23rd Nov. 92

My dear Pippa

You will be glad to hear that the last well curb was put in on Monday. The well curb is the thing at the bottom of the well which is sunk into the river bed and on top of which the pier is built as per annexed diagram.

The curb is put on the sand and the well is built (of bricks) on it.

Then the inside is dug out and it sinks down till

building it up as it goes down.
it is deep enough, then its
inside is filled up again with
concrete and the pier is built
up on the top of it. I tell you
this for two reasons. (1) ~~So~~ So that
you may know how it is done in
case you should ever be cast
upon a desert island and want
to build a bridge. (2) To fill
up this letter. The only excite-
ment of this week was a shikar
expedition Mylne & I went for
on Sunday. We rode out to
a dāk bungalow about 8 miles
away on Saturday night and
returned on Sunday afternoon
with the large bag of 2 snipe,

and 1 green pigeon - Below is the
complete score

Name of Sportsman	Shots	ho. of	ho. of	Remarks
	Fired	Hits	misses	
W. H. Mylne	6	3	1	2 miss fires
R. Strachey	1	0	1	D

There is simply nothing else
to write about which is per-
haps as well if what I have
already written is a sample
of what if there were anything
it would be like. Perhaps dis-
entangling this sentence will
keep you employed till next
week -

Goodbye till then
y^r loving
Ralph
