EMPLOYMENT, WAGES, COST OF LIVING, AND TRADE DISPUTES IN AUGUST.

EMPLOYMENT AND UNEMPLOYMENT.

EMPLOYMENT at 15th August showed a slight improvement as compared with 18th July.

Insured Persons in work.—It is provisionally estimated that at 15th August, 1938, the number of insured persons, aged 16–64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,402,000. This was 31,000 more than at 18th July, 1938. On a comparable basis there was a decrease of about 320,000 as compared with 23rd August 1937

Numbers unemployed (excluding Persons normally in Casual Employment).—At 15th August, 1938, there were 1,262,343 persons on the registers of Employment Exchanges in Great Britain who were out of a situation. This was 17,882 more than at 18th July, 1938, but this increase included 16,543 boys and girls under 16 years of age, most of whom had registered for employment upon reaching the school-leaving age at the end of the summer term. On a comparable basis there was an increase in the total of about 201,000 as compared with 23rd August, 1937.

Numbers Temporarily Stopped.—At 15th August, 1938, there were registered as unemployed in Great Britain 439,024 persons who were on short time or otherwise temporarily suspended from work. This was 28,749 less than at 18th July, 1938. On a comparable basis there was an increase of about 247,000 as compared with 23rd August, 1937.

Numbers unemployed normally in Casual Employment.
—At 15th August, 1938, there were on the registers in Great Britain 57,875 unemployed persons who normally seek a livelihood by means of jobs of short duration. This was 3,007 less than at 18th July, 1938. On a comparable basis there was an increase of about 3,000 as compared with 23rd August, 1937.

Applicants for Benefit or Allowances.—The total of 1,759,242 persons on the registers at 15th August, 1938, included 1,020,036 persons with claims admitted for insurance benefit, 518,374 persons with applications authorised for unemployment allowances, 53,408 persons with applications for benefit or allowances under consideration and 167,424 other persons, of whom 52,896 were under 16 years of age.

Percentages Unemployed.—Among persons, aged 16–64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at 15th August, 1938, was 13·0 as compared with 13·3 at 18th July, 1938. Among persons within the agricultural scheme, the percentages were 4·3 at 15th August, 1938, and 4·5 at 18th July, 1938. For the two schemes combined the percentage for 15th August, 1938, was 12·6 as compared with 12·9 for 18th July, 1938. On a comparable basis, there was an increase at 15th August, 1938, as compared with 23rd August, 1937, of about 3·4 in the percentage unemployed among persons within the agricultural

scheme. For the two schemes combined the percentage rose by about $3 \cdot 4$ between these two dates.

Industries in which the Principal Variations occurred.— There was an improvement in employment, between 18th July and 15th August, in coal mining, building, public works contracting, and the boot and shoe and linen industries. On the other hand, employment declined in the cotton, wool textile, pottery, and tailoring industries, iron and steel manufacture, iron mining and quarrying, certain branches of the engineering industry, and the distributive trades.

WAGES

In the industries for which statistics are regularly compiled by the Department the changes in rates of wages reported to have come into operation in August resulted in an increase estimated at £12,700 in the weekly full-time wages of about 222,000 workpeople, and in a decrease of £31,700 in those of about 271,000 workpeople.

The principal groups of workpeople whose wages were increased were coal miners in Leicestershire, Warwickshire and Scotland, and steel workers in various districts in Great Britain.

The principal decreases affected coal miners in Northumberland, Lancashire and Cheshire, Nottinghamshire, Derbyshire, Cannock Chase and South Staffordshire, tinplate workers, and workpeople employed in steel sheet rolling mills.

The changes so far reported in the eight completed months of 1938 are estimated to have resulted in a net increase of about £262,000 a week in the full-time wages of 2,380,000 workpeople, and in a net decrease of about £28,500 in those of 123,000* workpeople.

COST OF LIVING.

At 1st September the average level of retail prices of the commodities taken into account in the statistics compiled by the Ministry of Labour (including food, rent, clothing, fuel and light, and miscellaneous items) was approximately 56 per cent. above the level of July, 1914, as compared with 56 per cent. at 2nd August, 1938, and 55 per cent. at 1st September, 1937. For food only the percentages were 40, 41, and 40 respectively.

TRADE DISPUTES.

The number of trade disputes involving stoppages of work reported to the Department as beginning in August was 77. In addition, 12 disputes which began before August were still in progress at the beginning of that month. The number of workpeople involved in these 89 disputes, including workpeople thrown out of work at the establishments where the disputes occurred, was about 23,000, and the aggregate duration of the disputes in August was about 86,000 working days.

The aggregate duration of all disputes in progress in the first eight months of 1938 was about 1,033,000 working days, and the total number of workpeople involved in these disputes was about 191,000.

^{*} Of the 271,000 workpeople whose rates of wages were reduced in August, the majority had received increases of greater or equal amounts during the earlier months of 1938.

AGE DISTRIBUTION OF PERSONS INSURED AGAINST UNEMPLOYMENT. SPECIAL ANALYSIS, BY SAMPLE, FOR JULY, 1937.

The following article continues, from pages 300 to 302 of last month's issue of this GAZETTE, the analysis of a random sample of approximately 2 per cent. of the total numbers of persons insured under the Unemployment Insurance Acts in Great Britain at July, 1937 (exclusive of those insured under the Special Schemes for the banking and insurance industries). In the previous article estimates were given of the numbers and percentages of insured persons in various age-groups at July, 1937, and the percentages unemployed in those age-groups in February, 1938. Separate figures were given for each of nine administrative divisions of Great Britain. In the following article corresponding figures, but for larger age-groups, are given for each of the principal industry groups, together with some information as to the movement of insured persons within Great Britain.

AGE-DISTRIBUTION IN VARIOUS INDUSTRY GROUPS.

THE Table below shows, for each of the principal industry groups, the estimated total number of males, aged 14-64, insured at July, 1937, in Great Britain, and the percentage of the total within each of three broad age-groups, based on information derived from the

The age-distribution of insured males shows marked variations among different industries. The greatest contrast is shown by the figures for electric cable, apparatus, etc. manufacture on the one hand, and the port transport industry on the other. In the former industry 44·7 per cent. of the insured males at July, 1937, were in the 11-year group 14-24 years, 41·7 per cent. were in the 20-year group 25 to 44, and 13·6 per cent. were in the 20-year group 45 to 64. In the port transport industry the corresponding percentages were 8·3, 45·2 and 46·5. In the former industry, the work, as a rule, is comparatively light, and the industry has expanded considerably in recent years; consequently its personnel includes a high in recent years; consequently its personnel includes a high proportion of young men. In the port transport industry the work is generally of a heavy character, and the numbers in it have been more or less stationary for some time. The age distribution in electric cable, apparatus, etc. manufacture is typical of the figures for the newer or lighter industries which have shown marked expansion in recent years and such as the recent which have shown marked expansion in recent years, such as the motor vehicle, cycle and aircraft industry, the distributive trades, the woodworking, glass, and brick industries, and metal goods manufacture. Comparatively high percentages are found in the 25–44 age group in silk and artificial silk manufacture and the transport (other than port transport) group, which consists mainly of road transport. The high proportion under 25 years of age in commerce and finance is doubtless influenced by the exception from unemployment insurance of non-manual workers whose rate of remuneration exceeds £250 a year, which tends to exclude numbers of the older employees

In most of the heavy staple industries, including those which showed the greatest contraction in numbers insured during the period 1923–1937, the proportions of insured men over 45 years of age are well above the average for all industries combined. These industries include pig iron manufacture (blast furnaces), public works contracting, shipbuilding and repairing, vehicle building other than motor vehicles, etc., the cotton and wool textile industries, coal and other mining textile bleechings etc. coal and other mining, textile bleaching, etc., steel melting and rolling, and the building industry. The fishing industry, and gas, water and electricity supply also fall within this category, but as a considerable number of employees of gas, water and electricity undertakings are excepted from unemployment insurance, the figures given in the table for this industry may not be fully representative. years of age are above the average the proportions under 25 years are well below the average.

The figures for males insured under the Agricultural Scheme show

that among private gardeners the proportion over 45 years of age is noticeably higher, and the proportion under 25 lower, than among other classes within the Scheme. In farming, and in market and other gardening, the proportions of men aged 45-64 are slightly above the average for all industries combined in the General Scheme.

The proportion under 25 years of age in farming is very similar to the General Scheme average for that age-group.

The following Table shows the total estimated numbers of females, aged 14–64, insured at July, 1937, in Great Britain, and the percentages in three broad age-groups for those industries in which insured women are largely employed:—

			A STATE OF THE PARTY OF THE PAR	

The age distribution of females insured under the General Scheme also shows considerable variation as between different industries, though not to such an extent as in the case of males. In electric though not to such an extent as in the case of males. In electric cable, apparatus, etc. manufacture (which also showed the highest proportion of younger men), 63.6 per cent. of the insured women were in the 11-year group 14-24, 34 per cent. were in the 20-year group 25-44, and only 2.4 per cent. in the 20-year group 44-64. In the cotton industry, on the other hand, only 32.8 per cent. were aged 14-24, 49.7 per cent. were aged 25-44, and 17.5 per cent. were aged 45-64.

As in the case of men, the industries in which the proportion of insured women under 45 years of age is above the average for all industries combined are, for the most part, the newer light industries industries combined are, for the most part, the newer light industries which have rapidly expanded in recent years. Apart from electric cable, apparatus, etc. manufacture, these include, in the case of women, cocoa, chocolate, and sugar confectionery manufacture, engineering, bread, biscuit, etc. making, the paper and printing trades, the vehicle industry (mainly motor vehicles), metal goods manufacture, the distributive trades, the silk and artificial silk industry, shirt and collar making and chemicals, paints, etc. manufacture. In all these industries the proportion aged 14–24 is well above the general average. On the other hand, in most of the textile industries (except silk and artificial silk and hosiery manufacture) and in hotel, boarding house, etc. service, laundry, etc. service, and some clothing industries, the proportions of older women are above the average for all industries

mbined. In most of these industries the proportions aged 14-24 are well below the average.

RATES OF UNEMPLOYMENT IN VARIOUS AGE-GROUPS

A special analysis showing the age-distribution of insured persons, aged 18-64, in each of the principal industries, registered as memployed at Employment Exchanges in Great Britain (excluding those insured under the Special Schemes for the banking and insurance industries) was made on 28th February, 1938. Juveniles insurance industries) was made on 28th February, 1938. Juveniles aged 16-17 years were excluded from this analysis, but an industrial analysis of insured juveniles unemployed is available in respect of 14th February, 1938. The special analysis for 28th February related only to persons registered as unemployed at that date, and excluded persons whose books were in the "two-months file" of lodged books (see explanation on page 358). Consequently the percentage rates of unemployment, obtained by relating the results of this analysis to the estimated numbers of insured persons in each age-group, are not strictly comparable with those given in the monthly statistics, published in this GAZETTE, relating to unemployment among insured persons generally. ersons generally.

The Table below gives for each of the principal industry groups the percentages of insured males, in three broad age-groups, registered as unemployed in Great Britain in February, 1938. Juveniles under 16 years of age and persons insured under the Special Schemes for the banking and insurance industries are excluded.

The Table shows that the percentage rate of unemployment is highest among men aged 45-64 in every industry group except port transport, where the highest rate occurs among those aged 16-24. In the combined silk and artificial silk industry, and in the construction and repair of vehicles other than motor vehicles, cycles and aircraft, however, there is little difference between the figures for the age groups shown in the Table. The very high figures for the age-groups shown in the Table. The very high figure for men aged 45-64 in public works contracting (47.3 per cent.) is doubtless influenced by the fact that it includes a number of older men from depressed heavy industries who have obtained employment on public works.

In most industries the rate of unemployment was lower in the 16-24 age-group than in either of the other two groups; but in the case of the fishing, brick, chemicals, pig-iron, electric cable, apparatus, etc., and vehicle industries, the combined silk and artificial silk industry, and venicle industries, the combined six and articles six industry, the food manufacturing groups, and transport and communication, other than port transport, the lowest rate of unemployment occurs in the 25-44 age-group. Among the industries in which the rate of unemployment increases appreciably as age advances, are coal mining, the pottery, clothing and boot and shoe industries, printing, publishing and bookbinding, building, public works contracting,

gas, water and electricity supply, the distributive trades, and

commerce and finance.

The following Table gives the corresponding percentage rates of unemployment in February, 1938, among insured females in Great Britain for those industries in which women are largely employed:—

In each industry group the rate of unemployment among females is lowest in the age-group 16-24 and highest in the age-group 45-64. The rate of unemployment in the lat ter group is about double the rate in the former in tailoring, dressmaking, shirt, collar, etc. making, laundry, etc. service, printing, publishing and bookbinding, chemicals, paints, oils, etc. manufacture, and commerce and finance

MOVEMENT OF INSURED PERSONS WITHIN GREAT BRITAIN.

The information obtained from the sample included the name of the Employment Exchange at which the first unemployment book, bearing the insured person's current identification number, was issued (which in most cases was the first unemployment book ever issued to the insured person) and the name of the Employment Exchange at which his book was exchanged for a new one at the 1937 exchange of books. From these particulars some information can be obtained as to the movement of insured persons from one part of Great Britain to another. The period within which the movement occurred differed widely for different persons. The maximum period was the period between 1920 and 1937, but in the majority of cases the period was shorter. Information is not available as to the date on which an insured person moved from one place to another, nor with regard to intermediate movements before transfer to the area in which the unemployment book was exchanged in 1937. The analysis is limited to a comparison between the office at which the book was originally issued, and the office at which it was exchanged in 1937. In the case of men discharged from H.M. Forces, the unemployment book given upon discharge is issued from the Claims and Record Office, Kew, and not from an Employment Exchange. For the purpose of this analysis, however, these cases have been treated as though the book was first issued at the Employment Exchange whose area included the insured person's home address at the time of discharge.

The analysis relates, in the main, to insured persons aged 21-64 insured under the General Scheme at July, 1937. Persons insured under the Agricultural Scheme at July, 1937, have Persons insured under the Agricultural Scheme at July, 1937, have been excluded because that Scheme did not come into operation until May, 1936, and the value of the analysis would have been impaired by the inclusion of a large number of workers for whom the maximum period within which the recorded movement could have occurred was very short. The analysis includes, however, persons insured under the Agricultural Scheme who had transferred to employment under the General Scheme before July, 1937.

The Tables below give an analysis of the cases within the sample according to the administrative division in which the unemployment books were first issued, combined with an analysis according books were first issued, combined with an analysis according to the administrative division in which the books were exchanged in 1937. The figures show, on the one hand, the numbers located in each division at July, 1937, analysed according to the division in which their books were originally issued, and, on the other, the numbers of books originally issued in each division analysed according to the division in which they were exchanged in 1937. The Tables thus show not only the division of origin of those now located in each division, but also the division of destina-

^{*} The figures do not include the two months' file of lodged unemployment books or persons insured under the Special Schemes for the banking and insurance industries.

^{*} See footnote * in previous column.

derived from the sample have been converted into the corresponding approximate total numbers of insured persons.

For the purpose of these analyses, the figures for the London and South-Eastern divisions have been combined. These two divisions are closely associated industrially, and an apparent movement of insured persons between them, as indicated by the material available, may not, in all cases, represent a real movement. | ciably if this could be done.

tion of those who have moved from each division. The figures derived from the sample have been converted into the corresponding approximate total numbers of insured persons.

The figures showing the apparent movement into London will be affected to some slight extent by the practice of certain large firms with head offices in London, and establishments in the provinces, with the contract of the of exchanging their unemployment books at the Employment Exchange nearest their head offices. It has not been possible to correct the figures for the various areas to allow for such cases, but the broad general results of the analysis would not be altered appre-

Estimated numbers of persons, aged 21-64, insured under the General Scheme of Unemployment Insurance in Great Britain, analysed according to Divisions of original issue of unemployment books and Divisions in which books, were exchanged at July, 1937.

The Tables show, as might be expected, that there has been a | and to a less extent into the Midlands and North-Western divisionssubstantial movement of insured men from Wales and the Northern divisions, in which there has been a high rate of unemployment over a considerable period, and the bulk of the movement has been into the London and South-Eastern divisions. Of 537,160 men aged the London and South-Eastern divisions. Of 557,100 men aged 21-64 insured at July, 1937, whose unemployment books were originally issued in the Wales division, 85,460 or nearly 16 per cent. exchanged their books in some other division at July, 1937. Of these 85,460 books 40,380 or over 47 per cent. were exchanged in the London and South-Eastern division. Substantial numbers were exchanged in the South-Western and Midlands divisions.

Glamorgan and Monmouthshire, accounted for about 72 per cent. of the books of men in the sample which were originally issued in Wales. About 80 per cent. of the movement from Wales to other divisions was from these two counties, and about one in six of the books of men issued there, and included in the sample, were exchanged in other divisions in 1937, the majority being exchanged in the London and South Factors divisions

Of 631,410 books of men aged 21–64 originally issued in the Northern division, 81,910 or 13 per cent. were exchanged in some other division in 1937, and of this number 41,940 or 51 per cent. were exchanged in the London and South-Eastern divisions. The figures also show an appreciable movement into the North-Eastern division

As the North-Eastern and North-Western divisions adjoin the Northern division, some movement between these divisions was to

Of the men's books originally issued in the South-Western division 9.5 per cent. were exchanged in other divisions. Proximity to London has doubtless had an important influence on the figures, since about 72 per cent. of the movement out of the South-Western division has been into the London and South-Eastern divisions. Nearly one half of the movement has been from counties which adjoin the South-Eastern division. The North-Eastern and North-Western divisions have lest between 7 and 8 per cent of the hooks Western divisions have lost between 7 and 8 per cent. of the books originally issued there; the Midlands and Scotland between 5 and 6 per cent., while of the books issued in London and the South-Eastern divisions only about 3 per cent. were exchanged in other divisions. From the North-Eastern division there has been considerable movement into the adjoining Midlands division as well as into the London and South-Eastern divisions; such movement as has occurred from the Midlands, North-Western and Soutland divisions sions has also been largely into the London and South-Eastern area. Of the 2,364,500 books for men aged 21-64 which were exchanged in the London and South-Eastern divisions in 1937 over 10 per cent. were originally issued in some other division, 42,680 or 1.8 per

cent. were originally issued in the South-Western division, 41,940 or 1.8 per cent. in the Northern division, 40,380 or 1.7 per cent. in Wales, and 38,820 or 1.6 per cent. in the North-Western division. Movement into the Midlands division has been mainly from the North-Eastern, North-Western and Wales divisions. There has been comparatively little long distance movement into the northern part of England or into Scotland, and such movement as has occurred has been more than counterbalanced by transfers from these

Among women, the movement between one division and another has, on the whole, been less than among men, but appreciable numbers have transferred from the Wales, Northern and South-Western divisions. A large proportion of the women who have transferred have moved into the London and South-Eastern divisions; the Midlands area has also received significant numbers from

adjoining divisions. It was considered desirable to deal separately with persons under 21 years of age in the analysis, partly because the period covered was necessarily shorter in their case, and because, having regard to the circumstances of the five years 1932 to 1937, their movement from the less prosperous areas was likely to be heavier, in relation to the period covered, than in the case of adults. The sample shows that among insured persons aged 16 to 20 there has been a movement similar in direction to that among adults. Ten per cent. of the unemployment books for young men and boys issued in Wales, 7 per cent. of those issued in the Northern division, and 5 per cent. of those issued in the South-Western division were exchanged in other divisions in 1937, the great majority being exchanged in the London, South-Eastern and Midlands divisions where there has been a considerable demand for such labour. Similar movements, but of somewhat smaller relative dimensions, have occurred among insured young women and girls. the circumstances of the five years 1932 to 1937, their movement

have occurred among insured young women and girls.

NUMBER OF AGRICULTURAL WORKERS IN GREAT BRITAIN.

ENGLAND AND WALES.

The following figures, taken from preliminary statements issued by the Ministry of Agriculture and Fisheries show the number of agricultural workers on holdings above one acre in extent in England and Wales on 4th June, 1938: the figures are subject to revision. The corresponding (final) figures for 4th June, 1937, are also given.

		ular kers.		ual kers.	All Classes.		
	1938.	1937.	1938.	1937.	1938.	1937.	
Male workers— 21 years old and over Under 21 years old	381,200 90,100	395,200 94,600	47,800 6,300	58,000 7,300	429,000 96,400	453,200 101,900	
Total, male workers	471,300	489,800	54,100	65,300	525,400	555,100	
Women and girls	41,400	46,200	25,500	30,400	66,900	76,600	
Total, both sexes	512,700	536,000	79,600	95,700	592,300	631,700	

It will be seen that there was a decline in the numbers of all classes in 1938 as compared with 1937, the total number decreasing by 6.2 per cent. Proportionately, the most marked decreases occurred among casual workers, the number of male workers decreasing by 17.2 per cent. and the number of female workers by 16.1 per cent. Among regular male workers the decreases in 1938 amounted to 3.5 per cent. among those 21 years old and over, and 4.8 per cent. among those under 21.

among those under 21.

It is pointed out that owing to 4th June falling on the Saturday before Whit Sunday this year, when the yearly and half-yearly hirings customary in some parts of England and Wales normally terminate, some workers who had not taken up their new engagements may have been omitted from the returns.

SCOTLAND.

The following Table, taken from the preliminary statement issued by the Department of Agriculture for Scotland, shows the corresponding figures for Scotland, those for 4th June, 1938 being subject

	Regi			sual kers.	All Classes.		
2 - 2 - 2	1938.	1937.	1938.	1937.	1938.	1937.	
Male workers— 21 years old and over Under 21 years old	58,000 18,200	59,400 19,300	6,500 2,200	7,100 2,800	64,500 20,400	66,500 22,100	
Total, male workers	76,200	78,700	8,700	9,900	84,900	88,600	
Women and girls	15,000	16,200	5,100	6,000	20,100	22,200	
Total, both sexes	91,200	94,900	13,800	15,900	105,000	110,800	

All classes showed a reduction in numbers, as compared with 1937, the total number decreasing by 5·2 per cent. The reductions, as in England and Wales, were proportionately largest among casual workers, of whom there were 12·1 per cent. fewer males and 15·0 per cent. fewer females in 1938. Among regular workers the decreases in 1938 amounted to 3·2 and 7·4 per cent. for males and females respectively.

HOURS OF EMPLOYMENT OF YOUNG PERSONS.

THE Young Persons (Employment) Act, 1938, which received the Royal Assent on 29th July, will regulate the hours of employment of persons under 18 years of age in the following classes of employment (unless the hours of such persons are already regulated by Factories, Mines or Shops Acts, or the young persons are employed in or in connection with agriculture or in a ship):—

(a) employment in the collection or delivery of goods, or in any earrying, loading or unloading of goods incidental to the collection or delivery thereof:

(b) employment in connection with a business carried on at any premises in carrying messages or running errands, being employment wholly or mainly outside the premises;

(c) employment at a residential hotel or club in carrying messages

or running errands, or in connection with the reception of guests or members thereat;

(d) employment in connection with the business carried on at any premises where a newspaper is published, in carrying messages unning errands:

(e) employment at a place of public entertainment or amusement, or at a public swimming bath, bathing place or turkish bath, in carrying messages or running errands, or in the reception of or

attendance upon persons resorting thereto;
(f) employment elsewhere than in a private dwelling-house, in the operation of a hoist or lift connected with mechanical power;

(g) employment in, or in connection with, the operation of cinematograph apparatus;

(h) employment at any premises occupied for the purposes of the business of a laundry, dyeing or cleaning works or other factory, in receiving or despatching goods.

As regards young persons thus employed, the Act limits working hours to 48 weekly, and prescribes intervals for meals or rest, a weekly half-holiday, and a whole holiday on Sunday or a day in lieu. A limited amount of overtime is allowed for persons over 16. For persons under 16, overtime is prohibited, and the working hours are to be reduced to 44 weekly from 31st December, 1939. An amendment to the Shops Act, 1934, provides that the hours of persons under 16 employed about the business of shops shall at the same time be reduced to 44, subject to averaging of hours during the Christmas fortnight.

Christmas fortnight.

Night work is prohibited during a period of eleven consecutive hours, including the hours between 10 p.m. and 6 a.m.

The Act comes into operation on 1st January, 1939. It does not apply to Northern Ireland.

ACCIDENTS TO RAILWAY SERVANTS.

A "Report to the Minister of Transport upon the Accidents which occurred on the Railways of Great Britain during the year 1937" has been published.* The Report covers all railway accidents and all persons killed or injured in railway accidents, whether passengers, servants of railway companies and contractors, or other persons.

As regards railway servants and contractors' servants, the number

As regards railway servants and contractors' servants, the number killed by such accidents in 1937 was 236, and the number injured (and thereby absent from their ordinary work for more than three days) was 17,437

The returns distinguish (i) train accidents (i.e. accidents to trains, rolling stock, permanent way, etc.); (ii) movement accidents (i.e. accidents caused by or connected with the movement of railway vehicles exclusive of train accidents); and (iii) non-movement venicles exclusive of train accidents); and (iii) non-movement accidents (i.e. accidents on railway premises not due to train accidents or to the movement of any railway vehicles). Of the servants killed, 11 lost their lives owing to train accidents, 178 to movement accidents, and 47 to non-movement accidents. For servants injured the corresponding figures were 116, 2,927 and 14,394 respectively. The Report contains a detailed analysis of these figures, and examines at some length the circumstances in which accidents occurred.

CENSUS OF SEAMEN, 1937.

THE results of the Census of Seamen, recently published,† show that the number of seamen employed on 15th June, 1937, on sea trading vessels registered under Part I of the Merchant Shipping Act, 1894, in the United Kingdom, the Isle of Man and the Channel Islands, was 161,148. The addition to this number of the first crews in 1937 of vessels not employed on the Census date, but employed at some other time during the year, produces a total of about 190,900 seamen—about 5,000 more than in 1936.

of the 161,148 seamen employed on 15th June, 1937, the number employed in steam vessels was 133,689, in motor vessels 27,027, and in sailing vessels 432. The number employed in the foreign trade was 141,742 and the number in the home (including coasting)

trade was 19,406.

The total of 161,148 included 109,727 British (of whom 27,260 were officers), 7,534 foreigners (of whom 343 were officers), and 43,887 Lascars. In the Deck Department 61,443 seamen were employed, in the Engine-room Department 54,664, and in the Stewards' Department 45,041.

COLLECTIVE AGREEMENTS PROVIDING FOR PAYMENT OF WAGES FOR HOLIDAYS.

In the issue of this GAZETTE for March, 1938, particulars were given of the provisions regarding payment for annual holidays, contained in collective agreements between organisations of employers and workpeople known to have been in operation at the beginning of March. It was estimated that the number of wage-earners covered by such collective agreements was about three millions. Since that date, a considerable number of new agreements have been arrived at, or have been reported to the Department, and it is estimated that the number of wage-earners now covered by collective agreements providing for annual holidays with pay is nearly four millions. This total is exclusive of the large number of salaried employees and workers on "standing" wages who are allowed annual holidays with pay, and of the wage-earners employed by firms who, though not parties to collective agreements, actually grant holidays with pay to their workpeople under individual arrangements.

The Table below gives a list of the industries or occupations in which further general or district agreements, containing such provisions, have come to the notice of the Department since the publication of the March, 1938, issue of this GAZETTE, together with particulars of the number of holidays per annum for which payment is made, and the length of the qualifying service required. Except where otherwise stated, the holidays shown are exclusive of the usual public holidays, some or all of which are also granted and paid for unless the contrary is indicated. In addition to the agreements referred to in the Table agreements in the coal mining industry paid for unless the contrary is indicated. In addition to the agreements referred to in the Table, agreements in the coal mining industry in Nottinghamshire and North Derbyshire provide that certain of the days on which employment is not available shall be grouped together into a "closing down period" of six consecutive working days for which payment shall be made out of a "savings scheme." In the coal mining industry in North Staffordshire provision is made for the payment of an annual bonus for attendance at work, but the agreement does not specify any holiday period.

In addition to the new agreements given in the Table below, amendments have been made to the conditions of the holiday payment in a few industries for which particulars were given in the March, 1938, GAZETTE. In the railway police service, uniform constables are now entitled to 9 days holiday with pay instead of 6, and uniform and detective sergeants to 12 days instead of 9. The agreement for bakers employed by co-operative societies in Bristol and Somersetshire has been extended to Wiltshire and Dorsetshire, and 9 days holiday with pay is now granted after 24 months' service. Boot and shoe repairers employed; by co-operative societies in Lancashire, Cheshire, North Wales and parts of Derbyshire and Staffordshire now have 6 days holiday after 6 months' service and 9 days after 12 months. Employees of retail co-operative societies in Cornwall 12 months. Employees of retail co-operative societies in Cornwall now have 3 days holiday after 6 months' service, 6 days after 12 months and 9 days after 24 months, while those in Kent now have 6 days after 12 months' service, 8 days after 24 months, and 10 days after 36 months.

AGREEMENTS SUPPLEMENTARY TO THOSE SHOWN ON PAGES 86 TO 88 OF THE MINISTRY OF LABOUR GAZETTE FOR MARCH, 1938.

A.—GENERAL AGREEMENTS. Clay Industries (England and Wales) Printing Ink and Roller Making (England and Wales) Pig Iron and Iron and Steel Manufacture: Bricklayers and Masons employed at Blastfurnaces in Cleveland, Cumberland and North Lincolnshire and Steel Works on North-East Coast, in Cumberland, Lancashire, South Yorkshire, Lincolnshire, the Midlands, South Wales and West Scotland Maintenance Engineers employed at Blastfurnaces and in Iron and Steel Works (Great Britain) Boilermakers, Electricians, Patternmakers, Blacksmiths, Foundry Workers, Heating and Domestic Engineers employed at Blastfurnaces and in Iron and Steel Works (various districts in England and Scotland) Coke Ovens attached to certain Blastfurnaces (North-East Coast, North Lincolnshire, Corby, Workington and South Wales) Roll Turners employed at Steel Works (Scotland, North-East Coast, North Lincolnshire, Corby, Workington and South Yorkshire)	Industries or Occupations.	Holidays paid for per annum, apart from Public	Qualifying Service in

September, 1938. THE MINISTRY OF LABOUR GAZETTE.

FACTORIES AND WORKSHOPS: CHIEF INSPECTOR'S REPORT FOR 1937.

The Annual Report of H.M. Chief Inspector of Factories and Workshops for the year 1937 has been issued.*

The Report consists of an introduction and general report together with chapters on safety, accidents to young workers, health, hours of employment, welfare, piece-work particulars, truck, and the Home Office industrial museum; the Report concludes with a number of Tables which include, this year, the results of special inquiries undertaken in connection with the Factories Act, 1937, and a quiries undertaken in connection with the distribution of factories according (published triennially) showing the distribution of factories according to the numbers of persons employed.

Factories Act, 1937.—It is pointed out that the Factories Act, 1937, Factories Act, 1937.—It is pointed out that the Factories Act, 1937, is an innovation in factory legislation. Hitherto, the elasticity, essential in view of the variety of conditions that have to be provided for in a single Act designed to cover the whole of industry, has for the most part been secured by framing the requirements in general terms, and adapting the application of these requirements to the circumstances of each case. In the new Act, however, an alternative method has been much more extensively adopted, the requirements embodied in it (especially those relating to safety) having been made precise and detailed; the necessary latitude has been attained by conferring extensive powers, both of exemption and of imposing additional restrictions, where necessary.

Industrial Developments.—The Report refers to the introduction of new industries into those areas which had suffered most during the years of depression. In Lancashire, the tendency noted in previous Reports for cotton mills and weaving sheds to be turned over to the manufacture of silk and rayon continues, and many mills have also been adented for the manufacture of a warriety of a the have also been adapted for the manufacture of a variety of other goods. Reference is made to the establishment and development of Trading Estates by the Commissioners for Special Areas in the North of England, in Scotland and in South Wales; also to the fact that, in choosing localities for new works, industrialists are now becoming aware of the advantages of building their factories in a

(a) Except where otherwise stated, it is understood that the usual public holidays, or days in lieu, are granted and paid for, in whole or in part, in addition to the periods specified.
(b) A pro rata holiday or payment is allowed to workers with service of less than the amount specified.
(c) No provision is made by agreement for payment of wages in respect of public holidays except to those called upon to work.
(d) The agreements provide that, for each full week's work performed, there shall be credited a sum representing one-fiftieth of the appropriate time rate.

(e) The agreement provides for 12 days holiday, 6 of which are specified public holidays and without pay.

(f) The agreement in this case provides for a holiday payment for 1938 only.

(g) In Torquay the holidays are 12 days after 12 months' service and in Newton Abbot 10 days after 12 months.

(h) A pro rata holiday is allowed to workers with not less than 9 months' in the service.

The holiday is applicable to employees engaged prior to 1st March in any

(k) The holiday is applicable to employees engaged prior to 1st January in

Any year.
* Cmd. 5802. H.M. Stationery Office; price 2s. net (2s. 2d. post free).

district where a supply of labour is available, rather than in an already congested industrial area into which they have to bring their workers from outlying dormitory towns or districts. Work is thus carried on under much more advantageous conditions both as regards the health of the workers, and economy of labour and

Safety.—There has been a substantial increase in the number of accidents reported, though the increase is not so great as last year. The total number of accidents reported during the year was 193,542, of which 1,003 were fatal, showing an increase in each case of about 9 per cent. over the figures for 1936. This increase appears to be attributable in the main to greater industrial activity, especially in the heavy industries, for the increase in accident incidence is substantially more rapid than the increase in the number of persons employed. It was most marked in those areas in which the heavy industries are situated or where there has been great industrial expansion. Thus in the Middlesbrough district the non-fatal accidents increased by 20 per cent. and the fatal accidents by 40 per cent., while in the Newcastle district the increase was over 16 per cent. and 20 per cent. respectively. A factor of growing importance in connection with the incidence of accidents in certain areas is the employment for the first time in factories of large numbers of unskilled employment for the first time in factories of large numbers of unskilled or partly trained persons on processes or at machines of which they have little or no knowledge, in consequence of the shortage of skilled or semi-skilled labour. Other factors which must be taken into consideration are the speeding up of operations and the longer hours worked in many factories.

worked in many factories.

The incidence of accidents to young workers under the age of eighteen, in proportion to the number in employment, continues to be greater in frequency than to adult workers of the corresponding sex, and continued special attention has been devoted by Inspectors to the incidence of accidents among young workers.

Comments on the various classes of accidents occupy a considerable part of the Report, and Statistical Tables in the Report give detailed analyses of the accidents, classified according to industry, age and sex, and the causes of accidents. More than a third of the fatal accidents, and more than half the total number of accidents in 1937, occurred in the metal, engineering and shipbuilding group of industries.

dents, and more than half the total number of accidents in 1937, occurred in the metal, engineering and shipbuilding group of industries. During the year a return was made which showed that safety committees exist in 1,246 works. The Report states that this particular feature in safety organisation is specially suitable for either large works or works involving common risks and that, in view of the fact that there are only 4,100 factories with more than 250 workers (and 1,535 with more than 500 workers), the situation is regarded as not unsatisfactory. Other methods of safety organisation include the pooling of the joint experience of employers and workers through, for instance, the Joint Standing Committees covering the cotton spinning, cotton weaving, paper making and flour milling industries. There are also the activities of the regional industrial safety committees covering certain specified areas. mittees covering certain specified areas.

Health.—The number of cases of industrial poisoning or disease reported in 1936 and 1937 under the Factory and Workshop Act, 1901, and under the Lead Paint (Protection against Poisoning) Act, 1926, are summarised in the following Table:

and w homestates on a service of	Ca	ses.	Deaths.		
Disease.	1937.	1936.	1937.	1936.	
Lead poisoning: In factories, etc. In painting of buildings Other forms of poisoning Anthrax Epitheliomatous ulceration Chrome ulceration	30 31 23 183	136 27 9 30 142 84	13 6 1 4 31	6 7 3 1 27	
Total	479	428	55	44	

The number of cases of lead-poisoning was fewer than in any year since the disease was made notifiable; the increase in the number of cases of epitheliomatous ulceration can be ascribed in part to more extensive medical examination of workers.

extensive medical examination of workers.

Seventy-four deaths from silicosis and 65 from silicosis with tuberculosis were notified during 1937; also nine deaths from asbestosis and from asbestosis with tuberculosis. There were 196 cases of gassing reported, with 20 deaths, but many other cases of gassing did not come within official notice. The number of cases of dermatitis reported voluntarily, was 1985, the highest figure yet recorded.

Several pages of text in the Report are devoted to the various kinds of industrial poisoning and diseases.

Hours of Employment.—It is observed that, notwithstanding the trend towards shorter hours, there still remained groups of factories and numerous individual factories in which advantage was taken of the long hours allowed by law. These long hours will have been reduced by the operation of the Factories Act, 1937, under which from July, 1938, the normal maximum weekly limit of hours for women and young persons is 48. Instances are given of flagrant infringements of the law in regard to hours of employment; it is remarked, however, that the bulk of the illegal employment is of a less serious character.

The number of applications to work the two-shift system has been greatly reduced, following the passing of the Employment of Women and Young Persons Act, 1936.

Welfare.—The Report contains a brief account of the present position of Welfare organisation, including schemes which are outside the requirements of the Factory Acts. Reports from all parts of the country indicate an increased interest in that side of factory organisation which is generally included under the term "Welfare."

346

THE TRADES UNION CONGRESS, 1938.

The seventieth Annual Trades Union Congress was held at Blackpool on 5th September, 1938, and the four following days. The President was Mr. H. Elvin, the Chairman of the General Council.

The number of delegates appointed to attend the Congress, as shown in the statistical statement compiled by the General Council, was 650; the number of organisations affiliated to the Congress (including those organisations, with an aggregate membership of about 56,000, which did not appoint delegates) was 170*, with a membership of approximately 4,461,000 at the end of 1937.

The following Table shows the total memberships of the affiliated unions, grouped according to the classification adopted by the Department for its annual statistics of membership of all trade unions; comparative figures are also given for 1937:—

And other sections of the section of		1938.			1937.

Totals	170*	650	4,460,617	169*	623	4,008,647

The total membership of the affiliated unions at the end of 1937 showed an increase of over 11 per cent. as compared with the end of 1936, all the above groups sharing in the increase. The total for the end of 1937 is made up of 3,932,215 males and 528,402 females, these numbers representing increases of $10\frac{1}{2}$ and over 17 per cent. respectively as compared with the previous year.

In his presidential address, Mr. H. H. Elvin gave an account of some of the principal activities of the General Council during the past year. In particular, he commended the Council's Youth Charter (embodying proposals for legislative and other reforms in the industrial conditions of young persons), and stressed the need to attract youth to the trade union movement; he recounted what had been done towards securing holidays with pay as a condition of employment, and pressed for further help from the Government in extending this principle to all industries; he spoke of the Council's hopes for securing the physical fitness of the workers, and removing obstacles thereto, through the Joint Committee recently established with the British Medical Association; he commended the Council's attempt to organise domestic servants, and also the work of the Research Department of the Congress, whose services he urged that trade unions should use more generally.

The Congress then proceeded to consider the General Council's Report, taking in connection therewith a number of resolutions prepared by the Council, or proposed by affiliated Unions.

A composite resolution, which requested the General Council to consider the questions of transfer of trade union members and mutual recognition of cards, was lost, as was another resolution, which urged the establishment of national machinery for regulating the wages of County Council employees. The Congress passed unanimously a resolution which sought to make foreign firms starting business in this country conform to British conditions of employment; a motion urging trade unionists and the public generally in purchasing goods to insist on assurances that they have been made and are sold under trade union conditions was referred to the General Council for consideration. A resolution was passed relating to improved and national scales of salaries for women public health officers, and also another, condemning "House Unions" and claiming the right of all workers, including non-manual workers, to form their own organisations for the purpose of collective bargaining with their employers.

The principal subject of debate on the second day of the Congress was re-armament, and the approach to the trade unions which had been made by the Government through the General Council, for the purpose of securing their co-operation. Sir Walter Citrine, the General Secretary, in presenting the Council's report on the subject, explained the attitude adopted by the Council, and a motion to refer back the report was lost by a large majority.

The Congress approved without division a report by the General Council on the preliminaries for a scheme of National Maternity Service which had been agreed upon by the Joint Committee representing the British Medical Association and the Council.

The Congress passed a resolution opposing the extension of rent de-control, and also another, urging an amendment to the Education Act, 1936, which would remove the power of Local Education Authorities to exempt children from remaining at school until the age of 15. A resolution demanding that the General Council should withdraw the ban on the Communist Party, imposed in 1934, was defeated.

On the third day of the Congress the General Council brought forward an emergency resolution on unemployment, which was carried unanimously. The resolution referred to "the unmistakable signs of the approach of a new trade depression," and, claiming that international co-operation through the League of Nations, systematic planning, and the re-organisation of basic industries on lines already approved by the Congress, were essential factors in meeting the situation, urged that an immediate survey of the situation should be undertaken by the Government, and plans prepared "for the development of the country's resources and its better economic equipment, with particular regard to the immediate needs of the Depressed Areas."

The Congress passed, on a card vote, a resolution in favour of pooling the surplus funds of Approved Societies, with a view to securing equal benefits for all insured persons. A resolution for increasing Old Age Pensions and reducing the pension age was passed, as was another, relating to the co-ordination of industrial sickness statistics by trade unions, for the purpose of improving factory legislation and assisting claims under the Workmen's Compensation Act.

Most of the discussions on the fourth day of the Congress turned on the international situation. Consideration was given to the section of the General Council's report in which were stated the Council's reasons for refusing the request of certain trade unions for a special conference, with reference to taking direct industrial action in opposition to the foreign policy of the Government. The Congress endorsed the action of the General Council. A resolution in favour of a refusal to handle goods from or to any country regarded as an aggressor by the League of Nations was defeated, but another resolution, calling for the immediate consideration of a co-ordinated policy to remove the embargo on arms for the Spanish Government, was passed. In making a statement as to the financial assistance already rendered to the Spanish Government by British trade unionists the General Secretary announced the gift of a further sum of £5,000 by the General Council.

The Congress gave special consideration to an important declaration which had been issued the previous evening under the joint signatures of the General Council and of the executives of the Labour Party and the Parliamentary Labour Party. This dealt with the present European crisis, and called for a firm British stand against aggression and for the immediate summoning of Parliament. A motion to refer back the declaration was defeated almost unanimously.

A resolution which was passed relating to employers' pension schemes condemned schemes organised by Employers' Associations in the administration of which employees had no share, and those which prohibited trade union membership. Another resolution urging support for the demand for pensions for unmarried women at 55 years of age was lost on a card vote.

The fifth and concluding day of the Congress opened with an attack on the General Council for supporting the action of the International Federation of Trade Unions in breaking off negotiations for the admission of the Russian trade unions into the Federation. The General Council's attitude in the matter was, however, approved by a large majority, on a card vote. A resolution was subsequently passed asking the General Council to continue its efforts to achieve unity of action with trade unionists in all countries. Arising out of the resolution passed on the previous day with regard to lifting the embargo on arms for Spain, approval was given to proposals under which simultaneous approach to their respective Governments was to be made by the French and British labour movements, while an appeal for funds in aid of the Spanish Government was to be made to all trade unions affiliated to the Congress.

The Congress passed a resolution, which was moved on behalf of the General Council, urging the Government to insist on colonial administrations giving prompt effect to measures for improving the status and conditions of employment of native labour, including the introduction of trade union principles. A declaration by the General Council on the subject of Jewish refugees was also approved; this urged admission of the refugees into Palestine "according to the economic absorptive capacity of the country."

Among a large number of resolutions which were carried relating to conditions in this country, one pressed for the reconstitution of the Food Council and for measures against profiteering in food and other commodities; while another demanded improved conditions for agricultural workers, and a review of the agricultural industry to ensure more home-grown food. Two resolutions were concerned with the nationalisation of the engineering and electricity supply industries respectively. Of resolutions relating to the Unemployment Insurance Act, one urged that there should be no disqualification from benefit where a stoppage of work was caused by an employer contravening an area or national agreement, while another desired the inclusion of non-manual workers up to an income limit of £500 per annum. The reconstitution of the Grocery and Provisions Trade Boards was called for in another resolution. Objects covered by other resolutions included the enforcement of the "fair wages" clause in factories on trading estates in the Special Areas; reforms in the law relating to Workmen's Compensation; additional restrictions in the working hours of young persons under the Shops and Factories Acts; the extension of the Factories Act to agriculture; and the limitation of working hours of motion picture projectionists to a maximum of 8 per day or 48 per week.

REGISTERED TRADE UNIONS.

MEMBERSHIP, INCOME, EXPENDITURE AND FUNDS.

THE Chief Registrar of Friendly Societies has issued a Statistical Summary relating to the membership and finances in 1937, with comparative figures for previous years, of trade unions registered under the Trade Union Acts, 1871 to 1927.*

under the Trade Union Acts, 1871 to 1927.*

The Tables which follow have been compiled from this Summary, and relate to registered unions of employees. The figures shown for unemployment, travelling and emigration benefit represent the total amount paid by the unions, including, in addition to the benefit chargeable to the funds of the unions, the amount disbursed by the unions and recoverable from the Ministry of Labour under the Unemployment Insurance Acts. The total amount receivable each year from the Ministry of Labour on this account and in respect of administration expenses is included under "Income." Under income "from other sources" and grants, etc. to federations and other societies are included transfers of funds consequent upon

In addition to the above there were 95 registered associations of employers in 1937, with a membership of 52,206. The income of these associations amounted to over £178,000 in 1937, and their expenditure to nearly £163,000, the funds of the associations totalling £350,000 at the end of 1937.

SAFETY IN MINES RESEARCH BOARD.

The above Board is appointed by the Secretary for Mines to direct generally the work of research of the Mines Department into the causes of mining dangers and the means of preventing such dangers, the work of the Board being financed mainly by grants from the Miners' Welfare Fund. The Mines Department has issued the Sixteenth Annual Report of the Board covering the year 1937†.

A section of the Report is devoted to an account of the means adopted by the Board for the dissemination of information concerning safety in mines by means of lectures, demonstrations, cinema films, etc.

Another section deals with the progress of safety research, as regards such matters as coal dust and firedamp explosions, mining explosives, mine lighting, falls of ground, haulage, wire ropes, etc.

A third section gives a report of the work of the Health Advisory Committee on research work concerning mine temperatures siliosis

A third section gives a report of the work of the Health Advisory Committee on research work concerning mine temperatures, silicosis, and protection against dust; while another section gives an account of the joint efforts made with other countries in safety research work. Lists of the various publications of the Board are given in Appendices.

THE FORTY-HOUR WEEK IN FRANCE: FURTHER MODIFICATIONS.

In pursuance of its policy of simplifying and rendering more elastic the methods of applying the forty-hour week legislation, and of increasing the facilities for working overtime in exceptional circumstances (see this GAZETTE for February, May and June, 1938, pages 49, 175 and 216), the French Government has recently issued a number of Decrees, the main provisions of which are summarised below.

Simplification of Procedure.—A Decree-Law was signed on 21st June, 1938, by the French President and members of the Cabinet, amending, in the interest of greater speed and simplicity, the procedure laid down in the Forty-Hour Week Act dated 21st June, 1936, for the drafting of regulations applying the reduced working hours. The Act requires that the issue of such regulations must be preceded by consultation with the competent section or sections of the National Economic Council, an advisory body comprising twenty sections representative of the various branches of commerce and industry (see this GAZETTE for July, 1936, page 244). This procedure is considered to be too cumbrous, especially when regulations of a general character are in contemplation, and the Decree-Law accordingly substitutes for detailed consultation with the sections of the National Economic Council reference to the Standing Committee of that body. The Decree-Law was issued in virtue of special legislative powers temporarily conferred upon the Government and will require subsequent ratification by Parliament.

Additional Facilities for Overtime.—Two Decrees dated 6th August, 1938, give practical effect to the recommendations of the Committee of Enquiry into Production as regards additional allowances of overtime in industries suffering from a shortage of skilled labour and in certain key industries which have reached the limit of their productive capacity under existing conditions.

The first Decree provides for 75 hours of overtime a year, in addition to those already permissible, in respect of specified occupations for which a shortage of suitably qualified labour has been proved in the metal, engineering and shipbuilding, hardware and domestic utensils, motor-car body building, watch and clock, optical instrument, and certain other industries. The additional working time, which is subject to payment at increased rates, may not exceed three hours a week nor one hour a day. Each undertaking which proposes to have recourse to the additional overtime must obtain the sanction of the Labour Inspector, opportunity being given to the workers' organisations concerned to notify the existence of any suitable available labour.

The second Decree authorises undertakings in specified branches of industry, the activity of which is a determining factor in important sections of national production, to apply to the Inspector of Labour for permission to work, during 1938, 50 hours of overtime after the exhaustion of the overtime permitted under other regulations. This additional overtime may not exceed one hour a day, and must be remunerated at increased rates. The specified branches of industry include the manufacture of machine tools, and of machinery and plant for works of construction and for the textile, paper and printing, food and chemical industries.

Future Government Policy.—In a broadcast message to the French nation on 21st August, 1938, the Prime Minister, M. Daladier, fore-shadowed important modifications in the working-hours legislation. He declared that, in view of the present situation in Europe, it should be possible in France for work in the interests of national defence to be carried on for 48 hours a week, if necessary, and, further, that any undertaking in which overtime was necessary should be able to extend working hours without unnecessary formalities and protracted discussions, and without having to pay exhorbitant overtime rates; overtime rates, he considered, should not, on average, exceed 10 per cent. above normal wage rates.

On 30th August, 1938, a Decree was signed by the French President and countersigned by all members of the Cabinet giving partial effect to the policy enunciated by the Prime Minister. The first article of the Decree reiterates the provision, appearing in the existing regulations applying the forty-hour week, by which the Government may order the extension, by the amount deemed necessary, of hours of labour on work in the interests of national defence and safety or of the public service. In a statement published with the Decree, it is explained that this article is designed to emphasise the determination of the Government to utilise the powers which it already possesses to extend working time in the circumstances in question. Further provisions of the Decree authorise the Minister of Labour, after consultation with the employers' and workers' organisations, to grant permission to undertakings or groups of undertakings, in industry generally, to work 100 hours of overtime a year, additional to those permissible under existing regulations (in general, 75 hours a year) during periods of exceptional pressure of work which cannot be dealt with by the normal staff or by the engagement of extra workers.

It is announced that the issue of a Decree is contemplated which will further simplify and accelerate the procedure for extending working hours, and that draft legislation will be submitted to the next session of Parliament authorising a reduction of the rates of overtime pay laid down in collective agreements.

^{*} In some of the textile trades not only are amalgamated associations represented as such, but the branch associations of which they consist send separate delegates. These branch associations have not been reckoned as separate organisations.

WAGES IN SWITZERLAND, 1937.

The official journal of the Swiss Federal Department of Economic Affairs, La Vie Economique, in the issue for June, 1938, contains particulars, from which the Table below has been compiled, of the average hourly and daily earnings in 1937 of workers whose earnings were ascertained for the purpose of assessing compensation for accidents sustained by them during the course of the year.

The average earnings shown in the Table are based on the actual

The average earnings shown in the Table are based on the actual earnings (including all additions to normal wages) received at the time of the accidents and relate to 63,429 workers, of whom 50,140 furnished returns of their earnings on an hourly basis, and 13,289 on a daily, weekly, monthly or yearly basis (converted to a daily basis for the purpose of the statistics).

All industries, in- cluding some not \ hourly shown above, in \ daily 1936	43,260 13,065	1·52 16·15	1·33 12·12	1.03 9.51	0·69 6·11	0·48 4·11		

The downward tendency of wages in Switzerland, which had been in evidence for some years, was arrested in 1937, and the average hourly and daily earnings of most classes of adult workers included in the Table remained almost stationary or showed small increases, of one or two per cent. Actually, the improvement in wages was somewhat greater than is indicated by the above averages, which are based on figures collected throughout the year, as a considerable proportion of the workers received wage increases in the second half of the year. On the other hand, the cost of living in Switzerland, measured by the official cost-of-living index figure, rose by 4-8 per cent. in 1937, so that, on the whole, the purchasing power of earnings declined somewhat during the year.

power of earnings declined somewhat during the year.

It should be pointed out that, for the purpose of assessing compensation for accidents, the proportion of earnings which exceeds 21 francs a day is disregarded. The true average earnings of workers, especially foremen, in the higher wage classes, may therefore be somewhat higher than those shown in the Table.

An article dealing with cornings in Switzenland in 1976 approved.

An article dealing with earnings in Switzerland in 1936 appeared in this GAZETTE for September, 1937.

WAGES AND HOURS MOVEMENTS OVERSEAS.

FRANCE.

Supplementary Working Days in Coal Mines.—By an agreement, concluded on 1st September, 1938, between the coalowners' and the underground mineworkers' organisations, 11 supplementary days, each of the normal duration of 7 hours 45 minutes, will be worked in French coal mines between the date of the agreement and March, 1939, and an endeavour will be made to accelerate the renewal of colliery equipment and the construction of mine workers' houses. The agreement was effected in response to an appeal by the Government in which the necessity of increasing the output of coal in France and lessening the dependence upon imported coal was emphasised. In return, the Government promised to take action, especially as regards coal import quotas and conditions of transport, to eliminate short-time working and to guarantee the home market for French coal. The workers having agreed that the overtime payment due for work done on the supplementary days shall be distributed over all the working days, the employers have granted, in respect of all work done during the period of the agreement, an increase in wages of 6 per cent., of which 2 per cent. represents the rate for overtime. The terms of the agreement, as regards supplementary working time, have been embodied in a Ministerial Decree dated 10th September.

Dock workers (Marseilles).—The work of the port of Marseilles has been seriously hindered since 11th July by the refusal of dock workers to perform overtime, night work and work on Sundays and holidays. This action was decided upon, during the course of protracted negotiations for a revised collective agreement, in order to enforce a demand for increased wages. The dispute showed

*The hourly and the daily averages in the Table relate to different groups

a tendency to spread to ports in French North Africa and Corsica, and, at Marseilles, it was found necessary to employ Senegalese troops to handle some of the cargoes affected. On 14th August an official arbitrator ruled that the dock workers were not entitled to refuse overtime, night or Sunday work, such work being in conformity with existing regulations and agreements, and that negotiations for a settlement of the dispute should continue. The dock workers refused to obey the ruling of the arbitrator. On 26th August, an Order was signed which provided that the work of the port might be carried on either by the day of 6 hours 40 minutes, divided into two working periods each of 3 hours 20 minutes (the arrangement hitherto prevailing at Marseilles), or, alternatively, in two successive daily shifts, each of 6 hours 30 minutes, inclusive of a break of 30 minutes. The granting of an increase in wages from 55·40 to 61 francs a day was made dependent upon observance of the terms of the Order. Some work was carried out on Sunday, 28th August; but, on the following day, the dockers refused to work in successive shifts, and the employers accordingly withheld the wage increase. On 30th August, a Decree was signed applying to the port of Marseilles the provision of the Act dated 11th July, 1938, for the general organisation of the nation in time of war. Publication of the Decree was delayed until 7th September to permit of further efforts to reach a settlement. On 12th September, the dispute was brought to an end by the signing of an agreement which was confirmed by an Order and which embodies, in the main, the terms of the Order dated 26th August. The working of successive shifts was, however, made subject to the payment of an additional allowance of 4 francs a day, and the duration of the shift was reduced to 5 hours 20 minutes, without a break.

ITALY

Cotton Textile Industry.—In the course of negotiations between the employers' and workers' organisations for the renewal of the collective agreement governing working conditions in the Italian cotton textile industry, it has been agreed that the wages of workers in the industry, numbering about 200,000, shall be increased by 10 per cent., the increase to take effect as from 9th May, last.

WAGES IN FINLAND, 1937.

The Finnish Ministry of Social Affairs, in collaboration with the employers' associations, has carried out an enquiry into earnings in 1937 in a number of the more important industries in Finland. The enquiry was conducted on lines similar to those of the enquiry relating to earnings in 1936, the results of which were summarised in the issue of this GAZETTE for October, 1937; but the scope of the enquiry was extended to include several branches of industry not previously covered.

previously covered.

The particulars in the Table below, which have been extracted from the results of the enquiry published in the June, 1938, issue of Sosiaalinen Aikakauskirja, the official journal of the Ministry of Social Affairs, show the average hourly and yearly earnings in 1937, inclusive of payments for overtime and piece work, production bonuses, and the value of payments in kind, of male and female workers (aged, in most cases, 18 years and over) of all degrees of skill employed in undertakings affiliated to the employers' associations taking part in the enquiry. Except in the textile and knit-wear industries, the average yearly earnings relate only to workers who were employed at the undertakings for at least six months during the year.

There was a general improvement in wages during 1937. Compared with 1936, average hourly earnings, for all branches of industry covered by the enquiry, increased by 13·1 per cent. for male workers and 9·6 per cent. for female workers, the corresponding increases in average yearly earnings being 13·4 per cent. and 10·8 per cent., respectively. During the same period, however, it was estimated that the cost of living in Finland had risen by about 5 per cent., so that the improvement in the purchasing power of the earnings was correspondingly reduced.

EMPLOYMENT IN AUGUST: GENERAL SUMMARY.

EMPLOYMENT at 15th August showed a slight improvement as compared with 18th July. There was an improvement in coal mining, building, public works contracting, and the boot and shoe and linen industries. On the other hand employment declined in the cotton, wool textile, pottery and tailoring industries, iron and steel manufacture, iron mining and quarrying, certain branches of the engineering industry, and the distributive trades.

SUMMARY OF STATISTICS.

It is estimated that at 15th August, 1938, the number of insured persons, aged 16–64, in employment in Great Britain, exclusive of persons within the agricultural scheme, was approximately 11,402,000. This was 31,000 more than at 18th July, 1938. On a comparable basis* there was a decrease of about 320,000 as compared with 23rd August, 1937.

Among persons, aged 16-64, insured under the general scheme of unemployment insurance (including the special schemes for the banking and insurance industries), the percentage unemployed in Great Britain and Northern Ireland at 15th August ,1938, was 13·0 compared with 13·3 at 18th July, 1938. For persons aged 16-64 insured under the agricultural scheme the percentages were 4·3 at 15th August, 1938, and 4·5 at 18th July, 1938. For both schemes combined the percentage unemployed at 15th August, 1938, was 12·6 as compared with 12·9 at 18th July, 1938. On a comparable basis,* there was an increase at 15th August, 1938, as compared with 23rd August, 1937, of about 3·4 in the percentage unemployed among persons within the general scheme, and of about 1·2 among persons within the agricultural scheme. For the two schemes combined there was an increase of about 3·4 between these dates.

At 15th August, 1938, the numbers of unemployed persons on the registers of Employment Exchanges in Great Britain were 1,262,343 wholly unemployed, 439,024 temporarily stopped, and 57,875 normally in casual employment, making a total of 1,759,242; this was 13,874 less than at 18th July, 1938. On a comparable basis* there was an increase of about 451,000 as compared with 23rd August, 1937, in the total number of persons on the registers.

The total of 1,759,242 persons on the registers at 15th August, 1938, included 1,020,036 persons with claims admitted for insurance benefit, 518,374 with applications authorised for unemployment allowances, 53,408 persons with application for insurance benefit or unemployment allowances under consideration, and 167,424 other persons, of whom 52,896 were juveniles under 16 years of age.

In Great Britain and Northern Ireland the total number of persons on the registers of Employment Exchanges at 15th August, 1938, was 1,843,272 as compared with 1,875,083 at 18th July, 1938. On a comparable basis* there was an increase at 15th August, 1938, of about 470,000 as compared with 23rd August, 1937.

EMPLOYMENT IN THE PRINCIPAL INDUSTRIES.

Mining and Quarrying.—In the coal mining industry employment at 15th August showed an improvement as compared with 18th July and there was a considerable decline in the numbers temporarily stopped, mainly due to resumption of work at the end of holiday periods.

In the iron mining industry employment showed a marked decline; it was very slack in the Cleveland area. At slate quarries also it declined, but was fairly good on the whole. Employment at limestone quarries in the Buxton area again improved and was good, but in the Cleveland area it was worse than in July and continued very slack. At the East of Scotland whinstone quarries employment showed a further decline and was slack; at tin mines it remained slack. There was little change at chalk quarries or at the West Lothian shale mines, and employment continued fairly good at the former and fair at the latter. At china clay quarries there was a further slight decline and employment was still moderate.

Pig Iron, Iron and Steel and Tinplate.—In the pig Iron industry employment continued to decline during August. There was also a further decline in iron and steel manufacture. In the tinplate industry employment in August was very bad; there was little change in steel sheet manufacture.

Engineering, Shipbuilding and Other Metal Industries.—In the engineering industry employment showed a slight decline between 18th July and 15th August, but continued fair on the whole. It was good in electrical engineering; fair in general and marine engineering and in motor vehicle manufacture; and moderate to slack in constructional and textile engineering.

In the shipbuilding and ship-repairing industry employment at 15th August showed a slight improvement, on the whole, as compared with 18th July. The improvement affected most of the principal centres, but in Wales there was a decline in ship-repairing.

Employment in the other metal trades continued fair on the whole. It was good in the chain and anchor trade; fairly good in the jewellery and plated ware trade; fair in the brasswork, hollow-ware, sheet metal, iron-founding, edge tool, file, and nut, bolt, nail, rivet, etc. trades; and moderate in the wire manufacturing, tube, eutlery and needle and fishing tackle trades.

Textile Industries.—In the cotton industry employment showed a decline at 15th August, as compared with 18th July, and short-time working and temporary stoppages were common.

In the wool textile industry employment showed a slight decline, principally in the worsted section, and remained very slack; much short time was again worked and holiday stoppages were extended by many firms. In the carpet section employment showed little change and was still slack generally.

In most of the other textile industries employment showed little change on the whole. It was fair in the hosiery trade; very slack in the lace trade; and bad, with much short-time working, in the textile bleaching, printing, dyeing, etc. trades. There was an improvement in the linen trade, due to resumption of work after local holidays, but employment was still very bad; it was very bad also in the jute trade. Employment continued slack both in the silk manufacturing industry and in artificial silk yarn manufacture; short-time working was again reported from many areas.

Clothing Trades.—Employment in the retail bespoke and in the ready-made and wholesale bespoke branches of the tailoring trades again showed a seasonal decline and was slack; the decline, which affected most areas except London, was most marked in the West Riding wholesale clothing industry. There was also a further seasonal decline in the dressmaking and millinery trades, but employment generally was fairly good. Employment in the shirt and collar trade showed a further decline and was slack at most centres. In the glove trade there was also some decline and short-time working increased; but in the corset trade employment continued fairly good. Employment in the hat trade showed a further improvement and continued moderate.

In the boot and shoe industry employment in August showed a further improvement, with a decrease in short-time working.

Leather Trades.—Employment in the leather trades as a whole showed a slight improvement; it was still slack in the tanning, currying and leather-dressing sections, but fair on the whole in other sections.

Building, Woodworking, etc.—In the building industry employment during August showed a slight improvement (principally in the decorating section) and was fair on the whole. In individual occupations employment was moderate with slaters and tilers and with painters, while with other classes of skilled operatives it remained fair. In brick manufacture employment declined slightly in some areas but continued fairly good on the whole,

Employment in the furnishing trades showed a slight improvement but remained moderate; with millsawyers and with coachbuilders there was little change and employment also continued moderate.

Paper Manufacture, Printing and Bookbinding.—In paper manufacture employment declined slightly and was moderate generally. With printers there was a further slight improvement and employment was good. There was also an improvement in the bookbinding industry.

Pottery and Glass.—Employment in the pottery industry showed a decline, mainly due to extended holidays, and was very slack on the whole. Employment also declined in the bottle-making section of the glass trades and was slack; in other sections little change was reported and employment remained moderate.

Fishing.—Employment with fishermen showed little general change.

Dock Labourers and Seamen.—With dock labourers employment in August showed a further slight improvement, but was still slack on the whole. Among seamen also it remained slack.

NUMBERS ON THE REGISTERS AT 15TH AUGUST, 1938.

In the Table below, an analysis is given of the numbers of unemployed persons on the registers of Employment Exchanges at 15th August, 1938.

			Persons no Regular En	ormally in	Persons normally in Casual	Total.

* The percentages for August, 1938, are subject to revision in the light of the information regarding the number insured in July, 1938, which will be derived from the recent exchange of unemployment books. The figures are exclusive of insured persons previously in domestic employments, which first became insurable on 4th April, 1938 (see page 130 of the April, 1938, issue of this CARPTER).

became insurable on 4th April, 1938 (see page 130 of the April, 1938, issue of this GAZETTE).

† The method of counting the unentployed was altered in September, 1937 (see article on page 379 of the October, 1937, issue of this GAZETTE). The effect of the change is shown by the separate figures for September, 1937, given in the Tables, and by the two points for that month on the chart in the next column.

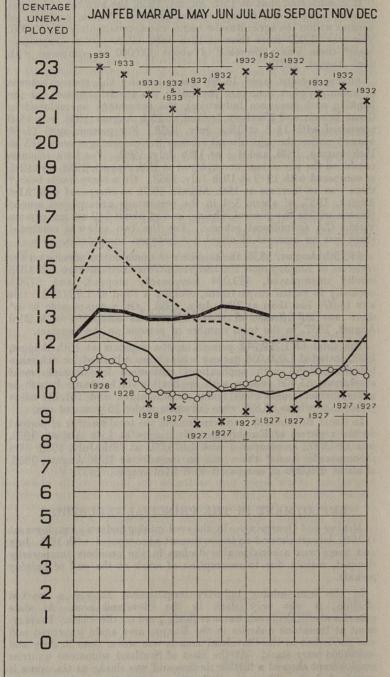

‡ The percentages for August, 1937, and subsequent months are based on the estimated number insured at the beginning of July, 1937, and are subject to revision when information becomes available as to changes since that date in the numbers insured.

‡ Excluding the period April, 1926, to March, 1927.

§ "Vacancies Filled" include certain types of cases (described as Class B engagements) in which the work of the Exchanges was limited; for instance, obtaining for an employer former employees or placing the same men in relief work in alternate weeks. During the four weeks ended 22nd August, 1938, the average number of such placings of men and women was 8,296 per week.

EMPLOYMENT IN SOME OF THE PRINCIPAL INDUSTRIES.

September, 1938. THE MINISTRY OF LABOUR GAZETTE.

COAL MINING.

EMPLOYMENT at 15th August showed an improvement as compared with 18th July and there was a considerable decline in the

numbers temporarily stopped, mainly due to resumption of work at the end of holiday periods.

The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16–64, was 17·8* at 15th August, 1938, as compared with 22·0* at 18th July, 1938. The percentage wholly unemployed increased by 0·4 (from 9·4 to 9·8) but the percentage temporarily stopped decreased by 4.6 (from 12.6 to 8.0). On a comparable basis there was an increase of about 3.8† in the total percentage as compared with 23rd August, 1937.

The following Table shows the numbers and percentages unemployed among insured workpeople, aged 16-64, in the respective areas at 15th August, 1938, and the increases or decreases as compared with a month before and a year before†:—

The following Table shows, for the principal coal mining districts, the total number of wage earners on the colliery books at 20th August. 1938, and the average number of days worked per week! during the preceding fortnight, as shown by returns obtained by the Mines Department. Small numbers of workpeople employed at coal mines in raising or handling minerals other than coal are included in the totals.

The average number of coal winding days lost in Great Britain during the fortnight ended 20th August, 1938, was 1.07 days per

* The percentages unemployed among insured workpeople at 18th July, and 15th August, 1938, quoted in this issue, have been computed on the basis of the numbers insured at July, 1937. Revised percentages, based on the numbers insured at July, 1938, will be published in the issue of this GAZETTE for November next, when information will be available as to the number of unemployment books exchanged in July of this year.

† See footnote * on page 349.

‡ See footnote † in next column.

§ Including Cannock Chase.

week, of which 0.90 of a day was due to want of trade. The figure for the fortnight ended 23rd July, 1938, was 1.55 days per week of which 0.96 of a day was due to want of trade and 0.54 of a day to holidays; that for the fortnight ended 21st August, 1937, was 0.67 of a day per week, of which 0.51 of a day was due to want of trade.

The output of coal in Great Britain for the four weeks ended 20th August, 1938, as reported to the Mines Department, was 15,092,000 tons, as compared with 16,389,800 tons in the four weeks ended 23rd July, 1938, and 16,776,300 tons in the four weeks ended 21st August, 1937.

IRON MINING.

EMPLOYMENT showed a marked decline in August; it was very slack in the Cleveland area. The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, in the iron ore and ironstone mining industry, was 29.2* at 15th August, 1938, as compared with 14.3* at 18th July, 1938. On a comparable basis there was an increase of about 22.0† in the percentage as compared with 23rd August, 1937.

The following Table summarises the information received from

employers who furnished returns:-

Districts.	employe	er of Work ed at Mines the Return	included		verage No. of Days ked per week at the Mines.‡

SHALE MINING.

THE number of workpeople employed at the West Lothian mines during the fortnight ended 20th August, 1938, by firms making returns was 2,042, a decrease of 1.0 per cent. as compared with July, 1938, but an increase of 1.4 per cent. as compared with

The average number of days worked per week‡ at the mines making returns was 6.00 in August, 1938, the same as in July, 1938, and August, 1937.

PIG IRON INDUSTRY.

EMPLOYMENT in August continued to decline. The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, was 20.7* at 15th August, 1938, as compared with 16.7* at 18th July, 1938. On a comparable basis there was an increase of about 11.9† in the percentage as compared with

Returns received by the British Iron and Steel Federation from firms engaged in the production of pig iron, employing 13,318 work-people at the end of August, 1938, showed a decrease of 6.5 per cent. in the numbers employed, compared with July, 1938, and of 17.4 per cent. compared with August, 1937.

The number of furnaces in operation at the end of August, 1938, was 81, compared with 90 at the end of July, 1938, and 131 at the end of August 1937. The figures are applied below.

Districts.		er of Fur in Blast.		Inc. (+) or Dec. (-) on a

Great Britain	81	90	131	- 9	-50	

The production of pig iron in August, 1938, amounted to 443,000 tons, compared with 507,800 tons in July, 1938, and 714,000 tons in

* See footnote * in previous column.

† See footnote * on page 349.

‡ The figures show the number of days (allowance being made in all the calculations for short time) on which coal, iron, etc. were got from the mines included in the returns. It is not necessarily implied that all the persons worked every day the mines were open. Mines not working are omitted in computing the average number of days worked.

IRON AND STEEL MANUFACTURE.

EMPLOYMENT in August showed a further decline. The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, was 25.9* at 15th August, 1938, as compared with 24.8* at 18th July, 1938. On a comparable basis there was an increase of about 16·1† in the percentage as compared with 23rd August, 1937.

The following Table summarises the information received from employers who furnished returns:—

The average number of shifts during which the works were open was $5\cdot 4$ in the week ended 20th August, 1938, the same as in July, 1938, compared with $5\cdot 7$ in August, 1937.

The production of steel ingots and castings, as shown in returns from the British Iron and Steel Federation, amounted to 658,900 tons in August, 1938, as compared with 683,200 tons in July, 1938, and with 987,700 tons in August, 1937.

TINPLATE AND STEEL SHEET INDUSTRIES.

EMPLOYMENT in the tinplate industry in August was very bad. The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16–64, was 41·7* at 15th August, 1938, as compared with 40·9* at 18th July, 1938. On a comparable basis there was an increase of about 30·8† in the percentage as compared ith 27rd August, 1937. with 23rd August, 1937.

In steel sheet manufacture employment showed a slight improve-

The following Table shows the number of mills in operation at those works in respect of which returns were received for the week ended 20th August, 1938, and comparisons with a month before

ENGINEERING.

EMPLOYMENT showed a slight decline between 18th July and 15th August, but continued fair on the whole. It was good in electrical engineering; fair in general and marine engineering and in motor vehicle manufacture; and moderate to slack in constructional and textile engineering.

Compared with a year ago employment was worse in all the principal sections of the industry with the exception of marine engineering,

* See footnote * in first column on page 351.

† See footnote * on page 349.

† The figures relate to the number of shifts during which the works were in operation, taken in conjunction with the number of men employed. No account is taken of time lost by individuals owing to absenteeism, etc., and it is not intended to imply that the number of shifts shown were actually worked by all the men employed. Works closed are omitted in computing the average number of shifts.

§ Excluding Scotland. Most of the iron and steel works in Scotland were closed on account of holidays in the week ended 23rd July, 1938. For the week ended 20th August, 1938, the number of workpeople in Scotlish works covered by the returns received was 9,992 and the aggregate number of shifts 53,648, as compared with 11,191 workpeople and 63,671 shifts in August, 1937, showing a decrease of 10.7 per cent. and of 15.7 per cent., respectively.

where there was little change; in the industry as a whole it was worse in all administrative divisions.

The following Table shows the numbers and percentages* unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, at 15th August, 1938, and the increases or decreases as a compared with a mouth before and a week before. decreases as compared with a month before and a year before :-

On the North-East Coast employment improved slightly in marine engineering and was moderate; it continued moderate in general engineering. In Yorkshire and Lincolnshire employment declined slightly in general engineering and remained fair. Employment in slightly in general engineering and remained fair. Employment in Lancashire and Cheshire continued fairly good in motor vehicle manufacture and moderate in general engineering; it continued to decline in textile engineering and was moderate to slack in that section. In Birmingham, Wolverhampton and Coventry employment showed some improvement in motor vehicle manufacture and was moderate; it declined slightly in general and electrical engineering but continued good in those sections; it declined also in constructional engineering and was moderate. Employment in the Nottingham, Derby and Leicester district continued good; in London and the Southern Counties it showed little change and was generally very good. Employment continued very good at the principal centres

In Scotland employment remained fair in marine engineering and moderate in general engineering. In Wales employment declined and was slack. In Northern Ireland it improved slightly and was

SHIPBUILDING AND SHIP-REPAIRING.

EMPLOYMENT at 15th August showed a slight improvement, on the whole, as compared with 18th July. The improvement affected most of the principal centres, but in Wales there was a decline in

ship-repairing.
The following Table shows the numbers and percentages* unemployed (including those temporarily stopped) among insured work-people, aged 16-64, at 15th August, 1938, and the increases or decreases as compared with a month before and a year before†:—

Returns from firms employing about 44,400 workpeople in the week ended 20th August, 1938, showed that about 19 per cent. of these workpeople were on short time in that week, losing 14 hours each on the average. These figures do not take account of other forms of under-employment, e.g., reductions in the number of looms worked by individual operatives.

At Stockport, Stalybridge, Glossop and Hyde employment was bad on the whole. At Ashton-under-Lyne there was a slight improvement in the spinning department; employment, however, was considerably worse than a year ago.

In the Oldham district employment showed little improvement in either the spinning or manufacturing departments; a large amount of

either the spinning or manufacturing departments; a large amount of machinery was idle and the holiday stoppage was extended by many firms. Employment was fair, however, with weavers of fancy and

heavy goods.

At Bolton employment showed little change and continued bad with spinners and weavers and slack with cardroom workers. At Leigh there was a decline and short-time working increased. At Rochdale employment continued bad; at Bury short-time working increased mainly with women workers. increased, mainly with women workers.

At Preston, Darwen, Blackburn, Burnley, Great Harwood and Chorley short time and under-employment were reported, particularly in the manufacturing departments. At Padiham employment showed a slight improvement; at Accrington and Nelson there was some decline. Employment in the Rossendale Valley showed a slight improvement in the manufacturing department. In Yorkshire employment remained bad at most centres.

The following Table shows the number of men and of women

(other than casuals) on the registers of 56 Employment Exchanges in the principal cotton trade centres of Lancashire and Cheshire at 15th August, 1938:—

WOOL TEXTILE INDUSTRY.

EMPLOYMENT showed a slight decline between 18th July and 15th August, principally in the worsted section, and remained very slack; much short time was again worked, and holiday stoppages were extended by many firms. The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64 at 15th August was 22·4* as compared with 21·4* at 18th July, 1938. On a comparable basis there was an increase of 13·2† in the percentage as compared with 23rd August, 1937.

as compared with 23rd August, 1937.

Worsted Section.—Employment continued very slack generally. Returns from employers for the week ended 20th August, 1938, showed that in the worsted section as a whole 36½ per cent. of the workpeople covered by the returns were on short time; in that week, losing 11 hours each on the average, and 5 per cent. were on overtime, averaging 7 hours each. In the sorting, combing and preparing departments 31½ per cent. were on short time, losing 15 hours each on the average, and 10 per cent. were on overtime, averaging 9 hours each. In the spinning department 36 per cent. were on short time, losing 9 hours each on the average, and 5½ per cent. were on overtime, averaging 6 hours each. In the weaving department the corresponding figures were: short time; 45½ per department the corresponding figures were: short timet, 45½ per cent. and 13½ hours; overtime, 2 per cent., and 3 hours.

Among woolsorters employment was again bad; in the woolcombing department it was very slack on the whole; some im-

combing department it was very slack on the whole; some improvement occurred in the merino section, but a marked decline was reported in the preparing section. The spinning department showed little change, but in the weaving department employment declined.

At Bradford employment again declined and was much worse than a year ago. Employment at Shipley remained bad. At Halifax there was little change on the whole; holiday stoppages were extended and much short time was worked. At Keighley employment was very poor, particularly among women workers. At Huddersfield there was a further decline and employment was slack generally; in the fine worsted (mer)'s wear) section it was reported as in the fine worsted (men's wear) section it was reported as moderate.

Woollen Section.—Employment again showed a slight improvement in most districts and departments. Returns from employers for the week ended 20th August, 1938, showed that in the woollen section as a whole, 33 per cent. of the workpeople covered by the returns were on short time; in that week, losing 11 hours each on the average, and 10 per cent. were on overtime, averaging 7 hours each. In the no per cent. were on overtime, averaging 7 hours each. In the spinning department 30½ per cent. were on short time, losing 10½ hours each on the average, and 18 per cent were on overtime, averaging 8 hours each. In the weaving department the corresponding figures were: short time, 36½ per cent. and 11 hours; overtime, 3 per cent. and 6 hours. Employment in the Huddersfield and Colne Valley district showed

a further improvement but remained slack generally. At Leeds employment continued slack, but was better than in July. At Morley employment was worse than in the previous month and holiday stoppages were extended. Employment in the Heavy Woollen district improved during the month but was poor generally. The rag and shoddy trade remained slack.

In the blanket trade in Yorkshire employment was fair on the

whole, but much short time was worked. At Witney employment was reported as good. Among flannel workers at Saddleworth employment declined, holiday stoppages being extended. At Rochdale employment was slack. In the West of England employment was reported as moderate in some districts, but slack in others.

Employment in the South of Scotland was still slack, with extended

holiday stoppages. Employment in the woollen cloth trade improved in some districts, but showed little change generally.

Carpet Section.—Employment showed little change and was still slack generally. The percentage unemployed at 15th August, 1938, was 18·1* as compared with 19·3* at 18th July, 1938. On a comparable basis there was an increase of about 12·5† in the percentage as compared with 23rd August, 1937.

BOOT AND SHOE INDUSTRY.

EMPLOYMENT in August showed a further slight improvement, with a decrease in short-time working.

The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16–64, was 13·5* at 15th August, 1938, compared with 15·4* at 18th July, 1938. On a comparable basis there was an increase of about 3·9† in the percentage as compared with 23rd August, 1937.

The following Table summarises the information received from those employers who made returns:-

Great Britain		+ 1.7	- 3.8	137,820		- 2.5	

Returns from firms employing about 60,750 workpeople in the week ended 20th August, 1938, showed that 33½ per cent. of these workpeople were on short time in that week, losing 7 hours each on the average, while nearly 7½ per cent. were on overtime, to the extent of $2\frac{1}{2}$ hours each on the average. Short time was extensively worked at Leicester, at Northampton, in the Stafford district and at Bristol and Kingswood.

Employment in London improved; it was moderate in both East and North London; in both districts there was an unsatisfied demand for certain classes of skilled workers.

At Leicester employment showed a slight seasonal improvement and was fair. It improved also in the Leicestershire country district, and was fair generally.

Employment at Northampton remained moderate, and there was much short time. In the Higham and Rushden district, and at Kettering, employment showed a slight improvement and was fair. At Raunds employment was good.

At Stafford employment improved with less short-time working. Employment improved at Norwich and was fair.

Employment in the Bristol and Kingswood district showed a further improvement and was good with some firms. At Leeds there was little change and employment continued moderate. In the Lancashire slipper trade employment again improved slightly at

Employment was fairly good at Kilmarnock; it was slack at Edinburgh and Maybole.

The following Table shows the number of men and of women (other than casuals) on the registers of 53 Employment Exchanges in the principal centres of the boot and shoe industry at 15th

	Numbers (excluding casuals) on the Registers at 15th August, 1938.

BRICK INDUSTRY.

EMPLOYMENT in August declined slightly in some areas but continued fairly good on the whole.

The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, was 9.0* at 15th August, 1938, as compared with 8.4* at 18th July, 1938. On a comparable basis there was an increase of about 2.3† in the percentage as compared with 23rd August, 1037

basis there was an increase of about 1 of 1 of 2 compared with 23rd August, 1937.

The following Table summarises the information received from those employers who furnished returns (the number of whom has been increased as compared with previous months):—

	Number	of Work	people.	Total Wages paid to all Workpeople.			
Districts.	Week ended	Inc. (+) or Dec. (-) on a		Week Inc. (- ended Dec. (-			
	20th Aug. Month 1938. before.		Year before.	20th Aug. 1938.	Month before.	Year before.	
142 4 152		Per cent.	Per cent.	£	Per cent.	Per cent.	
Midlands and East- ern Counties	10,580	- 0.5	- 0.1	30,184	-0.7	+ 1.7	
Rest of Great Britain	8,156	- 0.1	- 1.5	22,617	- 0.2	+ 0.6	
Total	18,736	- 0.3	- 0.7	52,801	- 0.5	+ 1.2	

Returns from employers relative to short-time working, exclusive of time lost on account of bad weather, showed that, of 18,736 workpeople employed by firms furnishing information, about 3½ per cent. were working on an average 10½ hours less than full time in the week ended 20th August, 1938. On the other hand about 5½ per cent. were vorking overtime, to the extent of nearly 6 hours each on the average.

BUILDING.

EMPLOYMENT during August showed a slight improvement (principally in the decorating section) and was fair on the whole. Compared with a year ago, however, there was an increase in the numbers unemployed among all classes of workers.

As regards individual occupations, employment was moderate with slaters and tilers and with painters, while with other classes of skilled operatives it remained fair. With labourers to skilled occupations and builders' labourers employment was moderate; there was, however, a considerable amount of unemployment among navvies and general labourers and certain other occupations.

The following Table shows the numbers and percentages* unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, at 15th August, 1938, and the increases or decreases compared with a month before and a year before†:—

BUILDING PLANS APPROVED

Returns as to the estimated cost of buildings for which plans were approved during August have been received from 144 Local Authorities (representing towns with a population of 17,656,000 in 1931). The returns show that, in August, 1938, plans were passed for buildings with an estimated cost of £6,302,100, compared with

£5,799,000 in August, 1937.

An analysis of the figures for August, 1938, by districts and by classes of buildings, is given on page 372 of this issue.

POTTERY INDUSTRY

EMPLOYMENT in North Staffordshire showed a decline, mainly due to extended holidays, and was very slack on the whole. At Derby, also, there was some decline, but at Bristol employment continued

The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16–64, was 26·5* at 15th August, 1938, as compared with 19·3* at 18th July, 1938. On a comparable basis there was an increase of about 11·8† in the percentage as com-

pared with 23rd August, 1937.

The following Table summarizes the information received from those employers who furnished returns:—

1							
		Number of orkpeople		Total Wages paid to all Workpeople.

Returns from employers relative to short-time working showed that of 9,740 workpeople employed by firms making returns, 3,423, or about 35 per cent., were working on an average 9 hours less than full time in the week ended 20th August, 1938; the amount of overtime worked was very small.

PAPER MANUFACTURE, PRINTING AND BOOKBINDING.

EMPLOYMENT in the paper-making industry showed a slight decline in August as compared with the previous month and was moderate generally; short-time working was reported in some districts.

In the letterpress printing industry employment showed an improvement as compared with July, and was also somewhat better than a year ago; at Bradford, however, it was reported as slack. Employment with electrotypers and stereotypers continued good

Employment with electrotypers and stereotypers continued good generally.

In the lithographic printing industry employment showed a further improvement as compared with the previous month and was good on the whole. With lithographic artists it was fairly good.

In the bookbinding industry employment showed an improvement as compared with July, and was also better than in August, 1937.

The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, in the paper and paperboard industries was 11.0* at 15th August, 1938, as compared with 10.8* at 18th July, 1938. The corresponding figures for the card-10.8* at 18th July, 1938. The corresponding figures for the card-board box, paper-bag and stationery industries were 5.7* and 5.8*, and for the printing and bookbinding industries 6.3* and 6.2*. On a comparable basis there were increases in the percentages as compared with 23rd August, 1937,† of about 7.2, 2.2 and 0.9,

respectively.

The following Table summarises the returns from the various trade unions which furnished information:—

DOCK AND RIVERSIDE LABOUR.

EMPLOYMENT in August showed a further slight improvement, but

was still slack on the whole and was worse than a year ago.

The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, in dock, harbour, river and canal service was 25·2* at 15th August, 1938, as compared with 25·9* at 18th July, 1938. On a comparable basis there was an increase of about 2·3† in the percentage as compared with 23rd August, 1937.

Area

In harbour, river and canal service, the percentage unemployed was 9.5* at 15th August, 1938, as compared with 10.1* at 18th July, 1938; in dock, wharf and lighterage (port transport) service, the corresponding figures were 28.0* and 28.7* respectively.

London.—Employment declined slightly compared with July, 1938, and was not so good as in the corresponding period last year.

The following Table shows the average daily number of dock labourers employed at docks and wharves in respect of which returns were received :-

	Average Docks	Daily Num and at Pri	ber of La incipal Wi	bourers emp harves in L	oloyed in ondon.

Average for August, 1937	3,899	1,903	5,802	5,517	11,319	

Tilbury.—The average daily number of dock labourers employed during August was 973, as compared with 837 in July, 1938, and with 1,088 in August, 1937.

North-East Coast.—Employment showed a slight improvement at some of the ports, but remained moderate generally.

Mersey.—Employment at Liverpool remained moderate; at Garston it declined slightly, and was moderate. At Salford employment declined among casual workers, and was slack generally.

The average weekly number of dock labourers registered at the clearing houses under the Liverpool Docks Scheme as employed in the four weeks ended 26th August, 1938, was 11,284, compared with 11,428 in July, 1938, and with 12,080 in August, 1937. The average weekly amount of wages paid to these men through the clearing houses was £29,553 in the four weeks ended 26th August, 1938, compared with £30,762 in July, 1938, and with £32,380 in August, 1937.

Other Ports in England and Wales.—Employment at Cardiff declined slightly with coal trimmers and tippers but remained fair; at Swansea it showed little change with dock workers, but improved with coal trimmers and tippers, and was fair on the whole. Employment at Bristol was fairly good; at Avonmouth it improved among casual workers, and was good. At Plymouth and Southampton employment was fairly good on the whole.

Scottish and Irish Ports.—Employment at Glasgow showed some improvement, and was fair; at Leith it remained moderate. At Dundee and Grangemouth there was little change, and employment was moderate. At Belfast it was good generally.

SEAMEN.

EMPLOYMENT among seamen remained slack on the whole. The percentage unemployed (including those temporarily stopped) among insured workpeople, aged 16-64, in shipping service, was 22.5* at 15th August, 1938, the same as at 18th July, 1938. On a comparable basis there was an increase of about 3.2† in the percentage as compared with 23rd August, 1937.

The following Table shows the number of seamen shipped‡ in British foreign-going vessels at the undermentioned ports of Great Britain and Northern Ireland:—

* These exclusions represent (a) insurance benefit claimants in receipt of unemployment allowances in supplementation of benefit (numbering 7,469 at 15th August, 1938); and (b) persons disqualified for short periods from receiving benefit, who are shown in line 2 (b) of the Table.
† See explanation on page 358.
‡Including 7,469 persons for whom payment of unemployment allowances in supplementation of benefit had been authorised.
§ Including 2,396 persons, disqualified for short periods from receiving benefit, who had applications authorised for unemployment allowances.

PERIODS OF REGISTERED UNEMPLOYMENT.

ANALYSIS IN RESPECT OF PERSONS APPLYING FOR INSURANCE BENEFIT OR UNEMPLOYMENT ALLOWANCES.

THE following Table gives an analysis, according to the length of their last spell of registered unemployment, of persons aged 16-64, applying for insurance benefit or unemployment allowances (including those applicants whose position in relation to insurance benefit and unemployment allowances had not been determined), who were registered at Employment Exchanges in Great Britain as unemployed on 15th August, 1938. Corresponding particulars are not available in respect of persons, registered as unemployed, who were not applicants for insurance benefit or unemployment

Of the persons who had been on the register for extended periods a proportion, which will increase as the period on the register increases, will have had one or more short spells of employment, lasting not more than three days each, during such periods

UNEMPLOYMENT ALLOWANCES (GREAT BRITAIN).

As from 1st April, 1937, the cost of unemployment allowances is met from the Unemployment Assistance Fund, which is reimbursed by the Exchequer. For the period of four weeks ended 27th August, 1938, expenditure on these allowances (excluding the cost of administration) amounted to approximately £2,528,000 as compared with £3,108,000 during the five weeks ended 30th July, 1938, and £2,685,000 during the four weeks ended 28th August, 1937.

* A detailed account of the Fund is presented to Parliament annually (see H.C. 49 of 1938 for the period ended 31st March, 1937).

† Statutory provision was made for the repayment (including interest) of the debt outstanding on 1st July, 1934 (amounting to £105,780,000) by half-yearly payments of £2,500,000 commencing on 30th September, 1934. Under the Unemployment Insurance Act, 1938, an additional sum of £20,000,000 was repaid on 31st March, 1938, and thereafter the half-yearly payments are reduced to £2,006,259.

UNEMPLOYMENT AMONG INSURED PERSONS AT 15th AUGUST, 1938.

INDUSTRIAL ANALYSIS.

The statistics here presented show, industry by industry, the estimated number of persons, aged 16–64, insured against unemployment at July, 1937, and the total number and percentage of such persons unemployed on 15th August, 1938, distinguishing those wholly unemployed (i.e., out of a situation) from those temporarily stopped (i.e., suspended from work on the understanding that they were shortly to return to their former employment).

The Unemployment Insurance Acts provide, subject to certain exceptions, for the compulsory insurance against unemployment of substantially all employed persons. The principal classes of excepted employments are indoor private domestic service, employment otherwise than by way of manual labour at a rate of remuneration exceeding in value £250 a year, employment as female professional nurse, and, subject to certain qualifications, employment in the teaching profession and in the police forces. Employment under public or local authorities, railways and public utility companies may, in certain circumstances, also be excepted. Persons aged 65 and over, and certain other classes, are excluded from insurance. The Unemployment Insurance Acts do not apply to persons serving in an established capacity in the permanent service of the Crown. Prior to September, 1934, juveniles under 16 years of age were also excepted, and they are excluded from the statistics in these Tables; particulars of the numbers of these juveniles recorded as unemployed at 15th August, 1938, are, however, given on page 362.

An unemployment book, on which is recorded the industry in

An unemployment book, on which is recorded the industry in which he is employed, is issued to every insured person, and this book must be lodged at an Employment Exchange whenever the insured person makes a claim for unemployment benefit or for an unemployment allowance, or registers as unemployed without claiming benefit or an allowance.

claiming benefit or an allowance.

The files of "lodged" books at the Employment Exchanges thus furnish for each industrial group a record of the unemployment of insured persons. In arriving at this figure the books of those persons who are known to be working in an uninsured trade, or to in July of this year.

be sick or deceased, or to have gone abroad, are excluded. Where information on these points is lacking, the books remain in the "lodged" files, and are included in the statistics of unemployment, for a period of two months from the date on which the insured person was last in touch with the Exchange.

The numbers unemployed given in the following Tables relate only to persons aged 16-64, insured against unemployment. They include insured persons of those ages maintaining registration at Employment Exchanges, together with those whose unemployment books remain lodged in the "two months" file referred to above. The figures given on pages 349 and 350 relating to persons registered at Employment Exchanges include uninsured as well as insured persons who are maintaining registration for employment, but not insured persons whose books are in the two months file. A Table showing the composition of the two series of figures is given on page 357.

Insured persons who are disqualified for the receipt of unemployment benefit under the trade dispute disqualification are not included in the numbers unemployed, unless they are definitely maintaining registration for other employment.

registration for other employment.

The estimated numbers of insured persons in each industry are computed once a year, in November, on the basis of information obtained at the annual exchange of unemployment books. The figures relate to the beginning of July, and similar statistics are not available for other dates in the year. In considering the figures on pages 360 and 361 it should be borne in mind that, in the case of individual industries the percentage rates of unemployment at July and August, 1938, and those for August, 1937, used for the purpose of comparison, have been calculated on the basis of the estimated numbers of insured persons at July, 1937.

Revised percentages for July and August, 1938, based on the numbers insured at the beginning of July 1938, will be published in the issue of this GAZETTE for November, 1938, when information will be available as to the number of unemployment books exchanged in July of this year.

^{*} Persons insured under the special schemes for the banking and insurance industries have been included in the figures. The figures are exclusive of insured persons previously in domestic employments which first became insurable on 4th April, 1938 (see page 130 of the April, 1938, issue of this GAZETTE). Estimates of the total numbers of persons in these categories are not yet available, but the numbers aged 16-64 insured under the general scheme, recorded as unemployed at 15th August, 1938, were 1,798 males and 2,441 females in Great Britain and Northern Ireland, and 1,742 males and 2,375 females in Great Britain.

§ The percentage for all industries and services combined for August, 1937, used for this comparison, is the revised figure based on the estimated number insured at that date—see the issue of the GAZETTE for November, 1937, page 424 (see also footnote † on page 360). The percentages for July and August, 1938, are based on the numbers insured at July, 1937.

|| See footnote † on page 359.

The figures above include those boys and girls whose unemployment books were in the "two-months file" of lodged books, i.e., boys and girls who had registered as unemployed at some date within the previous two months and were not known to have found work, but were not maintaining registration as applicants for employment. The figures do not include unemployed juveniles previously in domestic employments which first became insurable on 4th April, 1938, numbering 25 boys and 97 girls in Great Britain and in Great Britain and Northern Ireland.

UNEMPLOYMENT INSURANCE: ADJUDICATIONS BY THE STATUTORY AUTHORITIES.

POOR RELIEF IN AUGUST.

(Data supplied by the Ministry of Health and by the Department of Health for Scotland.)

The number of persons* relieved on one day† in August in the forty-seven selected areas in Great Britain named below was 558,790, or 0·3 per cent. more than in the previous month, and 1·0 per cent. less than in August, 1937. The numbers relieved at these three dates were equivalent, respectively, to rates of 340, 339, and 343 per 10,000 of the estimated population.

In the forty-three selected areas in England and Wales the number relieved in August was 442,743, an increase of 0.2 per cent. as compared with a month earlier, and 0.5 per cent. less than in August, 1937. In the four areas in Scotland the number relieved was 116,047, or 0.5 per cent. more than in the previous month, and 3.2 per cent. less than in August, 1937.

Recipients of indoor relief in the forty-seven areas in August numbered 67,232, or 0.5 per cent. less than in the previous month, and 4.9 per cent. less than a year ago. Recipients of outdoor relief numbered 491,558, or 0.4 per cent. more than in the previous month, and 0.5 per cent. less than in August, 1937.

Of the forty-seven areas, twenty-three showed slight decreases in the proportion of the population in receipt of relief in August as compared with July, twenty showed slight increases, while in four areas there was no change. Compared with August, 1937, thirty-one areas showed increases in the proportion of the population in receipt of relief, and fifteen areas showed decreases; in the remaining area there was no change.

EMPLOYMENT OVERSEAS.

[N.B.—The following paragraphs include an abstract of such official and other information as is available with regard to the state of employment abroad, in order to indicate, as far as possible, the fluctuations in employment in each country from period to period. The bases of the statistics published in the various countries are, however, not the same as those of the statistics relating to this country; and therefore the figures quoted below cannot properly be used with those on pp. 349-350 to compare the actual level of employment in Great Britain and Northern Ireland with that in other countries.]

UNEMPLOYMENT declined again during August. The total number of persons reported by the Employment Exchanges as unemployed at the end of August, 1938, was 179,000,* as compared with 218,328† at the end of July, 1938, and 509,257 at the end of August, 1937.

In Austria the number of unemployed registered at the public Employment Exchanges at the end of August, 1938, was 114,000,* as compared with 151,026 at the end of July, 1938. At the end of August, 1937, the available statistics show that there were 261,840 persons registered as applicants for work.

FRANCE.§

There was a further decline in unemployment during August The total number of persons remaining on the registers of the Employment Exchanges at the end of the month was 364,875 as compared with 370,688 at the end of July, 1938, and 334,521 at the

compared with 370,688 at the end of July, 1938, and 334,521 at the end of August, 1937.

At the beginning of July, 1938, the number of persons employed in mining, industrial, transport and commercial undertakings covered by the official monthly investigation showed an increase of 2.56 per cent. as compared with July, 1937. In 8,140 undertaking employing 2,290,457 persons, in which, at 1st July, 1938, legislation reducing hours, in principle, to 40 a week had been applied, the percentage of workpeople who were on short time to such an extent as to bring their weekly hours below 40 was 19, as compared with 20.33 per cent. at 1st June, 1938, and 7.49 per cent. at 1st July,

BELGIUM.

Returns received by the National Employment and Unemployment Office from approved unemployment insurance funds with a total membership of 931,880 showed that 13·1 per cent. of these were totally unemployed in both April and May, 1938, as compared were totally unemployed in both April and May, 1936, as compared with 10.6 per cent. in May, 1937. In addition, 18.4 per cent. were employed intermittently in May, 1938, as compared with 14.7 per cent. in April, 1938, and 8.3 per cent. in May, 1938, 16.9 per cent. of the aggregate possible working day the were lost through unemployment; in the preceding month the percentage was 16.5, and in May, 1937, 11.7.

NETHERLANDS.¶

Unemployment declined during June. Figures compiled by the State Department of Unemployment Insurance and Employment Exchanges show that, of 487,513 members of subsidized unemployment funds making returns for the week ended 25th June, 1938, 22.2 per cent. were unemployed during the whole week and 2.9 per cent. for less than 6 days. In the corresponding week of the preceding month the percentages were 22.8 and 3.0, and in the last week of June, 1937, 22.8 and 2.7. At the end of June, 1938, 328,406 applicants for work were registered at public Employment Exchanges, of whom 311,032 were unemployed; at the end of the previous month the corresponding totals were 349,519 and 332,049, and at the end of June, 1937, 325,053 and 310,616.

SWITZERLAND.**

SWITZERLAND.**

Unemployment increased slightly during July. At the end of that month 49,703 applications for employment (34·6 per thousand of the employed population according to the census of 1930) were registered at Employment Exchanges, as compared with 48,658 (33.9 per thousand) at the end of June, 1938, and 49,244 (34·3 per thousand) at the end of July, 1937. Offers of situations at the dates mentioned above numbered 2,090, 2,493 and 2,436, respectively. Returns from unemployment insurance funds show that, of a total membership of 542,937, 6·3 per cent. were wholly, and 4·7 per cent. partially unemployed at the end of June, 1938, the corresponding figures being 9·6 per cent. and 4·7 per cent. at the end of March, 1938, and 6·4 per cent. and 1·9 per cent. at the end of June, 1937.

According to a semi-official series of index numbers compiled by the Fascist Confederation of Industrialists, employment showed a further improvement between March and June. If the average monthly index of employment in industrial undertakings for the year 1929 be taken as 100, the corresponding index rose from 111.8 at the end of March, 1938, to 115.2* at the end of June, 1938. At the end of June, 1937, the figure was 104.7.

POLAND.‡‡
Unemployment continued to decline sharply during June. The number of applicants for work remaining on the registers of the Employment Exchanges at the end of the month was 259,016, as compared with 300,951 at the end of May, 1938, and 293,025 at the end of June, 1937.

CZECHOSLOVAKIA.†

There was a further substantial decline in unemployment during August. The total number of applicants for work remaining on the registers of the Employment Exchanges at the end of the month was 164,998, as compared with 184,167 at the end of July, 1938, and 233,318 at the end of August, 1937.

SCANDINAVIAN COUNTRIES.

Unemployment declined in Denmark during August, in Norway during June, and in Sweden during July, 1938.

Denmark.§-According to returns received by the Danish Denmark. According to returns received by the Danish Statistical Department from approved unemployment funds with a total membership of approximately 454,000, 16·3* per cent. of this membership were unemployed at the end of August, 1938, as compared with 16·9† per cent. at the end of July, 1938, and 15·1 per cent. at the end of August, 1937.

Norway. —Returns furnished by ten trade unions with a total membership of 87,712 show that 18.5 per cent. of this membership were unemployed at the end of June, 1938, as compared with 20.5 per cent. at the end of May, 1938, and 15.6 per cent. at the end of June, 1937.

Sweden.¶—Of a total of approximately 602,000 members covered by the returns of the reporting trade unions, 7·1* per cent. were unemployed at the end of July, 1938, as compared with 8·4 per cent. at the end of the previous month, and 6·4 per cent. at the end of July, 1937.

UNITED STATES**

According to returns received by the Bureau of Labour Statistics from employers, covering over one-half of the aggregate number of wage-earners in manufacturing industries, the number of workwage-earners in manufacturing industries, the number of work-people employed at the middle of June, 1938, showed a decrease of 2·2 per cent., as compared with the previous month. Aggregate weekly earnings in the establishments covered declined also during the same period by 3·2 per cent. If the average monthly index of employment in manufacturing industries for the three years 1923–1925 be taken as 100, the corresponding index for June, 1938, was 75·7, as compared with 77·4† for the previous month, and 101·1 for June, 1937.

for June, 1937.

At the end of July, 1938, 8,081,626 applicants were registered at the public Employment Exchanges comprised in, or affiliated to, the United States Employment Service, an increase of 3·3 per cent. as compared with the previous month, and of 63·6 per cent. as compared with July, 1937. Part of the percentage increase between July, 1937, and July, 1938, is due to the incentive to register provided in a number of States by the initiation in 1938 of the percentage in the percentage unemployment compensation payments. Included among the registered applicants are a large number of persons provided with employment on public relief work schemes.

Reports received by the American Federation of Labour from

affiliated trade unions in 24 cities showed that, in both June and July, 1938, 19 per cent. of the membership of these unions covered the returns were unemployed, as compared with 11 per cent. in

The number of persons on the live registers of the Employment Exchanges rose from 68,320 at 25th July, 1938, to 70,552 at 29th August. The figures for both these dates are affected by the operation of two Orders‡‡ issued under the Unemployment Assistance Act, 1933, the effect of which is to restrict the eligibility for unemployment assistance of certain classes of persons living in rural areas. At 30th August, 1937, when similar Orders were in force, the number of persons on the live registers was 65,670.

CANADA.§§

There was a decline in industrial employment at the beginning of August. The total number of workpeople employed at 1st August, 1938, by 10,829 firms from which returns were received by the 1938, by 10,829 firms from which returns were received by the Dominion Bureau of Statistics was 1,073,302 as compared with 1,088,266 at the beginning of July. If the average number of workpeople employed by the reporting firms in the year 1926 be represented by 100, the index of employment for 1st August, 1938, was 112·1, as compared with 113·5 at 1st July, 1938, and 120·0 at 1st August, 1937.

At the end of July, 1938, 14·0 per cent. of the aggregate membership (approximately 221,000) of trade unions making returns were unemployed, as compared with 13·5 per cent. at the end of June, 1938, and 8·9 per cent. at the end of July, 1937.

NEW ZEALAND.

The number of unemployed males remaining on the registers of the Government Employment Bureaux at 4th June, 1938, was 8,721, as compared with 8,314, at 7th May, 1938, and 29,326 at 5th June, 1937. All the foregoing figures exclude men in full-time employment subsidised by the Employment Promotion Fund. In addition, men totally unfit for employment and in receipt of sustenance pay are excluded from the figures for May and June, 1938; at both these dates they numbered approximately 8,000.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN AUGUST.

Rates of Wages.

In the industries covered by the Department's statistics* the changes in the rates of wages reported to have come into operation in August in Great Britain and Northern Ireland resulted in an aggregate increase estimated at about £12,700 in the weekly full-time wages of 222,200 workpeople, and in a decrease of £31,700 in those of 271,200 calregorates.

workpeople.

The particulars are analysed by industry groups below:-

Industry Group.	of Wor	te Number kpeople ed by	Estimated Amount of change in Weekly Wages.	
Industry Group.	Increases.	Decreases.	Increases.	Decreases.
Mining and Quarrying Metal	115,000 97,900 9,300	224,600 46,200 400	£ 6,750 5,400 550	£ 22,050 9,630 20
TOTAL	222,200	271,200	12,700	31,700

In the mining and quarrying group there were increases for coal miners in Leicestershire, Warwickshire and Scotland, and decreases in Northumberland, Lancashire and Cheshire, Nottinghamshire, Derbyshire, Cannock Chase, South Staffordshire and East Worces-

Derbyshire, Cannock Chase, South Staffordshire and East Worcestershire, the changes being due in each case to fluctuations in the proceeds of the industry as shown by the district ascertainments. Other workpeople in this group whose wages were increased were coke-oven workers in South Wales and Monmouthshire, iron ore miners in Cleveland, North Lincolnshire and Leicestershire and adjoining parts of Lincolnshire, and limestone quarrymen in South and West Durham; while there were decreases in the wages of coke-oven workers in Durham and West Yorkshire.

In the metal group the principal increases affected workpeople employed in steel melting shops and in steel rolling mills in various districts in Great Britain, whose wages were increased in accordance with sliding scales based on selling prices to the extent generally of about 1½ per cent. on current rates. Other workpeople employed in reased included blastfurnacemen in several districts, iron puddlers and millmen on the North-East Coast, workpeople employed in Siemens steel manufacture in South-West Wales, and pen makers in Birmingham. The decreases in this group affected tinplate in Birmingham. The decreases in this group affected tinplate workers in South Wales, Monmouthshire and Gloucestershire, whose wages were reduced in accordance with a sliding scale based on selling prices to the extent of about 4 or 4½ per cent. on current rates; iron puddlers and millmen in Scotland; workpeople employed in steel sheet rolling mills in various districts; and galvanisers.

In the other industry groups the increases mainly concerned the employees of co-operative societies in certain districts, certain operatives in the silk trade at Macclesfield, and cinema employees in certain towns in the Eastern Counties. The workpeople whose wages were reduced were male elastic web weavers at Leicester.

Of the total estimated increase of £12,700 per week, about £12,075 was due to the operation of sliding scales based on selling prices or on the proceeds of the industry; nearly £300 was due to direct negotiation between employers and workpeople or their representatives; nearly £100 took effect under arrangements made by joint standing bodies (including about £50 due to the operation of sliding standing bodies (the under arrangements). scales based on the cost of living); about £200 was due to other sliding scales based on the cost of living, and the remaining £25 was

he result of arbitration.

Of the total decrease of £31,700, nearly the whole was due to the operation of sliding scales based on selling prices or on the proceeds of the industry, and the remainder to sliding scales based

TOTAL	2,380,200	122,800	261,900	28,550	

In the corresponding eight months of 1937, there were net increases of £484,900 in the weekly full-time wages of 3,920,900 workpeople, and net decreases of £10 in those of 150 workpeople.

Hours of Labour.

Only two changes were reported during August in the industries covered by the Department's statistics.* The changes reported during the eight completed months of 1938 are estimated to have affected about 155,400 workpeople, of whom about 1,500 have had their hours increased by nearly \(^3_4\) hour per week, and 153,900 their hours reduced by just over 2 per week.

PRINCIPAL CHANGES IN RATES OF WAGES REPORTED DURING AUGUST.

Industry.	District.	Date from which Change took effect.	Classes of Workpeople.	Particulars of Change. (Decreases in italics.)

Workpeople employed in and about coal mines, other than engine winders, deputies and firemen, examiners and shotlighters. Workpeople employed in and about coal mines.	Decrease of 1.05 per cent. on basis rates, leaving wages 45 per cent. above the basis rates.§ Decrease of 3.59 per cent. on basis rates, leaving wages at the minimum of 6 per cent. above the basis rates.§ Decrease of 14.66 per cent. on basis rates, leaving wages 52.15 per cent. above the basis rates.§ Decrease of 0.14 per cent. on basis rates, leaving wages 3.14 per cent. above the basis rates.§ Decrease of 0.14 per cent. on basis rates, leaving wages 3.56 per cent. above the basis rates, except for enginemen, firemen and mechanics, for whom the percentage reduction was 1.13 (36.13 to 35); also subsistence wages reduced by 1d. per day, leaving them 7s. 8d. and 7s. 4d. per day for underground and surfact workers respectively.§ Increase of 0.83 per cent. on basis rates, making wages 45.33 per cent. above the basis rates.§ Decrease of 0.14 per cent. on basis rates, leaving wages 44.25 per cent. above the basis rates for shopmen, mechanics and surfact workers not handling coal and 42.25 per cent. for all othe workers. Decrease of 1 per cent. on basis rates, leaving wages 40 per cent above the basis rates, and the amount below which the wage of able-bodied underground workers 18 years and over an surface workers 21 years and over are not to fall reduced from 6s.4d. (plus 1s.) to 6s. 3d. (plus 1s.) per day. Increase of 1 per cent. on basis rates at the majority of the collieries, making wages 74 per cent. above the basis rates these collieries. Subsistence wage payable to adult able-bodies surface workers increased by \$d\$, per shift (7s. 8\frac{1}{2}d\$, to 7s. 8\frac{1}{2}d\$. Increase of 5.50 per cent. on basis rates, making wages 125.5 per cent. above the basis rates, and corresponding increase for workpeople (e.g., enginemen, boys and girls) in receipt consolidated rates.§

The particulars of numbers affected and amount of change in the weekly wages and hours of labour exclude changes affecting Government employees, agricultural labourers, shop assistants and clerks, for which classes the information available is not sufficient to form a basis for statistics. Where information is available, however, details of changes in the wages and hours of these classes are shown in the list of principal changes recorded. The estimates of the effects of the changes on weekly wages are based on normal conditions of employment and do not take into account the effect of short-time working, etc.

† Of the 271,000 workpeople whose rates of wages were reduced in August, the majority had received increases of greater or equal amounts during the earlier months of 1938.

‡ In addition to the numbers quoted, wages stand at the same level as at the beginning of the year in the case of 271,500 workpeople whose wages have been increased and reduced by equal amounts during the year.

§ Apart from the percentage additions to basis rates, certain flat rate additions and the same level as a different addition to the numbers quoted in the percentage additions to basis rates, certain flat rate additions and the same level as a different addition to the numbers quoted in the percentage additions to basis rates, certain flat rate additions and the same level as a different addition to the numbers quoted and reduced by equal amounts during the year.

1 in addition to the numbers quoted, wages stand at the same level as at the beginning of the year in the case of 271,500 workpeople whose wages have a increased and reduced by equal amounts during the year.

\$ Apart from the percentage additions to basis rates, certain flat-rate additions per day or per shift, granted in January, 1936, are paid to all workers, as well subsistence allowances to adult day-wage workers for whom the basis rates plus the percentage additions do not yield certain specified amounts.

\$ Flat-rate additions are also paid of 1s. per day to workers 21 years and over and of 6d. per day to other workers. The subsistence wage payable at the jority of the collieries to adult able-bodied underground workers remained unaltered at 8s. 6d. per shift. At three collieries a lower percentage is payable; percentage addition is 61 at two collieries and 69 at another.

* Including Blyth, Dunston, Jarrow, Newcastle-upon-Tyne, North and South Shields and Tyne Dock.

† A further increase of a similar amount is to operate from the commencement of the 1st full pay week in September.

‡ This increase resulted from the regrading of the district from Grade III to Grade II by the Public Works Conciliation Board of the London Area.

§ This increase resulted from the regrading of the undertakings from Grade B to Grade A by the Yorkshire Area District Joint Industrial Council for the Electricity Supply Industry.

| These increases were agreed upon on 10th August, 1938, with retrospective effect to the date shown.

¶ These increases are the result of an Award of the Industrial Court, dated 16th August, 1938, with retrospective effect to the date shown.

** See also under "Changes in Hours of Labour."

†† Under cost-of-living sliding-scale arrangements.

‡ The areas are as follows:—Area A.—Areas administered by Rural District Councils, Municipal Borough Councils and Urban District Councils with a population of less than 10,000, other than any area within the Metropolitan Police District; Area B.—Areas other than areas A and C; Area C.—City of London and the Metropolitan Police District.

§§ These increases took effect under Orders issued under the Trade Boards Acts. Full details of the minimum rates are contained in the Confirming Order of the Minister of Labour, obtainable from H.M. Stationery Office.

| This change is the result of an agreement dated 3rd August, with retrospective effect to the date shown.

¶ The Grades are as follows:—Grade II—Exeter and Paignton. Grade III—Barnstaple, Dartmouth and Tiverton. Grade IV—Axminster, Bideford, Plympton, Tavistock and Teignmouth.

**** See also under "Changes in Rates of Wages."

TRADE DISPUTES IN AUGUST.*

Number, Magnitude and Duration.—The number of disputes involving stoppages of work, reported to the Department as beginning in August in Great Britain and Northern Ireland, was 77, as compared with 43 in the previous month and 134 in August, 1937. In these 77 new disputes about 16,000 workpeople were directly involved, and 5,600 workpeople indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, about 1,100 workpeople were involved, either directly or indirectly, in 12 disputes which began before August and were still in progress at the beginning of that month. The number of new and old disputes was thus 89, involving 22,700 workpeople and resulting in a loss, during August, estimated at 86,000 working days.

In the following Table is given an analysis, by groups of industries, of disputes in progress in August:—

Number of Work-people in-volved in all Disputes in progress in pro Number of Disputes in progress in Month. Industry Group. Total. month. | month. 34 37 12,600 47,000 Mining and Quarrying ...
Metal, Engineering and
Shipbuilding ... 20,000 5,000 3,000 11,000 6,300 1,600 500 1,700 13 8 13 18 12 suilding, etc. ... 11 13 22,700 86,000 12 77 89 Total, August, 1938 80.000 20,000 20 43 63 Total, July, 1938 12 | 134 74,500 228,000 146 Total, August, 1937

Causes .- Of the 77 disputes beginning in August, 11, directly involving 5,400 workpeople, arose out of demands for advances in wages, 3, directly involving 100 workpeople, out of proposed wage reductions, and 11, directly involving 1,900 workpeople, on other wage questions; 4, directly involving 200 workpeople, on questions as to working hours; 21, directly involving 1,900 workpeople, as to working hours; 21, directly involving 1,900 workpeople, on questions respecting the employment of particular classes or persons; 22, directly involving 5,600 workpeople, on other questions respecting working arrangements; and 3, directly involving 100 workpeople, on questions of trade union principle. Two stoppages, directly involving 800 workpeople, were due to sympathetic action in support of workpeople involved in other disputes.

Results.—Final settlements of disputes which terminated during August have been effected in the case of 59 new disputes, directly involving 7,700 workpeople, and 7 old disputes, directly involving 400 workpeople. Of these new and old disputes, 8, directly involving 800 workpeople, were settled in favour of the workpeople; 36, directly involving 4,600 workpeople, were settled in favour of the employers; and 22, directly involving 2,700 workpeople, resulted in a compromise. In the case of 5 other disputes, directly involving 2,500 workpeople, work was resumed pending negotiations.

Totals for January-August, 1938 and 1937.†

The following Table summarises the figures for Great Britain and Northern Ireland for the first eight months of 1938, as compared with the corresponding period of 1937:-

COAL MINING— Strippers, other underground and surface workers—Stirling (one colliery).	80	332	6 Jan.	osla Tata Gr	Against alleged non-compliance, on the part of a certain contractor, with prevailing system of wage payment.	No settlement reported.	
Coal-face and other colliery work-people—Burslem (one colliery).	790	850	8 Aug.	20 Aug.	Against proposed deduction of $2\frac{1}{2}$ per cent. from wages in respect of dirt filled with coal.	Proposal withdrawn for period of three months to allow work- people to try to reduce amount of dirt filled by 2½ per cent.	
Colliery workpeople — Shotts, Lanarkshire (one colliery).	342	644	8 Aug. 10 Aug.	9 Aug. 11 Aug.	Alleged unsatisfactory work per- formed by brushers. Dispute respecting brushers leaving work before end of shift.	Brushers promised to remedy complaints. Work resumed.	
Colliery workpeople — Longton, Staffs. (one colliery).	350	680	23 Aug.	24 Aug.	Conditions arising from the use of steel supports at the coal face instead of wooden supports.	Increased rates granted for coal getting and packing where steel supports are used.	
ENGINEERING— Workpeople employed in aircraft manufacture—Birmingham (one firm).	5,000		29 Aug.	7 Sept.	Dissatisfaction with certain basic rates of wages.	Work resumed on conditions existing prior to stoppage pending negotiations.	
NUT, BOLT, ETC., MANUFACTURE— Workpeople employed in rivet, bolt and nut manufacture— Airdrie (one firm).	49	295	10 Aug.	13 Aug.§	Management's refusal to agree to workpeople's request that work should be spread over.	Work resumed on conditions existing prior to stoppage.	
Laundering— Laundry workers—Edinburgh (one firm).	300		10 Aug.	16 Aug.	For reinstatement of certain employees who had been dismissed under a scheme of reorganisation.	Work resumed; dismissed employees to be considered for future vacancies.	
TRANSPORT— Dock labourers—West Hartlepool.	450		9 Aug.	9 Aug.	Against introduction of new working rules, with regard to their provision for reductions in the size of gangs discharging timber cargoes at certain berths.	Old working rules to be observed, pending negotiations.	
RACEHORSE TRAINING— Stablemen—Lambourn and dis- trict.	300		21 May		For an increase in wages of 5s. per week.	No settlement reported.	

^{*} Disputes involving less than 10 workpeople, and those which lasted less than one day, have, as usual, been omitted from the statistics, except when the aggregate duration (i.e., number of workpeople multiplied by number of working days, allowing for workpeople replaced, etc.) exceeded 100 days.

† In making up these totals the figures have been amended in accordance with the most recent information. Workpeople involved in more than one dispute are counted more than once in the totals; the amount of such duplication, however, is slight, except in coal mining, in which the net number of workpeople involved was approximately 92,000 in 1938, and 165,000 in 1937. For all industries combined the net totals were approximately 156,000 in 1938, and \$21,000 in 1937.

‡ The occupations printed in italics are those of workpeople indirectly involved, i.e., thrown out of work at the establishments where the disputes occurred but not themselves parties to the disputes.

§ Work was resumed on 16th August.

CHANGES IN COST OF LIVING: STATISTICS FOR 1st SEPTEMBER.

Summary: Average Increases since July, 1914. All Items included ... 56% Food only 40%

FOOD.

At 1st September the average level of the retail prices of food in Great Britain and Northern Ireland was slightly lower than a month earlier. This was mainly due to decreases in the prices of potatoes, bread and flour, which, however, were partly counterbalanced by increases in the prices of eggs.

As a net result of all the changes recorded, the average increase over the level of July, 1914, in the retail prices of the articles of food included in these statistics was 40 per cent. at 1st September, 1938, as compared with 41 per cent. at 2nd August, 1938, and 40 per cent. at 1st September, 1937.

In the following Table is given a comparison of retail prices in July, 1914, and at 2nd August, and 1st September, 1938:—

* If this kind is seldom dealt with in a locality, the returns quote the prices of another kind locally representative.

† The description of cheese for which prices are quoted is in most cases Canadian or New Zealand, but in some districts the returns quote the prices of another kind locally representative.

RENT, CLOTHING, FUEL AND LIGHT.

As regards rents, enquiries which have been made into the changes As regards rents, enquiries which have been made into the changes which have taken effect under the Rent and Mortgage Interest Restrictions Acts indicate that the average increase in the controlled rents (including rates) of working-class dwellings between July, 1914, and 1st September, 1938, was approximately 52 per cent. When decontrolled rents are also included, the combined average increase, as compared with July, 1914, in controlled and decontrolled working-class rents (including rates) is approximately 60 per cent. This latter figure has been utilised in calculating the final percentage increase shown below for "all items." increase shown below for "all items."

As regards clothing, owing to the wide range of quotations, both As regards clothing, owing to the wide range of quotations, both now and before the war, to changes in qualities and in stocks held by retailers, and to the variations in the extent to which different articles and qualities have been affected by price changes, it is impossible to make an exact calculation of the increase in prices. Information which has been collected, however, from retailers in the principal towns as to the prices of clothing bought by working-class families indicates that for articles of, as far as possible, similar quality at each date, the average increase in retail prices between July, 1914, and 1st September, 1938, was about 110 per cent.

In the fuel and light group the prices of coal increased in many towns and were, on the average, about 95 per cent. above the level of July, 1914. The average price of gas remained about 50 per cent. above the pre-war level. For the fuel and light group as a whole (including coal, gas, oil, candles and matches) the average increase at 1st September, as compared with July, 1914, was about 80 per cent.

ALL ITEMS.

If the average increases in the cost of all the foregoing items are combined in accordance with their relative importance in pre-war working-class family expenditure, allowance being also made for the increase in the prices of soap, soda, domestic ironmongery, brushware and pottery, tobacco, fares and newspapers (averaging about 75 per cent.), the resultant general average increase for 1st September, 1938, is approximately **56 per cent.** over the level of July, 1914, as compared with 56 per cent. at 2nd August, 1938, and 55 per cent. at 1st September, 1937.

The result of this calculation (in which the same quantities and, as far as possible, the same qualities of each item are taken now as in 1914) is to show the average increase in the cost of maintaining unchanged the pre-war standard of living of working-class families (i.e., the standard actually prevailing in working-class families before the war, irrespective of whether such standard was adequate or not). In view of the variations in the amounts of increase in the prices of different commodities, it is probable that economies or readjustments in expenditure have been effected in many families, especially in those cases where incomes have not increased so much as prices. On the other hand, the standard of living has doubtless risen in many cases in which wages have been increased in greater propormany cases in which wages have been increased in greater proportion than prices. No allowance is made in the figures for any such alterations in the standard of living, as to which comprehensive

SUMMARY TABLE: 1920 to 1938.

The following Table shows the average percentage increase, as compared with July, 1914, for all the items included in the statistics, at the beginning of each month, 1920 to 1938:—

Average Percentage Increase since July, 1914—All Items. (Food, rent, clothing, fuel and light, etc.)

Year.	Jan.	Feb.	Mar.	Apr.	May.	June.	July.	Aug.	Sept.	Oct.	Nov.	Dec.

A detailed account of the method of compilation of these statistics, "The Cost of Living Index Number: Method of Compilation," is obtainable, price 3d. net (3½d. post free), from H.M. Stationery Office at any of the addresses shown on the cover of this GAZETTE.

RETAIL PRICES OVERSEAS.

N.B.—While the percentages given in the following Summary Tables are derived from the most authoritative sources of statistical information, certain differences in the nature and scope of the data used, in the methods of combining such data and in the periods for which the rise is measured, suggest the need for caution in drawing conclusions from a comparison between the figures for any two countries or cities. In every case, the percentage calculation is based on the cost of a fixed list of commodities taken in identical quantities.

||| Revised figure.

FATAL INDUSTRIAL ACCIDENTS.

THE number of workpeople, other than seamen, in Great Britain and Northern Ireland, whose deaths from accidents in the course of their employment occurred or were reported in August, was 186, as compared with 140* in the previous month, and with 143* in August, 1937. Fatal accidents to seamen reported in August numbered 40, as compared with 34 in the previous month, and with 22 in August, 1937.

* Revised figure. The number of surface workers killed in mining accidents in July, 1938, was 9; the number was incorrectly stated as 59 in the previous issue of this GAZETTE.

† Cases include all attacks reported during the month, and not previously reported, so far as is known, during the preceding 12 months. Deaths include all fatal cases reported during the month, whether included (as cases) in previous returns or not.

BUILDING PLANS APPROVED.

AUGUST, 1938.

RETURNS as to the estimated cost of buildings for which plans were approved during August have been received from 144* of the 146 Local Authorities which supply such information to the Department. The returns received from these 144 Authorities (representing

towns with a total population of 17,656,000 in 1931) are summarised in the following Table, in which are also given comparisons with August, 1937, in respect of the same 144 Authorities:—

District.	Dwelling Houses.	Factories and Work- shops.	Shops, Offices, Ware- houses and Other Business Pre- mises.	Churches Schools and Public Build- ings.	Other Buildings; and Additions and Alterations to existing Buildings.	Totals; and Per- centage Inc. (+) or Dec. (-) as com- pared with Aug., 1937.

				MARKET STATE		

It should be noted that 30 of the 144 Local Authorities reporte that no plans were approved in August; in the majority of these cases it was stated that there had been no meetings of the appropriate committee during August.

JULY, 1938.

In last month's issue of this GAZETTE figures were given for 140 Local Authorities in respect of plans approved during July, 1938. Returns for the latter month are now available for all of the 146 Local Authorities covered by the Department's enquiries (representing towns with a total population of 17,864,000 in 1931). The estimated cost of the buildings included in the returns was £9,615,600, compared with £8,860,200 in June, 1938, and £9,920,700 in July, 1937. Of the total for July, 1938, dwelling houses accounted for £5,556,000; factories and workshops, £474,200; shops, offices warehouses and other business premises, £1,357,000; churches, schools and public buildings, £1,137,600; other buildings, and additions and alterations to existing buildings, £1,090,800. The number of dwelling houses for which plans were approved by the 146 Authorities in July was 10,799, as compared with 12,215 in June, 1938, and 12,460 in July, 1937.

PRICES AND WAGES IN THE IRON AND STEEL INDUSTRIES.

THE following Table shows the results of recent ascertainments of selling prices of pig-iron and of manufactured iron and steel, upon which are based changes in the rates of wages of certain classes of iron and steel and other workers in particular districts:—

Product and District.	Period covered by	Average Selling Price‡ per ton	Inc. (+) or Dec. (-) compared with					
	last Audit.	according to last Audit.	Previous Audit.‡	A Year ago.‡				
Pig-Iron: Cumberland Lincolnshire Nottingham District Northamptonshire North Staffordshire	1938. AprJune AprJune AprJune AprJune AprJune	s. d. 117 4 102 11½ 95 3½ 90 9½ 90 6¾	8. d. + 3 5½ + 0 1½ + 3 0 + 1 8¾ - 0 0½	* d. + 35 11\frac{3}{4} + 24 1\frac{1}{4} + 23 8\frac{1}{2} + 22 2\frac{3}{4} + 11 8\frac{3}{4}				
Manufactured Iron: West of Scotland	May-June	269 42	- 4 7½	+ 39 62				
Steel: South-West Wales	AprJune	150 2	+ 0 101	+ 17 71				

In accordance with the provisions of the agreements under which wages are regulated, the ascertainments resulted in increases in the wages of blastfurnacemen in West Cumberland and North Lancashire iron ore miners and limestone quarrymen in Cumberland; iron ore miners in the Furness district; blastfurnacemen, ironstone miners and quarrymen in North Lincolnshire; blastfurnacemen in Notting-

hamshire and Leicestershire; ironstone and limestone quarrymen in Leicestershire and the adjoining parts of Lincolnshire; blast-furnacemen, ironstone miners and limestone quarrymen in Northamp-tonshire (excluding Corby); and Siemens steel workers in South-

In the case of iron puddlers and millmen in the West of Scotland, the ascertainment resulted in a reduction in wages; whilst for North Staffordshire the ascertainment did not warrant a change in wages. For details of the changes in wages, reference should be made to page 323 of the August GAZETTE, and to pages 366 and 367 of this

UNEMPLOYMENT INSURANCE. DECISIONS GIVEN BY THE UMPIRE.

THE Umpire is a judicial authority independent of the Ministry of Labour, appointed by the Crown (see Section 40 of the Unemployment Insurance Act, 1935), for the purpose of determining disputed ment Insurance Act, 1935), for the purpose claims to benefit. His decisions* are final.

Appeals to the Umpire may be made by the Insurance Officer or by an Association of which the claimant is a member, or, with the leave of the Chairman of the Court of Referees, by the claimant himself. The claimant may also appeal if the decision of the Court

The following recent decision is of general interest :-

Case No. 2982/38 (3.8.38).

Section 35 of the Unemployment Insurance Act, 1935-RECKONING OF PERIODS OF UNEMPLOYMENT—WHERE PAYMENTS FOR HOLIDAYS WERE DETERMINED ACCORDING TO RESULTS AND WERE GOVERNED BY CLAUSES UNDER A CONCILIATION BOARD AGREEMENT, IT WAS NEVERTHELESS HOLIDAY PAY AND NOT DEFERRED PAYMENT-RECIPIENTS NOT UNEMPLOYED FOR BENEFIT OR CONTINUITY PURPOSES.

The material circumstances of this case are as stated in the following

Decision—"On the facts before me my decision is that the claimant is not entitled to benefit for the inclusive period, 6th to 11th June, 1938, nor is he entitled to count any days in the said

period for the purpose of continuity.

"On 5th April, 1937, an agreement, which is described as the Conciliation Board Agreement for the Coal Trade of Monmouthshire and South Wales,' was made 'Between the undersigned Owners' Representatives acting on behalf of the several Colliery Owners who are now Members or who may hereafter become Members of The Monmouthshire and South Wales Coal Owners' Association (herein-Monmouthshire and South Wales Coal Owners' Association (hereinafter called 'the Owners') of the one part and the undersigned Workmen's Representatives acting on behalf of all the workmen now employed or who may hereafter be employed at the Collieries of the Owners and who may be members of the South Wales Miners' Federation (hereinafter called 'the Workmen') of the other part.' "In this decision the above agreement is referred to as 'the Conciliation Board Agreement,' and the expressions 'the Owners' and 'the Workmen' are respectively used in the sense above described

The agreement constituted the said Conciliation Board and (inter alia) it laid down the standard base rates for 1937, and the minimum percentage to be added to those standard base rates and the method by which from time to time the percentages payable

should be ascertained.

"The standard base rates plus the agreed percentage constitute the minimum wages to be paid to workmen.

"At all times material for the purpose of this decision the minimum wage consisted of the 1937 standard base rates plus 30 per centum

"On 4th April, 1938, a further agreement was made between the owners and the workmen. It is headed: 'Agreement for the provision of Holidays with Pay for Workmen employed at Collieries in the South Wales and Monmouthshire Coalfield.' Hereinafter

this is referred to as 'the Holidays with Pay Agreement.'
"'After referring in clauses 1 and 2 to the facts that by the Con-"After referring in clauses 1 and 2 to the facts that by the Conciliation Board Agreement the workmen were entitled to 12 general holidays, that the dates thereof were to be agreed upon by the Board, and that those 12 general holidays were holidays without pay, the Holidays with Pay Agreement in clause 3 describes the manner in which those holidays are to be taken and included amongst them are 'Consecutive summer holidays . . . 6 days.'

"By the same clause 'The six days consecutive holiday shall in principle be regarded as paid holidays.'

"Clause 6 provides for a possible specified reduction from a

"Clause 6 provides for a possible specified reduction from a workman's 'holiday payment' in respect of each week 'other than the paid holiday week 'in which he loses more than one of the shifts

the paid holiday week 'in which he loses more than one of the shifts available for him to work in that week.

"By Clause 8 'Every workman is obliged to take that proportion of the week's consecutive holiday which the amount of holiday payment which he receives bears to the maximum holiday payment, but he may take the full week's holiday if he so desires.'

* Selected decisions of the Umpire are published (i) in monthly pamphlet—U.I. Code 8B. (The latest pamphlet is that for July, 1938, price 2d. net; the pamphlets are also obtainable by annual subscription of 2s. 6d. net); (ii) in annual volumes (the latest volume is that for 1936, price 3s. net); (iii) in the following special volumes:—(a) U.I. Code 8 containing specially selected decisions prior to 19th April, 1928 (price 15s. net); (b) U.I. Code 8A, containing specially selected decisions from 19th April, 1928, to 12th March, 1930 (price 6s. net); and (c) U.I. Code 80 containing selected decisions from 13th March, 1930, to 31st December, 1934 (price 10s. net).

The analytical guide to Umpire's decisions (U.I. Code 7), originally published in 1930, is under revision. Certain sections of the guide have now been revised up to date and are on sale.

"Clause 9 requires 'the workmen's consecutive week's holiday' to be taken between 1st June, and 30th September, in any year.

By Clause 12 the management of a colliery has power (subject to giving due notice) to decide whether the whole colliery shall

to giving due notice) to decide whether the whole colliery shall cease work for a given week, or whether the men shall be given their holidays in relays within the holiday period.

"Clause 18 provides 'It is agreed that the cost of paid holidays shall be regarded and treated as a wages cost for the purposes of the Ascertainment under the Conciliation Board Agreement.'

"For the purposes of the regges agreets imports the cost of holiday."

the Ascertainment under the Conciliation Board Agreement."

"For the purposes of the wages ascertainments the cost of holiday allowances is declared by clause 19 to be charged in the tonnage statistics returns in the manner therein provided. The 'amount to be charged in T.S. Return in respect of Holiday Allowances' in each of the periods of ascertainment mentioned in the years 1938, and 1949, respectively in the head of the periods of the period of the periods of the 1939 and 1940, respectively is to be a specified percentage of the total cost of holiday allowances for those respective years.

"The foregoing are all the terms of the Holidays with Pay Agree-

ment which are material to the present case and to the contentions

raised in connection with it.
"For the purpose of administering the Holidays with Pay Agree-

ment certain 'Instructions' have been agreed.

"The first of these states 'The Management in its sole discretion determines the date when the holiday shall be taken, provided it is within the period 1st June to 30th September.'

"Instruction 32 may become material if it is necessary in any case to determine whether the claimant was available for work during the period of holiday. It provides as follows: 'Although under clause 8,' that is, clause 8 of the Holidays with Pay Agreement, 'a workman is obliged to take that proportion of the week's consecutive holiday which the amount of holiday payment which he receives bears to the maximum holiday payment, it is agreed that there is no obligation upon the Management to provide him with work for the remainder of the week.'

In the present case the management of the colliery where the claimant was employed fixed the period of the summer holiday for the whole colliery and it consisted of the six days commencing on 6th June. It is beyond all reasonable question that the period on 6th June. It is beyond an reasonable question that the period 6th to 11th June, 1938, inclusive, was an agreed holiday for the

The claimant was in the employment of the management on Saturday, 4th June, and it is material to note that throughout his employment at the colliery since the coming into operation of the Conciliation Board Agreement he was paid wages which were not less than his standard base rate plus 30 per cent. as provided that agreement.

in that agreement.

"When the claimant was suspended from work on 4th June, 1938, for the purpose of the ensuing holiday he received from his employers, in addition to the wages due to him for work done, a sum of £3 to which he was entitled under the terms of the Holidays

with Pay Agreement.

"The Insurance Officer decided that the claimant was not unemployed during the inclusive period 6th to 11th June, 1938, and that he was not entitled to benefit in respect of any of those days or to count any of them for the purpose of continuity.

"This decision was upheld by the majority of the Court of the

Referees. The insured contributors' representative dissented, 'holding that the payment received for the holiday is merely deferred wages, in other words part of the claimant's wages which he has earned by good and efficient attendance at work and the he has earned by good and efficient attendance at work and the payment of which wages has been deferred so as to provide him later with a sum to enjoy his well earned holiday. He, therefore, holds that the holidays, although days of recognised holidays, are not days of holiday with pay. . . . "

"The claimant's Association have appealed from the decision of the Court of Referees upon the grounds 'that the payment received by the claimant was not wages or remuneration in respect of the holiday week and as he was unemployed that period should be alleged for benefit or continuity."

allowed for benefit or continuity.

At the hearing on appeal the views of the dissenting member At the hearing on appear the views of the disserting intention of the Court of Referees were adopted and developed, and I deal first with the argument that the payment to the claimant was only 'deferred wages' which had been earned by good and efficient

'The argument that holiday pay is only 'deferred payment of "The argument that holiday pay is only deterred payment of wages'—either because it is meant to reimburse deductions which have been made from current weekly wages in the period preceding the holiday or because it is a payment for good and efficient services in that period—has often been urged in previous cases. The decisions show that it is the agreement under which the payment is made that determines the character of the payment.

"The subject has been discussed recently in a printed decision (Decision 2354/38)* and it is not necessary to repeat what was

In the present case there cannot be any reasonable doubt as In the present case there cannot be any reasonable doubt as to the intention and purpose of the Holidays with Pay Agreement. It was intended to carry into effect, and it does carry into effect, the now widely accepted principle that workers should not only have annual holidays but that they should also receive payment in respect of the period of holiday. This is all apparent in the description of the agreement and throughout its terms, and it is

emphasised in the provisions of clause 8.

"Another contention which was strongly urged at the hearing on appeal was based on clause 18 of the Holidays with Pay Agreement, by which it was agreed that the cost of paid holidays should be treated as a wages cost for the purposes of the Ascertainment under the Conciliation Board Agreement.

"Under the last mentioned agreement, the amount of percentage to be paid during any period is to be determined by the results of the industry in the district during a previous period (called the period of ascertainment) as ascertained by returns to be made

by the owners, but this is subject always to the operation of the minimum percentage (clause 15).

minimum percentage (clause 15).

"'In order to determine the percentage payable in the district in accordance with clause 15, 85 per cent. of the difference between the proceeds and the costs of production other than wages in the district during the period of ascertainment shall be expressed as the 1937 Standard Base Rates with a percentage added thereto obtaining during the period of ascertainment' (clause 16). Provision is made for the carrying forward of any deficiency (clause 17).

"The facts that the workmen agreed to the inclusion of the heliday payments as were costs for the purpose of the ascertain.

holiday payments as wages costs for the purpose of the ascertainment, and that it is possible that in circumstances of prosperity such inclusion may to some extent work to their disadvantage by delaying the time when the minimum percentage is exceeded, do not justify an inference that there has been a notional deduction of wages each week which is accumulated to the period of ascertain

"The arguments so based are similar to those which were advanced in Case 2354/38. It was there contended that, if the subject of holiday pay had not been introduced into the negotiations for an increase of wages, the increase agreed upon would have been greater, so that it should be held that there had been a deducing the statement of heliday.

so that it should be held that there had been a deduction from weekly wages equivalent to the proportionate amount of holiday pay. It was held that the issue involved could be determined only by interpreting and applying the agreement as framed.

"It may be conceded that the holiday payment was earned by the claimant by past services, but none the less it was earned in order that it might be paid for and in respect of the holiday.

"As the claimant's employment was not terminated, section 35 (6) of the Unemployment Insurance Act, 1935, has no application, and the principle of Decision 6084 applies, namely, that as the payment received by the claimant was made under the expressly agreed terms of his employment, he must be regarded as not unemployed, either for the purpose of benefit or continuity, during the employed, either for the purpose of benefit or continuity, during the period in respect of which the payment was made.

"In these circumstances it is unnecessary to consider whether the claimant was available for work during the period of holiday."

INDUSTRIAL COURTS ACT, 1919, AND CONCILIATION ACT, 1896. INDUSTRIAL COURT AWARDS.

EMPLOYEES IN FERRIES UNDERTAKING, COUNTY BOROUGH OF WALLASEY.—The Transport and General Workers' Union submitted a claim for an increase in the wages of all men employed by the Council of the County Borough of Wallasey on their ferries service who come within the purview of the Union. The claim rested on the value of the services rendered, the rise in the cost of living since the value of the services rendered, the rise in the cost of living since the rates in operation were agreed upon in May, 1937, and the wages paid for similar work in other services. In opposing the claim the Council pointed out that as regards the cost of living, which was the original basis of the claim, in recent years there had been a period of very low prices, but no reduction had been made in the wages of the ferries employees other than the adjustment which accompanied the reduction of the working hours from 56 to 48 a week in 1936. The Court awarded increases of 1s. and 2s. a week in the wages of certain grades with a recommendation for the favourable review of those cases in which a larger increase had been offered by the Council during the previous negotiations.—Award No. 1709; dated 16th August, 1938.

SHIFT ENGINEERS EMPLOYED AT THE MARGARINE WORKS OF THE CO-OPERATIVE WHOLESALE SOCIETY, IRLAM.—The Amalgamated Engineering Union claimed that shift engineers employed at the Society's margarine works should be paid £5 2s. 6d. a week on day work and £5 12s. 6d. a week on night work. The Union also asked for the restoration of a man now working as a fitter to his former position as shift engineer. The claim in respect of wages was based on the nature of the duties performed by the shift engineers, and on the fact that the rates claimed had been in operation for a number of years prior to 1933, and, in the view of the Union, constituted the rates proper to be paid for the job. In November 1937, the Society of years prior to 1933, and, in the view of the Union, constituted the rates proper to be paid for the job. In November, 1937, the Society had, in the course of negotiations with the Union, offered to increase the rate of wages of shift engineers from 80s. to 85s. a week. The Society in opposing the claim stated that for some time prior to November, 1933, it had been considered that the rates paid to shift engineers were excessive for their duties and responsibilities. The Court awarded an increase of 5s. a week for shift engineers, and that the application of the fitter in question for restoration to the post of shift engineer shall be considered on its merits when a vacancy occurs.—Award No. 1710; dated 29th August, 1938.

CIVIL SERVICE ARBITRATION TRIBUNAL AWARDS.

PENSIONER CLERKS, SENIOR PENSIONER CLERKS AND CHIEF PEN-SIONER CLERKS: ADMIRALTY.—The Civil Service Clerical Association claimed increased scales of pay for the three grades of pensioner clerks employed by the Admiralty. The Tribunal awarded the

Senior Pensioner Clerks £170 × £10 — £280 Chief Pensioner Clerks £290 × £12 — £350 Award No. 33; dated 5th August, 1938.

TECHNICAL OFFICERS AND ASSISTANT TECHNICAL OFFICERS: SUP-PLIES DIVISION, H.M. OFFICE OF WORKS.—The Institution of Professional Civil Servants claimed revised assimilation terms for existing members of the grades of technical officer and assistant technical officer, Furniture Branch, Supplies Division, H.M. Office of Works, on entering a new salary scale operating from 1st May, 1936. The Tribunal awarded revised assimilation terms.—Award No. 34; dated 9th August, 1938.

^{*} The outstanding returns were distributed as follows:—Yorkshire (one); d South-Eastern Counties (one).
† Particulars are not available for the London County Council area.
‡ Stated to the nearest farthing.

^{*} See Umpires' Selected Decisions, page 41, Pamphlet No. 6/1938.

TRADE BOARDS ACTS. CONFIRMING ORDER.

Linen and Cotton Handkerchief and Household Goods and Linen Piece Goods Trade Board (Northern Ireland).

Order N.I.H.H.G. (62), dated 23rd August, 1938, confirming the variation of general minimum piece rates, and general overtime rates for certain female workers, and specifying 12th September, 1938, as the date from which such rates should become effective.

SPECIAL AREAS (AMENDMENT) ACT, 1937: DIRECTIONS.

In accordance with the above Act, the Minister of Labour has directed that Section 5 of the Act shall apply to the Borough of Middleton from 22nd August, 1938. The effect of this direction is to authorise the Treasury (a) to provide financial assistance to a Site Company which has been incorporated for the purpose of providing factories with a view to inducing persons to establish industrial undertakings in the area; and (b) to provide financial assistance to new industrial undertakings which occupy the factories thus provided.
