

BOARD OF TRADE

## 5 $42[H A 251]$

## THE REPORT ON THE

 CENSUS OF PRODUCTION FOR 1958
## Part 103 <br> FOOTWEAR

Presented by the Board of Trade to Parliament in pursuance of the
Statistics of Trade Act, 1947 ( 10 \& 11 Geo. 6 Ch.39, Sec.7)

LONDON: HER MAJESTY'S STATIONERY OFFICE
1961

These notes give only the main information which is needed for interpreting the census figures. ller explanations are gi ven
ensus of Production for 1958 ).

Changes in the

Some changes were introduced in the 1958 Some chan
sus, which a
198 fi gures
Returns in
Returns in full detail were required ole Returns in full detail were required only from
rms employing 25 or more persons, instead of,
previously, from firms employing The coverage of firms' returns for 1958 was in cases rather wider than for 1954 . In both
sthe census was based on the estab1ishment ears the

APITAL EXPENDITURE

The expenditure on new building work shown
cludes the cost of land and existing buildings xcludes the cost of land and existing buildings
urchased, for plant, machinery and vehicles both
ew and second-hand items are included. The volue sthat charged to capital account during the year,
ncluding any transport and installation cost ncluding any transport and instaliation cos
nvolved. Capital expenditure in respect of estab
ishments in Great Britain where protuction ishments in Great Britain where production had not
tarted before the end of the year is included in tarted
able 1.
HARACTEAISTIC PRODUCTS (See the description of the
ethod of classification before List of Tables) PLOYMENT
(i) Working proprietors

These include all persons regarded as selfembers of their families who worked in the business ithout receiving fixed wages or salaries; but

(ii) Employees
$\qquad$
 elate to persesn and on the operatives. The figures
ational Insurance cards were hell (i.e. whose aether fullonime cards were held by employers),
or part time employees. The igures for 1958 or plude, but employees. The for 1954
include, persons engaged in merchen und persons engaged
and canten workers.
Administr loyees include managers, superintendents, and works
oremen; research, chnical research, experimental, desige and works ives); draughtsign employees (ond tracers; ther than opera-
travellers; and Operatives include fice) employees. oyees, that is, isclude allo other classes of em-
rners. They include thin, all manual wage he factory or works
ouses, transport work, operatives employed in power ouses, transport work, stores, warehouses and, for
958, canteens; inspectors, viewers and similar orkers, maintenance workers; and and cleaners. perativ
itting
sons employed also included, but outworkers (i.e.
the firm who worked on materials
they were conducted by a separate company, or by a
separate department with a separate set of accounts; separate department with a separate set of accounts;
buiding and engineering maintenance departments were treated similarly. Selling and transport
departments were treated in this way both for 1954 and 1958 . While the effect of way booth fing these
further ancillary activities was urther ancillary activities was generally to
produce higher fi gures for employment etc. the
eporting of separate figures for merchanted goods reporting of separate figures for merchanted goods
led to the exclusion of some firms who proved to be led to the exclusion of some firms who proved to be
merchants wi th only minor productive activities. Changes made for 1958 in the instructions
overning the making of returns for two or more establishments operated by the same firm permitted
combined returns to be made more freely than in revious censuses. Combined returns were accepted and situated in the same country (i.e. England, cotland or Wales ).
The 1954 figures have been re-tabulated to correspond as closely as possible to thase for 1958 ,
but because of the changes described above the correspondence is not always exact
CENSUS REPORTS
supplied by the firm in their own homes, etc.) are

ployees and the number of of working proprietors;
outworkers are excluded Enterprise
The term enterprise is used in this report to mean one or more firms under common ownership or
control as defined in the Companies Act, 1948. An enterprise normally consists either of a single
firm, or of a holding company together with its vtais
NTRIES The number of entries shown in Tables 4, 5 and 7 is the number of returns on which figures against
a particcular utput or production heading were
recorded orresponding number that combined returns were made covering more than Establishivent In most cases an establishment comprises the
whole of the premises under the same ownership or anagenent at a particular addess (e.g. a factory or mine). Offices, warehouses, 1 aboratories and ther ancilary places of business at a separate
ddress from the works were treated as part of the stabli shment
nte rmediate phoducts
For some industries figures are given showing
the total quantities made during the year nt intermediate products, i.e. products which may hey are produced, whethe establishments in which they are produced, whe ther or not they are al so
sometimes sold. They include also goods produced
from materials supplied by other fi mis.

MATERIALS AND FUEL
The totals shown include the cost of all purchases of materials and components for use in
production, and of fuel (including oil, gas and 1 ectricity for all purposes including heating,
ighting and transport (where carried out by firms lighting and transport (where carried out by firms
own staff included in the return); all packing
materials, including the full cost of returnable cases and containers when first purchased; workshop
materials materials; office materials; water charges;
materials for repairs to firms' own buildings, plant
and materials for repairs to firms own buidings, plan
and vehicles when arried out by the ir own wrk-
people included in the return; consumable tools; people included in the return; consumable tools;
and parts for machinery purchased during the year as
replacements. Purchases of goods for merchanting os replacements. Purchases of goods for merchanting or
factoring, and canteen supplies, are included for
1958 but not for 1954 . Materials supplied by customers for processing are excluded for both year
The values shown include any duty The values shown include any duty paid (1ess rebate, etc.
The cost of transport was included only if included
in the cost of materials as invoiced; amounts paid in the cost of materials as invoiced; amounts, paid
to transport organisations, including firms $\begin{aligned} & \text { own }\end{aligned}$ so transport organisations, including firms own
separate transport organis ations, for delivery of
materials and fuel are therefore excluded. Mater-
i indser ials purchased overseas were entered at their c.i.f.
cost plus any duty if the cost of transport from the
docks was not included in the onvo inced price, and at docks was not included in the invoiced price, and at
their full delivered cost if invoiced 'carriage paid
home'
net output
NET OUTPUT The net output of an industry represents the value added to materials by the process of pro-
duction and includes for 1958 the gross margin duction and includes for 1958 the gross margin on
any merchanted or factored goods sold: it con
stitest stitutes the fund from which wages, salaries, rents, rates and taxes, advertising and other selling
expenses, and ali other similar charges have to be expenses, and allother simi ar charges have to be
met, as well as depreciation and profits. There is
no appreci able duplication in net output. no appreciable duplication in net output.
Net output was normally obtained by taking the
total value of sales and work done (including, for total value of sales and work done (including, for
1958, the evalue of merchanted goods sold and canteen
takings); adding the value of stocks at the end of takings); adding the value of stocks at the end of
the year and deducting their value at the beginning of the year, and deducting also the cost of
materials and fuel purchased (including, for 1958 , materials and fuel purchased (including, for 1958 ,
the value of goods purchased for merchanting and
canteen supplies), payments for work given out to canteen supplies), parments for work given out to
other firms, and payments for transport. The net amount of duty paid was deducted, and the net amount

NET OUTPUT PER PERSON EMPLOYED
The figures for net output per person employed
are derived by dividing net output by total employ are derived by di
ment (see above).
PRINCIPAL PRODUCTS (See the description of the
method of classification before List of Tables)
sales
SALES Sales include goods made by the business
covered by the return, those made for it by out covered by the return, those made for it by out
workers or by other firms from materials given out workers or by other firms from materials given out
to them (sometimes described as goods made on
comis ssion), and waste products sold. Any machinery or sher capital it tems produced. for une in the the business covered by the return are also included
the value being that adopted in the firm's capita account for income tax purposes. Coods sold wi thou
being subjected to any manufacturing process (mer being subjected to any manufacturing process (mer
chanted or factored) and cantern takings are in cluded for 1958 but not for 1954 ; where the tota 1
sales of merchanted or factored goods were less than sales of merhanted or factored goods were 1ess than
f5, ooo, firms were permitted to include them with
the figures for sales of goods of their the figures for sales of goods of their own pro-
duction.
The value shown for sales is the net selling

SYMBOLS USED

value, defined as the amount charged to customers whether on an ex-works or del ivered basis, net
any trade discounts, agents' conmissions, allowance any trad discounts, agents comissions, al owance
for returnable cases, purchase tax, etc.; the net
amen amount charged fors packing materials is is includet
Goods charged on a delivered basis to customer Goods charged on a delivered basis to customers
overseas, are included at the f.o.b. value. For
work work done on commission or for the trade, the value
shown is the net amount charged. Wi th a few except shown is the net amount charged. With a few except-
ions, receipts for business and other services are
no ions, receipt.
To the extent that the finished products of one establishment constitute the materials purchased by
another, total figures of the value of sales (and o materials and fuel purchased) include an element of
STOCKS AND WORK IN PROGRESS
The values shown are the income tax values
of stocks of products on hand for sale, and of materials and fuel, at the beginning and end o the year of return. For 1958, but not for 1954, chantinclude any factorins. of The value of work in
chant
progress at the two dates is al so usually shown. progress at the two dates is also usually shown.
This excludes any progress payments made to sub. contractors, and no deduction is made on account of
thansport payment
These represent the total amount paid or
credited during the year for both outwards transpor of finished goods sold and materials and fuel purchased. They include payment
to other fi organ salion of the same firm, not covered by the
return, but exclude the value of transport services return, but exclude the value of transport services
provided by the business covered by the return The
items included are payments for hired cartage and provided by the business covered by the return. The
items included are paments for hired cartage and
for inwards and outwards carriage by all forms for inwards and outwards carriage by all forms o
inland transport, that is railways, road haulage canals, coast-wise shipping, air, etc. Payments made for sea freight on goods sold to customers
overseas and on materials and fuel purchased from overseas and on materials and
overseas suppliers are excluded.
wages and salahies
These are the amounts paid during the year to clerical employees. Payments to working pro-
prietors, whether called salaries or not, are excluded. The values shown include all overtime
payments. bonuses and commissions, whether payments, bonuses and commissions, whether paid
regularly or not, and no deduction is made for income tax, insurances, contributory pensions, etc. The value of any payments in kind, travellin
expenses, lodging allowances, etc. is excluded. etc. Figures are also shown for average salaries etc. paid per head ior the week ended 19 thguctober
1958 . For staff paid monthy, the figures ar
based based on payments made in October, 1955 . Where
payments related to periods other than a week payments related to periods other than a week or Only, thone bonuses and commissions actually paid in
work given out
paid The figures shown represent the total amount paid for work done by other firms on materials
supplied to them, and also by firms. own establish-
ments for which separate returs do not include payments to individual made. The payments for business and other services.

ROUNDING OF FIGURES
The figures in the tables have, where necessary been rounded to the nearest final digit. There may,
therefore, be apparent slight discrepancies between the sums of the constituent items and the total

The Report on the Census of Production for 1958

## Part 103. FOOTWEAR

This report on the Footwear Industry relates to establishments engaged in the manufacture of boots, shoes, slippers, clogs, leather leggings, insoles, etc. The cutting of leather soles and
heels is included but not wooden soles, heels or lasts; rubber boots and goloshes, etc. are also excluded. The industry corresponds to minimum list heading 450 of the second (1958) edition of the Standard Industrial Classification, which has been used for the first time in the 1958 Census

This industry corresponds to Industry 7L (Boot and Shoe) in the reports on the last detailed Census of Production, for 1954, except that particulars relating to establishments mainly engaged part of minimum list heading 479 and are included in the report on Miscellaneous Wood and Cork Manufactures (Part 115 ) ; rubber boots and goloshes form part of minimum list heading 491 and are included in the report on the Rubber Industry (Part 121)

For 1958, returns in full detail were required only from firms employing twenty-five or more persons and most of the tables in this report relate only to these larger firms. This is an important change from previous censuses when returns in full detail were required from firms employing eleven or more persons on productive work. Estimates for the industry as a whole are

The figures given for 1954 correspond as closely as possible to those collected for 1958 but the correspondence is not exact, especially in respect of the small firms who gave only limited information. Some other 1954 and 1958 figures; these are explained in the Ces prefacing this the

The report in
formation which supplements some of the broader figures for sales given in Tablem short period
METHOD OF CLASSIFICATION
lhis industry is defined in terms of its 'principal products' which are those shown in this A census return was classified to this industry if the sales of the principal products of this industry accounted for a greater proportion of its output than the principal products of
any other industry. Where, however, the application of classification between 1954 (on the revised basis) and 1958 , the return was class in a change same industry as for 1954 unless the output of principal products in the new industry was one third more than in the old; this modification of the general rule was designed to avoid dis continuities as the result of marginal changes of output between the two censuses. Sales of takings were a not taken into account in classifying returns.
A slightly different procedure was followed in classifying to the sub-divisions of the industry, shown in Table 2 , the sub-divisions being defined in terms of their characteristic products. The number shown against each item in Table 4 identifies the sub-division of which the Men's, youths' and boys'" 'Women's Census returns were classified to the sub-divisions entitled other materials', 'Slippers' and house shoes' and 'Parts of boots and shoes' only if 50 per cent or more of the total value of goods sold and work done (excluding merchanted goods and canteen takings) consisted of characteristic products of the sub-divisions concerned. Of the remaining above combined sales of the characteristic products of the first three sub-divisions mentioned the sub-division entitled to 50 per cent. or more of total sales, etc.. the return was allocated to 'Other'. The total value of sales of characteristic products shown in Table to the sub-division the products which define the sub-divisions, other items of output assumed to includes, besides into acce.g. waste products and non-specific work done, but such items were not generally taken into account in determining the classification to sub-divisions.
