Where appropriate, lists of items under the headings shown in CAPITALS will be found on the pages indicated.

## The Employed Population, 1948-1950

THE Tables on the following pages show the estimated numbers of employees classified to each industry at the end of May, 1950, with comparable figures for the end of May, 1949, and the end of June, 1948. Estimates for July, 1948 (now referred to as end of June, 1948), were previously published in the February, 1949, issue of this GAZETTE, but the figures for a number of industries have now been revised in the light of later information.

The figures cover all classes of employees, including those who were unemployed or temporarily absent from work for other reasons. They do not include persons who had not entered employment at the respective dates but were registering at Employment Exchanges (e.g., young persons who had never had a job). Members of H.M. Forces are also excluded.

The main basis of the figures for each of the three years was the count of insurance cards exchanged under the national insurance schemes, but owing to administrative changes the method adopted for making the estimates for 1949 and 1950 was different from the method used for 1948. When the new insurance schemes were introduced in July, 1948, all employees (with the exception of permanent Civil Servants, whose contributions are paid by other means) received insurance cards which all came into use simultaneously, and the complete count of the cards issued was therefore used as a basis for estimating the employee population.

For administrative reasons it was not practicable, after July, 1948, to have a simultaneous annual exchange of all insurance cards. Instead, the cards are exchanged in four quarterly groups at the beginning of March, June, September and December. In allocating the cards to the four groups, arrangements were made to ensure a random distribution of the different cards among the insured population. Examination of the counts of the cards exchanged at the quarterly dates in 1949 and 1950 supports the assumption that a reliable estimate of the total number of insurance cards current at the exchange date can be obtained by multiplying by four the total number of cards due for exchange at that date. The estimate of the total number of employees at the end of May, 1949, has, accordingly, been obtained by multiplying by four the number of cards which were due to be exchanged at the beginning of June and which were in fact exchanged between that date and the end of May, 1950. (Cards due for exchange in June are marked with the letter "B" and it is assumed that any such cards exchanged during the twelve months June to May were current at the beginning of the period.) An addi-

tion in respect of permanent Civil Servants has been made on the basis of information supplied by the Treasury, and in the case of agriculture and sea transport account has been taken of the statistics compiled by the Departments concerned with those industries. The same method was used to arrive at the estimate of the total number of employees at the end of May, 1950, the only difference being that the comparatively small number of "B" cards remaining to be exchanged after December, 1950, had to be estimated on the basis of the figures for the previous year. The figures for 1949 and 1950 are related to the end of May because the exchange of insurance cards, which was their principal basis, took place in the first week of June. The figures for 1948, on the other hand, were based on the issue of cards in the first week of July.

In order to obtain more accurate estimates of the number of employees in various industries, it was further arranged that, at the time of the exchange of "B" cards in June of each year, employers of five or more persons should make returns showing the total number of cards held by them, distinguishing the number of "B" cards. These returns provide the equivalent of a complete count for those employers who rendered returns, and cover in the aggregate about three-quarters of the estimated total number of cards current, the proportion varying from industry to industry. These returns, together with the number of "B" cards actually exchanged, were analysed by industry on the basis of the Standard Industrial Classification, and made it possible to obtain more accurate estimates of the numbers employed in an industry than would have been obtained by relying only on the number of "B" cards actually exchanged.

Reference has already been made to the fact that some of the figures for 1948 have been revised. It was realised at the time when the original estimates were made that the procedure for changing over from the old unemployment insurance and health insurance schemes to the new national insurance schemes in 1948 involved the possibility of duplicate issues of cards and some allowance was made for that possibility when the estimates were made. Comparison with the estimates for 1949 and 1950, combined with information from other sources about the changes between 1948 and 1949, however, shows that the allowance that was made was not enough and further revisions have accordingly been made. In view of these differences, publication of the figures for 1949 was postponed until a second year's experience of the new procedure of exchanging cards was available.

ESTIMATED NUMBERS OF EMPLOYEES AT END-MAY, 1950, WITH CORRESPONDING FIGURES FOR 1949 AND REVISED FIGURES FOR 1948.

A. GREAT BRITAIN

Table with columns for Industry, End-May, 1950 (Males, Females, Total), End-May, 1949 (Males, Females, Total), and End-June, 1948 (Males, Females, Total). Rows include Agriculture, Mining, Manufacturing, and various service industries.

ESTIMATED NUMBERS OF EMPLOYEES AT END-MAY, 1950, WITH CORRESPONDING FIGURES FOR 1949 AND REVISED FIGURES FOR 1948.

A. GREAT BRITAIN—Continued.

Continuation of the previous table, listing industries such as Clothing, Food, Paper and Printing, Transport and Communication, and Distributive Trades. Includes a GRAND TOTAL row at the bottom.

\* Excluding H.M. Forces.

(97206)

## EMPLOYMENT AND UNEMPLOYMENT IN 1950

### Employment\*

During 1950 there was a rise of 225,000 (96,000 men and 129,000 women) in the size of the total working population, which numbered 23,225,000 at the end of the year. As in 1948 and 1949, the greater part of this increase in the working population took place in the latter half of the year. The considerable increase in the number of women in the working population reflects the tendency for more women to return to or remain in employment already noted in previous years.

The size of the working population was not appreciably affected by the recruitment of foreign workers under Government schemes during the year. Such recruitment was on a very small scale, all but one of the schemes having now come to an end.

The reduction in the size of the Forces, which has been a feature of previous years, was reversed in 1950, and, after falling to 688,000 at the end of May, the strength of the Forces gradually increased to a total of 752,000, a rise of 27,000 during the year.

The number in civil employment rose by some 240,000 or about one per cent. during 1950. Increased numbers of women in employment accounted for more than half of this rise. The net effect of the changes in total man-power and its distribution between the Forces, civil employment and other categories is shown in the following Table:—

	Strength (in thousands) at			Change during 1950	
	Mid-1948	Dec., 1949	Dec., 1950	'000s	Per cent.
Total Working Population	22,904	23,000	23,225	+225	+ 1
of which—					
Men	15,810	15,825	15,921	+ 96	+ 1
Women	7,094	7,175	7,304	+129	+ 2
H.M. Forces and Women's Services	846	725	752	+ 27	+ 3½
Ex-Service Men and Women on Release Leave	92	11	—	- 11	-100
Registered Unemployed	282	360	328	- 32	- 9
Total in Civil Employment	21,684	21,904	22,145	+241	+ 1
of which—					
Men	14,698	14,860	14,964	+104	+ ½
Women	6,986	7,044	7,181	+137	+ 2

It will be seen from the above Table that the increase in civil employment was slightly larger than the increase in total man-power available, the rise in the strength of the Forces being offset by a slightly greater fall in the numbers unemployed and on release leave.

Changes in the distribution of man-power in civil employment in 1950 are shown in the following Table:—

Industry or Service	Strength (in thousands) at			Change during 1950	
	Mid-1948	Dec., 1949	Dec., 1950	'000s	Per cent.
<b>Basic Industries</b>					
Coal Mining	795	781	762	- 19	- 2½
Other Mining and Quarrying	80	81	80	- 1	- 1
Gas, Electricity and Water	312	346	361	+ 15	+ 4½
Transport and Communication	1,808	1,796	1,776	- 20	- 1
Agriculture	1,194	1,160	1,143	- 17	- 1½
Fishing	41	34	31	- 3	- 9
Total, Basic Industries	4,230	4,198	4,153	- 45	- 1
<b>Manufacturing Industries</b>					
Chemicals and Allied Trades	444	472	484	+ 12	+ 2½
Metals, Engineering and Vehicles	3,935	3,969	4,086	+117	+ 3
Textiles	936	1,005	1,033	+ 28	+ 3
Clothing	662	713	714	+ 1	—
Food, Drink and Tobacco	723	779	803	+ 24	+ 3
Other Manufactures	1,399	1,468	1,500	+ 32	+ 2
Total, Manufacturing Industries	8,099	8,406	8,620	+214	+ 2½
<b>Building and Contracting</b>	1,463	1,424	1,409	- 15	- 1
<b>Distributive Trades</b>	2,523	2,601	2,654	+ 53	+ 2
<b>Professional, Financial and Miscellaneous Services</b>	3,946	3,866	3,924	+ 58	+ 1½
<b>Public Administration—</b>					
National Government Service	688	655	631	- 24	- 3½
Local Government Service	735	754	754	—	—
Total in Civil Employment	21,684	21,904	22,145	+241	+ 1

The main percentage increases were in gas, electricity and water (4½ per cent.), metals, engineering and vehicles (3 per cent.), textiles

\* In this article figures relating to civil employment and the total working population incorporate the revisions described on pages 41 and 61 of this issue of the GAZETTE.

(3 per cent.), and food, drink and tobacco (3 per cent.). The main decreases were in fishing, National Government service and coal mining.

### Unemployment

The total number registered as unemployed in Great Britain in January, 1950, was 372,000 (42,000 higher than in December, 1949). There was little change in February, but thereafter the figure fell month by month to 272,000 in July. In August it rose again to 288,000 as a result of the registration of school-leavers seeking employment, and in the last quarter of the year the total rose to a little over 300,000. Both the seasonal fall in unemployment in the first half of the year and the seasonal rise in the last quarter were considerably smaller than in 1949. Between 5th December, 1949, and 11th December, 1950, there was a reduction of 32,900 in the number of males on the registers but an increase of 4,400 in the number of females. The net reduction of 28,500 was due mainly to a reduction from 50,400 to 39,000 in the metals, engineering and vehicles group of industries. The average number registered as unemployed during the year was 314,000, of whom 220,000 were males and 94,000 were females. The corresponding average figures for 1949 were 228,000 males and 80,000 females.

The industrial analysis of the numbers unemployed in December shows that about 27 per cent. of the total had been last employed in manufacturing industries, 13 per cent. in the building and contracting industries, 11 per cent. in the hotel and catering trades, 8 per cent. in the distributive trades and 7 per cent. in transport and communication, the remainder being spread over other industries and services in smaller proportions. An occupational analysis of the 196,000 men registered as wholly unemployed at the same date showed that 83,000 were general labourers, of whom 59,000 were deemed to be fit only for light work.

The number of persons who had been continuously unemployed throughout the year was 36,000, the great majority of whom were over 40 years of age. In general, however, there was a high rate of turnover in the unemployment register, and the available statistics of duration of unemployment show that, apart from the above-mentioned 36,000 who were continuously unemployed, about three-quarters of the total number on the registers at the beginning of any quarter had found work or otherwise ceased to register by the end of the quarter.

The numbers registered as unemployed in Great Britain at one date in each month of the year are shown in the Table below.

Date	Men aged 18 and over	Boys under 18	Women aged 18 and over	Girls under 18	Total
December, 1949	232,985	5,768	86,513	5,070	330,336
January, 1950	252,114	10,657	99,681	9,814	372,266
February, ..	257,938	8,176	99,113	7,555	372,782
March, ..	240,288	6,667	94,242	6,086	347,283
April, ..	223,929	11,034	85,181	8,841	328,985
May, ..	213,910	7,075	87,622	6,067	314,674
June, ..	196,327	5,444	75,597	4,628	281,996
July, ..	189,987	6,340	70,291	5,357	271,975
August, ..	186,506	14,824	73,814	13,167	288,311
September, ..	185,269	11,242	77,328	9,996	283,835
October, ..	198,681	7,402	90,726	7,254	304,063

## THE SERVICES AND CIVILIAN LIFE

In 1950 the Government appointed an Advisory Council, under the chairmanship of Sir Godfrey H. Ince, G.C.B., K.B.E., Permanent Secretary to the Ministry of Labour and National Service, to advise the Minister of Labour and National Service and the Minister of Defence jointly on the best means of securing a relationship between Service and civilian life which would provide, for men and women, the opportunity of a continuous career through the Services and industry. The composition of the Council is set out in the issue of this GAZETTE for June, 1950 (page 194). The Council held its first meeting on 16th May, 1950, and has since met on three occasions, the last being 16th January. A Report, dated 31st January, 1951, has been submitted to the two Ministers, containing an account of the work of the Advisory Council up to now under various headings and its appreciation of the ground still to be covered. This Report is reproduced below.

### Report of the Advisory Council on the Relationship between Employment in the Services and Civilian Life

#### Resettlement in Civilian Employment

Among its plans for resettlement the Ministry of Labour and National Service reported a proposal that employers should allocate a definite percentage of male engagements to ex-Regulars so as to provide an assurance for the future that the ex-Regular would get a fair share of employment at the time of his discharge. After full consideration of the practicability and desirability of this scheme, the Council approved it in principle on the understanding that it would be voluntary and flexible in application and worked out separately in each field of employment.

Another proposal was that a proportion of regular service should count towards seniority when discharges were necessary, and, where appropriate, towards establishment. The Council recognised that this was a difficult question, varying in importance between different industries and services, and agreed that, where it seemed appropriate in particular industries, proposals on these lines should be brought forward by the Ministry of Labour and National Service for negotiation with both sides.

The responsibility of the Government Service in providing opportunities for resettlement of ex-Regulars was another subject engaging the attention of the Council. Having discussed this, the Council is clear that the Government Service should play its appropriate part amongst other industries and services and that the actual opportunities to be provided are a matter for discussion and negotiation within the established negotiating machinery of the Government Service. As paragraph 4 of the annexed Report shows some progress has already been made along these lines.

The resettlement problem of the Regular officer is in many ways a separate one. It is difficult, but small in size compared with that of the other ranks. The Council recommends that a determined effort should be made to change the climate of opinion in industry and commerce on the employment of officers both with regard to their capacity and to the national duty resting on individual employers to play their part. It has suggested a number of measures by which this might be pursued. A small proportion of ex-officers registering for employment take up residence in areas which largely preclude the possibility of suitable jobs being found for them. Where this is so and they are unwilling to move, the Council is of opinion that there is little it can recommend to assist in their resettlement.

#### The Part of the Services in Recruitment and Resettlement

The Ministry of Defence presented to the Council comprehensive information about the way in which the Service Departments were endeavouring to improve their conditions, to attract and retain recruits, and to prepare men for return to civilian life.

The Council recommended that consideration should be given to the possibility of a greater intake of youth at school-leaving age of 15 plus, so that the Forces could help themselves and industry by developing more thoroughly this source of recruitment and supplying their demand for skilled craftsmen to a greater extent from their own sources. The Council was informed that the Services would find that the extent to which this proposal could be implemented would be limited by the addition to overhead costs of training which would be involved.

Particular attention was given to the further education of all types given in the Forces, and the Council has been able to discuss with the Directors of Education in the three Services the facilities which are available. The Council has no doubt that a great deal of valuable work is being done, and it feels that more information about the educational and other work performed in the Services to prepare men for their return to civilian life should be made available to the community generally.

#### The Part of the Schools and the Youth Employment Service

The attitude of men and women towards joining the Regular Forces is clearly affected by what they know about the Forces and the opportunities which they offer. It is often said that the schools and the Youth Employment Service could play a larger part in this, and the Council has therefore taken the opportunity of discussing the present position with representatives of those concerned with education and youth employment. The Council is quite clear that any attempt to use either the schools or the

Youth Employment Service as a means of recruiting or of propaganda for the Services would be totally wrong. The aim of integrating the Services into the working life of the community clearly requires, however, that information should be available to young men and women, and those advising them about careers equally in regard to industry, commerce, the professions and the Armed Forces. The Council agrees that the Youth Employment Service and the Services are justified in seeking to make readily available information about what the Services have to offer. It is proposed to take steps towards this end, and the Council intends to review the position again later.

#### Progress Made

There is annexed a Report [reproduced below] showing the progress which has been made in carrying out the ideas which the Council has discussed and it is suggested that at an appropriate and early stage there should be general publicity for the work done.

#### General Observations

The Council has up to now concerned itself with the Regular Serviceman, since regular recruitment and the proper use of those leaving the Forces every year is the most important question placed before it. Its immediate future programme of work is also concerned with the Regular. National Servicemen are also within its scope and, since these men must be the largest single recruiting source for the Forces at the present time, it will in due course consider what help it can give in that direction.

The Council has not been at work long. It consists of persons representative of a wide variety of interests who have not previously studied these problems together. Quite apart from any practical proposals it may make, the Council is unanimously of the opinion that the exchange of information and the frank expression of differing views is of great value to its members, and through them to a wider public. They would conclude, therefore, by stressing the importance of this sort of exchange of view and discussion throughout the community if the aim of a proper integration of Service and civilian life is to be achieved.

### Progress Report on the Work carried out by the Departments concerned with the Resettlement of Ex-Regulars

In present circumstances the ex-Regular Serviceman has ordinarily little difficulty in finding some kind of a job when he leaves the Forces. The rate of unemployment amongst ex-Regulars on leaving the Forces is even lower than amongst the general community, and it has been found that many employers appreciate their qualities. This does not mean, however, that the ex-Regular can be assured of finding a job really suited to him and which will make full use of his qualifications. Nor does it carry to the man who is thinking of engaging or re-engaging any assurance that the position will be the same when he comes out at the end of his period of service. The following Report sets out the main fields in which efforts are being made to work out continuing schemes for the resettlement of the ex-Regular which will increase, improve and consolidate the opportunities open to him.

#### 1 Recognition of Service Trade Qualifications by Trade Unions

An Inter-Services Committee was set up some years ago to negotiate with employers and trade unions for the recognition of Service Trades, with the object that men who have acquired a skill in the Forces which has an equivalent in civilian employment should not be prevented from making full use of it. Negotiations on 254 Service Trades have now been completed; of these, 202 are recognised as giving a degree of skill which warrants acceptance as fully skilled workmen in industry and as qualifying for membership of the appropriate trade union, and 52 as warranting recognition for semi-skilled work. The remaining craft trades are few, and account for relatively small numbers of tradesmen; the Services are, however, continuing discussions in order that these may, if possible, be recognised for civilian employment.

#### 2 Education and Training for Resettlement

(i) The Services are doing all in their power to encourage the Regular to improve his qualifications during his service. Their education scheme is an integral part of Service life, and is closely linked with the national education scheme. It is administered and conducted, mainly within Units and Education Centres, by the officers and other ranks of the Education Branches, assisted by lecturers and teachers provided through the Central Committee for Adult Education in H.M. Forces or by arrangement with Local Education Authorities; there are also educational courses outside the Unit, conducted under both Service and civilian auspices. All local educational facilities are open to conveniently stationed servicemen.

The Forces Correspondence Course Scheme administered by the Army provides at cheap cost many aspects of general, technical and vocational education. For courses not provided under the scheme, financial assistance may be given to men who enrol directly with a providing college. Libraries and information rooms are provided in all except small ships, units and establishments, and the Regular has available to him throughout his period of service the advice and, so far as conditions allow, the facilities which will prepare him for a better job when he leaves the Forces. In some cases arrangements are made for the individual Regular to have

the services of a tutor in a special subject. This educational service is constantly being improved and adjusted to meet more closely the Regular's varied needs, and is increasingly used and appreciated.

(ii) *The Ministry of Labour and National Service Permanent Vocational Training Scheme*.—The Ministry of Labour and National Service offers training courses in a wide variety of occupations and all which are suitable have been made available to ex-Regulars. At the moment some 1,200 ex-Regulars are taking advantage of these facilities annually. A review has recently been made of all Service Trades and occupations not recognised for skilled or semi-skilled civilian employment to see what help in resettlement can be given by additional training before or after leaving the Forces, usually by building on skill already acquired in the performance of Service duties. This possibility is being actively pursued.

(iii) *The Ministry of Labour and National Service Scheme of Business Training*.—This Scheme, run by the Appointments Department of the Ministry, provides theoretical and practical courses for men who wish to enter industry or commerce in junior executive positions. It was begun in April, 1949; up to the end of July, 1950, 301 men had completed their theoretical courses; of these, 160 had, up to 31st October, 1950, been placed in or had found employment and 84 had been placed in courses of practical training. In addition to these 84, 26 men had taken the practical course only.

### 3 Approaches to Industries and Services

In pursuance of the aims to which reference is made in the opening paragraph, the Ministry of Labour and National Service is engaged in approaches to all the main industries employing any appreciable number of men, and to any others which may be able to offer anything suitable to the ex-Regular. Reference is made later to these in more detail, but it may be said here that out of a total of about 13½ million men engaged in civilian employment, the industries which have already been approached employ about 9 million.

The covering Report refers to the proposal that employers should allocate a definite percentage of male engagements to ex-Regulars so as to provide an assurance for the future that the ex-Regular would get a fair share of employment at the time of his discharge. Considerable importance is attached to being able to demonstrate this convincingly to the man in the Services or who is thinking of joining them. With this aim in view, and with the approval of the Advisory Council, the Ministry of Labour includes in its approaches to those concerned with employment the suggestion of a voluntary quota scheme. This scheme envisages that a definite proportion of the engagement of male labour (usually 5 per cent.) should be allotted to ex-Regulars if suitable men are at the time available. This scheme is voluntary and entirely flexible; it is not intended that vacancies should be kept open until an ex-Regular is available, nor that any elaborate machinery should be set up to control it. The intention is rather that the industry should agree that over a period the aim should be to allot one in 20 of the vacancies over the whole sphere of employment to ex-Regulars.

Such a scheme is not appropriate in all forms of employment, particularly where the number of engagements of labour is small. Some employers, who are obviously concerned to help the ex-Regular, feel that the acceptance of the quota may lead to an appearance of bad faith if they have little or no employment to offer, although the quota does not guarantee employment, but only a share of such employment as may be available. In circumstances of this kind it is usually possible to obtain an assurance of good faith which will carry conviction. In addition to various means of providing employment, steps are also being taken to remove such impediments to the engagement or advancement of ex-Regulars as still exist and to find openings for the Regular of superior education, intelligence and experience, but without specialised skill or knowledge useful in civilian employment. In this way the man who is contemplating joining the Forces, or the Regular who is considering whether he should extend his period of service, may be assured of a welcome to civilian employment when he leaves the Forces, and he will know that the employer and his fellow-workers will recognise his right to equality with others and will put themselves to some trouble to see that he is satisfactorily resettled.

### 4 Government Service

Government Service has for long provided jobs for large numbers of ex-Regulars, but in the past these were largely in the lower grades. In 1949 some 7,500 ex-Regulars were placed in subordinate grades of the Civil Service, and approximately 3,000 in Government Industrial Establishments. Virtually all grades recruited by open competition are now open to the ex-Regular who has the requisite qualifications and who joined the Forces as a youth, as he is permitted to subtract from his actual age the period of his Regular service to bring him within the normal age limits. In addition, special examinations for ex-Regulars have been introduced for the grades of Executive Officer and Clerical Officer. In the Executive Class 15 per cent. of the places filled by examination are now reserved for suitable ex-Regulars, who may compete up to the age of 50 years. In the Clerical Class there is the same age limit, and 10 per cent. of the places are reserved for them. Following the 1949 competitions 131 ex-Regulars have taken posts in the Executive Class and 549 in the Clerical Class.

Discussions are now going on about the introduction of similar special facilities for ex-Regulars in other classes for which there are open competitions. For such schemes to be practicable it is necessary that there should be an appreciable number of vacancies and some assurance of an adequate number of suitable candidates.

### 5 Local Authorities and Statutory Bodies

(i) *Recruitment to the Administrative, Professional, Technical and Clerical Staffs of Local Authorities*.—A special scheme for the recruitment of ex-Regulars to the administrative and clerical staffs of Local Authorities in England and Wales has been approved by the National Joint Council for Local Authorities' Administrative, Professional, Technical and Clerical Services. This provides for the recognition of the Forces Preliminary Examination Certificate as qualifying for admission to the General Division of Local Government Service. Alternatively, a Regular may sit for the Clerical Division Examination of the Local Government Examinations Board. If successful, he is qualified for admission to the General Division and for subsequent promotion. The Examinations Board will also provide special introduction to Local Authorities for men seeking employment who have qualified under this scheme. The scheme has been recommended to the various Provincial Councils which have been asked to draw the attention of employing authorities particularly to: (a) the recommendation of the National Council that Local Authorities should, wherever possible, give employment to ex-Regulars; (b) the importance of their notifying vacancies to Employment Exchanges; and (c) the desirability of the larger authorities reserving a definite number of vacancies each year for ex-Regulars, provided that suitable candidates are forthcoming. The arrangements for implementing this recommendation are being worked out.

(ii) *London County Council*.—The London County Council gives an age concession to ex-Regulars who sit for the Major Establishment (Administrative) and Clerical examinations. In the last two Clerical examinations 53 of the 221 successful candidates appointed were ex-Regulars.

The London County Council has also agreed to give age concessions to ex-Regulars in filling posts for schoolkeepers and ambulance control clerks, the normal upper age limits for which are 40 and 27, respectively. They may be engaged as schoolkeepers up to the age of 50, and may deduct their period of service from their actual age for the ambulance control vacancies.

(iii) *Local Authority Manual Workers*.—The National Joint Industrial Council for Local Authorities Non-Trading Services (Manual Workers) for England and Wales has recommended Local Authorities to give the following preferences to ex-Regulars when engaging staff from outside their own establishments: (1) almost exclusive reservation of vacancies for messengers, porters, liftmen, attendants, storekeepers, caretakers and the like, subject to the existing rules about the employment of disabled persons; (2) in respect of other vacancies, provided all things are equal, preference to ex-Regulars as compared with other civilian applicants from outside their own staffs.

(iv) *Scottish Local Authorities*.—The two National Joint Industrial Councils for Local Authorities Services (Scotland), which cover Administrative, Professional, Technical and Clerical Staffs and Manual Workers, respectively, have recommended that sympathetic consideration should be given to suitably qualified ex-Regular applicants.

(v) *Police*.—The normal maximum recruitment age of 30 years can be extended for ex-Regulars. This permits the entry of those who serve for twelve years. The attention of Chief Constables has been drawn specially to the merits and claims of Regulars.

(vi) *Fire Service*.—The normal upper age limit of entry to the Service is 30 years, but under new Regulations ex-Regulars are eligible if under 35 years. This allows many ex-Regulars to join the Fire Service on completion of their reserve liability.

(vii) *London, Liverpool and Glasgow Salvage Corps*.—These, which are the only three in the country, have agreed to follow the practice of the Fire Service in recruiting ex-Regulars up to the age of 35 years and in granting modified pensions to men recruited above the age of 30 years who remain in the employment of the Corps up to the normal retiring age of 60 years. There were difficulties about pensions which the Corps went out of their way to overcome.

(viii) *British Broadcasting Corporation*.—The British Broadcasting Corporation has agreed that 50 per cent. of its vacancies for skilled and unskilled workers should carry a preference for ex-Regulars and that special consideration should be given to suitably qualified ex-Regulars in filling specialised vacancies.

(ix) *Colonial Development Corporation*.—A discussion with the Corporation showed that they were well aware of the merits of ex-Regulars and were employing them when opportunity offered.

(x) *Drainage and River Boards*.—The National Joint Industrial Council of Local Drainage Authorities and River Boards has recommended its members to reserve a definite proportion of their vacancies for permanent work for ex-Regulars.

(xi) *Other Authorities*.—The National Health Service and the Dock and Harbour Authorities have also been approached, but the discussions are not yet completed.

### 6 Nationalised Industries

The Nationalised Industries have in general accepted the principle that opportunities of employment appropriate to their age, experience and ability should be provided for ex-Regulars, and discussions on how it may best be implemented have been going on with the National Coal Board, the Railway Executive, Docks and Inland Waterways Executive, London Transport Executive, the Gas Council and the British Electricity Authority, and the Civil Airways Corporations. There have been the following results:—

The Railway Executive has informed its Regions that favourable consideration should be given to the recruitment of suitable ex-Regulars for employment as opportunity offers and that this is

to be regarded as a long-term policy. Opportunities of employment for ex-Regulars are very varied, particularly on the traffic side and in maintenance work. Some points remain to be settled, but there is no doubt that the Railways can offer opportunities to many types of ex-Regulars.

The London Transport Executive has agreed to reserve 5 per cent. of its male engagements for ex-Regulars, and in general to give them facilities for employment over a wide range of jobs.

The Docks and Inland Waterways Executive has instructed its Managers that they should co-operate fully with the Ministry of Labour and National Service in the resettlement of ex-Regulars. It has a wide variety of jobs to offer, particularly to Service tradesmen. It will also consider ex-Regulars up to about 30 years of age for posts in its clerical grade.

The National Coal Board offers vacancies for ex-Regulars in coal production, and has under consideration what facilities it can provide in its administrative and clerical work and its subsidiary operations.

The Road Haulage Executive, the British Electricity Authority, the Gas Council and the Airways Corporations are considering proposals put to them, but it is as yet too early to say with what results. The Airways Corporations already have special arrangements for recruiting air crew from the Services.

### 7 Privately Owned Industry and Services

Nearly all the large industries and services have been approached and have proved sympathetic to the general aim. Indeed, almost all have been anxious to obtain the services of more ex-Regulars than are now available. The following industries have, however, agreed to aim at the voluntary quota to which reference has already been made: Boot and shoe; cement; flour milling; malting; paper and paper board manufacture; two large manufacturers of photographic materials; a large glass manufacturer. The following have recommended their members to do everything possible to facilitate the resettlement of ex-Regulars: Retail distribution (England and Wales); brewing. Approaches have been made to the following: Bread and flour confectionery; catering;

## REVIEW OF THE MONTHLY STATISTICS

The following is a summary of the principal statistics of the month. Further details and analyses will be found on pages 61 to 81.

#### Employment

It is estimated that the number of persons in civil employment in Great Britain fell by 97,000 (37,000 males and 60,000 females) during December, the number at the end of the month being 22,145,000. The basic industries (mining, gas, electricity and water supply, transport, agriculture and fishing) showed a decrease of 7,000, manufacturing industries, a decrease of 29,000, and other industries and services a decrease of 61,000. The total working population, including H.M. Forces, the unemployed, and men and women on release leave who had not taken up employment, is estimated to have decreased by 64,000 from 23,289,000 to 23,225,000 (the figures for November and earlier dates have been revised—see page 61).

#### Unemployment

The number of persons registered as unemployed at Local Offices of the Ministry of Labour and National Service in Great Britain rose from 301,816 to 333,571 between 11th December, 1950, and 15th January, 1951. There was a rise of 24,976 in the case of males and 6,779 in the case of females.

#### Rates of Wages

The index of weekly rates of wages, based on June, 1947 (taken as 100), was 115 at the end of January, as compared with 114 at

## DEFENCE PROGRAMME

In a statement made in the House of Commons on 29th January the Prime Minister gave a broad indication of the scale of the new defence programme adopted by the Government. The text of the statement has been published as a Command Paper,\* a summary of which is given below.

#### Man-Power

The Prime Minister stated that, as a result of earlier measures, the numbers in the Armed Forces had been substantially increased, and would reach 800,000 by 1st April, 1951, as compared with the figure of 682,000 given in the last White Paper on Defence. The country was, however, without the reserves of officers and men with up-to-date training who would be required to fill out the existing formations in an emergency. There had not yet been time to build up these reserves, in accordance with the Government's long-term plan, from National Service men who had finished their service with the Colours. The Government now proposed to fill the gap by calling on a number of selected reservists who had the up-to-date training required, and by giving them a period of refresher training, so that, if an emergency arose requiring general mobilisation, they would be ready to take their place in the units in which they would have to serve.

Accordingly, the Government had decided to call up in the summer of 1951, for 15 days' training with the Army, up to 235,000 reservists, officers and men, the great majority being Class Z reservists who had been called up for service before the end of

\* Defence Programme. Statement made by the Prime Minister in the House of Commons on Monday, 29th January, 1951. Cmd. 8146. H.M. Stationery Office; price 4d. net (5d. post free).

chemicals; engineering; glass; iron and steel; the N.A.A.F.I.; oil; pottery; printing; radio; road passenger transport; sawmilling; tobacco.

### 8 Commerce and Finance

An approach has been made to representative bodies and to the large individual employers in this field of employment, including the banks, insurance companies of all types, insurance brokers and building societies. They have been asked (a) to give special consideration to ex-Regulars, and especially the older ex-officers, for any posts not requiring specialised knowledge of the business for which they would normally go outside their own staff; (b) to give special consideration on their merits to ex-Regulars, up to the age of just over 30, who appear to have the necessary qualities to succeed despite a late start on work requiring long and specialised training; (c) to give a high degree of preference to ex-Regulars for such jobs as messengers, as most of them already do.

Discussions are not complete, and whilst it is clear that the number of vacancies under (a) and (b) cannot be large, it is hoped that a new field of employment will be opened for the better educated ex-Regular, including the ex-officer. Some insurance companies have agreed to consider specially suitable candidates and there has been a sympathetic response from the Building Societies Association and the Corporation of Insurance Brokers, who have commended ex-Regulars to their members.

### 9 Conclusion

It is the aim to approach all the main forms of employment, in order to be able to show that none of them is barred to the Regular who has the necessary qualities or potentialities for it. As new opportunities become available and arrangements are made, they are brought to the attention of Employment Exchanges, the National Association for the Employment of Regular Sailors, Soldiers and Airmen and, by means of the Services Resettlement Bulletin, to the Resettlement Authorities in the Services.

At the end of December, 1950. The changes in rates of wages reported to the Department during the month resulted in an aggregate increase estimated at £564,000 in the weekly full-time wages of about 1,849,000 workpeople. The principal increases affected workpeople employed in coal mining, the cotton industry, road passenger transport services, the iron and steel industry, the wool textile industry in Yorkshire, and laundries.

#### Retail Prices

At 16th January the interim index of retail prices, based on 17th June, 1947 (taken as 100), was 117, compared with 116 at 12th December, 1950, and with 113 at 17th January, 1950. The rise in the index during the month under review was due to increased prices for many articles, including vegetables, rabbits, fish, fruit, clothing and household textiles, shoe repairs and laundry charges.

#### Industrial Disputes

The number of workers involved during January in stoppages of work arising from industrial disputes (including those thrown out of work at the establishments where the stoppages occurred) was about 24,000. The aggregate time lost during the month at the establishments where the stoppages occurred was about 84,000 working days. The number of stoppages which began in the month was 129, and, in addition, 4 stoppages which began before January were still in progress at the beginning of the month. The stoppage involving the greatest loss of time during the month was that of aircraft workers at Belfast.

1948. Of these, some 80,000 would do their training in the Territorial units and formations with which they would actually serve if war broke out. Similarly, 40,000 reservists would be called up for training in the Anti-Aircraft Command, and about 115,000 for training with Active Army formations in the United Kingdom and with various technical, administrative and fighting units which would be required in war to support the Forces overseas and at home. In addition, the Royal Air Force would recall for 15 days' training about 10,000 officers and men who would be required to man the Control and Reporting Organisation in emergency; these men would be drawn from the Class G reservists, the equivalent of Army Class Z.

As the Class Z and G reservists affected by the Government's proposals would be specially selected trained men, required to serve exceptionally in peace-time, they would receive the normal regular rates of pay and allowances, together with a bounty of £4. By arrangement with the Ministry of Labour and National Service, no Class Z or G reservists would be recalled who would be reserved for industry in the event of a general mobilisation. The men to be called up would be notified as early as possible and would be given the maximum notice of the dates on which they were to join their units. Cases of hardship would receive sympathetic hearing. The legislation which would shortly be introduced to give effect to the Government's proposals would confer on these men the same protection against loss of employment or holidays on account of their training which was enjoyed by National Service men summoned for training during their part-time service.

The Prime Minister added that a selective call-up was planned, the purpose being to select those officers and men whose qualifications and experience in their rank, trade or arm of the Service

fitted them to fill the existing gaps in the formations and units as they now stood. The selection would therefore necessarily involve some element of discrimination between man and man, since the basis of selection would have to be the actual requirements of the Services. The officers and men selected would be, in fact, those who, by virtue of their qualities and experience, could best fulfil the country's need at the time.

Some members of the Regular Reserve and Auxiliary Forces would also be called on to make their contribution. The Royal Navy would call up about 6,000 men from the Royal Fleet Reserve for about 18 months' service with the Regular Forces. It would also need, for 18 months, about 600 officers from the emergency list of the Royal Navy, the Royal Naval Volunteer Reserve or the Royal Naval Volunteer Special Reserve. It was hoped that a good proportion of the reservists would be obtained by a call for volunteers. The officers and men of the Royal Auxiliary Air Force, about 2,300 in number, would be called up for three months' continuous training. The Royal Air Force would also recall for three months' refresher training about 1,000 aircrew reservists of the Regular and Volunteer Reserves. In addition, about 200 regular and volunteer reservists might be recalled for flying instruction duties for periods up to 18 months; it was hoped that a good proportion of these would be volunteers.

For the time being, it would be necessary to continue the practice, adopted at the beginning of the fighting in Korea, of retaining Regulars beyond the normal expiry of their Colour service; but this additional period of service would not exceed 18 months in the Royal Navy, between 12 and 18 months in the Army, and 12 months in the Royal Air Force. The Regular reservists already called up by the Navy and Army for the Korean emergency would be released after they had completed a similar period of service.

#### Production

The Prime Minister said that there was urgent need of an increased production programme concentrated mainly on increasing the fighting strength of the Forces, which, for the last five years, had been living largely on their stocks of equipment. It was intended to carry out this production programme to the limit of the resources under the control of the Government. The completion of the programme, in full and in time, was dependent upon an adequate supply of materials and components and, in particular, on the early provision of machine tools, many of which could only be obtained from abroad.

If the Government's plan were fully achieved, expenditure on production for the Services in 1951-52 would be more than double the rate for the current year, and by 1953-54 it should be more than four times as great. The Prime Minister indicated briefly the scope of the production programme, which covered combat vehicles and aircraft, weapons, measures to counter the submarine and mining menace, and stores, clothing and equipment for the Services. It was also intended to accelerate as far as possible the measures already in hand for accumulating stocks of food and raw materials.

#### Civil Defence

As the emphasis of the Government's policy was upon the strengthening of the active defences, and as there were limits to the resources which could be applied to defence purposes in time of peace, no general acceleration of Civil Defence was proposed. The Government would, however, press on with Civil Defence planning and would accelerate those Civil Defence measures which directly supported the efficiency of the Armed Forces, in particular, communications, the control network and the warning system. In addition, a start would be made in building up stocks of some of the essential equipment required by the Civil Defence services.

#### Total Cost

Over the whole field of military and civil preparations for defence, apart from the building up of stocks, it was estimated that expenditure in the financial year 1951-52 would be in the neighbourhood of £1,300 million. During the three following years expenditure on production would be on a rising curve. If the programme were fully achieved, the total defence budget over these three years, covering all the military and civil preparations but excluding stockpiling, might be as much as £4,700 million. The Prime Minister pointed out, however, that limitations on production might make it impossible to spend that sum within the period in question.

#### Administration.

The acceleration of defence preparations would involve an increased call on the already strained resources of experienced staff, administrative, technical and other. The requirement could not be met without a diversion of effort from peace-time activities, and Ministers would have to consider to what extent they could

### ACTIVITIES OF THE NATIONAL JOINT ADVISORY COUNCIL

The National Joint Advisory Council, representing the British Employers' Confederation and the Trades Union Congress together with the nationalised industries, held a quarterly meeting on 31st January, 1951, under the chairmanship of the Minister of Labour and National Service. Notes on some of the subjects considered are given below.

#### Man-power for the Defence Programme

The Council again considered the man-power aspects of the rearmament programme, on which it had held a preliminary exchange of views at its meeting in October, 1950.

It was recognised that a large part of the additional man-power to be employed on work for the defence programme might be obtained by the switch within a factory of its existing labour force from civilian to defence production. On the other hand, the actual numbers to be employed in some undertakings would have to be raised. This increase could be effected to some extent by drawing

discontinue or retard the peace-time activities of their Departments to free staff for defence work. It might be necessary for local authorities to make a similar diversion of effort to defence planning.

#### Economic Implications

The statement concluded with an indication of the effect of the Government's programme on the national economy. The programme would impose upon it a heavy and growing burden at a time when a further large increase in exports was needed to meet the rapidly rising bill for imports. The Government were determined that the country should carry as much of the load as possible at the present time, without running into debt abroad or reducing investment upon which industrial efficiency depended. The task would be of great difficulty as the engineering and metal-using industries, which would have to carry most of the increased defence orders, were those on which reliance was placed for the largest contribution to exports and industrial equipment. The measures which it would now be necessary to take would therefore be far-reaching and would affect every citizen and almost every industry. There would have to be financial measures to check civilian demand, and, in addition, a series of more direct economic measures.

Sections of the engineering industry, especially those producing aircraft, vehicles, radio and radar equipment and machine tools, would have to be turned over progressively to defence production. Some new factories would have to be built, but for the most part it would be necessary to rely on existing capacity. Much of the new work under the programme would have to replace work that was already going on. This would inevitably reduce the exports of the industries concerned, particularly at a time of scarcity of labour and materials. It would accordingly be necessary to call upon the rest of industry in two ways. In the first place, when the main contracts had been placed, those sections of the engineering industry now engaged in producing goods for current consumption would have to take some of the strain of producing components, etc., under sub-contracts. Secondly, these and other industries, such as the textile industry, would have to expand their exports still further.

In this way the Government would aim at maintaining a balance in the overseas accounts, at the expense primarily of home consumption, although some reduction in the supply of plant and machinery would be inevitable. There would also have to be some reduction in the civil building programme, although every effort would be made to avoid large and widespread interference with it. The Prime Minister added that to achieve these ends it would be necessary to re-impose many of the controls used during the war. Allocations of some raw materials had already been introduced, and others would probably be necessary to ensure that defence needs were met. Some less essential production, especially for the home market, would have to be reduced or stopped, by limitation of supply orders and the prohibition of certain end-uses. Factory and storage space would be requisitioned where necessary. If, as the programme developed, it appeared that exceptional measures were necessary to ensure the availability of labour, the Government would not hesitate to take them.

The fulfilment of defence orders would have to be regarded as of special importance and carried through with all possible urgency. Some firms, for their own protection, would have to be given directions about the volume of defence orders which they must accept and the timing of these in relation to other orders. In cases where there was a doubt whether defence orders should have preference over other obviously important orders, such as equipment for a generating plant or an export of special importance, the necessary guidance should be obtained from the Supply Department. It would thus be ensured that the defence programme was carried through without introducing the idea of an "over-riding priority" for defence, which, as the experience of the last war showed, created more problems than it solved.

The Prime Minister pointed out that the programme would have far-reaching effects on the pattern of industry. To carry it through effectively and smoothly, the Government would need, and look for, the fullest support and co-operation from managements and workers. Both sides of industry would be taken fully into consultation at every stage of the programme. In preparing the programme, the Government had weighed very carefully its probable effect on the social and economic standards of life in this country, and it could not be denied that the standard of living would be affected and that it would be necessary for all to make some sacrifices in the face of rising prices and shortages of consumer goods. If, however, the heavy burden were carried in the way suggested, the recovery which had been made in the last few years would not be destroyed, and the future strength of the national economy would not be imperilled.

on the man-power rendered redundant in other employments as a result of the controls which must necessarily be imposed on certain raw materials of which supplies were scarce. There would, nevertheless, be need for substantial numbers of additional workers and for the most efficient use of existing labour, if the competing demands of defence, exports and domestic consumption were to be met.

The Council agreed that the following action might be recommended with a view to enabling employers and trade unions to assist in achieving the necessary production:—

1. The Council should, in the interests of both sides, draw the attention of its constituent members to the desirability of advance notification of redundancy and also of advance registration of workers likely to become redundant, so as to reduce to a minimum any periods of unemployment between jobs and enable the Employment Exchanges to place the workers concerned so far as possible in important work which would make full use of their skill. The

Council would distribute to these constituent members copies of a letter which it was suggested the Minister should address to the British Employers' Confederation and the Trades Union Congress on this subject.

2. Schemes of training, upgrading and dilution should be developed by different industries, supplemented in suitable cases by training on the lines which proved successful in the last war in Government Training Centres, in order to overcome the scarcity of skilled workers.

3. There should be an extension of the arrangements already existing in certain industries to facilitate, by adjusting the hours of work, the employment of women with domestic responsibilities (but not women with very young children) in view of the fact that more women workers will be needed as the programme develops.

4. Women should be employed to a greater extent on appropriate semi-skilled processes, and training should be provided for them both within industry itself and in Government Training Centres.

5. Each industry should be asked to consider through its appropriate machinery whether the extension of hours of work by the introduction of systematic overtime where suitable would be of assistance in increasing production.

6. The Council should use its influence with both sides of industry in emphasising the importance of avoiding unfair competition in the recruitment of labour.

7. The Council should recommend industries to consider what measures were desirable in order to secure the most efficient use of present labour forces.

#### Class Z Recall

The Council received a report, following the Prime Minister's announcement on 29th January\*, about the recall of certain reservists (mostly from Army Class Z or the corresponding Royal Air Force Class G) for 15 days' training.

Although the calling up of these reservists is bound to involve some disturbance both to the reservists themselves and to industry, it is pointed out that the total loss of man-power to industry, measured in terms of man-weeks, will not be very great. Further, the fortnightly training periods will be spread over at least six months, and the long notice which will be given to the men concerned will allow time for any adjustments needed to reduce the inconvenience to industry and individuals.

Steps will, however, be taken to reduce the disturbance to a minimum. The Service Departments will do their best to meet any serious difficulties which an employer might encounter owing to the simultaneous absence of a number of workers on Service training, and to protect the civilian rights of the reservist himself.

Discussion turned on the question how employers would know which of their workers would be withdrawn for training and which would be called up immediately, in the event of an emergency embodiment of the Reserves. The answer to this was that notice would be given to reservists of their coming recall for training in ample time for employers to make any arrangements required, and that those recalled for training would not necessarily be those who would be called up on embodiment.

The Council was informed that both sides of the Council would be consulted as soon as possible as to the classes of Z reservists to be reserved for industry.

#### Man-power Statistics

The Council agreed that the Ministry of Labour and National Service should resume the collection from employers in the manufacturing industries of regular information about employment on munitions and equipment for the Forces.

During most of the last war and until early in 1947 employers were asked to state each month on their man-power returns what proportion of their total labour force was engaged on orders placed by the Supply Departments. In view of the new situation created by the present rearmament programme, it was decided that employers should be asked once every quarter to state on their current monthly man-power return the percentage of their total labour force employed on defence contract work. Information so obtained would enable a watch to be kept on the progress in the redeployment of labour for war production and on the impact of the rearmament programme on the national economy as a whole, while at the same time assisting the Ministry in devising means of overcoming any particular labour shortages that might arise.

#### Employment of Older Workers

The Council was consulted by the Minister on a number of questions relating to the employment of workers over the pensionable ages (men, 65; women, 60), not merely because of its bearing on labour supply for the defence and export programmes, but also because of the increasing span of life and the rising standards of health and fitness of older people.

In a Memorandum on the subject it was pointed out that the expectation of life of a man of 65 at present is 12½ years while that of a woman of 60 is no less than 18 years; and the tendency of these figures is to rise. In view of the corresponding prolongation of the capacity for work, it is necessary to revise traditional attitudes towards old age and retirement. Moreover, the proportion of older people in the population tends to increase. In 1911 the persons over the pensionable ages mentioned above represented 67 per thousand of the population; in 1947 the figure was 131 per thousand; and it is estimated that by 1977 it will be 192.

The Council considered that this question needed serious attention, particularly in view of the man-power needs of the defence programme. It was agreed that a number of special measures which might be taken should be further considered at a meeting of the Joint Consultative Committee.

### NUMBERS UNEMPLOYED AT 11th DECEMBER, 1950: ANALYSIS FOR REGIONS AND DEVELOPMENT AREAS

#### Duration of Unemployment and Ages of Unemployed

In last month's issue of this GAZETTE (page 8) figures were given analysing the number of insured persons registered as wholly unemployed in Great Britain at 11th December, 1950, according to age and the duration of the last spell of registered unemployment.

The Table shows considerable differences between various parts of the country in the age-distribution of the unemployed. In Wales nearly 68 per cent. of the total number of unemployed men were over 40 years of age, and in the South Wales Development Area the proportion was more than 70 per cent.

Continuous unemployment of more than six months' duration is experienced by relatively few men under 40 years of age. In eight Regions, over 80 per cent. of the men who at 11th December had been unemployed for more than six months were over 40 years of age, and in two other Regions the proportion was above 75 per cent.

Prolonged unemployment was heavily concentrated in the Development Areas. The total number of men who had been unemployed for more than six months was 51,138, of whom 37,122 were in the North-Western and Northern Regions, and Scotland and Wales, and within those Regions 29,535 were in the Development Areas.

In all Regions and Development Areas the men whose unemployment had been of short duration were, in the main, much younger than those whose unemployment had lasted longer. In Scotland (where the average age of unemployed men was lowest) 41 per cent. of the men who had been unemployed for eight weeks or less were over 40 years of age, while the corresponding proportions for the "8-26 weeks" and "over 26 weeks" categories were 53 per cent. and 72 per cent., respectively.

Among women there was practically no long-term unemployment in the South, the Midlands and the East and West Ridings of Yorkshire. Of the 9,418 women who had been unemployed for more than six months, 7,154 were in the North-Western and Northern Regions, and Scotland and Wales, and within those Regions 5,960 were in the Development Areas.

#### Turnover Among the Unemployed

Comparison of the numbers who, in December, 1950, had been unemployed for more than six months with the total numbers unemployed in June, 1950, shows the extent to which unemployed persons found work (or ceased to register) during the half-year.

Region or Area	Total number wholly unemployed at 12th June, 1950		Percentage who had found work (or ceased to register) by 11th December, 1950	
	Males	Females	Males	Females
	London and South-Eastern	33,237	13,393	85.6
Eastern	6,447	2,547	82.9	94.2
Southern	6,472	4,076	79.2	88.9
South-Western	8,782	3,858	74.5	89.1
Midland	6,605	2,424	86.6	94.1
North-Midland	5,174	1,555	81.4	95.4
East and West Ridings	10,832	3,600	75.2	87.9
North-Western	30,076	12,554	75.8	89.2
Northern	22,466	8,519	67.0	83.1
Scotland	40,509	14,667	66.7	82.4

West Cumberland	839	243	65.4	79.8
South Lancashire	2,095	988	61.0	86.2
Merseyside	16,282	6,402	76.4	87.4
Wrexham	566	402	50.7	79.4
Scottish	27,405	10,320	63.8	80.0
Total, Development Areas	84,910	33,922	65.2	82.4

The Table shows that, in the country as a whole, nearly three out of every four men who were unemployed in June, 1950, had found work by December, 1950. The proportions who found work in the second half of the year varied between the maximum of 87 per cent. in the Midland Region and the minimum of 59 per cent. in Wales.

The percentages for females were considerably higher than those for males, but this is partly due to the fact that some women discontinue registering when they cease to be entitled to unemployment benefit. The geographical comparisons are similar to those for males, the southern half of England having a higher rate of turnover than other parts of the country.

In Wales, the proportion of women who found work in the half-year was 81 per cent., as compared with the average of 88 per cent. for the whole country.

## THE EMPLOYMENT OF BLIND PERSONS

On 1st June, 1948, the Minister of Labour and National Service announced that he had appointed a Working Party, under the Chairmanship of Mr. W. Taylor, C.B., Under Secretary of the Ministry of Labour and National Service, to investigate the facilities existing for the employment of blind persons in industry and in public and other services, and to make recommendations for their development (see the issue of this GAZETTE for June, 1948, page 195). The Report of the Working Party, which was submitted to the Minister last October, has recently been published\*. The Report states that from the outset it became clear to the Working Party that their investigations must cover a wide field; they therefore included within the scope of their inquiry whatever factors appeared to have contributed to the existing employment situation or to be likely to affect the employment of blind persons in the future.

Under the Blind Persons Acts, 1920 and 1938, a blind person is defined as "a person so blind as to be unable to perform any work for which eyesight is essential". This definition has been retained in the National Assistance Act, 1948. It is, however, important, the Report states, to bear in mind that only a small proportion of the blind have no sight at all, and that, as they are in fact very much like sighted persons, it is a mistake to think of the blind as a special class or as all alike. Although blind persons have been employed in special workshops and in various professional, commercial and other occupations for many years, it was not until 1940 that any substantial progress was made in placing blind people in employment in open industry. As a result of careful research and training it was found possible during the war and afterwards to employ blind workers on jobs for which sight had previously been thought essential.

At 31st March, 1949, the total number of registered blind persons in England and Wales was 78,579 (36,464 males and 42,115 females) and in Scotland 8,596 (4,392 males and 4,204 females). These figures represented 0·17 per cent. of the total population both in England and Wales and in Scotland, but the percentage varied in different age groups. Of the total number of registered blind persons in Great Britain, approximately 36,400 (19,700 men and 16,700 women) were within the normal working age-range of 16 to 65. About 25,000 of these were unemployed, including 22,000 who were classified as unemployable. In order to obtain additional information about these unemployed persons, the Ministry of Labour and National Service and other competent authorities, at the request of the Working Party, made a new and independent scrutiny of the registration particulars of about 23,800 unemployed blind persons, with the result that over 3,000 were found to be employable under certain circumstances, i.e., provided work was available in the area, or escort or accommodation was provided or the persons were rehabilitated and/or trained. The Working Party conclude that the total number of blind persons who are already in employment or in training for employment or who are capable of employment is of the order of 14,000.

The Report states that rehabilitation, or the instruction of the adult blind person in how to adjust himself to blindness, is the

\* Ministry of Labour and National Service. Report of the Working Party on the Employment of Blind Persons. H.M. Stationery Office; price 1s. 9d. net (1s. 11d. post free).

essential preliminary to any vocational training, and that this may be obtained at home or with others at a training centre or residential establishment. The only residential establishment in England and Wales, set up specifically for the rehabilitation of civilian blind persons, is the Queen Elizabeth Home of Recovery for the Blind at America Lodge, Torquay, which is run by the National Institute for the Blind. This establishment is recognised by the Minister of Labour and National Service as an establishment providing industrial rehabilitation of the type which he is empowered to give under the provisions of the Disabled Persons (Employment) Act. The Minister takes financial responsibility for the blind attending the courses in order to fit themselves for employment, a training fee is paid to the National Institute for the Blind, and the trainees receive training allowances. Reference is made to the group rehabilitation for the blind which is being conducted experimentally by the London County Council. The Working Party consider that an efficient home teaching service is essential to rehabilitation. They also consider that a further centre for residential rehabilitation should be established in a geographical position more convenient for blind persons living in the North of England, which should provide accommodation for not less than 50 to 60 blind persons at any time.

In the view of the Working Party, some form of training preceded by a course of rehabilitation is usually essential before a blind person is ready to take up employment. The Minister of Labour and National Service is empowered to provide facilities for the training of disabled persons aged 16 and over who are in need of training in order to render them competent to undertake employment, or work on their own account, of a kind suited to their age, experience and general qualifications. The Report describes the training facilities in various occupations which are available for civilian blind persons, and refers to the importance of maintaining the highest possible standards of training, with a view to developing good working habits and establishing self-confidence in the blind person and to satisfying the up-to-date needs of trades and professions.

The Report notes that the placing of blind persons after training was undertaken by specialist placing services in some areas during the war. Experience has shown that such services, working in co-operation with the Disablement Resettlement Officers of the Ministry of Labour and National Service, provide the most efficient means of finding employment for the blind, and the Working Party recommend that they should be developed or introduced in all parts of the country. The Report describes in some detail the openings for the employment of blind persons in commercial and industrial occupations, including shorthand-typing, telephony, piano tuning, factory employment; in professional and administrative occupations such as the law, the Church, teaching (including the home teaching of other blind persons), physiotherapy, and music; in business management and shopkeeping; in rural occupations; and in the public services. A brief account is given of the work of the two voluntary organisations, St. Dunstan's and the Scottish National Institution for the War Blinded, which have assumed complete responsibility for the rehabilitation, training, placing and after care of men and women members of the Armed Forces blinded as a result of war service, and for members of the Civil Defence Services blinded on duty.

Facilities exist in England and Wales for the education of blind children and adolescents from the age of two years to 16 (or in the case of secondary grammar schools to the age of 19 or over) and for further education, together with technical training, from the age of 16 to about 21. In Scotland all blind children remain at school until 18. With regard to the training of blind adolescents, the Working Party consider that the attainments, capacities and interests of the child should be taken into account when deciding the nature of the employment for which he should be prepared. Each child for whom industrial employment seems appropriate should have opportunity to choose between sheltered and open employment. It is considered that a basic training syllabus could be worked out which would include exercises to promote general manual skills, an introduction to the use of tools, and some instruction in the traditional handicrafts practised in sheltered workshops. At a later stage the instruction should be more specifically related to the employment selected.

The Working Party consider that from the age of 16 years blind children should be brought into continually closer association with sighted children, and that training designed to foster independence in adult life should be introduced or extended. Trainees should be treated as young adults and given appropriate training allowances. The Working Party contemplate the provision of establishments, independent of any school or other training institution, which should provide not only for general education but also for vocational guidance, basic occupational training and training in social development. It is suggested that two such centres for prevocational training should be set up in England and Wales and one in Scotland. Adolescents should not need to spend a longer time in them than was necessary to bring them to the point at which a definite choice of vocation could be made, for which it is suggested that the appropriate age should be 18, as in the present Scottish practice, rather than 20 or 21.

The Working Party say that guide dogs have enabled a number of blind persons to undertake employment, but that it would be wrong to suggest that it is essential for a blind man to possess a dog before he can go out to work. Many blind persons prefer not to have a dog, and whether the possession of a guide dog is desirable is largely a matter of individual temperament.

## RECENT COLLECTIVE AGREEMENTS

### Cotton Industry: Training of Assistant Spinners in Mule Spinning Rooms

An agreement, operative from 15th January, has been made between the Federation of Master Cotton Spinners' Associations Ltd. and the Amalgamated Association of Operative Cotton Spinners and Twiners for the training and introduction of assistant spinners in mule spinning rooms. The purpose of the agreement, which is based on schemes already functioning satisfactorily at individual mills, is to provide for the intensive training of assistant spinners and an increase in the number of these workers employed in mule spinning rooms, so that the restarting of stopped mules may be facilitated. The text is as follows:—

It is hereby agreed that the training and introduction of assistant spinners in mule rooms shall be carried out in the following manner:—

#### Clause 1. Training Scheme for Assistant Spinners

The parties to this agreement recommend their respective members to adopt a training scheme to enable males or females to be introduced as assistant spinners within a short period of time.

#### Clause 2. Age at Entry and Compulsory National Service

(a) Age at Entry. No person shall be eligible for engagement under this agreement as a trainee unless he has attained the age of 18 years.

(b) Compulsory National Service. In the event of the training or introductory period being interrupted by compulsory National Service, the trainee shall be entitled to return to his employment to complete the period of training or introduction as though his employment had been continuous.

#### Clause 3. Wages of Trainees

Until appointed to be an assistant spinner, the trainee shall be paid 90 per cent. of the appropriate current full staff assistant spinner rate for his age and the length of mule on which he is training. Both male and female trainees shall be treated alike.

N.B.—The scheme is not applicable to those entering the industry as ancillary workers or mule assistants, but only to personnel for whom there is a definite assistant spinner vacancy as soon as they have completed the period of training.

#### Clause 4. Training Pair and Instructor

One or more pairs of mules may be set aside for training purposes and the spinner on the pair will receive during the training period payment at the rate of his actual average earnings during the preceding four full weeks plus an instructor's allowance of 7s. 6d. per week.

#### Clause 5. Assistant Spinner—Training Allowance and Absentee Money

(a) During the training period, the assistant spinner shall receive an allowance of 2s. 6d. per week.

(b) In computing the assistant spinner's absentee money, the trainees shall be ignored.

#### Clause 6. General Conditions Relating to Training

(a) Maximum Number of Trainees. The maximum number of trainees on a pair of mules at one time shall not exceed three.

(b) Training Period. The training shall extend over a period of thirteen weeks and so far as possible trainees shall be introduced at varying intervals in order to ensure that the spinner will have ample opportunity to attend to new entrants.

(c) Training Programme. The training programme shall cover all the normal duties performed by a mule assistant and an assistant spinner, but every available opportunity shall be taken to instruct the trainee in the running and basic principles of the mule. The training programme shall be a matter for arrangement between the management and the instructor.

(d) Staffing on the Training Pair. The staff on a pair of mules set apart for training shall consist of at least a spinner and assistant spinner.

#### Clause 7. Introduction of the Trainee as an Assistant Spinner

After the completion of the training period, the trainee shall be put on a pair of mules as an assistant spinner at the full list rate of wages and appropriate absentee money.

The following wage payments and allowances shall be made to the spinner to whom the trainee is allotted as an Assistant Spinner:—

1st to 4th week inclusive	Average full staff wage calculated by reference to the preceding four full weeks, plus appropriate absentee money, plus 7s. 6d. per week.
5th to 16th week inclusive	Normal piece work rates, plus 12s. 6d. per week, plus appropriate absentee money.
17th to 28th week inclusive	Normal piece work rates, plus 7s. 6d. per week, plus appropriate absentee money.
29th to 40th week inclusive	Normal piece work rates, plus 5s. per week, plus appropriate absentee money.
41st and subsequent weeks	Normal piece work rates, plus appropriate absentee money.

#### Clause 8. General

(a) Commencement. This agreement shall come into force on 15th January, 1951.

(b) Amendment. This agreement may be amended at any time by mutual consent.

(c) Termination. This agreement may be terminated by either party giving in writing twelve weeks' notice to the other party.

(97206)

### Building Industry: Incentives Bonus Payments

In the issue of this GAZETTE for November, 1947 (page 366), particulars were given of the agreed terms of settlement dated October, 1947, which authorised the introduction of incentive systems of bonus payments in the building industry in England and Wales. The basis of these systems is indicated in the addition which was made to the national working rules by the National Joint Council for the Building Industry in the following terms, with effect from the beginning of the pay week following 17th November, 1947:—

"Notwithstanding any restrictions (regional, local or sectional) in existence at November, 1947, any employer may, in respect of work on a particular site, job, shop or factory, initiate an incentive system of bonus payments proportionate to the results achieved in performing a definite task, allotted either to an individual worker or to a gang of workers or to a team comprising all the men working on that site, on the basis of giving an operative of average ability and capacity a reasonable opportunity to achieve on such work earnings 20 per cent. higher than those yielded by the normal prescribed hourly rate, provided always that the detailed conditions, to be observed in connection with such systems, shall be as recorded in the Terms of Settlement of October, 1947, between the Adherent Bodies and separately published."

It was agreed at the time that the systems were to be regarded as experimental for a period of two years. A review of the operation of the systems has now been completed, and a settlement between the parties, dated 11th January, 1951, has been reached as to the basis upon which they are to be continued and extended. The text of the settlement is given below.

## INCENTIVES BONUS PAYMENTS

### SETTLEMENT BETWEEN NATIONAL FEDERATION OF BUILDING EMPLOYERS AND OPERATIVES

#### Sub-contracting for Labour only\*

(a) The Employers' Federation will issue a pronouncement to all their members that they share the view, strongly urged by the Operatives' Federation, that the piecework type of labour-only sub-contracting is liable to abuses and, provided that bona fide sub-contracting (whether including materials or not) is adequately safeguarded, should be under more effective control. The essential factor in such control is that the individual labour-only sub-contractor must be prepared, if called upon, to prove his bona fides.

(b) The Operatives' Federation will at the same time record, and intimate to all concerned, that their objection to labour-only sub-contracts does not extend to the genuine type of such sub-contracting, customary in the building industry, in which bona fide firms are the sub-contractors.

(c) In the light of the pronouncements indicated in (a) and (b) above, both Federations agree that cases of doubt or difference, as to the genuine character of the sub-contract or the bona fide status of the sub-contractor, shall be brought before Local Joint Committees (or, where no Local Joint Committee exists, before the Regional Joint Conciliation Panel) which shall have the primary duty of assessing the merits of each case and dealing with it accordingly. Thereafter any reference arising would be for the ordinary Conciliation machinery.

#### General Principles concerning Incentives

Having reviewed the Incentives position, the parties have jointly reached the following conclusions:—

(1) Experience of operating the 1947 Settlement has shown that well-organised schemes of Incentive Payments have resulted in increased production as well as higher earnings.

(2) Therefore, provided that the best practice is more generally followed, the Federations on both sides are in favour of extending, where practicable, the system of bonus payments related to output. Subject to the modifications and additions contained in the present document they confirm and renew the principles set out in the 1947 Settlement (which, as so modified, will be reprinted as part of this Settlement).

(3) While continuing, and endeavouring to extend the operation of, the main principles of the provisions in the 1947 Settlement, it is recognised (a) that the Incentives system is still experimental in this industry and the process of improving and adapting it must be carried out in stages; (b) that, at the present stage, it is undesirable to attempt to lay down a precise and detailed scheme on a National basis (and for the time being is probably impracticable on a Regional or even a Local basis).

(4) At the present stage the main task must therefore be to provide more effective machinery for ensuring (i) that the agreed principles are well understood by building firms and their operatives, (ii) that bonusing arrangements are on a satisfactory basis (yielding higher earnings for higher output), and (iii) that such satisfactory schemes of bonusing become general practice. It is recognised that both sides have a joint interest in achieving these objects.

#### New Machinery—Regional Joint Advisory Panels on Incentives Payments

(5) In furtherance of the principles stated in (1) to (4) above, it is agreed that, although the decision to operate a Bonus scheme

\* Under this system a sub-contractor undertakes the supply of labour in a particular craft, the main contractor supplying the material.

A\* 4

will remain the responsibility of the individual employer and although the arrangements in furtherance of a scheme will remain as between the employer and his operatives on the site, the Federations will set up in each Region special Joint Advisory Panels on Incentives Payments (hereinafter referred to as "Incentives Payments Panels") from which guidance can be sought in the following circumstances :—

(a) Where the operatives on a site are aggrieved by the bonusing scheme operated there, they may request the District Organiser of their Trade Union to discuss the position with the employer. If no settlement follows from such discussion then either the District Organiser or the employer may report the disputed issues to the appropriate Incentives Payments Panel for that Region, which will examine the facts and give guidance thereon to those concerned. (Those presenting the facts to the Panel must include operatives from the site itself.)

(b) Where the operatives on a site are aggrieved because of the absence of a bonusing scheme and seek advice accordingly from the District Organiser of their Trade Union, he may discuss with the Employer the reasons for the absence of a scheme and, if they are unable to agree about the possibilities of introducing a scheme, may report thereon to the appropriate Incentives Payments Panel for that Region, which will ascertain the employer's position and give guidance accordingly.

(c) Where an employer is aggrieved by non-co-operation of his operatives (or a section of them) in the starting or carrying out of a bonusing scheme he may report the matter to the appropriate Incentives Payments Panel for that Region, which will examine the facts and give appropriate guidance thereon to those concerned.

It is to be clearly understood that, if a scheme is in operation and no requests are made to the District Organiser of the Trade Union, there will be no question of intervention by Regional Incentives Panels. Similarly, an Incentives Panel will not approach employers concerning the absence of a scheme unless it receives a report from the District Organiser of the Trade Union whose members are involved. On the other hand, it will be open to an employer needing guidance as to the feasibility of operating a scheme to seek such guidance direct from the appropriate Regional Incentives Payments Panel.

(In the case of certain large cities, or where otherwise jointly deemed desirable, Regional Incentives Panels shall be empowered to delegate their functions to such Panels as they agree to be appropriate.)

(6) It shall be open to Regional Incentives Panels to make joint submissions, upon problems of general principle arising from cases reported to them, to the sub-committee of the Executives provided for in (8) below.

(7) In view of the setting-up of the new Incentives Panel machinery it is agreed to discontinue the existing provision that particulars of schemes have to be lodged with the Regional Employers' Secretary.

#### Provision for Reviewing the Arrangements

(8) The foregoing agreed arrangements being regarded as still on an experimental basis, it is agreed to appoint a joint sub-committee of the Executives of the Federations on both sides (of five each side with Officials) charged with the duty of reviewing the progress made and rendering reports to the full Joint Executives concerning any further modifications of the Scheme (including its machinery) which they might, from time to time, deem desirable.

The above Joint Sub-Committee shall be open to receive submissions concerning cases involving problems of general principle or joint policy—when put forward either by joint references from Regional Incentives Payments Panels or by any of the National parties to this Agreement—but it shall be no part of its duty to hear evidence on detailed cases. The Joint Sub-Committee shall have power (a) to give guidance, on problems of general principle, in the manner it deems most appropriate; (b) to secure professional advice; (c) to call the full Joint Executives together where that is found necessary at any time for the purpose of endeavouring to resolve problems of joint National policy or considering amendments of the Scheme.

#### APPOINTMENTS IN THE COLONIAL SERVICE

A pamphlet entitled *Appointments in His Majesty's Colonial Service* has been issued by the Colonial Office, primarily for the guidance of persons resident outside the Colonies themselves who wish to have information about appointments in the Colonial Service. The Colonial Service includes all the public services of British Colonies, Protectorates, Protected States and Trust Territories for the administration of which the Secretary of State for the Colonies is responsible.

The pamphlet is a revised edition of the one published in January, 1950 (see the issue of this GAZETTE for February, 1950, page 49). It contains information about permanent and contract appointments which are dealt with by the Director of Recruitment (Colonial Service) and for which candidates are selected by the Secretary of State for the Colonies on the advice of the Colonial Service Appointments Board. The information given includes details regarding the qualifications and other requirements for eligibility, the methods of application and selection, procedure and training after selection, and salary scales.

Particulars are also given of appointments dealt with by the Overseas Nursing Association for Queen Elizabeth's Colonial Nursing Service, for which the Secretary of State selects candidates on the recommendation of the Committee of the Association; and of other appointments dealt with by the Crown Agents for the Colonies, who, acting on behalf of the Colonial Governments, select and engage candidates.

Copies of the pamphlet (C.S.R.I. 1951) can be purchased from H.M. Stationery Office, price 2s. net (2s. 2d. post free).

## INTERNATIONAL LABOUR ORGANISATION

### 113th Session of Governing Body

The 113th Session of the Governing Body of the International Labour Office was held in Brussels from 21st November to 25th November, 1950, under the Chairmanship of M. Leon Eli Troclet, Belgian Government representative. The United Kingdom representatives were Sir Guildhaume Myrddin-Evans, K.C.M.G., C.B., Deputy Secretary of the Ministry of Labour and National Service, Sir John Forbes Watson, K.C.M.G., Director of the British Employers' Confederation, and Mr. Alfred Roberts, C.B.E., Chairman of the General Council of the Trades Union Congress.

Notes on some of the main subjects discussed by the Governing Body are given below.

#### Full Employment

The Governing Body had before it a resolution on full employment adopted by the Economic and Social Council at its 11th Session. By this resolution the Council decided to place the subject of full employment on its agenda each year. The Governing Body decided that it would consider at its next session the procedure whereby its views should be made known to the Economic and Social Council on these occasions. In response to a suggestion in the Economic and Social Council resolution it was decided that the Director-General of the International Labour Office should pursue actively the question of making possible international comparisons of unemployment percentages with reference to the specific uses which they should serve. The Director-General will pay particular attention to the highly industrialised countries beginning with those of Europe. He is also to consult Governments with a view to ascertaining their views on the question of the scope for further action by the Office. The Governing Body also decided that the Office should co-operate in the examination of studies, analyses and reports transmitted to the Economic and Social Council by the Secretary-General of the United Nations, which, under the terms of the resolution, the Economic, Employment and Development Commission are requested to examine. Note was taken of the fact that the Secretary-General of the United Nations is to appoint a small group of experts to prepare a report on unemployment and under-employment in under-developed countries. When the group of experts has been appointed the Director-General is to take steps to make known to them the views which have been expressed on this subject by general and regional conferences of the International Labour Organisation.

The Governing Body also took note of a recommendation on full employment adopted by the Consultative Assembly of the Council of Europe. The Director-General was instructed to follow closely the activities of the Council of Europe in this field and to co-operate closely in the studies proposed by the Consultative Assembly.

#### Agenda of the 35th (1952) Session of the Conference

The Governing Body determined the agenda for the 35th (1952) Session of the International Labour Conference. In reaching its decision the Governing Body took into account the three standing items (the Report of the Director-General, financial and budgetary questions and the application of Conventions and Recommendations) and three items likely to be carried forward for second discussion from the 34th Session, viz., social security, industrial relations and holidays with pay in agriculture. In addition six other items were before the Governing Body for consideration. These were: Protection of the health of workers in dangerous trades; reduction of working hours as a consequence of rising productivity; regulation of the employment of young persons in underground work in coal mines; revision of the Maternity Protection Convention, 1919; revision of the Hours of Work (Coalmines) Convention (Revised) 1935; and the question of an International Declaration on the Rights of the Worker.

It was decided that a place on the agenda should be reserved for the revision of the Maternity Protection Convention, 1919, it being impossible for procedural reasons for a decision to be taken at this Session. It was also decided that the protection of the health of workers in dangerous trades and the regulation of the employment of young persons in coal mines should be placed on the agenda. The Governing Body decided, however, that both these subjects needed to be more closely defined for the purpose of considering the adoption of international regulations, and they agreed upon certain arrangements for this purpose. The reduction of working hours as a consequence of rising productivity is to be dealt with in the Report of the Director-General to the 1952 Conference. The question of an International Declaration of the Rights of the Worker will be taken into account by the International Labour Organisation representatives on a working party on the proposed economic, social and cultural articles of the United Nations Covenant on Human Rights, the establishment of which is to be proposed by the Office to the Economic and Social Council.

#### Relations between the International Labour Organisation and the Council of Europe

The Governing Body considered the general question of relationships between the International Labour Organisation and the Council of Europe. Note was taken that in August, 1950, the Consultative Assembly of the Council had made certain recommendations to the Committee of Ministers concerning consideration by the Council of items on the agenda of sessions of the International Labour Conference prior to their consideration by the Conference. The Governing Body also noted that the Council was taking interest in a number of questions which were of concern to the Organisation and that there had been contact between the International Labour Office and the Secretariat-General of the Council. The Governing Body laid down certain principles which

it considered should guide the Director-General of the Office in seeking to establish satisfactory working relationships with the Council of Europe. In formulating these principles the Governing Body was guided by the need to avoid unnecessary duplication and to facilitate concentration of effort on the achievement of the objectives of both organisations.

#### Migration

The Governing Body took note that the International Labour Office would shortly be sending to Governments a memorandum on the best form of co-operation at the international level to facilitate migration from Europe. On the basis of the replies, the Office will make concrete proposals to the next session of the Governing Body for the convocation of a second session of the Preliminary Migration Conference. (The first session of the Conference was held in Geneva from 25th April to 9th May, 1950.) The session will be held not earlier than the autumn of 1951. The Governing Body accepted an invitation from the Italian Government for the session to be held in Naples. The Governments of emigration and immigration countries are to be requested to define their needs for technical assistance in the migration field and to request assistance on the scale and in the manner desired. The Governing Body also instructed the Director-General to obtain from Governments and international organisations concerned information on the progress made as a result of the conclusions reached by the first session of the Preliminary Migration Conference; this information when collated will be circulated to the Governments and international agencies concerned.

#### Fellowships

The Governing Body reviewed the operation of the International Labour Organisation Fellowship programme which operated for the first time in 1950, and considered the question of the facilities to be made available in 1951. It was decided to increase the number of fellowships to 27, as compared with 15 which were available in 1950. Three of the fellowships are to be awarded to indigenous persons from non-autonomous or trust territories under the control of the Netherlands, Portugal and New Zealand. The Governing Body also noted that the Scheme in 1950 had provided for 12 grants to be made to persons nominated by the three groups for the purpose of studying the International Labour Office in Geneva. In view of the good results of this Scheme, it was decided that a similar Scheme should be operated in 1951. Each group of the Governing Body has nominated four countries from which the grant holders will be drawn; these are the Argentine Republic, Indonesia, Italy, Iran, India, Pakistan, Turkey, Uruguay, China, Finland, France and the United Kingdom.

#### Forced Labour

The Governing Body took note of the text of the United Kingdom-United States draft resolution concerning forced labour tabled at the 11th Session of the Economic and Social Council, and expressed its willingness to co-operate with the Council in the manner suggested in the draft resolution. The Director-General was authorised to co-operate with the Secretary-General of the United Nations in implementing the draft resolution in the event of its approval by the Economic and Social Council.

#### The Working of the Governing Body and its Committees

The Governing Body had before it the first report of a special Committee which it had decided at its 112th Session to set up to examine the working of the Governing Body and its Committees together with the frequency of meetings. The Governing Body accepted the conclusion of the Committee that the Governing Body should continue to hold three sessions a year as a normal minimum. At the same time the Governing Body approved a number of detailed proposals aimed at simplifying the system of Governing Body Committees and assisting the Governing Body to deal effectively and expeditiously with its work.

#### Domestic Workers

The Governing Body approved proposals made by the Director-General for the composition of a special conference of experts on the Status and Conditions of Employment of Domestic Workers. It was decided this Conference should take place in Geneva from 2nd to 6th July, 1951.

#### Staff Matters

The Governing Body had before it the text of an agreement between the International Labour Organisation and the United Nations for the admission of the uninsured staff of the International Labour Office into the Joint Staff Pension Fund of the United Nations. It noted with satisfaction the completion of the negotiations for the entry of uninsured Office staff into the United Nations Fund. In order to implement the decision taken at its 111th Session to set up a scheme for the alleviation of hardship caused to pensioners of the International Labour Office Staff Pension Fund by increase in the cost of living, the Governing Body authorised a supplementary credit to cover expenditure for 1950. The Governing Body also approved certain scales for the adjustment of pensions payable in Swiss francs to pensioners living in certain countries which devalued their currencies on or after 18th September, 1949.

#### Other Matters

Among other matters dealt with by the Governing Body were: Action to be taken on resolutions adopted by the 33rd Session of the International Labour Conference; arrangements for regional conferences for the Near and Middle East (Tehran, April, 1951) and the Americas (Colombia 1952); human rights; and technical assistance. The Governing Body also considered the reports of various Committees, and fixed the dates and agendas of a number of future meetings.

## SECRETARIES JOURNAL

**THE ONLY WEEKLY PAPER FOR COMPANY SECRETARIES**

*Edited by PERCY F. HUGHES, F.C.I.S.*

*Written by the most eminent authorities on the various subjects to be covered, SECRETARIES JOURNAL serves its readers with all the latest information and fills the need for a forum on all company matters.*

**\* THE PAPER FOR ALL MEN OF AFFAIRS \***

*Features include :*

Company Law and Practice—Management Accounting—Economics—Industrial Problems—Pension Funds—Town Planning—Industrial Costing—Purchase Tax Changes—Recent Case Decisions—News of the Week—City Notes and News—Readers Queries and Replies—Local Government Notes, and Legal Features of Practical Interest.

Secretaries, and other responsible officers in industry, may keep in touch with the ever changing face of their responsibilities which today is NEWS and which must be assimilated WEEKLY.

## Second Session of Asian Advisory Committee

The Second Session of the Asian Advisory Committee of the International Labour Organisation was held at Bandoeng, Java, from 18th to 20th December, 1950. The meeting was attended by representatives from Afghanistan, Australia, Ceylon, France, India, Indonesia, Pakistan, the Philippines and the United Kingdom. There were observers from the United Nations and the International Confederation of Free Trade Unions. The United Kingdom Government was represented by Mr. E. W. Barltrop, formerly Regional Controller, Ministry of Labour and National Service, now Labour Adviser to the Secretary of State for the Colonies. Mr. Barltrop was accompanied by Mr. E. M. Hunt, Principal, Ministry of Labour and National Service, and formerly Labour Attaché in China.

The following paragraphs give some particulars of the discussion which took place on the principal items of the agenda.

In the matter of wage policy, the Committee was in general agreement that increased productivity was a paramount consideration in Asian countries and that wage problems must be considered in that context. It recommended that the International Labour Office should give practical assistance to Asian countries in solving such specific wage problems as the establishment and operation of wage-fixing machinery and raising the productivity of labour. The Committee further recommended that, in agreement with the Governments concerned, the services of experts should be secured to carry out studies on the spot and give advice to under-developed Asian countries. These experts would select typical industrial units and advise on the best means of increasing productivity, due regard being paid, among other factors, to the need for improving technology and to the possibility of enabling workers to share in profits accruing from improved conditions of productivity.

With respect to housing, the Committee approved a questionnaire to be sent to all Governments with a view to the preparation of a report on the position of workers' housing programmes in Asia. It was generally agreed that one of the most important practical contributions which could be made towards progress in workers' housing would be for the International Labour Office to collaborate with other international organisations in sending technical experts to Asian countries with the object of developing, in consultation with Governments, types and methods of house construction at reduced building costs. If possible, the experts' ideas would be demonstrated in practical form at suitable centres, financed by Governments.

In the matter of technical assistance, the Committee recommended the Governing Body to draw the attention of Asian Governments to the fields in which the Organisation was in a position to help. The Committee expressed the hope that these Governments would make the fullest use of the assistance thus available. In connection with technical assistance for vocational training the Committee also expressed the opinion that the International Labour Office should pay particular attention to developing quantitative methods with a view to the effective and practical training of the maximum number of workers in the minimum period of time.

The Committee agreed on the desirability of convening a Regional Meeting of labour statisticians and arranging in connection therewith a technical statistical seminar. The Committee further recommended that before the next session of the Asian Regional Conference in 1953 there should be a technical conference on the protection of young workers in Asian countries.

Other subjects discussed by the Committee included the conditions of employment of Asian seafarers, the representation of Asian countries on the Governing Body of the International Labour Office, and the agenda for the 1953 Session of the Asian Regional Conference. The conclusions of the Committee will come before the Governing Body, which will decide the action to be taken on them.

## First Session of Plantations Committee

The First Session of the Plantations Committee was held in Bandoeng, Java, from 4th to 16th December, 1950. The meeting was attended by representatives from Belgium, Brazil, Burma, Ceylon, Cuba, France, India, Indonesia, Liberia, the Netherlands, Pakistan, the Philippines, Portugal and the United Kingdom. There were observers from the United States of America, Viet Nam and the International Confederation of Free Trade Unions. The names of the United Kingdom representatives were given in the December issue of this GAZETTE (page 413). Mr. V. K. R. Menon (India), one of the representatives of the Governing Body of the International Labour Office, was the Chairman of the Committee. The agenda of the Committee comprised the following items: (a) To examine and to report to the Governing Body on the basic questions common to workers on plantations as a whole, suggesting appropriate methods of action by the International Labour Office on these matters; (b) to examine and to report to the Governing Body on methods for securing within the framework of the International Labour Organisation consideration of the special problems of plantation workers employed in the different branches.

Two sub-committees were set up to deal with the first item, for which a Report entitled "Basic Problems of Plantation Labour" had been prepared by the Office from material furnished by Governments in response to a questionnaire. One sub-committee was concerned with man-power and employment conditions and the other with welfare and industrial relations. The reports and resolutions adopted by the sub-committees were endorsed, subject to one or two amendments, by the full Committee.

A resolution on recruitment and engagement of labour for plantations recommended that Governments should make enquiries into the operation of the recruitment system, and, where necessary, enact comprehensive legislation governing recruitment operations in conformity with International Labour Organisation standards. In particular, the resolution urged that legislation should be enacted as rapidly as possible to abolish recruitment by professional recruiters and to prohibit any person, other than an employee on a plantation (this term excludes persons paid on a commission basis), from recruiting workers. At the same time, it was recommended that the competent authority should establish free public employment services. In the matter of contracts of employment, the Committee recommended that these should be regulated by legislation and, where necessary, their operation supervised by Government; that infringement should no longer give rise to penal sanctions applied to the workers; and that the Office should undertake a study of the circumstances in which contracts might be terminated before the date of their expiry.

A resolution on hours of work recommended that hours should not exceed eight a day, whether in the factory or on the plantation; that for field workers there should be established a maximum annual total number of basic hours of work, together with basic weekly limits, above which overtime rates would be paid, and that legislation should ensure that plantation workers had annual holidays with pay and a weekly rest. The resolution concerning the regulation of wages advocated that minimum wages should be fixed by collective agreement, legislation, or other methods, and that, among other criteria, they should be calculated so as to make allowance for the needs of the worker and his family on the weekly day of rest. A noteworthy clause in the relevant resolution reads as follows:—"The workers settled on plantations should, provided they present themselves for work, be guaranteed a minimum wage 24 days a month throughout the year and provided the contract has not expired".

With respect to housing, the Committee recognised that, where circumstances required workers to reside on plantations, it was the responsibility of the employer to provide housing, which, however, should conform to minimum standards to be established by legislation, regulation or otherwise, prescribing (*inter alia*) that each family, consisting of husband, wife and one or more children, had at least two rooms. It was further recommended that, whenever a resident worker was discharged, he should be allowed a reasonable time in which to vacate the house, and that the time to be allowed should be determined by negotiating machinery. The Committee also took the view that workers residing on estates should not be made subject to restrictions in respect of social activities, including the entertainment of visitors.

In regard to the supply of food and other necessities, the Committee drew attention to the need for development of co-operative stores and recommended that assistance should be given in order to facilitate this development by means such as the provision of suitable accommodation and the grant of assistance in the bulk purchase of consumer goods. The employer should ensure that food, clothing and other necessities were available at fair and reasonable prices; it was also stipulated that such services provided by the employer should not be conducted for profit.

Dealing with the question of education, the Committee recommended that, where State facilities were not available, employers and public authorities should collaborate financially and otherwise in their provision, and that Governments in conjunction with employers should promote facilities for vocational training. A resolution on health and social security recommended that, where adequate free State medical services were not available, employers should provide free of charge medical services to workers and their families resident on plantations, and dispensary facilities for non-resident workers; that medicinal foods to counteract nutritional deficiencies should be supplied free or at concession rates; and that workers' children attending school should be supplied with milk or a free meal. With respect to employment injuries and maternity protection, the resolution advocated any necessary extension of legislation to cover plantation workers. The introduction of contributory provident fund schemes was also recommended.

A resolution on industrial relations recommended that plantation workers should organise themselves into "free, independent and democratically-controlled trade unions" and that employers should provide such unions with facilities for the conduct of their normal activities, including office accommodation, freedom to hold meetings and freedom of entry. The Committee also recommended that *bona fide* organisations of workers and of employers should, whenever possible, negotiate collective agreements with respect to conditions of work, wages, and machinery for the settlement of disputes.

Labour inspection of plantations was recommended in a further resolution which called for the establishment and maintenance by Governments of a system of inspection adapted to the special needs of the industry. In establishing the system, Governments were urged to bear in mind the principles embodied in International Labour Regulations on labour inspection.

Finally, the Committee invited the Governing Body of the International Labour Office to instruct the Office to undertake fuller studies of a number of aspects of plantation employment, including recruitment, wages, cheap house construction, nutrition (in collaboration with other specialised agencies concerned), health and social security services and conditions of employment of clerical and analogous staff.

The conclusions of the Committee will come before the Governing Body, which will decide what action should be taken on them.

## LABOUR OVERSEAS

### Labour-Management Co-operation in France

The International Labour Office have published a report\* on the methods and organisation of industrial co-operation in France as they were in effect at the beginning of 1948. The report presents an analysis of the laws and regulations which have established and organised the numerous forms of co-operation which exist in the French community between public authorities, employers and workers. It also embodies the findings of a mission undertaken by two representatives of the International Labour Office, who were able to get in touch with the heads of administrations, services and organisations and to examine on the spot the various institutions for the representation of workers in undertakings.

#### Co-operation at the National and Departmental Level

The report traces the development of co-operation at the national and departmental level in France from the establishment in 1891 of the Higher Labour Council to the official recognition in the preamble of the present Constitution of the Republic of the fundamental principle of the participation of occupational organisations in the determination of the social and economic policy of the country. Effect is given to this principle through bodies with general powers and certain specialised bodies, on all of which employers and workers are represented.

The bodies with general powers are, on the one hand, those that direct the preparation and execution of the Industrial Equipment Plan, drawn up after the liberation of France for the restoration of the national economy, and, on the other, the Economic Council, which assists the Government and Parliament with information and guidance on economic matters. The Economic Council includes representatives of the productive forces of the country, comprising members nominated by the most representative organisations of wage and salary earners, officials, technicians, engineers, and technical and managerial staff, and representatives of industrial and commercial undertakings, handicraftsmen, representative agricultural organisations, the co-operative movement, consumers and overseas territories, together with experts and technicians. The essential function of the Economic Council is to make studies and enquiries, in which it can take the initiative. It has no right to initiate legislation, but it may, if necessary, act as an organisation for arbitration or for co-ordinating the action of various advisory bodies set up on a governmental basis.

Specialised advisory bodies, on which representatives of the occupational or other organisations sit with representatives of public authorities, have been established in such fields as production, rationing and retail prices. Many of these bodies are temporary only. Others, which meet permanent requirements, will ultimately have their duties taken over by the Economic Council.

Before the war, rates of wages and employment conditions generally were fixed by collective agreements between employers and workers, but the Government assumed control of both prices and wages during the war, and the control of wages continued to be exercised after the liberation, although various tripartite bodies were set up for advisory purposes. The right of collective bargaining, except as regards the fixing of wage rates, was restored at the end of 1946 by legislation, which at the same time established the Higher Committee for Collective Agreements. This Committee, composed of representatives of Government Departments, employers and workers, under the chairmanship of the Minister of Labour and Social Security, has been given wide advisory powers as regards wages and conditions of employment. It co-ordinates the work of national joint committees and may act as an arbitrating body.

The National Labour Council was also established by legislation late in 1946, but at the date of the report had not begun working. The Council consists of voting members and members with advisory powers only. The voting members include Members of Parliament and representatives of occupational organisations and certain other councils. The advisory members include experts and technicians on labour questions and representatives of Government Departments. The Council is an advisory body, attached to the Minister of Labour and Social Security and to Parliament, whose competence covers all fields of labour and social policy, except those connected with social security (which come under a special council), and whose powers may extend as far as compulsory consultation.

In the field of social questions the French Government have set up bodies with special powers, through which the occupational organisations may give their opinions or communicate suggestions. Such bodies have been established for questions of man-power, social security, mutual assurance, occupational safety and medicine, and conditions of employment other than wages.

#### Co-operation in Nationalised Industries

The nationalised sector of the French economy includes the getting of mineral fuel, gas and electricity supply, the railways, the mercantile marine, certain undertakings in the chemical and engineering industries, banking and insurance, and some press undertakings. In this sector, the report states, labour-management co-operation is more highly developed than elsewhere and has a definitely organic shape, since the nationalisation Acts have

explicitly defined the functions and duties of the trade unions in the bodies which direct the nationalised industries and in the management of the industries. Bodies placed at the head of nationalised industries have general powers of direction, co-ordination and control, which they usually exercise in an advisory capacity. Those at the head of nationalised undertakings have powers of administration and management, which they exercise in an executive capacity. Workers are represented on bodies of both types, usually directly, but in some cases indirectly through another body of which they are a constituent element. On the boards of directors of nationalised undertakings seats are generally reserved for the staff of the undertaking concerned, but in the case of bodies extending beyond the undertaking the workers' members sit as representing the general interests of the workers.

#### Co-operation within the Undertaking

The report examines the way in which workers take part in the operation of undertakings in general, both privately-owned and nationalised. There are, broadly speaking, three types of co-operative machinery: staff delegates, to defend the workers' interests; safety delegates and health and safety committees, whose sphere of action is industrial health and safety; and works committees and similar bodies, for co-operation in the economic and social field.

Staff delegates are appointed in all undertakings which give permanent employment to more than ten workers, the number of delegates depending upon the size of staff. The staff delegates can transmit to the employer complaints from the staff on all questions respecting wage regulation, the labour code or other matters of social legislation. They can also bring to the attention of the labour inspectorate complaints about the application of laws and regulations that fall within the inspectorate's sphere of control. In undertakings in which there is a works committee, the staff delegates can refer to it representations on such matters as welfare services, increase of production, etc. Where there is no works committee they may refer to the employer all suggestions aimed at improving efficiency or those which touch upon the organisation of the undertaking. The staff delegates may also carry out the tasks of health and safety committees in undertakings where these do not exist.

Safety delegates are appointed in mines, explosive factories, etc., and commercial aviation, and on the railways. Safety committees operate in the mercantile marine. Health and safety committees must be set up in industrial undertakings employing permanently at least 50 workers and in commercial undertakings, Government offices, etc., with a permanent staff of at least 500 persons. The duties of the committees include the investigation of serious accidents or cases of occupational disease, the inspection of undertakings to see that safety regulations are complied with, and the instruction of fire and first-aid squads.

Works committees must be set up in all industrial and commercial undertakings, offices, etc., which habitually employ not less than 50 wage-earners. The works committee consists of the head of the undertaking or his representative, as chairman, and regular and substitute delegates elected by the staff. Every representative trade union recognised by the undertaking may appoint a person to attend the meetings of the committee in an advisory capacity. The duties of the works committee are numerous, corresponding to various aspects of the life of the undertaking. On the welfare side, the committee co-operates with the management in improving collective conditions of work and living conditions, and manages or supervises welfare schemes, or shares in their management. The functions of the committee in the economic field are exclusively advisory, but on a number of questions affecting the working of the undertaking the employer is obliged to take note of the opinions of the committee when making a decision. The economic duties of the works committee are mainly concerned with the increase of productivity and output, and with problems of management, especially financial management. At the beginning of 1948 works committees registered by the Minister of Labour and Social Security numbered about 8,600, of which 1,600 were in metallurgical undertakings and 935 were in the textile industry.

## Earnings and Hours of Work in the Netherlands in 1949

The Central Bureau of Statistics of the Netherlands have published in the issue of *Statistiek der lonen* for April-August, 1950, a summary of the results of the official enquiry into earnings and hours of work in Netherlands industries during a week in September or October, 1949. The information on which the summary is based was supplied voluntarily by undertakings employing an aggregate of over half-a-million workpeople. The earnings taken into account were gross earnings, before deductions on account of social insurance contributions, and included overtime payments, bonuses and other additions to wages, and the value of payments in kind, but not statutory family allowances.

The enquiry showed that the average hourly earnings in September or October, 1949, were 100.1 cents for men, 62.9 cents for women (21 years of age and over), 44.1 cents for youths and boys and 40.8 cents for girls. The corresponding averages for the previous enquiry, which related to November, 1948, were 98.8, 62.2, 43.6 and 40.6 cents. Average weekly earnings in September or October, 1949, were 49.34 gulden for men, 29.11 gulden for women, 21.24 gulden for youths and boys and 19.35 gulden for girls, compared with 48.68, 28.61, 20.95 and 19.19 gulden, respectively, in November, 1948.

\* Labour-Management Co-operation in France. Studies and Reports New Series, No. 9. International Labour Office, Geneva. Price 7s. 6d.

† Collective bargaining between employers' and workers' representatives as the means of determining wage and salary issues was reintroduced in February, 1950, by an Act on collective agreements (see the issue of this GAZETTE for March, 1950, page 92).

The summary gives detailed information about the average hourly earnings and average number of hours worked in a week in September and October, 1949, by skilled, semi-skilled and unskilled men (21 years of age and over) in a large number of industries. The Table below shows the averages for some of the more important of the industries, with the averages for all industries in September or October, 1949, and in November, 1948.

Table with columns: Industry, Skilled Men (Average Hourly Earnings, Average Weekly Hours), Semi-Skilled Men (Average Hourly Earnings, Average Weekly Hours), Unskilled Men (Average Hourly Earnings, Average Weekly Hours). Rows include Earthenware and Pottery, Cement Goods, Chemicals, Metal Working, Automobile Repair, Cotton, Wool Textile, etc.

### Earnings in the United States Motor Vehicle Industry in February, 1950

Early in 1950 a comprehensive survey of wages and related benefits in the motor vehicle manufacturing industry of the United States was made by the Bureau of Labor Statistics of the United States Department of Labor. The survey covered establishments assembling complete vehicles and those manufacturing parts. Data were collected from all passenger vehicle establishments and from nearly all truck manufacturers. An article summarizing the results of the survey as regards undertakings producing complete passenger cars and trucks was published in the Monthly Labor Review for September, 1950.

The survey showed that in motor vehicle manufacturing establishments extensive use was made of the time-rate method of payment, in which single wage scales for occupations predominated within establishments. It also showed that a relatively large proportion of the workers were engaged in assembly occupations, and that there was wide-spread use of collective bargaining in determining rates of pay. Incentive methods of payment were found in only a few establishments engaged in passenger car manufacture, but were fairly common among truck manufacturers. New workers received a rate of payment below the job rate and progressed to the job rate during a qualifying period, usually up to about three months. When job rates had been attained, pay in the occupation approached complete uniformity.

Plant workers (i.e., workers engaged in the productive process) in passenger car establishments earned an average of 1.63 dollars an hour in February, 1950. More than 60 per cent. of these workers earned between 1.50 and 1.70 dollars an hour. In truck manu-

\* Figures relating to underground coal miners have been taken into account in calculating the average earnings of skilled and semi-skilled men, but not those of unskilled men or the average number of hours worked by all three classes.

facturing establishments the comparable average hourly earnings were 1.66 dollars, but only 34 per cent. of the workers concerned earned between 1.50 and 1.70 dollars. The differences between the distribution of earnings in the two branches were accounted for primarily by the greater frequency of payment on an incentive basis in the establishments engaged in truck production. The averages relate to straight-time earnings, i.e., earnings during normal working hours, including incentive payments but excluding extra payments for overtime and night work.

All the establishments engaged in passenger car manufacture paid shift differentials, usually an addition to the day-work rate of 7 cents an hour or 5 per cent. for the second shift and of 10 cents or 7½ per cent. for the third shift. Nearly two-thirds of the workers were engaged on a first shift and little more than 6 per cent. on a third shift. Most of the passenger car establishments granted six paid public holidays a year, and all the establishments granted annual holidays with pay, usually of one week after one year's service, one week and a half after three years and two weeks after five years. About 23 per cent. of passenger car plant workers were employed at establishments which provided retirement pensions, and all but a small proportion of the workers were eligible for life insurance, paid for partially by the employers. More than 70 per cent. were covered by health insurance plans and nearly 25 per cent. were eligible for hospital treatment insurance, which was also partially paid for by the employers.

In truck manufacturing establishments multiple shift working was less frequent. Over 80 per cent. of the workers were engaged on the first shift. The most common differential payment for shift work was an addition to the day rate of 5 per cent. for the second and 7½ per cent. for the third shift. All the establishments granted six or more paid public holidays a year, and all plant workers received annual holidays with pay, or payment in lieu, usually of one week after one year's service and two weeks after five years. The proportion of workers covered by retirement pension plans and life insurance schemes was about the same as in passenger car manufacture, but health and hospital treatment insurance was much more common, over 90 per cent. of truck workers being eligible for the first and over 80 per cent. for the second form of insurance.

The Table below shows the average hourly earnings (exclusive of extra payments for overtime and night work) in February, 1950, of fully qualified plant workers in important occupations in the passenger car and truck manufacturing establishments in the United States as a whole and in the Great Lakes region (including Michigan), and the number of workers in each occupation.

Table with columns: Occupation, Number of Workers, Average Hourly Earnings (United States, Great Lakes), Passenger Cars, Trucks. Rows include Assemblers, Bench; Drill Press, Special or Heavy; Inspectors, Machine Parts; Maintenance Electricians; Labourers, etc.; Machine Repairmen; Millwrights; Material Handlers; Metal Finishers, Body; Punch Press Operators, Heavy, etc.; Punch Press Operators, Light and Medium; Repairmen, Car Assembly Sanders, Wet; Sewing-Machine Operators; Trimmers, Cushion and Back Builders; Truck Drivers, Inside, Gas and Electric; Welders, Arc and Gas; Gun; Spot.

## EMPLOYMENT, UNEMPLOYMENT, ETC.

### Contents of this Section

Table with columns: Page, Unemployment at 15th January, 1951—continued. Rows include Employment in Great Britain in December; General Summary; General Man-power Position; Analysis of Civil Employment; Industrial Analysis; Unemployment at 15th January, 1951; Summary for Great Britain; Numbers Unemployed in United Kingdom: Regional Analysis; Numbers Unemployed in Principal Towns; Numbers Unemployed, 1939-1951; Unemployment at 15th January, 1951—continued; Disabled Persons (Employment) Act; Numbers Unemployed: Industrial Analysis; Placing Work of Employment Exchanges; Labour Turnover; Insured Persons Absent from Work owing to Sickness or Industrial Injury; Work of Appointments Department; Coal Mining, Employment in December; Employment Overseas.

### Employment in Great Britain in December

Note.—The estimates of total man-power which appear in the Tables below have been revised on the basis of statistics derived from the administration of the national insurance schemes (see article and Tables on pages 41 to 45 of this GAZETTE). In addition to the changes which follow the revisions of the employee figures, the estimate of the number of employers and self-employed persons has been reduced from a figure of 1,800,000 used hitherto in the new series of man-power figures since mid-1948 to 1,700,000. Information about the number in this category is fuller now than it was two years ago, but there is still insufficient information about the total number in this field. Estimates which are still subject to an appreciable margin of error have had to be made of the number of employers and self-employed persons who are not contributors under the National Insurance Acts and who do not therefore exchange insurance cards (e.g., persons over pensionable age at 5th July, 1948, etc.).

#### GENERAL SUMMARY

It is estimated that the total working population\* decreased during December by 64,000 (6,000 men and 58,000 women). This fall is about the same in total as that which occurred in December, 1949.

The size of the Forces increased during December by 7,000 to a total of 752,000. The number of ex-Service men and women on release leave at the end of the month was under 1,000.

The number of unemployed persons registered for employment at 15th January, 1951, was 333,600, compared with 301,800 at 11th December. The January figure represented about 1.6 per cent. of the estimated total number of employees, compared with 1.4 per cent. in December.

The total number in civil employment (industry, commerce and services of all kinds) fell during December by 97,000 (37,000 men and 60,000 women).

There was a decline of 7,000 during the month in the total number employed in the basic industries, the main decrease being 6,000 in transport and communication. The number of wage earners on colliery books increased by 2,000.

The numbers employed in the manufacturing industries declined during December by 29,000. The principal decrease was 11,000 in the food, drink and tobacco group.

There was an estimated decline of 34,000 in the numbers employed in building and contracting.

Employment in the distributive trades fell by 18,000 while there was a decline of 11,000 in professional, financial and miscellaneous services. In National Government Service there was an increase of 4,000 due to a rise in the numbers employed in the Defence Departments which was only partly offset by decreases elsewhere.

#### GENERAL MAN-POWER POSITION

The broad changes in the man-power position between mid-1948 and the end of December, 1950, are shown in the following Table:—

Table with columns: Thousands, Mid-1948, End-1949, End-Nov., 1950, End-Dec., 1950, Change during Dec., 1950. Rows include Total Working Population\*, H.M. Forces and Women's Services, Men and Women on Release Leave who have not yet taken up employment, Registered Unemployed Persons in Civil Employment, Men and Women on Release Leave who have not yet taken up employment, Registered Unemployed Persons in Civil Employment, Men and Women on Release Leave who have not yet taken up employment, Registered Unemployed Persons in Civil Employment.

\* The total working population in this series of man-power statistics represents the total number of persons aged 15 and over who work for pay or gain or register themselves as available for such work. The figure includes the Forces, men and women on release leave not yet in employment, the registered unemployed, and all persons in civil employment (including private indoor domestic servants and gainfully occupied persons over pensionable age). Part-time workers are counted as full units. † End of month estimate.

#### ANALYSIS OF CIVIL EMPLOYMENT

An analysis of the total numbers in civil employment by broad industrial groups is given in the Table below. The industries are classified according to the Standard Industrial Classification.

Table with columns: Industry or Service, Mid-1948, End-1949, End-Nov., 1950, End-Dec., 1950, Change during Dec., 1950. Rows include Basic Industries, Coal Mining, Total Man-power, (Wage-earners on Colliery Books), Other Mining and Quarrying, Gas, Electricity and Water, Transport and Communication, Agriculture, Fishing, Total, Basic Industries, Manufacturing Industries, Chemicals and Allied Trades, Metals, Engineering and Vehicles, Textiles, Clothing, Food, Drink and Tobacco, Other Manufacturing Industries, Building and Contracting, Distributive Trades, Professional, Financial and Miscellaneous Services, Public Administration, National Government Service, Local Government Service, Total in Civil Employment.

#### NUMBERS EMPLOYED: INDUSTRIAL ANALYSIS

The Table on the next page shows, for those industries for which comparable figures are available, the numbers employed at mid-1948, end-1949 and November and December, 1950. The figures relate to employees only; they exclude employers and persons working on their own account, and they are thus different in scope from those given in the preceding paragraphs. Satisfactory estimates of the changes in the numbers within the latter classes cannot be made at monthly intervals for the individual industries.

The figures are based primarily on the estimates of the total numbers of employees and their industrial distribution at the middle of each year which have been computed on the basis of the counts of insurance cards. In the case of all industries other than coal mining, building and civil engineering and gas and electricity, use has also been made of the monthly returns rendered by employers under the Undertakings (Records and Information and Inspection of Premises) Order, 1943, and the Statistics of Trade Act, 1947. Some of the figures for the first three dates in the Table differ from those previously published, revisions having been made in the light of the mid-year estimates for 1949 and 1950 which are now available. Certain industries and services which are not covered by employers' returns (or are only partially covered), or for which figures are not available in the same form as for those shown below, are omitted from the Table. Persons registered as unemployed and demobilised men and women taking paid leave are not included.

\* Cotton—331,000. Wool—220,000. Other textiles—482,000.

## Cancer Registration in England and Wales

### AN ENQUIRY INTO TREATMENT AND ITS RESULTS

By PERCY M. STOCKS

Cancer kills in a single year nearly as many people as our army lost in officers and men in World War II. The object of the registration and follow up scheme described in this booklet by the Chief Medical Statistician of the General Register Office is to get much more exact information than we now have about the results of treatment.

(Studies in Population and Medical Subjects: No. 3).

2s. By post 2s. 2d.

The first two issues in the series were:—

**Regional and Local Differences in Cancer Death Rates. (No. 1)** 1s. (1s. 2d.)

**Sickness in the Population of England and Wales. (No. 2)** 1s. (1s. 2d.)

# Unemployment at 15th January, 1951

## SUMMARY FOR GREAT BRITAIN

The numbers of persons registered as unemployed at 11th December, 1950, and 15th January, 1951, were as follows:—

	Men 18 and over	Boys under 18	Women 18 and over	Girls under 18	Total
11th December	200,953	4,935	90,895	5,033	301,816
15th January	220,821	10,043	92,588	10,119	333,571

These figures include all unemployed persons on the registers of Employment Exchanges, with the exception of registered severely disabled persons who are unlikely to obtain work other than under special conditions.

It is estimated that the number of persons registered as unemployed at 15th January represented 1.6 per cent. of the total number of employees. The corresponding percentage at 11th December was 1.4.

In the week ending 30th December, 1950, about 34,000 operatives in the manufacturing industries were on short time, losing 21 hours each on the average; on the other hand 838,000 were working on an average 6½ hours overtime.

The analysis of the figures for 15th January is as follows:—

	Wholly Unemployed (including Casuals)				Temporarily Stopped	Total
	Unemployed for not more than 2 weeks	Unemployed for more than 2 weeks but not more than 8 weeks	Unemployed for more than 8 weeks	Total		
Men 18 and over	53,541	61,341	99,010	213,892	6,929	220,821
Boys under 18	5,524	3,253	1,046	9,823	220	10,043
Women 18 and over	30,141	23,878	35,510	89,529	3,059	92,588
Girls under 18	5,561	3,031	1,342	9,934	185	10,119

## NUMBERS UNEMPLOYED IN THE UNITED KINGDOM: REGIONAL ANALYSIS

The total number of unemployed persons on the registers of Employment Exchanges in the United Kingdom at 15th January, 1951, was 366,649, including 246,913 men, 11,210 boys, 97,948 women and 10,578 girls. Of the total, 355,788 (including 5,124 casual workers) were wholly unemployed and 10,861 temporarily stopped. The temporarily stopped are persons suspended from work on the understanding that they are shortly to return to their former employment.

The numbers of unemployed persons on the registers in each Region at 15th January, 1951, are shown below.

Region		Wholly Unemployed (including Casuals)				Temporarily Stopped	Total

## NUMBERS UNEMPLOYED : INDUSTRIAL ANALYSIS

The statistics given below show, industry by industry, the numbers of persons who were registered as unemployed at 15th January, 1951, distinguishing those wholly unemployed (i.e., out of a situation) from those temporarily stopped (i.e., suspended from work on the understanding that they were shortly to return to their former employment). The figures include all unemployed persons on the registers of Employment Exchanges with the

exception of registered severely disabled persons who are unlikely to obtain work other than under special conditions.

The industrial analysis is based on the Standard Industrial Classification. The figures for each industry represent the numbers of unemployed persons whose last employment was in that industry.

Industry	Great Britain							United Kingdom (all classes)		
	Wholly unemployed (including casuals)		Temporarily stopped		Total			Males	Females	Total
	Males	Females	Males	Females	Males	Females	Total

\* The figures for coal mining exclude all the unemployed at 15th January, 1951, who, although previously employed in coal mining, are known to be unfit for employment in that industry. These men are, however, included with "Other persons not classified by industry" on the next page.

## Numbers Unemployed : Industrial Analysis—continued

Industry	Great Britain							United Kingdom (all classes)

### Placing Work of the Employment Exchanges

The Table below shows for the four-week periods ended 22nd November and 20th December, 1950, the numbers of vacancies filled by Employment Exchanges and other Local Offices of the Ministry of Labour and National Service in Great Britain, together with the numbers remaining unfilled at the end of each period. The figures include placings, etc., by the Youth Employment Offices of certain Local Authorities.

	Four weeks ended 22nd November, 1950		Four weeks ended 20th December, 1950		Total Number of Placings, 22nd Dec., 1949, to 20th Dec., 1950 (52 weeks)
	Placings	Vacancies Unfilled	Placings	Vacancies Unfilled	
Men aged 18 and over	108,329	142,684	97,541	133,850	1,731,688
Boys under 18	10,766	51,729	8,804	56,213	212,617
Women aged 18 and over	54,760	92,149	43,028	89,440	799,118
Girls under 18	10,311	64,178	8,299	67,706	208,564
<b>Total</b>	<b>184,166</b>	<b>350,740</b>	<b>157,672</b>	<b>347,209</b>	<b>2,951,987</b>

The figures of vacancies filled relate only to those vacancies which were filled by applicants submitted by Employment Exchanges, i.e., they do not include engagements of workpeople by employers that were made without the assistance of Employment

Exchanges. The figures are therefore not comparable with the percentage rates of engagements given in the "Labour Turnover" Table on the next page which relate to engagements of all kinds during the period in question.

The figures of vacancies unfilled represent the number of vacancies notified by employers to Employment Exchanges and remaining unfilled at the specified dates. They do not purport to represent the total number of vacancies which require to be filled, and they in fact fall short of the total number for several reasons. In the first place, it is probable that some employers do not notify their vacancies to Employment Exchanges and prefer to rely on other methods for finding the workpeople whom they require. Secondly, employers who do use the Employment Exchange system may, in certain circumstances (e.g., when they require large numbers of additional workpeople, or where labour of the kind they require is scarce), have a "Standing Order" with the Employment Exchange to submit all suitable applicants to them without "notifying" any specific number of vacancies, and the vacancies remaining unfilled in such cases will not be included in the figures. Nevertheless comparison of the figures for various dates provides some indication of the change in the demand for labour.

The Table below shows the numbers of vacancies filled during the four weeks ended 20th December, 1950, in each of the industry "Orders" of the Standard Industrial Classification and in certain selected industries within the Orders, together with cumulative totals for the period 22nd December, 1949, to 20th December, 1950.

Industry Group	Placings during four weeks ended 20th December, 1950					Total Number of Placings, 22nd December, 1949, to 20th December, 1950 (52 weeks)

1950, and of the numbers of notified vacancies remaining unfilled at the end of the period:—

### Labour Turnover

The Table below shows labour turnover rates (per 100 employees) in the manufacturing industries during the four-week period ended 25th November, 1950, with separate figures for males and females. The figures are based on information given by employers with more than 10 employees on returns which they render every month to the Ministry of Labour and National Service. Each return shows (a) the numbers of males and females on the pay-roll at the date of the return and also (b) at the date of the previous return, and an additional item shows (c) the numbers on the pay-roll at the later of the two dates who were not on the pay-roll at the earlier date. The figures in item (c) are adopted as representing engagements during the period, and the figures of discharges and other losses are obtained by adding the numbers engaged during the period to the numbers on the pay-roll at the beginning of the period and deducting from the figures thus obtained the numbers on the pay-roll at the end of the period. It must be borne in mind, however, that the figures of engagements obtained in the way indicated above do not

include persons engaged during the period who were discharged or otherwise left their employment before the end of the same period, and the percentage rates both of engagements and of discharges, etc., in the Table below accordingly understate, to some extent, the total intake and wastage during the period. In spite of this limitation, however, the figures enable comparisons to be made between the turnover rates of different industries and also between the figures for consecutive months for the same industry, in the latter case after allowance is made for any difference in the length of period covered. It is also important to note that the figures for any industry represent the aggregated totals of the numbers engaged and discharged by all firms rendering returns in the industry. Some of the persons who were discharged or left their employments during the period were probably engaged by other firms in the same industry, and the net numbers of engagements and losses of an industry, considered as one unit, will be less in every case than the sum of the figures for the individual firms.

Labour Turnover Rates in Manufacturing Industries: 4 weeks ended 25th Nov., 1950

Industry	Number of Engagements per 100 employed at beginning of period			Number of Discharges and other Losses per 100 employed at beginning of period

## Insured Persons Absent from Work owing to Sickness or Industrial Injury

The Table in the next column shows the numbers of insured persons in the various Regions of England, in Scotland and Wales, and in Great Britain as a whole, who were absent from work owing to sickness or industrial injury on 16th January, 1951, and 19th December, 1950, with the corresponding figures for 17th January, 1950, and 20th December, 1949. The statistics have been compiled by the Ministry of National Insurance from claims to sickness or industrial injury benefit under the National Insurance Act, 1946, and the National Insurance (Industrial Injuries) Act, 1946, respectively.

A relatively small number of claims do not result in the payment of benefit, but, because they indicate certified incapacity for work, such claims are included in the Table. Injury benefit is payable in respect of both industrial accidents and prescribed industrial diseases. The large majority of persons in receipt of industrial disablement benefit who are also incapable of work qualify for sickness benefit and are therefore included in the columns of the Table which relate to absences due to sickness and not to those relating to absences due to industrial injury.

## Work of Appointments Department

The particulars given below, which relate to the work of the Appointments Department of the Ministry of Labour and National Service, are in continuation of those published in previous issues.

### Technical and Scientific Register

The Technical and Scientific Register operates centrally on a national basis from York House, Kingsway, London, W.C.2 (Telephone number, Temple Bar 8020), but it also has a representative in Scotland at the Glasgow District Appointments Office, 450 Sauchiehall Street, Glasgow, C.2 (Telephone number, Glasgow Douglas 7161).

The Register, which is assisted by Advisory Committees composed of members of the professions concerned, provides a placing and advisory service for physicists, mathematicians, chemists (other than pharmacists), metallurgists, agriculturists, biologists and other scientists, professional engineers, architects, surveyors, town planners, estate agents and valuers. The qualification for enrolment is in general a university degree or membership of the appropriate professional institution. A register of vacancies is maintained, which includes a wide range of overseas vacancies.

The total number of persons enrolled on the Technical and Scientific Register at 15th January, 1951, was 5,180\* ; this figure included 3,858 registrants who were already in work but desired a change of employment, and 1,322 registrants who were unemployed.

The numbers of vacancies notified, filled, etc., between 12th December and 15th January (5 weeks) are shown below.

Vacancies outstanding at 12th December ..	3,003
" notified during period ..	509
" filled during period ..	213
" cancelled or withdrawn ..	342
" outstanding at 15th January ..	2,957

### Appointments Register

The Appointments Register is concerned with the placing of persons having professional, administrative, managerial or executive experience or qualifications, and those having technical qualifications not appropriate to the Technical and Scientific Register. The registers are maintained at the London Appointments Office and at the District Appointments Offices in the towns set out in the Table below, which shows the numbers of registrations at each of the Offices.

Appointments Office	In Employment		Unemployed	
	Men	Women	Men	Women
London ..	4,534	505	4,291	512
Bristol ..	676	56	430	48
Birmingham ..	1,215	47	308	35
Nottingham ..	590	37	151	30
Leeds ..	799	62	217	32
Liverpool ..	704	45	225	31
Manchester ..	1,250	65	383	49
Newcastle ..	689	52	205	35
Edinburgh ..	500	80	244	50
Glasgow ..	859	97	228	61
Cardiff ..	277	19	160	41
Total† ..	12,093	1,065	6,842	924

The total number of persons on the registers of the Appointments Offices at 15th January was 20,924†, consisting of 18,935

\* This figure includes 892 registrants who were also registered at District Appointments Offices and 154 unemployed registrants who were also registered at Employment Exchanges.

† Excluding 131 persons registered for overseas employment only and 2,610 whose registrations had been referred to the Local Offices for assistance in placing. Registrations of nurses and midwives are also excluded.

men and 1,989 women. Of these, 2,795 men and three women were ex-Regular personnel. The number on the registers included 12,093 men and 1,065 women who were in employment, while 6,842 men and 924 women had registered as unemployed at some date in the preceding two months and were not known to be in employment at 15th January. Of those in employment, 1,043 men and one woman were ex-Regular personnel. The numbers of ex-Regular personnel included in the numbers unemployed were 1,752 men and two women.

During the period 12th December, 1950, to 15th January, 1951, there were new registrations by 1,762 men and 214 women, and during the same period the registrations of 2,670 men and 361 women lapsed.

The Table below shows the numbers of vacancies (other than those for nurses and midwives) notified, filled, etc., between 12th December and 15th January.

	Men*	Women
Vacancies outstanding at 12th December ..	2,304	213
" notified during period ..	959	114
" cancelled or withdrawn during period ..	573	62
" filled during period ..	365	56
" unfilled at 15th January ..	2,325	209

The total numbers of vacancies filled during the period 17th October, 1950, to 15th January, 1951, were 1,113 men and 159 women, which included 148 filled by ex-Regular men and one filled by an ex-Regular woman.

### Nursing Appointments Service

As indicated above, the numbers of vacancies notified and filled in the nursing and midwifery professions are not included in the statistics relating to the Appointments Register. The placing of men and women in nursing and midwifery vacancies and in vacancies for certain medical auxiliaries (radiographers, physiotherapists, occupational therapists and medical laboratory technicians) notified by hospitals and other employers is carried out by the Nursing Services Branch of Appointments Department through the Nursing Appointments Offices. These Offices also provide a Careers Advice Service for the above professions both for potential students and for qualified persons seeking other posts.

In addition to the 137 Nursing Appointments Offices situated in the towns set out in the issue of this GAZETTE for November (page 389), one new Nursing Appointments Office has been opened at Pontypridd.

Statistics of vacancies for nurses, midwives and the classes of medical auxiliaries mentioned above in respect of the period from 1st October to 31st December, 1950, are given below.

	Men	Women
Vacancies outstanding at 1st October ..	2,738	25,502
" filled during period ..	239†	2,848†
" outstanding at 31st December ..	2,656	24,654

The total of 27,310 vacancies outstanding at 31st December included 2,235 vacancies for nursery nurses, nursing assistants, nursing orderlies and medical auxiliaries. An analysis of the remaining 25,075 vacancies, by grade of nurse, etc., is given below.

Trained Nurses ..	7,303	Pupil Midwives ..	1,265
Student Nurses ..	10,657	Assistant Nurses ..	4,186
Midwives ..	839	Pupil Assistant Nurses ..	825

\* This column includes vacancies for which employers were willing to accept either men or women.

† These figures include 389 vacancies filled by part-time workers.

## Employment in the Coal Mining Industry in December

The statistics given below in respect of employment, etc., in the coal mining industry in December have been compiled by the Ministry of Fuel and Power from information provided by the National Coal Board.

The average weekly number of wage-earners on the colliery books in Great Britain during the five weeks ended 30th December was 687,700, compared with 686,500 for the four weeks ended 25th November and 709,000 for the five weeks ended 31st December, 1949.

The total numbers who were effectively employed were 630,400 in December, 634,200 in November and 652,500 in December, 1949 ; these figures exclude wage-earners who were absent for any reason (including holidays) for the whole of any week. The Table below shows the numbers of wage-earners on the colliery books in the various Districts in December, together with the increase or decrease\* in each case compared with November, 1950, and December, 1949.

### Average Numbers of Wage-earners on Colliery Books—Analysis by Districts

District†	Average numbers of wage-earners on colliery books during 5 weeks ended 30th December, 1950	Increase (+) or decrease (-) compared with the average for	
		4 weeks ended 25th November, 1950	5 weeks ended 31st December, 1949
Northumberland ..	43,100	+ 100	+ 300
Cumberland ..	5,600	- 100	- 200
Durham ..	106,800	...	- 2,800
South and West Yorkshire ..	134,000	+ 400	- 4,200
North Derbyshire ..	36,200	+ 100	700
Nottinghamshire ..	43,900	+ 100	- 1,300
South Derbyshire and Leicestershire ..	14,600	...	- 200
Lancashire and Cheshire ..	47,800	+ 100	- 2,800
North Wales ..	8,500	+ 100	- 100
North Staffordshire ..	18,500	...	- 1,600
Cannock Chase ..	15,800	- 100	- 1,300
South Staffordshire, Worcester-shire and Shropshire ..	5,300	...	- 300
Warwickshire ..	14,900	+ 100	- 900
South Wales and Monmouthshire ..	99,900	+ 200	- 3,600
Forest of Dean, Bristol and Somerset ..	6,000	...	- 700
Kent ..	6,000	...	...
England and Wales ..	606,900	+ 1,000	- 20,400
Fife and Clackmannan ..	23,300	+ 100	+ 500
The Lothians ..	12,400	...	+ 100
Central West ..	16,700	...	- 900
Central East ..	13,000	+ 100	- 300
Ayrshire, etc. ..	15,400	...	- 300
Scotland ..	80,800	+ 200	- 900
Great Britain ..	687,700	+ 1,200	- 21,300

It is provisionally estimated that during the five weeks of December about 5,620 persons were recruited to the industry, while the total number of persons who left the industry was about 3,600 ; the number on the colliery books thus showed a net increase of 2,020. During the four weeks of November there was a net decrease of 330.

The average number of shifts worked per week by coal-face workers who were effectively employed was 4·88 in December, 5·04 in November and 4·81 in December, 1949. The corresponding figures for all workers who were effectively employed were 5·19, 5·40 and 5·11.

With regard to absenteeism in the coal mining industry, separate figures are compiled in respect of (a) voluntary absenteeism (absences for which no satisfactory reason is given) and (b) involuntary absenteeism (absences due mainly to sickness). The figures for December and November, 1950, and December, 1949, which are given in the next Table, represent the numbers of shifts lost through absenteeism, expressed as percentages of the total numbers of shifts that could have been worked.

### Percentages of Shifts lost through Absenteeism

	December, 1950	November, 1950	December, 1949
Coal Face Workers :			
Voluntary ..	7·59	6·03	6·78
Involuntary ..	6·70	7·32	6·89
All Workers :			
Voluntary ..	5·76	4·52	5·04
Involuntary ..	6·23	6·52	6·16

For face-workers the output per man-shift worked was 3·15 tons in December, compared with 3·18 tons in the previous month and 3·08 tons in December, 1949.

The output per man-shift calculated on the basis of all workers was 1·22 tons in December ; for November, 1950, and December, 1949, the figures were 1·22 tons and 1·19 tons, respectively.

\* " No change " is indicated by three dots.

† As from 1st January, 1950, the districts shown conform to the organisation of the National Coal Board.

## Employment Overseas

### UNION OF SOUTH AFRICA

According to the general index of employment compiled by the Office of Census and Statistics, the number employed in manufacturing, transportation and mining (other than alluvial gold diggings) in August was 0·3 per cent. lower than in the previous month but 0·4 per cent. higher than in August, 1949.

### UNITED STATES OF AMERICA

The number of civilians in employment as wage or salary earners in industries other than agriculture and domestic service in November is estimated by the Department of Labor to have been approximately 45,756,000. This was 0·3 per cent. lower than the figure for the previous month but 6·9 per cent. higher than for November, 1949. The index figure of wage-earners' employment in manufacturing industries (base, average of 1939 = 100) showed a decrease of 0·9 per cent. in November compared with the previous month but an increase of 15·2 per cent. compared with November, 1949.

The Bureau of the Census estimate that the total number of unemployed persons at the middle of November was about 2,240,000, compared with 1,940,000 at the middle of the previous month and 3,409,000 at the middle of November, 1949.

### BELGIUM

The average daily number of persons recorded as wholly or partially unemployed during November was 191,024, compared with 163,994 in the previous month and 259,387 in November, 1949. The numbers of persons wholly unemployed included in these figures were 153,198, 138,000 and 210,403, respectively. The number of working days lost in November as a result of unemployment was about 4,402,000, compared with over 4,700,000 in the previous month and nearly 6,000,000 in November, 1949.

### DENMARK

At the end of December returns received by the Danish Statistical Department from approved unemployment funds showed that 128,679, or 20·0 per cent. of a total membership of about 643,000, were unemployed, compared with 7·6 per cent. at the end of the previous month and 18·2 per cent. at the end of December, 1949. Of the total, 60,413 had been unemployed for seven days or more and the remainder had been unemployed for less than seven days or were ineligible for employment on account of age, etc.

### FRANCE

The number of persons registered as applicants for employment at the beginning of January was 151,254, of whom 49,271 were wholly unemployed persons in receipt of assistance. The corresponding figures were 144,672 and 46,678 in the previous month and 153,545 and 46,396 in January, 1950.

### GERMANY

In the Federal Area the number unemployed at the end of December was 1,689,989, compared with 1,316,165 at the end of the previous month and 1,558,469 at the end of December, 1949. In the Western Sectors of Berlin the corresponding figures at the same dates were 286,472, 279,326 and 278,713.

### IRISH REPUBLIC

The number of unemployed persons on the live register of Employment Exchanges at 27th January was 65,877, compared with 61,534 at 30th December and 71,062 at 28th January, 1950.

### NETHERLANDS

The number of persons registered at Employment Exchanges at the end of December was 108,127, of whom 80,753 were wholly unemployed. 2,158 were temporarily stopped and 25,216 were relief workers. At the end of the previous month the number registered was 77,885 (56,584 wholly unemployed) and at the end of December, 1949, it was 88,686 (59,935 wholly unemployed).

### SWEDEN

Preliminary information received by the Swedish Social Board from trade unions with a total membership of about 937,000 showed that 1·0 per cent. of their members were unemployed at the end of September, compared with 1·3 per cent. at the end of the previous month and 1·6 per cent. at the end of September, 1949.

### SWITZERLAND

The number of registered applicants for employment at the end of December who were wholly unemployed was 15,376 or 10·2 per thousand of the employed population (exclusive of apprentices) according to the census of 1941, compared with 6,219 or 4·1 per thousand at the end of the previous month and 17,838 or 11·9 per thousand at the end of December, 1949.

WAGES, DISPUTES, RETAIL PRICES

Contents of this Section

Table with columns: Page, U.K. Index of Retail Prices, Retail Prices Overseas, Page. Includes 'Changes in Rates of Wages and Hours of Labour' (72), 'Index of Rates of Wages' (79), 'Industrial Disputes' (80).

Changes in Rates of Wages and Hours of Labour
RATES OF WAGES

Changes in January

In the industries covered by the Department's statistics,\* the changes in the rates of wages reported to have come into operation in the United Kingdom during January resulted in an aggregate increase estimated at approximately £564,000 in the weekly full-time wages of about 1,849,000 workpeople.

The principal increases affected workpeople employed in coal mining, the cotton industry, road passenger transport services, the iron and steel industry, the wool textile industry in Yorkshire and laundries. Others receiving increases included workers employed in the heavy chemicals manufacturing industry, electricity supply undertakings, agriculture in Northern Ireland, the home grown timber trade in England and Wales, boot and shoe repairing, and as manual workers in the non-trading services of local authorities in Scotland.

In the coal mining industry the national minimum weekly wages were increased by 7s. a week for adult underground workers and by 5s. for adult surface workers; shift rates for adult day-wage underground and surface workers were increased by 1s. 2d. and 10d. a shift, respectively. In the cotton industry there was an increase of 10 per cent. on the total weekly wages. For workers employed in road passenger transport services (trams, trolleybuses, buses and coaches), there were increases of from 7s. to 12s. a week for drivers and conductors in the London area, and of 7s. 6d. in other areas; maintenance staff had increases of 5s. to 6s. 2d. in London and of 7s. 6d. or 6s. 6d. in other areas. In the iron and steel industry there were small increases payable under sliding-scale arrangements based on the index of retail prices. In the wool textile industry in Yorkshire there was an increase of 5 per cent. on weekly rates, with minimum advances of 5s. and 3s. 9d. respectively for men and women. The general minimum time rates fixed under the Wages Councils Act for workers employed in laundries were increased by 1½d. an hour for men and by 1d. for women.

In the heavy chemicals manufacturing industry, one group of workpeople received increases in basic time rates of 3d. an hour for men and 2d. for women; another group had increases of 2d. for men and 1½d. for women, with further increases of 1d. and ½d., respectively, due to operate from the first pay week in June. Workpeople employed in electricity supply undertakings received an increase of 1½d. an hour. For adult male workers employed in agriculture in Northern Ireland there was an increase in the statutory minimum time rates of 6s. a week. In the home grown timber trade in England and Wales, there were increases in the minimum rates payable to forest workers of 5s. 6d. or 8s. 10d. a week, according to occupation, for men and of 2s. for women; men employed in sawmills received increases of 1d. to 2d. an hour, according to occupation and class of mill, and women 1d. or 1½d. In the boot and shoe repairing industry the statutory minimum time rates fixed under the Wages Councils Act for men and women were increased by amounts varying from 2s. 6d. to 8s. a week, according to occupation. Manual workers employed in the non-trading services of local authorities in Scotland received increases in basic rates of 5s. 6d. a week for men and of 3s. 8d. for women. In the case of workers employed by local authorities formerly in group 4, all of which were upgraded at the beginning of the 1950/51 financial year, the increases were to be applied in two stages—3s. for men and 2s. for women in January, and 2s. 6d. and 1s. 8d., respectively, in July.

Of the total increases of £564,000, about £343,000 resulted from direct negotiations between employers and workpeople or their representatives; about £88,000 was the result of arrangements made by Joint Industrial Councils or other joint standing bodies established by voluntary agreement; about £67,000 resulted from Orders made under the Wages Councils Acts or the Agricultural Wages Acts, Northern Ireland; about £60,000 was the result of arbitration awards; and the remainder resulted from the operation of sliding scales based on the index of retail prices.

HOURS OF LABOUR

No changes in hours of labour were reported during the month.

PRINCIPAL CHANGES IN RATES OF WAGES REPORTED DURING JANUARY

Table with columns: Industry, District, Date from which Change took effect, Classes of Workpeople, Particulars of Change. Rows include Agriculture, Coal Mining, Other Mining and Quarrying, Chemicals, etc., Manufacture.

\* The particulars of numbers affected by changes in rates of wages and working hours, and of the amount of change in weekly wages and hours of labour, exclude changes affecting clerical workers, for whom the information available is not sufficient to form a basic for statistics. The estimates of the effects of the changes on weekly wages are based on normal conditions of employment and do not take into account the effect either of short time or of overtime.

† These increases took effect under an Order issued under the Agricultural Wages (Regulations) Acts (Northern Ireland). ‡ Subject to the proviso that the agreed nominal value, up to 10 tons a year, of concessionary coal shall be excluded.

§ The "skilled shilling" refers to an increase of 1s. a shift granted to skilled craftsmen and certain other day-wage workers under the terms of the National Wages Agreement of April, 1944.

¶ Under sliding-scale arrangements based on the official index of retail prices.

\*\* Wages are subject to further flat-rate additions (not subject to sliding-scale arrangements) totalling 3s. 8d. a shift, plus 9d. to dotal workers whose base rate is less than 8s. 14d. a shift, for men and youths 18 years and over, with proportional additions for youths and boys, or additions varying at different mines on tonnage rates.

\*\* Wages are subject to further flat-rate additions (not subject to sliding-scale arrangements) of 1s. a shift for men, of 9d. for youths 18 and under 21 years, and of 6d. for boys.

†† Wages are subject to further flat-rate additions (not subject to sliding-scale arrangements) of 1s. a shift for men and youths 18 years and over, and of 6d. for boys.

Principal Changes in Rates of Wages Reported during January—continued

Table with columns: Industry, District, Date from which Change took effect, Classes of Workpeople, Particulars of Change. Rows include Other Mining and Quarrying, Building Brick and Allied Industries, Chemicals, etc., Manufacture.

\*\* These increases were agreed by the Chemical and Allied Industries Joint Industrial Council; they do not apply to workpeople employed by constituent firms of the Imperial Chemical Industries Ltd. Further increases of 1d. an hour for men, ½d. for women and proportional amounts for younger workers are to operate from the first pay week in June, 1951.

† These increases apply to workers employed by firms (other than the metal group) which are constituent firms of the Imperial Chemical Industries Ltd., including lime works at Buxton and Colwyn Bay. The rates are to remain in operation until 31st December, 1951.

‡ The rates quoted are subject to augmentation under the company's discretionary bonus scheme.

## Principal Changes in Rates of Wages Reported during January—continued

Industry	District	Date from which Change took effect	Classes of Workpeople	Particulars of Change
Coke Manufacture	Scotland, Cumberland, South Durham, Cleveland, Lancashire, Lincolnshire, Northants, and South Wales (certain firms)*	7 Jan. Maintenance craftsmen employed on coke oven and blastfurnace plants, in steel melting shops, and in steel rolling mills	Flat-rate additions to wages, previously granted, increased† by 1·2d. a shift (7s. 1·2d. to 7s. 2·4d. for shift rated workers) or by 0·16d. an hour (11·62d. to 11·78d. for hourly rated workers).
	South-West Wales	do.	Workpeople employed in Siemens steel manufacture, except bricklayers and carpenters	Flat-rate additions to wages, previously granted, increased† by 1·2d. a shift (6s. 1·2d. to 6s. 2·4d.) for men and for women employed on men's work, by 0·8d. (4s. 0·8d. to 4s. 1·6d.) for youths 18 and under 21 years, and by 0·6d. (3s. 0·6d. to 3s. 1·2d.) for youths under 18 years.
	West of Scotland	Pay period beginning 1 Jan.	Workpeople employed at iron puddling furnaces and mills and sheet mills	Flat-rate additions to wages, previously granted, increased† by 1·4d. a shift (7s. 4·2d. to 7s. 5·6d.) for men, by 1·05d. (5s. 6·15d. to 5s. 7·2d.) for youths 18 and under 21 years, and by 0·7d. (3s. 8·1d. to 3s. 8·8d.) for boys under 18.
	Sheffield	Beginning of first full pay period following 13 Nov., 1950	Workpeople employed on the Sheffield shift system in steel melting and steel manipulating departments	Existing war bonus increased by 1s. 4d. a shift (10s. to 11s. 4d. a shift) for men remunerated on a plain time basis; grading payments increased by 10d. a shift for tonnage workers (including part-datal and part-tonnage workers) whose inclusive earnings in a normal week are between 130s. and 160s., and by 1s. 4d. a shift for those whose inclusive earnings are less than 130s.; shift bonuses for youths and boys increased by 6d. a shift for those under 18 years, and by 1s. for those 18 to 20.
Tinplate Manufacture	South Wales, Monmouthshire and Gloucestershire	7 Jan.	Men, youths, women and juveniles (except apprentices)	Flat-rate additions to wages, previously granted, increased† by 1·2d. a shift (7s. 1·2d. to 7s. 2·4d.) for men and for women engaged specifically to replace male labour, by 0·8d. (4s. 8·8d. to 4s. 9·6d.) for youths 18 and under 21 years and for women 18 years and over, and by 0·6d. (3s. 6·6d. to 3s. 7·2d.) for workers under 18.
Tube Manufacture	Newport and Landore	do.	Men, youths and boys	Cost-of-living bonus increased† by 1·16d. a shift (6s. 9·2d. to 6s. 10·36d.) for men, and by 0·58d. (3s. 4·6d. to 3s. 5·18d.) for youths and boys.
Galvanising	England and Wales	1 Jan.	Galvanisers and ancillary workers employed at steel sheet works, other than those engaged in the process of annealing	Flat-rate additions to wages, previously granted, increased† by 1·2d. a shift (7s. 1·2d. to 7s. 2·4d.) for men and women 21 years and over, by 0·9d. (5s. 3·9d. to 5s. 4·8d.) for youths and girls 18 and under 21 years, and by 0·6d. (3s. 6·6d. to 3s. 7·2d.) for those under 18.
Railway Wagon Repairing	Great Britain	Beginning of first full pay period following 13 Nov., 1950	Men, apprentices and youths employed by members of the Wagon Repairing Association	Increases of 11s., 9s. 6d. or 8s. a week, according to occupation, for men 21 years and over on timework, and of 3s. to 9s., according to age, for apprentices and youths; piece rates to be such as will enable a worker of average ability to earn at least 45 per cent. on the existing base rates, instead of 27½ per cent. as hitherto. Minimum rates after change for timeworkers outside the London area include: wagon repairers, Grade 1 118s. 6d. a week, outstation repairers, Grade 1 118s. 6d., Grade 2 111s. 6d., Grade 3 101s. 6d., letterers, blacksmiths, riveters and/or erectors 118s. 6d., electric welders 113s., wheel turners 110s. 6d., holders-up, cold saw operators, profile cutters 110s., loco, crane, tractor or traveraser drivers 108s., painters, lifters, burner operators 106s., shunters 105s. 6d., blacksmiths' strikers 103s. 6d., iron carriers 101s. 6d., sawyers and machinists, Grade 1 117s., Grade 2 106s. 6d., punch and shearer operators, Grade 1 115s. 6d., Grade 2 107s. 6d., outstation chagman without assistant 120s. 6d., with one assistant 123s., with two assistants 125s. 6d., labourers 100s.; in the London area rates are 5s. higher in each case.

\* These increases affected employees of firms which are members of the Iron and Steel Trades Employers' Association.

† Under sliding-scale arrangements based on the official index of retail prices.

‡ These increases affected mainly the employees of firms which are members of the Sheet Trade Board, the districts concerned being Staffordshire, Cheshire, Tees-side, South Wales and Monmouthshire and the Glasgow district.

§ These increases affected employees of firms which are members of the Iron and Steel Trades Employers' Association, the principal districts concerned being the North-East Coast, Cumberland, Lancashire, South Yorkshire (excluding Sheffield special steel district), Lincolnshire, South Wales and West of Scotland.

¶ These increases were agreed on 2nd January, 1951, and had retrospective effect to the date shown.

‡ Tonnage workers whose inclusive weekly earnings are 160s. or over do not receive any increase, but consideration is to be given to these workers in discussions which are to take place on the simplification and consolidation of Sheffield shift workers' rates.

## Principal Changes in Rates of Wages Reported during January—continued

Industry	District	Date from which Change took effect	Classes of Workpeople	Particulars of Change
Heavy Edge Tool Manufacture	Sheffield	First full pay period commencing on or after 18 Dec., 1950	Men, youths and boys	New consolidated hourly time rates adopted, incorporating increases of 11s. a week for skilled datal workers and of 8s. for semi-skilled and unskilled datal workers (with proportionate increases for youths and boys) and replacing the basic datal rates and datal workers' bonus of 40s. a week previously paid; piecework prices to be such as to enable a worker of average ability to earn at least 45 per cent. on the existing hourly basic datal rates instead of 27½ per cent. as hitherto, to which is to be added the pieceworkers' bonus of 34s. a week of 44 hours.
Horseshoeing, etc.	Great Britain (various localities)	1 Jan.	Farriers and blacksmiths	Increases of 1½d. an hour for dayworkers, and of 1s. a day for pieceworkers, with proportional increases for apprentices. Rates after change: London (within a radius of 12 miles from Charing Cross), dayworkers—firemen 3s. 0½d. an hour, doormen 2s. 11½d.; pieceworkers—firemen 23s. 8d. a day, doormen 23s. 2d.; dayworkers in other districts—industrial areas, firemen 2s. 10½d. an hour, doormen 2s. 10d., small county towns 2s. 9½d., 2s. 8½d., agricultural districts 2s. 9d., 2s. 8d.

		do.§	Male and female messengers and paper keepers	Increases of 6s. a week for men, and of 5s. for women. Rates after change: London—messengers, men 106s. a week, rising to 109s. after one year's service, women 85s. rising to 87s. 6d. after one year's service; paper keepers, men 109s. rising annually by 3s. to 118s., women 87s. 6d., rising annually by 2s. 6d. to 95s.; provincial differentiation to remain as at present.
		do.§	Non-industrial car drivers	Increases of 6s. a week for men and of 5s. for women. Rates after change: London—men 114s. a week, women 94s.; provincial differentiation to remain as at present.
		First pay period following 5 Jan.	Fire fighting staff employed by the War Office and Air Ministry	Increase of 9s. a week. Weekly rates after change for a 60-hour week: War Office—head firemen (double engine stations) 153s., head firemen 148s., assistant head firemen 143s., leading firemen 136s., firemen 133s.; Air Ministry—head firemen 148s., senior firemen 143s., firemen 133s.
Local Authority Services	Scotland	Beginning of first full pay period commencing on or after 1 Jan.	Manual workers employed in non-trading services of local authorities, except those whose wages are regulated by movements in other industries	Increases of 5s. 6d. a week in basic rates for adult male workers (3s. for workers employed by authorities formerly in Group 4), of 3s. 8d. for adult female workers (2s. for those formerly in Group 4) and of proportional amounts for younger workers. Basic rates after change for adult able-bodied male manual workers: Group 1—cities, burghs and counties 105s. 6d. a week, Group 2—cities and burghs 102s. 6d. (100s. for authorities formerly in Group 4), Group 3—counties 101s. 6d. (99s. for authorities formerly in Group 4).‖
Laundering	Great Britain	10 Jan.	Male workers (including transport workers), other than enginemen and stokers  Female workers, other than transport workers or those employed as substitutes for male workers  Female workers employed as substitutes for male workers, including drivers	Increases of 1½d. an hour (5s. 7½d. a week) in general minimum time rates for workers 21 years or over, and of ¾d. to 1½d., according to age, for younger workers; new piecework basis time rate fixed at one-and-one-eighth times the hourly general minimum time rates applicable according to age. General minimum time rates after change: men 21 years or over 2s. 1½d. an hour or 95s. 7½d. a week of 45 hours, youths and boys 10½d. an hour or 39s. 5d. a week at under 16 years, rising to 1s. 10½d. an hour or 85s. 3½d. a week at 20 and under 21.¶  Increases of 1d. an hour (3s. 9d. a week) in general minimum time rates for workers 20 years or over, and of ¾d. to 1d., according to age, for younger workers; increase of 1d. an hour (1s. 6d. to 1s. 7d.) in piecework basis time rate. General minimum time rates after change: women 20 years or over 1s. 5d. an hour or 63s. 9d. a week of 45 hours, girls 9½d. an hour or 34s. 10d. a week at 15 years, rising to 1s. 3½d. an hour or 58s. 1½d. a week at 19 and under 20.¶  Increases in general minimum time rates of varying amounts, according to age or work performed. General minimum time rates after change include: female workers who perform in full the duties actually or normally undertaken by adult male workers 2s. 1½d. an hour.¶

\* These increases are the result of awards of an Independent Arbitration Tribunal, dated 29th December, 1950.

† The maximum of the revised scales is reached after 12 months' service, with an intervening increment after 6 months. Previously the maximum was reached after 18 months' service for drivers and conductors on central buses and conductors on trams, trolleybuses and coaches, and after 24 months' service for drivers on trams and trolleybuses and drivers and conductors on country buses; the scale for drivers of coaches consists, as previously, of a starting rate and a higher rate payable after 12 months.

‡ These increases were granted in January with retrospective effect to the date shown. The classification for provincial differentiation is that used by the Post Office. Class 1 areas cover offices outside the London Postal area but within a radius of 12 miles from Charing Cross, and those in the larger towns of the United Kingdom. Class 2 and 3 areas cover offices elsewhere.

§ These increases were granted in January with retrospective effect to the date shown.

¶ Any rates at present paid in excess of the standard basic rates, other than merit or special duties payments, are to be merged in the current increases. In the case of local authorities formerly in Group 4, all of which were upgraded at the beginning of the financial year 1950/51, the increases are to be applied in two stages—3s. for men and 2s. for women as from the beginning of the first full pay period commencing on or after 1st January, and 2s. 6d. and 1s. 8d., respectively, from the beginning of the first full pay period commencing on or after 1st July, 1951.

¶ These increases took effect under an Order issued under the Wages Councils Act. See page 37 of the January issue of this GAZETTE.

## Principal Changes in Rates of Wages Reported during January—continued

Industry	District	Date from which Change took effect	Classes of Workpeople	Particulars of Change
Hairdressing	Great Britain	8 Jan.	Managers, managerses, chargehands and operative hairdressers, employed in gentlemen's saloons	Increase in statutory minimum rates of remuneration of 5s. a week. Statutory minimum rates after change in gentlemen's saloons: managers and managerses, London area 130s. a week, Provincial areas A and B 125s., chargehands 115s., 110s., male or female operative hairdressers during first year of employment, 75s., 70s., thereafter 105s., 100s.*

\* These changes took effect under an Order issued under the Wages Councils Act. See page 37 of the January issue of this GAZETTE. The Order provides that, where a chargehand, manager or managers is responsible for both a ladies' and a gentlemen's saloon, the rate applicable is to be the rate appropriate to the worker when employed in either a ladies' or a gentlemen's saloon, whichever is the higher.

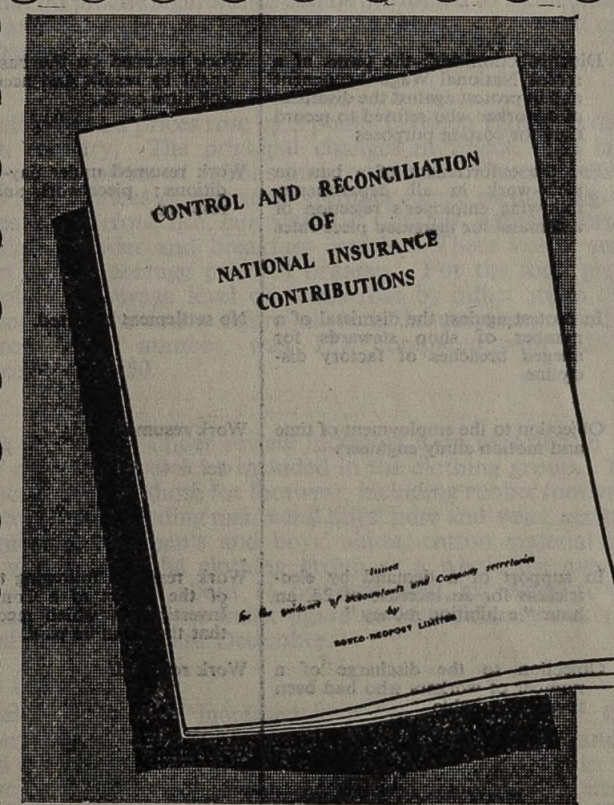

## Index of Rates of Wages

The index figure of rates of wages measures the movement, from month to month, in the level of full-time weekly rates of wages in the principal industries and services in the United Kingdom compared with the level at 30th June, 1947, taken as 100. The industries and services covered by the index and the method of calculation were described on page 41 of the issue of this GAZETTE for February, 1948. The index is based on the recognised rates of wages fixed by collective agreements between organisations of employers and workpeople, arbitration awards or statutory orders. The percentage increases in the various industries are combined in accordance with the relative importance of the industries, as measured by the total wages bill in 1946. The index does not reflect changes in earnings due to such factors as alterations in working hours, or in piece-work earnings due to variations in output or the introduction of new machinery, etc.

Where necessary the figures have been revised to include changes arranged with retrospective effect or reported too late for inclusion in the current figures.

The figures, on the basis of 30th June, 1947=100, are shown in the next column.

If you have not seen this brochure you will probably find its contents well worth reading.

(Extract from "ACCOUNTANCY," December, 1950).

"A very useful booklet for the guidance of accountants and company secretaries, recently issued by Roneo-Neopost Limited, can be recommended to all concerned with the control and reconciliation of national insurance contributions. The booklet is a comprehensive survey. It gives detailed procedure and forms suitable for a range of businesses."

We shall be glad to send you a copy, without charge of course, if you will please write for it.

# Industrial Disputes

## DISPUTES IN JANUARY

The number of stoppages of work\* arising from industrial disputes in the United Kingdom, reported to the Department as beginning in January, was 129. In addition, 4 stoppages which began before January were still in progress at the beginning of that month. The approximate number of workers involved, during January, in these 133 stoppages, including workers thrown out of work at the establishments where the stoppages occurred, though not themselves parties to the disputes, is estimated at about 24,000. The aggregate number of working days lost at the establishments concerned, during January, was about 84,000.

Of the total of 84,000 days lost in January, 79,000 were lost by 23,800 workers involved in stoppages which began in that month. Of these workers, 21,400 were directly involved and 2,400 indirectly involved (i.e., thrown out of work at the establishments where the stoppages occurred but not themselves parties to the disputes). The number of days lost in January also included 5,000 days lost by 300 workers through stoppages which had continued from the previous month.

### Duration

Of 112 stoppages of work, owing to disputes, which ended during January, 53, directly involving 2,100 workers, lasted not more than one day; 28, directly involving 7,900 workers, lasted two days; 9, directly involving 700 workers, lasted three days; 14, directly involving 2,800 workers, lasted four to six days; and 8, directly involving 1,600 workers, lasted over six days.

### Causes

Of the 129 disputes leading to stoppages of work which began in January, 15, directly involving 2,900 workers, arose out of demands for advances in wages, and 41, directly involving 6,000

workers, on other wage questions; 2, directly involving 300 workers, on questions as to working hours; 23, directly involving 9,300 workers, on questions respecting the employment of particular classes or persons; 42, directly involving 1,600 workers, on other questions respecting working arrangements; and 3, directly involving 100 workers, on questions of trade union principle. Three stoppages, directly involving 1,200 workers, were in support of workers involved in other disputes.

The following Table gives an analysis, by groups of industries, of stoppages of work in January due to industrial disputes:—

Industry Group	Number of Stoppages in progress in Month			Number of Workers involved in all Stoppages in progress in Month	Aggregate Number of Working Days lost in all Stoppages in progress in Month
	Started before beginning of Month	Started in Month	Total		
Coal Mining .. .. .	—	64	64	5,900	11,000
Engineering .. .. .	1	11	12	5,600	15,000
Vehicles .. .. .	1	6	7	3,300	23,000
Manufactures of Wood and Cork .. .. .	—	1	1	200	2,000
Building and Contracting .. .. .	—	10	10	3,400	11,000
Transport, etc. .. .	—	8	8	2,900	13,000
All remaining industries and services .. .	2	29	31	2,800	9,000
Total, January, 1951 .. .	4	129	133	24,100	84,000
Total, December, 1950 .. .	11	73	84	9,700	28,000
Total, January, 1950 .. .	5	125	130	22,800	65,000

## PRINCIPAL DISPUTES DURING JANUARY

Industry, Occupations and Locality	Approximate Number of Workers involved		Date when Stoppage		Cause or Object	Result
	Directly	In-directly†	Began	Ended		
<b>COAL MINING:—</b>						
Haulage hands and other colliery workers—Castleford, Normanton and Methley, Yorks. (three collieries)	1,760	—	1 Jan.	5 Jan.	Haulage hands' objection to a deduction of 2s. a week from wages in respect of home coal	Work resumed under conditions existing prior to stoppage.
<b>ENGINEERING:—</b>						
Turners, fitters, machinists, etc., employed in textile machinery manufacture—Belfast (one firm)	600	50	3 Jan.	10 Jan.	Dissatisfaction with the terms of a recent National Wage Agreement and in protest against the dismissal of a worker who refused to record time for costing purposes	Work resumed on the basis of payment by results and acceptance of job time cards.
Engineering workers employed in textile machinery manufacture—Oldham (one firm)	1,430	50	15 Jan.	16 Jan.	For the enforcement of a ban on piece-work in all departments, following employer's rejection of a demand for increased piece rates	Work resumed under day-work conditions; piece-work subsequently restored.
<b>AIRCRAFT:—</b>						
Aircraft workers—Belfast (one firm)	2,800	—	22 Jan.	—	In protest against the dismissal of a number of shop stewards for alleged breaches of factory discipline	No settlement reported.
<b>FURNITURE MANUFACTURE:—</b>						
Cabinet makers, french polishers, wood machinists, cabinet fitters, maintenance engineers, etc., employed in the making of furniture—Hackney (one firm)	200	—	3 Jan.	18 Jan.	Objection to the employment of time and motion study engineers	Work resumed.
<b>BUILDING AND CONTRACTING:—</b>						
Electricians and building trade operatives employed on an exhibition site—Lambeth (various firms)	1,150	—	26 Jan.	12 Feb.‡	In support of a demand by electricians for an increase of 2d. an hour "exhibition money"	Work resumed following the receipt of the report of a Committee of Investigation which recommended that the claim be paid.
Labourers, joiners, bricklayers, scaffolders and steel fixers employed on the construction of an atomic energy establishment—Capenhurst (one firm)	760	—	27 Jan.	5 Feb.	Objection to the discharge of a number of workers who had been found unsuitable	Work resumed.
<b>GOODS TRANSPORT BY RAIL:—</b>						
Motor drivers, cartage and handling staff engaged in goods transport—St. Pancras	950	—	8 Jan.§	17 Jan.	Objection to the introduction of a new goods service, whereby goods arriving by rail would be collected and delivered by Road Haulage Executive workers, on the ground that this might cause redundancy	Work resumed. Railway Executive's offer to postpone the scheme until 29th January accepted.
Motor drivers, cartage and handling staff engaged in goods transport—Camden Town, Nine Elms, etc.	860	—	11 Jan.	17 Jan.	In sympathy with the workers involved in the above dispute	—

\* Stoppages of work due to disputes not connected with terms of employment or conditions of labour are excluded from the statistics. Stoppages involving fewer than 10 workers, and those which lasted less than one day, are also excluded, unless the aggregate number of working days lost exceeded 100. The figures for the month under review are provisional and subject to revision; those for earlier months have been revised where necessary in accordance with the most recent information.

† Thrown out of work at the establishments where the stoppages occurred, but not themselves parties to the disputes.

‡ Work was resumed on 2nd February to facilitate negotiations, but a further stoppage by electricians began on the afternoon of 7th February.

§ The stoppage began on the night shift of 7th-8th January.

# U.K. Index of Retail Prices

## FIGURES FOR 16th JANUARY, 1951

At 16th January the retail prices index was 117 (prices at 17th June, 1947 = 100), compared with 116 at 12th December, 1950, and with 113 at 17th January, 1950. The rise in the index during the month under review was due to increased prices for many articles, including vegetables, rabbits, fish, fruit, clothing and household textiles, shoe repairs and laundry charges.

The interim index of retail prices measures, for the United Kingdom, the average changes, month by month, in the prices of the goods and services which entered into working-class expenditure before the war, the goods and services covered being those recorded in family budgets collected during 1937-38. The index started from 17th June, 1947 (taken as = 100), and measures the changes in the prices of these goods and services from that date. As some goods and services are much more important than others, the relative changes, since 17th June, 1947, in the price levels of the various items included are combined by the use of "weights". These "weights" represent the proportions in which these items entered into working-class expenditure in 1937-38, adjusted to take account of the broad changes in prices between 1937-38 and mid-June, 1947.

The price comparisons used in compiling the index figures relate to a fixed list of items, and steps are taken to ensure that, so far as possible, the index figures reflect real changes in price levels but not changes in the prices quoted which are attributable to variations in quality.

The following Table shows the indices at 16th January, 1951, for each of the main groups of items and for all the groups combined, together with the relative weights which are used in combining the group indices into a single "all items" index:—

GROUP	INDEX FIGURE FOR 16th JANUARY, 1951		WEIGHT
	1947 = 100	1950 = 100	
I. Food .. .. .	127 (126·9)	100	348
II. Rent and rates .. .	101 (101·5)	100	88
III. Clothing .. .. .	126 (126·0)	100	97
IV. Fuel and light .. .	122 (122·3)	100	65
V. Household durable goods ..	120 (120·5)	100	71
VI. Miscellaneous goods .. .	114 (114·3)	100	35
VII. Services .. .. .	113 (112·9)	100	79
VIII. Drink and tobacco ..	104 (104·1)	100	217
<b>All items .. .. .</b>	<b>117 (117·3)</b>	<b>100</b>	<b>1,000</b>

The group indices, as calculated to the nearest first place of decimals, are shown in brackets in the above Table because these are the figures to which the weights have been applied for the purpose of computing the "all items" index. These decimal figures are shown only in order that, if desired, calculations may be made of the effect of combining particular groups and excluding others.\* The information available as to price changes, however, is such that no precise significance can be attributed to the decimals, and for any other purpose, therefore, the figures should be used to the nearest whole number.

### Food

The index of food prices rose by 2 points between 12th December and 16th January. The principal changes in prices were large increases in the prices of rabbits and tomatoes. There were also increases in the prices of a number of other items, including green vegetables and carrots, fish, currants and sultanas, apples, marmalade, custard powder and breakfast cereals. There was a small reduction in the average price of oranges. For the food group as a whole the average level of prices rose by rather more than 1 per cent. and the index figure at 16th January, expressed to the nearest whole number, was 127, compared with 125 at 12th December, 1950.

### Clothing

During the month under review increases were reported in the prices of most of the articles included in the clothing group. The largest increases were those for footwear, including rubber footwear, knitted garments, including men's and boys' hose and vests, sanitary towels, men's suits, men's and boys' shirts, cotton material and knitting wool. For the clothing group as a whole the average level of prices rose by about 1½ per cent. and, expressed to the nearest whole number, the index figure at 16th January was 126, compared with 124 at 12th December.

### Fuel and Light

The price of gas was increased in a few areas between 12th December and 16th January. The average price of candles increased by about 6 per cent., following recent increases in the maximum permitted price. For the fuel and light group as a whole the rise in the average level of prices was less than one-half of 1 per cent. and the index figure at 16th January, expressed to the nearest whole number, was 122, the same figure as at 12th December.

### Household Durable Goods

Increases were reported in the average prices of many of the articles included in the group for household durable goods. The most important of these increases were those for blankets, sheets and towels. The average price of blankets rose by over 30 per cent. and the average prices of sheets and hand towels by 16 and 21 per cent., respectively. For the household durable goods group as a whole

\* The combination of any two or more group indices is effected by multiplying the respective indices by their corresponding weights and dividing the sum of the resulting products by the sum of the weights used.

the average level of prices rose by about 3 per cent. and, expressed to the nearest whole number, the index figure at 16th January was 120, compared with 117 at 12th December.

### Miscellaneous Goods

In the group covering miscellaneous goods there were increases in the prices of tooth paste, toilet soap, polishes, cleaning powder and writing paper. The average level of prices for the group as a whole rose by nearly 1 per cent. and, expressed to the nearest whole number, the index figure at 16th January was 114, compared with 113 at 12th December.

### Services

In the group covering miscellaneous services the principal changes were increases in the charges for boot and shoe repairs and in laundry charges. Bus and tram fares were increased in some areas. For the services group as a whole the average level of charges rose by about 1½ per cent. and, expressed to the nearest whole number, the index figure at 16th January was 113, compared with 111 at 12th December.

### Other Groups

In the two remaining groups, covering rent and rates and drink and tobacco, respectively, there was little change in the average level of prices during the month under review. The index figures for these groups, expressed to the nearest whole number, were 101 and 104, respectively, each of these figures being the same as at a month earlier.

## FIGURES FOR 1947-51

The Table below shows the index figures for "all items" and for food from June, 1947, onwards. The figures normally relate to the Tuesday nearest to the 15th of each month.

Year	INDEX FIGURE FOR 16th JANUARY, 1951											
	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
	All items											
1947	—	—	—	—	—	100	101	100	101	101	103	104
1948	—	104	106	106	108	108	110	108	108	108	109	109
1949	109	109	109	109	109	111	111	111	111	112	112	113
1950	113	113	113	114	114	114	114	113	114	115	116	116
1951	117	—	—	—	—	—	—	—	—	—	—	—
	Food											
1947	—	—	—	—	—	100	101	99	100	101	103	103
1948	104	108	109	109	108	113	108	107	107	108	108	108
1949	108	109	108	108	114	115	116	116	117	119	119	120

Food .. .. .	" "	209·5	+ 0·5	+ 8·7

\* The items of expenditure on which the "all-items" figures are based are food, house-rent, clothing, fuel and light, and other or miscellaneous items, except in the case of Belgium (food, clothing, fuel and light, and miscellaneous items), and Luxembourg (food, clothing, fuel and light, and certain other items).

† The index is quarterly and comparison is with the previous quarter. The figure for August, 1950, published in the November issue of this GAZETTE (page 397) has been revised.

MISCELLANEOUS STATISTICS

Contents of this Section

Table listing various categories like Fatal Industrial Accidents, Industrial Diseases, and Reinstatement in Civil Employment with corresponding page numbers.

Fatal Industrial Accidents

The number of workpeople (other than seamen) in the United Kingdom whose deaths from accidents in the course of their employment were reported in January was 141, compared with 116 in the previous month and 106 (revised figure) in January, 1950.

Table showing Fatal Industrial Accidents categorized by industry: Mines and Quarries, Factories, and Seamen.

Table showing Fatal Industrial Accidents categorized by nature of accident: Underground, Surface, and Total, Mines & Quarries.

Table showing Fatal Industrial Accidents categorized by industry and nature of accident, including detailed sub-categories like Clay, Stone, Cement, etc.

Industrial Diseases

The number of cases and deaths† in the United Kingdom reported during January, under the Factories Act, 1937, or the Lead Paint (Protection against Poisoning) Act, 1926, are shown below.

Table showing Industrial Diseases: I. Cases (Lead Poisoning, Anthrax), I. Cases—continued (Epitheliomatous Ulceration, Chrome Ulceration), and II. Deaths (Epitheliomatous Ulceration).

\* For mines and quarries, weekly returns are furnished and the figures cover the 4 weeks ended 27th January, 1951, in comparison with the 4 weeks ended 30th December, 1950, and the 4 weeks ended 28th January, 1950.

Accidents in Coal Mining

A statement issued by the Ministry of Fuel and Power shows that the number of persons killed during the 13 weeks ended 30th December, 1950, as a result of accidents occurring in that period at mines as defined by the Coal Mines Act, 1911, in Great Britain was 103, compared with 191 in the 13 weeks ended 30th September, 1950, and 111 (revised figure) in the 13 weeks ended 31st December, 1949.

An analysis of the figures, by nature of accident, is given below.

Table showing Accidents in Coal Mining: Number of Persons Killed during 13 weeks ended (Dec., 1950; Sept., 1950; Dec., 1949) and Number of Persons Seriously Injured during 13 weeks ended (Dec., 1950; Sept., 1950; Dec., 1949).

Industrial Rehabilitation

The statistics given below show the numbers of men and women admitted to courses at the Industrial Rehabilitation Units operated by the Ministry of Labour and National Service during the four weeks ended 8th January, the numbers in attendance at the end of, and the numbers who completed courses during the period.

Table showing Industrial Rehabilitation: Persons admitted to courses during period, Persons in attendance at courses at end of period, and Persons who completed courses during period.

Since the Units were established by the Ministry of Labour and National Service up to 8th January, 1951, the total number of persons admitted to industrial rehabilitation courses was 19,616.

Reinstatement in Civil Employment

The provisions of the Reinstatement in Civil Employment Act, 1944, apply to persons who were called up to the Forces before 1st January, 1949, and also to persons who joined the Forces as volunteers after 25th May, 1939, and before 18th July, 1947.

The Reinstatement in Civil Employment Act, 1944, came into operation on 1st August, 1944, and since that date any person who claimed that he had rights under the Acts which were being denied him has been able to apply to a Reinstatement Committee to settle the matter in dispute.

The following Table analyses the decisions given by Reinstatement Committees (a) during the December quarter of 1950, and

\* Provisional figures. † Including the disasters at Knockshinnoch Castle and Cresswell Collieries.

(b) during the whole period from 1st August, 1944, to 31st December, 1950. The statistics continue those published in the issue of this GAZETTE for November, 1950, page 399.

Table showing Reinstatement Statistics: Orders requiring employment to be made available to applicants, Orders requiring payment of compensation for loss by reason of default, Orders for both reinstatement and compensation, Total of orders made, Cases where no order was made against the employer concerned, and Total of cases decided.

The number of cases decided by Reinstatement Committees during the fourth quarter of 1950 was 36. The total number of cases decided up to 31st December, 1950, was 8,657, of which 39 were cases arising under the reinstatement provisions of Part II of the National Service Act, 1948.

The Acts provide, in certain circumstances, for a right of appeal to the Umpire from decisions of Reinstatement Committees. Up to 31st December, 1950, the Umpire gave his decision in respect of 1,103 appeals, five of which were given under the provisions of Part II of the National Service Act, 1948.

It is not possible to assess the number of persons who, since the date of the operation of the Reinstatement in Civil Employment Act, 1944, viz., 1st August, 1944, have had an opportunity of exercising statutory reinstatement rights, or how many have done so, but the small number of disputes that have been referred to Reinstatement Committees, and to the Umpire on appeal, shows that reinstatement has continued smoothly of persons who wished to return to their former employment at the end of their whole-time service in the Forces.

The total number of cases determined by Reinstatement Committees in Northern Ireland up to 31st December, 1950, was 38, of which 22 were decided in favour of the applicants. Eight cases were decided by the Deputy Umpire in Northern Ireland, in seven of which the determination of the Committee was confirmed.

Up to the same date, Isle of Man Reinstatement Committees had determined four cases, in two of which the decision was in favour of the applicant. No appeals had been decided by the Umpire in the Isle of Man.

Vocational and Disabled Training

The statistics of the Vocational and Disabled Training Schemes given below continue those published in previous issues of this GAZETTE (see last month's issue, page 35). They relate to the four weeks ended 11th December, 1950, and the four weeks ended 8th January, 1951.

The total numbers of applicants admitted to training during the periods under review were 653 and 572, respectively. In all, 4,558 persons were in training at the end of the second period. The last figure included 3,955 males and 603 females, and of the total 2,966 were disabled persons; 929 trainees were placed in employment during the two periods. The figures are analysed in the two Tables which follow:—

Statistics for four weeks ended 11th December, 1950

Table showing Vocational and Disabled Training Statistics for four weeks ended 11th December, 1950, categorized by gender (Males, Females) and total, including applicants admitted, persons in training, and trainees placed in employment.

Statistics for four weeks ended 8th January, 1951

Table showing Vocational and Disabled Training Statistics for four weeks ended 8th January, 1951, categorized by gender (Males, Females) and total, including applicants admitted, persons in training, and trainees placed in employment.

Further Education and Training

The figures below show the progress made under the Further Education and Training Scheme (a) during January, and (b) during the period since the inception of the Scheme in April, 1943, up to 31st January, 1951.

Table showing Further Education and Training: Number of applications for assistance made, Number of awards made by Ministry of Labour and National Service, Ministry of Education, and Other award-making Departments, and Cumulative totals, April, 1943, to end of January, 1951.

Shipbuilding in Fourth Quarter of 1950

According to Lloyd's Register Shipbuilding Returns for the quarter ended 31st December, 1950, the number of merchant steamers and motorships under construction in Great Britain and Northern Ireland at the end of December was 330, with a gross tonnage of 2,044,688 tons, compared with 323 vessels of 2,046,234 tons gross at the end of September, showing a decrease of 1,546 tons.

The tonnage of vessels intended for registration abroad or for sale was 794,638 at the end of December. This figure was 31,107 tons less than at the end of September, but was higher than at any other time since the war. It represented 38.9 per cent. of the total tonnage being built in the country and included 391,618 tons for Norway, 74,940 tons for Liberia and 70,000 tons for the Argentine Republic.

The numbers of propelled vessels begun in Great Britain and Northern Ireland during the fourth quarter of 1950 were 30 steamers of 88,309 tons and 54 motorships of 301,193 tons, a total of 84 vessels of 389,502 tons gross. The numbers launched during the same period were 23 steamers of 115,531 tons and 32 motorships of 202,219 tons, a total of 55 vessels of 317,750 tons gross.

The figures in this article exclude vessels of less than 100 tons gross. They also exclude non-propelled vessels (sail and barges). The number of non-propelled vessels under construction in Great Britain and Northern Ireland was 48, of 11,702 tons, at the end of December, compared with 51, of 12,045 tons, at the end of September.

### Conditions of Employment and National Arbitration Orders

#### National Arbitration Tribunal Awards

During January the National Arbitration Tribunal issued 25 awards, Nos. 1583 to 1607.\* Nine of the awards are summarised below; the others related to individual employees.

*Award No. 1585 (8th January).—Parties:* Local Authorities represented by the Employers' Side of the North Wales District Joint Industrial Council for Local Authorities' Non-Trading Services (Manual Workers), and members of the trade unions constituting the Workpeople's Side of the Council in their employment. *Claim:* For the implementation by the following Authorities of the agreement made by the National Joint Industrial Council for Local Authorities' Non-Trading Services (Manual Workers) on 1st July, 1948, which provided for a basic rate of 100s. a week operative from that date: Conway Borough Council; Bethesda Urban District Council; Holyhead Urban District Council; Mold Urban District Council; and Ogwen Rural District Council. *Award:* The Tribunal found in favour of the claim.

*Award No. 1586 (8th January).—Parties:* Members of the Pressed Felt Manufacturers' Association (Lancashire Section), and members of the National Union of General and Municipal Workers in their employment. *Claim:* For an additional week's annual holiday with pay. *Award:* The Tribunal found that the claim had not been established.

*Award No. 1588 (9th January).—Parties:* Employers represented on the Management Side of the Administrative and Clerical Staffs Council of the Whitley Councils for the Health Services (Great Britain), and members of the organisations represented on the Staff Side of the Council in their employment. *Claim:* That, following certain interpretations and modifications of the pointing system upon which salary scales for certain administrative officers in the hospital service are based, there should, upon a recalculation of the pointage of any hospital group in accordance with such interpretations and modifications, be no reduction made in the existing salary scales of administrative officers of any group, pending agreement by the Administrative and Clerical Staffs Council on the general questions of how often the pointage of hospital groups should be reviewed and what rules should govern any alterations of salaries in the event of a rise or fall of pointage. *Award:* The Tribunal awarded as follows: (1) that if, on a recalculation of pointage under A.C. Circular No. 12 (issued by the Council in June, 1950), a Hospital Management Committee or Board of Management should be put into a lower point group than that in which it had previously considered itself to be (*i.e.*, cases falling to be dealt with under paragraph B.3 of the Circular), the salary scales of the administrative officers of the Committee or Board in post at the date of recalculation should be maintained on a personal basis (subject to the proviso that this decision should not apply where, prior to the issue of A.C. Circular No. 12, there had been a gross and unjustifiable miscalculation of pointage for which the officer concerned had been definitely responsible); and (2) that as regards cases falling to be dealt with under paragraph B.4 of the Circular the claim had not been established.

*Award No. 1589 (9th January).—Parties:* Members of the Fibre Textile Accessories Manufacturers' Association, and members of the National Union of Leather Workers and Allied Trades in their employment. *Claim:* For a further week's annual holiday with pay and for higher starting rates for non-productive workers. *Award:* The Tribunal awarded that the rates of wages of workers classed as non-productive workers should be increased by 1d. an hour. They referred back to the parties for settlement by negotiation the claim for a further week's annual holiday with pay.

*Award No. 1593 (15th January).—Parties:* Firms represented by the Building Brick Section of the Scottish Employers' Council for the Clay Industries, and members of the Transport and General Workers' Union and the National Union of General and Municipal Workers in their employment. *Claim:* For a general increase in wages; for an increase of 1d. an hour in certain existing differential rates and the introduction of differential rates for certain other workers; for an additional week of paid annual holiday; and for an alteration in the existing method of payment for statutory holidays. *Award:* The Tribunal awarded as follows:—(1) In respect of male workers 21 years of age and over the existing rates of wages for time workers set out in the current agreement between the parties should be increased by 2½d. an hour; and the flat rate addition for pieceworkers and task workers should be increased by 2½d. an hour for hours actually worked in the factory. So far as women and juveniles were concerned the Tribunal awarded that proportionate increases should be made in the rates of wages of time workers and flat rate addition for pieceworkers and task workers, and they referred back to the parties for settlement by negotiation

the question of the amount of these increases. (2) The claim for variation of differential rates for pan mill men, setters and bing men and the granting of differential rates to loaders and Lister truck drivers had not been established. (3) The claim for an additional week's holiday with pay had not been established. (4) The existing method of paying 7½ hours for statutory holidays should be abolished and substituted by payment for the normal working hours of the day on which the holiday falls.

*Award No. 1594 (15th January).—Parties:* Firms represented by the Refractory Section of the Scottish Employers' Council for the Clay Industries, and members of the Transport and General Workers' Union and the National Union of General and Municipal Workers in their employment. *Claim:* For a general increase in wages, an additional week of paid annual holiday and an alteration in the existing method of payment for statutory holidays. *Award:* The Tribunal awarded as follows:—(1) In respect of male workers 21 years of age and over, the existing rates of wages for time workers set out in the current agreement between the parties should be increased by 2½d. an hour; and the flat rate addition for pieceworkers and task workers should be increased by 2½d. an hour for hours actually worked in the factory. So far as women and juveniles were concerned, the Tribunal awarded that proportionate increases should be made in the rates of wages of time workers and flat rate addition for pieceworkers and task workers, and they referred back to the parties for settlement by negotiation the question of the amount of these increases. (2) The claim for an additional week's holiday with pay had not been established. (3) The existing method of paying 7½ hours for statutory holidays should be abolished and substituted by payment for the normal working hours of the day on which the holiday falls.

*Award No. 1596 (17th January).—Parties:* Firms affiliated to constituent associations and federations of the Wool (and Allied) Textile Employers' Council, and members of the National Union of General and Municipal Workers (Woolcombing Section) in their employment. *Claim:* For an increase of 6s. 9d. a week on the male minimum rate for day workers with consequent adjustments on all other scheduled rates of pay. *Award:* The Tribunal awarded that the minimum time rates of wages for all classes of workers set out in the "List of Wages" dated July, 1949, should be increased by 5s. a week for adult male workers and 3s. 9d. a week for adult female workers. They referred back to the parties for settlement by negotiation the question of the amount of the proportionate increases to be given to workers below adult age.

*Award No. 1605 (30th January).—Parties:* Members of the Motor Agents' Association Ltd., which comprises the Employers' Side of the National Joint Industrial Council for the Motor Vehicle Retail and Repairing Trade, and members of the trade unions constituting the Workpeople's Side of the Council in their employment. *Claim:* For an increase in wage rates. *Award:* The Tribunal awarded that the minimum rates of wages of adult workers employed in the Provinces should be increased to 2s. 9½d. an hour for skilled workers, 2s. 6d. an hour for semi-skilled workers and 2s. 3½d. an hour for other workers and in the London Area to 2s. 10½d., 2s. 7d., and 2s. 4½d. an hour respectively; and that the wage rates of apprentices, boys and youths should be increased proportionately.

*Award No. 1607 (31st January).—Parties:* Co-operative Societies affiliated to the Kent District Hours and Wages Board of the Co-operative Union Ltd., and members of the National Union of Funeral and Cemetery Workers employed by them in their funeral furnishing departments. *Claim:* For an increase in wages and for an amendment of the overtime provisions provided in the current agreement. *Award:* The Tribunal awarded the following weekly rates of wages for adult workers: Chauffeur-bearers 119s. 6d.; general workers who act as bearers 109s. 0d.; coffin makers 125s. 6d.; polishers 113s. 6d. The Tribunal also awarded that the rates of wages of youths should be increased by proportionate amounts, and they referred back to the parties for settlement by negotiation the amount of such increases. The Tribunal found that the claim for a revision of the overtime conditions had not been established.

#### National Arbitration Tribunal (Northern Ireland) Awards

During January the National Arbitration Tribunal (Northern Ireland) issued three awards, one of which is summarised below; neither of the others related to a substantial part of an industry.

*Award No. 887 (10th January).—Parties:* Ministry of Agriculture and certain members of the North of Ireland Operative Butchers' and Allied Workers' Association employed as slaughtermen. *Claim:* For payment of wages during absence from work due to sickness, in accordance with the sick leave rules applicable to temporary and unestablished staff. *Award:* The Tribunal was prepared to concede in principle, and to award, that the workmen should be entitled to payment during absence from work due to sickness, such payment to be related to the guaranteed minimum

fall-back wages granted by the Tribunal in Award No. 695 (15th March, 1948). They were of the opinion, however, that it was desirable that a scheme for payment during sickness should be agreed between the parties, and accordingly referred the matter back to them for negotiation. If agreement is not reached between the parties within one month, it will be open to either party to bring the matter before the Tribunal under the present reference.

### Civil Service Arbitration Tribunal

During January the Civil Service Arbitration Tribunal issued two awards, Nos. 138 and 139.\* These awards are summarised below.

*Award No. 138 (12th January).—Parties:* The Ministry of Works and the Civil Service Union. *Claim:* For increased rates of pay for park-keeping staff employed in the Royal Parks and Gardens. *Award:* The Tribunal awarded that as from 12th January, 1951, the weekly rates of pay, subject to the normal Civil Service provincial differentiation of 3s. and 6s. a week, should be as follows:—Park-keepers 117s. 6d. by 5s. to 127s. 6d., sergeants 136s. 6d., inspectors 147s. 6d.

*Award No. 139 (19th January).—Parties:* The Post Office and the Federation of Post Office Supervising Officers. *Claim:* (a) That the scales of pay of Post Office Supervising classes be revised; (b) that the allowance of £40 a year paid to certain female Overseers and Assistant Superintendents be increased to £50 a year; (c) that the revised scales take effect as from the beginning of the first full pay period following 31st May, 1949; and (d) that an officer's incremental date remain unchanged and that immediately the revised scales become operative the officer be placed on the corresponding point on the revised scale. *Award:* The Tribunal awarded as follows:—(a) The scales of pay introduced on 1st June, 1946, in respect of the Post Office Supervising classes set out in the terms of reference, to be increased at all points, for men and women respectively, by £30 and £25 on annual scales and by 11s. 6d. and 9s. 6d. on weekly scales. In addition, the corresponding scales for male and female Telephone Grades to be increased at all points, as follows:—Males—Assistant Supervisor and Supervisor £50, Chief Supervisor and Senior Chief Supervisor £70; females—Assistant Supervisor and Supervisor £20, Chief Supervisor, Senior Chief Supervisor and Regional Supervisor £40. (b) The allowance of £40 a year paid to certain female Overseers and Assistant Superintendents to be increased to £50. (c) The revised scales to take effect from 1st July, 1950. (d) The "corresponding points" principle to be applied in the assimilation to the new scales of officers in post.

### Industrial Courts Act, 1919, and Conciliation Act, 1896

#### Industrial Court Awards

During January the Industrial Court issued two awards, Nos. 2289 and 2290. These awards are summarised below.

*Award No. 2289 (5th January).—Parties:* Trade Union Side and Official Side of the Miscellaneous Trades Joint Council for Government Industrial Establishments. *Claim:* That the rates of pay of firemen employed by the War Office and Air Ministry be increased to 143s. a week of 60 hours; and that (a) the plus rate of leading firemen be increased to 15s. a week, (b) the existing grade of leading firemen and assistant head firemen in the War Department and senior firemen in the Air Ministry be merged into a new grade of assistant head firemen, with a lead of 15s. a week over the firemen's rate, and (c) the plus rate of head firemen be increased to 30s. a week and at double-engined stations to 35s. a week. *Award:* The Court awarded that as from the beginning of the first pay period following 5th January, 1951, the rates of pay should be as follows:—War Office: firemen 133s., leading firemen 136s., assistant head firemen 143s., head firemen 148s., head firemen (double-engined stations) 153s. Air Ministry: firemen 133s., senior firemen 143s., head firemen 148s.

*Award No. 2290 (12th January).—Parties:* Employees' Side and Employers' Side of the National Joint Council for Civil Air Transport (Clerical and Clerical Administrative National Sectional Panel). *Claim:* For the interpretation of a clause in the Memorandum of Agreement dated 1st January, 1949, in respect of the payment of excess hours of weekly-rated clerical staff. *Award:* The Court determined that, on a true interpretation of the clause, payment for all hours in excess of 44 did not include in the case of non-industrial clerical staff on shift work any premium pay for shift work.

#### Single Arbitrators and ad hoc Boards of Arbitration

During January three awards were issued by Single Arbitrators appointed under the Industrial Courts Act, 1919. Two concerned disputes originally reported under the Conditions of Employment and National Arbitration Orders, 1940-50; of these, one related to an individual undertaking, the other is summarised below. *Parties:* The National Union of Funeral and Cemetery Workers and the London Association of Funeral Directors. *Claim:* For a

wages increase and amendment of the working conditions agreement. *Award:* The Arbitrator awarded increases to funeral workers. The claim for payment during sickness was referred to the parties to prepare a scheme.

The third award related to the operative dates of cost-of-living increases. The parties concerned were the South Wales and Monmouthshire Allied Engineering Skilled Trade Association and the South Wales and Monmouthshire Iron and Steel Manufacturers' Association.

### Wages Councils Acts, 1945-1948

#### Notices of Proposal

During January notices of intention to submit to the Minister of Labour and National Service wages regulation proposals were issued by the following Wages Councils:—

*Jute Wages Council (Great Britain).—* Proposal J.(83), dated 5th January, for fixing revised statutory minimum remuneration for male and female workers.

*Sugar Confectionery and Food Preserving Wages Council (Great Britain).—* Proposal F.(52), dated 5th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Rubber Manufacturing Wages Council (Great Britain).—* Proposal R.U.(31), dated 9th January, for fixing revised statutory minimum remuneration for male and female workers.

*Hollow-ware Wages Council (Great Britain).—* Proposal H.(55), dated 9th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Hair, Bass and Fibre Wages Council (Great Britain).—* Proposal H.B.(34), dated 9th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Cotton Waste Reclamation Wages Council (Great Britain).—* Proposal C.W.(46), dated 16th January, for fixing revised general minimum time rates for male and female workers.

*Brush and Broom Wages Council (Great Britain).—* Proposal M.(68), dated 19th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Hat, Cap and Millinery Wages Council (Scotland).—* Proposal H.M.S.(37), dated 23rd January, for fixing revised general minimum time rates and piece work basis time rates payable to female workers.

*Rubber Manufacturing Wages Council (Great Britain).—* Proposal R.U.(32), dated 19th January, for revised provisions for the allowance of holidays and payment of holiday remuneration.

*Flax and Hemp Wages Council (Great Britain).—* Proposal F.H.(67), dated 19th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Stamped or Pressed Metal-ware Wages Council (Great Britain).—* Proposal Q.(69), dated 26th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Made-up Textiles Wages Council (Great Britain).—* Proposal M.T.(33), dated 26th January, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

*Hair, Bass and Fibre Wages Council (Great Britain).—* Proposal H.B.(35), dated 30th January, relating to the increase of the annual holiday from 6 days to 12 days and fixing payment for such holidays.

Further information concerning any of the above proposals may be obtained from the Secretary of the Council in question, at Ebury Bridge House, Ebury Bridge Road, London, S.W.1.

#### Wages Regulation Orders

During January the Minister of Labour and National Service made the following Wages Regulation Orders\* giving effect to the proposals submitted to him by the Wages Councils concerned.

*The Retail Furnishing and Allied Trades Wages Council (Great Britain) Wages Regulation Order, 1951:* S.I. 1951 No. 9 (R.F.A.(8)), dated 1st January and effective from 19th January. This Order amends the provisions relating to overtime rates on a weekly short day and to guaranteed weekly remuneration payable to workers in relation to whom the Council operates.

*The Retail Drapery, Outfitting and Footwear Trades Wages Council (Great Britain) Wages Regulation Order, 1951:* S.I. 1951 No. 10 (R.D.O.(8)), dated 1st January and effective from 19th January. This Order amends the provisions relating to overtime rates on a weekly short day and to guaranteed weekly remuneration payable to workers in relation to whom the Council operates.

*The Toy Manufacturing Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1951:* S.I. 1951 No. 39 (Y.(45)), dated 9th January and effective from 26th January. This Order prescribes revised general minimum time rates for male and female workers in relation to whom the Council operates.—See page 77.

*The Paper Bag Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1951:* S.I. 1951 No. 72 (P.(48)) dated 17th January and effective from 2nd February. This Order prescribes revised general minimum time rates for male and female workers and piece work basis time rates for female workers.

\* See footnote \* in first column on page 87.

\* See footnote \* in first column on page 87.

\* See footnote \* in first column on page 87.

*The Paper Box Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1951: S.I. 1951 No. 73 (B.46)*, dated 17th January and effective from 2nd February. This Order prescribes revised general minimum time rates and piece work basis time rates for male and female workers.

## Wages Councils Act (Northern Ireland), 1945

### Notices of Proposal

There were no notices of proposal issued during January.

### Wages Regulation Orders

During January the Ministry of Labour and National Insurance made the following Wages Regulation Orders\* giving effect to the proposals made by the Wages Councils concerned:—

*The Baking Wages Council (Northern Ireland) Wages Regulation (No. 1) and (No. 2) Orders, 1951 (N.I. Bk. (N.132) and N.I. Bk. (N.133))*, dated 1st January and effective from 12th January. These Orders prescribe increases in general minimum time rates and overtime rates for labourers, packers and all other male workers in Area A and Area B. Workers in Area C are now included in Area B.—See page 76.

*The Paper Box Wages Council (Northern Ireland) Wages Regulation (Amendment) Order, 1951 (N.I.B. (N.45))*, dated 11th January and effective from 19th January. This Order prescribes increases in general minimum time rates for male and female workers and piece work basis time rate and general minimum piece rates for female workers.—See page 77.

*The Aerated Waters Wages Council (Northern Ireland) Wages Regulation Order, 1951 (N.I.A. (N.36))*, dated 11th January and effective from 19th January. This Order prescribes increases in general minimum time rates for male and female workers.—See page 77.

*The Boot and Shoe Repairing Wages Council (Northern Ireland) Wages Regulation (Holidays) Order, 1951 (N.I.B.S. (N.62))*, dated 24th January and effective from 1st February. This Order prescribes the customary and annual holidays to be allowed to workers and fixes payment for all such holidays.

*The Boot and Shoe Repairing Wages Council (Northern Ireland) Wages Regulation (Amendment) Order, 1951 (N.I.B.S. (N.63))*, dated 24th January and effective from 1st February. This Order prescribes increases in general minimum time rates and piece work basis time rates for male and female workers.

## Catering Wages Act, 1943

### Notices of Proposal

During January notices of intention to submit to the Minister of Labour and National Service wages regulation proposals were issued by the following Wages Boards:—

*Unlicensed Place of Refreshment Wages Board.—Proposal U.P.R.(7)*, dated 19th January, for fixing revised minimum remuneration for certain male and female workers.

*Unlicensed Place of Refreshment Wages Board.—Proposal U.P.R.(8)*, dated 19th January, relating to revised provisions for the allowance of holidays and for fixing payment for such holidays.

*Licensed Non-Residential Establishment Wages Board.—Proposal L.N.R.(17)*, dated 26th January, for fixing revised statutory minimum remuneration for male and female workers.

## Agricultural Wages Act, 1948

### Orders relating to Wages, etc., in England and Wales

The following Orders were made on 3rd January, with effect on 14th January, 1951, by the Agricultural Wages Board for England and Wales:—

(a) *No. 1827* raises the statutory minimum and overtime rates of wages for male and female inexperienced workers, other than wives, sons and daughters of agricultural workers, during their first two months of employment in agriculture in England and Wales.

(b) *No. 1828* raises the statutory minimum and overtime rates of wages for male and female foreign students during their first five months of employment in agriculture in England and Wales under an exchange scheme sponsored by the United Kingdom Sponsoring Authority for the International Exchange of Young Agriculturists or other authority approved for the purpose by the Ministry of Agriculture and Fisheries.

various written statements before me. The claimant, a bus conductor, on the evening of the accident had 'a turn' of duty from 1.33 p.m. until about midnight. He was entitled to a break at the bus station at L— from 6.9 p.m., when his bus was due to arrive there, until 6.36, when it would normally return to L— after being taken to M— by another team. (On the evening in question it was behind time on the journey to L— but that seems to me to be of no consequence in relation to the question before me.) At L— there is a canteen at which tea, cakes and sandwiches may be bought, but, although plates, knives and forks, and vinegar are provided, no cooked food is sold. As the claimant on the evening in question wanted to have fish and chips for his supper on arriving at L— he had the bus stopped at a point in F— and left it in order to buy fish and chips at a shop there. While crossing to the shop he was knocked down by another bus and sustained injuries causing incapacity. In a statement obtained from the claimant's employers it is stated that in crossing from his bus to the shop he was doing something 'not authorised or permitted to be done for the purpose of his work'. The claimant does not allege that it was permitted but states that 'it is a common practice and known to employers that we stop *en route* to get food', and for the purposes of this decision I assume that that statement is accurate. Even on that assumption, however, I am unable to find grounds that would entitle me to affirm the decision of the Local Appeal Tribunal. In crossing the roadway the claimant was doing just what he would have had to do on arriving at L— and I assume at other points on the journey—for various reasons—in the ordinary course of his employment. I further assume that the traffic risks in crossing to the shop were no greater than at places on the route at which the claimant required to cross in the due performance of his duties as a conductor. But, however common the practice and whether the employers or officials in authority over the claimant knew of it or not, when he was struck by the bus in crossing the road to reach the shop he was crossing not in the course of his employment but for a purpose of his own in the same sense as if he had been crossing to a pillar box to post a letter which he had forgotten to post earlier. It was no doubt of some importance to the claimant that he should obtain the kind of food that he preferred and that would not be available at the canteen at L—, but the posting of a letter might be of much greater importance. In neither case, however, could the risk incurred in crossing the road be held to be incurred for the purposes of the claimant's employment or to be incidental to the due performance of his duty to his employers at the time.

Reference to the report of the case referred to in the decision of the Local Appeal Tribunal [C.I.21/50 (K.L.)] shows that the grounds on which it was decided in favour of the claimant distinguish it from the present case. In C.I.21/50 the claimant, a bus conductress, who had left the bus at a terminus during a ten

minutes break before the return journey, had gone to a water closet adjacent to a canteen near the terminus. The canteen and water closet were in private ownership not associated with the bus company, but the claimant 'had made a habit of using the water closet'. In leaving it on the occasion in question she fell over a stone and sustained injury. The decision in favour of the claimant proceeded on a finding that 'the fact that during the short interval of ten minutes the claimant left the vehicle in order to obey the dictates of nature . . . did not cause an interruption of her employment'. In the present case that was not the position, and I hold that the course of the claimant's employment was interrupted and, as already indicated, for a purpose of his own which I cannot regard as being incidental to his employment. Accordingly I must allow the appeal of the Insurance Officer."

## STATUTORY INSTRUMENTS

Since last month's issue of this GAZETTE was prepared, the under-mentioned Statutory Instruments,\* relating to matters with which the Ministry of Labour and National Service are concerned, either directly or indirectly, have been published in the series of *Statutory Instruments*. The list also includes certain Regulations, etc., published in the series of *Statutory Rules and Orders of Northern Ireland*, additional to those contained in the lists appearing in previous issues of the GAZETTE. The price of each Instrument, etc., unless otherwise indicated, is 1d. net (2d. post free).

*The Retail Furnishing and Allied Trades Wages Council (Great Britain) Wages Regulation Order, 1951 (S.I. 1951 No. 9*; price 2d. net, 3d. post free), dated 1st January; *The Retail Drapery, Outfitting and Footwear Trades Wages Council (Great Britain) Wages Regulation Order, 1951 (S.I. 1951 No. 10*; price 2d. net, 3d. post free), dated 1st January; *The Toy Manufacturing Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1951 (S.I. 1951 No. 39*; price 2d. net, 3d. post free), dated 9th January; *The Paper Bag Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1951 (S.I. 1951 No. 72*; price 2d. net, 3d. post free), dated 17th January; *The Paper Box Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1951 (S.I. 1951 No. 73*; price 4d. net, 5d. post free), dated 17th January. These Orders were made by the Minister of Labour and National Service under the Wages Councils Act, 1945.—See pages 85 and 86.

*The Teachers Superannuation (Training Within Industry) Scheme 1950 (S.I. 1950 No. 1994)*, made on 11th December by the Minister of Education, with the consent of the Treasury, under the Teachers (Superannuation) Act, 1925, and the Superannuation (Miscellaneous Provisions) Act, 1948. The purpose of the Scheme is to enable teaching service as a trainer in industry in the employment of the Ministry of Labour and National Service to be treated as contributory service under the Teachers Superannuation Acts.

*The Tobacco Wages Council (Northern Ireland) (Constitution) Order, 1950 (S.R. and O. of Northern Ireland 1950 No. 228)*. This Order was made on 2nd December by the Ministry of Labour and National Insurance of Northern Ireland under the Wages Councils Act (Northern Ireland), 1945, and brings the constitution of the Wages Council concerned into conformity with the provisions relating to the constitution of Wages Councils contained in the Act.

*The Employment and Training (Payment of Travelling Expenses) Regulations (Northern Ireland) 1950 (S.R. and O. 1950 No. 230)*, made on 22nd December by the Ministry of Labour and National Insurance, with the consent of the Ministry of Finance, under the Employment and Training Act (Northern Ireland), 1950. These Regulations, which came into operation on the date of signature, are similar in scope to the corresponding Regulations made in Great Britain (see the issue of this GAZETTE for August, 1948, page 263).

*The National Insurance (Industrial Injuries) (Claims and Payments) Amendment Regulations (Northern Ireland), 1950 (S.R. and O. 1950 No. 209)*; *The National Insurance (Industrial Injuries) (Medical Certification) Amendment Regulations (Northern Ireland), 1950 (S.R. and O. 1950 No. 210*; price 2d. net, 3d. post free). These Regulations, which were made on 27th November by the Ministry of Labour and National Insurance under the National Insurance (Industrial Injuries) Act (Northern Ireland), 1946, and came into operation on the following day, are similar in scope to the corresponding Regulations made in Great Britain (see the issue of this GAZETTE for December, page 412).

## MINING QUALIFICATIONS BOARD

### Examinations for Certificates of Competency for Coal Mines and Stratified Ironstone Mines

The written Examinations for First and Second Class Certificates of Competency as Managers and Under-Managers of Mines will be held on 23rd and 24th May, 1951, at Glasgow, Newcastle-upon-Tyne, Doncaster, Wigan, Cardiff and Stoke-on-Trent. The written Examinations for Limited Certificates of Competency as Managers and Under-Managers of Stratified Ironstone Mines will be held on 23rd and 24th May, 1951, at Doncaster only.

The written part of the Examination for Certificates of Qualification as Surveyors of Mines will be held at the above centres on 24th May, 1951, and the Oral and Practical Examination, to be attended only by those candidates who qualify in the written test, in July, 1951.

Intending candidates should apply after 26th February for the necessary forms, stating whether they have previously attended an examination for any of the above Certificates. The completed applications should be returned to the Secretary as soon as possible, and must in any case be received not later than 28th March. Letters should be addressed to the Secretary, Mining Qualifications Board, Ministry of Fuel and Power, 7 Millbank, London, S.W.1.

## Decisions of the Commissioner under the National Insurance Acts

The Commissioner is a judicial authority independent of the Ministry of National Insurance, appointed by the Crown (see Section 43 of the National Insurance Act, 1946, and Section 42 of the National Insurance (Industrial Injuries) Act, 1946). His decisions† are final.

Appeals to the Commissioner under the National Insurance Acts may be made by an Insurance Officer, or by an association of which the claimant is a member, or by the claimant himself with the leave of the Local Tribunal or the Commissioner, or without such leave if the decision of the Tribunal was not unanimous.

Appeals to the Commissioner under the Industrial Injuries Acts may be made by an Insurance Officer, or by a person whose right to benefit is or may be, under the Fourth Schedule to the 1946 Act, affected by the decision, or by an association of which the claimant or the deceased was a member or by the claimant himself. No appeal may be made without the leave of the Tribunal or of the Commissioner.

A recent decision of general interest is set out below.

### Case No. C.I. 456/50 (28th December)

Section 7 (1) of National Insurance (Industrial Injuries) Act, 1946: Whether claimant's accident arose out of and in course of his employment; Claimant, bus conductor, had his bus stopped en route to buy fish and chips, which he intended to eat during subsequent meal break: While crossing road to shop, he was knocked down and injured: Leaving bus to buy food was not authorised by claimant's employers, although, according to claimant, it was common practice and known to employers: Commissioner holds that claimant was crossing road for purpose of his own which was not incidental to his employment: In fact, his employment had been interrupted: Accident did not arise out of and in course of employment: Claim for injury benefit disallowed.

"My decision is that the incapacity in respect of which the claimant claimed injury benefit was not due to injury by accident arising out of and in the course of his employment.

"The Local Appeal Tribunal having reversed the decision of the Local Insurance Officer the claimant has received benefit in accordance with their decision. As there is no question as to the good faith of the claimant, the appeal by the Insurance Officer may be of importance only on the question of principle. The facts of the case are clearly brought out in the record of the claimant's evidence at the hearing before the Local Appeal Tribunal—and also in the

\* See footnote \* in first column on page 87.

† Selected decisions of the Commissioner given before 1st January, 1951, were published periodically in pamphlets in the following series: Series "U"—decisions on unemployment benefit; Series "P"—decisions on retirement pension; Series "S"—decisions on sickness benefit; Series "G"—decisions on guardian's allowance, maternity benefit, death grant and widow's benefit; Series "I"—decisions on all benefits and on all other questions arising under the Industrial Injuries Act. Decisions given after 1st January are being published separately. Application and enquiries should be addressed to H.M. Stationery Office at any of the addresses shown in the second column on page 87.
