STANDARD INDUSTRIAL CLASSIFICATION

Introduction

A Standard Industrial Classification was first issued in 1948 to promote uniformity and comparability in official statistics of the United Kingdom, and in 1958 a revised edition was published incorporating a number of changes, although the main framework of the Classification was retained. Since then there have been changes in the organisation and relative importance of a number of industries which have made further revisions to the classification desirable. This new edition of the Standard Industrial Classification has again been prepared by an Inter-departmental Committee on which the principal departments collecting statistics have been represented. The Committee wishes to acknowledge the help received from trade organisations and individual experts familiar with different industries.

2. The International Standard Industrial Classification of all Economic Activities issued by the United Nations, which has recently been revised, has been taken into account in the preparation and revision of the Standard Industrial Classification for the United Kingdom and the same general principles have been followed.

The basis of classification

3. The Classification is based on industries and not on occupations. All persons (including administrative, technical, clerical and ancillary staffs) employed in a 'unit' of industry are included, irrespective of their occupations, in the figures of employment for the industry to which the 'unit' is classified. The classification is also based on industries without regard to who owns or operates them. Thus manufacturing 'units' owned or operated by the Central Government are classified in the same way as those in private hands and are not included under 'National Government Service'. Similarly the transport services operated by local authorities are included under 'Transport' and not under 'Local Government Service'.

4. The Classification has been prepared to conform with the organisation and structure of industry and trade as it exists within the United Kingdom. All relevant factors such as the commodity produced or service given, the raw materials used and the nature of the process or the work done, have been taken into consideration.

5. The Classification is arranged in a list of industry headings which show the minimum detail in which statistics by industry will normally be provided, and which are therefore called Minimum List Headings. The Headings of related industries are grouped into Orders.

Classification of establishments

6. For the purpose of this classification the unit taken is the 'establishment'. An establishment is the smallest unit which can provide the information normally required for an economic census, for example, employment, expenses, turnover, capital formation. Usually the principal activities carried

on in an establishment fall within a single heading of the Classification (e.g. steel making or sugar refining). Typically the establishment embraces all the activities carried on at a single address, e.g. a farm, a mine or a factory, including those which are ancillary to the principal activities.

7. Frequently, distinct activities characteristic of different industries are carried on at one address, e.g. cotton weaving and the making up of household textiles, but normally these are not classified separately, and the whole establishment is classified according to the main activity. If, however, the required range of data can be provided for each activity, each is taken to constitute a separate establishment.

8. Sometimes activities which are conducted as a single business are carried on at a number of addresses. Where this is so businesses are asked to provide the full range of separate information in respect of each address, whether or not the activities are different. Their activities may however be integrated to such an extent that they constitute a single establishment. In that case, the establishment is defined to cover the combined activities at these addresses, which in the case of manufacturing establishments would normally be in close proximity. For some subjects, however, e.g. employment, separate data will be available for each address. In such circumstances each address will be identified as a 'local unit' and can be classified in either of the following ways according to the purpose for which statistical data are needed, viz. (a) to the classification of the establishment of which it is part or (b) to the classification appropriate to its own major activity. As appropriate, statistics will be prepared on either or both bases of classification.

9. Activities which are ancillary to the main activities of a business are most frequently transport, wholesale or retail distribution, construction, power generation, and research and development. The classification of these ancillary units, other than separate offices, is determined according to the circumstances, as follows:

- (a) If a full range of information can be provided they are counted as separate establishments and classified according to their own activities.
- (b) Where a full range of information cannot be provided the establishment within which they are integrated is defined to include them. Where they are carried on at a separate address, they are, however, separately identified as local units classified in accordance with the principle outlined in paragraph 8. Separately obtainable particulars for them, e.g. of employment, may be required for purposes of geographical analysis.

10. A number of businesses have Head Offices or other Central Offices at separate locations from those of the establishments at which the main activities of the business are carried out. These separate offices present a special problem, since they do not have any measurable output of their own but contribute to that of the establishment(s) which they serve. The treatment of these offices is described below.

Central offices of businesses operating in the United Kingdom are classified as follows:

- (1) If all or most of the activities of the establishments served by the office are appropriate to a single Heading, the office is treated as a local unit of an establishment classified in that Heading.
- (2) If all or most of the activities of the establishments served by the office are appropriate to a single Order the office is treated as a local unit of an establishment classified in the Heading within that Order appropriate to the largest part of these activities.
- (3) If neither (1) nor (2) above applies, the office is treated as an independent establishment and classified in Heading 866.

Any activities of branches or subsidiary companies operating overseas, with which part of the business of a central office is concerned, are regarded as falling outside the Order(s) appropriate to the home activities of the business but are taken into account in applying the foregoing rules to the office.

The United Kingdom offices of businesses operating mainly abroad are classified in Heading 866.

11. Some special points should be mentioned:

- (a) *Merchanting activities.* Establishments mainly engaged in merchanting, broking, importing and exporting are classified in the distributive trades, and not in the industry or trade producing the goods in which they deal.
- (b) *Repair work.* Most kinds of repair work are associated with activities which are classified either to manufacturing or to distribution and in these cases the underlying principle of classification is that where the bulk of the repair work on goods of any particular type is carried out by manufacturers, any establishments specialising in the repair of these goods are classified to manufacturing. Where, however, most of the repairs are carried out at establishments whose main business is distribution the specialist repair establishments are also classified to distribution.

Thus establishments repairing radio and television sets, watches and clocks, furniture, etc. are classified to the distributive trades. Establishments engaged in the repair of ships, locomotives, aircraft, and most kinds of plant and machinery are classified to manufacturing industry.

In a few cases repair work is not classified to either manufacturing or distribution. Establishments engaged in the repair and maintenance of buildings are included in Construction. The activities of motor repairing and boot and shoe repairing, which are regarded as services, are sufficiently extensive and distinct to be treated as industries in themselves although particular establishments may engage to some extent in manufacturing or distributive activities. Provision is made for these two kinds of repair work in Miscellaneous Services.

- (c) *Installation work.* The installation of machinery equipment, etc. is an activity which is normally carried out by an establishment having a different major activity, which decides its industrial classification.

Where, however, installation is the only, or major, activity of a separate establishment or department for which the full range of data can be provided, it should be classified to an appropriate Heading in the following Orders, according to the kind of service provided:

Construction. The installation of items or equipment which can be regarded as forming an integral part of the building e.g. an electrical wiring system, heating and ventilating equipment.

Distribution. The installation of items which require little more than the connection of the equipment to the mains e.g. domestic washing machines, television sets.

Manufacturing. The installation of plant and machinery e.g. a computer, a telephone exchange system.

Description of the Classification

12. The Standard Classification which is given in detail in the following pages consists of 181 Minimum List Headings which are distinguished by arabic numerals. These Minimum List Headings have been grouped into 27 Orders which are distinguished by roman numerals. Gaps in the sequences of numbering the Headings with each Order have been left to permit additions to the Minimum List which may be necessary at a later date. Optional sub-divisions of many items in the Minimum List are given. They are suggested for use where a more detailed classification is required.

13. The numbers of the Minimum List Headings are given on the left-hand side of each page. The notation constitutes a code suitable for identifying Orders and certain other groupings (see Appendix).

14. A brief description of the main industries or services included is given below the title of each heading or sub-division. It should be noted that these descriptions refer to the classification of 'establishments' as defined in paragraphs 6-10. The establishments classified under any particular heading will not necessarily account for the whole of the output of the products or services listed under that heading. On the other hand, they may produce some goods or services which are mainly produced by establishments classified under other headings.

15. An Alphabetical List of Industries which constitutes an index for use in conjunction with the Standard Industrial Classification will be published shortly as a companion volume.

ORDER VI—METAL MANUFACTURE

311	Iron and steel (general)	13
312	Steel tubes	13
313	Iron castings, etc.	13
321	Aluminium and aluminium alloys	13
322	Copper, brass and other copper alloys	14
323	Other base metals	14

ORDER VII—MECHANICAL ENGINEERING

331	Agricultural machinery (except tractors)	14
332	Metal-working machine tools	14
333	Pumps, valves and compressors	15
334	Industrial engines	15
335	Textile machinery and accessories	15
336	Construction and earth-moving equipment	15
337	Mechanical handling equipment	15
338	Office machinery	16
339	Other machinery	16
341	Industrial (including process) plant and steelwork	17
342	Ordnance and small arms	17
349	Other mechanical engineering not elsewhere specified	18

ORDER VIII—INSTRUMENT ENGINEERING

351	Photographic and document copying equipment	18
352	Watches and clocks	18
353	Surgical instruments and appliances	18
354	Scientific and industrial instruments and systems	18

ORDER IX—ELECTRICAL ENGINEERING

361	Electrical machinery	19
362	Insulated wires and cables	19
363	Telegraph and telephone apparatus and equipment	19
364	Radio and electronic components	19
365	Broadcast receiving and sound reproducing equipment	19

ORDER XI—VEHICLES

380	Wheeled tractor manufacturing	21
381	Motor vehicle manufacturing	21
382	Motor cycle, tricycle and pedal cycle manufacturing	21
383	Aerospace equipment manufacturing and repairing	21
384	Locomotives and railway track equipment	22
385	Railway carriages and wagons and trams	22

ORDER XII—METAL GOODS NOT ELSEWHERE SPECIFIED

390	Engineers' small tools and gauges	22
391	Hand tools and implements	22
392	Cutlery, spoons, forks and plated tableware, etc.	22
393	Bolts, nuts, screws, rivets, etc.	22
394	Wire and wire manufactures	23
395	Cans and metal boxes	23
396	Jewellery and precious metals	23
399	Metal industries not elsewhere specified	23

ORDER XIII—TEXTILES

411	Production of man-made fibres	24
412	Spinning and doubling on the cotton and flax systems	24
413	Weaving of cotton, linen and man-made fibres	24
414	Woollen and worsted	24
415	Jute	25
416	Rope, twine and net	25
417	Hosiery and other knitted goods	25
418	Lace	25
419	Carpets	25
421	Narrow fabrics (not more than 30 cm. wide)	25
422	Made-up textiles	26
423	Textile finishing	26
429	Other textile industries	26

ORDER XIV—LEATHER, LEATHER GOODS AND FUR		
323 431	Leather (tanning and dressing) and fellmongery	26
432	Leather goods	26
433	Fur	26

ORDER XV—CLOTHING AND FOOTWEAR

322 441	Weatherproof outerwear	27
442	Men's and boys' tailored outerwear	27
443	Women's and girls' tailored outerwear	27
444	Overalls and men's shirts, underwear, etc.	27
445	Dresses, lingerie, infants' wear, etc.	27
446	Hats, caps and millinery	27
449	Dress industries not elsewhere specified	27
324 450	Footwear	28

ORDER XVI—BRICKS, POTTERY, GLASS, CEMENT, ETC.

361 461	Bricks, fireclay and refractory goods	28
462	Pottery	28
362 463	Glass	28
464	Cement	29
469	Abrasives and building materials, etc. not elsewhere specified	29

ORDER XVII—TIMBER, FURNITURE, ETC.

331 471	Timber	29
472	Furniture and upholstery	29
473	Bedding, etc.	29
474	Shop and office fitting	29
475	Wooden containers and baskets	30
479	Miscellaneous wood and cork manufactures	30

ORDER XVIII—PAPER, PRINTING AND PUBLISHING

341 481	Paper and board	30
482	Packaging products of paper, board and associated materials	30
483	Manufactured stationery	30
484	Manufactures of paper and board not elsewhere specified	30
485	Printing, publishing of newspapers	31
486	Printing, publishing of periodicals	31
489	Other printing, publishing, bookbinding, engraving, etc.	31

893 Dry cleaning, job dyeing, carpet beating, etc.	41
894 Motor repairers, distributors, garages and filling stations.	41
895 Repair of boots and shoes	41
899 Other services	41

ORDER XXVII—PUBLIC ADMINISTRATION AND DEFENCE	
901 National government service	42
906 Local government service	42

ORDER I—AGRICULTURE, FORESTRY, FISHING

Minimum
List
Heading

001 Agriculture and Horticulture

1. Farming and stock-rearing

All types of agricultural holdings, including those of 1 acre or less, except market gardens and holdings used mainly for the production of fruit, flowers or seeds.

2. Agricultural contracting

Services such as ploughing, ditching, field draining, hedging, crop spraying (including aerial spraying), harvesting (including pea vining), grain drying and dressing, or threshing performed for farmers on a contract basis. Thatching and the destruction of rabbits and other vermin are included.

3. Market gardening, fruit, flower and seed growing

Agricultural holdings including those of 1 acre or less, used mainly for the production of vegetables, fruit, flowers or seeds (other than seed potatoes and grass and cereal seeds, which are included in 'farming and stock-rearing'). Nursery gardens producing plants, fruit trees, ornamental trees and shrubs, etc. are included.

002 Forestry

Planting, replanting and maintenance of woodlands and forests; tree felling (except tree felling carried out by sawmilling establishments which is classified in Heading 471); gathering of uncultivated vegetable products such as ferns, furze, moss, reeds, etc. from forests and elsewhere.

003 Fishing

1. Sea fishing

Sea fishing by net or line; fishing for oysters, lobsters, crabs and other shellfish. The whaling industry is included.

2. Fishing in inland waters

Fishing in rivers, lakes and canals and the operation of fish farms and hatcheries.

ORDER II—MINING AND QUARRYING

Note: In addition to the actual mining or quarrying, the various Headings and sub-divisions of this Order include cleaning, washing, grading, and similar ancillary operations. Processing activities carried on at the site of the mine or quarry should if possible be identified and classified separately, but if they cannot be separately identified the whole establishment should be classified as follows:

(a) To a Heading in Order II where the further activities do not substantially alter the nature of the material e.g. the production of salt, roofing slates, road stones (including coated roadstones).

(b) To a Heading in Order VI or XVI where the further activities substantially alter the nature of the material e.g. iron works, brick works, cement works.

101 Coal Mining

Extracting coal from deep mines and quarries. Extracting coal from opencast workings is classified in Heading 500.

AMENDMENT LIST 1

Page 8 Minimum List Heading **104 Petroleum and Natural Gas**

Delete existing details and **Insert** the following:

Exploration for and extraction of petroleum on land and offshore; 'petroleum' in this context includes mineral oil, natural gas and natural gas condensates. The Heading includes the activities of holders of petroleum exploration and production licences. Also included are the activities of licensees' contractors and agents providing services unique to this industry and not allocable to any other Heading in the classification, e.g. well drilling, seismic surveying specifically for petroleum deposits and offshore pipelaying. (The provision of other services, e.g. manufacturing, repairing, catering, transport, procurement or hiring should be included in the appropriate Headings elsewhere in the classification.)

Mining and retorting of oil shale are included under this heading. Also included is the operation of land terminals for stabilisation, separation and storage, and of offshore or land pipelines between well-head and terminal. Other land pipelines are classified to Heading 262 if feeding a refinery, Heading 601 if part of the distribution of gas or Heading 811 if part of the distribution of fuel.

ORDER II—(continued)

Minimum
List
Heading

102 Stone and Slate Quarrying and Mining

1. Stone quarrying and mining

Extracting granite, limestone, marble, sandstone, etc. from mines, pits or quarries.

2. Slate quarrying and mining

103 Chalk, Clay, Sand and Gravel Extraction

104 Petroleum and Natural Gas

Exploration (including boring) for and extracting petroleum on land and off-shore, mining oil shale (including oil shale retorting). Petroleum includes natural gas and natural gas condensates. Producers' off-shore pipe lines are included but not land pipe line terminals owned by associated companies or the Gas Council which are classified in Headings 262, 601 or 811 as appropriate.

109 Other Mining and Quarrying

1. Iron ore mining and quarrying

Mining or quarrying iron ore, ironstone and bog ore.

2. Other metalliferous mining and quarrying

Mining or quarrying bauxite, copper, gold, lead, silver, zinc and other non-ferrous metals or metalliferous ores.

3. Salt mines, brine pits, salt works

Extracting and refining salt (at mine or pit). Processing, packing, etc. salt at separate establishments is classified in Heading 229.

4. Other non-metalliferous mining and quarrying

Mining or quarrying alum, barytes, graphite, gypsum, fluorspar, etc. Ores and compounds with a metallic content but which are not normally used for the production of metal, e.g. iron pyrites, are included in this subdivision and not in iron ore or other metalliferous mining.

ORDER III—FOOD, DRINK AND TOBACCO

211 Grain Milling

1. Wheat milling

Milling wheat including the production of wheat offal. The production of self-raising and patent flour at milling establishments is included.

2. Other

Milling, flaking or rolling barley, oats, rye, rice, etc., the production of grain offal, splitting or grinding peas, beans, lentils, soya beans, sago, tapioca, or manufacturing ready-to-eat breakfast cereals such as cornflakes, puffed or shredded wheat.

212 Bread and Flour Confectionery

Making bread, cakes, pastries, pies (other than meat pies), puddings (other than meat or canned puddings), etc. Production at small bakehouses attached to bakers' shops is classified in Heading 820. (Small bakehouses are those with fewer than 25 employees.)

213 Biscuits

Making biscuits, rusks, shortbread, crispbread, cereal fillers (sausage meal), etc.

ORDER III—(continued)

Minimum
List
Heading

214 Bacon Curing, Meat and Fish Products

1. Quick freezing meat and fish products

Quick freezing meat and meat products including poultry, and fish and fish products.

2. Other processing and preserving of meat and fish

Curing bacon and ham, canning and otherwise preserving meat, poultry and fish (other than by quick freezing), preparation of oven ready poultry, and making sausages, meat pasties, pies and puddings, meat extracts and essences and meat and fish pastes. Production at distributive establishments is excluded.

215 Milk and Milk Products

1. Heat treatment of milk

Pasteurizing etc., and homogenizing liquid milk for wholesale and retail distribution. The wholesale and retail distribution of milk are classified in Order XXIII.

2. Butter, cheese, etc.

Making butter, cheese, condensed, evaporated and dried milk, etc., including fresh and preserved cream and infant and invalid foods with a milk base.

3. Ice cream

216 Sugar

Manufacturing or refining sugar, syrup and treacle, molasses and invert sugar.

217 Cocoa, Chocolate and Sugar Confectionery

1. Cocoa and chocolate

Manufacturing cocoa powder, drinking chocolate and chocolate confectionery of all kinds. Cocoa butter is included.

2. Sugar confectionery

Manufacturing boiled sweets, toffee, caramels, marzipan, liquorice, chewing gum and all other types of sweets.

218 Fruit and Vegetable Products

1. Jam, marmalade, jellies, etc.

Manufacturing jam, marmalade, mincemeat, jellies, fruit curd, fruit pulp, crystallized fruit and candied peel, and honey processing.

2. Quick freezing fruit and vegetables

3. Other fruit and vegetable products

Preserving fruit and vegetables by canning, bottling, pickling, drying (except field drying), dehydrating; processing fruit and vegetables by heat treatment. Manufacturing potato crisps, pickles, sauces and other relishes, salad cream, vinegar, soups and homogenized baby foods. The canning of spaghetti, etc. is included.

219 Animal and Poultry Foods

Manufacturing or compounding animal and poultry food, bird and pet foods. The production of grain offals is classified in Heading 211, and of oilseed cakes and meals in Heading 221; the manufacturing of animal and poultry medicines, condiments and spices is classified in Heading 272.

ORDER III—(continued)

Minimum
List
Heading

221 Vegetable and Animal Oils and Fats

The production of crude oil from oilseeds, nuts or fish; the refining and hydrogenation (hardening) of vegetable and marine oils, including olive oil, whale oil and fish liver oils and the manufacture of dripping, suet, tallow, premier-jus, oleo-stearine and other animal oils and greases. The production of oilseed cakes and meals is included.

229 Food Industries not elsewhere specified

1. Margarine

Manufacturing margarine and compound cooking fats.

2. Starch and miscellaneous foods

Manufacturing starch, starch products and ice, and all foods not elsewhere specified such as cornflour, glucose, blancmange and custard powders, cake mixtures, macaroni, etc., yeast, coffee extracts and essences, and mustard. Blending flour, grinding pepper and spices, shelling and grinding nuts, tea blending, coffee roasting and blending, etc. are included, but the canning of spaghetti, etc. is classified in Heading 218.

231 Brewing and Malting

Brewing beer; malting barley.

232 Soft Drinks

Manufacturing aerated waters, fruit squashes and cordials, fruit and vegetable juices, ginger beer and other soft drinks. Soft drinks in powder or crystallized form are included.

239 Other Drink Industries

1. Spirit distilling and compounding

Distilling gin, whisky and other potable spirits. Blending is included. Distilling industrial alcohol and methylating spirits are classified in Heading 271.

2. British wines, cider and perry

240 Tobacco

Manufacturing tobacco, cigars, cigarettes and snuff.

ORDER IV—COAL AND PETROLEUM PRODUCTS

261 Coke Ovens and Manufactured Fuel

1. Coke, excluding low temperature coke

Coke ovens producing hard coke and associated by-products. Coke ovens forming part of the gas industry are classified in Heading 601.

2. Low temperature coke

Plants producing low temperature coke and other manufactured solid fuels (except gas coke and hard coke) whether carbonised or not.

262 Mineral Oil Refining

Refining petroleum or shale oil, and production of medicinal paraffin, paraffin wax, petroleum jelly, etc.

263 Lubricating Oils and Greases

Blending mineral, animal or vegetable lubricating oils and greases. Blending at refineries is classified in Heading 262.

ORDER V—CHEMICALS AND ALLIED INDUSTRIES

Minimum
List
Heading

271 General Chemicals

1. Inorganic chemicals (including inorganic gases)

Manufacturing chemical elements (including carbon) and compounds excluding those containing carbon (except for certain simple compounds such as calcium carbide, carbon disulphide and carbon dioxide). Prepared inorganic pigments are classified in Heading 277 and fertilizers in Heading 278. Radio-active inorganic elements, compounds and isotopes, mixtures of chemicals, and certain compounds used mainly for specific end-uses (such as hydro-sulphites and hypochlorites), are classified in Sub-division 3 of this Heading.

2. Organic chemicals (including organic gases)

Manufacturing separate chemically defined organic compounds (i.e. compounds containing carbon, but excluding condensates, polymers and copolymers, elemental carbon, and certain simple carbon compounds such as calcium carbide, carbon disulphide and carbon dioxide). Products of tar distillation and benzole refining are included. Radio-active organic compounds and isotopes, mixtures of chemicals, and certain compounds used mainly for specific end-uses (such as simple phosphate or phthalate plasticiser chemicals) are classified in Sub-division 3 of this Heading; organic pharmaceutical chemicals and prepared products derived from organic chemicals, such as dyestuffs, pesticide preparations and pharmaceutical preparations are classified in other Headings of this Order.

3. Other chemicals

Manufacturing chemical mixtures, excluding chemical compounds containing impurities, or to which water, solvents or stabilisers have been added solely for reasons of safety, transport or preservation. Certain organic or inorganic compounds used mainly for specific end-uses (such as hydro-sulphites, hypochlorites, simple phosphate or phthalate plasticiser chemicals), nuclear fuels, and radio-active elements, compounds and isotopes are included. Pharmaceutical chemicals and preparations are classified in Heading 272, dyestuffs in Heading 277, and pesticides in Heading 279.

272 Pharmaceutical Chemicals and Preparations

Manufacturing products for therapeutic and prophylactic use (including veterinary) and chemicals for compounding into such products, including the same chemicals when used subsequently as additives to foods and drinks.

273 Toilet Preparations

Manufacturing cosmetics, hair dressings, bath salts, shampoos, tooth pastes and powders, perfumes, etc.

274 Paint

Manufacturing paint, varnish, enamel, distemper, wood stain, french polish, white lead (in paste form) and artists' colours. Cement based paint is classified in Heading 464.

275 Soap and Detergents

Manufacturing soaps, soap powder, soap flakes, shaving soap or cream, soapless detergents, scouring preparations, primary products of sperm oil (including higher fatty alcohols), stearine, glycerine, candles, night-lights and tapers; fat splitting and distillation.

276 Synthetic Resins and Plastics Materials and Synthetic Rubber

1. Synthetic resins and plastics materials

Manufacturing synthetic resins and plastics materials in the form of solid and liquid resins, latices, solutions, dispersions and emulsions, moulding and extrusion compounds, foam, non-decorative sheet, laminated sheet (including decorative), film, rods and tubes and profile shapes. Glass fibre sheet

Order V—(continued)

276 Synthetic Resins and Plastics Materials and Synthetic Rubber— (continued)

and transparent regenerated cellulose film are included. Unformulated synthetic resin adhesives are included, but formulated synthetic resin adhesives (i.e. containing additives such as solvents, plasticisers etc.) are classified in Heading 279. The production of textile fibres from plastics materials is classified in Heading 411. Plastics mouldings, castings or extrusions produced from these synthetic resins and plastics materials and articles cut from plastics sheet are classified in Heading 496. Plastics floor-coverings and decorative plastics sheet (excluding laminated thermosetting sheet) are classified in Heading 492.

2. Synthetic rubber

The manufacture of synthetic rubber. Reclaimed rubber and rubber goods are classified in Heading 491.

277 Dyestuffs and Pigments

Manufacturing synthetic dyestuffs, including dyestuffs intermediates, vegetable dyes and tanning extracts, pigment dyestuffs and lakes and inorganic pigment colours. Confectioners' colours are classified in Heading 271.

278 Fertilizers

Manufacturing or compounding artificial fertilizers.

279 Other Chemical Industries

1. Polishes

Manufacturing wax and other polishes of all types (except french polish which is classified in Heading 274) for leather, wood or metal. Impregnated polishing cloths and sponges are included.

2. Formulated adhesives, gelatine, etc.

Manufacturing formulated synthetic resin adhesives (i.e. containing solvents, plasticisers etc.); unformulated synthetic resin adhesives are classified in Heading 276. Rubber adhesives are included. Manufacturing gelatine, glue, size, gum, paste etc. including preliminary processes such as scraping and crushing of bones, and grinding gums and natural resins.

3. Explosives and fireworks

Manufacturing explosives, detonators, fuses (not shell fuses), percussion caps, flares, signal rockets, etc. Manufacturing fireworks and matches, and live ammunition. Filling bombs, cartridges, shells, etc. Establishments making live military ammunition which also make the cases for it are classified in Heading 342.

4. Formulated pesticides, etc.

Manufacturing formulated pesticides, sheep dips, weedkillers and other phytosanitary products; fertilizers are classified in Heading 278. Manufacturing disinfectants, excluding antiseptics which are classified in Heading 272.

5. Printing ink

Manufacturing printing ink and printers' rollers.

6. Surgical bandages, etc.

Manufacturing surgical dressings, plasters and bandages whether medicated or not, surgical sutures and sanitary towels.

7. Photographic chemical materials

Manufacturing sensitized photographic film and plate and photographic processing chemicals. Unsensitized photographic film is classified in Heading 276.

ORDER VI—METAL MANUFACTURE

Minimum
List
Heading

Note: This Order includes smelting, refining and alloying (including steel melting); rolling and drawing; and the production of castings, forgings, and other basic forms of ferrous and non-ferrous metals. Drop forging of iron and steel, wire drawing and further processing and fabrication are excluded. The production of precious metals is classified in Order XII.

311 Iron and Steel (General)

1. Wrought Iron

Wrought iron works, including puddling furnaces.

2. Steel

Blast furnaces (including ore preparation plants) producing pig iron (in integrated steel works), ferro-manganese or spiegeleisen. Making alloy or carbon steel in furnaces or converters; rolling (including re-rolling and cold rolling) steel into semi-finished or finished forms, and the production of castings in steel foundries. The production of railway and tramway tyres, wheels and axles, points, switches and crossings, colliery arches and bright bars and heavy forgings is included, as also is the production of steel plates and sheets (including coated and corrugated sheets) in cut lengths or coils, and of tinplate, terneplate and blackplate, as well as semi-finished material for conversion into tubes and wire. The production of tubes and wire is classified in Headings 312 and 394 respectively. Drop forgings, drop stampings and hot pressings are classified in Heading 399.

312 Steel Tubes

Manufacturing all types of steel tube and pipe, and fittings therefor, including conduits, gas cylinders and flexible tubes. Blast furnaces (including ore preparation plants) producing pig iron at integrated tube works are included.

313 Iron Castings, etc.

1. Pig iron

Blast furnaces (including ore preparation plants) producing pig iron other than those in integrated steel or tube works.

2. Refined pig iron

Re-melting pig iron with scrap iron to produce special qualities of foundry iron.

3. Engineers' castings

Foundries producing iron castings (including malleable iron castings), whether machined or not, for all types of engineering products including vehicles.

4. Other iron castings

Foundries producing all other types of cast iron goods including pipes and gutters, baths, manhole covers, stoves, grates and ranges, hot water boilers and radiators cast in sections, ingot moulds and bottoms, pillar boxes, and cast iron fittings for the furniture trade.

321 Aluminium and Aluminium Alloys

Manufacturing aluminium and its alloys in the form of ingots, bars, billets, sheets, strip, sections, pipes, tubes, castings, extrusions, drop forgings, etc., including all preliminary processes from smelting and refining onwards. The treatment of bauxite other than in aluminium works is classified in Heading 469.

Order VI—(continued)

Minimum
List
Heading

322 Copper, Brass and Other Copper Alloys

Refining copper and making copper alloys (brass, bronze etc.). The production in copper and its alloys of ingots, bars, billets, sheets, strip, foil, circles, sections, rods, pipes, tubes etc., and of die castings. The production of engineers' castings, stampings and pressings is included but wire drawing and the production of finished goods such as hollow-ware are excluded.

323 Other Base Metals

Smelting and refining lead, zinc, magnesium and titanium and manufacturing their alloys. The production in these metals and alloys of ingots, bars, billets, sheets, strip, foil, circles, sections, rods, pipes, tubes etc., and of die castings. Wire drawing and the production of finished goods such as hollow-ware are excluded.

Manufacturing ferro-chrome, ferro-molybdenum, ferro-silicon, ferro-tungsten, etc., otherwise than in blast furnaces.

Smelting, refining, melting non-ferrous metals not elsewhere specified.

ORDER VII—MECHANICAL ENGINEERING

Note: Establishments specialising in the production of parts for a particular type of machinery included in this Order are classified to the same Heading as manufactures of such machinery unless such parts are specifically classified elsewhere. See also the definition of Heading 349, Sub-division 3.

331 Agricultural Machinery (except tractors)

Manufacturing agricultural machinery and implements (including self-propelled agricultural machinery) such as ploughs, harrows, combine harvesters, elevators, etc. Milking machines are included but dairy machinery and appliances are classified in Heading 339, Sub-division 7. Tractors and hand tools such as spades are classified in Headings 380 and 391 respectively. Specialist repairers of agricultural machinery are classified in Heading 832.

332 Metal-working Machine Tools

Note: Rolling mills and portable power tools are excluded from this Heading and classified in Heading 339; metal manufacturing plant is classified in Heading 341.

1. Metal-cutting machine tools

Manufacturing metal-cutting machine tools, including boring, drilling, grinding and milling machines; lathes and other turning machines; machining centres.

2. Metal-forming machine tools

Manufacturing metal-forming machine tools, including forging machines and hammers, extrusion and other presses, wire-drawing machines and sheet metal working machines.

3. Welding and flame-cutting equipment

Manufacturing all types of electric and gas welding machinery and equipment, and flame-cutting machines. Welding electrodes and rods are included.

4. Other physio-chemical process cutting and forming machines

Manufacture of equipment for high energy rate forming, electrochemical machinery, ultrasonic erosion etc. Electron beams and laser machines for metal-working are included.

Order VII—(continued)

Minimum
List
Heading

333 Pumps, Valves and Compressors

Note: Component parts of internal combustion engines are excluded from this Heading and classified in Headings 334, 370, or 380-383 as appropriate.

1. Pumps

Manufacturing pumps for handling liquids but excluding pumps specifically designed for actuating hydraulic equipment which are classified in Sub-division 4 of this Heading. Petrol station pumps are included.

2. Valves

Manufacturing industrial valves and cocks including pneumatic control valves.

3. Compressors

Manufacturing air and gas compressors and exhausters. Compressors for refrigerators are classified in Heading 339.

4. Fluid power equipment

Manufacturing equipment for operating machinery by hydraulic or pneumatic means, including hydraulic pumps and motors, hydraulic control and ancillary valves, pneumatic motors, pneumatic and hydraulic actuators, boosters, cylinders, rams and accumulators and power packs.

334 Industrial Engines

1. Internal combustion engines

Manufacturing industrial internal combustion engines (other than in marine engineering establishments as defined in Heading 370). Gas turbines and internal combustion engines for rail vehicles are included but internal combustion engines for the propulsion of wheeled tractors, motor vehicles and aircraft are classified in Headings 380, 381 and 382, and 383 respectively.

2. Other prime movers

Manufacturing all other types of prime movers except turbines for electricity generation, which are classified in Heading 361, marine engines, classified in Heading 370, and steam locomotives, classified in Heading 384.

335 Textile Machinery and Accessories

Manufacturing textile spinning, winding, weaving, knitting, printing, dyeing, etc., machinery, and accessories such as bobbins, combs, reeds, rollers, shuttles, sliver cans, spindles, spools and teasel rods.

336 Construction and Earth-Moving Equipment

Manufacturing excavating and earth-moving equipment such as excavators, crawler tractors, dozers, graders, scrapers, shovel loaders and dumpers; roadmaking and maintenance equipment such as asphalt mixing and laying machines and road rollers, concrete mixers; pile drivers, etc.; and quarry crushing and screening plant. Drag scrapers and cableway excavators and cranes, hoists, etc. are classified in Heading 337 and compressors in Heading 333.

337 Mechanical Handling Equipment

1. Conveyors, aerial ropeways etc.

Manufacturing aerial ropeways, bucket wheel reclaimers; cableways and cableway excavators; conveyors and feeders (other than underground); drag scrapers; elevators; live storage racks; overhead runways (powered), suspension railways and telfers; pallet hoists; palletizers; pneumatic and hydraulic handling plant; portable and mobile conveyors and elevators;

Order VII—(continued)

Minimum
List
Heading

337 Mechanical Handling Equipment—(continued)

hoists (hydraulic, mechanical and pneumatic) other than builders' hoists, hand-operated, and electric hoists (see Sub-division 4 of this Heading); stacking machines; tippers and tippers other than for road vehicles; wagon marshalling equipment. Drag line excavators are classified in Heading 336, and colliery conveying equipment is classified in Heading 339.

2. Cranes and transporters

Manufacturing cranes of all types including derrick cranes; dockside and gantry jib cranes; electric overhead travelling cranes; power operated mobile cranes; steelworks cranes; tower cranes; rail-mounted cranes; and transporters.

3. Lifts and escalators

Manufacturing passenger and goods lifts; escalators and passenger conveyors.

4. Lifting and winding devices

Manufacturing electric hoists using wire rope or chain; hand-operated chain, rope and lever hoists, pulley blocks and sheave blocks; power and hand-operated travelling carriages; lifting jacks and tackle, capstans, winches and windlasses (builders' hoists are included).

5. Powered industrial trucks and industrial tractors

Manufacturing fork-lift and pallet trucks, elevating and fixed platform trucks and other industrial trucks and tractors.

338 Office Machinery

Manufacturing typewriters, duplicating (including small offset litho) machines, adding machines, calculating and tabulating machines, cash registers and other machinery for office use. Electronic desk calculators are included but electronic computers are classified in Heading 366. Dictating machines are classified in Heading 365.

339 Other Machinery

1. Mining machinery

Manufacturing boring and cutting machinery, underground conveyors, screening, washing and other machinery for mines.

2. Printing, bookbinding and paper goods machinery

Manufacturing typesetting and composing room equipment, printing presses, ruling machines, bookbinding machinery (including bookbinders' sewing machines), cardboard box, paper bag, envelope and paper goods making machinery.

3. Refrigerating machinery (except domestic type refrigerators)

Manufacturing refrigerating machinery, commercial refrigerators and commercial refrigerating equipment, including deep freeze and quick freeze machinery. Domestic type refrigerators and deep freeze units (including non-electric refrigerators) are classified in Heading 368.

4. Space-heating, ventilating and air-conditioning equipment

Manufacturing, other than at foundries, equipment for space-heating, ventilating and air-conditioning systems and dust extraction systems, including heater batteries, unit heaters, ventilators, hoods, cowls, ducting, etc. Self-contained air conditioning machines are included but thermostats and similar measuring and controlling apparatus are excluded and classified in Heading 354. Domestic type electric heaters, fans, etc. are classified in Heading 368, and self-contained oil burners and gas heaters in Headings 349 and 399 respectively. Establishments specialising in the installation of equipment are classified in Heading 500.

Order VII—(continued)

Minimum
List
Heading

339 Other Machinery—(continued)

5. Scales and weighing machinery

Manufacturing scales, spring balances, weighing machinery, etc.

6. Portable power tools

Manufacturing portable power tools of the hand-held type and the type employed in civil engineering, mining and quarrying. Flexible shaft drive tools are included.

7. Food and drink processing machinery

Manufacturing machinery for food and drink preparation, processing and sterilizing. Dairy machinery is included, except milking machines which are classified in Heading 331. Portable domestic electrical appliances are classified in Heading 368, and grain milling plant is classified in Heading 341.

8. Packaging and bottling machinery

Manufacturing machinery for bottling, packing, canning, packeting and labelling and for bottle washing.

9. Other machinery except electrical machinery

Manufacturing boot and shoe machinery, brick making machinery, paper and pulp making machinery, rolling mills and other complete machines not elsewhere specified. Laundry machinery (other than electrical domestic), and dry cleaning machinery are included.

341 Industrial (including Process) Plant and Steelwork

1. Boilers and boilerhouse plant

Manufacturing steam raising boilers of all types and accessories such as mechanical stokers. Marine boilers and hot water boilers cast in sections are classified in Headings 370 and 313 respectively.

2. Other industrial, including process plant

Manufacturing process plant and other industrial plant including lime and cement kilns, gas plant, sintering plant, metallurgical and other furnaces and other metal manufacturing plant (excluding rolling mills), de-greasing and coating plant, chemical, petro-chemical and oil refining plant, nuclear reactors, water and sewage treatment plant.

3. Process plant engineering contractors

Contractors responsible for the design, engineering, procurement, construction and commissioning of complete plants for process industries (i.e. chemicals, petro-chemicals, oil refining and gas). Firms responsible for only some of these functions are excluded. For example, consulting engineers not responsible for the complete plant are classified in Heading 879.

4. Constructional steelwork

Manufacturing structural iron and steelwork, e.g. for buildings and bridges (including similar work in other metals) and prefabricated buildings of steel and other metals.

5. Other fabricated iron and steelwork

Manufacturing heavy iron and steelwork (including similar work in other metals) other than for structural uses, including storage tanks, spheres, process pressure vessels, heat exchangers; pipes, chimneys, bunkers, bins and hoppers. (The industrial hollow-ware classified in Sub-division 7 of Heading 399 is excluded.)

342 Ordnance and Small Arms

Manufacturing guns, machine guns, mortars, rifles, pistols, revolvers, torpedoes, shell cases and components, bomb cases and components, cases and components for small arms ammunition, sporting guns, air rifles etc. Tanks are included but armoured cars and troop carriers are excluded and classified in Heading 381. The manufacture of swords, bayonets, etc. except by general cutlery firms is also included.

Order VII—(continued)

Minimum
List
Heading

349 Other Mechanical Engineering not elsewhere specified

1. Ball and roller bearings

Manufacturing ball, roller, needle and similar bearings, including those for motor vehicles.

2. Precision chains

Manufacturing transmission and other precision chains, including transmission chains for motor vehicles and cycles.

3. Other mechanical engineering

Establishments undertaking general sub-contract or repair work. Establishments manufacturing mechanical engineering products (including machinery parts) not elsewhere specified, or of such a mixed character that they cannot be allocated elsewhere in Order VII.

ORDER VIII—INSTRUMENT ENGINEERING

351 Photographic and Document Copying Equipment

Manufacturing cameras, projectors, photographic accessories and document copying equipment (including machinery using the xerographic process etc.). Photographic lenses are classified in Heading 354, and sensitized paper and cloth, films and plates are classified in Heading 279.

352 Watches and Clocks

The manufacture of complete watches and clocks (including electric clocks) and parts other than springs, and of time locks, time recorders, etc. Time switches are classified in Heading 369.

353 Surgical Instruments and Appliances

1. Surgical, dental and veterinary instruments and appliances

Manufacturing surgical cutlery, dental instruments, splints, trusses, artificial eyes, artificial teeth and artificial limbs, and other surgical and dental appliances. Electro-medical equipment, including X-ray apparatus, is classified in Heading 367. Plastics components are classified in Heading 496.

2. Spectacles, etc.

Manufacturing spectacles, monocles, goggles etc., including frames and lenses. Dispensing opticians other than wholesale are excluded.

354 Scientific and Industrial Instruments and Systems

1. Optical instruments

Manufacturing lenses, prisms and other optically worked elements, telescopes, binoculars, monoculars, microscopes, optical surveying instruments, optical metrological instruments, optical density measuring equipment, ophthalmic instruments, photocells and other optical instruments and apparatus. Optical nautical and aeronautical and gunnery control instruments are included, but the grinding of spectacle lenses is classified in Sub-division 2 of Heading 353. Photographic and cinematographic apparatus is classified in Heading 351.

2. Other scientific and industrial instruments and systems

Manufacturing scientific instruments, equipment and systems for sensing, measuring, indicating, recording and/or control of mechanical, electrical (including electronic), and magnetic magnitudes, including simple measuring devices such as pressure gauges, meters. Ultrasonic instruments and equipment are included. Mechanical and electrical medical measuring instruments are included, but other electro-medical equipment is classified in Heading 367. Engineers' gauges are classified in Heading 390.

ORDER IX—ELECTRICAL ENGINEERING

Minimum
List
Heading

361 Electrical Machinery

1. Machinery for generating, transmitting and distributing electric power

Manufacturing electricity generators, turbines for electricity generation and transformers.

2. Switchgear and control gear

Manufacturing starting and controlling gear for electric motors, and switchgear.

3. Other electrical machinery

Manufacturing electric motors, (including electric traction motors and transmission equipment and associated rectifiers), and electrical machinery not elsewhere specified. Electrical equipment for motor vehicles, cycles and aircraft is classified in Heading 369.

362 Insulated Wires and Cables

363 Telegraph and Telephone Apparatus and Equipment

Manufacturing telegraph and telephone apparatus, switchboards, teleprinters, telewriters, etc. Electronic telecommunications equipment is included.

364 Radio and Electronic Components

1. Valves and other active components

Manufacturing electronic valves (including cathode ray tubes), semi-conductors and electronic rectifiers. Glass envelopes are classified in Heading 463.

2. Integrated circuits

Manufacturing thin and thick film passive and hybrid circuits, monolithic semi-conductor circuits. Printed circuits are classified in Sub-division 3 of this Heading.

3. Other radio and electronic components

Manufacturing resistors, capacitors, inductors, circuit breakers for electronic equipment, sound reproduction components, printed circuits and other components and assemblies not elsewhere specified. The manufacture of electronic components for equipment classified in Heading 365, Sub-division 2 is included. The manufacture of tape decks (other than those for use with computers and related equipment, which is classified in Heading 366) is included.

365 Broadcast Receiving and Sound Reproducing Equipment

1. Gramophone records and tape recordings

Manufacturing gramophone records and pre-recorded tape including video tape.

2. Other broadcast receiving and sound reproducing equipment

Manufacturing radio and television receivers, radiograms and gramophones, tape recorders (including video tape recorders), dictating machines, etc. Manufacturing audio equipment, A.F. (audio frequency) amplifiers, and public address systems. Cabinets for radio receivers, etc. are excluded. Electronic components are classified in Heading 364.

366 Electronic Computers

Manufacturing digital, analogue and hybrid electronic computers and related equipment, including peripheral equipment for computing systems and data transmission equipment. Telecommunication links classified in Heading 363 are excluded. Computers and peripheral equipment not separable from industrial control systems are classified in Heading 354.

Order IX—(continued)

Minimum
List
Heading

367 Radio, Radar and Electronic Capital Goods

1. Alarms and signalling equipment

Manufacturing electric or electronic sound or visual signalling systems or apparatus, for example, bells, sirens, indicator panels, burglar and fire alarms. Road traffic signalling equipment is included, but signalling equipment of vehicles is classified in Heading 369. Electronic railway signalling equipment is included, but electric railway signalling equipment is classified in Heading 384.

2. Other radio, radar and electronic capital goods

Manufacturing radio and television transmitters, radio communication receivers, radar and electronic navigational aids, high-frequency heating apparatus, magnetic compasses and gyroscopes, X-ray apparatus and electro-medical equipment (which includes infra-red, ultra-violet, radiant heat etc., lamps for diagnosis and therapy; electrical and electronic equipment for stimulation and massage; heart, kidney and lung machines; sterilising equipment and reading aids). Industrial electronic control equipment and electronic measuring equipment are classified in Heading 354, electronic computers are classified in Heading 366, and electronic desk calculators in Heading 338.

368 Electric Appliances Primarily for Domestic Use

Manufacturing electric vacuum cleaners, washing machines, refrigerators (including non-electric refrigerators), deep freeze units, food mixers, hair clippers and dry shavers, cookers, radiators, toasters, irons and other domestic type electric appliances. The manufacture of refrigerating machinery and commercial refrigerating equipment is classified in Heading 339.

369 Other Electrical Goods

1. Electrical equipment for motor vehicles, cycles and aircraft

Manufacturing lighting, starting and ignition sets, dynamos, dashboard instruments for road vehicles and wheeled tractors, electric horns, traffic indicators and similar electrical equipment for motor vehicles, wheeled tractors, cycles and aircraft. Accumulators are classified to Sub-division 3, primary batteries to Sub-division 2, and filament lamps to Sub-division 4 of this Heading.

2. Primary batteries

3. Secondary batteries (accumulators)

4. Electric lamps

Manufacturing electric lamp bulbs of all types, including filament lamps, fluorescent tubes, gas discharge lamps, and neon, etc. tubes for advertising, and parts except glass envelopes, which are classified in Heading 463.

5. Electric light fittings, wiring accessories, etc.

Manufacturing electrical wiring accessories, such as lampholders, ceiling roses, plugs and sockets, switches, etc. and electric lighting fittings not elsewhere specified (glassware for lighting fittings is classified in Heading 463 and metal fittings by general metal-working establishments in Heading 399), searchlights, flashlight cases and all other types of electrical goods; time switches are included but electric clocks and time recorders are classified in Heading 352.

ORDER X—SHIPBUILDING AND MARINE ENGINEERING

370 Shipbuilding and Marine Engineering

1. Shipbuilding and ship repairing

Building or repairing ships (naval and merchant), boats, barges, lighters, etc. of all types and sizes, whether self-propelled or not; making oars, masts and spars, rigging and other tackle and ships' models. Off-shore oil and gas drilling rigs (floating) are included.

Order X—(continued)

Minimum
List
Heading

370 Shipbuilding and Marine Engineering—(continued)

2. Marine engineering

Manufacturing and repairing main and auxiliary steam (reciprocating and turbine) engines for ships, and marine boilers. The manufacture and repair of internal combustion engines for ships and boats (including out-board motors) is included if carried out in marine engineering establishments; for this purpose a marine engineering establishment is defined as one making or repairing marine internal combustion engines exclusively, or marine and other types of internal combustion engines in association with other activities classified in this Order. The manufacture or repair of internal combustion engines for marine purposes in establishments also manufacturing or repairing internal combustion engines for other purposes is excluded, *even though* at any particular time the engines for marine purposes constitute the major activity of the establishment.

The manufacture of ships' capstans and winches is classified in Heading 337.

ORDER XI—VEHICLES

380 Wheeled Tractor Manufacturing

Manufacturing and assembling three and four wheeled and half tracked tractors. Manufacturing parts and accessories (other than rough or semi-finished castings and forgings) when made wholly or primarily of metal and not specified elsewhere. Industrial tractors are classified in Heading 337, road tractors solely for tractor-trailer combinations in Heading 381, and electrical accessories and other electrical equipment in Heading 369.

381 Motor Vehicle Manufacturing

Manufacturing and assembling passenger cars, commercial goods vehicles, road tractors solely for tractor-trailer combinations, buses, battery-electric vehicles, motor drawn trailers and caravans. Three wheeled vehicles are included. Manufacturing engines, bodies, chassis, chassis frames, seats and seat safety belts for motor vehicles, cabs for commercial vehicles, motor body shells. Manufacturing all other parts and accessories (other than rough or semi-finished castings and forgings) when made wholly or primarily of metal and not specified elsewhere. Establishments specialising in reconditioning of engines and gear boxes are included. Powered invalid carriages and industrial trucks are classified in Headings 382 and 337 respectively. Passenger seating for public service vehicles is classified in Heading 472, and electrical accessories and other electrical equipment are classified in Heading 369. Parts and accessories made wholly or primarily of asbestos, glass, rubber or plastics are classified in Headings 429, 463, 491 or 496 respectively.

382 Motor Cycle, Tricycle and Pedal Cycle Manufacturing

Manufacturing and assembling motor cycles, scooters, mopeds, powered invalid carriages, tricycles, bicycles and sidecars. Manufacturing parts and accessories (other than rough or semi-finished castings and forgings) when made wholly or primarily of metal and not specified elsewhere. Children's scooters, tricycles and bicycles are classified in Heading 494. Electrical accessories and other electrical equipment are classified in Heading 369.

383 Aerospace Equipment Manufacturing and Repairing

1. Aircraft and airframe manufacturing and repairing

Manufacturing, assembling, modifying and repairing airframes, complete aircraft, gliders, guided weapons, spacecraft, launch vehicles, sub-orbital vehicles and associated ground equipment, excluding electronic or telemetric equipment which are classified in Heading 367.

Order XI—(continued)

Minimum
List
Heading

383 Aerospace Equipment—(continued)

2. Aero-engine manufacturing and repairing

Manufacturing and repairing aero-engines and power plant for aircraft, and rocket motors for guided weapons and spacecraft. Parts and accessories are included.

3. Air cushion vehicles (hovercraft)

Manufacturing and repairing air cushion vehicles (hovercraft).

4. Parts and accessories

Manufacturing and repairing parts and accessories for aircraft, gliders, guided weapons, spacecraft, launch vehicles, sub-orbital vehicles and associated ground equipment, and air cushion vehicles. Aeronautical instruments (other than electronic) are classified in Heading 351; radio, radar and other electronic equipment in Heading 364; and electrical accessories and equipment in Heading 369. Parts and accessories made wholly or primarily of asbestos, glass, rubber or plastics are classified in Headings 429, 463, 491 or 496 respectively.

384 Locomotives and Railway Track Equipment

1. Railway workshops

2. Private manufacturers

Manufacturing and repairing locomotives of all types, railway signals, turntables and automatic couplings. Passenger coaches embodying a motive unit are classified in Heading 385. Light repairs carried out in railway running sheds are classified in Heading 701.

385 Railway Carriages and Wagons and Trams

1. Railway-owned works

2. Other manufacturers

Manufacturing and repairing railway coaches (including those embodying motive units), wagons, trucks, brake vans, axle boxes, etc., tramcars and colliery and other trams and tubs, etc.

ORDER XII—METAL GOODS NOT ELSEWHERE SPECIFIED

390 Engineers' Small Tools and Gauges

Manufacturing engineers' small tools, tool holders and work holders of the types used with metal-working machine tools, and engineers' gauges.

391 Hand Tools and Implements

Manufacturing chisels, hammers, saws, axes, shears (including sheep shears), scythes, spades, agricultural forks, hoes, rakes, spanners, wrenches, vices and other hand tools and tool accessories. Power tools are classified in Heading 339 and engineers' small tools in Heading 390.

392 Cutlery, Spoons, Forks and Plated Tableware, etc.

Manufacturing spoons and forks, table knives, pocket and sheath knives, pruning knives, razors (not electric), razor blades, scissors, manicure sets, etc. Tableware of precious metals or plated with precious metals (e.g. silver plated on nickel silver), and electroplated and stainless steel tableware are included. Surgical cutlery is classified in Heading 353.

393 Bolts, Nuts, Screws, Rivets, etc.

Manufacturing bolts, nuts, screws, metal washers, rivets, split pins, cut nails, zinc nails, etc. Wire nails are classified in Heading 394.

Order XII—(continued)

Minimum
List
Heading

394 Wire and Wire Manufactures

Manufacturing ferrous and non-ferrous wire and wire products such as wire nails, wire netting, wire gauze, etc. Fabricated steel reinforcement for concrete is included. Insulated electrical wire and wire mattresses are classified in Headings 362 and 399 respectively.

395 Cans and Metal Boxes

Manufacturing tin and aluminium cans, metal boxes and other small metal containers and parts. Cash and deed boxes are classified in Heading 399.

396 Jewellery and Precious Metals

Smelting, refining, etc. gold, silver and platinum, etc.; cutting and polishing precious stones; and manufacturing ornaments of gold, silver, pewter, or plated with gold, silver, etc.; jewellery, coins and medals. The Royal Mint is included.

399 Metal Industries not elsewhere specified

1. Metal furniture

Manufacturing metal bedsteads, chairs, tables, filing cabinets, lockers, shelves, fenders, fire irons and spring and wire mattresses.

2. Metal windows and door frames

Manufacturing metal casements and window frames, door frames and skylights, curtain walling, etc.

3. Safes, locks, latches and keys

Manufacturing safes and strong rooms, cash and deed boxes and all types of locks and keys, except time locks which are classified in Heading 352, and locks for vehicles which are classified in Headings 380, 381, or 382 as appropriate.

4. Springs

Manufacturing spiral and flat (including laminated) springs for all purposes, except vehicle suspension springs and vehicle engine valve springs which are classified in Headings 380, 381 or 382 as appropriate.

5. Drop forgings, etc.

Manufacturing forgings by drop forging, drop stamping or hot pressing. Heavy forgings are classified in Heading 311.

6. Domestic hollow-ware

Manufacturing kettles, saucepans, teapots, buckets and similar domestic articles of base metal. Hollow-ware fitted with an electric element for heating is classified in Heading 368. Domestic tableware of stainless steel and electroplated is classified in Heading 392.

7. Vats, tanks, cisterns and other industrial hollow-ware

Manufacturing metal kegs, drums, barrels, tanks, vats, cisterns (other than cast iron cisterns) etc. Hollow-ware fitted with an electric element for heating is classified in Heading 368. Cans of tin or aluminium are classified in Heading 395.

8. Needles, pins, fish-hooks and other metal small-wares

Manufacturing metal sewing, knitting, hosiery and gramophone needles, toilet, safety, hair and hat pins, crochet hooks and fish-hooks, and metal small-wares of all kinds for the clothing, fancy leather goods, harness and saddlery etc. trades, such as bag clasps and frames, buckles, hooks and eyes, snap fasteners, zip fasteners, domestic chain, etc.
