Dear Lady Emmott,

I have received and read with much interest the Report of the Departmental Committee on the export of horses to the Continent.

The enquiry has evidently been a thorough one and I am most grateful to you for the time which you have so freely given to the work of the Committee.

It is to be hoped that as a result of the enquiry which the Committee has made, the public will be more accurately informed in the future of the facts of the traffic in the export of horses.

Yours very truly,

The Lady Emmott, J.P.,
