ARRANGEMENT OF CENSUS REPORTS,
1936.

The tabulated results of the Census will be issued in twelve parts. Each part will be published from time to time as the information becomes available.

ISSUED TO DATE :

Vol.	I.—Sex and Geographical Distribution of all Races of the Population (with maps and diagrams).
„	II.—Ages of the European, Asiatic and Coloured Population (with graphs of age and sex constitution).
„	III.—Marital Condition. European, Coloured and Asiatic Population (with graphs).
„	IV.—Languages: Official and Home Languages Spoken. European, Coloured and Asiatic Population (with maps and graphs).
	—Supplementary to Volume IX. (Ages and Marital Condition—Natives.)
„	VIII.—Dwellings in Urban Areas (with graphs).
„	X.—Unemployment. European, Coloured and Asiatic Population.
	TO BE ISSUED :
„	V.—Birthplaces, Period of Residence and Nationality. European, Coloured and Asiatic Population.
„	VI.—Religions. European, Coloured and Asiatic Population.
„	VII.—Occupations and Industries. European, Coloured and Asiatic Population.
„	IX.—Natives (Bantu) and Other Non-European Races. Distribution, Ages, etc.
„	XI.—South African Life Table No. 3.
„	XII.—Final Report.

INDELING VAN SENSUS VERSLAG,
1936.

Die getableerde resultate van die Sensus sal in twaalf dele uitgegee word. Namate die informasie beskikbaar gestel word, sal die dele van tyd tot tyd gepubliseer word.

TOT HEDE UITGEGEE :

Boekdeel	I.—Geslags- en Geografiese- Indeling van Alle Rasse van die Bevolking (met kaarte en diagramme).
„	II.—Leeftyte van die Blanke, Asiatiese- en Kleurling-bevolking (met grafieke van leeftyds- en geslagsamestelling).
„	III.—Huwelikstaat. Blanke, Kleurling- en Asiatiese Bevolking (met grafieke).
„	IV.—Tale: Offisiële en Huistale wat gepraat word. Blanke, Kleurling- en Asiatiese Bevolking (met kaarte en grafieke).
	—Aanhangsel van Boekdeel IX. (Leeftyte en Huwelikstaat—Naturelle.)
„	VIII.—Huisvesting in Stedelike Gebiede (met grafieke).
„	X.—Werkloosheid. Blanke, Kleurling- en Asiatiese Bevolking.
	IN VOORBEREIDING :
„	V.—Geboorteplekke, Verblyfduur en Nasionaliteit. Blanke, Kleurling- en Asiatiese Bevolking.
„	VI.—Godsdienste. Blanke, Kleurling- en Asiatiese Bevolking.
„	VII.—Beroepe en Nywerhede. Blanke, Kleurling- en Asiatiese Bevolking.
„	IX.—Naturelle (Bantoe) en Ander nie-blanke Rasse. Indeling, Leeftyte, ens.
„	XI.—Suid-Afrikaanse Lewens Tabel No. 3.
„	XII.—Eindverslag.

PREFACE.

This volume is the eighth of the report on the Census of 1936. It contains summaries and detailed tables relative to the dwellings in which the population is housed in the urban areas and certain rural suburbs of the Union.

It is not a complete record of all the various types of habitations in which the population resides, but is confined to private dwellings more commonly known as "houses", and to flats and residential chambers.

Buildings such as hotels, barracks, nurses' quarters, hospitals, prisons and other institutions which accommodate inmates or staffs of such institutions have been excluded.

One of the primary objects of dwelling statistics is to ascertain and to measure the rise and fall in rents from time to time. For this purpose it is necessary to see that comparisons are made between identical structural units and dwellings available for hire to the general public, and not to privileged persons.

Privileged persons are considered to be those for whom dwellings are provided by employers, such as industrial companies, municipal authorities, Government departments, etc., at nominal or fixed rentals.

To achieve this purpose, dwellings have been tabulated as follows:—

- (i) Dwellings constructed of brick, stone, brick and stone, or concrete.
- (ii) Dwellings of all other materials.

These two groups have been sub-divided into—

- (a) non-privileged;
- (b) privileged.

From this classification the rents of non-privileged private dwellings built of brick, stone, etc., let unfurnished, can be ascertained. From these particulars the index numbers are computed to form the base for measuring the annual movements of rents as ascertained from the intermediate rent censuses taken in inter-censal years.

It is partly for this reason that no enumeration is made of dwellings in rural areas where no rental values can be assessed for the habitations apart from the land in the case of hired farms.

The volume has been divided into four sections dealing with the dwellings occupied by each of the four races of the Union. Although certain particulars were collected from the non-European races at the Census of 1921, this is the first occasion on which particulars have been fully tabulated and published in detail.

The only particulars collected of rural dwellings were the number of Native dwelling huts in Native areas—locations and mission stations, etc. These particulars are given at the end of the report.

E. P. PEARCE,
Acting Director,
Census and Statistics.

Pretoria,
June, 1939.

VOORWOORD.

Hierdie boekdeel is die agste van die verslag oor die Sensus van 1936. Dit bevat opsommings en uitgebreide tabelle ten opsigte van die wonings waarin die bevolking van die stedelike gebiede en seker plattelandse voorstede van die Unie gehuisves is.

Dit is nie 'n volledige register van al die verskillende soorte wonings waarin die bevolking gehuisves is nie, dog is beperk tot private wonings algemeen bekend as "huise", en tot „flats" en woonkamers.

Geboue soos hotelle, barracks, verpleegsterswoningen, hospitale, gevangnisse en ander inrigtings waar die inwoners of personeel van sodanige inrigtings gehuisves word, is uitgesluit.

Een van die primêre doeleindes van woning-statistiek is om die styging en daling van huurgelde van tyd tot tyd te wete te kom en te bepaal. Om hierdie rede is dit nodig om toe te sien dat vergelykings gemaak word tussen presies identieke geboue en wonings wat vir die algemene publiek te huur beskikbaar is en nie vir amptelike persone nie.

Amptelike persone word beskou dié te wees vir wie wonings teen nominale of vaste huur deur werkgewers soos nywerheidsmaatskappye, munisipale owerhede, Goewermentsdepartemente, ens., beskikbaar gestel word.

Ten einde hierdie doel te bereik, is wonings as volg geklassifiseer:—

- (i) Woningen van baksteen, klip, baksteen en klip, of konkreet.
- (ii) Woningen van alle ander materiale.

Hierdie twee groepe is onderverdeel in—

- (a) nie-amptelike;
- (b) amptelike.

Van hierdie klassifikasie kan die huur van nie-amptelike private wonings van baksteen, klip, ens., ongemeubileer verhuur bepaal word. Uit hierdie besonderhede word die indekssyfers bereken om die basis te vorm vir die bepaling van die jaarlikse bewegings van huurgelde soos vasgestel uit die intermediêre huursensusse wat in die jare tussen die sensusse opgeneem word.

Dit is deels om hierdie rede dat geen opname gedoen word in verband met wonings in plattelandse streke, waar in die geval van huurplase geen huurwaarde vir die wonings afgesien van die grond opgegee kan word nie.

Die boekdeel is in vier afdelings verdeel, waarvan elkeen die wonings van een van die vier rasse van die Unie behandel. Hoewel sekere besonderhede van die nie-blanke rasse by die Sensus van 1921 versamel is, is dit die eerste keer dat besonderhede volledig getabelleer en in besonderhede gepubliseer is.

Die enigste besonderhede wat in verband met plattelandse wonings versamel is, was die getal naturelle hutte in naturelle gebiede en -lokasies en sendingstasies, ens. Hierdie besonderhede kom aan die end van die verslag voor.

E. P. PEARCE,
Waarnemende Direkteur,
Sensus en Statistiek.

Pretoria,
Junie 1939.

REPORT

ON THE

SIXTH CENSUS OF THE POPULATION OF THE UNION, 5th MAY, 1936.

PART VIII.—DWELLINGS.

INTRODUCTION.

1. The tables comprised in this part of the Report on the census of population on the 5th May, 1936, refer to occupied private dwellings in urban areas, rural suburbs and rural townships of the Union.

The questionnaire used at the Census of 1936 is reproduced hereunder:—

FOR URBAN AREAS, RURAL SUBURBS AND RURAL TOWNSHIPS ONLY.

DESCRIPTION OF DWELLING.

To be filled in by the occupier or person in charge.

- Class of Dwelling:** State whether private house, flat, residential chamber, boarding house, caretaker's quarters, etc.
- Materials of which outer walls are built:** If more than one material is used, state that which is chiefly used.
- Ownership:** If this house is owned by Government, Municipality, Railway Administration, Mining or Industrial Company, and is occupied by you as an employee thereof, please write "Railways", "Mines", etc., or the name of the owning company, as the case may be. In all other cases, write "Private Ownership".
- Number of rooms:** Excluding kitchen, pantry, bathroom, and outside rooms occupied by or intended for servants.
- Occupancy:** Make a X against one of the following items which applies in your case:—
 - (a) Rented unfurnished.....
 - (b) Rented furnished or part furnished.....
 - (c) Owned and occupied by you.....
 - (d) Being acquired by you on hire (or rent) purchase system.....
 - (e) Occupied FREE or at nominal rental as caretaker, employee, etc.....
- Monthly Rental and Rates:** To be completed only in respect of a private dwelling, flat, or residential chamber rented unfurnished.

	£	s.	d.
Rent per month.....			
Monthly Rates Paid by Tenant.....			
(a) Water.....			
(b) Sanitary.....			
(c) Sewerage.....			
(d) Rubbish or slop removal.....			
(e) Assessment or general rate (if any).....			
TOTAL.....			

NOTE.—If all rates are paid by Landlord, no entry should be made. If rates (or rent) are paid other than monthly, the equivalent monthly amount should be given. Electric light and gas must NOT be included.

SUMMARY.

Total number of Europeans enumerated on this form.

MALES.		FEMALES.		Total Persons.
Under 21 years.	21 years and over.	Under 21 years.	21 years and over.	

The items followed closely those of the Census of 1926; the only difference being the omission from the questionnaire of the following:—"Number of children under 15 years of age dependent on head of household", and "Personal particulars of head of household", i.e., occupation, marital condition, sex and age.

In 1936 an additional item No. 3, "Ownership" was inserted in order to distinguish between the ordinary private dwelling and the type designated "privileged". The latter type embraces houses owned, for example, by a gold mining company and let to employees at a nominal rental, or by the South African Railway Administration and rented to employees on a salary percentage basis. Again, in certain towns, large industrial companies erect houses for their factory employees and either let the houses at a nominal rental or allow free occupation.

Item 6 was inserted to ascertain the municipal rates paid by the tenant. The practice with regard to rates varies considerably in different parts of the Union. In some towns all rates are paid by the tenant; in others some rates are paid by the tenant and some by the landlord. In others, again, the landlord pays all rates.

2. Method of Tabulation.—The method of tabulation in this volume is the same as that employed at the Census of 1926. Although the questionnaire was included in the census form for 1931, no detail tabulation was undertaken on account of the prevailing trade depression and consequent financial stringency of the country.

As in 1926, the questions were embodied in the householders form. This method was found to be more satisfactory as it enables information to be checked against the particulars of the household or family occupying the dwelling. In the event of doubtful information being given in regard to any of the items of the enquiry, a query can be raised or obvious adjustments made before tabulation.

A considerable number of queries were raised and referred back to the Enumerators or Supervisors for further information; but notwithstanding this endeavour to obtain as accurate a census of dwellings as possible, there was a small proportion of dwellings which had to be discarded owing to obviously incorrect particulars being furnished. This also applies to the previous censuses, and it must be understood that the total numbers of dwellings dealt with in this volume are therefore not absolute. The numbers discarded were an extremely small proportion of the total and any calculations based on the figures would not be affected. It must not be assumed that the increase in the number of dwellings between two censuses represents the total of new buildings erected during the period. Building of houses is continuously taking place; but the explanation of a part of the increase may be found in the fact that, owing to congestion, families are compelled to share houses, and frequently such portions of houses are returned as separate dwellings. As more houses become available and congestion is eased, it is conceivable that the increase shown in the number of dwellings might be less than the actual increase in the number of separate houses. Moreover, houses are sometimes pulled down to make room for improved dwellings, or for business premises.

3. Scope of the Enquiry.—With the exception of dwellings in certain rural suburbs of large towns, the tabulation has been confined to urban areas. The rural suburbs referred to are mainly populated by persons following urban vocations in the adjacent urban centres. The housing conditions in these areas are somewhat similar to those of other suburban areas falling within the jurisdiction of municipal councils.

In 1926 and 1936 a different method to that previously employed was adopted in dealing with flats, residential chambers and similar abodes. Previously, it was the practice to treat a block of residential chambers or flats as one dwelling; but for the 1926 and current censuses, each flat, etc., was treated as a separate dwelling. This has had the effect of showing a large increase in the number of one and two-roomed dwellings, and decreasing the number of dwellings of ten rooms and over.

It was considered that this method would overcome the numerous difficulties encountered in suitably tabulating this type of dwelling. It is certain that this method gives a better perspective of the overcrowding or otherwise of these large residential establishments. For example, it frequently happened that a block of chambers contained say 30 rooms and 30 occupants; but as no indication was given on the forms as to how many of the rooms were unoccupied, the ordinary method of arriving at the average number of occupants per room frequently gave results very far from actual fact, especially in the poorer types of tenement building. By treating each "household" and the rooms they occupy as a separate dwelling, a more accurate picture is revealed.

4. Increase in Dwellings.—The number of private dwellings has increased as follows:—

1918 to 1921.....	7.65 per cent.
1921 to 1926.....	26.71 "
1926 to 1936.....	36.66 "

The following table gives, in summarised form, a comparison between the last three censuses. The table refers only to private dwellings and excludes residential chambers and flats. The distribution according to the number of rooms has again changed. Although the four-room dwelling still predominates the proportion of dwellings with four and less rooms has decreased, while the proportion with five and more rooms has increased. This is probably due to the building of flats instead of the smaller class of dwelling.

NUMBER AND PROPORTION PER CENT. OF PRIVATE DWELLINGS OCCUPIED BY EUROPEANS IN URBAN AREAS CLASSIFIED ACCORDING TO NUMBER OF LIVING ROOMS, CENSUSES 1921, 1926 AND 1936.

Number of Living Rooms.	DWELLINGS.					
	Number.			Percentage.		
	1921.	1926.	1936.	1921.	1926.	1936.
1.....	2,953	4,188	4,450	2.2	2.5	1.9
2.....	13,341	14,568	15,603	9.9	8.5	6.7
3.....	33,276	40,452	52,569	24.7	23.7	22.5
4.....	38,232	51,417	68,988	28.4	30.1	29.6
5.....	23,443	30,546	45,867	17.4	17.9	19.7
6.....	12,105	15,531	22,749	9.0	9.1	9.8
7.....	5,609	6,973	10,961	4.2	4.1	4.7

Uns.....	200	1	2	0.1	—	—
TOTAL.....	134,732	170,713	233,294	100	100	100

5. Occupants of Dwellings.—The position as regards overcrowding which existed in 1921 and which was slightly relieved in 1926 has eased off still further in 1936. The average number of occupants per dwelling fell from 5.08 in 1921 and 4.89 in 1926 to 4.66 in 1936.

As explained previously the position is not fully indicated by the figures owing to the requirements of enumeration and machine tabulation necessitating the method of treating each "household" as a separate entity even when two or more families are sharing the house. It is clear, however, when the last two columns of the table are compared, that in every instance except in the case of one-room dwellings, the average number of occupants per private dwelling has decreased.

NUMBER AND PERCENTAGE DISTRIBUTION OF OCCUPANTS OF PRIVATE DWELLINGS (EUROPEANS) IN URBAN AREAS, CLASSIFIED ACCORDING TO NUMBER OF LIVING ROOMS, AND THE AVERAGE NUMBER PER DWELLING, CENSUSES 1921, 1926 AND 1936.

TOTAL.....	684,686	834,313	1,087,883	100	100	100	5.08	4.89	4.66

6. Ownership of Private Dwellings.—The summary given hereunder shows that the percentage of dwellings owned by the occupier has dropped from 45.9 per cent. in 1926 to 44.5 per cent. in 1936. This was only to be expected after the extraordinary increase in owned houses during the period 1921 to 1926, when, as a result of the increased demand during that period, many

tenants were forced to purchase the house they occupied as an alternative to paying increased rent, or having the house sold over their heads.

Natal still has the largest percentage of owned houses, although the figure has dropped to 47 per cent.

* Figures include 19 dwellings with terms of occupancy not specified.

† Figures include 11 dwellings with terms of occupancy not specified.

7. Non-European Dwellings.—As the census included all races of the population the dwelling questionnaire was included on the householders' form for each of the races.

Of the 14,891 Private Dwellings occupied by Asiatics, 74 per cent. were in Natal. Fifty-four per cent. were privately owned. The percentage of those privately owned in Natal was 64.

There were 38,487 Private Dwellings occupied by the Coloured population; of these 86 per cent. were in the Cape Province and only 26 per cent. were privately owned. In the Cape 27 per cent. of the dwellings were privately owned.

The Native population occupied 83,086 Private Dwellings and exactly half of these were privately owned. Transvaal had the

largest percentage of Private Dwellings with 48 per cent. and of these 41 per cent. were privately owned.

Whereas in the case of Asiatics and Coloured Dwellings two-roomed houses predominated, these being 30 per cent. and 33 per cent. respectively, one-roomed houses predominated with the Natives, there being 39 per cent. such houses.

The following table gives a summary of the position as regards European and Non-European dwellings in the largest towns of the Union. In the municipality of Bloemfontein complete segregation of the non-European population exists and a comparison is thus less effectively made than in the other towns, especially the Cape coastal towns where Europeans and non-Europeans live in neighbouring houses, hence the omission of Bloemfontein from the table.

COMPARATIVE SUMMARY OF PRIVATE DWELLINGS—EUROPEAN AND NON-EUROPEAN.

8. Rentals of Dwellings occupied by Europeans.—As in 1926 the enquiry regarding the rent paid was confined to private dwellings, residential chambers and flats in urban areas and certain rural suburbs adjoining the large urban areas.

(i) Rentals.—The tables in this Report deal with all classes and sizes of houses, but as the majority of dwellings are of from three to six rooms, most of the tables deal exclusively with dwellings of these sizes. Similarly, dwellings built of materials other than brick, stone, brick and stone and concrete form only a very small percentage of the total and are excluded from most of the rent tables.

Table 7 gives the rents for private non-privileged dwellings of three, four, five and six rooms in each town: (a) those built of brick, brick and stone, concrete or stone, and (b) those built of all other materials.

Table 8 gives the same information as table 7 for privileged dwellings.

AVERAGE MONTHLY RENT OF THREE TO SIX ROOM RENTED DWELLINGS, BUILT OF BRICK, BRICK AND STONE OR CONCRETE ONLY (EUROPEAN OCCUPANTS) IN THE EIGHTEEN PRINCIPAL TOWNS (EXCLUDING SUBURBS), 1921, 1926 AND 1936.

* Figures not available.

The table shown hereunder includes houses of from one to ten rooms, but relates to the year 1936 only. Moreover, the adjoining suburbs of the municipalities have also been included in each case. The inclusion of the suburbs has very little effect as far as the Reef towns are concerned, but in the other towns the effect is to lower slightly the average rent.

The last column of the table shows the average monthly rental per room of these houses. Pretoria headed the list in 1926, but now takes fifth place with an average rent of £1. 15s. 2d. per room. Springs now heads the list with £1. 18s. 9d., while Kimberley is still at the other end of the scale with an average rent of 17s. 11d. per room as compared with £1. 3s. 8d. in 1926.

AVERAGE MONTHLY RENTALS OF HOUSES—ONE TO TEN ROOMS, BUILT OF BRICK, BRICK AND STONE OR CONCRETE ONLY (EUROPEAN OCCUPANTS)—EIGHTEEN PRINCIPAL URBAN AREAS (INCLUDING SUBURBS)—1936.

9. Non-Europeans.—This is the first occasion on which particulars of rents of private dwellings occupied by Non-Europeans have been fully tabulated and published. In 1921 particulars were asked for on the householders' forms, as in the case of Europeans, but the results were not altogether satisfactory and very little could be published.

Whereas the most predominant types of dwellings are the houses of three to six rooms in the case of Europeans, the non-Europeans occupy a greater proportion of smaller houses. For this reason, the basis of tabulation was changed and the tables, relative to Asiatics and Natives, give the rentals of dwellings of from one to four rooms, and in the case of the Coloured population of from one to five rooms.

There were comparatively few private dwellings outside this range and it was not considered of sufficient interest to publish particulars of them.

In the table shown hereunder the average monthly rentals for houses of from one to four rooms occupied by the Asiatic, Coloured and Native population, respectively, are given for certain of the largest towns.

This table refers only to houses, the outer walls of which are built of brick, brick and stone, concrete or stone.

From this it will be seen that in every case the Asiatics pay the highest rent and the Natives the lowest.

10. **Rents : Index Numbers.**—The table below shows the index numbers indicating the movements of rents of private dwellings occupied by Europeans at the censuses of 1926, 1931 and 1936, and also for certain intermediate years when special rent censuses were taken. The basic figure of 1000 represents the average rent in the nine large urban centres in the year 1910. For the purpose

of this calculation, rented private dwellings of from three to six rooms only have been utilised as these are the predominant sizes of houses in the Union. It will be seen that although there was a decline in rent levels between the census years 1931 and 1936, there has been a steady rise in all centres since the latter year.

11. **Graphs of Dwellings.**—Graph No. 1 shows the number of private dwellings according to the number of rooms. By far the largest number of private dwellings is that of four rooms.

Graph No. 2 shows the number of occupants in private dwellings according to the number of rooms. As is to be expected this graph is very similar to graph No. 1, the number of persons occupying houses of four rooms predominating.

Graph No. 3 has two lines, one showing the average number of inmates per dwelling and the other the average per room. The scale on the left of the graph should be read with the continuous line, and that on the right with the broken line. From this graph it will be seen that the highest average number of occupants per

dwellings was just under eight in houses of seventeen rooms, and the highest average number per room was a little over 2.6 in houses of one room.

Graphs Nos. 4, 5 and 6 show the average monthly rental for private dwellings in certain large towns. The highest average paid was for houses of ten rooms in Johannesburg with a rental of £12 5s. 0d. per month.

E. P. PEARCE,
Acting Director.

Census and Statistics Office,
Pretoria,
June, 1939.

VERSLAG

OOR DIE

SESDE SENSUS VAN DIE BEVOLKING VAN DIE UNIE, 5 MEI 1936.

DEEL 8.—HUISVESTING.

INLEIDING.

1. Die tabelle in hierdie deel van die Verslag oor die sensus van die bevolking op 5 Mei 1936 bevat, het betrekking op bewoonde private wonings in stedelike gebiede, plattelandse voorstede en plattelandse dorpe van die Unie.

Die vraelys by die Sensus van 1936 gebruik, word hier weer-gegee:—

ALLEEN VIR STEDELIKE GEBIEDE, PLATTELANDSE VOORSTEDEN EN BUITE DORPE.

BESKRYWING VAN WONING.

Moet ingevul word deur bewoner of verantwoordelike persoon.

1. **Soort woning :** Vermeld of private huis, flat, losieshuis, huisbewaarders-vertrekke, ens.

2. **Boumateriaal van buitemure :** Indien daar meer as een soort materiaal is, noem die een wat die meeste gebruik is.

3. **Eiendomsreg :** As hierdie huis die eiendom is van die Regering, Munisipaliteit, Spoorweg-administrasie, Myn- of Industriële Maatskappy, as werknemer waarvan u dit bewoon, skryf asb., „Spoorweë”, „Myne”, ens., of die naam van die maatskappy wat dit besit. In alle ander gevalle vul in „Private Eiendom”.

4. **Getal kamers :** Kombuis, spens, badkamer, en buitekamer, bewoon deur of bedoel vir nie-Europese bediendes, nie inbegrepe nie.

5. **Bewoning :** Vul in X agter die item wat in u geval toepaslik is:—
(a) Ongemeubileerd gehuur.....
(b) Gemeubileerd of deels gemeubileerd gehuur.....
(c) U eiendom en deur u bewoon.....
(d) U koop dit onder huurkoopstelsel.....
(e) Vry bewoning, of teen nominale huur as huisbewaarder, werknemer, ens.....

6. **Maandelikse huurgeld en belasting :** Moet slegs in geval van gehuurde ongemeubileerde private wonings, flats, of kamers ingevul word.

	£	s.	d.
Huur per maand.....			
Belastings maandeliks deur Huurder betaal.	(a) Water.....		
	(b) Sanitêr.....		
	(c) Riolering.....		
	(d) Verwydering van vuilgoed of vuilwater.....		
	(e) Gewone belasting (as daar is).....		
TOTAAL.....			

LET WEL.—As die huisbaas al die belastings betaal, moet daar niks ingevul word nie. Indien belastings (of huur) nie maandeliks betaal word nie, moet die maandelikse ekwivalent gegee word. Elektriese lig en gas moet nie ingevul word nie.

OPSOMMING.

Totale getal Europeane op die vorm genoem.

MANS.		VROUE.		Totaal Persone.
Onder 21 jaar.	21 jaar en daarbo.	Onder 21 jaar.	21 jaar en daarbo.	

Die poste is grotendeels dieselfde as dié van die 1926-sensus. Die enigste verskil was die uitlating uit die vraelys van die volgende: „Getal kinders onder 15 jaar afhanklik van hoof van gesin”, en „Persoonlike besonderhede omtrent hoof van gesin”, d.w.s., beroep, huwelikstaats, geslag en leeftyd.

In 1936 is 'n addisionele pos No. 3, „Eiendomsreg”, ingevoeg ten einde 'n verskil te maak tussen die gewone private wonings en die soort wat as ampshalwe-bewoonde wonings bestempel word. Laasgenoemde soort omvat huise wat die eiendom is, byv., van 'n goudmyn-maatskappy, en teen 'n nominale huur aan werknemers verhuur word, of die eiendom van die Suid-Afrikaanse Spoorweg-administrasie, en op 'n salaris-persentasie-basis aan werknemers verhuur word. Verder rig groot industriële maatskappye in seker stede vir hulle fabriekswerknemers huise op, wat hulle of teen 'n nominale huur verhuur, of vry laat bewoon.

Pos 6 is ingevoeg om uit te vind watter munisipale belastings deur die huurder betaal word. Die gebruik ten opsigte van belastings verskil grotendeels in verskillende dele van die Unie. In sommige stede word alle belastings deur die huurder betaal; in ander word sommige belastings deur die huurder, en die res deur die eienaar betaal. In ander weer betaal die eienaar alle belastings.

2. **Metode van Tabellering.**—Die metode van tabellering in hierdie boekdeel is dieselfde as dié waarvan by die Sensus van 1926 gebruik gemaak is. Hoewel die vraelys in die sensusvorm vir 1931 ingesluit is, is geen uitgebreide tabellering onderneem nie, weens die heersende handelsdepressie en die geldskaarste oor die hele land as gevolg daarvan.

Net soos in 1926, is die vrae in die huishouersvorm opgeneem. Hierdie metode is meer bevredigend bevind, aangesien dit mens in staat stel om die informasie te kontroleer met die besonderhede van die gesin of familie wat die woning bewoon. In gevalle waar twyfelagtige informasie ten opsigte van enige van die poste van die ondersoek opgegee word, kan 'n vraag gedoen, of klaarblyklike foute verbeter word, alvorens die tabellering plaasvind.

In 'n aansienlike aantal gevalle is die gegewens in twyfel getrek en vir verdere informasie na die opnemers of opsigters terug verwys; dog nieteenstaande hierdie poging om die woningsensus so akkuraat moontlik te maak, was daar 'n klein proporsie van wonings wat as gevolg van klaarblyklike onjuisthede in die opgawes buiten rekening gelaat moes word. Dit geld ook die vorige sensusse, en dit moet goed verstaan word dat die totale getalle wonings in hierdie boekdeel behandel, derhalwe nie absoluut seker is nie. Die getalle wat buiten rekening gelaat is, was 'n uiters geringe proporsie van die totaal, en enige berekenings op die syfers gebaseer, sou nie daardeur beïnvloed word nie. Dit moet nie aangeneem word nie dat die vermeerdering in die getal wonings tussen twee sensusse die totaal van nuwe geboue verteenwoordig in die tussentyd opgerig is. Die aanbou van huise vind gedurig plaas; dog die verklaring van 'n gedeelte van die vermeerdering lê in die feit dat, as gevolg van die tekort aan wonings, meer as een familie verplig is om in een huis saam te woon, en dikwels word sodanige gedeeltes van huise as afsonderlike wonings opgegee. Na mate meer huise beskikbaar gestel, en die tekort aangevul word, is dit begryplik dat die vermeerdering in die getal wonings getoon, minder kan wees as die werklike vermeerdering in die getal afsonderlike huise. Bowendien word huise partyskeer afgebreek ten einde vir verbeterde wonings of besigheidspersele plek te maak.

3. **Omvang van die Onderzoek.**—Met uitsondering van wonings in seker plattelandse voorstede van groot stede, is die tabellering tot stedelike gebiede beperk. Die plattelandse voorstede wat hier genoem word, word hoofsaaklik bewoon deur persone wat 'n stedelike beroep in die naburige stedelike sentrums uitoefen. Die behuisingstoestande in hierdie gebiede is in 'n mate dieselfde as dié van ander voorstedelike gebiede wat onder die jurisdiksie van munisipale rade val.

In 1926 en 1936 is 'n ander metode as dié wat vroeër in gebruik was, by die behandeling van flats, woonkamers en dergelike verblyfplekke toegepas. Vroeër was dit die gebruik om 'n blok woonkamers of flats as een woning te behandel; dog vir die sensusse van 1926 en 1936 is elke flat, ens., as 'n afsonderlike woning beskou. As gevolg daarvan is daar 'n groot vermeerdering in die getal een- en twee-kamerwoningen getoon, en 'n vermindering in die getal wonings van tien of meer kamers.

Dit was die mening dat hierdie metode die talrike moeilikhede in verband met 'n geskikte tabellering van hierdie soort woning te bowe sou kom. Dit is seker dat hierdie metode 'n beter insig in die oorbewoning of andersins van hierdie groot wooninrigtings verskaf. Dit het dikwels gebeur, byv., dat 'n blok vertrekke 30 kamers en 30 bewoners bevat het; dog, aangesien daar op die vorms geen aanduiding ten opsigte van die getal onbewoonde kamers was nie, het die gewone metode om die gemiddelde getal bewoners per kamer te bereken, dikwels resultate gegee wat hoegenaamd nie juis was nie, veral in die geval van die armoediger soort huurkamers. Deur elke „huishouding” en die kamers wat hy bewoon, as 'n afsonderlike woning te beskou, word 'n veel juister voorstelling aan die lig gebring.

4. **Vermeerdering in die getal Woningen.**—Die getal private wonings het as volg toegeneem:—

1918 tot 1921.....	7.65	persent.
1921 tot 1926.....	26.71	„
1926 tot 1936.....	36.66	„

Die volgende tabel gee by wyse van opsomming 'n vergelyking tussen die laaste drie sensusse. Die tabel hou alleen rekening met private wonings en sluit woonkamers en flats uit. Die indeling volgens die getal kamers het weer verander. Hoewel die vier-kamer-woning nog in die meerderheid is, het die verhouding van wonings van vier kamers en daaronder afgeneem, terwyl dié van wonings van vyf kamers en daarbo toegeeneem het. Dit is waarskynlik toe te skrywe aan die bou van flats in stede van die kleiner soort woning.

GETAL EN PERSENTASIE-INDELING VAN PRIVATE WONINGS DEUR BLANKES BEWOON IN STEDELIKE GEBIEDE, OOREENKOMSTIG GETAL KAMERS GEKLASSIFISEER—SENSUSSE, 1921, 1926 EN 1936.

Getal kamers.	WONINGS.					
	Getal.			Persentasie.		
	1921.	1926.	1936.	1921.	1926.	1936.
1.....	2,953	4,188	4,450	2.2	2.5	1.9
2.....	13,341	14,568	15,603	9.9	8.5	6.7

TOTAAL.....	134,732	170,713	233,294	100	100	100

5. **Bewoners van Woningen.**—Die posisie ten opsigte van oorbewoning wat in 1921 bestaan het, en in 1926 'n weinig verbeter het, het in 1936 nog verder verbeter. Die gemiddelde getal bewoners per woning het van 5.08 in 1921, en 4.89 in 1926, tot 4.66 in 1936 gedaal.

Soms vroeër verduidelik is, word die posisie nie ten volle deur die syfers weergegee nie, weens die vereistes van die opnemings en van masjien-tabellering, wat dit noodsaaklik maak om elke „huishouding” as 'n afsonderlike eenheid te behandel, selfs waar twee of meer families in dieselfde huis woon. Wanneer die laaste twee kolomme van die tabel met mekaar vergelyk word, is dit eger duidelik dat in elke geval behalwe dié van een-kamerwoningen, die gemiddelde getal bewoners per private woning verminder het.

GETAL EN PERSENTASIE-INDELING VAN BEWONERS VAN PRIVATE WONINGS (BLANKES) IN STEDELIKE GEBIEDE, OOREENKOMSTIG GETAL KAMERS EN DIE GEMIDDELDE GETAL PER WONING GEKLASSIFISEER—SENSUSSE, 1921, 1926 EN 1936.

6. **Eienaarskap van Private Woningen.**—Die opsomming wat hieronder volg, toon dat die persentasie van wonings wat die eiendom van die bewoner is, van 45.9 persent in 1926 tot 44.5 persent in 1936 gedaal het. Dit was feitlik te verwagte na die buitengewone vermeerdering gedurende die tydperk 1921 tot 1926 in die getal huise wat die eiendom van die bewoner was, toe, as gevolg van die vermeerderde aanvraag gedurende genoemde tyd-

perk, baie huurders verplig was om die huis wat hulle bewoon, aan te koop as 'n alternatief van die verpligting om 'n verhoogde huur te betaal, of van te sien dat die huis verkoop word terwyl hulle daarin woon.

Natal het nog die grootste persentasie van huise wat die eiendom van die bewoner is, hoewel die syfer met 4 persent tot 47 persent gedaal het.

* Opgawe sluit in 19 wonings waarvan die voorwaarde van bewoning nie opgegee is nie.

† „ „ 11 „ „ „ „ „ „ „ „

7. **Woningen van Nie-blankes.**—Aangesien die sensus alle rasse van die bevolking omvat het, is die woning-vraelys op die huishoudersvorm vir elkeen van die rasse ingesluit.

Van die 14,891 private wonings deur Asië bewoon, was 74 persent in Natal. Vier-en-vyftig persent was die private eiendom van die bewoner. In Natal was die persentasie van dié wat die private eiendom van die bewoners was, 64.

Daar was 38,487 private wonings deur die Kleurlingbevolking bewoon; daarvan was 86 persent in die Kaapprovinsie, en was slegs 26 persent die private eiendom van die bewoners. In die Kaapprovinsie was 27 persent van die wonings die private eiendom van die bewoners.

Die natuurlikebevolking het 83,086 private wonings bewoon, en presies die helfte daarvan was die private eiendom van die bewoners.

In die Transvaal was daar die grootste persentasie van private wonings, naamlik 48 persent en daarvan was 41 persent die private eiendom van die bewoners.

Terwyl in die geval van wonings van Asië en kleurlinge twee-kamerhuise in die meerderheid was, naamlik 30 persent en 33 persent onderskeidelik, was een-kamerhuise by die natuurlike in die meerderheid. Daar was 39 persent van sodanige huise.

Die volgende tabel gee 'n opsomming van die posisie wat betref blanke en nie-blanke wonings in die grootste stede van die Unie. In die munisipaliteit van Bloemfontein bestaan daar algehele segregasie van die nie-blanke bevolking, en derhalwe kan 'n vergelyking minder doeltreffend wees as in ander stede, veral die kusstede van die Kaapprovinsie, waar blankes en nie-blankes in naburige huise woon; om dié rede word Bloemfontein uit die tabel uitgesluit.

8. **Huurgelde van Wonings deur Blankes bewoon.**—Net soos in 1926 is die ondersoek ten opsigte van die betaalde huur beperk tot private wonings, woonkamers, en „flats” in stedelike gebiede en seker plattelandse voorstede vlak by die groot stedelike gebiede.

(i) **Huurgelde.**—Die tabelle in hierdie verslag handel oor alle soorte en groottes van huise, dog, aangesien die meeste van die wonings van drie tot ses kamers bevat, handel die meeste van die tabelle uitsluitlik oor wonings van hierdie groottes. Eweso, vorm wonings van ander materiale as baksteen, klip, baksteen en klip, en konkreet slegs 'n baie klein persentasie van die totaal, en word hulle dus uit die meeste van die huurtabelle uitgesluit.

Tabel 7 gee die huurgelde vir private nie-amptelike wonings van drie, vier, vyf en ses kamers in elke stad: (a) dié van baksteen, klip, baksteen en klip, of konkreet, en (b) dié van ander materiale.

Tabel 8 gee dieselfde informasie as tabel 7 vir amptelike wonings.

GEMIDDELDE MAANDELIKSE HUUR VAN WONINGS MET VAN DRIE TOT SES KAMERS, ALLEENLIK VAN BAKSTEEN, KLIP, BAKSTEEN EN KLIP, OF KONKREET GEBOU (BLANKE BEWONERS) IN DIE AGTIEN VERNAAMSTE STEDE (VOORSTEDEN UITGESLUIT), 1921, 1926 EN 1936.

* Syfers nie beskikbaar nie.

Die volgende tabel sluit huise met van een tot tien kamers in, dog sien alleen op die jaar 1936. Bowendien is die aangrensende voorstede van die munisipaliteite ook in elke geval inbegrepe. Die insluiting van die voorstede het baie min uitwerking wat die stede van die Rand betref, dog in ander stede is die uitwerking om die gemiddelde huur 'n weinig te verlaag.

Die laaste kolom van die tabel toon die gemiddelde maandelikse huur per kamer van hierdie huise. In 1926 was Pretoria bo aan die lys, dog nou neem dit die vyfde plek in met 'n gemiddelde huur van £1. 15s. 2d. per kamer. Nou staan Springs bo aan die lys met £1. 18s. 9d., terwyl Kimberley nog aan die ander end van die lys is met 'n gemiddelde huur van 17s. 11d. per kamer in vergelyking met £1. 3s. 8d. in 1926.

MAANDELIKSE HUUR VAN HUISE—EEN TOT TIEN KAMERS, ALLEENLIK VAN BAKSTEEN, KLIP, BAKSTEEN EN KLIP, OF KONKREET GEBOU—BLANKE (BEWONERS) AGTIEN VERNAAMSTE STEDELIKE GEBIEDE (MET INBEGRIEP VAN VOORSTEDEN)—1936.

9. **Nie-blankes.**—Dit is die eerste keer dat besonderhede omtrent die huurgelde van private wonings van nie-blankes volledig getabelleer en gepubliseer is. In 1921 is besonderhede op die huishoudersvorme aangevra, soos in die geval van blankes, dog die resultate was nie heeltemal bevredigend nie en baie min kon gepubliseer word.

Hoewel in die geval van blankes die geboue met van drie tot ses kamers in die meerderheid is, bewoon die nie-blankes 'n groter proporsie van kleiner huise. Om hierdie rede is die basis van tabellering verander, en gee die tabelle ten opsigte van Asiate en naturelle die huur van wonings met van een tot vier kamers, en in die geval van die kleurlingbevolking, dié met van een tot vyf kamers.

Daar was betreklik min private wonings buitekant hierdie reeks, en dit is nie van genoeg belang beskou om besonderhede omtrent hulle te publiseer nie.

In die tabel hieronder word die gemiddelde maandelikse huurgelde vir huise met van een tot vier kamers bewoon deur die Asiate-, kleurling- en naturellebevolking, onderskeidelik, vir seker van die grootste stede opgegee.

Die tabel het alleen betrekking op huise waarvan die buitewand van baksteen, baksteen en klip, klip of konkreet is.

Hieruit sal blyk dat in elke geval die Asiate die hoogste huur betaal en die naturelle die laagste.

10. **Huur ; Indeks-syfers.**—Onderstaande tabel toon die indeks-syfers ten opsigte van die bewegings van die huurgelde van private wonings deur blankes bewoon, tydens die sensusse van 1926, 1931 en 1936, as ook vir seker tussenjare toe huursensusse opgeneem is. Die basissyfer 1000 stel die gemiddelde huur in die nege groot stedelike sentrums in die jaar 1910 voor. Vir die doeleindes van

hierdie berekening is alleenlik gehuurde private wonings met van drie tot ses kamers gebruik, aangesien hulle die soorte huise is wat in die Unie in die meerderheid is. Dit sal gesien word dat, hoewel daar tussen die sensusjare 1931 en 1936 'n daling in die huurpeil was, daar sedert laasgenoemde jaar in alle sentrums 'n gestadige styging was.

INDEKSSYFERS VAN HUURGELDE VAN HUISE IN NEGE VERNAAMSTE STEDELIKE SENTRUMS DEUR BLANKES BEWOON.

Basis : Gemiddelde van Nege Stedelike Sentrums in 1910 = 1000.

11. **Grafieke van Wonings.**—Grafiek No. 1 toon die getal private wonings volgens die getal kamers. Verreweg die grootste aantal private wonings is dié van vier kamers.

Grafiek No. 2 toon die getal inwoners in private wonings volgens die getal kamers. Soos te verwagte was, is hierdie grafiek byna dieselfde as grafiek No. 1; die aantal persone wat huise van vier kamers bewoon, is ook in die meerderheid.

Grafiek No. 3 het twee krommes. Die een toon die gemiddelde betal bewoners per woning, en die ander die gemiddelde getal per kamer. Die skaal aan die linkerkant van die grafiek sien op die onafgebroke kromme, en dié aan die regterkant op die gebroke kromme. Uit hierdie grafiek sal dit blyk dat die grootste gemid-

delde getal bewoners per woning net onder 8 was, in huise van sewentien kamers; en die grootste gemiddelde getal per kamer iets oor die 2.6, in huise van een kamer.

Grafieke Nos. 4, 5 en 6 toon die gemiddelde maandelikse huur van private wonings in seker groot stede. Die hoogste gemiddelde wat betaal is, was vir huise van tien kamers in Johannesburg met 'n huur van iets oor die £12.25 per maand.

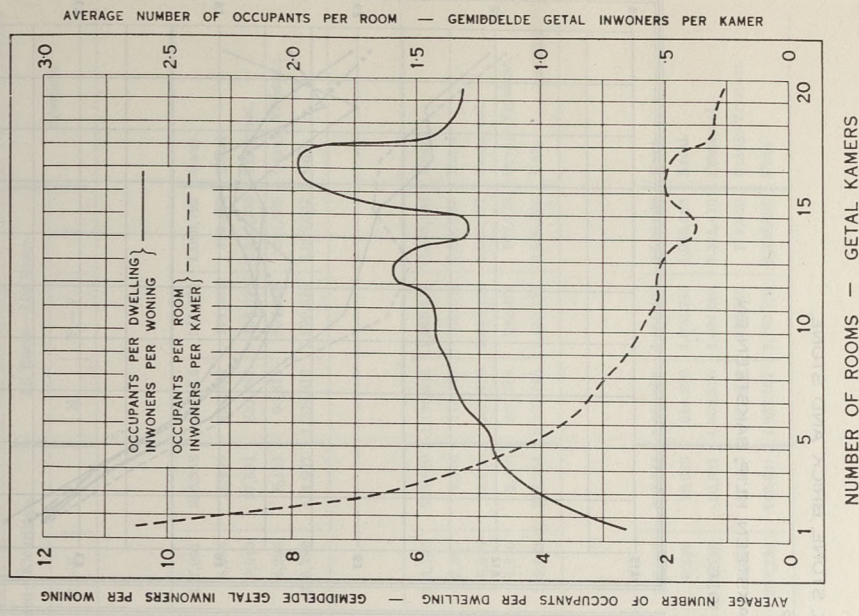

E. P. PEARCE,
Waarnemende Direkteur.

Kantoor van Sensus en Statistiek,
Pretoria,
Junie 1939.
