business covered by the return. The value is that charged to capital account during the year of return; it includes expenditure on new buildings and on the extension or reconstruction of old buildings, the value of works of a capital nature carried out by the establishment's own staff and the cost of any newly constructed buildings purchased. Figures shown include any legal charges, stamp duties, agents' commissions, etc.

(b) **Land and existing buildings**

The items shown are the capital cost of freeholds purchased and the capital cost or premium payable for leaseholds acquired (excluding the value of any assets acquired in taking over an existing business), and the amounts receivable for any freeholds or leaseholds disposed of. The value is that charged to capital account during the year of return.

(c) **Plant, machinery and vehicles**

The items shown are the value of plant and machinery and of vehicles acquired, both new and second-hand, and the amount received for items disposed of during the year. The value of plant and machinery acquired includes plant, etc., which firms produced for their own use in connection with the business covered by the return. The value of plant, etc., acquired is the expenditure charged to capital account during the year of return less any discounts received, but including the cost of transport and installation. Deductible value added tax is excluded but non-deductible value added tax on motor cars acquired is included. No deduction is made for depreciation, amortization or obsolescence. The proceeds of items disposed of during the year exclude amounts written-off for items scrapped.

13 **Cost of industrial services**

Includes amounts payable to other firms for work done on materials supplied by the establishment, payments for repairs and maintenance (including those in respect of rented buildings) and amounts paid to other firms for contracts which have been sublet. Payments to outworkers are excluded.

14 **Cost of non-industrial services**

Includes rent of industrial buildings and capital equipment, commercial insurance premiums, bank charges and amounts paid for professional services, postal etc. services, transport, advertising etc. Amounts payable on royalties for the right to use patents, trademarks, copyrights etc., manufacturing and quarrying rights and technical "know-how" are also included.

15 **Gross output**

In the calculation of gross output the value of total sales and work done is increased by the rise (or reduced by the fall) during the year in the value of work in progress and goods on hand for sale.

16 **Net output**

Net output, a customary census measure, is calculated by deducting from gross output the cost of purchases (reduced by the rise, or increased by the fall, during the year of stocks of materials etc.) and the cost of industrial services received, and where applicable, duties etc.

17 **Net output per head**

The figures of net output per head are derived by dividing the net output by the average number of persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

18 **Gross value added at factor cost**

Gross value added at factor cost is calculated by deducting from net output the cost of non-industrial services (e.g. rent of buildings and capital equipment, commercial insurance premiums, bank charges and amounts paid for professional services, post office services, transport and advertising), rates (excluding water rates) and the cost of licensing motor vehicles. This estimate of gross value added approaches more closely than census net output to the definition of net output or value added in national accounts statistics.

19 **Gross value added at factor cost per head**

The figures of gross value added at factor cost per head are derived by dividing the gross value added by the average number of persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

20 **Purchases**

Purchases include the cost of raw materials, components, semi-manufactured goods and workshop materials; of replacement parts and consumable tools not charged to capital account; of packaging materials of all types; of stationery and printed matter; of fuel, electricity and water; of materials to be used by the establishment or given out to other establishments for the production of machinery or other capital items for the establishment's own use; of materials for use by the establishment when working on goods supplied by customers; and of food, etc. for any canteen covered by the establishment's return. Transfers of goods to the establishment from another department of the same firm not covered by the establishment's return are included at a cost corresponding to the estimated selling value recorded by the other department. Amounts payable to transport firms or credited to the firm's own transport department for delivery of materials are excluded, as are all purchases of machinery and plant charged to capital account. Purchases of goods for merchanting or factoring have been collected separately since 1973. The values shown exclude VAT. They include, in addition to the actual purchase price, the value of packaging material charged to the establishment. The value of returned goods or packaging material returned to suppliers and any trade discounts are excluded. Materials purchased duty-paid are included at their duty-paid value, less any drawback, rebate, etc. The cost of transport is included only if it is included with the purchase price in the firm's accounts. Imported goods are included at their full delivered cost. If in the firm's accounts the transport from docks or airport is not included in the cost of goods purchased, the cost is entered at c.i.f. plus duty (if applicable). Leasing, renting and hire purchase charges are excluded.

21 **Sales of goods produced, work done and industrial services rendered**

Sales for the purposes of the annual censuses means deliveries on sale of goods made by establishments in the United Kingdom covered by the inquiry. Sales of goods made for these establishments by outworkers or by other establishments from materials given out to them are included; as also are sales of waste products. Any new building work and machinery or other capital items produced by establishments for hiring out or leasing are regarded as sales, the value included in the return being that adopted in the establishment's capital asset accounts. Forward sales and canteen takings are excluded. All sales in the period of the inquiry are included irrespective of when the goods were manufactured. Goods produced in one establishment and transferred either to ancillary departments not engaged in production and for which there are separate accounts, or to another establishment of the same firm not covered by the return, are treated as sales by the producing establishment and valued as far as possible as if they had been sold to an independent purchaser. Goods transferred to wholesale or retail selling organisations, for which separate accounts are kept are valued on the same basis.

The value shown for sales is the "net selling value" defined as the amount (excluding value added tax) charged to customers whether on an ex-works or delivered basis, after any trade discounts and agents' commissions have been deducted. The cost of packing materials less allowance for returnable cases is included. In industries where products attract Excise Duty the value stated is usually inclusive of duty if sold duty-paid and exclusive of duty if sold in bond or exported.

Figures for work done represent the amount charged for work carried out on materials supplied by a customer and include repair work. Within certain industries this heading covers a wide variety of activities. For example, within the food sector — butter packed on commission; within the textile industries — making up of garments, fur dressing and textile finishing; within printing and publishing — preparatory work on type-setting, block making and binding. Work done is also significant in the electrical machinery and heavy engineering industries, covering erection, installation and repair and jobbing work. Other activities within this heading include exploration work, research and development, glass cutting and dressing and planing of timber. Industrial services rendered includes repairs and maintenance, installation work, and technical research and studies rendered to other organisations.

22 **Non-industrial services rendered**

Includes rents received for commercial and industrial buildings, amounts charged for hiring out plant, machinery and other goods and amounts charged to other organisations for the provision of transport. Also includes amounts received for the right to use patents, trademarks, copyrights etc., manufacturing and quarrying rights and technical "know-how"; revenue from such staff facilities as canteens is also included.

23 **Goods merchanted or factored**

Merchanted goods are those (excluding canteen sales) sold without having been subjected to any manufacturing process by the seller.

24 **Stocks and work in progress**

Values are given of stocks of goods on hand for sale and of materials, stores and fuel, at the end of the year of return and of the change during the year, including any stocks of goods held for merchanting or factoring. Work in progress is defined as

materials which have been partially processed by the establishment but which are not usually sold or transferred to another establishment without further processing. The values include the cost of materials consumed and labour used, together with a margin of overhead costs and profits. Progress payments made to sub-contractors are excluded and progress payments received from other organisations are not deducted.

**25 Wages and salaries**

These are amounts paid during the year to operatives and to administrative, technical and clerical employees. Payments to working proprietors, whether called salaries or not, are excluded. The values shown include all overtime payments, bonuses and commissions, whether paid regularly or not, and no deduction is made for income tax, insurances, contributory pensions etc. The value of redundancy payments less any amounts reimbursed from Government sources is included. The value of any payments in kind, travelling expenses etc. is excluded.

**26 Remuneration paid to outworkers**

The remuneration paid to outworkers (i.e. persons employed by the establishment who do their work in their own homes) is generally on a piece-work basis. Only amounts paid to outworkers whose names appear on the establishment's payroll are included. Amounts paid to outworkers by sub-contractors are excluded.

**27 Employers' insurance and welfare contributions**

This item includes employers' contributions to national insurance and graduated pensions (and/or earnings related basic contributions under the Social Security Act, 1973) as well as commercial insurance premiums to provide pensions, superannuation or other retirement benefits, sickness benefits, personal accident benefits, disability or death benefits for employees or former employees or their dependants. Contributions to the running costs of canteens, social centres, children's holiday homes, etc. for employees, former employees and their dependants are also included.

**28 Assisted Areas**

Within each region separate estimates of employment and net capital expenditure are available for assisted areas (special development, development, intermediate and derelict land clearance). Assisted areas are areas of high labour supply for which government grants and other help is available.

Footnotes to Table 13

- (a) The term enterprise is used in this Report to mean one or more establishments under common ownership or control.
- (b) Including estimates for establishments not making satisfactory returns, non-response and establishments employing less than 20 persons.
- (c) References to Orders are to those in the Standard Industrial Classification (revised 1968). Industry code numbers indicate the minimum list heading (MLH) and if appropriate, a sub-division of a minimum list heading. For industries covering two or more sub-divisions, the sub-divisions are given in brackets.
- (d) Some enterprises control establishments in more than one industry. The sum of the enterprise counts for all industries within an Order, may therefore exceed the enterprise count at Order level.
- (e) The figures shown relate to statistical units described as undertakings, not establishments, for the following industries :  
 Coal  
 Gas  
 Electricity  
 Water
- (f) Average number employed (full and part-time) during the year (including working proprietors) by the establishment.
- (g) Administrative, technical and clerical employees.
- (h) Including sales of goods merchanted or factored, and services rendered.
- (j) Gross value added data for size group 1-99 is included in the following size group.
- (k) New building work plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery. Capital expenditure in respect of establishments where production had not commence before the end of the year, is included.
- (l) Excluding MLH 104 - Petroleum and natural gas.
- (m) It has been necessary to show information for other than the five largest enterprises in order to avoid the possibility of disclosure of information relating to individual enterprises.
- (n) Casual employees (jobbers) have been excluded from the employment data used in calculating net output per head and gross value added per head.
- (o) Great Britain only.
- (p) Undertakings in this industry were not required to complete census returns for 1975. Data shown have been compiled from information produced by the Department of Energy and the Department of Employment.
- (q) Excluding gas undertakings.

- (a) The term enterprise is used in this Report to mean one or more establishments under common ownership or control. Foreign enterprises are those controlled or owned by companies incorporated overseas.
- (b) Including estimates for establishments not making satisfactory returns, non-response and establishments employing less than 20 persons.
- (c) Average number employed (full and part-time) during the year (including working proprietors) by the establishment.
- (d) New building work plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery. Capital expenditure in respect of establishments where production had not commenced before the end of the year, is included.

- (e) Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to the region only where more than 80 per cent of the establishment's employees were located in the region. The estimate was made by assuming that net output at each address covered by a return was proportionate to the employment at the address. The establishment's residual net output is shown as unallocated net output.

APPENDIX

Regional Classification

The list below gives definitions of the countries of the United Kingdom and of the regions of England.

The boundaries of the Economic Planning Regions in England were adjusted on 1 April 1974, to take account of local government re-organisation under the Local Government Act, 1972. It has been decided that the standard regions for statistical purposes will coincide with the revised Economic Planning Regions. The area coding of establishments in the censuses of production for 1974 and 1975 was based in accordance with these boundaries.
