SH3 DATA FOR 1984

1 These national and regional summaries are based on SH3 returns and amendments received from health authorities up to 31 August 1985. The format of these data is the same as last year. A Statistical Bulletin covering national statistics for the period 1974-84 (ISBN 0946539 78 2, Price £1.00) can be obtained from Department of Health and Social Security, Information Division, Canons Park, Government Buildings, Honeypot Lane, Stanmore HA7 1AY.

2 Information on private resident and non-resident patients (Sections 65 and 66 of the National Health Service Act 1977) for 1984 will be available shortly. Any request should be made to Statistics and Research 2A (Fylde), Room 7124, North Fylde Central Office, Norcross, Blackpool, FY5 3TA.

3 Users are reminded that data relating to other specialist units became separately identifiable following computerisation in 1979. Prior to this the data of some of these units were clerically transferred to recognised main specialties to maintain consistency over all regions. (Details are given in the foreword to the 1979 summary). The main specialties affected are general medicine, paediatrics, neurology, geriatrics, general surgery, mental illness and dental surgery. Users should bear this in mind when examining trends in these main specialties.

STATISTICS AND RESEARCH 2

November 1985
