OS/42(41A 25)

DEPARTMENT OF TRADE AND INDUSTRY BUSINESS STATISTICS OFFICE

### Report on the Gensus of Production 19762MAY 1973 OF POLIHICAL AND CONOMIC SCIENCE

C67 Photographic and document copying equipment

Publication of the Government Statistical Service

## **Business Monitor**

DEPARTMENT OF TRADE AND INDUSTRY **BUSINESS STATISTICS OFFICE** 

# 1970

#### C67 Photographic and document copying equipment

Presented by the Department of Trade and Industry to Parliament in pursuance of the Statistics of Trade Act 1947 (10 & 11 Geo. 6 Cha. 39 sec 7)

#### Special Note for Purchasers

Commencing with the 1970 Census, the Census of Production reports will in future be published annually as part of the Business Monitor series. They will continue to be available on standing order from HMSO, but they are not included in the global subscription arrangements for the Business Monitor series.

#### **Government Statistical Service**

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

Enquiries: **Business Statistics Office** Cardiff Road Newport, Mon NPT 1XG Newport 56111 (STD code 0633) ext 2455

## Report on the Census of Production

#### List of Industry Reports, etc.

C1	Introductory Notes
C2	Coal mining
	Stone and slate quarrying and mining
C3	Chalk, clay, sand and gravel extraction
C4	Chalk, clay, sand and graver extraction
C5	Petroleum and natural gas
	Salt and miscellaneous non-metalliferous
	mining and quarrying
~	Mining and quarrying
C6	Metalliferous mining and quarrying
C7	Grain milling
C8	Bread and flour confectionery
C9	Biscuits
C10	Bacon curing, meat and fish products
	bacon curing, meat and hish products
C11	Milk and milk products
C12	Sugar
C13	Cocoa, chocolate and sugar confectionery
C14	Fruit and vegetable products
C15	Animal and poultry foods
	Vegetable and animal oils and fats
C16	
C17	Margarine
C18	Starch and miscellaneous foods
C19	Brewing and malting
C20	Soft drinks
	Spirit distilling and compounding
C21	Spirit distining and compounding
C22	British wines, cider and perry
C23	Tobacco
C24	Coke ovens and manufactured fuel
C25	Mineral oil refining
	Lubricating oils and greases
C26	Concernal chamicals (incorganic)
C27	General chemicals (inorganic)
C28	General chemicals (organic)
C29	General chemicals (other than inorganic
02)	and organic)
C30	Pharmaceutical chemicals and preparations
C31	Toilet preparations
C32	Paint
C33	Soap and detergents
C34	Synthetic resins and plastics materials
CJ4	and synthetic rubber
C35	Dyestuffs and pigments
C35 C36	Dyestuffs and pigments Fertilizers
C36	Fertilizers
C36 C37	Fertilizers Polishes
C36 C37 C38	Fertilizers Polishes Formulated adhesives, gelatine, etc.
C36 C37	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches
C36 C37 C38	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches
C36 C37 C38 C39 C40	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants
C36 C37 C38 C39 C40 C41	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink
C36 C37 C38 C39 C40 C41 C42	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc.
C36 C37 C38 C39 C40 C41 C42 C43	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials
C36 C37 C38 C39 C40 C41 C42 C43 C44	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials Iron and steel (general)
C36 C37 C38 C39 C40 C41 C42 C43 C44 C45	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials Iron and steel (general) Steel tubes
C36 C37 C38 C39 C40 C41 C42 C43 C44	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials Iron and steel (general) Steel tubes Iron castings, etc.
C36 C37 C38 C39 C40 C41 C42 C43 C44 C45	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials Iron and steel (general) Steel tubes Iron castings, etc. Aluminium and aluminium alloys
C36 C37 C38 C39 C40 C41 C42 C43 C44 C45 C46	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials Iron and steel (general) Steel tubes Iron castings, etc. Aluminium and aluminium alloys Copper, brass and other copper alloys
C36 C37 C38 C39 C40 C41 C42 C43 C44 C45 C46 C47 C48	Fertilizers Polishes Formulated adhesives, gelatine, etc. Explosives, fireworks and matches Formulated pesticides and disinfectants Printing ink Surgical bandages, etc. Photographic chemical materials Iron and steel (general) Steel tubes Iron castings, etc. Aluminium and aluminium alloys Copper, brass and other copper alloys

#### C67 Photographic and document copying equipment

This report on the Photographic and Document Copying Equipment Industry relates to establishments engaged wholly or mainly in manufacturing photographic and cinematographic apparatus including cameras, projectors, photographic accessories and document copying equipment including machinery using the xerographic process, etc. Photographic lenses and sensitized paper and cloth, films and plates are excluded.

The industry corresponds to minimum list heading 351 in the Standard Industrial Classification (revised 1968) which was used for the first time as a basis of classification in the 1968 census, when it was reported as part 67. The definition of the industry is the same for the 1968 and 1970 censuses. The figures given for 1963 have been reclassified as far as possible according to the Standard Industrial Classification (revised 1968).

#### In interpreting the data in the tables it is essential to bear

in mind the notes and definitions which commence on page (iii).

(a) Including working proprietors.

(b) New building work plus acquisitions <u>less</u> disposals of land and existing buildings, plant and machinery and vehicles: including capital expenditure at establishments not yet in production.

(c) Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to the region only where more than 80 per cent of the establishment's employees were located in the region. The estimate was made by assuming that net output at each address covered by a return was proportionate to employment at the address. The establishment's residual net output was included in unallocated net output.

(d) Includes estimates of net output for establishments not making satisfactory returns and establishments employing less than 25 employees, and unallocated net output of establishments covering addresses in two or more regions.

#### Notes

These notes give the main information needed for interpreting the figures in the industry reports, (more detailed information about the census is given in a separate booklet—"Introductory Notes", Part C1 of the Report on the Census of Production for 1970).

#### GENERAL INFORMATION

Changes compared with 1968

The questions asked in the 1970 census were similar to those in the 1968 census with certain exceptions. In particular the 1970 census returns did not ask for details of :---

(i) purchases or sales by commodities

(ii) payments of rates

(iii) payments for repairs and maintenance (iv) costs of operating road goods vehicles.

The amounts payable to other organisations for transport of goods however, did include the cost of the Post Office parcel services.

Other changes concern the treatment of firms employing less than 25 persons and the rules used for classifying establishments to industry. Any such changes are explained in the following paragraphs, or in the introductions to the industry reports, or by footnotes to the tables.

#### Industrial classification

Establishments were classified to industries on the basis of major activity in conformity with the third edition of the Standard Industrial Classification (Revised 1968). Normally an establishment was classified to an industry if its sales of the principal products of that industry accounted for a greater proportion of its total sales than in its sales of the principal products of any other industry. Classification of an 'establishment in this census was based on the establishment's return to the Census of Production, 1968.

Establishments added to the register subsequent to the 1968 census were classified on the basis of the description of the business given by the respondent.

#### Coverage

Detailed census returns were generally sought only from establishments employing on average 25 or more persons, but in industries where firms employing less than 25 persons account for a relatively high proportion of total employment and output the exemption limit was lowered to 11. Census returns were also sent to establishments whose employment was not known to the Business Statistics Office at the time of despatch; if their employment was below the exemption limit for their industry establishments were asked to supply figures only of total employment and total sales.

#### TERMS USED IN THE CENSUS REPORT

#### Average number employed

Establishments were required to state the number of persons on the payroll (i.e. whose national insurance cards were held by them) on the average during the year of return, whether full time or part time employees. Separate figures were required for (a) administrative, technical and clerical employees and (b) all other employees (operatives). Averages could be calculated from figures relating to the last week of each calendar month. Establishments were also required to state the number of working proprietors where appropriate and these are included in total employment figures. Outworkers (i.e. persons employed by establishments who worked in their own homes etc. on materials supplied by the establishments) are excluded.

The figures include persons engaged on merchanting or factoring and canteen workers where particulars in respect of these activities could not be excluded from the return.

#### Working Proprietors

These include all persons regarded as "self employed" for national insurance purposes and members of their families who worked in the business without receiving a fixed wage or salary; but such persons who worked less than half the normal number of working hours are excluded. Directors working in the business but not in receipt of a definite wage, salary or commission are included under this heading: directors paid by fee only are not included.

#### Employees

Administrative, technical and clerical employees include managing and other directors in receipt of a definite wage, salary or commission, managers, superintendents and works foremen; research, experimental development, technical and design employees (other than operatives); draughtsmen and

THE REAL CONSTRUCTION OF THE REAL OF

tracers; editorial staff, staff reporters, canvassers, competition and advertising staff; travellers; and office (including works office) employees.

Operatives include all other classes of employees, that is, broadly speaking, all manual wage earners. They include those employed in and about the factory or works; operatives employed in power houses, transport work (including roundsmen), stores, warehouses, shops and canteens; inspectors, viewers and similar workers; maintenance workers, and cleaners. Operators engaged in outside work of erecting, fitting etc. are also included, but outworkers are excluded.

#### Capital expenditure

#### (a) New building work

This represents the cost incurred during the year of new building and other constructional work (including office buildings, canteens and the like used in connection with the business covered by the return, but not dwelling houses for employees). The value is that charged to capital account during the year of return; it includes expenditure on new buildings or on the extension or reconstruction of old buildings, the value of works of a capital nature carried out by the establishment's own staff and the cost of any newly constructed buildings purchased. Figures shown include any legal charges, stamp duties, agents' commissions, etc.

#### (b) Land and existing buildings

The items shown are the capital cost of freeholds purchased and the capital cost of premium payable for leaseholds acquired (excluding the value of any assets acquired in taking over an existing business), and the amounts receivable for any freeholds or leaseholds disposed of. The value is that charged to capital account during the year of return.

#### (c) Plant, machinery and vehicles

The items shown are the value of plant and machinery and of vehicles acquired, both new and second-hand, and the amount received for items disposed of during year. The value of plant and machinery acquired includes plant, etc., which firms produced for their own use in connection with the business covered by the return. The value of plant, etc., acquired is the expenditure charged to capital account during the year of return less any discounts received, but including the cost of transport and installation. No deduction is made for depreciation, amortization or obsolescence. The proceeds of items disposed of during the year exclude amounts written off for items scrapped.

Capital expenditure during the year in respect of manufacturing establishments where production had not started before the end of the year is excluded from the figures for both 1963 and 1968 but is included in the figures for 1970.

#### Enterprise

The term enterprise is used in this report to mean one or more establishments under common ownership or control. An enterprise normally consists of a single establishment, more than one establishment owned by the same firm, or a number of establishments owned by a parent company and its subsidiary companies. Information about the relationship between constituent companies of enterprises was obtained mainly from published sources such as the Stock Exchange Year Book supplemented by information from company reports and information supplied by establishments. The information available is not complete but covers the largest and most important groups of industrial establishments and is believed sufficient to provide a worthwhile basis for analysis.

#### Establishment

The definition of the establishment differed between the Censuses for 1963, 1968 and 1970. The definitions used were as follows:— 1963: the establishment was normally the premises under the

- same ownership or management at a particular address.
- 1968: the establishment was defined, in accordance with Standard Industrial Classification (Revised 1968), as being the smallest unit which could provide the information normally required for an economic census, for example, employment, expenses, turnover and capital formation. Sometimes activities which are conducted as a single business are carried on at a number of addresses. In 1968 where the activities of such a business were closely integrated and the addresses, termed local units, were in close proximity the establishment was defined to cover the combined activities and a single return was accepted. When the activities were closely integrated but the addresses were not in close proximity a combined return was accepted but the individual addresses were treated-in the count of establishments in an industry, for instance-as separate establishments.

1970: the practice of treating as multi-unit establishments those businesses with closely integrated activities at a number of addresses in close proximity was extended to all those businesses where the local units were at more than one geographical location and detailed census information was not available for each unit. Separate figures were obtained, however, of employment and capital expenditure at each unit. The effect of this change is to reduce somewhat the number of establishments as compared with 1968.

#### Gross output

Gross output measures the total value of production (including work done) by establishments during the year. It is calculated as follows:—

#### Value of sales and work done

Plus/Less: Increase/decrease in value of stocks of goods on hand for sale

Plus/Less: Increase/decrease in value of work in progress = Gross output.

#### Net output

Net output represents the value added to materials by the process of production (including the margin on selling any merchanted or factored goods). It is calculated as follows:— Gross output

Less: Purchases adjusted for change in value of stocks of fuel and raw materials

Less: Payments for work given to other establishments

Less: Payments for transport Less: Net amount of any duties, subsidies, allowances and levies

payable

= Net output.

#### Net output per person employed

The figures of net output per person employed are derived by dividing the net output by the average number of persons employed (full time and part time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

#### Purchases

Purchases include the cost of materials and components bought for use in production; of fuel and electricity for all purposes; of packaging materials including the cost of returnable cases and containers when first purchased; of workshop materials, office materials and materials for repairs to establishment's own buildings, plants and vehicles when carried out by their own work people included in the returns; of consumable tools; and of parts for machinery purchased during the year as replacements. Water charges are also included. In general, purchases of goods for merchanting or factoring and canteen supplies are included. Materials supplied by customers for processing are excluded, as are all purchases charged to capital account.

The values shown include any duty paid (less rebate, etc.) but exclude trade discounts allowed. The cost of transport is included only if included in the cost of materials as invoiced; amounts paid to transport organisations, including an establishment's own separate transport organisations for delivery of materials and fuel are, therefore, excluded. Materials purchased overseas are included at the c.i.f. cost plus any duty payable if the cost of transport from the docks was not included in the invoiced price, but at their full delivery cost if invoiced "carriage paid home". Materials and fuel transferred from another department of the establishment not covered by the same return are included at the estimated selling value recorded by the other department.

#### Sales

Sales are in respect of goods made by the business covered by the return, goods made for it by outworkers or by other establishments from materials given out to them (sometimes described as goods made on commission) and waste products. Any machinery or other capital items produced for use in the business covered by the return are included, the value being that adopted in the establishment's asset accounts. Goods sold without being subjected to any manufacturing process (i.e. merchanted or factored) and canteen takings are included.

The value shown for sales is the net selling value, defined as the amount charged to customers whether on an ex-works or delivered basis excluding any trade discounts, agents' commissions, allowances for returnable cases, purchase tax, etc.; the net amount charged for packaging materials is included. Goods charged on a delivered basis to customers overseas are included at the f.o.b. value. Goods produced in one establishment and transferred to another establishment of the same firm not covered by the return were treated as sales by the producing establishment and valued as far as possible as if they had been sold to an independent purchaser. Goods transferred to wholesale or retail selling organisations for which separate accounts were kept were valued on the same basis.

To the extent that sales of finished products of one establishment constitute the materials purchased by another, total figures of the value of sales (and of materials and fuel purchased) include an element of duplication. In some industries, e.g. motor vehicle manufacturing, and woollen and worsted, this duplication is substantial; and aggregates of the figures for a number of industries contain significantly greater amounts of duplication. For work done on commission, sub-contract work, etc., the value shown is the total amount charged for the work, including the value of any materials bought and used in such work.

#### Services rendered

This represents the amounts charged for hiring out plant, machinery and other goods, providing transport, or for any technical or other services rendered to other organisations. It includes amounts credited for similar services rendered to other establishments of the same enterprise not covered by the return.

#### Standard Industrial Classification

Industry classification is based on the Standard Industrial Classification (Revised 1968). It is published by H M Stationery Office together with a separate index in the form of an alphabetical list of industries.

#### Stocks and work in progress

Values are given of stocks of goods on hand for sale, and of materials and fuel, at the end of the year of return, including any stocks of goods held for merchanting or factoring. Values of the change during the year are also shown. The values include duty in the case of dutiable goods held out of bond.

The value of work in progress at the end of, and the change during, the year are also usually shown. This excludes any progress payments made to sub-contractors, and no deduction is made on account of progress payments received.

#### Transport payments

These represent the total amount paid or credited during the year for both outwards transport of finished goods sold and inwards transport of materials and fuel purchased. They include payment to other establishments, and to any separate transport organisation of the same establishment not covered by the return, but exclude the value of transport services provided by the business covered by the return. The items included are payments for hired cartage and for inwards and outwards carriage by all forms of inland transport, i.e. railways, road haulage, canals, coastwise shipping, air, etc. Payments made for sea and air freight on goods sold to customers overseas and on materials and fuel purchased from overseas suppliers are excluded.

#### Wages and salaries

These are amounts paid during the year to operatives and to administrative, technical and clerical employees. Payments to working proprietors, whether called salaries or not, are excluded. The values shown include all overtime payments, bonuses and commissions, whether paid regularly or not, and no deduction is made for income tax, insurances, contributory pensions, etc. The value of any payments in kind, travelling expenses, lodging allowances, etc. and employers' contributions to national insurances and pension schemes is excluded.

#### Work given out

The figures shown represent the total amount paid for work done by other establishments (whether part of the same enterprise or not) on materials supplied to them. They do not include payments to individual outworkers or payments for business and other services.

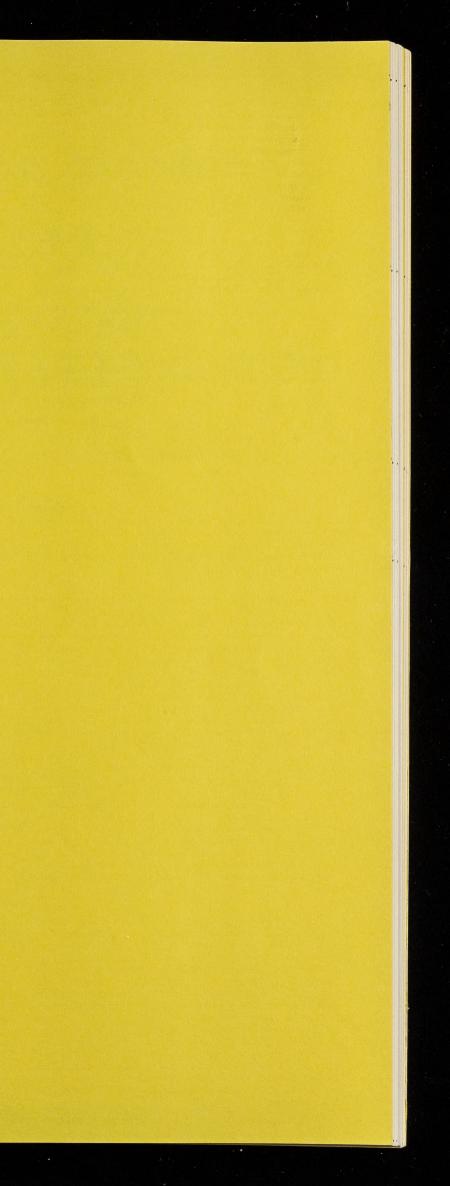

#### SYMBOLS USED

The following symbols are used throughout the report:

- not available,
- nil or negligible (less than half the last significant figure)
  figures cannot be shown owing to risk of disclosing information about individual enterprises.

#### ROUNDING OF FIGURES

Figures in the tables have, where necessary, been rounded to the nearest final digit; there may, therefore, be apparent slight discrepancies between the sums of the constituent items and the totals shown.
