Report on the Census of Production

Bread and flour confectionery

A publication of the Government Statistical Service

Special Note for Purchasers

Commencing with the 1971 Census, the Census of Production reports are being numbered in a uniform series embracing all industrial inquiries in the Business Monitor series. These Business Monitors have a code P (for production) followed first by A (indicating that it is an annual series) or Q (quarterly) or M (monthly): and then by a number indicating the minimum list heading, or sub-division of a minimum list heading, of the Standard Industrial Classification (revised 1968).

The Census of Production (PA) reports are available on standing order (details on application to Her Majesty's Stationery Office, P.O. Box 569, London SE1 9NH. Telephone 01-928 6977), although they are not included in the global subscription arrangements for the Business Monitor series.

Government Statistical Service A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

Including estimates for establishments not making satisfactory returns, non-response and establishments with fewer than 20 persons. Satisfactory returns accounted for 81 per cent of employment within the industry. (a)

Details of manufacturers' quarterly sales of principal products are published regularly in Business Monitor PQ212. (b)

(c) Introduced during 1974.

×

Average number employed, including full and part-time employees (see table 7) and working proprietors. (d)

For 1973-1975 rents of industrial and commercial buildings were not recorded separately, but included in hire of vehicles, plant and (e) machinery.

Including estimates for establishments not making satisfactory returns, non-response and establishments with fewer than 20 persons. (a)

Average number employed, including full and part-time employees (see table 7) and working proprietors. (b)

New building work plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery. (c)

Where a census return covered addresses in two or more regions, an estimate of the net output attributable to each address was made by assuming that net output was proportionate to employment. An estimate for each region was obtained by aggregating estimates of net output for addresses located in that region. Gross value added at factor cost is treated similarly. (d)

	r boar zernen so úternen o ne en creacientementen. Resistant de omeit úslemmedder en el armit far soo	
	nated for the industry at £40,573 throusand.

Including estimates for establishments not making satisfactory returns, non-response and establishments employing fewer than 20 (a)persons.

PA212

nese notes give the main information needed for interpreting e figures in the industry Business Monitors: more detailed ormation about the census is given in a separate Business Monitor - PA 1001 (Introductory Notes) of the Report on the ensus of Production, 1977.

ENERAL INFORMATION

anges made for 1977

e Census for 1977 is in line with similar inquiries being nducted in other member countries of the European Economic nmunities. There was a small number of changes in the scope the industry reports compared with 1976.

r the first time in the industry monitors a table has been luded on operating ratios, calculated from census measures of tput, investment, manpower and labour costs.

ecific changes are explained in the introductions to the industry ports or by footnotes to the tables.

on of information relating to individual undertakings tion 9(5)(b) of the Statistics of Trade Act 1947 states he following provisions shall have effect with respect to any port, summary or other communication to the public of ormation obtained under the foregoing provisions of this Act in compiling any such report, summary or communication the competent authority shall so arrange it as to prevent any particulars published therein from being identified as being particulars relating to any individual person or undertaking except with the previous consent in writing of that person or the person carrying on that undertaking, as the case may be; but this provision shall not prevent the disclosure of the total quantity or value of any articles produced, sold or delivered; so nowever, that before disclosing any such total the competent authority shall have regard to any representations made to hem by any person who alleges that the disclosure thereof would enable particulars relating to him or to an undertaking carried on by him to be deduced from the total disclosed" figure involved disclosure the contributor concerned was etimes asked to give permission for its publication. In the prity of cases permission was given. When it was refused and ere contributors were not approached the figure has been pressed, either by combining it with other figures, or as in the ional tables, by omitting the figure altogether.

mbols used

e following symbols are used throughout the PA series of iness Monitors:

not available

il or less than half the final digit shown igures cannot be shown owing to the risk of disclosing nformation about individual enterprises. evised

Inding of figures

ures in the tables have, where necessary, been rounded to the rest final digit. Where figures have been so rounded, the sum he constituent items may not always agree exactly with the tal shown.

strial classification

United Kingdom Standard Industrial Classification (SIC) was issued in 1948 and was subsequently revised in 1958 and 38. It exists to promote uniformity and comparability in the cial statistics of the United Kingdom. The general principles wed are those of the International Standard Industrial fication of all Economic Activities of the United Nations stical Office but the United Kingdom SIC reflects the nisation and structure of industry and trade as it exists in the ed Kingdom. The SIC is a classification by activity and is commodity classification. However, an index of all commodity adings for which sales data are provided in the Quarterly Business itors, is published in Business Monitor PO 1000

atistical units

estatistical unit for the purpose of the Census is the establishment h is defined in the SIC as the smallest unit which can provide information normally required for an economic census, for

ted for Her Materity's Stationery Office by Sec (iii) a Stat. Lan. Alternation, United at the states

example, employment, expenses, turnover, capital formation. Usually the principal activities carried on in an establishment fall within a single heading of the classification (eg steel making or sugar refining). Typically the establishment embraces all the activities carried on at a single address eg a mine or a factory, including those which are ancillary to the principal activities. Frequently distinct activities characteristic of different industries are carried on at one address, but normally these are not classified separately and the whole establishment is classified according to the main activity. If, however, the required range of data can be provided for each activity, each is taken to constitute a separate establishment. Sometimes activities which are conducted as a single business are carried on at a number of addresses. Where this is so, businesses are asked to provide the full range of separate information in respect of each address, whether or not the activities are different. Their activities may, however, be integrated to such an extent that they constitute a single establishment. In the latter case the establishment is defined to cover the combined activities at these addresses (termed local units). Separate figures are obtained of employment and net capital expenditure at each unit in order to compile regional tables. Efforts are made by the Business Statistics Office (BSO) to ensure, by negotiating with respondents, that the return from an establishment does not cover local units or addresses in more than one of the countries of the United Kingdom.

Further information about the statistical unit appeared in an article "The statistical unit in business inquiries" in Statistical News

No 13 May 1971.

THE REGISTER

Establishments are asked to exclude from their returns particulars relating to any department not engaged in production eg merchanting, transport, warehousing, for which they keep a separate set of accounts. Transfers of goods produced to such departments are treated as sales and respondents are asked to value them as far as possible as if sold to an independent purchaser. Where separate accounts are not kept they are asked to include details of all these activities in their return.

Particulars relating to head offices mainly engaged in the administration of the production units within the scope of the census were included. Where more than one return was made the information in respect of the head office was apportioned among them.

For certain purposes in the annual censuses of production (especially the enterprise analyses of Business Monitor PA 1002) related establishments are combined. For these purposes an enterprise group may be defined as a business consisting of either a single establishment or two or more establishments under common ownership or control. Bringing together establishments into enterprise groups is also necessary for the purpose of ensuring that there will be no disclosure of the activities of any one enterprise group. Information about the relationship of establishments, the changing structure of groups of companies and about common ownership links is obtained from many sources, including the Stock Exchange Year Book, company reports, press reports and information supplied by individual establishments.

The register permits a questionnaire to be sent direct to the reporting establishment on which the latter can include information relating to all the manufacturing (or local) units which it comprises. The inquiries provide a major source of information for keeping the register continuously up-to-date and act as a check on its detail and structure. For the establishments on the register making returns to the quarterly inquiries, the industrial classification is derived from an analysis of their sales of commodities and is reviewed annually. Employment data are entered on the register from returns to the annual census of production. In cases where an establishment does not make a return to these inquiries the employment data are based on information provided by the Department of Employment from the annual censuses of employment. New additions to the register are obtained from various sources including Companies Registration Office and the Department of Employment. The 1973 Finance Act allows HM Customs and Excise to pass to the BSO lists of businesses registered for VAT. Information from all these sources is used to improve the register, and where necessary. details are sought directly from new businesses. Units which cease to trade are removed from the live register.

Increasing use of the information obtained from the Department of Employment, HM Customs and Excise and BSO inquiries has led to improvements on the register, which in turn enabled the BSO to produce better estimates, particularly of numbers of smaller establishments and enterprises

A return was required in the 1977 Census from each establishment with 20 or more employees. Each establishment is classified to an industry, as defined in the SIC, whose principal products form the major part of the establishment's sales.

Regions

The regions defined in Table 5 take account of the boundary changes arising out of the Local Government Act 1972 and the Local Government Act (Scotland) 1973. These changes came into effect in April 1974 in England and Wales and May 1975 in Scotland.

TERMS USED IN THE CENSUS REPORT

Average number employed

Establishments were required to state the number of persons on the payroll on average during the year of return, whether full-time or part-time employees. Separate figures were required for: (a) administrative, technical and clerical employees

(b) all other employees (operatives)

Averages could be calculated from the figures relating to the last week of each calendar month. Establishments were also required to state the number of working proprietors where appropriate and these are included in total employment figures. Outworkers (ie persons employed by establishments who worked in their own homes etc on materials supplied by the establishment) are excluded. The figures include persons engaged on merchanting or factoring and canteen workers where particulars in respect of these activities could not be excluded from the return.

Working proprietors

These include all persons regarded as "self-employed" for national insurance purposes and members of their families who worked in the business without receiving a wage or salary; but such persons who worked less than half the normal number of working hours are excluded. Directors working in the business but not in receipt of a definite wage, salary or commission are included under this heading: directors paid by fee only are not included.

Employees

Administrative, technical and clerical employees include directors in receipt of a definite wage, salary or commission, managers and works foremen; research and design employees (other than operatives); draughtsmen, editorial staff, advertising staff, travellers and all office employees.

Operatives include all other classes of employees, that is, broadly speaking, all manual wage earners. They include operatives employed in power stations, transport (including roundsmen), warehouses, stores, shops and canteens, inspectors, maintenance workers and cleaners. Operatives engaged in outside work of erecting, fitting etc are also included, but outworkers are excluded.

Capital expenditure

Capital expenditure during the year in respect of manufacturing units where production had not started before the end of the year is included. Establishments were asked not to deduct from the value of capital expenditure amounts received or expected to be received in grants or allowances from the Government or any statutory body or local authority. Establishments with 100 or more employees were asked to include a total net capital expenditure figure for each calendar year.

(a) New building work

This represents the cost incurred during the year of new building and other constructional work to be used in connection with the business covered by the return. The value is that charged to capital account during the year of return; it includes expenditure on new buildings and on the extension or reconstruction of old buildings, the value of works of a capital nature carried out by the establishment's own staff and the cost of any newly constructed buildings purchased. Figures shown include legal charges, stamp duties, agents' commissions, etc.

(b) Land and existing buildings

The items shown are the capital cost of freeholds purchased and the capital cost or premium payable for leaseholds acquired (excluding the value of assets acquired in taking over an existing business), and the amounts receivable for freeholds or leaseholds disposed of. The value is that charged to capital account during the year of return.

(c) Plant, machinery and vehicles

The items shown are the value of plant and machinery and r vehicles acquired, both new and second-hand, and the amount received for items disposed of during the year. The value of plant and machinery acquired includes plant, etc which firms produce for their own use in connection with the business covered by the return. The value of plant, etc acquired is the expenditure charge to capital account during the year of return less any discount received, but including the cost of transport and installation Deductible value added tax is excluded but non-deductible value added tax on motor cars acquired is included. No deduction made for depreciation, amortization or obsolescence. The proceed of items disposed of during the year exclude amounts written-o for items scrapped.

Cost of industrial services

This includes amounts payable to other firms for work done of materials supplied by the establishment, payments for repairs and maintenance (including those in respect of rented buildin and amounts paid to other firms for contracts which have been sublet. Payments to outworkers are excluded.

Cost of non-industrial services

This includes rents of industrial and commercial buildings, hire of plant, machinery and vehicles (excluding vehicles hired with drivers), commercial insurance premiums, bank charges and amount paid for professional services, post office services, transport (with the United Kingdom), advertising etc. Amounts payable on royalti for the right to use patents, trademarks, copyrights etc, ma ufacturing and quarrying rights and technical "know-how" a also included.

Gross output

In the calculation of gross output the value of total sales and work done is increased by the rise (or reduced by the fall) during t year in the value of work in progress and goods on hand sale.

Net output

Net output, a customary census measure, is calculated by deducting from gross output the cost of purchases (reduced by the rise, increased by the fall, during the year of stocks of materials etc and the cost of industrial services received, and where applicable, duties etc.

Net output per head

The figures of net output per head are derived by dividing the net output by the average number of persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

Gross value added at factor cost

Gross value added at factor cost is calculated by deducting fro net output the cost of non-industrial services eg rent of building hire of plant, machinery and vehicles (excluding vehicles him with drivers), commercial insurance premiums, bank charges and amounts paid for professional services, post office services, transpo (within the United Kingdom) and advertising, rates (excludi water rates) and the cost of licensing motor vehicles. This estimate of gross value added approaches more closely than census n output to the definition of net output or value added in national accounts statistics.

Gross value added at factor cost per head

The figures of gross value added at factor cost per head are derive by dividing the gross value added by the average number persons employed (full and part-time) on all activities cover by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

Purchases

Purchases include the cost of raw materials, components, sem manufactured goods and workshop materials; of replacement parts and consumable tools not charged to capital account; of packagi materials of all types; of stationery and printed matter; of electricity and water; of materials to be used by the establishing or given out to other establishments for the production of machi or other capital items for the establishment's own use; of materia for use by the establishment when working on goods supplied

tomers; and of food, etc for any canteen covered by the tablishment's return. Transfers of goods to the establishment m another department of the same firm not covered by the tablishment's return are included at a cost corresponding to the mated selling value recorded by the other department. Amounts rable to transport firms or credited to the firm's own transport artment for delivery of materials are excluded, as are all hases of machinery and plant charged to capital account. chases of goods for merchanting or factoring have been ected separately since 1973. The values shown exclude VAT. include, in addition to the actual purchase price, the value packaging material charged to the establishment. The value of ed goods or packaging material returned to suppliers and any le discounts are excluded. Materials purchased duty-paid are uded at their duty-paid value, less any drawback, rebate, etc. cost of transport is included only if it is included with the hase price in the firm's accounts. Imported goods are included eir full delivered cost. If in the firm's accounts the transport docks or airport is not included in the cost of goods purchased. cost is entered at cif plus duty (if applicable). Leasing, ing and hire purchase charges are excluded.

les of goods produced

les for the purposes of the annual censuses means deliveries on goods made by establishments in the United Kingdom ared by the inquiry. Sales of goods made for these establishments outworkers or by other establishments from materials given out hem and sales of waste products are included. New building ork and machinery or other capital items produced by establishts for hiring out or leasing are regarded as sales, the value luded in the return being that adopted in the establishments' tal asset accounts. Forward sales and canteen takings are excluded. sales in the period of the inquiry are included irrespective of en the goods were manufactured. Goods produced in one ablishment and transferred either to ancillary departments not aged in production for which there are separate accounts, or to er establishment of the same firm not covered by the return, treated as sales by the producing establishment and valued as as possible as if they had been sold to an independent purchaser ds transferred to wholesale or retail selling organisations, for ch separate accounts are kept are valued on the same basis.

value shown for sales in the "net selling value" defined as the int (excluding VAT) charged to customers whether on an orks or delivered basis, after any trade discounts and agents' ons have been deducted. The cost of packing materials allowance for returnable cases is included. In industries where ducts attract Excise Duty the value stated is usually inclusive duty if sold duty-paid and exclusive of duty if sold in bond exported.

eipts for work done and industrial services rendered

igures for work done represent the amount charged for work ed out on materials supplied by a customer and include repair ork. Within certain industries this heading covers a wide variety of tivities, for example, within the food sector - butter packed on nission; within the textile industries - making up of garments, dressing and textile finishing; within printing and publishing paratory work on type-setting, block making and binding. Work ne is also significant in the electrical machinery and heavy eering industries, covering erection, installation and repair and ing work. Other activities within this heading include exploration ork, research and development, glass cutting and dressing and ing of timber.

dustrial services rendered include repairs and maintenance, instaation work, and technical research and studies for other anisations.

apital goods produced for establishments' own use

is includes all work of a capital nature carried out during the ear by the establishments' own staff for their own use.

n-industrial services rendered

his includes rents received for commercial and industrial buildings, ounts charged for hiring out plant, machinery and vehicles and her goods and amounts charged to other organisations for the vision of transport. It also includes amounts received for the to use patents, trademarks, copyrights etc, manufacturing d quarrying rights and technical "know-how" and revenue from ch staff facilities as canteens.

oods merchanted or factored

hanted goods are those (excluding canteen sales) sold without

(v)

(iv)

Stocks and work in progress Values are given of stocks of goods on hand for sale and of

materials, stores and fuel, at the end of the year of return and of the change during the year, including any stocks of goods held for merchanting or factoring. Work in progress is defined as materials which have been partially processed by the establishment but which are not usually sold or transferred to another establishment without further processing. The values include the cost of materials consumed and labour used, together with a margin of overhead costs and profits. Progress payments made to sub-contractors are excluded and progress payments received from other organisations are not deducted.

Wages and salaries These are amounts paid during the year to operatives and to administrative, technical and clerical employees. Payments to working proprietors, whether called salaries or not, are excluded. The values shown include all overtime payments, bonuses, commissions and holiday pay, whether paid regularly or not, and no deduction is made for income tax, insurances, contributory pensions etc. The value of redundancy payments less any amounts reimbursed from Government sources is included. The value of any payments in kind, travelling expenses etc is excluded.

Remuneration paid to outworkers

Employers' insurance and welfare contributions This item includes employers' contributions to national insurance (and/or earnings related basic contributions under the Social Security Pensions Act. 1975) and commercial insurance premiums to provide pensions, superannuation or other retirement benefits. sickness benefits, personal accident benefits, disability or death benefits for employees or former employees or their dependants. Contributions to the running costs of canteens, social centres, children's and holiday homes, etc for employees, former employees and their dependants are also included.

Operating ratios The operating ratios shown were obtained by dividing the estimate of the industry total for the quantity shown in the numerator by the corresponding estimate for the quantity shown in the denominator. These estimates cover all establishments classified to the industry, including exempted establishments and nonrespondents. Within an industry, it is possible to compare ratios for an individual firm with the ratios shown for the relevant industry. However, it is important to bear in mind that various factors may affect the results - for example, differences in definitions, treatment of depreciation (which is not identified in the census data) and varying practise with regard to stock valuation, may affect comparability in some respects.

having been subjected to any manufacturing process by the seller.

The remuneration paid to outworkers (ie persons employed by the establishment who do their work in their own homes) is generally on a piece-work basis. Only amounts paid to outworkers whose names appear on the establishment's payroll are included. Amounts paid to outworkers by sub-contractors are excluded.
