

Table 4. Large urban concentrations. In this table the urban population of the Witwatersrand and the Orange Free State gold fields is shown. Moreover, the metropolitan areas are broken down into their constituent parts. A metropolitan area comprises the parent municipality or municipalities in addition to the surrounding built-up area or areas most of which are separately identified. It should be noted that a metropolitan area or town may extend over more than one magisterial district. So, for instance, the metropolitan area of Cape Town ("Greater Cape Town") lies within the districts of the Cape, Bellville, Wynberg and Simonstown.

Table 5. Large urban areas by order of size. The areas shown are those with a total population of 20,000 persons and over.

Part II. South West Africa.

Table 6 shows the population of South West Africa according to magisterial districts and towns. From 1951 to 1960, the total population increased from 434,000 to 520,000 persons, or an increase of nearly 21 per cent. The number of white persons increased from roughly 49,900 in 1951, to 73,200 in 1960, or about 46 per cent. Practically all of this increase is confined to urban areas. The Coloured population increased from roughly 17,300 to 23,900, an increase of 39 per cent and the Bantu population from 366,900 to 428,000, an increase of 18 per cent. In 1960, only two and in 1951, only four Asiatics were recorded.

7. It should again be noted that all figures are subject to revision, and although it is expected that the figures in table 1 should closely approximate the final figures, those in subsequent tables are subject to relatively greater adjustments.
