# Census of England and Wales 1931

Census volumes in respect of the counties of England and Wales have now been published.

Parts I of the series, which are complete, relate to the areas as constituted at the date of the Census. Parts II will deal with the changes in boundary effected by County schemes under the Local Government Act of 1929, and will provide a limited range of statistics in respect of the newly constituted areas.

Sectional volumes presenting the results of the census of industries, occupations, etc. are also available, and particulars will be furnished on application.

ENGLISH COUNTIES.			
BEDFORD	Pt. I, 2s. (2s. 2d.) II, 9d. (10d.)	NORFOLK Pt. I, 3s. 6d. (3s. 8d.) II, 1s. 3d. (1s. 4d.)

TABLE E. POPULATION, BIRTHS, DEATHS  
AND INFANT MORTALITY, 1935.

England and Wales, Regions,  
Counties, Boroughs, Urban Dis-  
tricts and Rural Districts.

## NOTES.

Column 2: The estimates of *resident* populations have been derived from the 1931 Census returns after allowances for (a) the difference between resident and enumerated populations and (b) the changes due to births, deaths and migration which have occurred between the date of the Census and the middle of the current year. (See note on the next page re changes in boundaries.)

Columns 3-7: Live births are those *registered* during the calendar year and are classified according to the area of residence of the mother. The average time lag between occurrence and registration is usually about a month.

Columns 9-11: Deaths are those *registered* during the calendar year and are classified according to the area of residence of the deceased. The time lag between occurrence and registration is usually only a day or two.

Columns 13-14: Mortality comparisons yielded by the crude death rates (col. 12) alone are vitiated by reason of the fact that the areal populations on which they are based may be of widely differing age constitutions. With a view to eliminating this element of variation, an areal comparability factor (A.C.F.) is provided in column 13 for each area and this, when multiplied by the crude death rate of the area, produces an adjusted death rate which may be regarded as comparable from a mortality point of view with the contemporaneous adjusted rate for any other area or with the crude death rate for England and Wales as a whole (where the comparability factor is unity). A guide to the relative incidence of mortality in different areas is provided by column 14 which expresses each local adjusted rate as a ratio of the contemporaneous national rate. See italic note on standardization below.

Columns 17-19: (Shewn only for the Regional Summary): The rates of increase and decrease are in respect of the areas as constituted after all changes of boundaries which occurred during the year.

Regions: The constitution of the Regions shewn in the summary on page 10 is as follows:—

<i>Greater London.</i> The area coincident with the City of London and Metropolitan Police Districts — approximately 15 miles radius from Charing Cross.	<i>North I.</i> Durham. Northumberland.	<i>Midland II.</i> Derbyshire. Leicestershire. Northamptonshire. Nottinghamshire. Peterborough, Soke of.	<i>Wales I.</i> Brecknockshire. Carmarthenshire. Glamorganshire. Monmouthshire.
	<i>North II.</i> Cumberland. Westmorland. Yorkshire, East Riding. " North Riding.	<i>East.</i> Cambridgeshire. Ely, Isle of. Huntingdonshire. Lincolnshire— Parts of Holland. " Kesteven. " Lindsey.	<i>Wales II.</i> Anglesey. Caernarvonshire. Cardiganshire. Denbighshire. Flintshire. Merionethshire. Montgomeryshire. Pembrokeshire. Radnorshire.
<i>South East.</i> Bedfordshire Berkshire. Buckinghamshire. Essex. Hertfordshire. Kent. London. Middlesex. Oxfordshire. Southampton. Surrey. Sussex, East. " West. Wight, Isle of.	<i>North III.</i> Yorkshire, West Riding York C.B.	Norfolk. Rutlandshire. Suffolk, East. " West.	
	<i>North IV.</i> Cheshire. Lancashire.	<i>South West.</i> Cornwall. Devonshire. Dorsetshire. Somersetshire. Wiltshire.	
	<i>Midland I.</i> Gloucestershire. Herefordshire. Shropshire. Staffordshire. Warwickshire. Worcestershire.		

With a view to maintaining continuity with the Divisions in use prior to 1931, two supplementary sub-divisions of the current South-East region are shewn in the Table. The former Midland division corresponds to the aggregate of the current Midland and East and Midland section of the South-East Region; the former South (including London) corresponds to the current South-West and the Southern section of the South-East Region; North and Wales are identical in the two arrangements.

Changes in boundaries. Areas marked  $\left\{ \begin{array}{l} * \text{ have been altered} \\ † \text{ " " created} \\ ‡ \text{ " " abolished} \end{array} \right\}$  during the year. Unless

otherwise indicated, statistics of areas created or abolished refer only to the portion of the year of their existence, while statistics of areas whose boundaries have been altered are composite figures combining the "before change" and "after change" position for the respective periods involved. The population of each area as constituted after change will be found in the Appendix to this volume (pages 126-135), the population shown in column 2 of this Table being a constructed figure appropriate for use with the partial or mixed records of births and deaths of the current year.

*Standardization of Local Death Rates.*—The A.C.F. shewn for each area in col. 13, the use of which is explained in the above note on cols. 13-14, may be regarded as an index of the relationship of the sex-age distribution of the local population to that of the total national population as disclosed by the 1931 census. Strictly it applies only to the year 1931, but it may, in practice, be used for adjacent years on either side and will continue to be so used in the absence of any better index—until fresh factors are available from the next census, on the assumption that age changes known to be taking place from time to time in the national population are more or less paralleled by corresponding types of change in most local areas, in which event the relationship between them expressed by the A.C.F. will be subject to little alteration from year to year. The current A.C.F. is only reviewed and revised, if necessary, upon a change in boundary.

While the use of the A.C.F. alone suffices to standardize, for the purpose of valid comparison, the mortalities of different areas in the same period of time it does not suffice for the comparison of mortalities at different periods of time, either of the same or of different areas. For the latter purpose, an analogous time comparability factor (T.C.F.) must be introduced, so constructed as to eliminate the effect of sex-age changes in population taking place from time to time. For the country as a whole, such T.C.F.s are available from the ratios of standardized to crude death rates set out in Table 3, and for recent years are as follows:—1929, .853; 1930, .838; 1931, .820; 1932, .808; 1933, .796; 1934, .790; 1935, .768. Upon the assumption of a similarity of temporal age trends in national and local populations, the national T.C.F.s for successive years can be used in conjunction with the A.C.F.s of local areas, the product of an A.C.F. and a T.C.F. yielding a combined comparability factor (C.C.F.) which, when multiplied by the crude death rate to which it applies, may be regarded as producing a standardized death rate comparable with the correspondingly treated crude death rate of any other place and time or with the national standardized rates shewn in Table 3 of Part I. Statistical Review.

It is to be observed that the A.C.F.s and T.C.F.s now provided apply only to total mortalities from all causes. They are not appropriate for use with selected diseases or causes.

For a fuller description of the standardizing processes, reference should be made to the Text portion of the Statistical Review for 1934.

TABLE E—continued.

(See notes on first page of Table)

AREA.	Esti- mated Resident Popula- tion (Middle 1935).	LIVE BIRTHS.						DEATHS.						Deaths under 1 year.		Increase or Decrease (—) of Population per cent. Census 1931— Mid. 1935.		
		Legitimate.		Illegitimate.		TOTAL.	Crude Rate per 1,000 Total Population.	M.	F.	TOTAL.	Crude Rate per 1,000 Total Population.	Comparability Factor.	Ratio of local ad- justed death rate to National Rate.	Number.	Rate per 1,000 Live Births.	Total.	By Births and Deaths.	By Migration.

TABLE F.—MARRIAGES, 1935.

England and Wales, Geographical Regions, Counties and County Boroughs.

Note.—Registration divisions, which form the areal unit of classification for marriage records, are in process of modification under the Local Government Act, 1929. Statistics are shown for entire Counties inclusive of their associated County Boroughs. An \* is inserted where the Registration County is coextensive with the Administrative County (inclusive of associated County Boroughs). Figures for individual County Boroughs are shown in *italics* where available. For constitution of geographical Regions see first page of Table E.

Area.	No. of marriages.	Persons married per 1,000 population.	Ratio of local to national rate. (1,000)	Area.	No. of marriages.	Persons married per 1,000 population.	Ratio of local to national rate. (1,000)

\* For the years 1915 to 1920 inclusive the figures upon which these rates are based relate to civilians only.

**TABLE S.—MIGRATION.**

(a) Intercensal Outward Balance of Migration from England and Wales. (Obtained by deducting the intercensal increase of population from the corresponding natural increase, i.e., excess of Births over Deaths.)

Intercensal Period.	Outward balance of Migration.	Intercensal Period.	Outward balance of Migration.
1871—1881	164,000	1901—1911	501,000
1881—1891	601,000	1911—1921	1,197,000*
1891—1901	69,000	1921—1931	172,000

\* Includes the deaths of non-civilians of England and Wales (estimated at 577,000) which occurred abroad at the various theatres of War.

(b) Balance of Civilian Passenger Movements into and out of the United Kingdom (from Board of Trade returns).  
Outward balances are shown in Roman type, inward balances in Italics.  
The United Kingdom excludes the Irish Free State as from 1st April, 1923.

Period.	Between the United Kingdom and				All Countries. Total.
	Non-European Countries.		European Countries.		
	Total.	British Subjects only.	Irish Free State. Total.*	Others. Total.	
1911—15 ..	989,072	810,892	—	447,411	541,661

1934 ..	8,882	12,573	12,362	33,265	54,509
1935 ..	7,421	11,101	17,029	29,713	54,163

\* These figures relate to passengers to and from ports in the Irish Free State and ports in the United Kingdom. The movement over the land frontier between the Irish Free State and Northern Ireland cannot be furnished.

(c) Balance of Permanent Migration: British subjects only (from Board of Trade Returns).  
Outward balances are shown in Roman type, inward balances in Italics.  
The United Kingdom excludes the Irish Free State as from the 1st April, 1923.  
The criterion of Permanent Migration is a declared intention to reside for at least a year in the country of destination. The permanent migration of part (c) is included in the passenger movement of part (b).
