General footnotes

(a) The enterprises included in this table consist of establishments under the same ownership or control within scope of the census of production and for the years shown are included in the enterprise net output structure then existing.

(b) Including estimates for small establishments that were not required to complete detailed returns.

(c) Excluding water companies. For 1958 and 1963, including publicly-owned iron and steel companies and also those privately owned that in subsequent years were included in the public sector.

(d) References to Orders are those in the Standard Industrial Classification (Revised 1968).

(e) For 1970, the establishment is defined as being the smallest economic unit for which a return could be made to the census and where a firm made a return covering two or more separate locations these were regarded as 'local units': in previous censuses they were counted as establishments.

(f) Including persons engaged in merchanting or factoring and canteen workers (where particulars in respect of these activities could not be excluded from the returns) and working proprietors, but excluding outworkers.

(g) Capital expenditure on new building work plus the net value of acquisitions less disposals of vehicles, and plant and machinery; from 1963 acquisitions less disposals of land and existing buildings is also included. Capital expenditure for establishments not yet in production is included for 1958 and 1970 but not for 1963 and 1968.

(h) Mining and quarrying (other than coal mining) and Construction. The figures for mining and quarrying relate only to Great Britain.
