

OFFICE OF CENSUS AND STATISTICS.

NO. 77. PRELIMINARY RESULTS OF THE CENSUS OF EUROPEANS,
5TH MAY, 1931. (REVISED TO THE 21ST JULY, 1931).

INTRODUCTORY NOTES.

There has been a considerable demand from various sources for detailed figures of the preliminary results of the Census of Europeans taken on the 5th May of this year. The following three tables have, therefore, been prepared for the information of the public.

1. Summary of the results in the Urban and Rural Areas of each Province.
2. Population of the towns, villages and rural areas in each Magisterial District.
3. Population in the large urban centres and their suburbs.

The figures have been revised to date (21st July, 1931) and are subject to further revision during the course of tabulation.

A note of warning must be issued in regard to any conclusions which might be drawn from these crude figures. While there has undoubtedly been a drain of population from the rural areas to the towns, the position is not quite accurately represented by the crude figures in Table 1, because quite a number of settlements and small villages which were treated as rural at the Census of 1926, had attained the status of Urban Local Government areas during the intercensal period.

NO. 77. VOORLOPIGE RESULTATE VAN DIE SENSUS VAN EUROPEANE, 5 MEI, 1931. (HERSIEN TOT 21 JULIE, 1931).

INLEIDENDE OPMERKINGE.

Daar is heelwat aanvraag uit verskillende oorde vir uitvoerige syfers van die voorlopige resultate van die Sensus van Europeane wat 5 Mei van hierdie jaar opgeneem is. Die volgende drie tabelle is dus saamgestel vir die edifikasie van die publiek.

- 1. Oorsig van die resultate in die Stedelike en Plattelandse Gebiede van elke Provinsie.
2. Bevolking van die stede, dorpe en plattelandse streke in elke Magistraatsdistrik.
3. Bevolking van die groot stedelike centra en hulle voorstede.

Die syfers is hersien tot op datum (21 Julie, 1931), en is onderhewig aan verder hersiening gedurende die tabellering.

Daar moet gewaarsku word teen enige gevolgtrekking wat op hierdie voorlopige syfers gebaseer mag word. Hoewel daar ongetwyfeld 'n stroming uit die plattelandse streke na die stede was, word die toestand nie heeltemal noukeurig deur die voorlopige syfers in Tabel 1 weergegee nie, want 'n hele aantal nedersettings en dorpiee wat by die Volkstelling van 1926 plattelands beskou was, het in die tydperk tussen die Volkstellings die status van Stedelike Plaaslike Bestuursgebiede verkry.

The figures have been revised to date (21 July, 1931), and are subject to further revision during the course of tabulation.

A note of warning must be issued in regard to any conclusions which might be drawn from these figures. While there is no doubt that a stream of population from the rural areas to the towns has taken place, it is not quite accurately represented by the figures in Table 1, because quite a number of settlements and small villages which were treated as rural at the Census of 1926, had obtained the status of Urban local Government areas during the interval period.
