Report on the Census of Production

Summary tables

Presented by the Department of Industry
to Parliament in pursuance of the Statistics of Trade Act 1947
(10 & 11 Geo. 6 Cha. 39 sec 7)

The Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

Enquiries about statistics in this publication should be made to the Business Statistics Office, Cardiff Road, Newport, Gwent, NPT 1XG Telephone 0633-56111 ext 2455.

London: Her Majesty's Stationery Office 1976

SUMMARY TABLES

NOTES

1 This Business Monitor presents summary detail of the Census of Production for 1971, at establishment and enterprise level. Comparative data for 1970 is given in establishment tables 1 and 2. Where revised figures have become available since the publication of the separate industry Monitors for 1971 the opportunity has been taken to include them in these summary tables. The Census of Production for 1971 is the second of the new annual series, which forms part of the new integrated system of industrial statistics being introduced by the Government Statistical Service. The complete system comprises quarterly inquiries into manufacturers' sales of products, annual censuses and less frequent inquiries into additional subjects, including details of purchases of goods and services by industry. It replaces the various short-period inquiries conducted by different Government departments and the detailed censuses which have been taken fairly regularly since 1907. The last detailed quinquennial census was for 1968. These notes give the main information needed for interpreting the figures: more detailed information about the census is given in a separate Business Monitor – PA1001 (Introductory Notes), Report on the Census of Production, 1971.

2 *Disclosure of information*

The summary tables have been prepared in conformity with the disclosure provisions of the Statistics of Trade Act 1947. In order to avoid disclosing information about individual enterprises it has in some cases not been possible to publish information in the full detail in which it was collected.

3 *Symbols used*

The following symbols are used throughout:

.. Not available

– Nil or less than half the final digit shown

* Figures cannot be shown owing to the risk of disclosing information about individual enterprises

R Revised

4 *Rounding of figures*

The figures in the tables have, where necessary, been rounded to the nearest final digit. There may, therefore, be an apparent slight discrepancy between a sum of constituent items and a total shown.

5 *Order and higher aggregations*

Where no footnote is given against an Order or higher aggregation the reader should nevertheless refer to and take into account any notes given against the industries which constitute that Order or Orders which constitute a higher aggregation.

6 *Industrial classification*

The Annual Censuses of Production are conducted on the Business Statistics Office's Production Register. Normally establishments on the Register are classified to industries on the basis of major activity in conformity with the third edition of the Standard Industrial Classification (revised 1968). Normally an establishment was classified to an industry if its sales of the principal products of that industry accounted for a greater proportion of its total sales than its sales of the principal products of any other industry; classification is generally based on an establishment's returns to the quarterly production inquiry. Where this was not possible – for example where a quarterly production inquiry had not then been introduced – the classification of an establishment reflects its return to the Census of Production, 1968. Establishments for which information was not available either from the quarterly inquiries or the 1968 Census were classified on the basis of the description of the business given by the establishments to the Business Statistics Office, for instance, in the course of registration.

7 *Coverage*

Detailed census returns were generally sought only from establishments employing on average 25 or more persons, but in industries where firms employing less than 25 persons account for a relatively high proportion of total employment and output the exemption limit was lowered to 11. Census returns were also sent to establishments whose employment was not known to the Business Statistics Office at the time of despatch.

TERMS USED IN THE CENSUS REPORT

8 *Average number employed*

Establishments were required to state the number of persons on the payroll (i.e. whose national insurance cards were held by them) on the average during the year of return, whether full time or part time employees. Separate figures were required for (a) administrative, technical and clerical employees and (b) all other employees (operatives). Averages could be calculated from figures relating to the last week of each calendar month. Establishments were also required to state the number of working proprietors where appropriate and these are included in total employment figures. Outworkers (i.e. persons employed by establishments who worked in their own homes etc. on materials supplied by the establishments) are

excluded.

The figures include persons engaged on merchanting or factoring and canteen workers where particulars in respect of these activities could not be excluded from the return.

9 Working Proprietors

These include all persons regarded as "self-employed" for national insurance purposes and members of their families who worked in the business without receiving a fixed wage or salary; but such persons who worked less than half the normal number of working hours are excluded. Directors working in the business but not in receipt of a definite wage, salary or commission are included under this heading: directors paid by fee only are not included.

10 Employees

Administrative, technical and clerical employees include managing and other directors in receipt of a definite wage, salary or commission, managers, superintendents and works foremen; research, experimental development, technical and design employees (other than operatives); draughtsmen and tracers; editorial staff, staff reporters, canvassers, competition and advertising staff; travellers; and office (including works office) employees.

Operatives include all other classes of employees, that is, broadly speaking, all manual wage earners. They include those employed in and about the factory or works; operatives employed in power houses, transport work (including roundsmen), stores, warehouses, shops and canteens; inspectors, viewers and similar workers; maintenance workers, and cleaners.

Operatives engaged in outside work of erecting, fitting etc. are also included, but outworkers are excluded.

11 Capital expenditure

Capital expenditure during the year in respect of manufacturing units where production had not commenced before the end of the year is included in the figures for both 1970 and 1971.

(a) New building work

This represents the cost incurred during the year of new building and other constructional work (including office buildings, canteens and the like used in connection with the business covered by the return, but not dwelling houses for employees).

The value is that charged to capital account during the year of return; it includes expenditure on new buildings or on the extension or reconstruction of old buildings, the value of works of a capital nature carried out by the establishment's own staff and the cost of any newly constructed buildings purchased. Figures shown include any legal charges, stamp duties, agents' commissions, etc.

(b) Land and existing buildings

The items shown are the capital cost of freeholds purchased and the capital cost of premium payable for leaseholds acquired (excluding the value of any assets acquired in taking over an existing business), and the amounts receivable for any freeholds or leaseholds disposed of. The value is that charged to capital account during the year of return.

(c) Plant, machinery and vehicles

The items shown are the value of plant and machinery and of vehicles acquired, both new and second-hand, and the amount received for items disposed of during the year. The value of plant and machinery acquired includes plant, etc., which firms produced for their own use in connection with the business covered by the return. The value of plant, etc., acquired is the expenditure charged to capital account during the year of return less any discounts received, but including the cost of transport and installation. No deduction is made for depreciation, amortization or obsolescence. The proceeds of items disposed of during the year exclude amounts written off for items scrapped.

12 Enterprise

The term enterprise is used in this report to mean one or more establishments under common ownership or control. An enterprise normally consists of a single establishment, more than one establishment owned by the same firm, or a number of establishments owned by a parent company and its subsidiary company or companies. Information about the relationship between constituent companies of enterprises was obtained mainly from published sources such as the Stock Exchange Year Book supplemented by information from company reports and information supplied by establishments. The information available is not complete but covers the largest and most important groups of industrial establishments and is believed sufficient to provide a worth-while basis for analysis.

13 Establishment

The definition of an establishment in 1970 and 1971 was that of the Standard Industrial Classification (revised 1968): "the smallest unit which can provide the information normally required for an economic census, for example, employment, expenses, turnover, capital formation." Sometimes activities which are conducted as a single business are carried on at a number of addresses, termed local units. Where the activities of such a business are closely integrated, and detailed census information is not available for each unit, it is treated as a multi-unit establishment and a single return accepted. Separate figures are obtained, however, of employment and net capital expenditure at each unit.

14 Gross output

Gross output measures the total value of production (including work done) by establishments during the year. It is calculated as follows:-

	Value of sales and work done
Plus/Less:	Increase/decrease in value of stocks of goods on hand for sale
Plus/Less:	Increase/decrease in value of work in progress
=	Gross output.

15 Net output

Net output represents the value added to materials by the process of production (including the margin on selling any merchanting or factored goods). It is calculated as follows:-

	Gross output
Less:	Purchases adjusted for change in value of stocks of fuel and raw materials
Less:	Payments for work given to other establishments
Less:	Payments for transport
Less:	Net amount of any duties, subsidies, allowances and levies payable
=	Net output.

16 Net output per person employed

The figures of net output per person employed are derived by dividing the net output by the average number of persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

17 Purchases

Purchases include the cost of materials and components bought for use in production; of fuel and electricity for all purposes; of packaging materials including the cost of returnable cases and containers when first purchased; of workshop materials, office materials and materials for repairs to establishment's own buildings, plants and vehicles when carried out by their own work people included in the returns; of consumable tools; and of parts for machinery purchased during the year as replacements. Water charges are also included. In general, purchases of goods for merchanting or factoring and canteen supplies are included. Materials supplied by customers for processing are excluded, as are all purchases charged to capital account.

The values shown include any duty paid (less rebate, etc.) but exclude trade discounts allowed. The cost of transport is included only if included in the cost of materials as invoiced; amounts paid to transport organisations, including an establishment's own separate transport organisations for delivery of materials and fuel are, therefore, excluded. Materials purchased overseas are included at the c.i.f. cost plus any duty payable if the cost of transport from the docks was not included in the invoiced price, but at their full delivery cost if invoiced "carriage paid home". Materials and fuel transferred from another department of the establishment not covered by the same return are included at the estimated selling value recorded by the other department.

18 Sales

Sales are in respect of goods made by the business covered by the return, goods made for it by outworkers or by other establishments from materials given out to them (sometimes described as goods made on commission) and waste products. Any machinery or other capital items produced for use in the business covered by the return are included, the value being that adopted in the establishment's asset accounts. Goods sold without being subjected to any manufacturing process (i.e. merchanting or factored) and canteen takings are included.

The value shown for sales is the net selling value, defined as the amount charged to customers whether on an ex-works or delivered basis excluding any trade discounts, agents' commissions, allowances for returnable cases, purchase tax, etc.; the net amount charged for packaging materials is included. Goods charged on a delivered basis to customers overseas are included at the f.o.b. value.

Goods produced in one establishment and transferred to another establishment of the same firm not covered by the return were treated as sales by the producing establishment and valued as far as possible as if they had been sold to an independent purchaser. Goods transferred to wholesale or retail selling organisations for which separate accounts were kept were valued on the same basis.

To the extent that sales of finished products of one establishment constitute the materials purchased by another, total figures of the value of sales (and of materials and fuel purchased) include an element of duplication. In some industries, e.g. motor vehicle manufacturing, and woollen and worsted, this duplication is substantial; and aggregates of the figures for a number of industries contain significantly greater amounts of duplication. For work done on commission, sub-contract work, etc., the value shown is the total amount charged for the work, including the value of any materials bought and used in such work.

19 Services rendered

This represents the amounts charged for hiring out plant, machinery and other goods, providing transport, or for any technical or other services rendered to other organisations. It includes amounts credited for similar services rendered to other establishments of the same enterprise not covered by the return.

20 *Standard Industrial Classification*

Industry classification is based on the Standard Industrial Classification (revised 1968). It is published by HM Stationery Office together with a separate index in the form of an alphabetical list of industries.

21 *Stocks and work in progress*

Values are given of stocks of goods on hand for sale and of materials, stores and fuel, at the end of the year of return, including any stocks of goods held for merchanting or factoring. Values of the increase during the year are also shown. The values include duty in the case of dutiable goods held out of bond. The value of work in progress at the end of, and the increase during the year are also usually shown. This excludes any progress payments made to sub-contractors, and no deduction is made on account of progress payments received.

22 *Transport payments*

These represent the total amount paid or credited during the year for both outwards transport of finished goods sold and inwards transport of materials and fuel purchased. They include payment to other establishments, and to any separate transport organisation of the same establishment not covered by the return, but exclude the value of transport services provided by the business covered by the return. The items included are payments for hired cartage and for inwards and outwards carriage by all forms of inland transport, i.e. railways, road haulage, canals, coastwise shipping, air, etc. Payments made for sea and air freight on goods sold to customers overseas and on materials and fuel purchased from overseas suppliers are excluded.

23 *Wages and salaries*

These are amounts paid during the year to operatives and to administrative, technical and clerical employees. Payments to working proprietors, whether called salaries or not, are excluded. The values shown include all overtime payments, bonuses and commissions, whether paid regularly or not, and no deduction is made for income tax, insurances, contributory pensions, etc. The value of any payments in kind, travelling expenses, lodging allowances, etc. and employers' contributions to national insurances and pension schemes is excluded.

24 *Work given out*

The figures shown represent the total amount paid for work done by other establishments (whether part of the same enterprise or not) on materials supplied to them. They do not include payments to individual outworkers or payments for business and other services.

Footnotes to Table 1

- (a) Including estimates for small establishments and for establishments not making satisfactory returns.
- (b) References to Orders are to those in the Standard Industrial Classification (revised 1968). Industry code numbers indicate the minimum list heading (MLH) and, if appropriate, a sub-division of a minimum list heading. For industries covering two or more sub-divisions, the sub-divisions are given in brackets.
- (c) The term enterprise is used in this Report to mean one or more establishments under common ownership or control.
- (d) Number of enterprises engaged in each industry. The sum of these figures is greater than the total number of enterprises since some enterprises are engaged in more than one industry.
- (e) Including services rendered to other organisations (amounts charged for hiring out plant, machinery or other goods, for providing transport, or for any technical or other services rendered).
- (f) Including payments for work given out to other firms and payments for transport.
- (g) Including persons engaged in merchandising or factoring and canteen workers (where particulars in respect of these activities could not be excluded from the returns) and working proprietors, but excluding outworkers.
- (h) Average number employed (full and part-time) during the year (including working proprietors) by the establishment.
- (j) Administrative, technical and clerical employees.
- (k) Great Britain only.
- (l) Particulars of opencast coal production, farms, canteens, etc. are excluded.
- (m) The following non-manufacturing industries give information, not for establishments, but for statistical units described as undertakings:-
 - Coal mining (the number of colliery units for administrative and accounting purposes exclusive of any mines not in active production. In some cases these undertakings comprise more than one mine)
 - Gas
 - Electricity
 - Water supply
- (n) Excluding the value of all colliery consumption of coal.
- (o) Figures relate to the cost of materials and fuel used and exclude the value of all colliery consumption of coal.
- (p) Sales of products are valued at ex-quarry (ex-mine) or ex-works prices, the cost of transport being excluded.
- (q) Including cost of outward transport on goods sold.
- (r) Including off-shore operations relating to the United Kingdom part of the continental shelf.
- (s) Sales of products are valued at ex-mine or ex-works prices, the cost of transport being excluded except that sales in the Petroleum and natural gas sector are valued at an ex-works or delivered basis.
- (t) Roundsmen and shop assistants are included.
- (u) For 1971, figures for merchanted goods are included in sales of goods produced and work done.
- (v) Sales are generally valued at open market prices f.o.b. in the Gulf of Mexico plus current rates of freight and insurance to the United Kingdom, and purchases of feedstock are valued at open market prices f.o.b. at the port of origin plus current rates of freight and insurance to United Kingdom. The size of net output is largely determined by methods of valuation.
- (w) Including contractors responsible for the design, engineering, procurement, construction and commissioning of complete plants for process industries such as chemicals, petro-chemicals, oil refining and gas.
- (x) Operatives employed in quarries or clay pits which were associated with brick or cement works are included.
- (y) Casual workers (jobbers) have been excluded from the employment data used in calculating net output.
- (z) Excluding Gas undertakings.
- (aa) Figures for stocks of materials, stores and fuel are included in the cost of purchases.
- (bb) Sales of gas and other products, charges for work done, rents received and work of new construction.

- (cc) Sales of electricity, by-products and waste products, charges for work done, rents received and work of new construction.
- (dd) Value of water supplied, work done for which a direct charge was made and work of new construction.

TABLE 2
All United Kingdom establishments classified to manufacturing, mining, quarrying and construction, 1970 and 1971

Industry	1970		1971

- (a) Including estimates for small establishments and for establishments not making satisfactory returns.
- (b) Capital expenditure in respect of establishments where production had not commenced before the end of the year, is included.
- (c) References to Orders are to those in the Standard Industrial Classification (revised 1968). Industry code numbers indicate the minimum list heading (MLH) and, if appropriate, a sub-division of a minimum list heading. For industries covering two or more sub-divisions, the sub-divisions are given in brackets.
- (d) New building work, plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery.
- (e) Great Britain only.
- (f) Including off-shore operations relating to the United Kingdom part of the continental shelf.

Footnotes to Table 4

- (a) References to Orders are to those in the Standard Industrial Classification (revised 1968).
- (b) Average number employed (full and part-time) during the year (including working proprietors) by the establishment.
- (c) New building work, plus acquisitions less disposals of land and existing buildings, vehicles, plant and machinery. Capital expenditure in respect of establishments where production had not commenced before the end of the year, is included.
- (d) Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to the region only where more than 80 per cent of the establishment's employees were located in the region. The estimate was made by assuming that net output at each address covered by a return was proportionate to employment at the address. The establishment's residual net output was included in unallocated net output.
- (e) Includes estimates of net output for establishments not making satisfactory returns and for small establishments and unallocated net output of establishments covering addresses in two or more regions.

TABLE 5 (continued)

Standard Industrial Classification Orders or minimum list heading (a)	Industry	Average number employed (b)	
		Thousands	per cent of United Kingdom
ORDERS XVI-XIX	Other manufacturing industries (continued)		
496	Plastics products	2.4	2.2
499(1)	Musical instruments	*	*
499(2)	Miscellaneous manufacturing industries	*	*
ORDER XXI	Gas, electricity and water	29.4	8.0
601	Gas	7.8	6.7
602	Electricity	17.7	8.6
603	Water supply	3.8	8.7

- (a) References to Orders are to those in the Standard Industrial Classification (revised 1968). Industry code numbers indicate the minimum list heading (MLH) and, if appropriate, a sub-division of a minimum list heading. For industries covering two or more sub-divisions, the sub-divisions are given in brackets.
- (b) Average number employed (full and part-time) during the year (including working proprietors) by the establishment.
- (c) New building work, plus acquisitions, less disposals of land and existing buildings, vehicles, plant and machinery. Capital expenditure in respect of establishments where production had not commenced before the end of the year, is included.

Net capital expenditure (c)		Net output and employment in Scotland of establishments with more than 80 per cent of their employment in Scotland (d)		
		Estimated net output	Average number employed as a percentage of total average number employed in the industry in Scotland	Net output as percentage of total of the industry in the United Kingdom
£ million	per cent of United Kingdom	£ million		
0.9	2.7	4.2	72.3	1.7
*	*	*	*	*
*	*	*	*	*
97.9	12.9	173.7	100.0	9.2
9.9	6.1	27.9	100.0	6.4
77.0	15.8	128.8	100.0	10.4
10.9	10.0	17.0	99.8	8.4

- (d) Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to Scotland only where more than 80 per cent of the establishment's employees were located in Scotland. The estimate was made by assuming that net output at each address covered by a return was proportionate to employment at the address. The establishment's residual net output was included only in the total for United Kingdom (see table 4). Estimates of net output for establishments not making satisfactory returns and for small establishments are included only in the United Kingdom total and are not distributed among Scottish figures.
- (e) Excluding Petroleum and natural gas.

TABLE 6 (continued)

Standard Industrial Classification Orders or minimum list heading (a)	Industry	Average number employed (b)	
		Thousands	per cent of United Kingdom
ORDERS XVI-XIX	Other manufacturing industries (continued)		
496	Plastics products	4.0	3.7
499(1)	Musical instruments	*	*
499(2)	Miscellaneous manufacturing industries	0.7	3.9
ORDER XXI	Gas, electricity and water	18.9	5.2
601	Gas	4.4	3.8
602	Electricity	11.5	5.6
603	Water supply	2.9	6.6

- (a) References to Orders are to those in the Standard Industrial Classification (revised 1968). Industry code numbers indicate the minimum list heading (MLH) and, if appropriate a sub-division of a minimum list heading. For industries covering two or more sub-divisions, the sub-divisions are given in brackets.
- (b) Average number employed (full and part-time) during the year (including working proprietors) by the establishment.
- (c) New building work, plus acquisitions less disposals of land and existing buildings, vehicles, plant and machinery. Capital expenditure in respect of establishments where production had not commenced before the end of the year, is included.

Net capital expenditure (c)		Net output and employment in Wales of establishments with more than 80 per cent of their employment in Wales (d)		
		Estimated net output	Average number employed as a percentage of total average number employed in the industry in Wales	Net output as percentage of total of the industry in the United Kingdom
£ million	per cent of United Kingdom	£ million		
1.2	3.8	6.3	60.8	2.5
*	*	*	*	*
0.1	3.4	1.1	81.3	3.7
41.5	5.5	*	*	*
5.7	3.5	11.3	100.0	2.6
21.5	4.4	63.4	100.0	5.1
14.3	13.1	*	*	*

- (d) Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to Wales only where more than 80 per cent of the establishment's employees were located in the Principality. The estimate was made by assuming that net output at each address covered by a return was proportionate to employment at the address. The establishment's residual net output was included only in the total for United Kingdom (see table 4). Estimates of net output for establishments not making satisfactory returns and for small establishments are included only in the United Kingdom total and are not distributed among Welsh figures.
- (e) Excluding Petroleum and natural gas.

TABLE 7 Percentage analysis of twelve-month periods covered by returns received from United

Standard Industrial Classification Order		Percentage

- (f) Including sales of goods merchanted or factored, canteen takings and services rendered to other organisations (amounts charged for hiring out plant, machinery or other goods, for providing transport, or for any technical or other services rendered).
- (g) New building work, plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery. Capital expenditure in respect of establishments where production had not commenced before the end of the year, is included.
- (h) The figures for mining and quarrying relate only to Great Britain.
- (j) Including Central Government trading bodies, local authorities and public corporations. Water companies and water boards are also included.

- (d) Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to the region only where more than 80 per cent of the establishment's employees were located in the region. The estimate was made by assuming that net output at each address covered by a return was proportionate to the employment at the address. The establishment's residual net output is shown as unallocated net output.

APPENDIX

LIST OF INDUSTRY REPORTS, ETC.

The symbol # indicates a report in which establishments with less than 25 persons were of importance and where establishments with 11 or more persons engaged in the business were asked to complete a census return.

PA1002	Summary tables	603

APPENDIX

Regional Classification

The list below gives definitions of the countries of the United Kingdom and of the regions of England.

Area coding of establishments in the Census of Production, 1971 was based on areas defined by the Department of Employment. These conform to the standard regions for statistical purposes as defined by the Central Statistical Office in agreement with other Government Departments. Regions coincide with those used for economic planning, before 1 April 1974.

The boundaries of the Economic Planning Regions in England were adjusted on 1 April 1974 to take account of local government re-organisation under the Local Government Act, 1972. It has been decided that the standard regions for statistical purposes will coincide with the revised Economic Planning Regions.

As this summary volume contains data only for a year prior to the re-organisation, classification is in accord with the boundaries which existed before 1 April 1974.

Areas

North

Cumberland, Durham, Northumberland, Westmorland, and the North Riding of Yorkshire.

Yorkshire and Humberside
