## Business Monitor

## Report on the <br> Census of Production

## Cocoa, chocolate and sugar confectionery

$\stackrel{6}{5}$

Special Note for Purchasers
Special Note for Purchasers
Commencing with the 1971 Census, the Census of
Commencing with the 1971 Census, the Census of
Production reports are being numbered in a uniform series embracing all industrial inquiries in the Business Monitor series. These Business Monitors have a code (for production) followed first by A (indicating that it is an annual series) or Q (quarterly) or M (monthly and then by a number indicating the minimum list the Standard Industrial Classification (revised 1968).
The Census of Production (PA) reports are available The Census of Production (PA) reports are availab
on standing order (details on application to Her Majest 9NH. Telephone 01-928 6977) although they not included in the global subscription arrangements
for the Business Monitor series.
Government Statistical Service
A service of statistical information and advice is provided to the Government by specialist staffs
Departments. Statistics are made generally available
through their publications and further information and advice on them can be obtained from the Departments concerned.

| Gross value added at factor cost per head | £ | 2.511 | 3,392 | 3,650 | 4,527 |

(a) Including estimates for establishments not making satisfactory returns, non-response and establishments exempt because of size. Satisfactory returns accounted for 91 per cent of employment within the industry.
(b) Details of manufacturers' sales of principal products are published regularly in Business Monitor PQ217.

Due to the changeover from Purchase tax to V.A.T. this heading no longer applies from 1974.
(d) Average number employed, including full and part-time employees (see table 7 ) and working proprietors.

1973 figures include hire of vehicles.
(f) For 1973-1975, rents of industrial and commercial buildings were not recorded separately

For 1976 the amount payable was $£ 5,262$ thousand.
(g) 1974-1976 figures include the cost of hiring goods vehicles.

Notes
These notes give the main information needed for
interpreting the figures in the industry Business interpreting the figures in the industry business
Monitors: more detailed information about the census is given in a separate Business Monitor PA1001 (Introductory Notes) of the Report on the Census of Production, 1976
general information
Changes made for 1976
The Census for 1976 is in line with similar Inquiries being conducted in other member countries
of the European Economic Communities. There was small number of changes in the scope of the industry reports compa.
separate headings for:
Sales of goods produced
Receipts for work done and industrial services rendered
Amounts paid for hire of plant and machiner Amounts paid for rent of industrial and commercial buildings
Specific changes are explained in the introductions
to the industry reports or by footnotes to the tables.
Suppression of information relating to individual undertakings
Section $9(5)(b)$ of the Statistics of Trade Act 1947 states -"The following provisions shall have effect with respect to any report, summary or other under the foregoing provisions of this Act nder the foregoing provisions of this Act o
in compling any such report, sumary or
communication the competent authority shall so arrange it as to perevent any particulars
published therein from being identifled as being particulars relating to any Individual person or undertaking except with the previous consent in that undertaking, as the case may be; but this provision shall not prevent the disclosure of the total quantity or value of any articles produced,
sold or delivered; so, however, that before disclosing any such total the competent authority shall have regard to any representations made to
them by any person who alleges that the disthem by any person who alleges that the dis-
closure thereof would enable particulars relating closure thereof would enable particulars relating
to him or to an undertaking carried on by him to to him or to an undertaking carried on
be deduced from the total disclosed."
If a figure involved disclosure the contributor
concerned was sometimes asked to give permission concerned was sometimes asked to give permission
for its publication. In the majority of cases for its publication. In the majority of cases where contributors were not approached the figure has been suppressed, either by combining it with
other figures, or as in the regional tables, by other figures, or as in the
omitting the figure altogether.
Symbols used
The fol lowing
The following symbols are used throughout the PA
serles of Business Monitors:

- not avallable
- nil or less than half the final digit shown
figures cannot be shown owing to the risk of
disclosing information about individual enter prises
revised

Rounding of figures
Figures in the tables have, where necessary, been
rounded to the nearest final digit. Where figures ounded to the nearest final digit. Where figures have been so rounded, the sum of the may not al ways agree exactly with the total
shown.

Industrial classificatio The United Kingdom Standard
first Industrial Classification (SIC) was first issued in 1948 and
was subsequently revised in 1958 and 1968 it was subsequently revitermity and comparabllity it exists to promote uniformity and comparability in
the official statistics of the United Kingdom, The general principles followed are those of tho
International standard industrial classification international Standard Industrial Classification
of all Economic Activities of the United Nations of all Economic Activities of the United Nations
Statistical Office but the United Kingdom sic reflects the organisation and structure
industry and trade as it exists in the industry and trade as it exists in the United
Kingdom. The SIC is a classification by activity Kingdom. The SIC is a classification by activity
and is not a commodity classification. However, an index of all commodity headings for whic
sales data are provided in the Quarterly Busines sales data are provided in the Quarterly Business
Monitors, is published in Business Monitor PQ1000. Statistical units
The statistical un
The statistical unit for the purpose of the Census
is the establishment which is defined in the is the establishment which is defined in the sta
as the smallest unit which can provide the information normally required for an economic
census, for example, employment, expenses, turncensus, for example, employment, expenses, turn-
over, capital formation. Usually the principal over, capivities carried on in an establishment fall within a single heading of the classification
(e.g. steel making or sugar refining). Typlcally
the establishment embraces all the activitios the establishment embraces all the activilites
carried on at a single address e.g. a farm, a mine or a factory, including those which are ancillary
to the principal activities. Frequently distinct to the principal activities. Frequently distinct
activities characteristic of different industries activities characteristic of different industries
are carried on at one address, but normally these are carried on at one address, but normally these
are not classified separately and the whole
establishment is classified according to the maln establishment is classifted according to the main
activity. If, however, the required range of date activity. If, however, the required range of date
can be provided for each activity, each is taken ca constitute a separate establityhment. Somettimes

earners. They include operatives employed in power stations, include operatives employed in warehouses, stores, shops and roundsmen),
canteens,
 Operatives engaged in outside work of erecting,
fitting etc. are also included, but outworkers are excluded.
Capital expenditure
Capital expenditure during the year in respect of manutacturing. units where production had not
started before the end of the year is included.
Establishments were askel Establishments were asked not to deduct from the
value of capital expenditure amounts received or value of capital expenditure amounts received or
expected to be received in grants or allowances expected to be received in grants or allowances
from the Government or any statutory body or local
authority authority. EstablIshments with body or local 100 or more
employees were asked to Include a total employees were asked to Include a total net
capital expenditure figure for each calendar year.
(a) New building work
of new building and other incurred during the year of new bulding and other constructional work to
be used in connection with the business covered by
the return. The value is thet the return. The value is that charged to capital
account during the year of return; it includes account during the year of return; it includes
expenditure on new buildings and on the extension or reconstruction of old buildings, the value of works of a capltal nature carried out by establishment's own staff and the cost of any
newly constructed buildings purchased. Figures shown include legal charges, stamp duties, agents
(b) Land and existing buildings
(b) Land and existing buildings
The thems shown are the capital cost of freeholds
purchased and the and purchased and the capltal cost or premium payable
for leaseholds acquired (excluding the value of for leaseholds acquired rexcluding the value of assets acquired in taking over an existing
business), and the amounts receivable for freeholds or leaseholds disposed of The value is that charged to capital account during the year of
return. (c) Plant, machinery and vehicles
The tems shown are the value of plant and
machinery and of vehicles acquired, both new and machinery and of vehicles acquired, both new and
second-hand, and the amount receilved for disposed of during the year. The value of plant
firms produced for their own use in connection with
the business covered by the return. The value of plant, etc. acquired is the expenditure charged to capital account during the year of return less any
discounts recelved, but including the cost of discounts recelved, but.
transport and instal ation. Deduct the value added
tax is excluded but non-deductible value added tax tax is excluded but non-deductible value added tax
on motor cars acquired is included. No deduction on motor cars acquired is included. No deduction cence. The proceeds of items disposed of during
the year exclude amounts written-off for items scrapped.

Cost of industrial services
This includes amounts payable to other firms for
work done on materials supplied by the establishwork done on materials supplied by the establish-
ment, payments for repairs and maintenance
(including those in respect of rented buildings) (including those in respect of rented buildings)
and amounts paid to other firms for contracts which have been sublet. Payments to outworkers are excluded.
Cost of non-industrial services
This includes rent of industrial and commercial This includes rent of industrial and commercial
buildings, hire of plant and machinery, commercial buidings, hire of plant and machinery, commercial
insurance premiums, bank charges and amounts paid for professional services, post office services,
transport, advertising etc. Amounts transport, advertising etc. Amounts payable on
royalties for the right to use patents, trademarks, royalties for the right to use patents, trademarks,
copyrights etc., manufacturing and quarrying rights copyrights etc. manutacturing al and quarrying
Gross output
Gross output
In the calculation of gross output the value of total sales and work ofone is is increased by the rise
tor the the the the the the the the the the the the (or reduced by the fall) during the year in the
value of work in progress and goods on hand for
sale Net output
Net output, a customary census measure, is calculated by deducting from gross output the cost
of purchases (reduced by the rise, or increased by the fall, during the year of stocks of materials
etc.) and the cost of industrial services received, etc.) and the cost of industrial services received,
and where applicable, duties etc.

Net output per head
The figures of net output per head are derived by dividing the net output by the average number of
persons employed (full and part-time) on all activities covered by the returns, including operatives, administrative, technical and clerical
employees and working proprietors, but excluding employees and
outworkers.
Gross value added at factor cost
Gross value added at factor cost is calculated by Gross value added at factor cost is calculated by
deducting from net output the cost of nondeducting from net output the cost of non-
Industrial services ce.g. rent of buildings, hire
of plant and machinery, commercial insurance of plant and machinery, commercial insurance
premiums, bank charges and amounts paid for premiums, bank charges and amounts paid for
professional services, post office services,
transport and advertising), rates (excluding water transport and advertising), rates (excluding water
rates) and the cost of licensing motor venicles. This estimate of gross value added approaches more
closely than census net output to the definltion of net output or value added in national accounts of net outp
statistics.
Gross value added at factor cost per head
The flgures of gross value added at factor The flgures of gross value added at factor cost per
head are derived by dividing the gross value added by the average number of persons employed (full and
part-time) on all activities covered by the part-time) on all activities covered by the
returns, including operatives, administrative, technical and clerical employees and working
proprietors, but excluding outworkers. Purchases
Purchases
Purchases include the cost of raw materials, materlals to be used by the establishment or giv
out to other establishments for the production machinery or other capital items for the estab customers; and of food, etc. goods supplled
for any covered by the establishment's. for return. Try cante nent of the establishment from another depar establishment's return are inc covered by t
 ecorded by the other department. Amounts payab transport departms or credited to Amounts payab excluded, as are all purchases of materials excladed charged to capital account. machinery goods for merchanting or factoring have be col lected separately since 1973. The values sho exclude VAT. They include, in addition to actual purchase price, the value of packag
material charged to the establishment. The of returned goods or packaging materlal returne
to suppliers and any trade discounts are exclude to suppliers and any trade discounts are excl udded
Materials purchased duty-paid are included at the Materials purchased duty-paid are included at thel
duty-paid value, less any drawback, rebate, et The cost of transport is included only If ncluded with the purchase price in the
accounts
Imported goods are included at ransport from docks or airport irm's accounts the the cost of goods purchased, the cost in entered c.i.t. plus duty (if applicable). Leasing, rent Sales of goods produced Sales for the purposes of the annual censuse means deliveries on sale of goods made by estab
lishments in the United Kingdom covered by tien inquiry. Sates of goods made for these esta
IIshments by outworkers or by other establishmen from materials given out to them and sales
from waste products are included. New building na
and machinery or other capital items produced establishments for hiring out or leasing a
regarded as sales, the value included in return being that adopted in the establishments capital asset accounts. Forward sales and cante
takings are excluded. All sales in the takings are excluded. All sales in the perio
the inquiry are included irrespective of when the inquiry are included irrespective of when
goods produced in manufactured.
establishment and transferred either to ancil departments not engaged in production for whic
dhere are separate there are separate accounts, or to anothe
establishment of the same firm not return, are treated as sales by the producl establishment and valued as far as possible as
they had been sold to an independent purchase Goods transferred to wholesale or retall sellii organisations, for which separate
kept are valued on the same basis.
The value shown for sales is the "net sellit added tax) charged to customers whether
ade ex-works or delivered basis, after any
discounts and agents, commissions have deducted. The cost of packing materials allowance for returnable cases is included.
