

## Report on the Census of Production 1963

80
Rope, twine and net

## Report on the Census of Production 1963

80 Rope, twine and net

Presented by the Board of Trade to Parliament in pursuance of the Statistics of Trade Act 1947 (10 \& 11 Geo. 6 Cha. 39 Sec. 7)

## Notes

These notes give the main information needed for Interpreting the figures in the industry report
(More detailed information about the Census is given in a separate booklet - Introductory Notes': Part of the Report on the Census of
Production for

GENERAL IN
Changes in the 1963 census
There were few changes resulting from amendments to the Standard Industrial Classif ficat ion and
only minor changes in the scope of certain industry reports compared with 1958. Any such
changes are explained in the introductions to changes are explained in the introductions to
the industry reports concerned or by footnotes to the tables.
Industrial Classification
Establishments were classified to industries on
the basis of major activity in conformity with the basiso of major activity in conformity with the second edition of the Standard Industrial
Classification (Consolidated Edition 1963. incorporat ing Amendment 1). Each industry basically defined in terms of its principal products, these being of a similar nature or
commonly associated in production. Normall an establishment was classified to an industry
if its sales of the principal products if its sales of the principal products of that industry accounted for a greater proport io
its total sales than did its sales of the principal products of any other industry. ever, where the application of this rule would have resulted in a change of classification
betwen 1958 and 1963 , the establishment was ectlassified only if the sales of principal products of the newly predominant industry was
more than one third greater than the sales of principal products of the previously predominant
industry. This modification of the general industry. This modification of the general rule was introduced for 1958 to avoid dis-
continuit ies which would result from marginal changes in sales between successive censuses.
che principle of classif fication by major The principle of classification by major
output was also normally followed in compiling output was also normally followed in compiling
the analysis by sub-divis ions of an industry. In certain industries, classification was.
dealt with in a different way. Details of dealt with in a different way. Details of any
non-standard treatment are given in the intro-
ductions the revat ductions to the relevant industry reports.

TERMS USED IN THE CENSUS REPORT
Average number employed
Firms were required to state the number of persons on the payroll (i.e. whose Nationa
Insurance cards were held by them) on the average during the year of return, whether full $t$ ime or part-time employees. Separate figures
were required for (a) administrative, technical were required for (a) administrative, technical
and clerical employees and (b) operatives (see below). Averages could be calculated fro figures relating to the last week of each
calendar month; figures shown in respect of the average number employed relate to the sum of these averages. Firms were also required to state the number of working proprietors (see
below) where appropriate and these are included in total employment figures. Outworkers are excluded.

The figures include persons engaged in
The figures include persons engaged in
merchanting or factoring and canteen workers where particulars in respect of these activities
could not be excluded from the return.
Working Proprietors
These include all persons regarded as 'self-
employed' for National Insurance purposes employed for Nat ional Insurance purposes, and members of their families who worked in the salary; but persons who worked less than half the normal number of working hours are excluded For Great Britain, directors working in the
business but business but not in receipt of a definite wage,
salary or commission are included under this salary or commission are included under this
heading for 1963 , but are excluded for 1958 . heading for 1963 , but are excluded for 1958 .
For Northern Ireland, directors of 1 imited companies, other than those paid by fee only,
are included for both years. are included for both years. (Directors paid by fe only are not included in any of
employment figures for either year.)
Employees
(i) Administrative technical and clerical employees include managers, superintendents
and works foremen and works foremen; research, experimental deve lopment, technical and design employee
(other than operatives); draughtsmen and tracers: editorial staff, staff reporters canvassers, compet ition and advertising staff; travellers; and office (including
works of fice) employees. For Great Britain, but not for Northern Ireland, they
include also managing and other directors include also managing and other directors
in receipt of a definite wage, salary or in rece ipt
commission
(ii) Operatives include all other classes of employees, that is, broadly speaking, all
manual wage earners. They include those employed in and abo the factory works; operatives employed in power houses, transport work, stores, warehouses,
shops and canteens; inspectors, viewers shops and canteens; inspectors, viewers
and similar workers; maintenance workers; and cleaners. Operatives engaged in out-
side work of erection, fitting, etc. are side work of erection, fitting, etc. ar
also included, but outworkers (i.e. persons employed by the firm who worked in the ir own homes, etc. on materials
supplied by the firm) are excluded. supplied by the firm) are excluded.
Information about the numbers of outworkers employed was collected only for the gloves
industry.
Capital Expenditure
(i) New building work
(i) New building work.

This represents the cost incurred dur ing
the year of new building and other new the year of new building and other new
constructional work (including of fice conildings, canteens and the like used in
connection with the business covered by th connection itith the business covered by the
return but not dwelling houses for return but not dwelling houses for
employees). The value is that charged to capital account during the year of return;
it includes expenditure on new buildings or it includes expenditure on new buildings or
on the extension or reconstruct ion of old on the extension or reconstruct ion of old
buildings, the value of work of a capital nature carried out by firms' own staff $f$, and the cost of any newly constructed build ing
purchased. The figures shown include any legal charges, stamp duties, agents'
commissions, etc.

This Report on the Rope, Twine and Net Industry relates to establishments engaged holly or mainly in manufacturing rope, twine, string, cord, etc., fishing nets,

This industry corresponds to minimum list heading 416 in the Standard Industrial Classification (Consolidated edition, 1963).

In interpreting the data in the tables it is essential to bear in mind the notes and definitions which appear on pages (ii), (iii) and (iv).

TABLE 1 Industry summary: United Kingdom Estimates for all firms, 1958 and 1963 (a)

(a) For 1963, estimates for small firms and for firms not making satisfactory returns accounted for about 9 per cent. of the total figures in which they were incorporated. (For 1958 the comparable figurewas also 9 per cent.) A summary of the detailed returns received is given in
(b) Including services rendered to other organisations (amounts charged for hiring out plant,
(b) Including services rendered to other or ganisations (amounts charged for hiring out plant,
machinery and other goods, for providing transport, or for technical or other services rendered).
(c) Administrative, technical and clerical employees.
(d) Including pensions and gratuities paid other than from pension funds.
(e) Excluding expenditure for establishments not yet in production.
(f) Acquisitions less disposals.

(a) Including returns made for twelve-month periods ended
1st to 5 th April, 1964. by larger firms, including sales by estab ishments classified to other industries,

This table is not applicable to this industry.

Notes - continued from page in

Capital Expenditure (continued)
(ii) Land and existing buildings.

The items shown are the capital cost of
freeholds purchased and the capital cost premium payable for leaseholds acquired (excluding the value of any assets acquired
in taking over an existing business), and the amounts receivable for any freeholds or
teaseholds disposed of. The value is leaseholds disposed of. The value is that
charged to capital account charged to capital account during the year
of return.
machinery and vehicles
The items shown are the value of plant and
machinery and of vehicles aceuired new and second-hand, and the amount received for items disposed of during the
year. The value of plant and machinery year. The value of plant and machinery
acquired includes plant, etc. which firms produced for the ir own use in connection
vith the business covered by the return. with the business covered by the return.
The value of plant, etc. acquired is the The value of plant, etc. acquired is the
expenditure charged to capital account
during the year of return less any disduring the year of return less any dis-
counts received, but including the cost counts received, but including the cost of
transport and installation. No deduct ion is made for deprectiat ion, amort isation or
obsolescence. The proceeds of items obsolescence. The proceeds of items
disposed of during the year exclude amounts disposed of during the year excl.
written off for items scrapped.
Capital expenditure during the year in respect of manufacturing establishments where pro-
duction had not started before the end of the duction had not started before the end of the
year is excluded in this report for both 1958 and 1963.
Characteristic Products
The characteristic products of a sub-division
are those in terms of which the subdivision defined. They are products commonly associa ted in production and are usually similar in nature or manner of product ion. In most case
the characteristic products of each subthe characteristic products of each sub-
division are indicated in Table 5 of the industry reports. For those industries for which an analysis by sub-divisions has been characterist ic products for each sub-division The totals include, besides the products which
define the sub-division, other items of output define the sub-division, other items of output
assumed to be closely related to them, e.g. waste products and work done.
Enterprise
The term enterprise is used in this report to mean one or more firms under common ownership or
control. An enterprise normally consists control. An enterprise normally consists
either of a single firm, or of a parent company together with its subsidiary companies.
Entries
The number of entries shown in Tables 5,6 and 8 against a particular output or production heading is the number of returns on which Establishment
Establishment
The census was based on the establishment premises under the same ownership or management at a particular address (e.g. a factory or mine); but firms were asked to exclude from all sections of their returns particulars
relating to any department not engaged in pro duction for which they kept a separate set of
decounts. Where separate accounts accounts. Where separate accounts were not
kept, they were asked to include merchant ing factoring, canteens operated by them and other
ancillary activities such as bottling, packing
and the manufacture of containers for packing and the manuracture of containers for packing
the ir own products, whether or not these activities are carried on at the same address as the works. Building and engineering
maintenance departments and selling and tra mort departments were treated similarly.
Gross Output
The gross output of an industry is the aggre-
gate value of goods made and other work done gaue value of goods made and other work done
dur ing the year by the establishments classi fied to the industry. It is derived by sub-
tract ing from the value of sales and work done tracting from the value of sales and work done
the value of stock of goods on hand for sale and work in progress at the beginning of the year
year.

Larger Firms
These are firms in which twenty-five or more persons were employed on the average during the

Net Output
The net output of an industry represents the alue added to materials by the process of pro-
duction. It includes the gross margin on any merchanted or factored goods sold; it constitutes the fund from which wages, salaries,
insurance, pensions, hire of plant and insurance, pensions, hire of plant and
machinery, payments for repairs and mainten ance, costs of operating road vehicles, rents rates and taxes, advertising and other selling
expenses and all other similar charges have to be met, as well as depreciation and prof its. There is no appreciaple duplicat ion in net out-
put. Net output has been obtained by deductput. Net output has been obtained by deduct-
ing from the gross output the cost of purchases
adjusted for sorest adjusted for stock changes, payments for work iven out to other firms, and payments for
transpor
Normally any customs or excise duty on
materials purchased is included in the co naterials purchased is included in the cost of materials. Similarly, finished goods sold
have been valued as they were sold, duty paid or duty free. The amounts of duty, subsidies,
allowances and levies receivable or payable allowances and levies receivable or payable, were required to be stated separately, and thes items were taken into account when calculating net outpu
Net output per person employed
The figures for net output per person employed are derived by dividing the net output by the
average number of persons employed (full-t ime and part-time) on all activities covered by the
returns, including operatives, administrative. returns, including operatives, administrat ive
technical and clerical employees and working technical and clerical employees and wo
proprietors, but excluding outworkers.
Principal Products
The principal products of an industry are those The principal products of an industry are
in terms of which the industry is defined. They are products commonly associated in pro duction, and are usual
manner of product ion
Production
This means the total quantity of a product made to stock the year, whether sold in the year, added the stock, transferred to another department of
the sm, or used in the manufacture of other products within the business covered
ot the return. It includes goods produced from materials supplied by other firms.

Purchases
Purchases include the cost of materials and
components bought for use in production; components bought for use in production; of
fuel and electricity for all purposes; of packturnable cases and containers when first purchased; of workshop materials, office
materials and materials for repairs to firms,
own buildings plant and yehicles when carried materials and mater ials for repairs to firms'
own buildings, plant and vehicles when carried
out by their own workpeople included in the out by their own workpeople included in the
return; of consumable tools: and of parts for return; of consumable tools; and of parts for
machinery purchased during the year as replace--
ments. Water charges are also included. in machinery purchased wur ing the year as replace
ments. Water charges are also included. In
general purchases of goods for merchant ing or general purchases of goods for merchant ing
factor ing and canteen supplies are included factor ing and canteen supplies are included.
Materials supplied by customers for processing
are excluded.
The values shown include any duty paid (less
rebate, etc.) but exclude trade discounts
allowed. The cost of transport is included
only if included in the cost of materials as only if included in the cost of materials as
invoiced; amounts paid to transport organisainvoiced; amounts paid to transport organisa-
tions, including firms' own separate transport organisations, for delivery of materials and
fuel are, therefore, excluded. Materials fuel are, therefore, excluded. Materials purchased overseas are included at their
Cost plus any duty payable if the cost of
transort ras
ransport from the packs was not included in the
invoiced price mot invoiced price, but at the ir full delivered cost
if invoiced carriage paid home'. Materials and fuel transferred from another department of
the firm not covered by the same return are he firm not covered by the same return are
included at the estimated selling value recorded by the other department.
Sales
Sales are in respect of goods made by the it by outworkers or by other firms from mater ials given out to them (somet imes describe
as goods made on commission) and waste products. as goods made on commission) and waste product
Any mach inery or other capital items produced or use in the business covered by the return are included, the value being that adopted in
the firm's capital asset account. Goods sold without being subjected to any manufacturing process (merchanted or factored) and canteen akings are included as in 1958 .
The value shown for sales is the net selling value, def ined as the amount charged to selling customers whether on an ex-works or delivered
basis, net of any trade discounts, agents. basis, net of any trade discounts, agents'
commissions, allowances for returnable case purchase tax, etc.. the net amount charged for
packing materials is included. Goods charged packing materials is included. Goods charged
on a delivered basis to customers overseas are on a divered basis to customers overseas are
included at the f.o.b. Value. For work done on
commission or for the trade the value shown is ommission or for the
the net amount charged
he net amount charged.
Where goods produced in one department were
transferred to another department of the same where goods produced in one department were
transferred to another department of the same
firm not covered by the return, these transfers firm not covered by the rethrn, these transfers
were treated as sales by the producing departwere treated as sales by the producing depart-
ment and valued as far as possible as if they
had been sold to an independent ad been sold to an independent purchaser. Goods transferred to wholesale or retail sell-
ing organisations for which separate accounts ing organisations for which separate accout
were kept were valued on the same basis.
Estimations of a similar kind were also stimations of a similar kind were also someimes necessary in valuing transfers betwee
ifferent firms belonging to the same enter prise. To the extent that the sales of inished products of one establishment may
constitute the materials purchased by another, onstitute the materials purchased by anothe
otal figures of the value of sales (and of naterials and fuel purchased) include an

Services rendered
This represents the amounts charged for hirirg
out plant, machinery and other goods, providing out plant, machinery and other goods, providing
transport, or for any technical or other
services rendered to other organisations. It
ncludes amounts credited for similar services endered to other departments of the same firm
ot covered by the return.

## Small Firms

hese are firms in which fewer than twenty-five ersons were employed on the average during the

Stocks and Work in Progress
Values are given of stocks of goods on hand for sale, and of materials and fuel, at the beinning and end of the year of return, including any stocks of goods held for merchant ing or
actoring. The values include duty in the case
The of dutiable goods hell out of bond. The value f work in progress at the two dates is also
sually shown. This excludes any progress usualy shown. This excludes any progress
payments made to sub-contractors, and no de-
duction is made on account of progress payment duction is made on account of progress payments
received. received.
Tansport Payments
These represent the total amount paid or transport of $f$ inished goods sold and wards
inwards ransport of materials and fuel purchased. any separate transport organisation of the same ay separate transport organisation of the same
firm, not covered by the return, but exclude
he value of transport services. the value of transport services provided by the business covered by the return. The items inwards and outwards carriage by all forms of
inland transport, i.e. railways, road haulage, anals, coast-wise shipping, air, etc.
Payments made for sea freight on goods sold to ustomers overseas and on materials and fuel purchased from overseas suppliers are excluded.
Wages and Salaries
These are the amounts paid during the year to
operatives and to administrative, technical and clerical employees. Payments to working oprietors, whether called salaries or not. re excluded; in Northern Ireland this exclusion extends also to payments to
directors of limited companies. The value hown include all overtime payments, bonuses and comnissions, whether paid regulalily or not
and no deduction is made for income tax. isurances, contributory pensions, etc. The value of any payments in kind, travelling expenses, lodging allowances, etc. and
employers. contribut ions to National Insurance
and pension schemes is excluded.
Work given out
The figures shown represent the total amount
paid for work done by other firms on materials paid for work done by other firms on materials
supplied to them, and also by firms' supplied to them, and also by firms own
establishments for which separate returns were made. They do not include payments to individual outworkers or payments for business nd other servic
Symbols used
The following symbols are used throughout the
