Dear Madam.

I have been reading "Political Economy for beginners" 10th edition.

On page 87 4th line from the end surely 50% should read

$33\frac{1}{3}\%$. If 15 boxes were sold

at a reduction of 50% they would

only fetch as much as $7\frac{1}{2}$ boxes

used to fetch.

Yours faithfully

R.W.A. Wallace apt.
