# **Report on the Censuses of Production** 1974 & 75

## **Electronic computers**

Presented by the Secretary of State for Industry to Parliament in pursuance of the Statistics of Trade Act 1947 (10 & 11 Geo.6 Cha.39 sec 7)

### Special Note for Purchasers

Commencing with the 1971 Census, the Census of Production reports are being numbered in a uniform series embracing all industrial inquiries in the Business Monitor series. These Business Monitors have a code P (for production) followed first by A (indicating that it is an annual series) or Q (quarterly) or M (monthly): and then by a number indicating the minimum list heading, or sub-division of a minimum list heading, of the Standard Industrial Classification (revised 1968).

The Census of Production (PA) reports are available on standing order (details on application to Her Majesty's Stationery Office, P.O. Box 569, London SE1 9NH. Telephone 01-928 6977), although they are not included in the global subscription arrangements for the Business Monitor series.

### **Government Statistical Service**

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics division of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned.

## PA366 ELECTRONIC COMPUTERS

The information in this report relates to establishments classified to the Electronic computers industry, minimum list heading 366 in the Standard Industrial Classification (revised 1968). The activities of the industry include:-

Manufacturing digital, analogue and hybrid electonic computers and related equipment, including peripheral equipment for computing systems and data transmission equipment. Tele-communication links and computers and peripheral equipment not separable from industrial control systems are excluded.

> In interpreting the data in the tables it is essential to bear in mind the notes and definitions which commence on page (iii).

(a) For 1975, estimates for establishments employing less than 20 persons accounted for 3 per cent of the total employment of the industry. Estimates for unsatisfactory returns and non-response accounted for 8 per cent. For 1974, the comparable figures were 3 per cent and 9 per cent respectively.

(b) The figures for 1971-1972 do not include receipts for repairs and maintenance.

(c) Not recorded separately for 1971-1972.

(d) The figures for 1971-1972 do not include revenue from rents for industrial buildings.

(e) The figures for 1971-1972 exclude the amounts payable for repairs and maintenance.

(f) Average number employed (full and part-time; see table 7) during the year (including working proprietors) by the establishment.

Not collected for 1971-1972 except for amounts payable to other organisations for transport of goods within the United Kingdom. (g)

(h) For 1973, the figures include hire of vehicles.

(j) Not collected for 1971-1972.

### Capital expenditure, 1971-1975

(a) Including estimates for establishments not making satisfactory returns, non-response, and establishments exempted by virtue of size. (b) Capital expenditure in respect of manufacturing establishments where production had not commenced before the end of the

year, is included.

(c) Not recorded separately for 1971, 1972 and 1975.

(d) New building work plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery.

(a) Including estimates for establishments not making satisfactory returns, non-response, and establishments employing less than 20 persons.

(b) Average number employed (full and part-time; see table 7) during the year (including working proprietors) by the establishment.

(c) Some enterprises control establishments in more than one size group: the sum of the figures for the size groups therefore exceeds the total for the industry.

(d) Administrative, technical and clerical employees.

(e) Another important component of labour costs, employers' national insurance contributions, graduated pensions, contributions to other pensions and welfare schemes and the running costs of canteens, is estimated for the industry at £11,492 thousand. For 1974 the comparable figure was £7,894 thousand. In addition the remuneration of outworkers on returns received was £12 thousand in 1974 and £6 thousand in 1975.

| Inited Kingdom                 | 27.4      | 100.0                            | 11,747        | 100.0                            | 292,131(e)              |  |            |  |  |

Average number employed (full and part-time; see table 7) during the year (including working proprietors). (a)

(b) Including estimates for establishments not making satisfactory returns, non-response, and establishments employing less than 20 persons.

New building work plus acquisitions less disposals of land and existing buildings, vehicles and plant and machinery. (c)

Where a census return covered addresses in two or more regions an estimate was made of the net output attributable to the region only where more than 80 per cent of the establishment's employees were located in the region. The estimate was made by assuming that net output at each address covered by a return was proportional to employment at the address. The establishment's residual net output was included in unallocated net output. (d)

(e) Includes £210,601 thousand of unallocated net output of establishments covering addresses in two or more regions, plus estimates for unsatisfactory returns, non-response, and establishments employing less than 20 persons.

Sales of principal products of the industry by establishments employing 25 or more persons, including sales by establishments classified to other industries, 1974-1975

Manufacturers' sales of the principal products of the Electronic computers industry are published regularly in Business Monitor PQ366. Details of sales for 1974 will be found in the monitor for third quarter 1976 published January 1977 and for 1975 in the third quarter 1977 issue published January 1978.

Quarterly Business Monitors are available from HMSO by annual subscription.

### TABLE 9

Purchases by establishments employing 100 or more persons, classified to the industry, 1974 Analysis of returns received, United Kingdom

Materials for use in production

Steel in all forms (except finished parts, wire and scrap) e.g. bars, rods, angles, shape beams, joists and pillars rolled (not fabricated), tube rounds and squares, plates, she and strip, etc.

Light metals and non-ferrous metals in all forms except finished goods, wire and scr Aluminium and aluminium alloys

Other light metals and non-ferrous metals and their alloys e.g. copper, cadmium brass, lead, solder, zinc, etc.

Insulated wires, cables, strips and strands

Products wholly or mainly of plastics

Components and accessories purchased for incorporation in goods of the firms' own Electrical machinery e.g. motors, control gear, switchgear, generators, transform rectifying apparatus, etc.; measuring instruments, gauges and control instrument ammeters, voltmeters, thermostats, etc.

Electronic components e.g. loudspeakers, microphones, capacitors, resistors, mic silicon transistors, semi-conductor devices, valves electronic, electronic stabilising cathode ray tubes, etc.

Ball and roller bearings and parts thereof

Bolts, nuts, screws, rivets, etc.

### Stationery

Packaging materials (including materials for the manufacture of the firms' own packaging

Fuel and electricity

Fuel oil

Gas

Electricity All other fuels

Replacement parts and consumable tools

Tyres and other spare parts for the firms' own road vehicles

Replacement parts for the firms' own machinery, plant and equipment Consumable tools (including gauges)

Other purchases

TOTAL VALUE OF PURCHASES (other than for merchanting or factoring)

### Notes

These notes give the main information needed for interpreting the figures in the industry Business Monitors: more detailed information about the censuses is given in a separate Business Monitor-PA 1001 (Introductory Notes) of the Report on the Censuses of Production, 1974 and 1975.

### GENERAL INFORMATION

Changes made for 1974 and 1975 The Censuses for 1974 and 1975 are in line with similar inquiries being conducted in other member countries of the European Economic Communities. From 1974, the Census has been extended to include the construction industry. For 1974, establishments with 300 or more employees were asked to provide additional information relating to industrial and nonndustrial services. These include amounts paid :

to other organisations for repairs and maintenance to buildings (including those in respect of rented buildings), road goods vehicles, plant, machinery and other capital equipment

for postage, telephones, telegrams, cables and telex to other organisations for transport by road, rail or other means (excluding postal services)

In a separate inquiry for 1974, larger firms in each industry were also asked to provide a breakdown of the figure of total purchases (other than purchases of goods for merchanting or factoring). See paragraph on "Purchases".

Suppression of information relating to individual undertakings. The Statistics of Trade Act 1947 provides that-"No individual estimates or returns, and no information relating to an individual undertaking, obtained under the foregoing provisions of this Act, shall, without the previous consent in writing of the person carrying on the undertaking which is the subject of the estimates, returns or information, be disclosed except-

(a) in accordance with directions given by the Minister in charge of the government department in possession of the estimates, returns or information to a government department or to the Import Duties Advisory Committee for the purposes of the exercise by that department or committee of any of their functions; or

(b) for the purposes of any proceedings for an offence under this Act or any report of these proceedings."

If a figure involved disclosure the contributor concerned was sometimes asked to give permission for its publication. In the majority of cases this permission was given but when it was refused and in cases where the contributors were not approached the figure has been suppressed, sometimes by combining it in some way with other figures, but sometimes-as in the regional tables by omitting the figure altogether.

### Symbols used

The following symbols are used throughout the PA series of **Business Monitors:** 

not available

nil or less than half the final digit shown figures cannot be shown owing to the risk of disclosing

- information about individual enterprises
- R revised

### Rounding of figures

Figures in the tables have, where necessary, been rounded to the nearest final digit. Where figures have been so rounded, the sum of the constituent items may not always agree exactly with the total shown.

### Industrial classification

The United Kingdom Standard Industrial Classification (SIC) was first issued in 1948 and was subsequently revised in 1958 and 1968. It exists to promote uniformity and comparability in the official statistics of the United Kingdom. The general principles followed are those of the International Standard Industrial Classification of all Economic Activities of the United Nations Statistical Office but the United Kingdom SIC reflects the organisation and structure of industry and trade as it exists in the United Kingdom. The SIC is a classification by activity and is not a commodity classification. However, an index of all commodity headings for which sales data are provided in the Quarterly Business Monitors, is published as PQ 1000 in the Business Monitor Series.

Statistical units News No. 13 May 1971. activities in their return. lishments. THE REGISTER which it comprises.

The statistical unit for the purpose of the Censuses is the establishment which is defined in the SIC as the smallest unit which can provide the information normally required for an economic census, for example, employment, expenses, turnover, capital formation. Usually the principal activities carried on in an establishment fall within a single heading of the classification (e.g. steel making or sugar refining). Typically the establishment embraces all the activities carried on at a single address e.g. a farm, a mine, or a factory, including those which are ancillary to the principal activities. Frequently, distinct activities characteristic of different industries are carried on at one address, but normally these are not classified separately and the whole establishment is classified according to the main activity. If, however, the required range of data can he provided for each activity, each is taken to constitute a separate establishment. Sometimes activities which are conducted as a single business are carried on at a number of addresses. Where this is so, businesses are asked to provide the full range of separate information in respect of each address. whether or not the activities are different. Their activities may, however, be integrated to such an extent that they constitute a single establishment. In that case the establishment is

defined to cover the combined activities at these addresses (termed local units). Separate figures are obtained, however, of employment and net capital expenditure at each unit. Efforts are made by the Business Statistics Office to ensure, by

negotiating with respondents, that the return from an establishment does not cover local units or addresses in more than one of the countries of the United Kingdom.

Further information about the statistical unit appeared in an article "The statistical unit in business inquiries" in Statistical

Establishments are asked to exclude from their returns particulars relating to any department not engaged in production e.g. merchanting, transport, warehousing, for which they keep a separate set of accounts. Transfers of goods produced to such departments are treated as sales and respondents are asked to value them as far as possible as if sold to an independent purchaser. Where separate accounts are not kept they are asked to include details of all these

Particulars relating to head offices, which were mainly engaged in the administration of the production units within the scope of the censuses were included. Where more than one return was made the information in respect of the head office was apportioned among them.

For certain purposes in the annual censuses of production (especially the enterprise analyses of Business Monitor PA 1002) related establishments are combined. For these purposes an enterprise group is defined as a business consisting of either a single establishment, or of two or more establishments under common ownership or control. The bringing together of establishments into enterprise groups is also necessary for the purpose of ensuring that there will be no disclosure of the activities of any one enterprise group. Information about the relationship of establishments, the changing structure of groups of companies and about common ownership links is obtained from many sources, including the Stock Exchange Year Book, company reports, press reports and information supplied by individual estab-

The register permits a questionnaire to be sent direct to the reporting establishment on which the latter can include information relating to all the manufacturing (or local) units

The inquiries provide a major source of information for keeping the register continuously up-to-date and act as a check on its detail and structure. For the establishments on the register which make returns to the quarterly inquiries, the industrial classification is derived from an analysis of their sales of commodities and is reviewed annually. Employment data is entered on the register from returns to the annual censuses of production. In cases where an establishment does not make a return to these inquiries the employment data is based on information provided by the Department of Employment from the annual censuses of employment.

Establishments with 20 or more employees are included in the censuses each year and the information they supply to the census is supplemented by the returns that those of them with 25 or more employees provide to the quarterly inquiries. Information about establishments with less than 20 employees in most industries is less securely based, but increasing use has been made of data on these small establishments supplied by the Department of Employment. One benefit of using this information is an improvement in the estimates of the number of smaller establishments and enterprises, but there is little effect on other aggregates (e.g. employment, output, net capital expenditure).

### Coverage

A return was required in the 1974 and 1975 Censuses from each establishment with 20 or more employees. Each establishment is classified to an industry, as defined in the SIC, whose principal products form the major part of the establishment's sales.

### Regions

The regions defined in Table 5 take account of the boundary changes arising out of the Local Government Act 1972 and the Local Government Act (Scotland) 1973. These changes came into effect in April 1974 in England and Wales and May 1975 in Scotland.

### TERMS USED IN THE CENSUS REPORT

### Average number employed Establishments were required to state the number of persons

on the payroll on average during the year of return, whether full-time or part-time employees. Separate figures were required for:

(a) administrative, technical and clerical employees

(b) all other employees (operatives)

Averages could be calculated from the figures relating to the last week of each calendar month. Establishments were also required to state the number of working proprietors where appropriate and these are included in total employment figures. Outworkers (i.e. persons employed by establishments who worked in their own homes etc. on materials supplied by the establishment) are excluded. The figures include persons engaged on merchanting or factoring and canteen workers where particulars in respect of these activities could not be excluded from the return.

### Working proprietors

These include all persons regarded as "self-employed" for national insurance purposes and members of their families who worked in the business without receiving a wage or salary; but such persons who worked less than half the normal number of working hours are excluded. Directors working in the business but not in receipt of a definite wage, salary or commission are included under this heading: directors paid by fee only are not included.

### Employees

Administrative, technical and clerical employees include directors in receipt of a definite wage, salary or commission, managers, superintendents and works foremen: research. design employees (other than operatives); draughtsmen, editorial staff, advertising staff, travellers and all office employees.

Operatives include all other classes of employees, that is, broadly speaking, all manual wage earners. They include operatives employed in power stations, transport (including roundsmen), warehouses, stores, shops and canteens, inspectors, maintenance workers and cleaners. Operatives engaged in outside work of erecting, fitting etc. are also included, but outworkers are excluded.

### Capital expenditure

Capital expenditure during the year in respect of manufacturing units where production had not started before the end of the year is included in the figures for 1971 to 1975. Establishments were asked not to deduct from the value of capital expenditure amounts received or expected to be received in grants or allowances from the Government or any statutory body or local authority. From 1973, establishments with 100 or more employees were asked to include a total net capital expenditure figure for each calendar year.

This represents the cost incurred during the year of new building and other constructional work to be used in connection with the business covered by the return. The value is that charged to capital account during the year of return; it includes expenditure on new buildings and on the extension or reconstruction of old buildings, the value of works of a capital nature carried out by the establishment's own staff and the cost of any newly constructed buildings purchased, Figures shown include any legal charges, stamp duties. agents' commissions, etc.

### (b) Land and existing buildings

The items shown are the capital cost of freeholds purchased and the capital cost or premium payable for leaseholds acquired (excluding the value of any assets acquired in taking over an existing business), and the amounts receivable for any freeholds or leaseholds disposed of. The value is that charged to capital account during the year of return.

### (c) Plant, machinery and vehicles

The items shown are the value of plant and machinery and of vehicles acquired, both new and second-hand, and the amount received for items disposed of during the year. The value of plant and machinery acquired includes plant, etc. which firms produced for their own use in connection with the business covered by the return. The value of plant, etc. acquired is the expenditure charged to capital account during the year of return less any discounts received, but including the cost of transport and installation. Deductible value added tax is excluded but non-deductible value added tax on motor cars acquired is included. No deduction is made for depreciation, amortization or obsolescence. The proceeds of items disposed of during the year exclude amounts written-off for items scrapped.

### Cost of industrial services

Includes amounts payable to other firms for work done on materials supplied by the establishment, payments for repairs and maintenance (including those in respect of rented buildings) and amounts paid to other firms for contracts which have been sublet. Payments to outworkers are excluded.

### Cost of non-industrial services

Includes rent of industrial buildings and capital equipment. commercial insurance premiums, bank charges and amounts paid for professional services, postal etc., services, transport. advertising etc. Amounts payable on royalties for the right to use patents, trademarks, , copyrights etc., manufacturing and quarrying rights and technical "know-how" are also included.

### Gross output

In the calculation of gross output the value of total sales and work done is increased by the rise (or reduced by the fall) during the year in the value of work in progress and goods on hand for sale.

### Net output

Net output, a customary census measure, is calculated by deducting from gross output the cost of purchases (reduced by the rise, or increased by the fall, during the year of stocks of materials etc.) and the cost of industrial services received, and where applicable, duties etc.

### Net output per head

The figures of net output per head are derived by dividing the net output by the average number of persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical employees and working proprietors, but excluding outworkers.

### Gross value added at factor cost

Gross value added at factor cost is calculated by deducting from net output the cost of non-industrial services (e.g. rent of buildings and capital equipment, commercial insurance premiums, bank charges and amounts paid for professional services, post office services, transport and advertising), rates (excluding water rates) and the cost of licensing motor vehicles. This estimate of gross value added approaches more closely than census net output to the definition of net output or value added in national accounts statistics.

Gross value added at factor cost per head The figures of gross value added at factor cost per head are

Purchases include the cost of raw materials, components,

semi-manufactured goods and workshop materials; of

replacement parts and consumable tools not charged to

capital account; of packaging materials of all types; of

stationery and printed matter; of fuel, electricity and water; of

materials to be used by the establishment or given out to other

establishments for the production of machinery or other

capital items for the establishment's own use; of materials

for use by the establishment when working on goods supplied

by customers; and of food, etc. for any canteen covered by

the establishment's return. Transfers of goods to the establish-

ment from another department of the same firm not covered by

the establishment's return are included at a cost corresponding

to the estimated selling value recorded by the other department.

Amounts payable to transport firms or credited to the firm's

own transport department for delivery of materials are

excluded, as are all purchases of machinery and plant charged

to capital account. Purchases of goods for merchanting or

factoring have been collected separately since 1973. The

values shown exclude VAT. They include, in addition to the

actual purchase price, the value of packaging material

charged to the establishment. The value of returned goods or

packaging material returned to suppliers and any trade

discounts are excluded. Materials purchased duty-paid are

included at their duty-paid value, less any drawback, rebate,

etc. The cost of transport is included only if it is included with

the purchase price in the firm's accounts. Imported goods are

included at their full delivered cost. If in the firm's accounts the

transport from docks or airport is not included in the cost of

goods purchased, the cost is entered at c.i.f. plus duty (if

applicable). Leasing, renting and hire purchase charges are

The information shown in Table 9 was obtained in an inquiry

carried out as a supplement to the Census of Production for

1974, in which the larger firms in each industry were asked to

provide a breakdown of the figure of total purchases (other

than purchases of goods for merchanting or factoring) that

they contributed to the Census. No establishment with fewer

than 25 employees was asked to contribute to the inquiry;

and this exemption limit was raised to exclude establishments

with fewer than 50 or 100 employees, in those industries in

which exempted establishments were estimated to account

for less than 15 per cent of the industry's total purchases. A

breakdown of purchases similar to that sought in the 1974

inquiry was previously obtained as part of the Censuses of

Production for 1963 and 1968, and results were published in

Sales of goods produced, work done and industrial services

Sales for the purposes of the annual censuses means deliveries

on sale of goods made by establishments in the United

Kingdom covered by the inquiry. Sales of goods made for

these establishments by outworkers or by other establishments

from materials given out to them are included; as also are

sales of waste products. Any new building work and machinery

or other capital items produced by establishments for hiring

out or leasing are regarded as sales, the value included in the

return being that adopted in the establishment's capital asset

accounts. Forward sales and canteen takings are excluded.

All sales in the period of the inquiry are included irrespective

of when the goods were manufactured. Goods produced in

one establishment and transferred either to ancillary depart-

ments not engaged in production and for which there are

separate accounts, or to another establishment of the same

firm not covered by the return, are treated as sales by the

producing establishment and valued as far as possible as if

they had been sold to an independent purchaser. Goods

transferred to wholesale or retail selling organisations, for

which separate accounts are kept are valued on the same

The value shown for sales is the "net selling value" defined

as the amount (excluding value added tax) charged to

customers whether on an ex-works or delivered basis, after

Table 10 of the Industry Reports of those Censuses.

proprietors, but excluding outworkers.

Purchases

excluded

exported.

Figures for work done represent the amount charged for work carried out on materials supplied by a customer and include repair work. Within certain industries this heading covers a wide variety of activities. For example, within the food sector-butter packed on commission; within the textile industries-making up of garments, fur dressing and textile finishing; within printing and publishing-preparatory work on type-setting, block making and binding. Work done is also significant in the electrical machinery and heavy engineering industries, covering erection, installation and repair and jobbing work. Other activities within this heading include exploration work, research and development, glass cutting and dressing and planing of timber. Industrial services rendered includes repairs and maintenance, installation work, and technical research and studies rendered to other organisations.

Capital goods produced for establishments' own use This includes all work carried out during the year by the establishments' own staff for their own use, which was of a capital nature.

Non-industrial services rendered Includes rents received for commercial and industrial buildings, amounts charged for hiring out plant, machinery and other goods and amounts charged to other organisations for the provision of transport. Also includes amounts received for the right to use patents, trademarks, copyrights etc., manufacturing and quarrying rights and technical "know-how"; revenue from such staff facilities as canteens is also included.

by the seller.

Wages and salaries is excluded.

Remuneration paid to outworkers The remuneration paid to outworkers (i.e. persons employed by the establishment who do their work in their own homes) is generally on a piece-work basis. Only amounts paid to outworkers whose names appear on the establishment's payroll are included. Amounts paid to outworkers by subcontractors are excluded.

Employers' insurance and welfare contributions This item includes employers' contributions to national insurance and graduated pensions (and/or earnings related basic contributions under the Social Security Act, 1973) as well as commercial insurance premiums to provide pensions, superannuation or other retirement benefits, sickness benefits, personal accident benefits, disability or death benefits for employees or former employees or their dependants. Contributions to the running costs of canteens, social centres, children's holiday homes, etc. for employees, former employees and their dependants are also included.

any trade discounts and agents' commissions have been deducted. The cost of packing materials less allowance for returnable cases is included. In industries where products attract Excise Duty the value stated is usually inclusive of duty if sold duty-paid and exclusive of duty if sold in bond or

### Goods merchanted or factored

Merchanted goods are those (excluding canteen sales) sold without having been subjected to any manufacturing process

### Stocks and work in progress

Values are given of stocks of goods on hand for sale and of materials, stores and fuel, at the end of the year of return and of the change during the year, including any stocks of goods held for merchanting or factoring. Work in progress is defined as materials which have been partially processed by the establishment but which are not usually sold or transferred to another establishment without further processing. The values include the cost of materials consumed and labour used, together with a margin of overhead costs and profits. Progress payments made to sub-contractors are excluded and progress payments received from other organisations are not deducted.

These are amounts paid during the year to operatives and to administrative, technical and clerical employees. Payments to working proprietors, whether called salaries or not, are excluded. The values shown include all overtime payments, bonuses and commissions, whether paid regularly or not, and no deduction is made for income tax, insurances, contributory pensions etc. The value of redundancy payments less any amounts reimbursed from Government sources is included. The value of any payments in kind, travelling expenses etc.
