ARRANGEMENT OF CENSUS REPORTS,
1936.

The tabulated results of the Census will be issued in eleven parts. The parts will be published from time to time as the information becomes available.

ISSUED TO DATE :

- Vol. I.—Sex and Geographical Distribution of All Races of the Population (with maps and diagrams).
- Vol. II.—Ages of the European, Asiatic and Coloured Population (with graphs of age and sex constitution).
- Vol. III.—Marital Condition: European, Asiatic and Coloured Population (with graphs).
- Vol. IV.—Languages: Official and Home Languages Spoken—European, Asiatic and Coloured Population (with maps and graphs).
- Vol. VI.—Religions: European, Asiatic and Coloured Population.
- Vol. VII.—Occupations and Industries: European, Asiatic and Coloured Population.
- Vol. VIII.—Dwellings in Urban Areas: All Races of the Population (with graphs).
- Vol. IX.—Natives (Bantu) and other Non-European Races: Distribution, Ages, etc. (with graphs).
Supplementary to Vol. IX. (Ages and Marital Condition of the Bantu Population).
- Vol. X.—Unemployment: European, Asiatic and Coloured Population (with graphs).
- Vol. XI.—South African Life Tables, Nos. E3 and C1.

TO BE ISSUED.

- Vol. V.—Birthplaces, Period of Residence and Nationality: European, Asiatic and Coloured Population.

INDELING VAN SENSUSVERSLAE,
1936.

Die getabelleerde resultate van die Sensus sal in elf boekdele uitgegee word. Namate die informasie beskikbaar gestel word, sal die boekdele van tyd tot tyd gepubliseer word.

TOT HEDE UITGEGEE.

- Boekdeel I.—Geslags- en Geografiese Indeling van alle Rasse van die Bevolking (met kaarte en diagramme).
- Boekdeel II.—Leeftyte van die Blanke, Asiate- en Kleurlingbevolking (met grafieke).
- Boekdeel III.—Huwelikstaat: Blanke, Asiate- en Kleurlingbevolking (met grafieke).
- Boekdeel IV.—Tale: Offisiële en Huistale wat gebesig word—Blanke, Asiate- en Kleurlingbevolking (met kaarte en grafieke).
- Boekdeel VI.—Godsdiens: Blanke, Asiate- en Kleurlingbevolking.
- Boekdeel VII.—Beroepe en Bedrywe: Blanke, Asiate- en Kleurlingbevolking.
- Boekdeel VIII.—Huisvesting in Stedelike Gebiede: Alle Rasse van die Bevolking (met grafieke).
- Boekdeel IX.—Natuurle (Bantoes) en ander Nie-Blanke Rasse: Indeling, Leeftyte, ens. (met grafieke).
Aanhangsel van Boekdeel IX. (Leeftyte en Huwelikstaat van die Natuurlebevolking.)
- Boekdeel X.—Werkloosheid: Blanke, Asiate- en Kleurlingbevolking (met grafieke).
- Boekdeel XI.—Suid-Afrikaanse Lewenstabelle, Nos. E3 en C1.

IN VOORBEREIDING.

- Boekdeel V.—Geboorteplekke, Verblyfduur en Nasionaliteit: Blanke, Asiate- en Kleurlingbevolking.

PREFACE.

The statistics in this volume deal with certain characteristics of the Native (Bantu) and other Non-European races enumerated at the Census of 1936.

Certain particulars of the Asiatic and Coloured population have been published in the undermentioned volumes of the Census Report, and only such other tables as have not hitherto been published, appear in this one:—

- Vol. I.—Geographical Distribution of all Races of the Population.
- Vol. II.—Ages.
- Vol. III.—Marital Condition.
- Vol. IV.—Languages Spoken.
- Vol. V.—Birthplaces and Nationality.
- Vol. VI.—Religions.
- Vol. VII.—Occupations and Industries.
- Vol. VIII.—Dwellings.
- Vol. X.—Unemployment.

In November, 1938, an advance volume (U.G. No. 50/1938) S.P. 118 (ix a) was published, giving the ages and marital condition of the Bantu population. That publication forms a supplement to this present volume.

This volume contains 28 tables, 14 of which relate to the Bantu population, 6 to the Asiatic, 7 to the Coloured population, and 1 to all races.

A survey of the figures contained in the tables is given in the report. Some peculiar facts, however, appear in regard to the Native population, especially in regard to the age and sex constitution and also the geographical distribution. An explanation is therefore necessary to account for the differences when compared with the other non-European or even the European population. The Natives form the bulk of the labouring classes; the males in the heavy industries, principally mining, and the females in the domestic sphere and to a certain extent in agriculture. Under the *Native Labour Regulation Act, 1911*, certain magisterial districts are proclaimed labour districts. At the date of the Census over 500,000 Natives were employed in these districts and of this number approximately 340,000 were employed in mining, principally on the Witwatersrand gold mines. Over 157,000 of the mine workers were recruited from territories beyond the Union borders. These were all males, and thus account for the excess of males over females in the Native population, more particularly in the urban areas of the Transvaal. Moreover, they all fall within the working age group and also disturb the normal age distribution of the Native male population. These facts are commented upon in the survey. Were it possible to analyse separately the personal characteristics of the group of "foreign" Natives, a better survey of the normal Native population could be obtained. On the other hand, it may be argued that these imported foreign Natives are always present in the Union and, therefore, that they form part of the normal resident population. They are not the same individuals, it is true, but as they leave on expiration of their periods of indenture, they are replaced by others.

In May, 1936, between 80,000 and 90,000 Natives came from the Portuguese territory of Mozambique, nearly 50,000 from Basutoland and over 15,000 from Swaziland, Bechuanaland and other extra-Union territories. The Transkeian districts of the Cape Province provide the majority of Union-born mine labourers, about 130,000 being absent from their homes and working in mining districts alone in 1936. This accounts for the great excess of Native females in each of the twenty-seven districts of the Native territories of the Cape Province.

In analysing the figures, the facts as revealed by the Census have been utilized, but the above-mentioned abnormal conditions must be borne in mind to avoid erroneous conclusions being drawn from the results of the Native Census.

E. PEEL PEARCE,
Acting Director of Census and Statistics.

Pretoria, August, 1941.

* bound with vols. 1-5.

VOORWOORD.

Die statistiek in hierdie boekdeel handel oor sekere eienskappe van die natuurle (Bantoes) en ander nie-blanke rasse wat by die sensus van 1936 opgeneem is.

Sekere besonderhede omtrent die Asiate- en kleurlingbevolking het in onderstaande boekdele van die sensusverslag verskyn en alleen tabelle wat tot nog toe nie gepubliseer is nie, is in hierdie boekdeel saamgevat.

- Boekdeel I.—Geografiese Indeling van Alle Rasse van die Bevolking.
- Boekdeel II.—Leeftyte.
- Boekdeel III.—Huwelikstaat.
- Boekdeel IV.—Gebesigde Tale.
- Boekdeel V.—Geboorteplekke en Nasionaliteite.
- Boekdeel VI.—Godsdiens.
- Boekdeel VII.—Beroepe en Bedrywe.
- Boekdeel VIII.—Huisvesting.
- Boekdeel X.—Werkloosheid.

In November 1938 is 'n vooraf gepubliseerde boekdeel (U.G. No. 50, 1938) as S.P. 118 (ix, a) uitgegee waarin die leeftye en huwelikstaat van die Bantoebevolking aangegee word. Dié uitgawe is 'n aanhangsel van hierdie boekdeel.

Hierdie boekdeel bevat 28 tabelle waarvan 14 op die Bantoebevolking betrekking het, 6 op die Asiatebevolking, 7 op die kleurlingbevolking en 1 op alle rasse.

'n Oorsig van die syfers wat in die tabelle begrepe is, word in die verslag gegee. Etlike besondere feite is egter geopenbaar in verband met die natuurlebevolking, veral ten aansien van die leeftyds- en geslagsamestelling en die geografiese indeling. 'n verduideliking is derhalwe nodig om die verskille te verklaar wat by 'n vergelyking met die ander nie-blanke of selfs met die blanke bevolking waarneembaar is. Die natuurle maak die grootste gedeelte van die arbeidersklasse uit; die manlikes in die swaar nywerhede, hoofsaaklik mynbou, en die vroulikes op die gebied van huissdiens en in sekere mate in die landbou. Kragtens die *Natuurlearbeid Reguleringswet, 1911*, is sekere magistraatsdistrikte tot arbeidsdistrikte geproklameer.

Ten tye van die volkstelling was meer as 500,000 natuurle in hierdie distrikte werksaam, en van dié getal was ongeveer 340,000 in die myne in diens, hoofsaaklik in die Witwatersrandse goudmyne. Meer as 157,000 van die mynwerkers is in gebiede buite die Unie-grense aangewerf. Hulle was almal manlik en is dus verantwoordelik vir die oorwig van manlike oor vroulike persone in die natuurlebevolking, veral in die stedelike gebiede van Transvaal. Bowendien val hulle almal binne die leeftydsgroep van persone in diens en gooi hulle ook die normale leeftydsindeling van die manlike natuurlebevolking omver. Opmerkings oor hierdie feite word in die oorsig gemaak. As dit moontlik was om die persoonlike kenmerke van die groep vreemde natuurle afsonderlik te ontlee, kon 'n beter oorsig van die normale natuurlebevolking verkry word. Aan die ander kant kan die argument aangevoer word dat hierdie ingevoerde vreemde natuurle altyd in die Unie aanwesig is en dat hulle derhalwe 'n deel van die normale gevestigde bevolking uitmaak. Dit is weliswaar nie altyd dieselfde individuele persone nie, maar namate hulle by die beëindiging van hul diens die Unie verlaat, word hul plekke deur ander gevul.

In Mei 1936 was tussen 80,000 en 90,000 natuurle uit die Portugese gebied Mosambiek afkomstig, byna 50,000 uit Basoetoland en oor die 15,000 uit Swaziland, Betsjoeanaland en ander gebiede buite die Unie. Die meeste van die mynwerkers wat in die Unie gebore is, kom van die Transkeidistrikte van die Kaap provinsie af. Ongeveer 130,000 was in 1936 van hul tuistes afwesig en in die myndistrikte werksaam. Dit verklaar die groot oorwig van vroulike natuurle in elkeen van die sewe-en-twintig distrikte van die natuurlegebiede in die Kaapprovinsie.

By die ontleding van die syfers is gebruik gemaak van die feite wat deur die Volkstelling aan die lig gebring is, maar die bovermelde abnormale toestande moet in gedagte gehou word ten einde te vermy dat verkeerde gevolgtrekkings gemaak word by 'n beskouing van die resultate van die natuurlesensus.

E. PEEL PEARCE,
Waarnemende Direkteur van Sensus en Statistiek.

Pretoria, Augustus 1941.

REPORT

ON THE

SIXTH CENSUS OF THE POPULATION OF THE UNION OF SOUTH AFRICA, 5th MAY, 1936.

VOLUME IX. NATIVES (BANTU) AND OTHER NON-EUROPEAN RACES.

PART 1: PROPORTIONAL DISTRIBUTION OF THE POPULATION ACCORDING TO TERRITORIES.

Tables and maps which illustrate the density of the respective racial elements of the population in different parts of the country have already been published.*

Table 1 of this Report shows the geographical distribution of the population according to the relative proportions of the different

racial elements in the 249 respective magisterial districts. The table below shows this information in summary form. The figures in italics (against C & A on the lower line of the panels) show the number of districts in which Coloured persons, including Asiatics, predominated amongst the non-European section.

TABLE 1.—PROPORTIONS OF THE DIFFERENT RACES IN DISTRICTS.

N denotes Natives; C & A denotes Coloured, including Asiatics.

Percentage of Predominating Non-Europeans.†	Percentage of Europeans.													Total.				
	0-	1-	5-	10-	15-	20-	25-	30-	35-	40-	45-	50-	55-60

† The figures in this column show the relative proportions of Natives and Coloured persons (including Asiatics) in the different districts. The figure 1 against Europeans 45-50 per cent. in the first line shows that there was one district in which Europeans formed 45-50 per cent. of the total population and that amongst the non-Europeans Natives predominated with 20-30 per cent.; by deduction the percentage of Coloured persons was also above 20 but smaller than the figure for natives.

Europeans constituted less than 10 per cent. of the total district population in 81 districts, almost the entire number of which were situated in the Transkei and Zululand. Only in two of these districts did the Native element account for less than 80 per cent. of the non-Europeans in these districts and only in one, namely, Inanda (Natal), did the Coloured element, which consisted also

exclusively of Asiatics (52 per cent.), exceed the Native. In another Natal district, Lower Tugela, the proportion of Asiatics was relatively large (33 per cent.) but was about one-half of that of Natives. The proportion of Asiatics exceeded one-eighth in only one other district, Durban. This area will be considered later.

The proportion of Europeans was less than 25 per cent. in 127 districts and in all of these, with the exception of Inanda, the proportion of Natives considerably exceeded that of Coloured and Asiatics; and in no case, again with the exception of Inanda, did the proportion of all Coloured and Asiatic persons exceed 12 per cent. of all persons in the districts.

There were only nine districts in which the European population exceeded 50 per cent. and in no case did it exceed 60 per cent. In all these districts, which included the Cape and Simonstown, the Cape Coloured element predominated amongst the non-Europeans. In fact, out of 39 districts in which there were more than 40 per cent. Europeans there were only six in which the Native element exceeded the Coloured. These areas were as follows:—

Port Elizabeth, Johannesburg, Potchefstroom, Christiana, Bloemfontein and Fauresmith.

In only the first of these, namely, Port Elizabeth, did the two non-European elements approach equality, the figures being—Native, 28·8 per cent., and Coloured and Asiatic, 26·1 per cent.

The highest proportion of Cape Coloured was in Namaqualand (66·7 per cent.). The other important districts from this point of view ranged as follows:—

Tulbagh, 65·6; Ceres, 63·3; Wellington, 63·3; Malmesbury, 61·0; Paarl, 59·3; Stellenbosch, 59·3; Worcester, 57·5.

The above survey indicates that the great majority of the districts in which the European element constituted the highest proportions of the total population were situated in the western part of the Cape Province and that the Cape Coloured element predominated in these districts amongst the non-Europeans.

The figures for the magisterial districts in which the chief urban areas are situated are as follows:—

District.	European.	Native.	Asiatic.	Other Coloured.
	%	%	%	%
Cape.....	52·03	3·58	1·26	43·13
Port Elizabeth.....	45·11	28·82	2·01	24·06
East London.....	37·44	57·14	·91	4·51
Kimberley.....	35·02	43·03	1·76	20·19
Pietermaritzburg.....	25·82	58·89	12·50	2·79
Durban.....	36·38	26·89	33·81	2·92

District.	European.	Native.	Asiatic.	Other Coloured.
	%	%	%	%
Pretoria.....	36·59	60·61	1·26	1·54
Johannesburg.....	48·85	44·82	1·91	4·42
Germiston.....	39·79	57·36	·95	1·90
Benoni.....	26·51	70·02	1·16	2·31
Bloemfontein.....	41·63	53·92	·01	4·44

Just more than one-half of the population of the Cape magisterial district consisted of Europeans while 43 per cent. were Cape Coloured. The balance of only 4·8 per cent. consisted of Natives and Asiatics in the ratio of 3 to 1. In Port Elizabeth district, which lies more towards the East and closer to the Native territories, the European population was rather less than one-half and Natives and Coloured persons were fairly equally represented. In East London district, which lies still further East, the proportion of Coloured persons was 4·5 per cent. and of Natives 57 per cent. The racial structure of the population of the Bloemfontein district closely resembled that of East London. In Kimberley district the proportion of Europeans was rather more than one-third and Natives were twice as numerous as Coloured persons.

In the Durban district the proportion of Europeans was 36 per cent. while Asiatics (34 per cent.) exceeded Natives (27 per cent.). In Pietermaritzburg district, which is further inland and more removed from the coastal belt, where Asiatics are numerous, the proportion of these was only 12·5 per cent. while that of Natives was 59 per cent.

The European population of Johannesburg district constituted 49 per cent. and the Native population 45 per cent. of that area. Asiatics and Coloured persons thus only formed about 6 per cent. of the total. In the less populous districts of the Witwatersrand gold-mining area the proportions of Natives were considerably higher owing, of course, to the employment of Natives in mining activities. The number of Natives employed on the Reef in gold mining remains fairly constant round about the figure of 300,000 males, but they are almost entirely indentured from all parts of the Union, neighbouring territories and from Portuguese East Africa.

PART II: NATIVE POPULATION, CENSUS, 1936.

1. Ages of the Native Population.—The numbers of persons at various ages should be a continuous function of the age, if disturbances due to such factors as wars, epidemics, famines, etc., be ignored, that is, the number of persons should increase or decrease continuously from one age to another without abrupt breaks or irregularities at certain ages. This condition is very far from realized in the case of the Native population of the Union.*

The extent to which Natives' ages are concentrated on ages ending in 0, such as 10, 20, 30, etc., is illustrated in the following few examples which refer to Natives of both sexes:—

Age.	No.	Age.	No.	Age.	No.	Age.	No.
18	184,211	28	125,481	38	76,467	58	23,232
19	89,918	29	69,313	39	55,676	59	15,272
20	184,524	30	251,891	40	195,920	60	93,619
21	75,928	31	39,597	41	25,234	61	7,058
22	105,140	32	79,170	42	53,387	62	13,037

The degree of misstatement is clearly enormous and must be ascribed for the greater part to the illiteracy of the Natives rather than to the disturbing factors referred to above.

For administrative, especially fiscal, purposes and for estimates of the labour resources as well as for sociological investigations it is sometimes important to know the numbers or proportions of persons over, under, or between certain age limits. For this reason it was considered advisable to "smooth" the data by the application of interpolation formulae, including those used in the construction of the South African Life Table, No. 3.† These attempts have met with no success.

The survey which follows is, therefore, based on the crude age distribution as enumerated at the census. The character of this distribution must be borne in mind wherever reference is made to ages.

2. Natives in Provinces.—The provincial distribution of the Native population at the time of the Census, May, 1936, was as follows:—

TABLE 2.—PROVINCIAL DISTRIBUTION OF THE NATIVE POPULATION.

Province.	Urban.				Rural.				Union.	
	Male.		Female.		Male.		Female.		No.	%
	No.	%	No.	%	No.	%	No.	%		
Cape.....	109,053	13·90	110,176	30·87	809,292	32·01	1,017,049	34·75	2,045,570	31·01
Natal.....	90,382	11·51	87,558	10·62	632,238	25·80	773,471	25·42	1,553,629	23·56
Transvaal.....	537,969	68·44	153,437	43·00	843,945	33·39	909,929	31·09	2,444,380	37·05
Orange Free State.....	48,285	6·15	65,703	15·61	222,407	8·80	226,715	7·74	553,110	8·39
UNION.....	784,769	100·00	356,874	100·00	2,527,882	100·00	2,927,164	100·00	6,596,689	100·00

* Ages and Marital Condition of the Bantu Population (U.G. No. 50 of 1938, page 1).
† U.G. No. 49 of 1939.

In considering this table it must be borne in mind that the census of the Union is conducted on the *de facto* principle, that is, persons are enumerated at and allocated to the geographical area where they are located at the time of the census. This fact is the chief explanation of the situation revealed by the figures. Not only does the total number of males (3,312,651) exceed that of females (3,284,038), a position which is very unusual, but the sex-ratios within the provinces are abnormal.

The Native population of the Union is extremely mobile and large numbers of both sexes, but especially males, migrate for part of the year from their places of permanent residence, chiefly the Native territories, to the gold mines of the Witwatersrand (Transvaal) or other areas, especially urban, for employment.

As regards *urban* areas the ratio of males to females was 2·41 in Natal and 3·50 in the Transvaal. The explanation in the case of Natal is that Native males from the Natal reserves and Zululand migrate to the urban areas for employment in industry and trade, while the females and children remain at home. The excess of 380,000 males over females in the urban areas of the Transvaal is explained by the large employment of Natives on the gold mines of the Witwatersrand. The sex-ratio for the Cape appears to be normal, while the excess of females in the Orange Free State may be partly due to an influx of young Native females from Basutoland for employment in domestic service and seasonal operations in agriculture. In fact, Table 1 of this report shows that the proportions of Natives to total population within the magisterial districts which lie near the Basutoland border are significantly higher than elsewhere in the Orange Free State. In these districts Native females exceeded males considerably in number.

Assuming that the sex-ratio is unity, it is found that, in rural areas, there was an excess of 208,000 Native females in the Cape, of 121,000 in Natal and of 66,000 in the Transvaal.

In the Orange Free State there was an excess of only about 6,000. If the urban and rural areas are combined, it appears that the Cape and Natal showed deficits in the number of males of 209,000 and 68,000, respectively, while the Transvaal showed an excess of 318,000.

The following table focuses attention on the sex-ratio situation in the Native territories:—

NATIVES IN THE PROVINCES AND NATIVE TERRITORIES.

Area.	Male.	Female.	Persons.	Sex-ratio M/F.
Cape.....	918,345	1,127,225	2,045,570	·81
Cape (excluding Transkei).....	429,447	462,148	891,595	·93
Transkei.....	488,898	665,077	1,153,975	·74
Natal.....	742,600	811,029	1,553,629	·91
Natal (excluding Zululand).....	584,473	616,719	1,201,192	·95
Zululand.....	158,127	194,310	352,437	·81
Transvaal.....	1,381,014	1,063,306	2,444,380	1·30
Orange Free State.....	270,692	282,418	553,110	·96
UNION.....	3,312,651	3,284,038	6,596,689	1·01

These figures suggest that the sex-ratio situation is approximately normal in the Cape outside the Native territories, in Natal outside Zululand and in the Orange Free State. They also show that the migration towards the Transvaal, but also elsewhere to some extent, takes place primarily from the Transkei and to a smaller degree, both absolutely and relatively, from Zululand.

3. Birthplaces of Natives.—The birthplaces of the Native population are shown in the table below. The excesses or deficits of the persons enumerated in the respective provinces over those born therein are shown in the last three columns of the table.

TABLE 3.—BIRTHPLACES OF THE MALE NATIVE POPULATION.

Area.	Born.			Enumerated.			Difference.

TOTAL.....	1,678,824	1,633,827	3,312,651	—	—	—	—	—	—

At the time of the census there were 261,136 more male Natives in the Union of South Africa than were born therein, and of these 89.4 per cent. or approximately nine-tenths were 20 years of age and over. This relationship of 9 adults to 1 youth amongst Natives who were not born in the Union shows that the "foreign" Native element was here temporarily only. Of these "foreign" Natives 42.22 per cent. were from Basutoland, 35.66 per cent. from Portuguese East Africa, 8.16 per cent. from Swaziland, 6.63 per cent. from Nyasaland, and 5.06 per cent. from the Rhodesias. It is impossible to say what proportions of the Natives born outside the Union were permanently resident in the Union at the time of

the census, but it is reasonable to assume that the proportion was much higher for Basutoland Natives than for those from Portuguese East Africa. Basutoland is not only more favourably located in relation to the Union for purposes of migration, but the Basutos are also known to prefer employment in farming, domestic service and trade and industry, other than mining, which are conducive to permanent residence at the place of work, whereas the majority of the Natives from Portuguese East Africa are known to be working temporarily only on the gold mines of the Transvaal.

The proportional distribution according to place of enumeration of the Native population born in different areas was as follows:—

TABLE 4.—BIRTHPLACE OF NATIVES IN RELATION TO PROVINCE OF ENUMERATION.

Birthplace.	Province of Enumeration.									
	Cape.		Natal.		Transvaal.		Orange Free State.		Union.

The figures for the provinces show that there were 214,000 fewer Native males in the Cape than were born there. The figure agrees almost exactly, and not altogether fortuitously, with the deficit of 208,000 males already noted in the rural areas of the Cape Province. Of all the male Natives born in the Cape 166,489 or 14.72 per cent. were enumerated in the urban areas of the Transvaal and 36,329 or 3.21 per cent. in the rural areas of that province; the proportion of those born in the Cape who were also enumerated there was 79.23 per cent.

Of the male Natives born in Natal 91.29 per cent. were also enumerated there, while 46,595 or 6.09 per cent. were enumerated in the urban areas of the Transvaal and 13,919 or 1.82 per cent. in the rural areas.

The percentage of male Natives born in the Transvaal and also enumerated there was 99.00 per cent. From this it appears that the migration to other provinces of Natives born in the Transvaal is insignificant.

Of the male Natives born in the Orange Free State 82.36 per cent. were enumerated in that province, 19,971 or 7.67 per cent. in the urban areas of the Transvaal and 20,310 or 7.81 per cent. in the rural areas of that province.

The number of Native males who were born in Basutoland and enumerated in the Union was 110,245. Of these 47,422 or 43.01 per cent. were in the urban areas of the Transvaal, 12,222 or 11.09 per cent. in the rural areas of the Transvaal, 6,243 or 5.66 per cent. in the urban areas of the Orange Free State and 30,172 or 27.37 per cent. in the rural areas of this province. The Cape accounted for 8.25 per cent. and Natal for 4.62 per cent.

The total number of male Natives born in Portuguese East Africa and enumerated in the Union was 93,114. Of these 69,736 or 74.89 per cent. were in the urban areas of the Transvaal and 13,725 or 14.74 per cent. in the rural areas; of the remainder 7,386 or 7.93 per cent. were in the rural areas of Natal, largely on the sugar and wattle plantations of the North. It is further of interest

to note that 85.2 per cent. of the male Portuguese Natives in the urban areas of the Transvaal were between the ages of 20 and 40 years. This proportion is considerably higher than the corresponding proportion for the Natives from other areas.

At the time of the census there were 21,311 male Natives in the Union who were born in Swaziland and of these 10,536 or 49.4 per cent. were in the urban areas of the Transvaal and 8,787 or 45.5 per cent. in rural areas.

The number of male Natives from Nyasaland was 17,324, of whom 4,719 or 27.2 per cent. were in the urban areas of the Transvaal and 10,987 or 63.5 per cent. in rural areas. Of the 13,202 male Natives from Northern and Southern Rhodesia 6,764 or 51.2 per cent. were in the urban areas of the Transvaal and 5,338 or 40.4 per cent. in the rural areas.

It is clear from the above survey that the Native population of the Transvaal is extremely mixed in tribal character and that the movement of Natives within the Union and into the Union is predominantly towards the Transvaal, especially the urban areas thereof. In fact, of the 537,069 Native males in the urban areas of the Transvaal only 162,523 or 30.3 per cent. were born in the Transvaal, 166,489 or 31.0 per cent. in the Cape, 69,736 or 13.01 per cent. in Portuguese East Africa, 47,422 or 8.85 per cent. in Basutoland and 46,595 or 8.7 per cent. in Natal.

At the time of the census there were 3,284,038 Native females in the Union, of whom 72,641 were not born in the Union. The particulars appear in the following table:—

TABLE 5.—BIRTHPLACES OF NATIVE FEMALES.

Area.	Born.			Enumerated.			Difference.		
	Under 20 Years.	20 Years and over.	Total.	Under 20 Years.	20 Years and over.	Total.	Under 20 Years.	20 Years and over.	Total.

Portuguese East Africa.....	397	4,520	4,917	—	—	—	—	—	—
Other.....	1,241	3,109	4,350	—	—	—	—	—	—
TOTAL.....	1,659,944	1,624,094	3,284,038	—	—	—	—	—	—

It will be seen that the figure foreign-born males bears a ratio to that for foreign-born females of 3.6 to 1. Of these females 73.8 per cent. were born in Basutoland, 13.5 per cent. in Swaziland, and the majority of the balance in Portuguese East Africa. Comparison of the ratios between males and females born in Basutoland (2.06), Swaziland (2.18) and Portuguese East Africa (18.94) suggests that a considerable proportion of the persons born in Basutoland and Swaziland were in the Union permanently and probably as complete family units, while those from Portuguese East Africa were here for temporary employment.

The Cape and Natal provinces show losses of females born there, while the Transvaal and Orange Free State show gains of 109,257 and 12,875, respectively. The foreign-born males in the Transvaal were nearly five times as numerous as the foreign-born females in that province.

Of the female population in the rural areas of the Cape and Natal over 99 per cent. were born in those provinces; for the Transvaal and Orange Free State the percentages were 93.2 and 82.6, respectively. In the last province the proportion of females from extra-Union territory was particularly large. In fact, of the 53,593 Basuto females in the Union 28,202 or 52.6 per cent. were in the rural areas of the Orange Free State and 13.0 per cent. in urban areas; the proportions for the Transvaal and Cape were 19.77 per cent. and 12.66 per cent., respectively. The number of Swazi females in the Union was 9,781 of whom 22.1 per cent. were in the Transvaal in urban areas and 68.9 per cent. in rural areas.

4. Age Distribution of Natives.—The following table shows the proportional age distribution of Native males and females in urban and rural areas, respectively, and of males in the Transkei and the Transvaal. The adoption of a ten year age grouping, especially that with ages ending in 0 at the centre of the group, tends to remove the irregularities to which reference has already been made.

TABLE 6.—AGE DISTRIBUTION OF NATIVES.

Age Group (Years).	Urban.		Rural.		Transkei.	Transvaal.
	Male.	Female.	Male.	Female.	Male.	Male.

45-54.....	7.03	6.61	6.63	6.76	5.92	6.42
55-64.....	2.23	3.40	4.13	4.60	4.12	2.85
65-74.....	0.86	1.64	2.56	2.59	2.60	1.50
75-84.....	0.28	0.4	0.94	1.02	0.91	0.61
85-94.....	0.07	0.20	0.26	0.25	0.21	0.20
95-99.....	0.02	0.07	0.05	0.04	0.03	0.04
100 +.....	0.01	0.02	0.02	0.02	0.01	0.02
TOTAL.....	100.00	100.00	100.00	100.00	100.00	100.00

In urban areas the proportion of female children and young persons of approximately school-going age is very much higher than the proportion of males of these ages. The proportion of males aged 25 years to about 50 again considerably exceeds the proportion of females of these ages. The proportion of females of advanced age, namely, 55 years and over, is 5.97 per cent. as against 3.47 in the case of males. It appears probable that males migrate to urban areas as soon as they reach working age, and that a large proportion leave such areas permanently as soon as the working life is more or less over.

The age distributions of males and females in rural areas are very similar. Males aged 15 years and below constitute a rather higher proportion of the total male population than the corresponding proportion of females; but for the age group 15 to 35 years the situation is reversed.

The age distribution of males in the Transkei and the Transvaal throw a great deal of light on the remarks made above regarding the migration of Natives. There is a relatively small proportion of males aged 20 years to about 45 years in the Transkei and a relatively large proportion of persons of these ages in the Transvaal. The position is shown graphically in Diagram 1.

The two distributions are not quite complementary but it is clear that the deficiency in the Transkei is compensated to a very large extent by the excess in the Transvaal. To obtain an adequate explanation of the great excess in the Transvaal consideration should also be given to Natives born outside the Union.

DIAGRAM 1.
AGE DISTRIBUTION OF NATIVES.

5. Natives in Chief Urban Areas.—The following table shows the numbers of Native males and females, respectively, in the chief urban areas of the Union and the proportions in three age groups covering the entire lifetime.

The total number of Native males in the urban areas of the Union at the date of the census was 784,769 and of these 462,996 or 59.0 per cent. were in the urban areas of the Witwatersrand and 87.3 per cent. or seven-eighths in the 18 chief urban areas enumerated above. In sharp contrast the proportion of females in the urban areas of the Witwatersrand was only 30.0 per cent. and in the 18 chief urban areas 54.8 per cent.

The proportions of young Native males were very small in all the urban areas of the Union and in the Roodepoort municipal area those aged 14 years or less constituted only 2.9 per cent. of all Native males. This area also had no fewer than 933 males to every 100 females. The sex ratio for the whole Witwatersrand was 4.32 and males exceeded females by no fewer than 355,800.

Judging from the ratios of males to females and the proportions of persons in the different age groups, it appears that the Native populations of Port Elizabeth, East London, Kimberley and Bloemfontein were comparatively stable. The proportion of females aged 15 to 64 years was remarkably high in East London. Bloemfontein had only 86 males to every 100 females and was, apart from East London, where the sexes were represented about equally, the only area where the sex ratio was less than unity.

6. Marital Condition of Natives.—The following table shows the marital condition of the Native population in various age groups. Divorces among the Native population are insignificant, the proportion being less than 0.3 per cent. of the total population. In the following tables the figures for widowed and divorced have, therefore, been combined.

TABLE 8.—MARITAL CONDITION OF NATIVES.

Age Group (Years).	Male.				Female.

* Only 6; percentage negligible. † Only 28; percentage negligible. ‡ Excluding unspecified for Age and Marital Conditions.

The chief features of the marital condition are immediately clear from Diagram 2 below. The proportion of males who are married rises steadily with age to a maximum of about 88 per cent. at age 55 years. At this age 5.9 per cent. have never been married and 6.1 per cent. are widowed or divorced. The proportion of married males then decreases while the proportion of widowed and divorced

persons increases until, in the age group 100 years and over, 55.5 per cent. are still, or again, married while 39.2 per cent. are widowed or divorced. It is of interest to note that the proportions of "never married" increase after the age of 80 years has been reached. This may be an interesting sociological phenomenon or may be merely due to a misstatement of age or of marital condition.

DIAGRAM 2.
MARITAL CONDITION OF NATIVES.

The proportion of females who are married rises more abruptly than in the case of males until at the age of about 35 years a maximum of 82.3 per cent. has been reached. Of the 17.7 per cent. balance 6.9 per cent. have never been married and 10.8 per cent. are widowed or divorced. It will be noticed that in the case of females married the maximum occurs at an age about 20 years lower than in the case of males and that it is approximately 6 per cent. lower. The proportion of married females falls very steeply after the age of 45 years and the proportion widowed or divorced rises correspondingly. At about the age of 60 years the proportions

of married and widowed or divorced females are equal at 49 per cent.; that is about one-half are married and the other half are widowed or divorced. In the age group 100 years and over only 8.0 per cent. are married while 89.5 per cent. are widowed or divorced. This disproportionate rise in the latter class as compared with males of similar marital condition, and the relatively slow fall in the proportion of married males, show that the re-marriage rate is high amongst Native males and that such re-marriages mainly take place with Native females who had never before been married.

The following table shows the marital condition of Natives aged 21 years and over in the chief urban areas of the Union:—

TABLE 9.—MARITAL CONDITION OF NATIVES, 21 YEARS AND OVER, IN CHIEF URBAN AREAS.

Municipality.	Males.					Females.				
	Total.	Marital Condition.			Total.	Marital Condition.

Bloemfontein.....	8,188	23.88	70.92	5.20	9,680	20.07	60.69	19.24		

The proportion of males aged 21 years and over who have never been married is significantly higher in each of the urban areas than the proportion of females of the corresponding ages. This may be evidence of the degree in which youthful males rather than females migrate to the urban areas. The proportions are closest to equality in Port Elizabeth, East London, Kimberley and Bloemfontein, and in these areas, as suggested before, the population appears to be more stable than in the other important industrial areas. In these municipalities and also in Pietermaritzburg the proportions of widowed and divorced females are significantly higher than elsewhere.

The explanation of the differences between the proportions of married males and females, respectively, in the different areas lies ultimately and chiefly in the proportions of migrant Natives, who

were temporarily present at the time of the census in the respective urban areas. Thus, in Cape Town, the proportion per cent. of adult males who were married was 61.0, while amongst females the proportion was no less than 87.6. This area is very far removed from the Native territories and the reserves; and the fact that Native male labour, especially if the labourer is unmarried, is mobile, but the Native family as such is not, explains the situation. The same explanation would hold for differences observed on the Witwatersrand.

7. Occupations of Natives.—Native Males.—In May, 1936, a total of 2,329,681 Native males aged 10 years and over were enumerated. The following table shows the distribution of these persons according to age and economic activity.

TABLE 10.—ECONOMIC ACTIVITY OF NATIVE MALES.

* Distributed proportionally amongst other groups.

The number of persons gainfully occupied was 2,303,071 or 96.0 per cent. of the total; of the balance 80,876 or 3.5 per cent. were scholars; 6,051 were permanent inmates of institutions such as leper and mental hospitals, prisons, etc.; 4,629 were parents who were dependent on their children; 2,921 were engaged in household duties at home and 586 were of independent means.

The grouping of the gainfully occupied persons is based on an occupational classification. By far the majority of the persons are unskilled labourers. These have been coded in and allocated to the groups to which they belong, e.g., agricultural, mining,

industrial, etc. All other persons whose occupations were definitely specified, such as semi-skilled and skilled artisans and professional men, have been classified according to the nature or purpose of their work. A metal fitter, for example, is classified under Metal Working, a sub-group of manufacturing, irrespective of whether he is employed in the engineering industry, in mining, in commerce, or in any other industry. It will be appreciated, therefore, that the groups in the above scheme only approximate to an industrial classification, and that they are not mutually exclusive. The overlap, however, is considered to be small.

The following table shows the proportional distribution of the persons in the main groups according to age:—

TABLE 11.—NATIVE MALES IN INDUSTRIAL GROUPS.

Age Group (Years)	Industrial Group.				
	Agriculture.	Mining.	Manufacturing.	Transport and Communication.	Personal Service.
10-19.....	40.34	8.39	8.37	7.80	32.18
20-29.....	16.27	46.52	30.46	29.62	32.58
30-39.....	14.06	30.53	31.37	31.24	26.82
40-49.....	11.61	11.68	18.60	20.46	9.45
50-59.....	8.05	2.28	7.57	8.35	3.40
60-69.....	5.71	.48	2.77	2.15	1.17
70-79.....	2.78	.10	.70	.33	.31
80 +.....	1.15	.02	.16	.05	.09
TOTAL.....	100.00	100.00	100.00	100.00	100.00

The number of males engaged in agricultural occupations including those employed in parks and gardens was 1,437,087 or five-eighths of the total gainfully occupied. This total includes 517,377 agricultural labourers, of whom 66.5 per cent. were under 40 years, and 101,833 herdsmen and shepherds, of whom 90.9 per cent. were under 20 years. The majority of the balance were farming on their own account on European-owned farms, tribally-owned lands, etc. Of the total employed in agricultural occupations, 40.34 per cent. were under 20 years of age and 70.67 per cent. under 40. The number of individuals of 80 years of age and over was 17,012 and no fewer than 477 were alleged to be 100 years and over.

The number of male Natives engaged in mining and quarrying occupations was 393,020 or 17.07 per cent. of those gainfully occupied. Of these 388,894 were described as mine labourers; 55.1 per cent. of these were under 30 years and 85.6 per cent. under 40.

The number engaged in manufacturing occupations was 210,407 or 9.13 per cent. of those gainfully occupied. Of these 189,790 or 90.2 per cent. were described as unskilled labourers and 71.1 per cent. of these were under 40 years of age. The chief occupations definitely specified, were as follows:—

Metal Working and Engineering.—Blacksmiths, 484; firemen of stationary engines, 369; plumbers, 515.

Woodworking.—Carpenters, 1,221; sawyers, 253.

Building and Construction.—Bricklayers, 1,159; masons and stonecutters, 958; painters, 741.

Clothing, Textiles, Boots and Shoes.—Cobblers, 2,332; tailors, 862.

Food, Drink and Tobacco.—Butchers, 445; bakers and confectioners, 289; salt-workers, 525; sugarmill workers, 2,718, of whom 82.3 per cent. were under 40 years of age; brick and tile makers, 3,038, of whom 61.1 per cent. were under 40 years. It is probable that a considerable proportion of these classes, especially of the last two, were unskilled labourers.

* Distributed proportionately amongst other groups.

The number of persons engaged in occupations relating to transport and communication was 90,193 or 3.92 per cent. of the gainfully occupied. This figure is probably too high for the group on account of the inclusion of drivers of vehicles, messengers, delivery men, etc., who are engaged in commerce and finance, manufacturing, etc. The chief occupations in this group are: railway labourers, 29,056; road labourers, 28,628; dock labourers, 2,704; messengers and deliverymen, 18,938; drivers of animal-drawn vehicles, 3,080; drivers of motor vehicles, 2,457; grooms and horsemen, 1,825; ricksha pullers, 1,516. The proportion of persons in the whole group who were under 40 years of age was 68.66 per cent. The corresponding proportions for railway and road labourers were 66.4 per cent. and 63.8 per cent., respectively. Of the messengers and delivery men 49.9 per cent. were under 20 years and 78.5 per cent. under 40.

The number of persons engaged in occupations in the commerce and finance group was only 6,447, of whom 818 were proprietors of commercial firms; 1,636, hawkers and pedlars; 1,950, salesmen; and 1,756, clerks.

The total number of persons in occupations relating to the professions, sport and entertainment group was 17,605. These included the following:—

Policemen.....	6,711	Teachers (academic).....	4,758
Prison warders.....	776	Interpreters, translators.....	258
Clergymen and priests.....	2,429	Hospital orderlies.....	330
Religious service (not ordained).....	1,069	Nurses, male.....	253
Doctors.....	619	Witchdoctors.....	89

The personal service group includes 112,901 persons or 4.90 per cent. of the gainfully occupied. Of these 32.18 per cent. were under 20 years of age and 85.58 per cent. under 40. The chief occupations were as follows: domestic servants, 105,942, of whom 86.1 per cent. were under 40 years of age; chefs and cooks, 3,518; waiters, 1,508; hairdressers, 90; and laundry workers, 652.

The following are the most important of the miscellaneous personal occupations:—

Chiefs, Indunas, Headmen.....	1,838	Dam builders, erosion workers.....	2,284
Caretakers.....	708	Packers, dispatchers, Office cleaners.....	560
Office cleaners.....	1,994	labellers.....	272
Watchmen.....	1,094	Fishermen.....	272

It is of interest to note that the percentages of young persons under 20 years of age were high in the case of agriculture and personal service groups, namely, 40.34 and 32.18, respectively. In each of the other three large groups, namely manufacturing, mining, and transport and communication the proportion was only about 8 per cent. In mining the dispersion of age was relatively small: 77.05 per cent. were between the ages of 20 and 40 years.

Native Females.—The total number of Native females aged 10 years and over enumerated at the Census of May, 1936, was, 2,329,681. The distribution of these persons according to economic activity is shown in the following table:—

Those gainfully employed constituted 1,919,319 or 82.4 per cent. of the total of the population considered. Of the balance, 312,048 or 13.4 per cent. were occupied in unpaid household duties, and 89,603 or 3.8 per cent. were scholars. The latter number exceeded male scholars by approximately 9,000. Permanent inmates of institutions numbered 2,783 as against 6,051 males. The proportional distribution, by age, in the three main groups, was as follows:—

TABLE 13.—NATIVE FEMALES IN CERTAIN ECONOMIC CLASSES.

Age Group (Years)	Economic Class.		
	Agriculture.	Personal Service.	Household Duties.
10-19.....	30.41	34.17	7.66
20-29.....	22.26	32.00	26.60
30-39.....	17.80	17.11	28.06
40-49.....	11.76	9.77	18.43

70-79.....	2.71	.43	2.02
80 +.....	1.31	.10	.59
TOTAL.....	100.00	100.00	100.00

Of the gainfully occupied section 1,659,349 or 86.5 per cent. were engaged in agriculture. This figure compares with 1,437,087 for the number of males occupied in this industry. The proportion of females aged less than 20 years engaged in agriculture was 30.4

The proportion of persons engaged in agriculture in the chief urban areas is necessarily small and the activities are mainly confined to market-gardening and dairy and poultry farming. The proportion exceeds 5 per cent. only in the case of Pretoria (5.40), Pietermaritzburg (9.87) and Bloemfontein (18.35). The percentage for Johannesburg was 1.69 and for the Witwatersrand as a whole only 1.02.

The persons enumerated under mining and quarrying were almost exclusively engaged in quarrying except in the case of Kimberley (diamond mining) and on the Witwatersrand (gold mining). The proportion engaged in mining in Kimberley was nearly one-third, while in Johannesburg it was 41.46 per cent. or approximately two-fifths. In the other Witwatersrand urban areas combined the proportion was no less than 82.65 per cent; and for the total Witwatersrand, including Johannesburg, 68.19 per cent. or two-thirds.

per cent. and that of those aged less than 40 years 70.5 per cent. A total of 21,787 were 80 years of age and over and no fewer than 547 were alleged to be 100 years and over. The number of females enumerated as peasants was 1,618,746.

The only other economic group of importance was personal service and this accounted for 243,369 persons or 12.7 per cent. of the gainfully occupied. Of these 241,230 were classified as domestic servants and 1,137 as chefs and cooks. About five-sixths of the individuals in the whole personal service group were under 40 years of age. The only other occupation of importance in this group was that of laundry workers, of whom there were 814.

The general manufacturing group only included 3,358 persons, of whom 2,609 were classified as unskilled workers, 221 as dress-makers, 100 as sewing machinists and 89 as potters. Professions, entertainments and sport accounted for 4,335 persons, of whom 3,441 were teachers and 571 nurses.

In the commerce and finance group, which included 242 persons, there were 126 saleswomen and 83 hawkers.

8. Industries and Occupations Chief Urban Areas.—Native Males.—

The distribution, according to industrial groups of Native males aged 10 years and over who were gainfully occupied in the chief industrial areas of the Union at the time of the census, is shown in the following table:—

The extent to which Native males aged 10 years and over are gainfully occupied in the different municipalities is shown in the penultimate line of the above table. About nine-tenths or more are occupied in all areas, except in Kimberley (80.49) and Bloemfontein (76.47). The proportion is highest on the Witwatersrand excluding Johannesburg and amounts to 98.43.

The last line of the table shows the relationship of the "never married" section to the total number of gainfully occupied persons. These ratios are definitely the lowest in the areas which have already been described as having a comparatively stable population, namely, East London, Kimberley and Bloemfontein. The fact that Durban has the highest ratio of "never married" Native males in its gainfully occupied Native population may perhaps be explained by the proximity of this area to Zululand and the Native reserves.

Native Females.—The main features regarding the employment in the chief urban areas of Native women and young persons aged 10 years and over are shown in the following table:—

TABLE 15.—NATIVE FEMALES (10 YEARS OF AGE AND OVER) GAINFULLY OCCUPIED.

Municipality.	Number in Municipality Area.	Gainfully Occupied.		Industry, etc.	
		No.	Percentage of Total.	Domestic Service.	Other.
Cape Town.....	3,285	1,343	40.88	84.29	15.71

* Including 8,240 Swiss Mission.

About one-half of the persons enumerated in each of the three provinces, the Cape, Natal and the Transvaal, were designated "heathen"; in the Orange Free State the proportion of this class was one-quarter. *Native Separatist* churches had the next largest following in the Union as a whole (16.51), or about one-sixth, and were second in numerical importance in Natal (18.93) and the Transvaal (18.22). In the Cape and the Orange Free State *Separatist* was exceeded by *Methodist* with 18.32 per cent. and 21.18 per cent., respectively, while in the Transvaal and Natal, *Methodist* ranked third with 7.86 per cent. and 7.16 per cent., respectively. The percentage proportion of *Methodist* for the Union as a whole was 12.06 or about one-eighth.

Only in the case of three other religions did the proportion for the Union as a whole exceed 3 per cent., namely: *Anglican* which ranged from 4.85 per cent. in Natal to 7.70 per cent. in the Cape and 6.18 per cent. for the Union as a whole; *Lutheran* which constituted 4.66 per cent. for the Union but barely exceeded 1 per

The number of females gainfully occupied constitutes from 40 to 50 per cent. of the total population aged 10 years and over in all areas except Durban (52.28), Pietermaritzburg (63.40) and East London (65.27); and in only three areas does the proportion engaged in domestic service fall significantly below 90 per cent., namely, Pietermaritzburg (80.73), Durban (84.23) and Cape Town (84.29).

The ratios of married, widowed and divorced females who were gainfully occupied to the corresponding section of the total population of the respective areas were as follows:—

Municipality.	Ratio.	Municipality.	Ratio.
	%		%
Cape Town.....	26.05	Pretoria.....	34.20
Port Elizabeth.....	31.12	Witwatersrand.....	42.12
East London.....	59.23	Johannesburg.....	41.40
Kimberley.....	33.77	Other Witwatersrand Municipalities.....	43.15
Pietermaritzburg.....	47.89	Bloemfontein.....	37.41
Durban.....	39.69		

In the majority of areas the proportion of domestic servants who were or had been married varied from about one-third to two-fifths of all female domestic servants. The proportion was significantly higher in East London (59.23) than in any other area and was lowest in Cape Town (26.05).

9. Religions of Natives.—The following table summarizes the information regarding the religions professed by the Native population:—

cent. in the Cape and the Orange Free State but was no less than 8.34 per cent. in the Transvaal; and *Roman Catholic* which was 3.53 per cent. for the Union as a whole, 6.71 per cent. for Natal, 6.08 for the Orange Free State and about 2 per cent. for the Cape and the Transvaal.

Dutch Reformed was highest in the Orange Free State (12.78) and Transvaal followed with 2.60 per cent.; the Cape and Natal had less than 1 per cent. each.

It is of interest to note that 1,440 persons professed the Mohammedan religion, of whom 888 were in the Transvaal and 476 in Natal.

Practically every form of religion and irreligion was represented by a few followers. These included *inter alia* 185 Christian Scientists, 117 Free Thinkers, 115 Atheists, 24 Swedenborgians and 5 Spiritualists.

PART III: ASIATIC POPULATION, CENSUS, 1936.

10. Asiatics in Provinces.—The provincial distribution of the 219,691 Asiatics enumerated in the Union of South Africa at the Census of May, 1936, was as follows:—

TABLE 17.—ASIATICS IN PROVINCES.

Province.	Number.			Percentage.			Ratio, Male/Female.
	Male.	Female.	Persons.	Male.	Female.	Persons.	
Cape.....	6,677	3,831	10,508	5.60	3.81	4.78	1.74
Natal.....	97,073	86,588	183,661	81.47	86.12	83.60	1.12
Transvaal.....	15,379	10,114	25,493	12.91	10.06	11.61	1.52
Orange Free State.....	22	7	29	.02	.01	.01	3.14
UNION.....	119,151	100,540	219,691	100.00	100.00	100.00	1.19

83.6 per cent. or approximately five-sixths of the Asiatics population was in Natal, while in the Cape and the Transvaal there were 11.6 per cent. and 4.8 per cent., respectively. Males exceeded females numerically by very nearly one-fifth in the Union as a whole, and in the Transvaal and the Cape by 52 per cent. and 74 per cent., respectively.

11. Asiatics in Districts.—The following are the main particulars regarding the district concentration of Asiatics in Natal:—

District.	Number of Asiatics.	Percentage of Total Population.
Durban.....	88,695	33.8
Pinetown.....	8,205	9.76
Inanda.....	19,871	51.85
Lower Tugela.....	18,953	33.26
Mtunzini.....	1,030	2.92
Lower Umfolozi.....	1,179	4.07
Umzinto.....	12,576	12.70
Port Shepstone.....	3,571	5.82
Pietermaritzburg.....	11,425	12.50
Lions River.....	1,578	7.37
Klip River.....	2,450	4.37
Newcastle.....	2,974	5.99
Dundee.....	3,248	6.98

The Durban district alone accounts for 40.4 per cent. of the total Asiatic population of the Union, while no less than 58.0 per cent. or nearly three-fifths are concentrated in Durban and the two districts immediately to the North of Durban, namely, Inanda and Lower Tugela. The proportions per cent. of Asiatics to total population in these districts are:—Durban, 33.8; Inanda, 51.9; Lower Tugela, 33.3. Along the South Coast there are also considerable numbers of Asiatics notably in Umzinto and Port Shepstone, where the proportions to total population are 12.7 per cent. and 5.8 per cent. The other districts where Asiatics constitute appreciable proportions of the total district populations are situated on or near the main road to the Transvaal.

The term "Asiatic" is generally associated with "Indian" in the Union, but from a consideration of home languages spoken it appears that Chinese constitute a relatively large proportion of the Asiatic population in certain areas. Thus, in the municipality of Port Elizabeth the percentage of Asiatics who speak Chinese is 25.7 or about one-quarter; for Johannesburg and Pretoria the proportions are 10.8 per cent. and 7.7 per cent., respectively. Port Elizabeth contains the only school in the Union in which the medium of instruction is the Chinese language.

12. Asiatics in the Chief Urban Areas.—The numbers of Asiatics in the chief urban areas of the Union are as follows:—

TABLE 18.—ASIATICS IN THE CHIEF URBAN AREAS.

Municipality.	Population.			Ratio, M/F.	Percentages Aged 21 Years and Over.	
	Male.	Female.	Total.		Male.	Female.
Cape Town.....	2,608	1,132	3,740	2.30	66.64	45.05
Port Elizabeth.....	1,400	1,059	2,459	1.32	56.57	43.53
East London.....	517	336	853	1.54	64.99	41.67
Kimberley.....	589	388	977	1.52	59.03	46.91
Pietermaritzburg.....	4,781	4,307	9,088	1.11	42.77	36.91
Durban.....	46,565	41,661	88,226	1.12	43.11	37.23
Pretoria.....	1,705	1,277	2,982	1.34	49.21	38.29
Witwatersrand.....	8,822	5,361	14,183	1.65	52.90	41.41
Johannesburg.....	6,393	3,716	10,109	1.72	53.23	42.60
Other Witwatersrand Municipalities.....	2,429	1,645	4,074	1.48	52.04	38.72

The Asiatic population of Durban consists of Indian to the extent of 99 per cent. and accounts for 40 per cent. of the Asiatic population of the Union and 33 per cent. of the total population of Durban. This area, moreover, has been settled by the Asiatic population longer than any other area of the Union and this fact may account for the relatively small numerical preponderance of males over females. In the other chief municipalities, except Pietermaritzburg, males exceed females very considerably; in Johannesburg the excess is 72 per cent. and in Cape Town no less than 130 per cent. The relative stability of the Asiatic population of Durban and Pietermaritzburg is further illustrated by the ratios of adults (persons aged 21 years and over) to young persons. In both areas the percentage of males is 43 per cent. and of females 37 per cent. These figures are very much lower than the corresponding percentages for the other chief municipalities. The proportion of adults in Cape Town explains the extraordinary sex-ratio to which reference was made above.

13. Age Distribution of Asiatics.—Although the curve of the age distribution of Asiatics is much more regular than that of Natives, there is a high degree of concentration on certain ages, especially those ending in 0*. The following table shows the chief items of interest regarding ages. A 10-year age grouping has been adopted with ages ending in 0 at the centre of the groups so as to smooth the data as far as possible.

*U.G. 28 of 1938 (P. 157 et seq.).

TABLE 19.—AGE DISTRIBUTION OF ASIATIC POPULATION.

† Distributed proportionately to numbers in groups.

Asiatics in urban areas are nearly twice as numerous as in rural areas. The ratio of those living in these two classes of areas varies with the age and increases continuously until about the age of 40 years is reached. Above that age there are relatively more persons in rural areas than in urban areas. This fact appears to be associated

with the ratio of the sexes at age 45 years and over, the number of males exceeding the number of females more considerably than in the lower age groups. The distribution of sexes according to age is illustrated in Diagram 3.

DIAGRAM 3.
AGE DISTRIBUTION OF ASIATICS.

The immigration of a large number of Indians, predominantly males, in the first decade of this century for the purpose of employ-

ment on the Natal sugar and tea plantations is largely responsible for this situation.

14. Marital Condition of Asiatics.—The chief features of the marital condition of Asiatics at different ages are shown in the following table. Diagram 4 shows the information in graphic form.

TABLE 20.—MARITAL CONDITION OF ASIATICS.

Age Group (Years).	Percentage of Each Condition.								Percentage of Total.

TOTAL	60.97	35.68	3.35	100.00	58.59	36.01	5.40	100.00	100.00	100.00	100.00	100.00	100.00	100.00

* Only 1 case.

The proportion of married males increases until, at about 40 years of age, a maximum of 90 per cent. are married, the remaining one-tenth being divided equally between "never married" and "widowed and divorced". After that age, the proportion of married males decreases while the proportion of widowed and

divorced increases until, at about 90 years of age, the proportions of the two classes are equal at 46 per cent. At this age about 8 per cent. have never been married. In the case of Asiatic males also, as with Natives, the proportion "never married" is higher in the advanced ages than in middle age.

DIAGRAM 4.
MARITAL CONDITION OF ASIATICS.

The proportion of married *females* reaches a maximum of somewhat over 90 per cent. at about 30 years of age and then decreases considerably more rapidly than in the case of males. The proportion "widowed and divorced" increases correspondingly and at about 60 years of age equals the percentage married. At this age there are fewer than 2 per cent. of females who have never been married so that one-half of the female population of this age may

be considered as married and the other half as widowed or divorced. The proportion of married females falls much more rapidly with advancing age than the proportion of males and in this respect the marital situation of Asiatics resembles that of Natives.

The main features regarding the marital condition of Asiatics of 21 years of age and over, in the chief urban areas of the Union, are shown in the following table:—

TABLE 21.—MARITAL CONDITION OF ASIATICS AGED 21 YEARS AND OVER IN CHIEF URBAN AREAS.

Municipality.	Male.				Female.			
	Never Married.	Married.	Widowed and Divorced.	Total.	Never Married.	Married.	Widowed and Divorced.	Total.
Cape Town.....	12.48	82.43	5.09	100.00	10.90	83.33	5.77	100.00
Port Elizabeth.....	22.34	72.60	5.06	100.00	12.61	75.90	11.49	100.00
Durban.....	17.05	75.87	7.08	100.00	5.39	78.08	16.53	100.00
Pietermaritzburg.....	20.34	72.68	6.98	100.00	7.68	77.96	14.36	100.00
Pretoria.....	15.72	77.96	6.32	100.00	5.75	82.74	11.51	100.00
Johannesburg.....	12.94	81.75	5.31	100.00	5.43	85.27	9.30	100.00
Witwatersrand.....	12.01	82.75	5.24	100.00	5.37	85.84	8.79	100.00

In both Cape Town and Johannesburg the proportions of males who have never been married are significantly lower than in any of the other areas. In the former of these areas, however, the proportion of females who have never been married (10.90) is twice as high as the corresponding proportion for Johannesburg (5.43). The explanation of this situation probably lies in the disparity between the proportions of males and females in these areas who are 21 years of age and over. The proportion who have never married is highest in Port Elizabeth both for males (22.34)

and for females (12.61). This fact may be associated with some demographic characteristic of the Chinese, who, as already pointed out, constitute no less than one-quarter of the Asiatic population of Port Elizabeth.

15. Knowledge of Official Languages.—The proportional distribution of Asiatics according to their knowledge of the official languages of the Union is shown in the table below:—

TABLE 22.—ASIATICS: AGE AND KNOWLEDGE OF OFFICIAL LANGUAGES.

Official Languages.	Age Group (Years).								Total.
	0-6.	7-14.	15-24.	25-34.	35-44.	45-54.	55-64.	65+.

English predominates as the language spoken by the European population of Natal, and this medium is used almost exclusively in the coastal districts, where the bulk of the Asiatic population is concentrated. Asiatics are in almost daily contact with Europeans in economic life and it is, therefore, not surprising that the proportion of Asiatics who are able to use the English medium far exceeds the proportion capable of using the Afrikaans medium. Further, the proportion who have a knowledge of either or both of the official languages should be higher amongst males than females.

The percentage of males with a knowledge of English only is 51 as against 1.3 with a knowledge of Afrikaans only. The proportion having a knowledge of the former rises with age, and by implication, with the degree of schooling, until the age of about 24 years is reached, when a maximum of about two-thirds of the male Asiatic population possess a knowledge of English. The proportion falls with advancing age to 23 per cent. for those aged 65 years and over. This decrease must be interpreted in the light of migration of Asiatics to the Union. It is unlikely that adult Asiatics who came to the Union some 35 years ago have gained a knowledge of English to any extent.

Particulars regarding the knowledge of the official languages amongst Asiatics of both sexes and all ages, in the chief urban areas of the Union, are as follows:—

TABLE 23.—ASIATICS IN CHIEF URBAN AREAS, KNOWLEDGE OF OFFICIAL LANGUAGES.

Municipality.	English and Afrikaans.	English only.	Afrikaans only.	Neither.	Total.
Cape Town.....	65.98	18.32	9.95	5.75	100.00
Port Elizabeth.....	56.72	38.56	0.7	3.75	100.00
Durban.....	1.65	52.63	0.8	45.64	100.00
Pietermaritzburg.....	2.31	70.85	1.0	26.74	100.00
Pretoria.....	64.39	13.65	10.64	11.32	100.00
Johannesburg.....	48.27	32.80	4.22	14.71	100.00
Witwatersrand.....	52.86	28.16	4.16	14.82	100.00

The Asiatic element forms a considerable proportion of the total population in Durban and Pietermaritzburg and there is consequently a less urgent necessity here for a knowledge of either or both of the official languages. This fact explains the high proportions of Asiatics who are completely without a knowledge of the official languages in these areas. For this reason, also, the proportion with a knowledge of the official languages is significantly higher in Pietermaritzburg, where the concentration of Asiatics is less dense than in Durban. About two-thirds of the Asiatics in Cape

Town and Pretoria have a knowledge of the official languages, while in Johannesburg the proportion is about one-half. The proportions with a knowledge of Afrikaans only are highest, as well as equal, in Cape Town and Pretoria and amount to one-tenth of the whole Asiatic population.

16. Home Languages of Asiatics.—The following table shows the distribution of the Asiatic population in the chief urban areas according to home language spoken.

TABLE 24.—HOME LANGUAGES OF ASIATICS IN CHIEF URBAN AREAS.

Language or Dialect.	Cape Town.	Port Elizabeth.	Durban.	Pietermaritzburg.	Pretoria.	Johannesburg.	Witwatersrand.

European.....	21.76	11.82	7.8	74	2.99	5.72	5.48
Other.....	2.84	—	1.7	—	—	4.1	2.9
TOTAL.....	100.00	100.00	100.00	100.00	100.00	100.00	100.00

About one-fifth of the Asiatic population of Cape Town and approximately one-eighth of that of Port Elizabeth use some European language, chiefly English or Afrikaans, at home. Chinese is used by no less than one-quarter of the population of Port Elizabeth, and by 10.8 per cent. and 7.7 per cent. of the populations of Johannesburg and Pretoria, respectively.

Indian dialects are used by 99 per cent. of the Asiatic population in Durban and Pietermaritzburg, by nine-tenths in Pretoria, five-sixths in Johannesburg, three-quarters in Cape Town and five-eighths in Port Elizabeth. There are significant differences between the proportions of the various dialects used in the respective municipalities. In Durban and Pietermaritzburg the most important dialects are Tamil, Hindustani and Telugu and they rank in that order. In Port Elizabeth Tamil also ranks first (37.1) with Gujarati second (15.1). In both Johannesburg and Pretoria Gujarati takes first place with Tamil second. In Cape Town again Urdu ranks highest (28.8) with Gujarati second (17.9), and Hindustani third (13.4). These differences are no doubt due to racial as well as to social and economic factors characteristic of the Indian communities in the respective areas.

PART IV: COLOURED POPULATION, CENSUS, MAY, 1936.

17. **Coloured Persons in Provinces.**—The provincial distribution of the Coloured population of the Union as enumerated at the Census in May, 1936, is shown in the following table:—

TABLE 25.—COLOURED POPULATION IN PROVINCES.

Province.	Sex.			Percentage of Union.	Percentage of Province.	
	Male.	Female.	Persons.		Urban.	Rural.
Cape.....	343,011	339,237	682,248	88.64	52.23	47.77
Natal.....	9,390	9,239	18,629	2.42	67.06	32.94
Transvaal.....	25,713	25,128	50,841	6.61	73.94	26.06
Orange Free State.....	9,317	8,626	17,943	2.33	47.12	52.88
UNION.....	387,431	382,230	769,661	100.00	53.91	46.09

Out of the total of 769,661 persons 88.6 per cent. or about seven-eighths were in the Cape and 6.6 per cent. in the Transvaal, the remaining 4.8 per cent. being very nearly equally divided between the Orange Free State and Natal. Males exceeded females by 14 per 1,000, the excess of males being about 2 per cent. or less in all provinces except the Orange Free State where there were 108 males to 100 females. The division of the population between urban and rural areas was approximately equal in the Cape and the Orange Free State but in the Transvaal and Natal three-quarters and two-thirds, respectively, were in urban areas.

18. **Coloured Persons in Districts.**—The following list shows the Cape districts in which the total Coloured population was approximately 5,000 or more. The percentages which this element formed of the total population are also shown:—

TABLE 26.—COLOURED PERSONS IN CAPE DISTRICTS.

District.	Coloured Persons.	Percentage of Total Population.	District.	Coloured Persons.	Percentage of Total Population.
Cape.....	80,027	43.13	Van Rhynsdorp.....	7,530	48.30

Bellville.....	21,534	50.73	Kenhardt.....	5,379	53.98
Stellenbosch.....	14,113	59.29	Namaqualand.....	17,234	66.68
Somerset West.....	7,386	46.04	Beaufort West.....	7,963	51.68
Caledon.....	14,520	48.97	Graaff-Reinet.....	8,805	38.06
Bredasdorp.....	6,079	46.49	Kimberley.....	11,617	20.19
Paarl.....	20,153	59.31	Swellendam.....	10,473	48.04
Wellington.....	7,997	63.29	Ladismith.....	4,980	48.63
Tulbagh.....	6,369	65.58	Riversdale.....	7,294	41.18
Ceres.....	7,098	63.34	Mossel Bay.....	7,598	49.57
Worcester.....	18,533	57.52	George.....	12,217	45.61
Robertson.....	7,486	52.46	Kuysna.....	8,139	49.81
Malmesbury.....	16,950	60.95	Oudtshoorn.....	16,923	55.87
Hopfield.....	6,229	56.24	Uniodale.....	6,806	48.05
Piquetberg.....	10,370	44.63	Humansdorp.....	8,834	34.24
Cianwilliam.....	7,765	52.67	Uitenhage.....	8,499	17.67
			Port Elizabeth.....	30,001	24.06

This list shows that the Coloured population was concentrated most densely in the districts along the Atlantic seaboard, in the Cape Peninsula and in the South-western and Southern districts as far as Port Elizabeth. The four districts of the Cape Peninsula, namely, the Cape, Wynberg, Simonstown and Bellville, accounted for no less than 25.1 per cent. or one-quarter of the total Coloured population of the Cape Province. The fact that the population of these districts is concentrated almost entirely in urban areas implies that these four districts accounted for nearly one-half of the total urban Coloured population of the Cape Province; actually the figure was 48.0.

The Coloured population of the Transkei was concentrated for the greater part in Xalanga (786), and the districts near the Natal border, namely Matatiele (871), Mount Currie (2,727), Umzimkulu (1,027), Port St. John's (583), and Lusikisiki (1,166).

It would be reasonable to assume that the concentration in Natal should be highest in the districts closest to the Cape border. This is found to be the case. The figures are as follows: Port Shepstone (497), Umzinto (707), Ixopo (909), and Alfred (710). The Coloured population of Durban was 7,669 and of Pietermaritzburg 2,550, or in each case, about 3 per cent. of the total population of the respective districts.

In the Orange Free State, again, the concentration was highest in the districts immediately across the Cape border to the South, namely Jacobsdal, Fauresmith, Philippolis, Trompsburg, Edenburg and Bethulie. In each of these districts the Coloured element formed about one-tenth of the total population. The number of Coloured persons in the Bloemfontein district was 3,643 or 4.4 per cent. of the total population.

The relative density of the Coloured population in the Transvaal was greatest in the districts of the South-west, namely Christiana (2.81), Bloemhof (3.85), Schweizer Reneke (2.26), Klerksdorp (2.55) and Potchefstroom (3.61). The districts of the Witwatersrand accounted for 32,363 or 63.7 per cent. of the total Coloured population of the Transvaal, the district of Johannesburg, by itself, contributing 46.7 per cent. or nearly one-half.

19. **Coloured Persons in Chief Urban Areas.**—The following table shows the number of Coloured persons in the chief urban areas (including suburbs) of the Union:—

TABLE 27.—COLOURED POPULATION IN CHIEF URBAN AREAS.

Municipality.	Population.			Ratio M/F.	Percentage Aged 21 Years and Over.	
	Male.	Female.	Total.		Male.	Female.
Cape Town.....	72,267	80,644	152,911	.90	46.27	49.29
Port Elizabeth.....	12,333	13,298	25,631	.93	50.34	50.14
East London.....	2,009	2,002	4,011	1.00	52.46	52.30
Kimberley.....	4,143	4,871	9,014	.85	43.91	47.59
Pietermaritzburg.....	1,129	1,205	2,334	.94	49.69	48.71
Durban.....	3,762	3,887	7,649	.97	48.14	48.86
Pretoria.....	1,592	1,800	3,392	.88	51.26	48.28
Witwatersrand.....	14,787	15,271	30,058	.97	51.72	52.71
Johannesburg.....	10,765	11,717	22,482	.92	50.29	53.64
Other Witwatersrand Municipalities.....	4,022	3,554	7,576	1.13	55.54	49.63
Bloemfontein.....	1,490	1,402	2,892	1.06	55.17	54.49

The Coloured population of Cape Town, including Wynberg, was 152,911 or 36.9 per cent. of the whole urban Coloured population of the Union, and about 43 per cent. of the total population of Cape Town. Port Elizabeth ranked second with 25,631 and Johannesburg third with 22,482. Only two other important urban areas had more than 5,000, namely Kimberley (9,014) and Durban (7,649).

The population aged 21 years and over was very nearly equal to that below those ages in all areas. The population of Kimberley was comparatively "young" in the sense that significantly more persons, of both sexes, were under 21 years of age than over. Likewise the populations of Bloemfontein and East London were "old".

There were fewer males than females in all areas except in Bloemfontein and East London and on the Witwatersrand, outside Johannesburg. In the last-mentioned group of municipalities there were no fewer than 113 males to 100 females. In Kimberley, on

the other hand, the sex-ratio was only .85 and in Pretoria .88. There is little doubt that a high sex-ratio is associated with a high proportion of persons aged 21 years and over.

20. **Racial Stock of Coloured Persons.**—The racial elements of the Coloured population of the Union were as follows:—

TABLE 28.—RACIAL ELEMENTS OF THE COLOURED POPULATION.

Race.	Persons.		Percentage of Union.		Percentage of Province.			
	No.	%	Urban.	Rural.	Cape.	Natal.	Transvaal.	O.F.S.
Cape Malay.....	34,078	4.43	7.88	.41	4.55	2.34	4.75	1.34
Cape Coloured.....	578,267	75.21	80.75	68.74	76.83	55.27	72.06	43.01
Bushman.....	6,513	.85	.23	1.57	.59	3.01	4.85	4.85
Griqua.....	31,686	4.11	2.95	5.46	3.32	4.82	7.22	24.66
Hottentot.....	86,474	11.25	4.22	19.47	12.00	1.06	4.39	12.49
Koranna.....	4,787	.62	.32	.97	.40	.05	1.47	7.29
Namaqua.....	3,410	.44	.17	.76	.49	.01	.06	.10
St. Helena.....	795	.10	.14	.06	.05	1.15	.46	.14
Swahli, Zanzibari.....	3,804	.49	.17	.76	.49	.01	.06	.10
Other.....	19,119	2.49	2.51	2.46	1.51	26.62	5.75	5.83
TOTAL.....	768,833	100.00	100.00	100.00	100.00	100.00	100.00	100.00

The above classification must be taken as being very approximate. The "Coloured" population of the Union is very mixed and few of the Hottentots and Bushmen, for example, are pure. In Natal there is a considerable admixture of Indian blood with Bantu, whereas in the Cape Province there is a certain amount of European blood mixed with Hottentot and Malay. In Volume I of the Census Report there appears a table showing the intermarriage of pure racial stocks which will produce offspring of mixed-coloured stock. The table covers a period of twelve years from 1925 to 1936, and records the actual marriages registered according to civil or religious rites and excludes customary unions or marriages by Native custom. In addition, there is an unknown quantity of miscegenation through promiscuous intercourse producing offspring of mixed blood. The group termed "Cape Coloured", although largely of Malay and Hottentot blood with an admixture of European blood, has, through the shifting of population, now a fair proportion of Bantu and other racial strains in its make-up. Miscegenation is more fully dealt with in the Report of the Commission of Enquiry regarding the Cape Coloured Population of the Union (U.G. 54/1937).

Cape Coloured persons constituted three-quarters of the total Coloured population of the Union, and only three other racial elements constituted more than 1 per cent., namely Hottentot (11.25), Cape Malay (4.43) and Griqua (4.11). The number of Bushmen or persons of Bushmen stock was 6,513 or .85 per cent. of the total.

Cape Coloured persons formed 80.75 per cent. or four-fifths of all Coloured persons in urban areas and Cape Malay 7.88 per cent.; Hottentots formed only 4.22 per cent. In rural areas Cape Coloured accounted for 68.74 per cent. and Cape Malay for only .41 per cent. Persons of the latter class are concentrated almost entirely in Cape Town and its immediate environs. The aboriginal racial elements are, as may be expected, of much more numerical importance in rural than in urban areas. Thus, Hottentots accounted for 19.47 per cent. or nearly one-fifth and Bushmen for 1.57; Griquas (Mulattos) formed 5.46 per cent. of the rural Coloured population. The distribution of persons of this class between urban and rural areas was nearer to equality than in the case of the aboriginal races.

The proportional distribution of the Coloured races in the Cape Province agrees very closely with that for the Union as a whole. This is not surprising since 88.6 per cent. of the Coloured people were enumerated in the Cape. In Natal, however, only 55.3 per cent. were Cape Coloured, while 8.4 per cent. were of St. Helena origin. These latter are, presumably, persons and descendants of

persons who were introduced from St. Helena for work on the sugar plantations. Rather more than one-quarter were classified as "other" and these probably consist, for the greater part, of persons who were partly Asiatic.

The Coloured population of the Transvaal consisted to the extent of 72.1 per cent. of Cape Coloured, 7.22 per cent. of Griquas, 4.75 per cent. of Cape Malays, 4.39 per cent. of Hottentots and 3.01 per cent. of Bushmen. An interesting feature regarding the Bushman population is that out of a total of 6,513 the Transvaal accounted for 1,527 or 23.4 per cent.

Only 43.0 per cent. of the Coloured population of the Orange Free State were Cape Coloured, while Griquas constituted no less than 24.66 per cent. or about one-quarter. The aboriginal Coloured races were considerably more numerous relatively in the Orange Free State than in the other provinces. The figures are: Hottentots 12.49 per cent., Korannas 7.29 per cent., and Bushmen 4.85 per cent.

There is no statistical information available regarding the geographical distribution of the different racial elements of the Coloured population. Cape Malays are known to be most numerous, absolutely and relatively, in the Cape Peninsula where the stock originated. The aboriginal races, namely Bushmen, Hottentots, Korannas and Namaquas are probably more numerous, relatively, in the Northern and North-Western districts of the Cape Province. Home language spoken throws some light on this question. Out of 420 Coloured persons in Walvis Bay 232 or 55 per cent. spoke "Hottentot or Bushman". Other districts in which these languages or dialects were spoken to any extent were: Gordonia 7.6 per cent., Namaqualand 4.0, Kenhardt 4.9, Hay 5.3, Kuruman 6.6, Vryburg 4.9.

The large number of persons stated to be of Bushman stock in the Transvaal (1,527) are concentrated most densely in the districts of the South-Western Transvaal, where they may have arrived by infiltration from the Northern districts of the Cape. Out of these 1,527, however, only 96 spoke either Bushman or Hottentot as their home language or mother tongue.

Attention has already been directed to the considerable number of Coloured persons in certain East Griqualand districts, namely Matatiele, Mount Currie and Umzimkulu, and in the districts immediately over the Natal border, namely Ixopo, Alfred and Port Shepstone. The proportion of Griquas amongst the Coloured persons of these areas is probably high. The concentration of Griquas in the Cape districts of Kimberley, Barkly West and Herbert, as well as in certain Orange Free State districts, especially Boshof, Jacobsdal and Fauresmith, is also probably high.

21. Age Distribution of Coloured Persons.—The age-distribution of the Coloured population is shown in the following table. As in the case of Natives and Asiatics the single age groups have been

combined into groups of ten with ages ending in 0 at the centres of the groups so as to smooth the data.

TABLE 29.—AGE DISTRIBUTION OF COLOURED POPULATION.

Age Group (Years).	Male.		Female.		Persons.		Ratio.	
	No.	%	No.	%	No.	%	Urban/Rural.	Male/Female.
0-4	61,318	15.85	61,860	16.20	123,178	16.02	1.03	.99
5-14	101,605	26.25	99,884	26.16	201,489	26.20	1.10	1.02
15-24	70,428	18.20	75,176	19.69	145,604	18.94	1.30	.94
25-34	54,675	14.13	54,288	14.22	108,963	14.18	1.35	1.01
35-44	38,704	10.00	36,341	9.52	75,045	9.76	1.23	1.07
45-54	28,738	7.43	25,630	6.71	54,368	7.08	1.13	1.12
55-64	16,796	4.34	14,665	3.84	31,461	4.09	1.10	1.15
65-74	10,171	2.63	9,611	2.52	19,782	2.57	1.09	1.06
75-84	3,540	.91	3,320	.87	6,860	.89	1.10	1.07
85-94	805	.21	837	.22	1,642	.22	1.11	.96
95-99	112	.03	119	.03	231	.03	.88	.94
100+	79	.02	88	.02	167	.02	.56	.90
TOTAL*	386,991	100.00	381,819	100.00	768,810	100.00	1.17	1.01

* Excluding unspecified: Male, 440; Female, 411.

There appears to be little difference between the proportional age distributions of males and females, except that there were relatively more females in the lower age groups up to about 30 years and relatively more males in the higher age groups.

There were approximately 117 persons in urban areas to every 100 in rural areas. It is of interest to note, that there were significantly more persons aged 15 years to about 50 in urban areas than in rural areas and that these age groups were responsible for the preponderance of persons in urban areas.

The sex-ratio for persons of all ages was 1.01. In the age groups from about 40 to 80 years there were appreciably more males than females.

TABLE 30.—MARITAL CONDITION OF THE COLOURED POPULATION.

Age Group (Years)	Male.				Female.			
	Never Married.	Married.	Widowed and Divorced.	Total.	Never Married.	Married.	Widowed and Divorced.	Total.
0-14	100.00	*	—	100.00	99.99	.01	—	100.00

90+	15.46	40.05	44.49	100.00	5.55	13.78	80.67	100.00
TOTAL	67.65	29.39	2.96	100.00	63.01	31.03	5.96	100.00

* Negligible, only 1 case.

At the date of the Census in May, 1936, about two-thirds (67.65 per cent.) of the Coloured male population had never been married, 29.4 per cent. were married, and 3.0 per cent. were widowed or divorced. The proportion of married persons rises with age until, at about 50 years, 80 per cent. are married. At this age 13 per cent. have never been married and 7 per cent. are widowed or divorced. After the age of 50 years the proportion of married males decreases and that in respect of widowed and divorced increases correspondingly until, between the ages of 85 years and 90, the proportions are equal at about 44 per cent. At this age about 12 per cent. or one-eighth have never been married.

The proportion of Coloured females who had never been married at the date of the census was 63 per cent. as against 31 per cent. married and 6 per cent. widowed and divorced. The proportion of married females is highest at the age of 40 years and then amounts to 80 per cent. After that age the proportion decreases much more rapidly than in the case of males until, at about 68 years of age the proportions of married and widowed and divorced persons are equal at about 46 per cent. It is of interest to note that the percentage of widowed and divorced females in the age group 80-89 years, namely 70.3 per cent., is significantly lower than the corresponding percentages in the case of Natives (81.1) and Asiatics (79.3).

The figures here discussed are shown in graphic form in the diagram below:—

DIAGRAM 5.
MARITAL CONDITION OF COLOURED PERSONS.

The marital condition in regard to Coloured persons of 21 years of age and over is shown in the table below for the chief urban areas of the Union:—

TABLE 31.—MARITAL CONDITION OF COLOURED PERSONS, AGED 21 YEARS AND OVER, IN CHIEF URBAN AREAS.

Municipality.	Male.				Female.			
	Never Married.	Married.	Widowed and Divorced.	Total.	Never Married.	Married.	Widowed and Divorced.	Total.
Cape Town	27.05	67.67	5.28	100.00	26.04	59.23	14.73	100.00
Port Elizabeth	32.23	62.42	5.35	100.00	25.27	60.56	14.17	100.00
East London	34.89	59.11	6.00	100.00	27.93	58.48	13.59	100.00
Kimberley	27.18	67.08	5.74	100.00	22.74	62.46	14.80	100.00
Pietermaritzburg	32.55	61.30	6.15	100.00	22.47	62.78	14.75	100.00
Durban	35.67	58.92	5.41	100.00	24.13	59.64	16.23	100.00
Pretoria	38.72	56.14	5.14	100.00	23.97	62.33	13.70	100.00
Witwatersrand	32.42	62.11	5.47	100.00	19.71	63.20	17.09	100.00
Johannesburg	29.77	64.53	5.70	100.00	20.58	61.80	17.62	100.00
Other Witwatersrand Municipalities	37.98	57.04	4.98	100.00	17.13	67.32	15.55	100.00
Bloemfontein	36.38	57.39	6.23	100.00	25.30	58.54	16.16	100.00

Comparison of these figures with the corresponding particulars in respect of Natives and Asiatics shows that the agreement with Natives is very close but that the proportions of married males as

well as females are considerably higher in each municipality for Asiatics than for either Natives or Coloured persons.

23. Knowledge of Official Languages.—The proportional distribution, by provinces, of the Coloured population according to their knowledge of the official languages of the Union, is as follows:—

TABLE 32.—COLOURED PERSONS: KNOWLEDGE OF OFFICIAL LANGUAGES.

Province.	English and Afrikaans.	English only.	Afrikaans only.	Neither.	Total.
Cape.....	31.53	1.63	66.64	.20	100.00
Natal.....	34.39	55.30	6.64	3.67	100.00
Transvaal.....	58.79	3.64	36.77	.80	100.00
Orange Free State.....	17.14	1.12	81.34	.40	100.00
UNION.....	33.04	3.04	63.60	.32	100.00

About one-third (33.04 per cent.) of the total Coloured population had a knowledge of both official languages, 3.04 per cent. of English only, 63.60 per cent. of Afrikaans only and .32 per cent. of neither. The differences between the provinces conform closely to the differences which exist in the case of Europeans. In the Orange Free State, for example, where the population in general is predominantly Afrikaans-speaking, 81.3 per cent. had a knowledge of Afrikaans only as against 17.1 per cent. with a knowledge of both. In the Cape, also, the proportion with a knowledge of Afrikaans only (66.6 per cent.) was much higher than the proportion with a knowledge of both. In Natal, on the other hand, where the population in general is predominantly English-speaking, 55.3 per cent. had a knowledge of English only as against 34.4 per cent. with a knowledge of both. The comparatively high percentage of persons with a knowledge of neither official language, namely 3.67, may perhaps be attributed to the high proportion of Coloured persons in Natal (26.6 per cent.) who could not be classified as Cape Coloured, Malay, Griqua or any of the aboriginal races of the Union; probably the only language of which these persons had a knowledge was some Indian dialect. The Transvaal had the highest proportion of Coloured persons with a knowledge of both official languages, namely 58.8 per cent.

The following table shows the proportional distribution, by ages, of the Coloured population of the Union according to their knowledge of the official languages:—

TABLE 33.—COLOURED POPULATION: AGE AND KNOWLEDGE OF OFFICIAL LANGUAGES.

Age Group (Years)	English and Afrikaans.	English only.	Afrikaans only.	Neither.	Total.
0-6.....	12.75	4.69	81.90	.66	100.00
7-14.....	30.90	2.85	65.82	.43	100.00
15-24.....	41.36	2.65	55.78	.21	100.00
25-34.....	43.19	3.12	53.63	.16	100.00
35-44.....	40.54	2.75	56.55	.16	100.00
45-54.....	37.40	2.21	60.22	.17	100.00
55-64.....	32.91	2.15	64.74	.20	100.00
65+.....	24.08	1.81	73.76	.35	100.00
TOTAL.....	33.03	3.04	63.61	.32	100.00
0-20.....	26.94	3.41	69.19	.46	100.00
21+.....	39.42	2.65	57.75	.18	100.00

Afrikaans was the home language of 90 per cent. of the Coloured population of the Union (see below). It is, therefore, natural that the percentage with a knowledge of Afrikaans only should be high (81.9 per cent.) in the case of children in the age group 0 to 6 years. With the progress of schooling a knowledge of English is acquired and the proportion with a knowledge of both languages increases, while that in respect of Afrikaans only decreases. At the age of about 30 years a turning point is reached and 53.5 per cent. have a knowledge of Afrikaans only and 43.2 per cent. of both English and Afrikaans. After that age the proportion of the former class increases again, owing, probably, to the fact that the older Coloured population had little or no opportunity or aptitude to acquire a knowledge of English.

The following table shows the extent to which the population of the chief urban areas is acquainted with the official languages:—

TABLE 34.—COLOURED PERSONS IN CHIEF URBAN AREAS: KNOWLEDGE OF OFFICIAL LANGUAGES.

Municipality.	English and Afrikaans.	English only.	Afrikaans only.	Neither.	Total.
Cape Town.....	72.24	3.48	24.26	.02	100.00
Port Elizabeth.....	71.59	4.64	23.72	.14	100.00
East London.....	82.00	4.04	13.97	.29	100.00
Kimberley.....	71.03	3.39	25.58	—	100.00
Pietermaritzburg.....	46.87	46.27	5.17	1.69	100.00
Durban.....	35.43	61.16	2.76	.65	100.00
Pretoria.....	68.81	1.34	29.79	.06	100.00
Witwatersrand.....	73.24	4.55	22.09	.12	100.00
Johannesburg.....	75.13	5.18	19.58	.11	100.00
Other Witwatersrand Municipalities.....	67.59	2.64	29.59	.18	100.00
Bloemfontein.....	32.02	1.80	65.47	.71	100.00

In Cape Town, the most important of these areas from the point of view of Coloured inhabitants, one-quarter of the population had a knowledge of Afrikaans only as against nearly three-quarters with a knowledge of both English and Afrikaans. These figures are in sharp contrast with the corresponding figures for the whole Cape Province, namely 66.6 per cent. and 31.5 per cent., respectively. The opportunity afforded to Coloured persons in Cape Town to acquire a knowledge of English through almost daily contact with English-speaking Europeans is no doubt responsible for this situation. The proportion with a knowledge of Afrikaans only is highest in Bloemfontein (65.5) and of English only in Durban (61.2).

24. Home Languages of Coloured Persons.—The following table shows the proportional distribution of the Coloured population in the provinces and chief municipalities according to home language:—

TABLE 35.—HOME LANGUAGES OF COLOURED POPULATION: PROVINCES AND CHIEF URBAN AREAS.

Area.	English.	Afrikaans.	Other.	Total.
(a) Provinces.				
Cape.....	6.03	91.97	2.00	100.00
Natal.....	61.35	23.48	15.17	100.00
Transvaal.....	11.64	81.39	6.97	100.00
Orange Free State.....	.99	94.90	4.11	100.00
UNION.....	7.62	89.69	2.69	100.00

(b) Municipalities.				
Cape Town.....	17.99	78.89	3.12	100.00
Port Elizabeth.....	17.44	79.61	2.95	100.00
East London.....	13.57	82.89	3.54	100.00
Kimberley.....	21.57	76.01	2.42	100.00
Pietermaritzburg.....	59.99	29.67	10.34	100.00
Durban.....	71.22	19.17	9.61	100.00
Pretoria.....	7.06	90.13	2.81	100.00
Witwatersrand.....	16.76	79.19	4.05	100.00
Johannesburg.....	20.00	75.75	4.25	100.00
Other Witwatersrand Municipalities.....	7.05	89.48	3.47	100.00
Bloemfontein.....	3.59	89.89	6.52	100.00

Afrikaans was the home language of 89.7 per cent. or nine-tenths of the Coloured population of the Union and English of 7.6 per cent. There are material differences between the provinces. In Natal, for example, Afrikaans accounted for 23.5 per cent. or nearly one-quarter while in the Orange Free State it was the home language of 94.9 per cent.

In Pretoria and Bloemfontein Afrikaans was the home language of about 90 per cent., in Cape Town of 78.9 per cent., in Port Elizabeth of 79.6 per cent., and in Johannesburg and Kimberley of about three-quarters. In Durban only 19.2 per cent. spoke Afrikaans at home.

Comparison of home languages with the knowledge of official languages shows that a small fraction of those acquainted with English only or both English and Afrikaans actually spoke English at home or both English and Afrikaans. In Pretoria and Bloemfontein this fraction was about one-tenth; in Cape Town, Port Elizabeth and Johannesburg it varied from one-fifth to one-quarter and in Durban and Pietermaritzburg it was about three-quarters.

VERSLAG

OOR DIE

SESDE SENSUS VAN DIE BEVOLKING VAN DIE UNIE VAN SUID-AFRIKA, 5 MEI 1936.

BOEKDEEL IX. NATURELLE (BANTOES) EN ANDER NIE-BLANKE RASSE.

DEEL I: VERHOUDINGSINDELING VAN DIE BEVOLKING VOLGENS GEBIEDE.

Tabelle en kaart wat die digtheid van die onderskeie rasse-elemente van die bevolking in verskillende dele van die land illustreer, is alreeds gepubliseer.*

Tabel 1 van hierdie verslag toon die geografiese indeling van die bevolking volgens die betreklike verhoudings van die

verskillende rasse-elemente in die 249 magistraat-distrikte. Onderstaande tabel bevat hierdie inligting in 'n beknopte vorm. Die kursiewe syfers (teenoor K & A in die onderste reël van die hokkies) toon die aantal distrikte waar kleurlinge, met inbegrip van Asië, die meerderheid van die nie-blanke gedeelte van die bevolking uitgemaak het.

TABEL 1.—VERHOUDINGS VAN DIE VERSKILLENDE RASSE IN DISTRIKTE.

N dui Naturelle aan en K & A Kleurlinge, met inbegrip van Asië.

Persentasie van die Vernaamste Nie-blanke Rasse.†	Persentasie van Blankes.

† Die syfers in hierdie kolom dui die betreklike verhoudings van naturelle en kleurlinge (met inbegrip van Asië) in die verskillende distrikte aan. Die syfer 1 in die eerste reël van die kolom 45-50 persent onder blankes toon aan dat daar 1 distrik was waar blankes 45-50 persent van die totale bevolking uitgemaak het, en dat naturelle, met 20-30 persent, onder die nie-blanke in die meerderheid was. Hiervan kan afgelei word dat die persentasie kleurlinge meer as 20, maar minder as 45 vir naturelle was.

In 81 distrikte wat byna almal in die Transkei en in Zoeloland geleë is, het die blankes minder as 10 persent van die totale distrikbevolking uitgemaak. Die naturelle-element het in slegs twee van hierdie distrikte minder as 80 persent van die nie-blanke in hierdie distrikte uitgemaak en in slegs een, naamlik Inanda (Natal), het die kleurlinge-element wat ook uitsluitend uit Asië bestaan

(52 persent), die naturelle-element oorskry. In 'n ander Natalse distrik, Laer-Tugela, was die verhouding Asië betreklik groot (33 persent), maar dit was nog omtrent een-helfte van die verhouding naturelle. Die verhouding Asië het in slegs een ander distrik, Durban, meer as 'n agste uitgemaak. Hierdie gebied sal later behandel word.

* U.G. No. 21, 1938.

Die verhouding blankes was in 127 distrikte minder as 25 persent en in al hierdie distrikte, met uitsondering van Inanda, was die verhouding natuurle aansienlik meer as die verhouding kleurlinge en Asiate; en in geen geval, weer met uitsondering van Inanda, het die verhouding van alle kleurlinge en Asiate meer as 12 persent van alle persone in die distrikte uitgemaak nie.

Daar was slegs 9 distrikte waar die blanke bevolking meer as 50 persent uitgemaak het, en in geen geval het dit 60 persent te bowe gegaan nie. In al hierdie distrikte, waarby die Kaap en Simonstad ingesluit is, was die Kaapse kleurlingelement onder die nie-blankes in die meerderheid. Van die 39 distrikte waar meer as 40 persent blankes was, het die natuurle-element die kleurlinge-element inderdaad in slegs 6 distrikte oorskry. Hierdie gebiede was as volg:—

Port Elizabeth, Johannesburg, Potchefstroom, Christiana, Bloemfontein en Fauresmith.

Die twee nie-blanke elemente was net in die eerste van hierdie distrikte, naamlik in Port Elizabeth, byna ewe groot; die syfers was: natuurle, 28·8 persent; en kleurlinge en Asiate, 26·1 persent.

Die grootste verhouding Kaapse kleurlinge was in Namaqualand (66·7 persent). Die ander belangrike distrikte uit hierdie oopland beskou, is as volg gerangskik:—

Tulbagh, 65·6; Ceres, 63·3; Wellington, 63·3; Malmesbury, 61·0; Paarl, 59·3; Stellenbosch, 59·3; Worcester, 57·5.

Bostaande oorsig dui aan dat verreweg die meeste van die distrikte waar die blanke element die grootste verhouding van die totale bevolking uitgemaak het, in die westelike gedeelte van die Kaapprovinsie geleë is en dat die Kaapse kleurlingelement in hierdie distrikte onder die nie-blankes die grootste gedeelte uitgemaak het.

Die syfers vir die magistraatsdistrikte waarin die vernaamste stedelike gebiede geleë is, was as volg:—

Distrik.	Blankes.	Natuurle.	Asiate.	Ander Kleurlinge.
	%	%	%	%
Kaap.....	52·03	3·58	1·26	43·13
Port Elizabeth.....	45·11	28·82	2·01	24·06
Oos-Londen.....	37·44	57·14	0·91	4·51

Distrik.	Blankes.	Natuurle.	Asiate.	Ander Kleurlinge.
	%	%	%	%
Kimberley.....	35·02	43·03	1·76	20·19
Pietermaritzburg.....	25·82	58·89	12·50	2·79
Durban.....	36·38	26·89	33·81	2·92
Pretoria.....	36·59	60·61	1·26	1·54
Johannesburg.....	48·85	44·82	1·91	4·42
Germiston.....	39·79	57·36	0·95	1·90
Benoni.....	26·51	70·02	1·16	2·31
Bloemfontein.....	41·63	53·92	0·01	4·44

Net meer as die helfte van die bevolking van die magistraatsdistrik die Kaap het uit blankes bestaan, terwyl 43 persent Kaapse kleurlinge was. Die balans van slegs 4·8 persent het bestaan uit natuurle en Asiate in die verhouding 3 tot 1. In die distrik Port Elizabeth wat meer na die ooste en nader aan die natuurlegebiede geleë is, was die blanke bevolking ietwat minder as die helfte en natuurle en kleurlinge taamlik gelyk-op verteenwoordig. In die distrik Oos-Londen wat nog verder na die ooste lê, was die verhouding kleurlinge 4·5 persent en natuurle 57 persent. Die rassamestelling van die bevolking van die distrik Bloemfontein het sterk ooreenkoms getoon met dié van Oos-Londen. In die distrik Kimberley het die verhouding blankes ietwat meer as eenderde uitgemaak en daar was tweemaal soveel natuurle as kleurlinge.

In die distrik Durban het die verhouding blankes 36 persent uitgemaak, terwyl daar meer Asiate (34 persent) as natuurle (27 persent) was. In die Pietermaritzburgse distrik wat dieper in die binneland in en verder weg van die kusstreek met sy talryke Asiate geleë is, was die verhouding Asiate slegs 12·5 persent, terwyl die verhouding natuurle 59 persent was.

Die blanke bevolking van die distrik Johannesburg het 49 persent en die natuurlebevolking 45 persent van die bevolking van dié gebied uitgemaak. Asiate en kleurlinge het dus maar omtrent 6 persent van die totaal uitgemaak. In die dunner bevolkte distrikte van die Witwatersrandse goudmynegebied was die verhoudings natuurle aansienlik groter, wat natuurlik te wyte is aan die indiensneming van natuurle by mynwerksaamhede. Alhoewel die getal natuurle wat in die myne op die Rand in diens is, taamlik konstant bly op die syfer van 300,000 manlike persone, is hulle byna uitsluitend op kontrak in diens geneem in alle dele van die Unie, die aangrensende gebiede en Portugees-Oos-Afrika.

DEEL II: NATURELLEBEVOLKING, SENSUS, 1936.

1. **Leeftyte van Naturellebevolking.**—Die getal persone op verskillende leeftye behoort 'n kontinue funksie van die leeftyd te wees as storende faktore soos oorloë, epidemieë, hongersnood, ens. buite rekening gelaat word, d.w.s. die getal persone behoort, sonder skielike onderbrekings of onreëlmatighede by sekere leeftye, onafgebroke van die een leeftyd na die ander te vermeerder of te verminder. Hierdie toestand is in die geval van die natuurlebevolking van die Unie verreweg nie verwesenlik nie.*

Onderstaande paar voorbeelde met betrekking tot natuurle van beide geslagte toon aan in watter mate die leeftyd van natuurle saamval op leeftye wat uitgaan op 0, bv. 10, 20, 30, ens.

Leeftyd.	Getal.	Leeftyd.	Getal.	Leeftyd.	Getal.	Leeftyd.	Getal.
18	184,211	28	125,481	38	76,467	58	23,232

Oranje-Vrystaat.....	48,285	6·15	55,703	15·61	222,407	8·80	226,715	7·74	553,110	8·39
UNIE.....	784,769	100·00	356,874	100·00	2,527,882	100·00	2,927,164	100·00	6,596,689	100·00

By 'n beskouing van hierdie tabel moet in gedagte gehou word dat die volkstellings in die Unie volgens die *de facto* beginsel opgeneem word, d.w.s. persone word opgeneem en ingedeel by die geografiese gebied waar hulle ten tye van die sensus vertoef het. Hierdie feit is die beste verklaring wat vir die ongelyke toestand wat deur die syfers aan die lig gebring is, gegee kan word. Die totale getal manlike persone (3,312,651) gaan nie alleen die getal vroulike persone (3,284,038) te bowe nie—'n buitengewone toestand—maar die geslagsverhoudings in die provinsies is ook abnormaal.

Die natuurlebevolking van die Unie verskuif voortdurend en groot getalle van beide geslagte, maar veral manlikes, trek vir 'n gedeelte van die jaar van hulle vaste woonplekke, hoofsaaklik die natuurlegebiede, na die goudmyne van die Witwatersrand (Transvaal) of na ander gebiede, veral stedelike gebiede, om werk te soek.

Wat die *stedelike gebiede* betref, was die verhouding van manlike tot vroulike persone in Natal 2·41 en in Transvaal 3·50. Die verklaring in die geval van Natal is dat manlike natuurle wat van die Natalse reserwes en van Zoeloeland af kom, na die stedelike gebiede trek om by die handel en nywerhede in diens te tree, terwyl die vroulike persone en kinders by tuis bly. Die feit dat daar in die stedelike gebiede van Transvaal 380,000 meer manlike as vroulike persone was, word verklaar deur die groot mate waarin natuurle in die Witwatersrandse goudmyne in diens geneem word. Dit lyk asof die geslagsverhouding in die Kaapprovinsie normaal is, terwyl die meerderheid vroulike persone in die Oranje-Vrystaat deels te wyte mag wees aan die tydelike verhuising van jong vroulike natuurle uit Basoetoland om as huisbediendes in diens te tree, of om by seisoenswerksaamhede in die landboubedryf werksaam te wees. Tabel 1 van hierdie verslag toon inderdaad dat die verhouding van natuurle tot die totale bevolking binne die magistraatsdistrikte wat na aan die Basoetolandse grens geleë is aansienlik hoër as op ander plekke in die Oranje-Vrystaat is. In hierdie distrikte was die getal vroulike natuurle aansienlik groter as die getal manlikes.

As daar van die veronderstelling uitgegaan word dat die geslagsverhouding een behoort te wees, word gevind dat daar in die plattelandse gebiede 'n meerderheid is van 208,000 vroulike

Daar is dus klaarblyklik 'n groot mate van onjuistheid wat in hoofsaak aan die ongeletterdheid van die natuurle eerder as aan bogenoemde storende faktore toegeskryf moet word. Vir administrasie en veral belastingdoeleindes en vir beramings van die werkkragte, sowel as vir sosiologiese navorsing, is dit partykeer belangrik om te weet watter getalle of verhoudings persone oor, onder of tussen sekere leeftydsgrense val. Om hierdie rede is dit raadsaam geag om die gegewens eenvormiger te maak deur die toepassing van interpolasieformules, met inbegrip van die formules waarvan by die samestelling van die Suid-Afrikaanse Lewenstabel, No. 3†, gebruik gemaak is. Hierdie pogings is met geen sukses bekroon nie.

Die oorsig wat hiervolgt, is derhalwe op die gewone leeftydindeling, soos dit by die sensus opgeneem is, gebaseer. Die aard van hierdie indeling moet oral waar na leeftye verwys is, in gedagte gehou word.

2. **Natuurle in Provinsies.**—Die provinsiale indeling van die natuurlebevolking ten tye van die sensus in Mei 1936 was as volg:—

natuurle in die Kaapprovinsie, van 121,000 in Natal en van 66,000 in Transvaal. In die Oranje-Vrystaat was daar 'n meerderheid van slegs ongeveer 6,000. As die stedelike en plattelandse gebiede saamgereken word, blyk dat die manlike persone in die Kaapprovinsie en Natal in die minderheid, was en wel met onderskeidelik 209,000 en 68,000, terwyl daar in Transvaal 'n meerderheid van 318,000 was.

Onderstaande tabel vestig die aandag op die toestand van die geslagsverhouding in die natuurlegebiede.

NATURELLE IN PROVINSIES EN NATURELLEGEBIEDE.

Gebied.	Manlikes.	Vroulikes.	Persone.	Verhouding. M/V.
Kaapprovinsie.....	918,345	1,127,225	2,045,570	0·81
Kaapprovinsie (Transkei uitgesonderd).....	429,447	462,148	891,595	0·93
Transkei.....	488,898	665,077	1,153,975	0·74
Natal.....	742,600	811,029	1,553,629	0·91
Natal (Zoeloeland uit- gesonderd).....	584,473	616,719	1,201,192	0·95
Zoeloeland.....	158,127	194,310	352,437	0·81
Transvaal.....	1,381,014	1,063,366	2,444,380	1·30
Oranje-Vrystaat.....	270,692	282,418	553,110	0·96
UNIE.....	3,312,651	3,284,038	6,596,689	1·01

Hierdie syfers dui aan dat die toestand van die geslagsverhouding in die Kaapprovinsie buitekant die natuurlegebiede, in Natal buitekant Zoeloeland en in die Oranje-Vrystaat min of meer normaal is. Hulle dui ook aan dat die trek na Transvaal, maar ook in sekere mate na ander plekke, hoofsaaklik uit die Transkei en in kleinere mate, sowel absoluut as betreklik, uit Zoeloeland geskied.

3. **Geboorteplekke van Natuurle.**—Die geboorteplekke van die natuurlebevolking word in onderstaande tabel getoon. Die meerderheid of minderheid van die persone wat in die besondere provinsies opgeneem is, in vergelyking met dié wat daar gebore is, word in die laaste drie kolomme van die tabel getoon.

* „Leeftyte en Huwelikstaat van die Bantoebevolking” (U.G. 50, 1938, bladsy 1).
† U.G. 49, 1939.

TABEL 3.—GEBORTEPLEKKE VAN MANLIKE NATURELLEBEVOLKING.

Ander Gebiede.....	1,354	4,586	5,940	—	—	—	—	—	—
TOTAAL.....	1,678,824	1,633,827	3,312,651	—	—	—	—	—	—

Ten tye van die sensus was daar 261,136 meer manlike naturelle in die Unie aanwesig as wat daarin gebore is, en 89.4 persent of ongeveer nege-tiendes van hierdie persone was 20 jaar en ouer. Hierdie verhouding van 9 volwassenes tot 1 jeugdige onder die naturelle wat nie in die Unie gebore is nie, toon dat die „vreemde” naturelle-element net tydelik hier was. Van hierdie „vreemde” naturelle het 42.22 persent uit Basoetoland, 35.66 persent uit Portugees-Oos-Afrika, 8.16 persent uit Swaziland, 6.63 persent uit Niassaland en 5.06 persent uit Rhodesië gekom. Dit is onmoontlik om vas te stel watter verhouding van die naturelle wat buite die Unie gebore is, ten tye van die sensus gevestigde inwoners in die Unie was, maar dit is redelik om aan te neem dat die verhouding

vir Basoetolandse naturelle baie hoër as vir die naturelle uit Portugees-Oos-Afrika was. Basoetoland is nie alleen vir volkstrekkende gunstiger teenoor die Unie geleë nie, maar die Basoeto's is bekend daarvoor dat hulle verkies om in diens te tree by die landbou, huishouding en die handel en nywerhede, behalwe myne, wat naturelle aanmoedig om hulle by die werkplek te vestig, terwyl dit bekend is dat die meeste naturelle uit Portugees-Oos-Afrika slegs tydelik in die goudmyne van Transvaal in diens is.

Die verhoudingsindeling volgens die plek waar die naturelle-bevolking wat in ander gebiede gebore is, opgeneem is, was as volg:—

TABEL 4.—BETREKKING TUSSEN GEBORTEPLEKKE VAN NATURELLE EN PROVINSIE WAARIN HULLE OPGENEEM IS.

Die syfers vir die provinsies toon aan dat daar in die Kaapprovinsie 214,000 minder manlike naturelle aanwesig was, as wat daarin gebore is. Die syfer stem amper presies, en nie heeltemal toevallig nie, ooreen met die reeds vermelde tekort aan 208,000 manlike persone in die plattelandse gebiede van die Kaapprovinsie.

Van al die manlike naturelle wat in die Kaapprovinsie gebore is, is 166,489 of 14.72 persent in die stedelike gebiede van Transvaal opgeneem en 36,329 of 3.21 persent in die plattelandse gebiede van dié provinsie. Die verhouding van die persone wat in die Kaapprovinsie gebore en ook daarin opgeneem is, was 79.23 persent.

Van die manlike naturelle wat in Natal gebore is, is 91.29 persent ook daar opgeneem, terwyl 46,595 of 6.09 persent in die stedelike gebiede en 13,919 of 1.82 persent in die plattelandse gebiede van Transvaal opgeneem is.

Die persentasie manlike naturelle wat in Transvaal gebore en ook daarin opgeneem is, was 99.00 persent. Hieruit blyk dat die trek na ander provinsies van naturelle wat in Transvaal gebore is, onbeduidend gering was.

Van die manlike naturelle wat in die Oranje-Vrystaat gebore is, is 82.36 persent in dié provinsie opgeneem; 19,971 of 7.67 persent is in die stedelike gebiede en 20,310 of 7.81 persent in die plattelandse gebiede van Transvaal opgeneem.

Die getal manlike naturelle wat in Basoetoland gebore en in die Unie opgeneem is, was 110,245. Hiervan was 47,422 of 43.01 persent in die stedelike gebiede van Transvaal; 12,222 of 11.09 persent in die plattelandse gebiede van Transvaal; 6,243 of 5.66 persent in die stedelike gebiede van die Oranje-Vrystaat; en 30,172 of 27.37 persent in die plattelandse gebiede van dié provinsie. In die Kaapprovinsie was daar 8.25 persent en in Natal 4.62 persent.

Die totale getal manlike naturelle wat in Portugees-Oos-Afrika gebore en in die Unie opgeneem is, was 93,114. Hiervan was 69,736 of 74.89 persent in die stedelike gebiede en 13,725 of 14.74 persent in die plattelandse gebiede van Transvaal. Van die origes was 7,386 of 7.93 persent in die plattelandse gebiede van Natal, grotendeels in diens by die suiker- en wattleplantasies in die noorde.

Dit is verder van belang om op te merk dat 85.2 persent van die manlike Portugees naturelle in die stedelike gebiede van Transvaal tussen 20 en 40 jaar oud was. Hierdie verhouding is aansienlik hoër as die ooreenstemmende verhouding vir die naturelle uit ander gebiede.

Ten tye van die sensus was daar 21,311 manlike naturelle wat in Swaziland gebore is, in die Unie en hiervan was 10,536 of 49.4 persent in die stedelike gebiede en 8,787 of 45.5 persent in plattelandse gebiede van Transvaal.

Die getal manlike naturelle van Niassaland afkomstig, was 17,324 waarvan daar 4,719 of 27.2 persent in die stedelike gebiede en 10,987 of 63.5 persent in die plattelandse gebiede van Transvaal was. Van die 13,202 manlike naturelle wat uit Noord- en Suid-Rhodesië gekom het, was 6,764 of 51.2 persent in die stedelike gebiede en 5,338 of 40.4 persent in die plattelandse gebiede van Transvaal.

Dit blyk helder uit bostaande oorsig dat die naturellebevolking van Transvaal vir sover dit die stamverband daarvan betref, baie gemengd is, en dat die trek van naturelle binne die Unie en na die Unie, hoofsaaklik na Transvaal, en veral na die stedelike gebiede van Transvaal, geskied. Van die 537,069 manlike naturelle in die stedelike gebiede van Transvaal was inderdaad slegs 162,523 of 30.3 persent in Transvaal gebore; 166,489 of 31.0 persent in die Kaapprovinsie; 69,736 of 13.01 persent in Portugees-Oos-Afrika; 47,422 of 8.85 persent in Basoetoland; en 46,595 of 8.7 persent in Natal.

Ten tye van die sensus was daar 3,284,038 vroulike naturelle in die Unie waarvan 72,641 nie in die Unie gebore was nie. Die besonderhede verskyn in onderstaande tabel:—

TABEL 5.—GEBORTEPLEKKE VAN VROULIKE NATURELLE.

Gebied.	Gebore in.			Opgeneem in.			Verskil.		
	Jonger as 20 jaar.	20 jaar en ouer.	Totaal.	Jonger as 20 jaar.	20 jaar en ouer.	Totaal.	Jonger as 20 jaar.	20 jaar en ouer.	Totaal.

Oranje-Vrystaat.....	149,414	120,129	269,543	147,114	135,304	282,418	- 2,300	+ 15,175	+ 12,875
UNIE.....	1,646,049	1,565,348	3,211,397	1,659,944	1,624,094	3,284,038	+ 13,895	+ 58,746	+ 72,641
Basoetoland.....	10,873	42,720	53,593	—	—	—	—	—	—
Swaziland.....	1,384	8,397	9,781	—	—	—	—	—	—
Portugees-Oos-Afrika.....	397	4,520	4,917	—	—	—	—	—	—
Ander Gebiede.....	1,241	3,109	4,350	—	—	—	—	—	—
TOTAAL.....	1,659,944	1,624,094	3,284,038	—	—	—	—	—	—

Dit blyk dat die verhouding van manlike persone van vreemde geboorte tot vroulike persone van vreemde geboorte 3.6 tot 1 is. Van hierdie vroulike persone is 73.8 persent in Basoetoland gebore, 13.5 persent in Swaziland en die meeste van die origes in Portugees-Oos-Afrika. 'n Vergelyking van die verhoudings tussen manlike en vroulike persone wat in Basoetoland (2.06), Swaziland (2.18) en Portugees-Oos-Afrika (18.94) gebore is, dui daarop dat 'n aansienlike verhouding persone wat in Basoetoland en Swaziland gebore is, waarskynlik as hele familie-eenhede in die Unie gevestig was, terwyl die naturelle van Portugees-Oos-Afrika tydelik hier in diens was.

Die Kaapprovinsie en Natal toon verliese van vroulike persone wat daar gebore is, terwyl Transvaal en die Oranje-Vrystaat vermeerderings van onderskeidelik 109,257 en 12,875 toon. Daar was in Transvaal byna vyfmaal soveel manlike persone van vreemde geboorte as vroulike persone van vreemde geboorte.

Van die vroulike bevolking in die plattelandse gebiede van die Kaapprovinsie en Natal was meer as 99 persent in dié provinsies gebore; die persentasies vir Transvaal en die Oranje-Vrystaat was onderskeidelik 93.2 en 82.6. Die verhouding vroulike persone uit gebiede buite die Unie afkomstig, was in laagste mate in die Kaapprovinsie besonder groot. Van die 53,593 vroulike Basoeto's in die Unie was daar inderdaad 28,202 of 52.6 persent in die plattelandse gebiede en 13.0 persent in die stedelike gebiede van die Oranje-Vrystaat; die verhoudings vir Transvaal en die Kaapprovinsie was onderskeidelik 19.77 en 12.66 persent. Die getal vroulike Swazi's in die Unie was 9,781 waarvan 22.1 persent in die stedelike gebiede en 68.9 persent in die plattelandse gebiede van Transvaal was.

4. *Leeftydsindeling van Naturelle.*—Onderstaande tabel toon die leeftydsindeling, na verhouding, van die manlike en vroulike naturelle in stedelike en plattelandse gebiede en dié van manlike naturelle in die Transkei en Transvaal. Die indeling van die leeftye in groepe van tien jaar, met die jare wat op 0 eindig, in die middel van elke groep, dra daartoe by om die onreëlmatighede waarna reeds verwys is, te verwyder.

TABEL 6.—LEEFTYDSINDELING VAN NATURELLE.

75-84.....	0.28	0.64	0.94	1.02	0.91	0.61	0.91	0.61
85-94.....	0.07	0.20	0.26	0.28	0.21	0.20	0.21	0.20
95-100.....	0.02	0.07	0.05	0.04	0.03	0.04	0.03	0.04
100 +.....	0.01	0.02	0.02	0.02	0.01	0.02	0.01	0.02
TOTAAL.....	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

In die *stedelike gebiede* is die verhouding kinders en jeugdiges van die vroulike geslag wat ongeveer van skoolgaande ouderdom is, heelwat groter as die verhouding manlike persone van hierdie leeftye. Die verhouding manlikes van 25- tot 50-jarige leeftyd is weer aansienlik groter as die verhouding vroulike persone van hierdie leeftye. Die verhouding vroulike persone van gevorderde leeftyd, naamlik 55 jaar en ouer, is 5.97 persent in vergelyking met 3.47 persent in die geval van manlike persone. Dit lyk waarskynlik dat die manlike naturelle na die stedelike gebiede trek so gou as hulle oud genoeg is om te begin werk, en dat 'n groot verhouding hierdie gebiede permanent verlaat so gou as hulle min of meer te oud vir werk geword het.

Die leeftydsindeling van manlike en vroulike persone is in die plattelandse gebiede baie eenders. Die manlike persone van 15 jaar en jonger maak van die totale manlike bevolking 'n effens groter verhouding uit as die ooreenstemmende verhouding vroulike persone; maar vir die leeftydsgroep 15 tot 35 jaar is die toestand net die teenoorgestelde.

Die leeftydsindeling van manlike persone in die Transkei en Transvaal werp baie lig op die opmerkings wat hierbo gemaak is met betrekking tot die trek van naturelle. Daar is 'n betreklike klein verhouding manlike naturelle van 20 jaar tot ongeveer 45 jaar in die Transkei en 'n betreklik groot verhouding naturelle van hierdie leeftye in Transvaal. 'n Grafiese voorstelling van die toestand word in diagram 1 gegee.

DIAGRAM 1.
LEEFTEYSINDELING VAN NATURELLE.

Die twee indelings vul mekaar nie heeltemal aan nie, maar dit blyk helder dat die tekort in die Transkei in 'n baie groot mate deur die oorwig in Transvaal aangevul word. Om 'n genoegsame verklaring van die groot oorwig in Transvaal te kan gee, moet die naturelle wat buite die Unie gebore is, ook in aanmerking geneem word.

5. Naturelle in Vernaamste Stedelike Gebiede.—Onderstaande tabel toon die getal manlike en vroulike naturelle in die vernaamste

stedelike gebiede van die Unie en die verhoudings in drie leeftyds-groepe wat die hele leeftyd dek.

TABEL 7.—NATURELLE IN VERNAAMSTE STEDELIKE GEBIEDE.

Die totale getal manlike naturelle in die stedelike gebiede van die Unie ten tye van die sensus was 784,769 waarvan 462,996 of 59.0 persent in die stedelike gebiede van die Witwatersrand was en 37.3 persent of sewe-agstes in bogenoemde 18 vernaamste stedelike gebiede. In skerp teenstelling hiermee was die verhouding vroulike persone in die stedelike gebiede van die Witwatersrand slegs 30.0 persent en in die 18 vernaamste stedelike gebiede 54.8 persent.

As na die verhoudings van manlikes tot vroulikes en die verhoudings persone in die verskillende leeftyds-groepe geoordeel moet word, blyk dit dat die naturellebevolkings van Port Elizabeth, Oos-Londen, Kimberley en Bloemfontein betreklik stabiel is. Die verhouding vroulike persone van 15 tot 64 jaar was in Oos-Londen buitengewoon hoog. In Bloemfontein was daar slegs 86 manlike persone vir elke 100 vroulike persone en, afgesien van Oos-Londen waar die geslagte omtrent gelyk-op verteenwoordig is, was dit die enigste gebied waar die geslagsverhouding minder as een was.

Die verhoudings jong manlike naturelle was in al die stedelike gebiede van die Witwatersrand baie klein en die naturelle van 14 jaar en jonger het slegs 2.9 persent van al die manlike naturelle in die munisipale gebied Rooodepoort uitgemaak. In hierdie gebied was daar ook niks minder as 933 manlike persone vir elke 100 vroulikes nie. Die geslagsverhouding vir die hele Witwatersrand was 4.32 en die getal manlike persone het die getal vroulikes met niks minder as 355,800 oorskry nie.

6. Huwelikstaat van Naturelle.—Onderstaande tabel toon die huwelikstaat van die naturellebevolking in verskillende leeftyds-groepe. Die getal egskedings onder die naturellebevolking is onbeduidend gering—die verhouding maak minder as 0.3 persent van die totale bevolking uit. Die syfers vir persone in wedustaat en geskeide persone is derhalwe in onderstaande tabelle saamgevat.

TABEL 8.—HUWELIKSTAAT VAN NATURELLE.

Leeftydsgroep (Jare).	Manlikes.				Vroulikes.

* Slegs 6; persentasie onbeduidend.

† Slegs 28; persentasie onbeduidend.

‡ Met uitsondering van dié waarvan leeftyd en huwelikstaat nie vermeld is nie.

Die vernaamste kenmerke van die huwelikstaat blyk dadelik uit diagram 2 hieronder. Die verhouding getroude manlike naturelle toon 'n gestadige styging in ooreenstemming met die leeftyd totdat 'n maksimum van ongeveer 88 persent by 55 jaar bereik is. Op hierdie leeftyd was 5.9 persent nooit getroud nie en 6.1 persent in wedustaat of geskei. Die verhouding getroude manlike persone verminder dan, terwyl die verhouding wewenaars en geskeide persone

toeneem totdat 55.5 persent in die leeftydsgroep 100 jaar en ouer nog of weer getroud is, terwyl 39.2 persent in wedustaat verkeer of geskei is. Dit is van belang om op te merk dat die verhouding naturelle wat nooit getroud was nie, toeneem nadat die leeftyd van 80 jaar bereik is. Dit mag 'n interessante sosiologiese verskynsel wees of dit mag te wyte wees aan 'n verkeerde opgawe van die leeftyd of die huwelikstaat.

Onderstaande tabel toon die verhoudingsindeling volgens leeftyd van die natuurlike in die hoofgroepe.

TABEL 11.—MANLIKE NATURELLE IN BEDRYFSGROEPE.

TOTAAL.....	100.00	100.00	100.00	100.00	100.00

Die getal manlikes wat in landboubedrywe werksaam was, met inbegrip van dié wat by parke en tuine in diens was, het 1,437,087 of vyf-agstes van die totaal in winsgewende beroepe behoop. By hierdie totaal is 517,377 landbou-arbeiders waarvan 66.5 persent jonger as 40 jaar was, en 101,833 vee- en skaapwagters waarvan 90.9 persent jonger as 20 jaar was, ingesluit. Die meeste van die origes het op hul eie geboer op die plase van blankes en op grond wat aan stamme behoort ens. Van die totaal wat in landbedrywe werksaam was, was 40.34 persent jonger as 20 en 70.67 persent jonger as 40 jaar. Die getal persone van 80 jaar en ouer was 17,012 en daar is beweer dat niks minder as 477 nie 100 jaar en ouer was.

Die getal manlike natuurlike wat by myne en steengroewe in diens was, was 393,020 of 17.07 persent van die getal persone in winsgewende beroepe. Van hierdie persone is 388,894 as mynarbeiders omskryf; 55.1 persent van hierdie persone was jonger as 30 en 85.6 persent jonger as 40 jaar.

Die getal in fabrieksnywerheidsberoepe was 210,407 of 9.13 persent van die getal persone in winsgewende beroepe. Van hierdie persone is 189,790 of 90.2 persent omskryf as ongeskoolde arbeiders en 71.1 persent van hulle was jonger as 40 jaar. Die vernaamste beroepe wat bepaald omskryf is, was as volg:—

Metaalverwerking en Ingenieurswese.—Grofmede, 484; stokers van vasstaande masjiene, 369; loodgieters, 515.

Houtbewerking.—Timmermans, 1,221; saers, 253.

Bou- en Aannemersbedryf.—Messelaars, 1,159; steenhouders en klipkappers, 958; skilders, 741.

Klerasie, Tekstielgoedere en Skoel.—Skoenmakers, 2,332; snyers, 862.

Voedsel, Drank en Tabak.—Slagters, 445; bakkers en banketbakkers, 289; soutwerkers, 525; suikerfabriekswerknemers, 2,718 (waarvan 82.3 persent jonger as 40 jaar was); steen- en teëlmakers, 3,038 (waarvan 61.1 persent jonger as 40 jaar was). Waarskynlik was 'n groot verhouding van hierdie klasse, veral van die laaste twee, ongeskoolde arbeiders.

Die getal persone in beroepe wat by vervoer en verkeer betrokke is, was 90,193 of 3.92 persent van die getal persone in winsgewende beroepe. Weens die feit dat drywers van voertuie, bodes en

* Na verhouding onder ander groepe ingedeel.

besteldienswerknemers, ens. wat by die handel en geldwese, fabrieksnywerhede, ens. in diens was, by hierdie groep inbegrepe is, is die syfer hiervoor waarskynlik te hoog. Die vernaamste beroepe in hierdie groep was: spoorwegarbeiders, 29,056; padarbeiders, 28,628; dokarbeiders, 2,704; bodes en besteldienswerknemers, 18,938; drywers van voertuie deur diere getrek, 3,080; bestuurders van motorvoertuie, 2,457; stalknegte, 1,825; riksatrekkers, 1,516. Die verhouding persone wat jonger as 40 jaar was, was 68.66 persent van die hele groep. Die ooreenstemmende verhoudings vir spoorweg- en padarbeiders was onderskeidelik 66.4 en 63.8 persent. Van die bodes en besteldienswerknemers, was 49.9 persent onder die 20 jaar en 78.5 persent was onder 40 jaar oud.

Die getal persone wat in beroepe van die handel en geldwese-groep werksaam was, was slegs 6,447 waarvan 818 eienaars van handels-firmas; 1,636 marskramers en smouse; 1,950 verkoopsagents; en 1,756 klerke was.

Die totale getal persone in beroepe wat by die groep professies, sport en vermaaklikhede betrokke is, was 17,605. Onderstaande was hierby ingesluit.

Polisie.....	6,711	Onderwysers	
Tronkbewaarders.....	776	(akademies).....	4,758

Kantoorboek-	Verpakkers, ver-
makers.....	senders en
Wagters.....	etiketaanplakkers..
	560
	Visser.....
	272

Dit is van belang om op te merk dat die persentasies jeugdige persone onder die 20 jaar, in die geval van die landbou- en persoonlike diens-groepe hoog was, naamlik onderskeidelik 40.34 en 32.18 persent. By elkeen van die ander drie groot groepe, naamlik fabrieksnywerhede, myne en vervoer en verkeer, was die verhouding slegs omtrent 8 persent. By die mynbou strek die indeling volgens leeftyd oor 'n betreklik klein aantal jare—77.05 persent was tussen 20 en 40 jaar oud.

Vroulike Natuurlike.—Die totale getal vroulike natuurlike van 10 jaar en ouer wat by die sensus in Mei 1936 opgeneem is was 2,329,681. Die indeling van hierdie persone volgens ekonomiese bedrywigheid word in onderstaande tabel getoon.

Die getal vroulike natuurlike in winsgewende beroepe het 1,919,319 of 82.4 persent van die totale bevolking wat in oorweging geneem is, uitgemaak. Van die balans het 312,048 of 13.4 persent huishoudelike pligte sonder betaling verrig en 89,603 of 3.8 persent was leerlinge. Laasgenoemde getal het die getal manlike leerlinge met ongeveer 9,000 oorskry. Die getal permanente inwoners in inrigtings was 2,783, in teenstelling met 6,051 manlikes. Die verhoudingsindeling volgens leeftyd onder die drie hoofgroepe was as volg:—

TABEL 13.—VROULIKE NATURELLE IN SEKERE BEROEPSKLASSE.

Leeftydsgroep (Jare).	Beroepsklas.		
	Landbou.	Persoonlike Diens.	Huishoudelike Pligte.
10-19.....	30.41	34.17	7.66
20-29.....	22.26	32.00	26.00
30-39.....	17.80	17.11	28.06
40-49.....	11.76	9.77	18.43
50-59.....	7.95	4.60	10.54
60-69.....	5.80	1.82	6.10
70-79.....	2.71	0.43	2.02
80 +.....	1.31	0.10	0.59
TOTAAL.....	100.00	100.00	100.00

Van die gedeelte van die bevolking in winsgewende beroepe was 1,659,349 vroulike natuurlike of 86.5 persent met landbou besig. Hierdie syfer vergelyk met 1,437,087 vir die getal manlikes wat in hierdie bedryf werksaam was. Die verhouding vroulike persone

was jonger as 20 jaar en in die landbou werksaam was, 30.4 persent en dié wat jonger as 40 jaar was, 70.5 persent. 'n Totaal van 21,787 was 80 jaar en ouer en niks minder as 547 nie was, na beweer is, 100 jaar en ouer. Die getal vroulikes wat as kleinboere opgegee is, was 1,618,746.

Die enigste ander beroepsgroep van belang was persoonlike diens en hierby is 243,369 persone of 12.7 persent van die getal in winsgewende beroepe ingedeel. Van hierdie persone is 241,230 as huisbediendes geklassifiseer en 1,137 as chefs en kokke. Ongeveer vyf-sesdes van die persone in die hele groep persoonlike diens was jonger as 40 jaar. Die enigste ander beroep van belang by hierdie groep was die wasserywerkers waarvan daar 814 was.

By die groep algemene fabrieksnywerhede is slegs 3,358 persone inbegrepe waarvan 2,609 as ongeskoolde arbeiders, 221 as mode-maaksters, 100 as naaimasjienwerksters en 89 as pottebakkers geklassifiseer is.

Daar was 4,335 persone by professies, vermaaklikhede en sport in diens, waarvan 3,441 onderwyseresse en 571 verpleegsters was.

By die handel en geldwese-groep waarby daar 242 persone inbegrepe was, was daar 126 verkoopsters en 83 smouse.

8. Bedrywe en Beroepe in Vernaamste Stedelike Gebiede.—*Manlike Natuurlike.*—Die indeling volgens bedryfsgroepe van die manlike natuurlike van 10 jaar en ouer wat ten tye van die sensus

in die vernaamste industriële gebiede van die Unie in winsgewende beroepe was, word in onderstaande tabel getoon.

Die verhouding persone wat in die vernaamste stedelike gebiede in die landbou werksaam was, is noodwendig klein en die werksaamhede is hoofsaaklik tot groenteboerdery en suiwel- en pluimveeboerdery beperk. Die verhouding is alleen in die geval van Pretoria (5.40), Pietermaritzburg (9.87) en Bloemfontein (18.35) meer as 5 persent. Die persentasie vir Johannesburg was 1.69 en dié vir die Witwatersrand as 'n geheel slegs 1.02 persent.

Die natuurlike wat by myne en steengroewe opgeneem is, was amper uitsluitend by steengroewe in diens, behalwe in die geval van Kimberley (diamantmyne) en op die Witwatersrand (goudmyne). Die verhouding wat in Kimberley in die myne werksaam was, was byna een-derde, terwyl dit in Johannesburg 41.46 persent of ongeveer twee-vyfdes was. In die ander Witwatersrandse stedelike gebiede tesame was die verhouding niks minder as 82.65 persent nie; en vir die hele Witwatersrand, met inbegrip van Johannesburg, was dit 68.19 persent of meer as twee-derdes.

Die verhouding wat by algemene fabrieksnywerhede, met inbegrip van die bou- en aannemersbedryf in diens was, varieer van 28.75 persent in Johannesburg tot 62.94 persent in Port Elizabeth. Op die Witwatersrand, Johannesburg uitgesonderd, was die verhouding slegs 8.62 persent. Die syfers vir Kaapstad en Durban was onderskeidelik 45.61 en 38.50 persent. Dit is nie moontlik om die syfers te gee vir die onderafdelings van die fabrieksnywerhede nie, soos ingenieurswese, voedsel, drank en tabak, bou- en aannemersbedryf, klerasie en tekstielgoedere, ens.

Die persentasie wat in die handel en geldwese werksaam was, maak slegs in die geval van Oos-Londen (1.24) en Bloemfontein (1.22) meer as 1 persent uit, terwyl die getal wat by die professies, vermaaklikhede en sport in diens was, slegs in Kimberley (2.90), Pietermaritzburg (3.15) en Bloemfontein (2.14) meer as 2 persent uitmaak. Die verhouding van manlike natuurlewerkkragte in persoonlike en huisdiens staar in Pietermaritzburg die hoogste, nl. 35.99 persent. Kort daarop volg Pretoria (31.81) en Durban (29.41). Die persentasie vir Johannesburg was 15.89 en dié vir die hele Witwatersrand 7.91 persent.

Watter mate van manlike naturelle van 10 jaar en ouer in die verskillende munisipaliteite in winsgewende beroepe was, word in die voorlaaste reël van bostaande tabel getoon. Ongeveer nege-tiendes of meer in alle gebiede, behalwe in Kimberley (80-49) en Bloemfontein (76-47), is in beroepe werksaam. Die verhouding is op die Witwatersrand, sonder inbegrip van Johannesburg, die hoogste, nl. 98-43 persent.

In die laaste reël van die tabel word die verhouding van die gedeelte van die naturellebevolking wat nooit getroud was nie, tot die totale getal persone in winsgewende beroepe getoon. Hierdie verhoudings is bepaald die laagste in die gebiede wat, soos reeds vermeld is, 'n taamlik stabiele bevolking het, nl. Oos-Londen, Kimberley en Bloemfontein. Die feit dat daar in Durban onder die gedeelte van die bevolking in winsgewende beroepe die grootste verhouding manlike naturelle was wat nog nooit getroud was nie, kan miskien verklaar word deur die feit dat hierdie gebied so na aan Zoeloland en aan die naturelleserwes geleë is.

Vroulike Naturelle.—Die vernaamste eienskappe in verband met werkverskaffing aan vroulike naturelle en jeugdige van 10 jaar en ouer in die vernaamste stedelike gebiede word in onderstaande tabel getoon.

TABEL 15.—VROULIKE NATURELLE VAN 10 JAAR EN OUER IN WINSGEWENDE BEROEPE.

* Met inbegrip van 8,240 wat aan die Switserse Sendingkerk behoort.

Omtrent die helfte van die persone wat in elk van die drie provinsies, nl. die Kaapprovinsie, Natal en Transvaal, opgeneem is, is as *heidene* opgegee; in die Oranje-Vrystaat was die verhouding van hierdie klas een-vierde. Daarna het die *Naturelle-Separatistiese-kerke* in die Unie as 'n geheel beskou, die grootste getal volgelinge gehad, nl. 16-51 persent of omtrent een-sesde, en was tweede in getalsterkte in Natal (18-93 persent) en Transvaal (18-22 persent). In die Kaapprovinsie en die Oranje-Vrystaat was daar meer *Metodiste* (onderskeidelik 18-32 en 21-18 persent) as *Separatiste*, terwyl die *Metodiste* in Transvaal en Natal derde gestaan het met onderskeidelik 7-86 en 7-16 persent. Die persentasie *Metodiste* vir die Unie as 'n geheel beskou, was 12-06 persent of ongeveer een-agste.

Slegs in die geval van drie ander godsdienstrigtings het die verhouding vir die hele Unie 3 persent oorskry, nl. die Anglikaanse Kerk waar die verhouding gestrek het van 4-85 persent in Natal tot 7-70 persent in die Kaapprovinsie en dit 6-18 persent vir die hele Unie was; die *Lutherse Kerk* wat 4-66 persent van die getal

Die getal vroulike naturelle in winsgewende beroepe maak in alle gebiede van 40 tot 50 persent van die totale bevolking van 10 jaar en ouer uit, behalwe in Durban (52-23), Pietermaritzburg (63-40) en Oos-Londen (65-27). In slegs drie gebiede is daar 'n betekenisvolle daling tot onder die 90 persent in die verhouding wat in huisdiens betrokke is, nl. in Pietermaritzburg (80-73), Durban (84-23) en Kaapstad (84-29).

Die verhouding van die vroulike persone in winsgewende beroepe wat getroud geskei of in wedustaat was, tot die ooreenstemmende gedeelte van die hele bevolking van die onderskeie gebiede, was as volg:—

Munisipaliteit.	Verhouding %	Munisipaliteit.	Verhouding %
Kaapstad.....	26-05	Pretoria.....	34-20
Port Elizabeth.....	31-12	Witwatersrand.....	42-12
Oos-Londen.....	59-23	Johannesburg.....	41-40
Kimberley.....	33-77	Ander Witwatersrand	
Pietermaritzburg.....	47-89	munisipaliteite.....	43-15
Durban.....	39-69	Bloemfontein.....	37-41

In die meeste van die gebiede het die verhouding huisbedienende wat getroud of in wedustaat of geskei was gevarieer van omtrent een-derde tot twee-vyftes van alle vroulike huisbedienende. Daar was 'n betekenisvolle oorwig in Oos-Londen (59-23) in vergelyking met alle ander gebiede, terwyl die verhouding in Kaapstad die kleinste (26-05) was.

9. Godsdien van Naturelle.—In onderstaande tabel verskyn 'n opsomming van die inligting betreffende die godsdienstrigtings onder die naturellebevolking.

DEEL III: ASIATEBEVOLKING, SENSUS, 1936.

10. Asiate in Provinsies.—Die provinsiale indeling van die 219,691 Asiate wat ten tye van die sensus in Mei 1936 in die Unie opgeneem is, was as volg:—

TABEL 17.—ASIATE IN PROVINSIES.

Provinsie.	Getal.			Persentasie.			Verhouding: M/V.
	Manlikes.	Vroulikes.	Persone.	Manlikes.	Vroulikes.	Persone.	
Kaaprovinsie.....	6,677	3,831	10,508	5-60	3-81	4-78	1-74
Natal.....	97,073	86,588	183,661	81-47	86-12	83-60	1-12
Transvaal.....	15,379	10,114	25,493	12-01	10-06	11-61	1-52
Oranje-Vrystaat.....	22	7	29	0-02	0-01	0-01	3-14
UNIE.....	119,151	100,540	219,691	100-00	100-00	100-00	1-19

Altesame 83-6 persent of ongeveer vyf-sesdes van die Asiatebevolking was in Natal, terwyl onderskeidelik 11-6 en 4-8 persent in die Kaaprovinsie en Transvaal was. In die hele Unie het die manlikes die vroulikes met byna een-vyftede in getal oorskry en in Transvaal en die Kaaprovinsie met onderskeidelik 52 en 74 persent.

11. Asiate in Distrikte.—Onderstaande is die vernaamste besonderhede wat betref die distriksgroepering van die Asiate in Natal.

Distrik.	Persentasie van	
	Getal Asiate.	Totale Bevolking.
Durban.....	88,695	33-8
Pinetown.....	8,205	9-76
Inanda.....	19,871	51-85
Laer-Tugela.....	18,953	33-26
Mtunzini.....	1,030	2-92
Laer-Umfolozi.....	1,179	4-07
Umzinto.....	12,576	12-70
Port Shepstone.....	3,571	5-82
Pietermaritzburg.....	11,425	12-50
Lionsrivier.....	1,578	7-37
Kliprivier.....	2,450	4-37
Newcastle.....	2,974	5-99
Dundee.....	3,248	6-98

In die distrik Durban alleen is daar 40-4 persent van die totale Asiatebevolking van die Unie, terwyl daar niks minder as 58-0 persent of byna drie-vyftede in Durban en in die twee distrikte onmiddellik ten noorde van Durban, nl. Inanda en Laer-Tugela was. Die persentasieverhoudings van Asiate tot die totale bevolking in hierdie distrikte is: Durban, 33-8; Inanda, 51-9; Laer-Tugela, 33-3. Langs die Suidkus is daar ook 'n groot aantal Asiate, vernaamlik in Umzinto en Port Shepstone, waar die verhoudings tot die totale bevolking onderskeidelik 12-7 en 5-8 persent is. Die ander distrikte waar Asiate 'n aanmerklike verhouding van die totale distriksbevolking uitmaak, is op of naby die hoofweg na Transvaal geleë.

Die benaming *Asiate* word in die Unie gewoonlik aan die begrip *Indiërs* gekoppel, maar by 'n beskouing van die huistale wat gepraat word, blyk dat Chinese 'n betekenisvolle groot verhouding van die Asiatebevolking in sekere gebiede uitmaak. So was die persentasie Asiate wat in die Port Elizabethse munisipaliteit Chinese praat, bv. 25-7 persent of ongeveer een-kwart, terwyl die verhoudings vir Johannesburg en Pretoria onderskeidelik 10-8 en 7-7 persent was. Port Elizabeth bevat die enigste skool in die Unie waar die voertaal Chinese is.

12. Asiate in Vernaamste Stedelike Gebiede.—Die getal Asiate in die vernaamste stedelike gebiede van die Unie is as volg:—

TABEL 18.—ASIATE IN VERNAAMSTE STEDELIKE GEBIEDE.

Munisipaliteit.	Manlikes.	Vroulikes.	Persone.	Verhouding: M/V.	Persentasie wat 21 jaar en ouer is.	
					Manlikes.	Vroulikes.
Kaapstad.....	2,608	1,132	3,740	2-30	66-64	45-05
Port Elizabeth.....	1,400	1,059	2,459	1-32	56-57	43-53
Oos-Londen.....	517	336	853	1-54	64-99	41-67
Kimberley.....	589	388	977	1-52	59-08	40-91
Pietermaritzburg.....	4,781	4,307	9,088	1-11	42-77	36-91
Durban.....	46,565	41,661	88,226	1-12	43-11	37-23
Pretoria.....	1,705	1,277	2,982	1-34	49-21	38-29
Witwatersrand.....	8,822	5,361	14,183	1-65	52-90	41-41
Johannesburg.....	6,393	3,716	10,109	1-72	53-23	42-60
Ander Witwatersrandse munisipaliteite.....	2,429	1,645	4,074	1-48	52-04	38-72

Die Asiatebevolking van Durban bestaan vir 99 persent uit Indiërs en maak 40 persent van die Asiatebevolking van die Unie en 33 persent van die totale bevolking van Durban uit. Bowendien is die Asiatebevolking baie langer in hierdie gebied gevestig as in enige ander gebied van die Unie, en hierdie feit mag 'n verklaring wees van die betreklik klein oorwig van manlike oor vroulike persone. In die ander vernaamste munisipaliteite, behalwe Pietermaritzburg, was daar aansienlik meer manlike as vroulike Asiate; in Johannesburg was die oorwig 72 persent en in Kaapstad was dit niks minder as 130 persent nie. Die betreklike stabiliteit van die Asiatebevolking van Durban en Pietermaritzburg word verder bewys deur die verhouding van volwassenes (persone van 21 jaar en ouer) tot jeugdige. In beide gebiede is die persentasie manlike persone 43 persent en vroulikes 37 persent. Hierdie syfers is baie laer as die ooreenstemmende persentasies vir die ander vernaamste munisipaliteite. Die verhouding volwassenes in Kaapstad verklaar die eienaardige geslagsverhouding waarna hierbo verwys is.

13. Leeftydsindeling van Asiate.—Alhoewel die kurwe van die leeftydsindeling van Asiate baie gelykmatiger is as dié vir naturelle, is daar 'n hoë mate van groepering by seker leeftye, veral by dié wat op 0 uitgaan*. Onderstaande tabel toon die vernaamste punte van belang wat leeftye betref. 'n Leeftydsgruppering van 10 jaar is gebesig, met leeftye wat op 0 uitgaan in die middel van die groepe, ten einde die gegewens, sover moontlik, eenvormiger te maak.

* U.G. 28, 1938 (bls. 157 et seq).

† Na verhouding by getalle in groepe ingedeel.

S/P beteken Stedelik/Plattelands.

M/V beteken Manlikes/Vroulikes.

in die Unie uitgemaak het, met egter skaars meer as 1 persent in die Kaaprovinsie en Oranje-Vrystaat, maar met niks minder as 8-34 persent in Transvaal nie; en die *Rooms-Katolieke Kerk* waarvan die verhouding 3-53 persent vir die hele Unie, 6-71 persent vir Natal, 6-08 persent vir die Oranje-Vrystaat, en ongeveer 2 persent vir die Kaaprovinsie en Transvaal was.

Die *Nederduitse Gereformeerde Kerk* het in die Oranje-Vrystaat die hoogste verhouding gehad (12-78) en daarop Transvaal het met 2-60 persent gevolg; in die Kaaprovinsie en Natal was daar minder as 1 persent elk.

Dit is van belang om op te merk dat 1,440 persone aanhangers van die Mohammedaanse geloof was, nl. o.a. 888 in Transvaal en 476 in Natal.

Feitlik elke godsdienstrigting en vorm van hiedendom is deur 'n paar volgelinge verteenwoordig. Hierby is *inter alia* inbegrepe 185 Christian Scientists, 117 Vrydenkers, 115 Ateïste, 24 Swedenborgiane en 5 Spiritiste.

Daar was in die stedelike gebiede byna tweemaal soveel Asiëte as in die plattelandse gebiede. Die verhouding van die persone wat in hierdie twee soorte gebiede woon, verskil met die leeftyd en toon 'n gestadige vermeerdering totdat die 40-jarige leeftyd bereik word. Na dié leeftyd was daar in die plattelandse gebiede betreklik meer

persone as in die stedelike gebiede. Hierdie feit skyn betrekking te hê op die geslagsverhouding by die leeftyd van 45 jaar en ouer, terwyl die getal manlike persone die getal vroulikes met 'n groter persentasie oorskry as by die laer leeftydsgroepe. Die indeling van die geslagte volgens leeftyd verskyn in diagram 3.

DIAGRAM 3.
LEEFYDSINDELING VAN ASIATE.

Die immigrasie van 'n groot aantal Indiërs, hoofsaaklik manlike persone, in die eerste dekade van hierdie eeu met die doel om by die

Natalse suiker- en teeplantasies in diens te tree, is grotendeels verantwoordelik vir hierdie toestand.

14. **Huwelikstaat van Asiëte.**—Die vernaamste kenmerke van die huwelikstaat van Asiëte by verskillende leeftye word in onderstaande tabel getoon. In diagram 4 word die inligting grafies voorgestel.

TABEL 20.—HUWELIKSTAAT VAN ASIATE.

Leeftydsgroep (Jare)	Persentasie van Elke Huwelikstaat.								Persentasie van Totaal.					
	Manlikes.				Vroulikes.				Manlikes.			Vroulikes.

TOTAAL	60.97	35.68	3.35	100.00	58.59	36.01	5.40	100.00	100.00	100.00	100.00	100.00	100.00	100.00

* Slegs 1 geval.

Die verhouding getroude manlike Asiëte neem toe totdat 'n maksimum van 90 persent op die leeftyd van ongeveer 40 jaar getroud is, terwyl die orige een-tiende gelykop ingedeel is tussen „nooit getroud” en „in wedustaat en geskei”. Na dié leeftyd neem die verhouding getroude manlike persone af, terwyl die verhouding geskeies en persone in wedustaat toeneem, totdat

die verhoudings van die twee klasse met 46 persent gelykstaan op 'n leeftyd van ongeveer 90 jaar. Op hierdie leeftyd was omtrent 8 persent nooit getroud nie. In die geval van manlike Asiëte, soos ook in die geval van naturelle, is die verhouding wat nooit getroud was nie, by die gevorderde leeftye hoër as by die middelbare leeftyd.

DIAGRAM 4.
HUWELIKSTAAT VAN ASIATE.

Die verhouding getroude vroulike Asiate bereik 'n maksimum van omtrent 90 persent op 30-jarige leeftyd en neem dan baie vinniger af as in die geval van die manlikes. Die verhouding geskies en persone in wedustaat toon 'n ooreenstemmende vermeerdering en op 'n leeftyd van omtrent 60 jaar is dit gelyk aan die persentasie getroudes. Op hierdie leeftyd was minder as 2 persent van die vroulike persone nooit getroud nie, sodat die helfte van die vroulike bevolking van hierdie leeftyd as getroude persone beskou kan word

en die ander helfte as geskeie persone of persone in wedustaat. Die verhouding getroude vroulike persone daal baie vinniger met toenemende leeftyd as die verhouding manlikes en in hierdie opsig toon die huwelikstaat van Asiate ooreenkoms met die huwelikstaat van naturelle.

Die vernaamste kenmerke met betrekking tot die huwelikstaat van Asiate van 21 jaar en ouer in die vernaamste stedelike gebiede van die Unie word in onderstaande tabel getoon.

TABEL 21.—HUWELIKSTAAT VAN ASIATE VAN 21 JAAR EN OUER IN VERNAAMSTE STEDELIKE GEBIEDE.

Munisipaliteit.	Manlikes.				Vroulikes.			
	Nooit Getroud.	Getroud.	In Wedustaat en Geskel.	Totaal.	Nooit Getroud.	Getroud.	In Wedustaat en Geskel.	Totaal.
Kaapstad.....	12.48	82.43	5.09	100.00	10.90	83.33	5.77	100.00
Port Elizabeth.....	22.34	72.60	5.06	100.00	12.61	75.90	11.49	100.00
Durban.....	17.05	75.87	7.08	100.00	5.39	78.08	16.53	100.00
Pietermaritzburg.....	20.34	72.68	6.98	100.00	7.68	77.96	14.36	100.00
Pretoria.....	15.72	77.96	6.32	100.00	5.75	82.74	11.51	100.00
Witwatersrand.....	12.01	82.75	5.24	100.00	5.37	85.84	8.79	100.00
Johannesburg.....	12.94	81.75	5.31	100.00	5.43	85.27	9.30	100.00

In beide Kaapstad en Johannesburg is die verhouding manlike Asiate wat nooit getroud was nie, aanmerklik laer as in enige van die ander gebiede. In eersgenoemde gebied was die verhouding vroulike Asiate wat nooit getroud was nie (10.90), egter tweemaal so groot as die ooreenstemmende verhouding in Johannesburg (5.43). Die verklaring van hierdie toestand berus waarskynlik by die verskil tussen die verhoudings manlike en vroulike persone van 21 jaar en ouer in dié gebiede. In Port Elizabeth is die verhouding Asiate wat nooit getroud was nie, sowel onder die manlikes (22.34) as

die vroulikes (12.61) die hoogste in die Unie. Hierdie feit mag saamhang met die een of ander demografiese karaktertrek van die Chinese wat, soos alreeds aangedui is, niks minder as 'n kwart van die Asiatebevolking van Port Elizabeth uitmaak nie.

15. Kennis van Offisiële Tale.—Die verhoudingsindeling van Asiate volgens hul kennis van die offisiële tale van die Unie word in onderstaande tabel getoon.

TABEL 22.—ASIATE: LEEFTYD EN KENNIS VAN OFFISIËLE TALE.

Offisiële Tale.	Leeftydsgroep (Jare).								Totaal.

Engels.....	48.27	55.08	51.58	28.31	29.61	27.64	38.55	43.45	40.72
Afrikaans.....	1.58	1.05	1.33	2.14	2.13	2.13	1.85	1.49	1.69
Geen van beide.....	40.57	27.60	34.37	62.44	63.32	62.79	51.27	42.20	47.26
TOTAAL.....	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Engels is die taal wat in hoofsaak deur die blanke bevolking van Natal gebesig word en dit word byna uitsluitend gebesig in die kusstreekte waar die grootste gedeelte van die Asiatebevolking saamgetrek is. Asiate kom in die ekonomiese lewe amper daaglik in aanraking met blankes en dit is derhalwe nie verbasend nie dat die verhouding Asiate wat Engels kan praat baie groter is as dié wat in staat is om Afrikaans te praat. Verder behoort die verhouding Asiate wat 'n kennis van een of beide van die offisiële tale besit, by die manlike persone hoër as by die vroulikes te wees.

Die persentasie manlike persone wat 'n kennis van Engels alleen het, is 51 in teenstelling met 1.3 persent wat net 'n kennis van Afrikaans besit. Die verhouding wat 'n kennis van eersgenoemde besit, neem toe met die ouderdom, en gevolglik met 'n mate van opvoeding, tot op 'n leeftyd van 24 jaar wanneer 'n maksimum van ongeveer twee-derdes van die manlike Asiatebevolking 'n kennis van Engels besit. Die verhouding verminder met toenemende ouderdom tot by 23 persent vir persone van 65 jaar en ouer. By 'n verklaring van hierdie vermindering moet die verhuising van Asiate na die Unie in gedagte gehou word. Dit is onwaarskynlik dat volwasse Asiate wat omtrent 35 jaar gelede na die Unie gekom het, enigszins 'n kennis van Engels opgedoen het.

Besonderdehede betreffende die kennis van die offisiële tale onder Asiate van beide geslagte en op alle leeftye in die vernaamste stedelike gebiede van die Unie is as volg:—

TABEL 23.—ASIATE IN VERNAAMSTE STEDELIKE GEBIEDE: KENNIS VAN OFFISIËLE TALE.

Munisipaliteit.	Afrikaans en Engels.	Net Engels.	Net Afrikaans.	Geen van beide.	Totaal.
Kaapstad.....	65.98	13.32	9.95	5.75	100.00
Port Elizabeth.....	56.72	38.56	0.87	3.75	100.00
Durban.....	1.65	52.63	0.08	45.64	100.00
Pietermaritzburg.....	2.31	70.85	0.10	26.74	100.00
Pretoria.....	64.89	13.65	10.64	11.32	100.00
Witwatersrand.....	52.86	28.16	4.16	14.82	100.00
Johannesburg.....	48.27	32.80	4.22	14.71	100.00

Die Asiate-element maak 'n aansienlike gedeelte van die totale bevolking van Durban en Pietermaritzburg uit en die kennis van een of beide die offisiële tale is daar nie so 'n dringende noodsaaklikheid nie. Hierdie feit verklaar die groot verhoudings Asiate in hierdie gebiede wat heeltemaal geen kennis van die offisiële tale besit nie. Om hierdie rede is daar ook in Pietermaritzburg 'n betekenisvol groter verhouding persone met 'n kennis van die offisiële tale. Dit is nie so dig bevolk deur Asiate as wat Durban is nie. Ongeveer twee-derdes van die Asiate in Kaapstad en Pretoria besit 'n kennis

van die offisiële tale, terwyl die verhouding in Johannesburg omtrent een-helfte is. Die verhoudings wat slegs 'n kennis van Afrikaans besit is in Kaapstad en Pretoria die hoogste en ook gelyk, terwyl dié twee stede een-tiende van die hele Asiatebevolking bevat.

16. Huistale van Asiate.—Onderstaande tabel toon die indeling van die Asiatebevolking in die vernaamste stedelike gebiede volgens die huistale wat gebesig word.

TABEL 24.—HUISTALE VAN ASIATE IN VERNAAMSTE STEDELIKE GEBIEDE.

Taal of Dialek.	Kaapstad.	Port Elizabeth.	Durban.	Pietermaritzburg.	Pretoria.	Johannesburg.	Witwatersrand.
Tamil.....	7.47	37.09	40.52	47.53	29.25	19.29	22.72
Hindustani.....	13.39	5.45	28.41	27.03	9.26	7.70	9.94
Telugi.....	0.27	0.63	14.58	8.12	—	0.63	0.86
Gujarati.....	17.85	15.07	6.42	7.99	39.58	47.30	44.67
Urdu.....	28.76	2.25	8.11	7.25	5.52	6.02	5.39
Ander Indiese Tale.....	5.48	2.00	0.94	1.21	5.69	2.14	1.76
Totaal, Indiese Tale.....	73.22	62.49	98.98	99.13	89.30	83.08	85.31
Chinees.....	2.18	25.69	0.07	0.04	7.71	10.79	8.92
Blanke Tale.....	21.76	11.82	0.78	0.74	2.99	5.72	5.45
Ander Tale.....	2.84	—	0.17	0.09	—	0.41	0.29
TOTAAL.....	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Ongeveer een-vyfde van die Asiatebevolking van Kaapstad en ongeveer een-agste van dié van Port Elizabeth praat tuis die een of ander blanke taal, hoofsaaklik Engels of Afrikaans. Chinees word deur niks minder as een-kwart van die bevolking van Port Elizabeth gebesig nie en deur onderskeidelik 10.8 en 7.7 persent van die bevolkings van Johannesburg en Pretoria.

Indiese dialekte word in Durban en Pietermaritzburg deur 99 persent van die Asiatebevolking gebesig, deur nege-tiendes in Pretoria, vyf-sesdes in Johannesburg, drie-kwart in Kaapstad en vyf-agstes in Port Elizabeth. Daar is betekenisvolle verskille tussen die verhoudings van die verskillende dialekte wat in die onderskeie munisipaliteite gebesig word. In Durban en Pietermaritzburg was Tamil, Hindustani en Telugu die vernaamste dialekte en hulle staan in dié volgorde. In Port Elizabeth staan Tamil ook eerste (37.1) en Gujarati tweede (15.1). In beide Johannesburg en Pretoria neem Gujarati die eerste plek in, met Tamil tweede. In Kaapstad staan Urdu weer eerste (28.8), met Gujarati tweede (17.9) en Hindustani derde (13.4). Hierdie verskille is ongetwyfeld te wyte aan rassefaktore, sowel as aan sosiale en ekonomiese faktore wat kenmerkend is van die Indië-gemeenskappe in die onderskeie gebiede.

DEEL IV: KLEURLINGBEVOLKING, SENSUS, 1936.

17. **Kleurlinge in Provinsies.**—Die provinsiale indeling van die kleurlingbevolking van die Unie soos dit in Mei 1936 by die sensus opgeneem is, word in onderstaande tabel getoon.

TABEL 25.—KLEURLINGE IN PROVINSIES.

Provinsie.	Geslag.			Persentasie van Unie.	Persentasie van Provinsie.	
	Manlikes.	Vroulikes.	Persone.		Stedelik.	Plattelands.
Kaapprovinsie	343,011	339,237	682,248	88.64	52.23	47.77
Natal	9,390	9,239	18,629	2.42	67.06	32.94
Transvaal	25,713	25,128	50,841	6.61	73.94	26.06
Oranje-Vrystaat	9,317	8,626	17,943	2.33	47.12	52.88
UNIE	387,431	382,230	769,661	100.00	53.91	46.09

Altesame 88.6 persent of omtrent sewe-agstes van die totaal van 769,661 kleurlinge was in die Kaapprovinsie en 6.6 persent in Transvaal, terwyl die orige 4.8 persent byna gelyk- op ingedeel was tussen die Oranje-Vrystaat en Natal. Die getal manlike kleurlinge het die getal vroulikes met 14 per 1,000 te bowe gegaan. Die manlike oorwig was omtrent 2 persent of minder in elke provinsie, behalwe in die Oranje-Vrystaat waar daar 108 manlikes vir 100 vroulikes was. Die indeling van die bevolking tussen stedelike en plattelandse gebiede was omtrent gelyk-op in die Kaapprovinsie en die Oranje-Vrystaat, maar in Transvaal en Natal was onderseidelik drie-kwart en twee-derdes in die stedelike gebiede.

18. **Kleurlinge in Distrikte.**—Onderstaande lys toon die distrikte van die Kaapprovinsie waar die totale kleurlingbevolking meer as 5,000 getal het. Watter persentasies van die bevolking hierdie element uitgemaak het, word ook getoon.

TABEL 26.—KLEURLINGE IN DISTRIKTE VAN DIE KAAPPROVINSIE.

Distrik.	Kleurlinge.	Persentasie van Totale Bevolking.	Distrik.	Kleurlinge.	Persentasie van Totale Bevolking.
Kaap	80,027	43.13	Van Rhynsdorp	7,530	48.30
Wynberg	69,906	43.70	Calvinia	9,536	55.47
Simonstad	5,542	35.14	Gordonia	21,034	52.39
Bellville	21,534	50.73	Kenhardt	5,379	53.98
Stellenbosch	14,113	59.29	Namakwaland	17,234	66.68
Somerset-Wes	7,336	46.04	Beaufort-Wes	7,963	51.68
Caledon	14,520	48.97	Graaff-Reinet	8,303	38.06
Bredasdorp	6,079	46.49	Kimberley	11,617	20.19
Paarl	20,153	59.31	Swellendam	10,473	48.94
Wellington	7,997	63.29	Ladismith	4,980	48.63
Tulbagh	6,389	65.58	Riversdal	7,294	41.18
Ceres	7,098	63.34	Mosselbaai	7,898	49.57
Worcester	18,533	57.52	George	12,217	45.61
Robertson	7,486	52.46	Knysna	8,139	49.61
Malmesbury	16,956	60.95	Oudtshoorn	16,923	55.87
Hopetfield	6,929	50.24	Uniondale	6,806	48.05
Piketberg	10,370	44.63	Humansdorp	8,834	34.24
Clanwilliam	7,765	52.67	Uitenhage	8,499	17.67
			Port Elizabeth	30,091	24.06

Hierdie lys toon dat die kleurlingbevolking die digste is in die distrikte langs die Atlantiese seekus, in die Kaapse skiereiland en in die suidwestelike en suidelike distrikte tot by Port Elizabeth. Daar was in die vier distrikte van die Kaapse skiereiland, naamlik die Kaap, Wynberg, Simonstad en Bellville, niks minder as 25.1 persent of een-kwart van die totale kleurlingbevolking van die Kaapprovinsie nie. Die feit dat die bevolking van hierdie distrikte byna uitsluitend in die stedelike gebiede saamgetrek is, beteken dat 48 persent of byna die helfte van die totale stedelike kleurlingbevolking van die Kaapprovinsie in hierdie vier distrikte is.

Die kleurlingbevolking van die Transkei was vir die grootste gedeelte in Xalanga (786) en in die distrikte naby die Natalse grens, naamlik Matatiele (871), Mount Currie (2,727), Umzimkulu (1,027), Port St. John's (583) en Lusikisiki (1,166).

Dit sou redelik wees om aan te neem dat die distrikte van Natal wat naaste aan die grens van die Kaapprovinsie geleë is, die digste kleurlingbevolking sou hê. Dit is dan ook die geval. Die syfers is as volg: Port Shepstone, 497; Umzinto, 707; Ixopo, 909; en Alfred, 710. Die kleurlingbevolking van Durban was 7,669 en dié van Pietermaritzburg 2,550, of in elke geval omtrent 3 persent van die totale bevolking van die onderskeie distrikte.

In die Oranje-Vrystaat was die kleurlingbevolking die digste in die distrikte wat in die suide aan die Kaapprovinsie grens, nl. Jacobsdal, Fauresmith, Philippolis, Trompsburg, Edenburg en Bethulie. In elkeen van hierdie distrikte het die kleurlingbevolking omtrent een-tiende van die totale bevolking uitgemaak. Die getal kleurlinge in die distrik Bloemfontein was 3,643 of 4.4 persent van die totale bevolking.

Die betreklike digtheid van die kleurling bevolking in Transvaal was die grootste in die suidwestelike distrikte, nl. Christiana (2.81 persent), Bloemhof (3.85 persent), Schweizer-Reneke (2.26 persent), Klerksdorp (2.55 persent) en Potchefstroom (3.61 persent). Daar was 32,363 of 63.7 persent van die totale kleurlingbevolking van Transvaal in die distrikte van die Witwatersrand, en in die distrik Johannesburg alleen was daar 46.7 persent of byna die helfte.

19. **Kleurlinge in Vernaamste Stedelike Gebiede.**—Onderstaande tabel toon die aantal kleurlinge in die vernaamste stedelike gebiede (voorstede inbegrepe) van die Unie.

TABEL 27.—KLEURLINGE IN VERNAAMSTE STEDELIKE GEBIEDE.

Munisipaliteit.	Manlikes.	Vroulikes.	Persone.	Verhouding M/V.	Persentasie wat 21 jaar en ouer is.	
					Manlikes.	Vroulikes.
Kaapstad	72,267	80,644	152,911	0.90	46.27	49.29
Port Elizabeth	12,333	13,298	25,631	0.93	50.34	50.14
Oos-Londen	2,009	2,002	4,011	1.00	52.46	52.30
Kimberley	4,143	4,871	9,014	0.85	43.91	47.59
Pietermaritzburg	1,129	1,205	2,334	0.94	49.60	48.71
Durban	3,762	3,887	7,649	0.97	48.14	48.86
Pretoria	1,592	1,800	3,392	0.88	51.26	48.28
Witwatersrand	14,787	16,271	30,058	0.97	51.72	52.71
Johannesburg	10,765	11,717	22,482	0.92	50.29	53.64
Ander Witwatersrandse munisipaliteite	4,022	3,554	7,576	1.13	55.54	49.63
Bloemfontein	1,490	1,402	2,892	1.06	55.17	54.49

Die kleurlingbevolking van Kaapstad, met inbegrip van Wynberg, was 152,911 of 36.9 persent van die hele stedelike kleurlingbevolking van die Unie en ongeveer 43 persent van die totale bevolking van Kaapstad. Port Elizabeth, met 25,631, het tweede gestaan en Johannesburg derde met 22,482. Daar was net in twee ander belangrike stedelike gebiede meer as 5,000 kleurlinge, nl. in Kimberley (9,014) en Durban (7,649).

Die bevolking wat 21 jaar en ouer was, was in alle gebiede byna gelyk aan die getal onder dié leeftyd. Die bevolking van Kimberley was betreklik „jonk” in dié sin dat daar ’n betekenisvolle oorwig van persone van beide geslagte onder die 21 jaar was, in vergelyking met dié oor daardie leeftyd. Op dieselfde manier was die bevolking van Bloemfontein en Oos-Londen „oud”.

Daar was in elke gebied minder manlike as vroulike kleurlinge, behalwe in Bloemfontein en Oos-Londen en op die Witwatersrand buitekant Johannesburg. In laasgenoemde groep munisipaliteite was daar niks minder as 113 manlike persone vir 100 vroulikes nie. In Kimberley, aan die ander kant, was die geslagsverhouding

slegs 0.85 en in Pretoria was dit 0.88. Dit ly min twyfel dat ’n hoe geslagsverhouding met ’n groot verhouding persone van 21 jaar en ouer saamaan.

20. **Rasse-afkoms van Kleurlinge.**—Die rasse-elemente van die kleurlingbevolking van die Unie was as volg:—

TABEL 28.—RASSE-ELEMENTE VAN KLEURLINGBEVOLKING.

Ras.	Persone.		Persentasie van Unie.		Persentasie van Provinsie.			
	Getal.	%	Stedelik.	Plattelands.	Kaapland.	Natal.	Transvaal.	O.V.S.
Kaapse Maleier	34,078	4.43	7.88	0.41	4.55	2.34	4.75	1.34
Kaapse Kleurling	578,267	75.21	80.75	68.74	76.83	55.27	72.06	43.01
Boesman	6,513	0.85	0.23	1.57	0.59	0.32	3.01	4.85
Griekwa	31,586	4.11	2.95	5.46	3.32	4.82	7.22	24.66
Hottentot	36,474	4.73	4.22	13.47	12.00	1.06	4.39	12.49
Koranna	4,787	0.62	0.32	0.97	0.40	0.05	1.47	7.29
Namakwa	3,410	0.44	0.17	0.76	0.49	0.01	0.06	0.10
St. Helena	3,804	0.50	0.83	0.10	0.26	8.36	0.88	0.29
Swahili (Zanzibar)	795	0.10	0.14	0.06	0.05	1.15	0.46	0.14
Ander Rasse	19,119	2.49	2.51	2.46	1.51	26.62	5.75	5.83
TOTAAL	768,833	100.00	100.00	100.00	100.00	100.00	100.00	100.00

Bostaande moet as ’n baie benaderde klassifikasie beskou word. Die „kleurlingbevolking” van die Unie is baie gemengd en min van die Hottentotte en Boesmans is byvoorbeeld van suiwer afkoms. In Natal is daar ’n groot mate van vermenging Indiër- en Bantoebloed, terwyl daar in die Kaapprovinsie ’n sekere mate van blanke met Hottentot- en Maleise bloed vermeng is. In Boekdeel I van die sensusverslag verskyn ’n tabel wat aantoon hoeveel persone van suiwer rasse-afkoms huwelike aangegaan het waaruit kinders van gemengde kleurlingafkoms voortgebring sal word. Die tabel dek ’n periode van twaalf jaar van 1925 tot 1936 en bevat die getal werklike huwelike wat of burgelik of kerklik voltrek is, met uitsondering van gevalle van gebruiklike samewoning of huwelike volgens natuuregebruike. Boonop is daar ’n onbekende mate van rassevermenging weens geslagsgemeenskap waardeur kinders van gemengde bloed voortgebring word. Deur die rondtrek van die bevolking het die groep wat Kaapse kleurlinge genoem word, alhoewel dit grotendeels van Maleise en Hottentotse afkoms met ’n bymengsel van blanke bloed is, tans ook ’n taamlike verhouding Bantoebloed en bloed van ander rasse. In die verslag van die Kommissie van Onderzoek in sake die Kaapse Kleurlingbevolking van die Unie (U.G. 54, 1937) word rassevermenging meer in besonderhede behandel.

Die Kaapse kleurlinge het drie-kwart van die totale kleurlingbevolking van die Unie uitgemaak en slegs drie ander rasse-elemente het meer as een persent uitgemaak, nl. Hottentotte (11.25), Kaapse Maleiers (4.43) en Griekwas (4.11). Die getal Boesmans of persone van Boesman-afkoms was 6,513 of 0.85 persent van die totale kleurlingbevolking.

Die Kaapse kleurlinge het 80.75 persent of vier-vyftes van alle kleurlinge in die stedelike gebiede uitgemaak; die Kaapse Maleiers 7.88 persent; en die Hottentotte slegs 4.22 persent. In die plattelandse gebiede was 68.74 persent Kaapse kleurlinge en slegs 0.41 persent Kaapse Maleiers. Persone van laasgenoemde klas is byna uitsluitend in Kaapstad en die onmiddellike omgewing daarvan saamgetrek. Die inboorlingrasse-elemente is, soos ver wag kan word, in die plattelandse gebiede baie groter in getalsterkte as in die stedelike gebiede. So het die Hottentotte bv. 19.47 persent of byna een-vyftde uitgemaak. Die Boesmans het 1.57 en Griekwas (Mulatte) 5.46 persent aan die plattelandse kleurlingbevolking uitgemaak. Die indeling van persone van hierdie klas tussen stedelike en plattelandse gebiede was nader aan gelyk-op as in die geval van die inboorlingrasse.

Die verhoudingsindeling van die kleurlingrasse in die Kaapprovinsie stem sterk ooreen met dié vir die hele Unie. Dit is nie verbasend nie, aangesien 88.6 persent van die kleurlingbevolking in die Kaapprovinsie opgeneem is. In Natal was egter slegs 55.3 persent Kaapse kleurlinge, terwyl 8.4 persent van St. Helena

afkomstig was. Laasgenoemde is waarskynlik persone wat van St. Helena af gebring is om in die suikerplantasies te werk, sowel as hul afstammelinge. Iets meer as een-kwart is onder Ander Rasse geklassifiseer en hulle bestaan waarskynlik vir die grootste gedeelte uit persone wat gedeeltelik Asiate is.

Die Kaapse kleurlinge het soveel as 72.1 persent van die kleurlingbevolking van Transvaal uitgemaak, terwyl 7.22 persent Griekwas, 4.75 persent Kaapse Maleiers, 4.39 persent Hottentotte en 3.01 persent Boesmans was. ’n Interessante eienaardigheid in verband met die Boesmanbevolking is dat 1,527 of 23.4 persent van die totaal van 6,513 in Transvaal was.

Slegs 43.0 persent van die kleurlingbevolking van die Oranje-Vrystaat was Kaapse kleurlinge, terwyl die Griekwas niks minder as 24.66 persent of omtrent een-kwart uitgemaak het nie. Na verhouding was die getal inboorling-kleurlingrasse aansienlik groter in die Oranje-Vrystaat as in die ander provinsies. Die syfers is: Hottentotte, 12.49 persent; Korannas, 7.29 persent; en Boesmans, 4.85 persent.

Daar is geen statistiese inligting beskikbaar in sake die geografiese indeling van die verskillende rasse-elemente van die kleurlingbevolking nie. Dit is bekend dat die Kaapse Maleiers in die Kaapse skiereiland waar die ras ontstaan het, absoluut en betreklik die meeste is. Die inboorlingrasse, nl. Boesmans, Hottentotte, Korannas en Namakwas, is waarskynlik na verhouding groter in getalsterkte in die noordelike en noordwestelike distrikte van die Kaapprovinsie. Die huistale wat gebesig word, werp ’n bietjie lig op hierdie vraagstuk. Van die 420 kleurlinge in Walvisbaai het 232 of 55 persent Hottentot- of Boesmantal gepraat. Ander distrikte waar hierdie tale of dialekte in ’n mate gepraat is, was: Gordonia, 7.6; Namakwaland, 4.0; Kenhardt, 4.9; Hay, 5.3; Kuruman, 6.6; Vryburg, 4.9 persent.

Die groot getal persone wat in Transvaal as van Boesman-afkoms opgegee is (1,527), is digste saamgetrek in die distrikte van Suidwes-Transvaal waartoe hulle waarskynlik deurgedring het uit die noordelike distrikte van die Kaapprovinsie. Van hierdie getal van 1,527 het egter slegs 96 die Boesmantal of Hottentots as hul huistal of moedertaal gebesig.

Die aandag is reeds gevestig op die aansienlike getal kleurlinge in sekere Oos-Griekwalandse distrikte, nl. Matatiele, Mount Currie en Umzimkulu, en in die distrikte net oorkant die Natalgrens, nl. Ixopo, Alfred en Port Shepstone. Daar is waarskynlik ’n groot verhouding Griekwas onder die kleurlinge in hierdie gebiede. Op dieselfde manier behoort daar ook baie Griekwas te wees in die Kaaplandse distrikte Kimberley, Barkly-wes en Herbert, sowel as in sekere distrikte van die Oranje-Vrystaat, veral Boshof, Jacobsdal en Fauresmith.

21. **Leeftydsindeling van Kleurlinge.**—Die leeftydsindeling van die kleurlingbevolking word in onderstaande tabel getoon. Soos in die geval van naturelle en Asiate is die enkele leeftyds-groep

saamgevat in groepe van tien jaar, met die leeftye wat op 0 uitgaan in die middel van die groepe ten einde die gegewens eenvormiger te maak.

TABEL 29.—LEEFTYDSINDELING VAN KLEURLINGBEVOLKING.

Leeftyds-groep (Jare).	Manlikes.		Vroulikes.		Persone.		Verhouding :	
	Getal.	%	Getal.	%	Getal.	%	S/P.	M/V.
0-4	61,313	15.85	61,860	16.20	123,173	16.02	1.03	0.99
5-14	101,605	26.25	99,884	26.16	201,489	26.20	1.10	1.02
15-24	70,425	18.20	75,176	19.69	145,604	18.94	1.30	0.94
25-34	54,675	14.13	54,288	14.22	108,963	14.18	1.35	1.01
35-44	38,704	10.00	36,341	9.52	75,045	9.76	1.23	1.07
45-54	28,758	7.43	25,630	6.71	54,388	7.08	1.13	1.12
55-64	16,796	4.34	14,965	3.84	31,461	4.09	1.10	1.15
65-74	10,171	2.63	9,611	2.52	19,782	2.57	1.09	1.06
75-84	3,540	0.91	3,320	0.87	6,860	0.89	1.10	1.07
85-94	805	0.21	837	0.22	1,642	0.22	1.11	0.96
95-99	112	0.03	119	0.03	231	0.03	0.88	0.94
100+	79	0.02	88	0.02	167	0.02	0.56	0.90
TOTAAL*	386,991	100.00	381,819	100.00	768,810	100.00	1.17	1.01

* Sonder inbegrip van ongespesifiseerdes : Manlikes, 440 ; Vroulikes, 411.

Daar blyk na verhouding min verskil tussen die leeftydsindelings van manlike en vroulike persone te wees, behalwe dat daar betreklik min vroulike persone in die laer leeftyds-groep tot by omtrent 30 jaar en betreklik meer manlike persone in die hoër leeftyds-groep is.

Daar was ongeveer 117 persone in die stedelike gebiede vir elke 100 in die plattelandse gebiede. Dit is egter van belang om op te merk dat daar in die stedelike gebiede, in vergelyking met die plattelandse gebiede, 'n betekenisvolle oorwig van persone van 15 tot omtrent 50 jaar was en dat die oorwig in die totale getal persone in die stedelike bo die plattelandse gebiede aan hierdie leeftyds-groep toegeskryf kan word.

Die geslagsverhouding by alle leeftye was 1.01. In die leeftyds-groep van ongeveer 40 tot 80 jaar was daar aanmerklik meer manlike as vroulike persone.

22. **Huwelikstaat van Kleurlinge.**—Die huwelikstaat van die hele kleurlingbevolking in verskillende leeftyds-groep word in onderstaande tabel getoon.

In vergelyking met die verhoudingsindeling van die blanke en Asiatebevolking is daar aansienlike verskille. In die geval van beide manlike en vroulike persone op alle leeftye is tien persent minder kleurlinge getroud en tien persent meer ongetroud as in die geval van blankes, terwyl die verhoudings wat in wedustaats verkeer het, in beide gevalle dieselfde was. Die leefwyse van die kleurlingbevolking in die suidwestelike Kaap-provinsie mag in 'n sekere mate hierop betrekking hê. Verskeie magistrats het melding gemaak van die talryke gevalle van samewoning onder Kaapse kleurlinge, terwyl baie van hulle hul nie daarvoor bekommer om 'n wetlike verbintenis aan te gaan nie.

TABEL 30.—HUWELIKSTAAT VAN KLEURLINGE.

Leeftyds-groep (Jare).	Manlikes.				Vroulikes.			
	Nooit Getroud.	Getroud.	In Wedustaats en Geskei.	Totaal.	Nooit Getroud.	Getroud.	In Wedustaats en Geskei.	Totaal.
0-14	100.00	*	—	100.00	99.99	0.01	—	100.00
5-19	99.20	0.77	0.03	100.00	98.43	0.58	0.19	100.00
20-29	64.21	34.93	0.86	100.00	45.12	53.01	1.87	100.00
30-39	25.00	71.92	3.08	100.00	16.10	77.95	5.95	100.00
40-49	14.71	79.28	6.01	100.00	9.38	77.35	13.27	100.00
50-59	11.56	78.20	10.24	100.00	7.39	68.86	23.75	100.00
60-69	11.03	71.05	17.92	100.00	6.79	52.80	40.41	100.00
70-79	9.55	62.24	28.21	100.00	6.59	35.04	58.37	100.00
80-89	9.96	47.03	43.01	100.00	7.30	22.44	70.26	100.00
90+	15.46	40.05	44.49	100.00	5.55	13.78	80.67	100.00
TOTAAL	67.65	29.39	2.96	100.00	63.01	31.03	5.96	100.00

* Onbeduidend gering ; slegs 1 geval.

Ten tye van die sensus in Mei 1936 was ongeveer twee-derdes (67.65 persent) van die manlike kleurlingbevolking nog nooit getroud nie, 29.4 persent was getroud en 3.0 persent was in wedustaats of geskei. Die verhouding getroude persone styg met die ouderdom totdat 80 persent by omtrent 50 jaar getroud is. Op hierdie leeftyd was 13 persent nooit getroud gewees nie en 7 persent was in wedustaats of geksei. Bo die leeftyd van 50 jaar neem die verhouding getroude manlike persone af en die verhouding geskeie persone en persone in wedustaats toon 'n ooreenstemmende vermeerdering totdat die verhoudings tussen die leeftye 85 en 90 jaar ongeveer gelyk is met 44 persent elk. Op hierdie leeftyd was ongeveer 12 persent of een-agste nooit getroud nie.

Die verhouding vroulike kleurlinge wat ten tye van die sensus nooit getroud was nie, was 63 persent, in teenstelling met 31 persent wat getroud en 6 persent wat geskei of in wedustaats was. Die verhouding getroude vroulike persone is op die leeftyd van 40 jaar die hoogste en maak daar 80 persent uit. Bo dié leeftyd neem die verhouding baie vinniger af as in die geval van die manlike persone, totdat die verhoudings van getroudes en van geskeie persone en persone in wedustaats op omtrent 68 jaar gelyk is met 46 persent elk. Dit is van belang om op te merk dat die persentasie vroulike persone in die leeftyds-groep 80-89 jaar wat in wedustaats en geskei is, naamlik 70.3 persent, aansienlik laer is as die ooreenstemmende persentasies in die geval van naturelle (81.1 persent) en Asiate (79.3 persent).

'n Grafiese oorsstelling van die syfers wat hier bespreek is, word in onderstaande diagram gegee.

DIAGRAM 5.
HUWELIKSTAAT VAN KLEURLINGE.

Die huwelikstaat van kleurlinge van 21 jaar en ouer word in onderstaande tabel vir die vernamste stedelike gebiede van die Unie getoon.

TABEL 31.—HUWELIKSTAAT VAN KLEURLINGE VAN 21 JAAR EN OUER IN VERNAAMSTE STEDELIKE GEBIEDE.

Munisipaliteit.	Manlikes.				Vroulikes.			
	Nooit Getroud.	Getroud.	In Wedustaats en Geskei.	Totaal.	Nooit Getroud.	Getroud.	In Wedustaats en Geskei.	Totaal.
Kaapstad	27.05	67.87	5.98	100.00	28.04	59.23	14.73	100.00
Port Elizabeth	32.23	62.42	5.35	100.00	22.27	60.50	14.17	100.00
Oos-Londen	34.89	59.11	6.00	100.00	27.93	58.48	13.59	100.00
Kimberley	27.18	67.05	5.74	100.00	22.74	62.46	14.80	100.00
Pietermaritzburg	32.55	61.30	6.15	100.00	22.47	62.78	14.75	100.00
Durban	35.67	58.92	5.41	100.00	24.13	59.64	16.23	100.00
Pretoria	38.72	56.14	5.14	100.00	23.97	62.33	13.70	100.00
Witwatersrand	32.42	62.11	5.47	100.00	19.71	63.20	17.09	100.00
Johannesburg	29.77	64.53	5.70	100.00	20.58	61.80	17.62	100.00
Ander Witwatersrandse Munisipaliteite.	37.98	57.04	4.98	100.00	17.13	67.32	15.55	100.00
Bloemfontein	36.88	57.39	6.23	100.00	25.30	58.54	16.16	100.00

By 'n vergelyking van hierdie syfers met die ooreenstemmende besonderhede in sake naturelle en Asiate blyk daar sterk ooreenkomst met naturelle, maar in die geval van Asiate is die verhoudings

getroude manlike persone, sowel as vroulikes, in elke munisipaliteit aansienlik groter as in die geval van naturelle of kleurlinge.

23. Kennis van Offisiële Tale.—Die verhoudingsindeling volgens provinsies van die kleurlingbevolking volgens hul kennis van die offisiële tale van die Unie is as volg:—

TABEL 32.—KLEURLINGE: KENNIS VAN OFFISIËLE TALE.

Provinsie.	Afrikaans en Engels.	Net Engels.	Net Afrikaans.	Geen van beide.	Totaal.
Kaaprovinsie.....	31.53	1.63	66.64	0.20	100.00
Natal.....	34.39	55.30	6.64	3.67	100.00
Transvaal.....	58.79	3.64	36.77	0.80	100.00
Oranje-Vrystaat.....	17.14	1.12	81.34	0.40	100.00
UNIE.....	33.04	3.04	63.60	0.32	100.00

Ongeveer een-derde (33.04 persent) van die totale kleurlingbevolking besit 'n kennis van beide offisiële tale, 3.04 persent net van Engels, 63.60 persent net van Afrikaans en 0.32 persent van geen van die twee nie. Die verskille tussen die provinsies stem noukeurig ooreen met die verskille wat in die geval van die blankes bestaan. In die Oranje-Vrystaat waar die bevolking oor die algemeen hoofsaaklik Afrikaanssprekend is, het 81.3 persent bv. net 'n kennis van Afrikaans besit, in teenstelling met 17.1 persent met 'n kennis van beide tale. In die Kaaprovinsie was die verhouding met 'n kennis van Afrikaans alleen (66.6 persent) ook baie groter as die verhouding met 'n kennis van beide tale. In Natal waar die bevolking oor die algemeen hoofsaaklik Engels-sprekend is, het 55.3 persent aan die ander kant net Engels geken, in teenstelling met 34.4 persent wat beide tale geken het. Die betreklik hoë persentasie kleurlinge wat geen kennis van een van die twee offisiële tale besit het nie, nl. 3.67 persent, kan miskien toegeskryf word aan die groot verhouding kleurlinge in Natal (26.6 persent) wat nie as Kaapse kleurlinge, Maleiers, Griekwas of enige van die inboorlingrasse van die Unie geklassifiseer kon word nie. Die enigste taal wat hierdie persone geken het, was waarskynlik die een of ander Indiese dialek. Die grootste verhouding kleurlinge met 'n kennis van beide offisiële tale, nl. 58.8 persent, was in Transvaal.

Onderstaande tabel toon die verhoudingsindeling volgens leeftyd van die kleurlingbevolking van die Unie volgens hul kennis van die offisiële tale.

TABEL 33.—KLEURLINGE LEEFTYD EN KENNIS VAN OFFISIËLE TALE.

Leeftydsgroep (Jare).	Afrikaans en Engels.	Net Engels.	Net Afrikaans.	Geen van beide.	Totaal.
0-0.....	12.75	4.69	81.90	0.66	100.00
7-14.....	30.90	2.85	65.82	0.43	100.00
15-24.....	41.86	2.65	55.78	0.21	100.00
25-34.....	43.19	3.12	53.53	0.16	100.00
35-44.....	40.54	2.75	56.55	0.16	100.00
45-54.....	37.40	2.21	60.22	0.17	100.00
55-64.....	32.91	2.15	64.74	0.20	100.00
65 +.....	24.08	1.81	73.78	0.35	100.00
TOTAAL.....	33.04	3.04	63.61	0.32	100.00
0-20.....	26.94	3.41	69.19	0.46	100.00
21 +.....	39.42	2.65	57.75	0.18	100.00

Afrikaans was die huistaal van 90 persent van die kleurlingbevolking van die Unie (vergelyk met onderstaande tabel). Dit is derhalwe natuurlik dat die persentasie met net 'n kennis van Afrikaans in die geval van kinders in die leeftydsgroep 0-6 jaar hoog is (81.9 persent). Namate vordering op skool gemaak word, word 'n kennis van Engels opgedoen en die verhouding met 'n kennis van beide tale neem toe, terwyl dié wat net Afrikaans ken, afneem. Op 'n leeftyd van omtrent 30 jaar word 'n keerpunt bereik waar 53.5 persent net 'n kennis van Afrikaans besit en 43.2 persent van beide Afrikaans en Engels. Bo dié leeftyd neem die verhouding van eersgenoemde klas weer toe, vermoedelik weens die feit dat die ouer kleurlingbevolking min of glad nie die kans gekry het of die aanleg daartoe gehad het om Engels te leer nie.

Onderstaande tabel toon watter gedeelte van die kleurlingbevolking van die vernaamste stedelike gebiede die offisiële tale ken.

TABEL 34.—KLEURLINGE IN VERNAAMSTE STEDELIKE GEBIEDE: KENNIS VAN OFFISIËLE TALE.

Munisipaliteit.	Afrikaans en Engels.	Net Engels.	Net Afrikaans.	Geen van beide.	Totaal.
Kaapstad.....	72.24	3.48	24.26	0.02	100.00
Port Elizabeth.....	71.50	4.64	23.72	0.14	100.00
Oos-Londen.....	82.00	4.04	13.67	0.29	100.00
Kimberley.....	71.03	3.39	25.55	—	100.00
Pietermaritzburg.....	46.87	46.27	5.17	1.69	100.00
Durban.....	35.43	61.16	2.76	0.65	100.00
Pretoria.....	68.81	1.34	29.79	0.06	100.00
Witwatersrand.....	73.24	4.55	22.09	0.12	100.00
Johannesburg.....	75.13	5.18	19.53	0.11	100.00
Ander Witwatersrandse munisipaliteite.....	67.59	2.64	29.59	0.18	100.00
Bloemfontein.....	82.02	1.80	65.47	0.71	100.00

In Kaapstad wat, uit die oop punt van die kleurlingbevolking beskou, die vernaamste van hierdie gebiede is, het een-kwart van die bevolking net 'n kennis van Afrikaans gehad, in teenstelling met byna drie-kwart met 'n kennis van beide Afrikaans en Engels. Hierdie syfers staan skerp in teenstelling met die ooreenstemmende syfers vir die hele Kaaprovinsie, nl. onderskeidelik 66.6 en 31.5 persent. Die geleentheid wat in Kaapstad aan Kleurlinge verskaf word om 'n kennis van Engels op te doen deur amper daaglikke met Engelsspreekende blankes in aanraking te kom, is ongetwyfeld verantwoordelik vir hierdie toestand. Die verhouding wat net Afrikaans ken, is in Bloemfontein die grootste (65.5 persent) en dié wat net Engels ken, is in Durban (61.2 persent) die grootste.

24. Huistale van Kleurlinge.—Onderstaande tabel toon die verhoudingsindeling van die kleurlingbevolking in die provinsies en vernaamste munisipaliteite volgens huistale.

TABEL 35.—HUISTALE VAN KLEURLINGE IN PROVINSIES EN VERNAAMSTE STEDELIKE GEBIEDE.

Gebiede.	Engels.	Afrikaans.	Ander Tale.	Totaal.
(a) Provinsies.				
Kaaprovinsie.....	6.03	91.97	2.00	100.00
Natal.....	61.35	23.48	15.17	100.00
Transvaal.....	11.64	81.39	6.97	100.00
Oranje-Vrystaat.....	0.99	94.90	4.11	100.00
UNIE.....	7.62	89.69	2.69	100.00

(b) Munisipaliteite.	Engels.	Afrikaans.	Ander Tale.	Totaal.
Kaapstad.....	17.99	78.89	3.12	100.00
Port Elizabeth.....	17.44	79.61	2.95	100.00
Oos-Londen.....	13.57	82.89	3.54	100.00
Kimberley.....	21.57	76.01	2.42	100.00
Pietermaritzburg.....	59.99	29.67	10.34	100.00
Durban.....	71.22	19.17	9.61	100.00
Pretoria.....	7.06	90.13	2.81	100.00
Witwatersrand.....	16.76	79.19	4.05	100.00
Johannesburg.....	20.00	75.75	4.25	100.00
Ander Witwatersrandse munisipaliteite.....	7.05	89.48	3.47	100.00
Bloemfontein.....	3.59	89.89	6.52	100.00

Afrikaans was die huistaal van 89.7 persent of nege-tiendes van die kleurlingbevolking van die Unie en Engels dié van 7.6 persent. Daar bestaan wesentlike verskille tussen die provinsies. In Natal byvoorbeeld het 23.5 persent of byna een-kwart Afrikaans gebesig, terwyl dit in die Oranje-Vrystaat die huistaal van 94.9 persent was.

In Pretoria en Bloemfontein was Afrikaans die huistaal van omtrent 90 persent, in Kaapstad van 78.9 persent, in Port Elizabeth van 79.6 persent en in Johannesburg en Kimberley van omtrent drie-kwart van die kleurlingbevolking. In Durban het slegs 19.2 persent tuis Afrikaans gepraat.

By 'n vergelyking van die huistale met die kennis van die offisiële tale blyk dat 'n klein verhouding van die persone wat net Engels of beide Afrikaans en Engels geken het, tuis inderdaad Engels of beide Afrikaans en Engels gepraat het. In Pretoria en Bloemfontein het hierdie gedeelte ongeveer een-tiende uitgemaak; in Kaapstad, Port Elizabeth en Johannesburg het dit gewissel van een-vyfde tot een-kwart; en in Durban en Pietermaritzburg was dit omtrent drie-kwart.

TABLE 1.—PROPORTIONATE DISTRIBUTION OF ALL RACES PER 100 OF THE TOTAL POPULATION IN EACH MAGISTERIAL DISTRICT—CENSUS, 1936.

AGES OF THE NATIVE POPULATION.

TABLE 5.—AGES OF MALES AND FEMALES IN THE PRINCIPAL TOWNS AND THEIR SUBURBS, NUMBERS AND PROPORTIONS PER 1,000—CENSUS, 1936—(continued).

Table with columns for Ages—Years, LEEFTYDE—JAAR, Municipality—Munisipaliteit, and Suburbs—Voorstede. Rows include age groups from 0 to 100+ and a total row.

LEEFTYDE VAN DIE NATURELLEBEVOLKING.

TABEL 5.—LEEFTYDE VAN MANLIKE EN VROULIKE PERSONE IN DIE VERNAAMSTE STEDE EN HUL VOORSTED, GETALLE EN VERHOUDINGS PER 1,000—SENSUS, 1936—(vervolg).

TABLE 6.—AGE AND SEX DISTRIBUTION OF THE POPULATION: (i) AT EACH YEAR OF AGE; (ii) AT AND OVER EACH YEAR OF AGE; (iii) UNDER EACH YEAR OF AGE; AND (iv) SEX PROPORTIONS PER 1,000 AT EACH YEAR OF AGE. URBAN AND RURAL AREAS, UNION—CENSUS, 1936.

Large table with columns for Age—Years, LEEFTYDE—JAAR, and sub-sections: (i) POPULATION AT EACH YEAR OF AGE, (ii) POPULATION AT AND OVER EACH YEAR OF AGE, (iii) POPULATION UNDER EACH YEAR OF AGE, (iv) SEX PROPORTIONS PER 1,000. Includes sub-sections for ALL AREAS, UNION-UNIE, and ALLE GEBIEDE.

LEEFTEYE VAN DIE NATURELLE BEVOLKING.
 LEEFTEYE-EN GESLAGSINDELING VAN DIE BEVOLKING: (i) BY ELKE LEWENJAAR; (ii) BY EN OOR ELKE LEWENJAAR; (iii) ONDER ELKE LEWENJAAR; EN (iv) GESLAGSVERHOUDINGS PER 1,000 BY ELKE LEWENJAAR. VERHOUDINGS PER 1,000 VAN ELKE GESLAG BY ALLE LEEFTEYE, MANLIKES EN VROUKES BY ELKE LEWENJAAR PER 1,000 PERSONE BY ALLE LEEFTEYE, STEDELIKE EN PLATTE- LANDSE GEBIENDE, UNIE.—SENSUS, 1936 (vervolg).

AGES—YEARS. LEEFTEYE—JAAR.	POPULATION AT EACH YEAR OF AGE (SPECIFIED AGES). (i) BEVOLKING BY ELKE LEWENJAAR.			POPULATION AT AND OVER (SPECIFIED AGES). (ii) BEVOLKING BY EN OOR ELKE LEWENJAAR (OPGEWEE LEEFTEYE).			POPULATION UNDER EACH YEAR OF AGE (SPECIFIED AGES). (iii) BEVOLKING ONDER ELKE LEWENJAAR (OPGEWEE LEEFTEYE).			POPULATION AT EACH YEAR OF AGE—PROPORTIONS PER 1,000. (iv) BEVOLKING BY ELKE LEWENJAAR—VERHOUDINGS PER 1,000.
