Vol. XXXI.—No. 2.]

FEBRUARY, 1923.

[PRICE SIXPENCE NET.

EMPLOYMENT, WAGES, COST OF LIVING, AND TRADE DISPUTES IN JANUARY.

EMPLOYMENT.

EMPLOYMENT during January showed little general change as compared with previous months, but was better, on the whole, at the end of the month than at the end of December. It continued good in the coal mining industry, in steel sheet manufacture and in the worsted industry, fairly good in the tinplate trade, and fair in the hosiery, woollen, jute, carpet, ready-made clothing, and paper trades. In most of the other principal industries it was still very slack; but a further improvement was reported at iron and steel works, and slight improvements were also reported in some centres in the engineering and shipbuilding industries, and in certain other sections of the metal trades.

The percentage unemployed among members of Trade Unions from which returns are received was 13·7 at the end of January, as compared with 14·0 at the end of December, and 16·8 at the end of January, 1922. The percentage unemployed among workpeople insured under the Unemployment Insurance Acts in Great Britain and Northern Ireland was 12·7 at 22nd January, as compared with 12·2 at 18th December* and 16·0 at the end of January, 1922. The total number of workpeople registered at the Employment Exchanges as unemployed at 29th January in Great Britain and Northern Ireland was approximately 1,460,000, of whom 1,138,000 were men and 226,000 were women, the remainder being boys and girls. At 1st January the corresponding total was 1,542,000, of whom 1,199,000 were men and 255,000 were women.

WAGES

In the industries for which statistics are compiled by the Department the changes in rates of wages reported as having taken effect in January resulted in an aggregate reduction of nearly £56,000 in the weekly full-time wages of about 500,000 workpeople, and in an increase of £42,000 in the wages of 650,000 workpeople. The net weekly reduction of £14,000 is less than that recorded for any previous month since the beginning of 1921.

The principal groups of workpeople affected were coal miners and men employed in the shipbuilding industry. In the coal mining industry there was a slight reduction in wages (equivalent to less than 0.05 per cent. on current rates) in Northumberland, but there were increases equivalent to about 2 per cent. on current rates in the Yorkshire and East Midland area, $2\frac{1}{2}$ per cent. in Durham, and nearly 7 per cent. in Scotland. In the shipbuilding industry all classes of men except the lowest paid time workers sustained reductions varying, according to earnings, from 2d. to 2s. 6d. per week.

Among other large bodies of workpeople whose rates of wages were reduced in January were men employed by electrical contractors, house painters in Scotland, iron and steel workers in South Wales and Monmouthshire, lead smelters, bobbin makers, road transport workers in Lancashire and Yorkshire, soap and candle workers,

brewery workers at Burton, and men employed by waterworks undertakings in various districts.

As a result of Orders made under the Trade Boards Acts there were also reductions in the minimum rates of wages fixed for workpeople in the following trades in Great Britain:—stamped or pressed metal wares; wrought hollow-ware; linen and cotton handkerchief, household goods and linen piece goods; ostrich, fancy feather and artificial flower; and toy trades; and in the aerated waters trade in England and Wales, and the milk distributive trade in Scotland.

Apart from coal miners, the principal groups of work-people whose wages were increased in January were ironstone miners in Cleveland, blastfurnace workers in Cleveland, Cumberland, Northamptonshire and the West of Scotland, workpeople in the making-up and packing trade at Manchester, woollen and worsted workers at Leicester, and felt hat makers in Lancashire and

COST OF LIVING.

At 1st February the average level of retail prices of all the commodities taken into account in the statistics prepared by the Ministry of Labour (including food, rent, clothing, fuel, light and miscellaneous items) was approximately 77 per cent. above that of July, 1914. The corresponding figure for 1st January was 78 per cent., and that for 1st February, 1922, was 88 per cent. The highest point reached was 176 per cent. above the pre-war level, in November, 1920, and the present figure is the lowest recorded since October, 1917. For food alone the increase at 1st February, as compared with July, 1914, was 73 per cent.

The statistics are designed to indicate the average increase in the cost of maintaining unchanged the pre-war standard of living of working-class families. Accordingly, in making the calculations, the changes in the prices of the various items included are combined in proportions corresponding with the relative importance of those items in pre-war working-class family expenditure, no allowance being made for any changes in the standard of living.

For further particulars and details of the statistics reference should be made to the article on page 50.

TRADE DISPUTES.

The number of trade disputes involving stoppages of work, reported to the Department as beginning in January, was 54. In addition, 17 disputes which began before January were still in progress at the beginning of the month

The total number of workpeople involved in all disputes in January (including those workpeople thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes) was approximately 19,000, as compared with 7,400 in the previous month and 15,400 in January, 1922. The estimated aggregate duration of all disputes during January was 117,000 working days, as compared with 72,000 days in December, 1922, and 162,000 days in January, 1922.

The principal new dispute was that which began on 20th January in the bookbinding industry in the London district, and continued until 13th February.

^{*} The corresponding figure for the end of December is not available, but the total number unemployed at the latter date is known to have been greater than at 18th December.

RENT RESTRICTIONS ACT: COMMITTEE'S REPORTS.*

THE MINISTRY OF LABOUR GAZETTE.

The Departmental Committee on the Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, thave presented their Final Reports. The Committee as reappointed on the 4th December, 1922, were not bound by the Interim Report presented on the 19th October, 1922, by the original Committee, and accordingly the whole question was gone into afresh. The Reports take the form of a Majority Report, signed by all but two of the members (with reservations on the part of some of them), and a Minority Report signed by the remaining two members. A summary of the more important recommendations in these Reports is given below :-

MAJORITY REPORT.

The majority are strongly of opinion that all restrictions should be removed at the earliest possible date, as they conclude that the Acts have had an adverse effect upon the provision of new houses. The restrictions should, however, be removed gradually. The first Rent Restriction Act (passed in 1915) applied only to houses whose "standard" rent (or, in certain cases, rateable value) was not more than £35 (in London), £30 (in Scotland), or £26 (elsewhere); these limits were doubled in 1919, and trebled in 1920, by the present Act, which remains in force until 24th June, 1923 (in Scotland until 28th May, 1923). They recommend that the houses which were first brought under the Act of 1920 should not be included under the provisions of any new Act; and that in the case of the other two classes restrictions should be withdrawn from houses first included in the 1919 Act at Midsummer, 1924, and from the rest at Midsummer, 1925 (or, in Scotland, at 28th May, 1924 and 1925 respectively). As further means of withdrawing protection gradually from houses coming within the provisions of the Act, it is suggested that any house which is, or becomes, wholly vacant after the date of publication of the Report should be automatically withdrawn from the scope of the Act, and that tenants should be at liberty, under certain conditions, to contract out of the Act.

No alteration is recommended in the permitted increases of rent, except in the case, referred to below, of a tenant who sub-lets part of a house. Special consideration is, hereof, suggested for house-owners in Scotland, who are placed at a disadvantage as compared with Lightsh owners on account of Scottish rating system.

With regard to the landlord's power to recover possession, the conclusion is reached that provisions analogous to those in the present Act should be re-enacted, with certain modifications. Alternative accommodation should be defined as accommodation reasonably suitable to the residential and other needs of the tenant and his family," instead of, as at present, "reasonably equivalent as regards rent and suitability in all respects," a requirement which is stated to be so stringent that, in practice, 'alternative accommodation" is almost impossible to obtain. Certain relaxations are recommended in the rule as to providing alternative accommodation in the case of an owner requiring possession of his house for his own occupation or for the occupation of his children. Modifications are also recommended in the cases of (i.) possession required for an employee about to be employed (and not only, as now, for an employee already employed); (ii.) possession required by a private person or company (in addition, as now, to public authorities and statutory companies), carrying out improvement works. In all these cases, however, an order for possession from the Court should be required.

Among the recommendations on the subject of sub-tenants, it is suggested that, while sub-tenants should be protected just as tenants are, tenants should be allowed to charge some strictly limited addition to the permitted rent of the part of the house occupied by the sub-tenant, and the landlord should be allowed to charge the tenant some strictly limited addition to the permitted rent. As a check on excessive charges to sub-tenants, the landlord as well as the sub-tenant should be allowed to apply to the Court for determination of the permissible charges. It is also recommended (i.) that no tenant shall have the power to sub-let or assign the whole of his premises to the same person for any provided extending boyond the term of his contractual for any period extending beyond the term of his contractual tenancy; (ii.) that a tenant ceasing to reside on the premises shall retain no rights under the Act after the termination of his contractual tenancy; and (iii.) that where a tenant gives his landlord notice to quit, the position of the sub-tenant shall not be

The Report recommends the continuance of the provisions of the present Act (with certain minor amendments) as regards (a) the tenant's right to apply to the Court for a suspension of the increase of rent allowed, on the ground that the premises are not in a reasonable state of repair; (b) furnished lettings, or lettings "with attendance" (subject to a clearer definition of "attendance"); (c) "key-money" and "premiums" (excessive charges for furniture to be reckoned as a premium); (d)

restriction upon the levying of distress for recovery of rent. It suggests that the benefit to the landlord of the system of "compounding" rates, which was taken away by the decision of the House of Lords in the case of Nicholson v. Jackson, should be restored. It also recommends that notices of increase of rent should be simplified, and, in order that landlords shall not be penalised for a bona-fide mistake, that any increase of rent in excess of the legal increase should be invalid only in respect of the excess. Further, where a tenancy is determinable by notice, the notice of increase should be deemed to constitute a notice to determine the tenancy at the earliest date at which it could be determined.

The Report also recommends that an attempt should be made to provide machinery whereby cases may be heard and decided, or a settlement arrived at, before the cost of litigation

There are five separate reservations to the Majority Report, The principal reservation, signed by the Chairman and three other members of the Committee, recommends that all restrictions on dealings with mortgages should be allowed to lapse with the present Act. (The Report itself recommends the mainten-ance of the present restrictions, subject to relaxation by leave of the Court in certain cases.) The other reservations, signed by the individual members of the Committee, deal with the dates at which, and methods by which, restrictions should be withdrawn; with a reduction in the 25 per cent. increase for repairs; and with the rate of mortgage interest.

MINORITY REPORT.

The Minority Report, signed by Mr. Duncan M. Graham, M.P., and Lieut.-Col. D. Watts Morgan, M.P., recommends that the present restrictions should be maintained until 1930 for all classes of houses. As regards the classes of houses whose rents were first restricted by the Acts of 1919 and 1920, however, it should be permissible to withdraw the restrictions before that date by Order in Council submitted to and approved by Parliament. An immediate reduction is recommended of 25 per cent. in all rentals, irrespective of the category in which the house is placed, and at Martinmas, 1923, a further reduction of 15 per cent. Compulsory letting of vacant house and restrictions upon the sale of beauty within the provisions of the

The signatories of this Report disagree with most of the proposals in the Majority Report for the alteration of the present Act in other respects; and conclude with the following

"In our opinion, the whole crux of the question is the deplorable shortage of housing accommodation for the working-classes throughout the country, especially in the industrial centres. It is imperative that the State-"aided Housing Schemes of Local Authorities should be at "once revived, particularly when it is the case that well "over 100,000 building operatives are unemployed at the present time and drawing unemployment benefits."

COMMITTEE ON PUBLIC ASSISTANCE.

THE Prime Minister has appointed a committee to examine the existing arrangements for the grant of assistance on account of sickness, unemployment, and destitution from public funds and from the contributory schemes of Health and Unemployment Insurance, with a view to securing the fullest co-ordination of administrative and executive action. Major A. B. Boyd Carpenter, M.P. (Parliamentary Secretary to the Ministry of Labour), is chairman of the committee, and the other members are Sir David Shackleton, K.C.B., Mr. T. W. Phillips, C.B., C.B.E., and Mr. C. W. G. Eady (Ministry of Labour); Sir Walter S. Kinnear, K.B.E., and Mr. H. W. S. Francis (Ministry of Health); and Mr. J. Jeffrey (Scottish Board of Health) and Mr. C. F. Adair Hore, C.B. (Ministry of Pensions). The secretary of the committee is Mr. H. D. Hancock, of the Ministry of Labour, Montagu House, Whitehall.

WORKMEN'S COMPENSATION (SILICOSIS) COMMITTEE.

THE Home Secretary has appointed a committee (i.) to inquire into the working of the scheme for the refractories industries under the Workmen's Compensation (Silicosis) Act, 1918; and (ii.) to advise on any proposals for applying the Act to other industries which may be referred to it by the Secretary of State.

The members of the committee are :-

Lieut.-Col. the Hon. G. F. Stanley, C.M.G. (Parliamentary Under-Secretary of State, Home Office), Chairman.

Mr. R. R. Bannatyne, C.B. (Home Office). Dr. A. J. Hall, M.D., F.R.C.P. (University of Sheffield).

Sir Walter S. Kinnear, K.B.E. (Ministry of Health).

The secretary is Mr. E. Field, of the Home Office, to whom all communications should be addressed.

MEMBERSHIP, INCOME, EXPENDITURE AND FUNDS OF REGISTERED TRADE UNIONS.

STATISTICS FOR 1921.

IN the MINISTRY OF LABOUR GAZETTE for September, 1922, detailed statistics were given of the total membership of Trade Unions in the United Kingdom at the end of 1921 and in previous years, including, in addition to Trade Unions of employees registered under the Trade Union Acts, other associaions of employees which, though not so registered, include mong their objects the regulation of the conditions of employment of their members. The total number of all such societies, registered and unregistered, known to the Department at the end 1921 was 1,296, and their total membership was approximately

The Chief Registrar of Friendly Societies has now issued a statistical summary* of the membership, income, expenditure, and unds in 1921 and previous years of those Trade Unions in Great Britain which were registered under the Trade Union Acts.

Comparative figures for the years 1913, 1919, 1920 and 1921 extracted from this summary, and adjusted to date, are given below, the membership being shown to the nearest thousand and he income, expenditure and funds to the nearest £1,000. It should be observed that the figures relate only to Great Britain, and that registered Trade Unions of employers, as well as Unions of workpeople and other employees, are included in the figures. The employers' Unions included, however, form only a small proportion of the total, e.g., in 1921 they numbered 97, with a otal membership of less than 53,000, an aggregate income of 2143,000, expenditure of £123,000, and funds of £135,000.

* "Statistical Summary, Showing the Operations of Registered Trade Unions or the Years 1912-21." H.M. Stationery Office. Price 1s. net. The figures for 921 are subject to revision in the Annual Report of the Chief Registrar of Irlendly Societies, Part C, Trade Unions, for the year 1921.
† In some instances Returns were received from Unions removed from the

Register during the year. The total number of Returns removed from the Register during the year. The total number of Returns received for 1921 was 631.

The expenditure on Unemployment Benefit shown in this Table (e.g., £15,150,000 in 1921) represents the total amount paid by the Unions, including, in addition to the benefit chargeable to the funds of the Unions, the amounts disbursed by the Unions and recoverable from the Ministry of Labour under the Unemployment Insurance Acts. The total amount receivable each year from the Ministry of Labour on this account and in respect of administration expenses (e.g., £7,832,000 in 1921) is shown under "Income."

§ This sum includes £817,000, Funds transferred to the Amalgamated Engineering Union, but not brought into account in the Return of that Union for 1920.

|| See preceding Note §.
|| Including £1,982,000 dispute benefit.

JOINT INDUSTRIAL COUNCILS AND INTERIM INDUSTRIAL RECONSTRUCTION COMMITTEES.

DURING the four weeks ended the 27th January, nineteen meetings of Joint Industrial Councils and four meetings of Interim Industrial Reconstruction Committees, as well as a number of meetings of Sub-Committees and District Councils, were reported to the Ministry of Labour.

WAGES, HOURS AND CONDITIONS OF EMPLOYMENT.

A reduction of wages was agreed upon by the Cooperage Industrial Council, which met on the 23rd January. In the issue of the LABOUR GAZETTE for January of this year reference was made to the decision of the Electricity Supply Industrial Council that the District Councils should consider the question of revising the rates of pay and that points remaining undecided after consideration, both by the District Councils and the National Council, should be referred to the Industrial Court for arbitration. The No. 2 (Yorks.) Area District Council was not able to agree on this question, and the matter has been referred to the Industrial Court in accordance with the resolution of the National Council. At a meeting of the Joint Industrial (District) Council for the Export Packing and Cloth Working Industries, it was pointed out that there was a considerable number of separate agreements in operation in these trades, and it was suggested that the agreements should be consolidated into one scheme, After discussion, the question was deferred for further consideration. At a meeting of the Flour Milling Industrial Council, on 24th January, a new agreement was reached regulating wages for the next nine months. Reductions were agreed upon for the various grades of workpeople. The question of the co-ordination of the rates of wages of labourers employed in different Public Utility Services was discussed at a meeting of the Industrial Council for Local Authorities' Non-Trading Services (Manual Workers). It is understood that reductions in wages have been agreed upon by a number of District Councils for these services. A reduction of wages has also been agreed upon by the South Wales and Monmouthshire District Council for the Waterworks Industry.

In connection with a discussion on the subject of hours, over-time and holidays, the question of the precise functions of the National Council and of the Provincial Councils for the *Local* Authorities' Non-Trading Services (Manual Workers) was examined. Further consideration was deferred until the next meeting, but it is believed that a Committee may be appointed to consider the question of revision of the constitution of the National Council. Considerable interest is being taken by the *Printing* Industrial Council in the possibility of developing the organisation of District Councils. The Interim Industrial Reconstruction Committee for the Sugar Refining Industry was wound up at a meeting held on the 12th January, as a result of the withdrawal of the employers' side from the Committee. At a meeting of the Tramways Joint Industrial Council, held on 25th January, the employers drew attention to the grave position arising as the result of the secession of certain large undertakings from the Council, and it was decided to appoint a Committee to consider the position.

OTHER TOPICS.

The Departmental Committee on Lighting in Factories and Workshops has issued its Third Report, and the Home Office has taken this opportunity to draw attention to the conclusions reached by the Committee. Details of the Committee's work have been furnished to a number of Joint Industrial Councils in those industries which were likely to be interested in the subject, and it is understood that these Councils are giving consideration to the questions raised. A meeting of the depleted Building Industrial Council was held on the 22nd January, and further consideration was given to the position which had arisen through the refusal of the National Federation of Building Trades Employers to take any further part in the work of the Education Committee and the Safety and Welfare Committee. The Council passed a resolution regretting that the Federation should not at the moment consider it desirable to continue to participate in this work and suggesting that the Federation should again consider the matter with a view to securing attention to the question of apprenticeship. The Cooperage Industrial Council at its quarterly meeting, on the 23rd January, discussed the danger arising from men being employed to work on casks which had been used for packing white lead, and it was decided ultimately that, with a view to securing adequate precautions, letters should be sent from the Council to the Employers' Associations, drawing attention to the appropriate section of the Factory and Workshops Act, and to the penalty imposed for failure to comply with the conditions laid down. The letters were also to request the employers to see that necessary facilities were provided. At a meeting of the *Heating and* Domestic Engineers' Industrial Council, a representative of the employers, during the discussion on the Council's education scheme, drew attention to the difficulty that arose when apprentices were sent to work away from home and were thereby prevented from attending classes regularly. It was pointed out that the technical schools throughout the country have no pro-

[†] See MINISTRY OF LABOUR GAZETTE, August, 1922, page 358, and December, 1922, page 473. A summary of the provisions of the Act, written from the point of view of the ordinary working class tenant, appeared in the LABOUR GAZETTE for July, 1920, page 354.

vision for correspondence tuition. It was felt impossible for the Council to set up a correspondence school on its own initiative. At a meeting of the Interim Industrial Reconstruction Committee for the Optical Instrument Trade, held on 3rd January, it was decided that at the next meeting suggestions should be brought forward with a view to drawing up a schedule showing the points on which the Overseas Trade Department could provide useful information for the trade. The Printing Industrial Council, on the 10th January, gave its approval to a leaflet on Ventilation and Health for distribution throughout the industry.

In connection with their recent efforts to lessen the danger to health in bronzing, the Council examined specimens of printing with bronze ink in place of bronze powder, and it was suggested that it might be possible to do away with bronzing so far as letterpress printing was concerned. Members of the Council were invited to go further into the matter and to make experiments, and a suggestion was made to the Health Committee of the Council that they should endeavour to meet the Society of British Printing Ink Makers with reference to the production of bronze ink both for letterpress printing and lithography. The Council also decided to co-operate with the Home Office in the matter of certain recommendations with regard to the lighting of factories and workshops.

In addition, the Council discussed the subject of pressing for a reduction in certain postal rates and a number of other topics of interest to the industry, including unemployment insurance by industry.

The Papermaking Industrial Council met on 11th January and appointed conciliators in connection with a dispute at a large paper mill. The Council also discussed "Safety First" proposals and the education of workpeople.

OUTPUT, COSTS OF PRODUCTION, AND PROCEEDS OF THE COAL MINING INDUSTRY.

A STATISTICAL Summary* of output, and of the costs of production, proceeds, and profits of the coal-mining industry for the quarter ended 30th September, 1922, has recently been prepared by the Mines Department in continuation of similar quarterly statements previously published for earlier dates.

The Summary shows that at undertakings which produced about 94 per cent. of the total quantity of saleable coal raised during the quarter, 58,717,767 tons of coal were raised, and that, after deducting 3,730,283 tons used at the mines, and 1,293,191 tons supplied to the miners, the quantity disposable commercially was 53,694,293 tons. According to the Morthly Trade and Navigation Accounts the total quantity of coal shipped to and foreign bunkers during the quarter was 23,028,179 tons.

The costs of production at the undertakings covered by the Summary were as shown below:—

mmary were as shown below:			
	Amount	Per ton disposable commercial	
	£	s. d.	
Wages	30,533,993	11 4.48	
Stores and Timber	5,755,347	2 1.72	
Other Costs (management, salaries, insurances, repairs, office and general expenses,	0.700.010	7 1.46	
depreciation, &c.)	8,380,010	3 1.46	
Miners' Welfare Fund contribu- tions	243,742	0 1.09	
Royalties (including the rental value of freehold minerals where worked by the pro-			
prietor)	1,438,261	0 6.43	
Total Costs	46,351,353	17 3.18	
Deduct proceeds of miners' coal	245,126	0 1.10	
Net Costs	46,106,227	17 2.08	
		040 017	CDE

The proceeds of commercial disposals were £49,013,908, equivalent to 18s. 3.08d. per ton, leaving a credit balance of £2,907,681, or 1s. 1.00d. per ton. In the quarter ended 30th June, there was a debit balance of 0.17d. per ton.

An analysis by 13 districts shows that in Scotland, North-umberland, Durham, South Wales, Yorkshire and the East Midlands, and Somerset, there were credit balances ranging from 7.25d. to 2s. 3.13d. per ton, and in the other districts debit balances ranging from 3.11d. to 3s. 9.88d. per ton.

The number of workpeople employed was 1,027,853, the number of man-shifts worked was 65,446,658, and the number of man-shifts lost that could have been worked was 5,476,180. The average output per man-shift worked, based on the tonnage of saleable coal raised, was 17.94 cwts. This figure compares with 17.8 cwts. in the quarter ended 30th June. The average earnings per man-shift worked was 9s. 3.97d., this figure being calculated on the number of man-shifts worked by workers of all ages employed both above and below ground. In the June quarter the corresponding average was 10s. 2.51d.

• Cmd. 1797. H.M. Stationery Office. Price 2d.

In the following Table the net costs, proceeds, and wages per ton disposable commercially, and the output and earnings per man-shift worked, are shown for the various districts:—

FATAL ACCIDENTS AT MINES AND QUARRIES IN 1922.

The Mines Department have issued a preliminary statement of the number of deaths caused by accidents in and about the mines and quarries of Great Britain, together with the Isle of Man, during the year 1922.§ The principal statistics are given in the following Table (in which the figures for 1922 are subject to minor corrections on receipt of the final returns for the annual Report):—

* 300 100	Numb separat accide	te fatal	Number of dea caused by fate accidents in	
	1922.	1921.	1922.	1921.
Mines under the Coal Mines Act, 1911	1,020	741	1,100	755
Mines under the Metalliferous Mines Regulation Act, 1872	9 44	12 46	9 44	12 46
Total	1,073	799	1,153	813

There were three serious explosions of fire-damp or coal dust in 1922, causing 57 deaths in all. The preliminary statement observes that "apart from such accidents, the sporadic incidence "of which tends to obscure the normal trend of mining accidents, the death-rate at coal mines appears to have been approximately the same in the years 1921 and 1922, when allowance is made for the fact that almost all the mines were idle for about three months in 1921."

In spite of the occurrence of the three serious explosions above mentioned, the deaths from this cause, in mines under the Coal Mines Act, were far outnumbered by those from falls of ground (546) and from haulage accidents (211), which together accounted for nearly 70 per cent. of all the deaths from accidents in such mines. Of the deaths from falls of ground, 359 occurred from falls of ground at the working face, 185 from falls of ground in underground roads, and 2 from falls of ground in shafts. Of the haulage accidents, nearly 90 per cent. were cases of persons run over or crushed by trams or tubs while working underground. Other underground accidents in mines under the Coal Mines Act accounted for 180 deaths (including 16 deaths from explosions other than the three great explosions mentioned above), and 106 deaths occurred from accidents at the surface.

SHIPBUILDING IN 1922.

According to Lloyd's Register Annual Summary of Mercantile Shipbuilding for the year 1922, the total output of mercantile shipbuilding (exclusive of warships and of vessels of less than 100 tons gross) in the world during 1922 was 2,467,084 tons (gross). This total included 1,031,081 tons in Great Britain and Ireland, 575,264 tons in Germany, 184,509 tons in France, 163,132 tons in Holland, 119,138 tons in the United States, 101,177 tons in Italy, 83,419 tons in Japan, and 209,364 tons in all other countries

§ Stationery Office publication; price 4d. net.

The total output showed a reduction, as compared with 1921, of about 1,874,000 tons. In Great Britain and Ireland the tonnage launched in 1922 was about 507,000 tons less than in 1921; in the United States the decrease amounted to no less than 187,000 tons.

On the Clyde, the tonnage launched was 392,000 tons, compared with 505,000 tons in 1921; on the North-East Coast it was 432,000 tons, compared with 663,000 tons in 1921; and at other ports in Great Britain and Ireland it was 207,000 tons, compared with 370,000 tons in 1921.

The following Table compares the output of Great Britain and Ireland with that for all other countries in the years 1907-13 and 1919-1922:—

		in and Ireland.	Other Countries.		
Year.	No.	Tons (Gross).	No.	Tons (Gross).	
1907	841	1,607,890	947 -	1,170,198	
1908	523	929,669	882	903,617	
1909	526	991,066	537	610,991	
1910	500	1,143,169	717	814,684	
1911	772	1,803,844	827	846,296	
1912	712	1,738,514	1,007	1,163,255	
1913	688	1,932,153	1,062	1,400,729	
1919	612	1,620,442	1,871	5,524,107*	
1920	618	2,065,624	1,141	3,806,042*	
1921	426	1,538,052	951	2,803,627	
1922	235	1,031,081	617	1,436,003	

The figures relate to vessels launched in 1922, whether completed or not during the year.

EMPLOYMENT OF EX-SERVICE MEN.

INDUSTRIAL TRAINING.

AT 30th January, 1923, the number of men in training was 17,748, and the number awaiting training 12,860. Since 1st August, 1919, 66,441 men have terminated training.

INTERRUPTED APPRENTICES.

Up to the 7th February, 1923, 44,696 apprentices have been accepted for training with 17,844 employers, as compared with 44,695 apprentices, with 17,841 employers, on 3rd January, 1923.

The apprentices rejected up to the 7th February, 1923, numbered 2,178, this being the same as on the 3rd January, 1923. Of those accepted 42,328 terminated training and 2,368 were still in training. The corresponding numbers on 3rd January, 1923, were 42,101 and 2,651.

The number of men who have received institutional training has increased during the five weeks from 2,291 to 2,301.

NATIONAL SCHEME.

On the 31st January, 1923, the number of employers on the King's National Roll was 30,742.

The undertakings given by these employers under the provisions of the National Scheme for the employment of disabled ex-service men cover approximately 300,000 disabled ex-service men.

RETAIL PRICES OF CLOTHING, 1914-23.

In connection with the statistics which are published each month in this GAZETTE dealing with the increase since 1914 in the retail prices of the principal items of working-class expenditure, particulars are regularly collected from a large number of shopkeepers showing the changes in the prices of various articles of clothing of kinds most generally purchased by working-class families. On the basis of these particulars a calculation is made each month (see page 50 of this issue) of the average percentage increase in the prices of such articles since July, 1914. The method by which the calculation is made was explained fully on pages 178-179 of the LABOUR GAZETTE for April, 1921.

Owing to the wide range of quotations, both now and before the war, to changes in qualities and in stocks held by retailers, and to the wide variations in the extent to which different articles and qualities have been affected by price-changes, it is impossible to make exact calculations of the average percentage increase in clothing prices generally, and any single percentage arrived at by the ordinary methods of averaging can only, at best, be regarded as affording an approximate indication of the general change in prices since 1914. The number of returns obtained, however, is very considerable, precautions are taken with a view to ensuring, as far as possible, the comparability of the prices quoted for different dates, and, subject to the general qualification referred to above, the Department has no reason to think that the results of the investigations are unrepresentative of the general course of prices of the cheaper grades of clothing.

The statistics show that there was a steady rise in the retail prices of clothing from the beginning of the war until the summer of 1917, followed by a more rapid rise until about the date of the Armistice. Thereafter prices remained stationary, on the whole, until the autumn of 1919, but subsequently rose again until the summer of 1920, when the maximum increase of about 330 per cent. above the pre-war level was recorded. In October, 1920, a decline set in, and during the twelve months, 1st October, 1920, to 1st October, 1921, the increase was reduced by one-half, the average percentage increase over the pre-war level at 1st October, 1921, being about 165 per cent. Since that date reductions in prices have continued, but at a slower rate, and recently prices have shown relatively little movement, though their tendency is still downward. At 1st February, 1923, the average increase, as compared with July, 1914, was about 125 per cent.

For the six groups in which the articles taken for comparison are classified the average percentage increases at 1st February, 1923, as compared with July, 1914, were as under:—

		rcentag
	GROUP.	ncrease
(1)	Men's Suits and Overcoats	90
(2)	Woollen Material for Women's Outer Garments	160
	Woollen Underclothing and Hosiery	
(4)	Cotton Material for Women's Outer Garments	210
(5)	Cotton Underclothing Material and Hosiery	140
	Boots	

The materials for garments, of course, are in some cases made up at home, in which cases the increase in the cost of the material closely represents the increase in the cost of the garment, whilst in other cases they are given out to be made up by dressmakers, etc. Recent enquiries by the Department indicate that the charges for making up garments for working-class customers average about one-and-a-half times the corresponding pre-war charges, and account has been taken of this in arriving at the final percentage.

Although, as was explained in the article in the LABOUR GAZETTE for April, 1921, to which reference has already been made, the method of calculation is that of combining the percentage changes in the prices quoted by retailers from month to month, and not that of averaging the prices quoted (the range of prices being so wide that the utilisation of average prices in this connection would be unsuitable for the purpose), it may be of interest to give an indication of the general ranges of prices which are shown by the returns on which the percentages are based.

Accordingly, the following Table has been prepared to show the general range of the price-quotations used for the purpose of the index number. The quotations for materials are "per yard," for footwear "per pair," and for other articles "each."

Article.	Predominant Rang of Grades by Working-0	ges of Retail Prices Purchased class Families.

It should be observed that while the figures given include the majority of the quotations, other quotations were also important in particular cases. For example, costume cloth was very frequently purchased by working-class families at 1s. $0\frac{3}{4}$ d. to 1s. 4d. in 1914, and at 1s. 11d. to 2s. 11d. in February, 1923.

B

Net costs r present total costs less proceeds of coal upplied to miners.
† The amounts shown in this column are included in those shown as et costs.
† Including Nottinghamahire, Derbyshire, Leicestershire, Cannock Chase and Warwickshire.

^{*} Figures are not available for Germany for these years.

CO-OPERATION IN AGRICULTURE IN 1921.

THE following particulars have been prepared by the Registrar of Friendly Societies (in continuation of a series of articles* on the same subject formerly prepared by the Board of Trade and the Ministry of Labour), from the statutory Returns furnished annually to his Department under the Industrial and Provident Societies Acts. The particulars for years previous to 1921 relate to the United Kingdom, but for that year they relate to Great Britain only, as the Irish Societies no longer fall under the Registrar's supervision. A comparison of the figures tabulated below for the years 1913-15, with those previously published* for those years will reveal some variation of detail. Such variation is attributable partly to differences of data (e.g., in some instances returns are now available which had not been received when the statistics were last compiled), and partly to differences in the classification of particular Societies as "distributive " or " productive."

Some difficulties occur in determining whether Agricultural Societies are "distributive" or "productive," which do not arise in the case of other classes of Co-operative Societies registered under the Industrial and Provident Societies Acts. The members of the former are generally themselves producers, and their Societies are formed to supply them with the seeds, implements, and other requirements of their industry, or to aid them in the marketing of produce. Often the Societies have both objects. In some instances they may convert a part of the produce of their members into a more marketable form (e.g., a Dairy Society converting milk into butter and cheese), and so may be considered as engaged in production, but of Societies engaged in those forms of production which are essentially agricultural (the growing of crops and raising of live-stock), there are comparatively few examples, and for the most part these are departments of non-agricultural co-operative societies.

In the Annual Reports of the Chief Registrar of Friendly Societies, Agricultural Co-operative Societies engaged in trading are separated into the following groups:—(1) Supply Societies; (2) Dairy Societies; (3) Egg and Poultry Societies; (4) Fruit and Market Garden Produce Societies; (5) Farmers' and Grouper' Societies; (6) Miscelles and Produce Societies; (7) Growers' Societies; (6) Miscellaneous Produce Societies; (7) Agricultural Wholesale Societies. In addition are included the following groups of Societies which are primarily established to render certain services to their members on payment of a fee, and are engaged in trading to a minor extent only:—(1) Flax Societies; (2) Breeding Societies; (3) Threshing Societies; (4) Auction Marts; (5) Credit Societies.

For the purposes of the statistics which follow, Dairy, Farmers' and Growers', Breeding, Flax, Threshing, and Miscellaneous Produce Societies, have been taken as "Productive," and the remaining Societies, with the exception of Credit Societies (which will be dealt with in a separate article), as "Distributive." In the "Productive" section the sales include not only sales of requirements, but also produce sold on behalt of members without undergoing any productive process at the hands of the Society. In the "Service" Societies, service fees are not included as sales.

DISTRIBUTION AND PRODUCTION.

Returns for Great Britain for the year 1921 were furnished to the Registrar by 1,201 registered Co-operative Societies engaged in Agricultural Distribution and Production. Of these Societies 1,029 were engaged almost wholly in Agricultural operations, 829 being engaged mainly in the distribution of Seeds, Implements, Manures, etc., and 200 in the preparation and disposal of Agricultural products, chiefly Butter and other

The 1,029 Societies had an aggregate membership of 162,374, a decrease of 3,010, or 1.8 per cent. on that of the preceding The total share, loan, and reserve capital amounted to £3,820,000, an increase of £323,000, or 9.2 per cent. on the amount in 1920. The aggregate sales amounted to £16,632,000 during the year, or nearly £5,000,000 (22.5 per cent.) less than in the preceding year. In the aggregate the year's trading resulted in a loss of £153,000 as compared with £210,000 in the preceding year. In both years the loss was to some extent attributable to the heavy losses on trading incurred by the Agricultural Wholesale Society, Ltd.

The number of persons employed by these Societies in connection with agriculture was 4,427, and the amount paid to them in wages £661,000. These figures represented increases over the previous year of 323 and £52,000 respectively.

In addition to the 1,029 Societies mentioned above, there were 172 Co-operative Societies having farming and dairying departments in 1921. They employed 2,623 persons, to whom £362,662 was paid in wages, and the value of their productions in these departments amounted to £1,394,000.

The following Table shows for England and Wales, and Scotland, respectively, the sales in 1921 of all the 1,201 Distributive and Productive Societies and Departments :-

* The last published article of the series related to the year 1915. See the November, 1917, issue of this GAZETTE, pages 397-8.

	Sales and Transfers.			
	Agricultural Distributive Societies.	Agricultural Productive Societies and Departments.	Total.	
England and Wales Scotland Ireland	£ 11,127,160 507,116 (Fi	£ 5,171,540 1,217,233 gures not availab	16,298,700 1,724,349 le.)	
Great Britain	£11,634,276	£6,388,773	£18,023,049	

In 1920 the sales of Distributive Societies in Great Britain were more than four times the sales of the Irish Societies, but in the Productive Societies and Departments the sales of the Irish Societies exceeded those of Societies in Great Britain by more than £1,000,000, or 14.5 per cent.

Distribution.—The Table given below shows for the years 1913-1921 the sales of Agricultural "Distributive" Societies in England and Wales, Scotland, and Ireland, respectively:—

	England and Wales.		Scotl	and.	Ireland.		
Year.	No. of Societies	Sales.	No. of Societies.	Sales.	No. of Societies.	Sales.	
1913 1914 1915 1916 1917 1918 1919 1920	251 276 280 308 414 508 570 659 621	£ 1,439,559 1,658,280 2,517,215 3,593,925 4,554,292 5,194,566 9,506,189 13,884,844 11,127,160	85 69 104 122 152 182 195 195 208	£ 280,022 298,525 338,851 326,516 417,626 482,447 566,693 628,874 507,116	133 121 181 202 227 231 276 279	£ 438,945 482,869 720,762 1,017,420 1,383,325 1,930,437 2,627,430 3,407,921	

As compared with the preceding year the sales in England and Wales in 1921 decreased by 20 per cent., and in Scotland by 19 per cent. The figure for England and Wales, however, was nearly eight times as great as in 1913, and that for Ireland in 1920 nearly eight times as great as in 1913; but comparisons are affected, of course, by the marked changes in prices during the period covered by the Table.

Production.—The following Table gives the number of "Productive" Societies, with the amount of sales and transfers for the years 1913-1921:—

Yes	ar.	Special Farming and Dairying Societies.		and ments of wholesale		Totals—All Classes.	
		No. of Societies.	Sales.	No. of Societies.	Sales and Transfers.	No. of Societies	Sales and Transfers.
				UNITED 1	KINGDOM.		direction.

				GREAT I	BRITAIN.	1 - 12 m	
192(* 1921		207 200	6,949,227 4,997,818	149 172	1,368,719 1,390,955	356 372	8,317,946 6,388,773

Compared with 1920 there was a decrease in Great Britain of 28 per cent. in 1921 in the sales of the Special Farming and Dairying Societies, but an increase of 1.6 per cent. in the sales of the Agricultural departments of non-agricultural Co-operative Societies. The increase in the latter was due to 23 additional Societies having engaged in farming. The extent of the development is made the more apparent on a comparison of the figures for Farming and Dairying Departments with earlier

Profit-Sharing.—The Returns furnished to the Registrar show that of the 829 Agricultural "Distributive" Societies, 62, employing 660 persons and paying £98,343 in wages, allotted bonuses to their employees amounting to £3,371, or 7d. in the £ on wages. Of the 200 Agricultural "Productive" Societies, 11, employing 115 persons, and paying £16,159 in wages, allotted bonuses amounting to £1,303, or 1s. 7d. in the £ on wages. Of the 172 departments of Industrial Societies, 14, employing 291 persons and paying wages amounting to £46,310, allotted bonuses amounting to £952, or 1d. in the £ on wages.

* To facilitate comparison, 1920 figures are given inclusive and exclusive of Ireland.

WORKMEN'S COMPENSATION, 1921.

February, 1923.

THE Home Office have issued Statistics of Compensation and of Proceedings under the Workmen's Compensation Act, 1906, and under the Employers' Liability Act, 1880, during the year 1921.* The Statistics relate to seven great groups of industries—mines, quarries, railways, factories, docks, constructional work, and shipping—in which an aggregate number of 7,315,866 persons were employed, on the average, during 1921. Comparative figures of cases, and of compensation paid, for 1920 and 1921, are given in the following statement, together with the correonding figures for 1911:-

1008 A 100 Table 1	1911.	1920.	1921.

TOTAL	423,052	385,517	285,746
Payments for compensation: Fatal cases	£ 620,155† 2,436,249 3,056,404	£ 755,657 5,222,352 5,978,009	£ 518,064 4,991,331 5,509,395

The average amount of compensation paid in fatal cases in The average amount of compensation paid in fatal cases in 1921 was £217, as compared with £214 in 1920, and £154 in 1911. The average amount paid in 1921 in non-fatal cases was £73 (for lump-sum payments) and £13 (for weekly payment cases), as against £62, and £11, respectively, in 1920; the average for all non-fatal cases being £17 12s. in 1921, as against £13 13s. in 1920, and £5 16s. in 1911. The increase in 1920 and 1921 as compared with 1911 is largely attributable to the operation of the Workmen's Compensation (War Addition) Act, 1919. The prevalent unemployment in 1921 is reflected in a great reduction in the number of cases, both fatal and non-fatal, as compared with 1920, but in an increase in the average amount of compensation, due, no doubt, to the fact that the depression in trade, and consequent lack of employment, tended to delay the return to work of the disabled workmen.

The following Table shows the number of persons employed, and the amount of compensation paid, in each group of

Industry.	Persons employed	Total Compensation	Charge per perso employed.	
Tital Sign	in 1921.	paid in 1921.	1921.	1920.
Shipping	201,464 5,218,311 127,844 1,109,023 62,722 86,444 510,058	£ 156,525 2,463,782 211,385 2,257,511 65,171 66,889 288,132	s. d. 15 6 9 5 33 1 40 9 20 9 15 6 11 4	s. d. 16 6 9 3 29 5 37 3 19 0 13 5 11 8
TOTAL	7,315,866	5,509,395	15 1	14 4

It is estimated that the charge arising under the Act in the coal mining industry in 1921 amounted to about 3.2d. per ton of coal raised, or to 3.3d. in the pound on the wages paid. The amount of compensation on railways, according to information obtained from one large railway company, was estimated at about a penny in the pound on wages.

Of the total number of cases, as shown above, compensation in cases of industrial disease was paid in 14 fatal and in 9,276 nonfatal cases in 1921. Of the non-fatal cases, no fewer than 8,711 (or 94 per cent.) were in the mining industry. The mining cases were principally due to miner's nystagmus, "beat hand," and "beat knee." There has been a very remarkable increase in cases of nystagmus since 1908, the first full year after the disease was scheduled under the Act, the total number rising from 460 in that year to 7,028 in 1920, and 6,717 in 1921.

Statistics are also given as to the administration of the Acts, showing that the number of applications for arbitration taken into Court in 1921 under the Workmen's Compensation Acts was 5,232. The number of memoranda of agreements and informal arbitrations registered in the Courts was 24,311; and the number of actions under the Employers' Liability Act, 1880, was 27. The remedy provided by the Employers' Liability Act has been steadily falling into disuse since the Workmen's Compensation Act of 1906 came into operation.

COST OF LIVING IN NORTHERN IRELAND.

In September, 1922, the Minister of Labour for Northern Ireland appointed a Departmental Committee, under the chairmanship of Mr. J. H. Robb, K.C., M.P., "to consider the Cost of Living in Northern Ireland as compared with that in Great Britain, and the causes of differences, and to make such recommendations as they think proper, and to report on the advisability of publishing a separate Cost of Living Index Number for Northern Ireland."

* Cmd. 1793, H.M. Stationery Office: price 6d. net. † There was a great colliery explosion in this year.

The Committee have now issued an Interim Report, in which they deal with the cost of living in Northern Ireland as compared with that in Great Britain, and in particular with the cost of food, as their enquiries regarding other items of expenditure, such as rent and clothing, are not yet complete.

The Committee were advised that an exhaustive comparison of the present cost of living in the North of Ireland and Great Britain would involve the collection of detailed accounts of expenditure in a large number of households in each area. They point out that such an undertaking would involve a great deal of time and money, that employment is at present scarce, and many families are either without wages or living on very muchdiminished wages. All authorities predict that this is not a permanent state of affairs, and any series of budgets collected now might not be a reliable basis for calculations of the cost of living in two or three years time; while budgets collected at the end of the past two or three years that the series of the cost of living in two or three years that the series of the past two or three years that the series of the past two or three years that the series of the past two or three years that the series of the past two or three years that the series of the past two or three years that the series of the past two or three years that the series of the past two or three years that the series of the past two or three years that the past two or three years the years that the past two or three years that the past two or three years that the past two or three years that the years that years the years that the years that the years that years the year end of the next two or three years would, in all probability, represent a mode of living to which people would have settled down, and which might, therefore, be expected to continue suitable for cost of living calculations for a reasonably long

For these reasons the Committee have not obtained any new collection of family budgets, but they have made calculations of the cost of food, using for the purpose average prices of the principal articles of food based on statistics collected by the Ministry of Labour for Northern Ireland and by the British Ministry of Labour, "weighted" by quantities derived from the Board of Trade collection of working-class family budgets of 1904, slightly modified. These calculations indicate that the average increase in the cost of food in Northern Ireland, between July, 1914, and 2nd October, 1922, was 803 per cent., as compared with an increase of 76.7 per cent. between July, 1914, and 30th September, 1922, for the United Kingdom as a whole. The Committee point out, however, that the seasonal increase in the price of milk, which occurred mainly at the beginning of October in Great Britain, had occurred almost a fortnight earlier in Northern Ireland, and that if allowance be made for this difference the increase of 76.7 per cent. stated for the United Kingdom would be raised to approximately 79 per cent., as compared with 80.3 per cent. in Northern Ireland.

There is, however, a further consideration to be borne in mind. In order to render possible a comparison of like with like, the Committee decided, for the purpose of the calculations resulting in the foregoing figures, to take account of the prices of home-killed meat only, as the proportion of imported meat eaten in Northern Ireland is small. If, however, imported meat be included in the calculation of the increase for the United Kingdom, but excluded in the calculation of the increase for Northern Ireland, the increase of 79 per cent. given above for the United Kingdom is reduced to 74 per cent. The former figure, 79 per cent., may be regarded as being practically identical with the figure 80.3 per cent. arrived at for Northern Ireland. While, therefore, the Committee have come to the conclusion that the relative increase in the cost of food over the 1914 level is higher in Northern Ireland than in the United Kingdom taken as a whole, it should be borne in mind that "the greater increase in the cost of food in Northern Ireland is principally due to the local preference for home-

As regards the relative levels of the cost of food in Northern Ireland and in Great Britain, the absence of imported meat from the Ulster dietary results in the same quantity of meat costing more in Northern Ireland than in Great Britain, on the average, and the Committee remark that consideration of this point suggests that the cost of food actually consumed is probably slightly higher in Northern Ireland than in Great Britain. They observe, however, that "there may be counterbalancing considerations of a similar nature in the case of other commodities. Porticularly in the case of tea there is a widespread in ties. Particularly in the case of tea there is a widespread impression that the higher price in Northern Ireland partly represents a preference for better quality. Butter is probably not only cheaper, but better; and bacon, though slightly dearer, is probably of better quality in Northern Ireland."

The general conclusion of the Committee on this point is, better that there is a similar nature in the case of other commodities.

however, that there is at present no large difference in the cost of food between Northern Ireland and Great Britain.

EMIGRATION AND IMMIGRATION: REPORT BY INTERNATIONAL LABOUR OFFICE.

Following its study of the methods of compiling emigration and immigration statistics, of which an account was given in The Ministry of Labour Gazette for October, 1922, page 402, and in continuation of the task of giving effect to the resolutions adopted by the International Emigration Commission, which met at Geneva in August, 1921, the International Labour Office has now issued, in a volume of over 450 pages, a survey* of legislation and international treaties affecting emigration.

The Governing Body of the International Labour Office was requested by the International Emigration Commission:

to take all measures necessary to ensure that the

Technical Emigration Section (of the International Labour

* Emigration and Immigration: Legislation and Treaties. International Labour Office, Geneva, 1922. Price 6s.

Office) . . . shall investigate the question of international co-ordination of legislation affecting emigration."

The present volume has been compiled principally in order to provide a basis of discussion and to prepare the way for the relaboration of uniform legislation; but it is also offered as a guide to persons interested in the question of migration. The book has been divided into three principal parts:

(1) Legislation concerning emigration.

(2) Legislation concerning immigration.

(3) International agreements concerning emigration and immigration.

In each part the laws, regulations or treaties in force have been analysed and classified according to subject-matter, and, been analysed and classified according to subject-matter, and, under each heading, the countries have been arranged alphabetically, so that, on a given subject, such as Passports, it may be possible not only to refer immediately to the laws and regulations in force in a particular country, but also to compare all such laws and regulations. In all, the laws, regulations and treaties of 76 countries have been consulted. The work deals only with measures adopted before January, 1922; but a supplement, at the end of the book, gives an analysis of the principal legislative and diplomatic measures adopted between 1st January and the end of August, 1922.

CONCILIATION AND ARBITRATION IN NEW ZEALAND: AMENDMENT OF LAW.

The machinery for dealing with labour disputes in New Zealand is governed by two Acts, passed in 1908 and 1913 respectively. The earlier Act, entitled the Industrial Conciliation and Arbitration Act, 1908, which has been frequently amended, provides for the optional registration of "industrial unions," whether trade unions or employers' associations, the effect of registration being to render the organisations subject to the provisions of the Act for the settlement of disputes by Councils of Conciliation or by the Court of Arbitration. For the purposes of the Act, the Dominion of New Zealand is divided into eight industrial districts, and Industrial Commissioners (not exceeding four in number) are appointed to exercise powers with regard to the settlement of disputes. A dispute may be referred ceeding four in number) are appointed to exercise powers with regard to the settlement of disputes. A dispute may be referred to a Commissioner by a trade union, an employers' association, or an employer. The Commissioner thereupon sets up a Council before which the parties are heard. The Council consists of the Commissioner and assessors nominated by the parties. Should a settlement be arrived at, the terms are embodied in an industrial agreement. If, on the other hand, no agreement is reached, the Council may make a recommendation for settlement of the dispute. Should none of the parties disagree with such recommendation within a month, it becomes binding upon the parties as an industrial agreement. In the event of no settlement being arrived at or the recommendation being resettlement being arrived at or the recommendation being rejected, the matter is referred to the Court of Arbitration, which consists of a judge of the Supreme Court and two assessors, one representing the employers, the other the workers. The awards of the Court are enforceable upon all employers and industrial unions in the industry and in the particular district to which the award relates

unions in the industry and in the particular district to which the award relates.

The Act of 1913, termed the Labour Disputes Investigation Act, applies only to societies of workers and their employers who are not bound by any award or industrial agreement under the Conciliation and Arbitration Act, and provides machinery for the settlement of disputes by a Labour Disputes Committee. The Committee is composed of representatives of employers and workers, with a chairman elected from among such representatives. It endeavours to effect a settlement, and in case of failure it submits recommendations for settlement. If no agreement is come to, the Registrar of Industrial Unions carries out a secret ballot among the workers on the question whether a strike shall take place. Where recommendations have been made, their adoption is submitted to ballot. A similar ballot is carried out among employers with regard to accepting the recommendations adoption is submitted to ballot. A similar ballot is carried out among employers with regard to accepting the recommendations or the declaring of a lock-out. Where an agreement is arrived at it has the same binding force as an industrial agreement under the Conciliation and Arbitration Act. Strikes or lock-outs are unlawful (1) unless notice has been given of the existence of a dispute, (2) before the expiration of seven days after publication of the results of the secret ballot, and (3) during the currency of an agreement.

the currency of an agreement.

An Act dated 31st October, 1922,* which came into operation on 1st January, 1923, makes certain amendments and additions in the legislation above described. The chief features of the new Act are as follows

Whereas the Act of 1908 provided that awards were to apply only to the workers employed for the pecuniary gain of the employer, the amending Act states that any award may be applied to a County Council or Road Board, on application by such authority or by any union of workers on behalf of the employees of such body.

employees of such body.

A new provision requires industrial organisations of employers and workers to keep proper accounts, and empowers the Registrar of Industrial Unions to require any association to submit its accounts to audit, if he has reason to believe that accounts have not been properly kept or that money has been misappropriated. It is also prescribed that no person shall be required to pay an entrance fee exceeding five shillings on his admission as a

member of any workers' organisation. Moreover, no subscription is to exceed one shilling a week, and no levy is to become payable until at least one month after a person has become a

WAGE REDUCTION BY NEW ZEALAND **ARBITRATION COURT.***

On 22nd November, 1922, the New Zealand Arbitration Court On 22nd November, 1922, the New Zealand Arbitration Court announced its decision in regard to wages of workpeople, based on the movements in the cost of living index for the half-year ended 30th September. The Order embodying this decision provides that all time rates of remuneration provided for in awards and agreements now in force shall be reduced by 13s. a month, 5s. a week, 6d. a day or \(^3_4\text{d}\), an hour for adult male workers; by half these amounts respectively for adult females and by one-third respectively for juniors. Piecework earnings are to be reduced by 3s. a week and 1s. 6d. a week for male and female workers respectively. workers respectively.

The awards and agreements not governed by the new Order, and the exemptions from the Order are also specified.

SPARE-TIME WORK AND THE EIGHT-HOUR DAY IN GERMANY.†

SPARE-TIME work has become very widespread in Germany since the introduction of the eight-hour day. Trade unions and other public bodies have made various efforts to prevent it, ‡ and recently, by provisions in collective agreements, employers' and workers' associations have endeavoured to restrict it or abolish it altogether, the former because of the unfair competition of the worker, who frequently works at lower rates than those at which the manufacturer can work with profit, the latter because the practice is held to threaten the maintenance of latter because the practice is held to threaten the maintenance of the eight-hour day. The employer also suffers from the fact, particularly in trades where the work is of an arduous char-acter, that some workers expend so much energy in their spare time that they are unfit to do a good day's work at their regular employment. Even in such trades as mining, iron and steel, quarrying, pottery, etc., it has been found necessary to outside the undertaking in which the worker is

Rules prohibiting spare-time work are more commonly to be met with in agreements concluded in the small handicraft trades in which few tools are required, such as installation work, plumbing, watch and instrument making, saddlery, printing,

plumbing, watch and instrument making, saddlery, printing, roofing and chimney sweeping.

Generally the agreements prescribe that if an employer demands that a worker should work exclusively for him, he should be able to provide full-time work. Thus several agreements prohibit spare-time work only for "fully employed" workers, the prohibition ceasing to apply in the case of workers on short-time. In trades in which spare-time work is not absolutely forbidden in collective agreements, the prohibition may be said to take one of two forms. It may forbid—

(1) Spare-time work in the workers' own trade (e.g., in the watchmakers' agreement such work is prohibited, whether it is done on the worker's own account or for another emits.

it is done on the worker's own account or for another em

ployer); or
(2) spare-time work done for profit (whether in the
worker's own trade or not), elsewhere defined as "done for
another employer," "wage-work done elsewhere," or
"regular wage-work." Sometimes work done for the
worker's own family is expressly excluded from the prohibition, and the Hanover agreement for communal workers
allows "work in the worker's own garden and urgent harvest
work on his own account in the months of July and
October" October.

October."

In some agreements spare-time work is declared to be permissible with the approval of the employer, who in these cases is generally a municipal or other public body. In some cases the approval of the works council is also necessary. The rule is less strict for spare-time work done by salaried employees, for which in general only the employer's consent is required.

Penalties are provided in order to make these prohibitions effective, e.g., dismissal without notice, with the addition in one case of loss of annual leave or compensation for annual leave. Generally, however, dismissal is possible only after repeated offences preceded by warning. In one case (the Federal Agreement for saddlers) a fine may be imposed by the tribunal established by the agreement, dismissal following a repetition of the offence. of the offence.

In a number of agreements both parties expressly state their determination to abolish spare-time work in some such terms as the following: "The competent workers' organisations pledge themselves to use drastic measures against offenders," or "Both parties pledge themselves to oppose the mischievous practice of spare-time work done for profit and to support their opposition by all the means at their disposal, including the publication of

EXTENSION OF WORKING HOURS.

(a) BELGIUM.*

February, 1923.

SECTION 6 of the Belgian Eight-Hour Day Act of 1921 provides that the eight-hour day or 48-hour week may, by Royal Order, be exceeded: (1) in industries or branches of industry in which the time necessary for the completion of the processes cannot, by reason of their nature, be precisely determined, and (2) in industries in which the materials in course of treatment are adustries in which the materials in course of steament are subject to rapid deterioration. In conformity with this section of the Act, a Royal Order, dated 4th January, 1923, has been ssued, authorising, as an experimental measure, for a period of one year, an extension of the working hours by 100 over the welve-monthly period (subject to the condition that not more than wo hours, in addition to the normal number, shall be worked on by one day) in the following industries, branches of industry one processes: (1) ice-making; (2) manufacture of artificial lates; (3) manufacture of varnish:—workmen employed on gum slates; (3) manufacture of varnish:—workmen employed on gumrunning and the finishing of the varnish; (4) manufacture of glues and gelatines:—workmen employed on taking out of the mould, cutting, stretching on nets and on gelatine drying; (5) vulcanisation of indiarubber articles:—workmen employed on vulcanising; (6) electro-plating:—workmen employed at the electrolytic baths; (7) transport operations:—loading and unloading of goods, shunting, weighing of railway trucks and other vehicles, in so far as these operations are subsidiary to an injustrial enterprise.

(b) SWITZERLAND.+

H.M. Minister at Berne has forwarded a copy of an Order, issued by the Swiss Federal Department of Public Economy, and dated 27th December, 1922, which authorises an extension of the normal working hours to 52 a week in certain branches of the embroidery industry, the cotton industry, the flax industry, hat and cap making, and soap and candle making. The Order is valid during the whole of the year 1923, except for hat and cap making, where the extension of working hours is authorised until the end of June next.

WORKMEN'S COMPENSATION (AGRICULTURE) IN DENMARK.

RATIFICATION OF GENEVA CONVENTION.

By an Act of 23rd December, 1922, the Danish Government have been authorised to ratify the International Draft Convention on been authorised to ratify the International Draft Convention on Workmen's Compensation adopted at the Conference at Geneva in 1921. This Draft Convention prescribes the extension to agricultural wage earners of the laws and regulations in force in the various countries ratifying the Convention, for the compensation of workers for personal injury by accident arising out of or in the course of their employment. The Danish accident insurance legislation (Act of 6th July, 1916, which came into force on 1st January, 1917) § already covers agricultural workers.

ABOLITION OF OFFICIAL CONCILIATION BOARDS IN HOLLAND.

The Dutch official conciliation boards, known under the title of Chambers of Labour, were abolished by an Act of 14th December, 1922. In the preamble to the Bill which thus became law it was stated that, although the Chambers had been useful in individual labour disputes, their intervention had rarely been called for in larger disputes. In the existing circumstances their work did not justify an annual expenditure of 40,000 florins. Their functions could be discharged by other public bodies, while the passing of the Bill for the Peaceful Settlement of Labour Disputes (which was anticipated) would render them quite unnecessary.

Settlement of Labour Disputes (which was anticipated) would render them quite unnecessary.

The Chambers of Labour were established by Royal Decree in accordance with a law of 2nd May, 1897, either for separate communes or jointly for several communes, for single industries or jointly for several industries. They were composed of an equal number of employers and workers elected for five years, both employers and workers electing presidents who held office for six months in turn. The Chambers had to meet at least four times a year and also when convened by the President, either on his own initiative or acting on request. Whenever a either on his own initiative or acting on request. Whenever a dispute occurred or was threatened, a Chamber might intervene on the request of either party or on that of the local mayor or provincial commissioner. The Chamber could appoint a conciliation board, consisting of a chairman (not necessarily a member of the Chamber) and of an equal number of employer and worker mem-

1923.

bers of the Chamber The means of settlement recommended had to be notified in writing to both parties, and might, at the discretion of the board, be published. No specific provision was made for enforcing arbitration.

RIGHT OF ASSOCIATION IN BARCELONA: **NEW ROYAL DECREE.***

A ROYAL Decree, dated 3rd November, 1922, regulates the exercise of the right of association of workmen and employers in the province of Barcelona. Its main provisions are in substance

Unions of employers and workpeople, respectively, may acquire State recognition and registration in the province of Barcelona, subject to conditions the fulfilment of which is to be controlled by a special branch of the Ministry of Labour established in that by a special branch of the Ministry of Labout established in the province in October, 1921, for the purpose (among others) of making a complete register of all employers and workers in the province with a view to a natural vocational grouping on which it would be possible to set up machinery for the prevention and settlement of labour disputes.

In order to obtain Government recognition a union of work-people must number not less than 100, and a union of employers not less than 20 members, who must, moreover, constitute the majority of the employers and workers, respectively, belonging to the particular trade in the locality or district. A second vital condition for recognition is that the rules of the union shall have been examined and approved by the Barcelona Branch of

Membership of a recognised workers' union is limited (a) to Spaniards by birth, and (b) to persons belonging to the trade or calling for which the union is formed. Candidates for membersatisfy the conditions laid down in the decree may not

Membership of a recognised employers' union is limited to persons registered as belonging to the industry or trade which the union represents, and they must be legally qualified to engage in commerce. Neither employers nor workpeople may belong to more than one union within the same locality. The entrance fee in the case of a workmen's union may not exceed the amount of three days' wages, salary or income. The Ministry of Labour may reduce the statutory subscription on passing the rules, and may refuse to allow any increase considered unjustified.

Amongst the legitimate rights of a registered union are specified the following:—

To exercise the constitutional right of petitioning the Government and other Public Authorities; to organise technical instruction, exhibitions, competitions, museums, etc., for the benefit of its members; to found benevolent institutions; to encourage thrift and mutual help (including cotutions; to encourage thrift and mutual help (including cooperative credit, production, consumption and insurance)
and to set up Labour Exchanges; to appoint representatives
to statutory joint bodies for dealing with labour disputes;
to exercise the rights pertaining to Civil Societies, as regards the acquisition and ownership of private property of
all kinds, the contracting of obligations, and pleading in the Law Courts; to propose modifications and improvements in Labour Laws, and to take part in the supervision of collective agreements.

Under certain conditions to be developed in detail in an Order yet to be issued, recognised workers' unions may be entrusted with contracts for public works.

Conditions are also laid down for the recognition and registra-tion of federations and confederations of Unions. These are invested with civil personality similar to, but independent of, that of the constituent organisations. The ownership of real estate by federations and confederations of Unions is, however, estate by federations and confederations of Unions is, however, restricted to such property as they may require for their offices, meetings, libraries, courses of study, museums, laboratories, employment exchanges, apprentices' workshops, asylums and hospitals. Their right to receive donations is similarly restricted; nor may they engage in commercial pursuits not actually co-operative or intended for the exclusive benefit of their associates. Federations and confederations may not exist for political purposes.

WORKERS' HOLIDAYS IN FINLAND.†

The Act relating to collective Labour Agreements which came into force in Finland on 1st July, 1922, contains a clause providing that every worker shall be entitled to an annual holiday of 7 working days with full pay after one year's continuous employment with the same employer, and of 4 days after six months' continuous employment.

CHANGES IN COST OF LIVING: STATISTICS FOR 1st FEBRUARY, 1923.

Summary: Average Incr	eases	since	July	y, 191
All Items included				77%
Food only		•••		73%

During January there was a further slight decline in the average cost of the pre-war working-class dietary, mainly due to considerable reductions in the prices of eggs and bacon. Fish was also slightly cheaper, but cheese, tea, butter, and meat (especially mutton) were dearer, while the prices of the other articles of food included in the statistics showed very few changes, though on balance their tendency was downward. As a net result of these changes the average increase in the retail prices of food over the level of July, 1914, fell to about 73 per cent. at 1st February, as compared with about 75 per cent. at 1st January.

The corresponding figure for 1st February, 1922, was 79 per cent. In the following Table is given a comparison of average prices of the articles of food included in these statistics in July, 1914, at 1st January, 1923, and at 1st February, 1923:—

RENT, CLOTHING, FUEL AND LIGHT.

As regards rents, special inquiries have been made into the changes which have taken effect under the operation of the Increase of Rent and Mortgage Interest (Restrictions) Act, 1920, and the result of these inquiries is to indicate that the average increase in rents of working-class dwellings between July, 1914, and 1st February, 1923, was about 50 per cent. Of the total increase somewhat less than one-half is accounted for by increases in rates and water charges, and about one-third is on account of the landlord's responsibility for repairs, increases on account of the higher level of mortgage interest permitted by the Act falling within the remainder.

As regards clothing, owing to the wide range of quotations, both now and before the war, to changes in qualities, and in stocks held by retailers, and to variations in the extent to which different articles and qualities have been affected by price changes, it is impossible to make an exact calculation of the increase of prices; but information as to the movements of prices of men's suits and overcoats, underclothing and hosiery, textile materials and boots, received from retailers in the principal towns, indicates that at 1st February the level of retail prices of articles in this group, quality for quality, taking goods of the kinds purchased by the working classes, was about the same as a month earlier, and about 125 per cent. higher than in July, 1914. For further particulars in regard to the increase in the cost of clothing, reference may be made to the article or

In the fuel and light group the average increase in the retail prices of coal at 1st February, as compared with July, 1914, was about 90 per cent., or slightly higher than a month earlier. For gas the average percentage increase was between 70 and 75 per cent. above the pre-war level. For lamp oil and for candles th average percentage increase, as compared with July, 1914, declined during January to 70 per cent. and 35 per cent. respectively, while for matches there was no appreciable change during the month. Taking the group as a whole, the average increase, as compared with July, 1914, was between 85 and 90 per cent., or about the same as a month earlier.

If the average increases in the cost of all the foregoing items are combined in accordance with their relative importance in pre-war working-class family expenditure, allowance being also made for the increase in the prices of soap, soda, domestic ironmongery, brushware and pottery, tobacco, fares and newspapers (averaging about 85 per cent.), the resultant figure for 1st February, 1923, is approximately 77 per cent.* over the pre-war level, as compared with 78 per cent. at 1st January and 88 per cent. at 1st February, 1922.

The result of this calculation (in which the same quantities and, as far as possible, the same qualities of each item are taken in 1923 as in 1914) is to show the average increase in the cost of maintaining unchanged the pre-war standard of living of working-class families (i.e., the standard actually prevailing in working-class families before the war, irrespective of whether such standard was adequate or not). Owing to the variations in the amounts of increase in the prices of different commodities it is probable that economies or re-adjustments in expenditure have been effected in many families, especially in those cases where incomes have not increased so much as prices. On the other hand, it is probable that the standard of living has been raised in some families in which wages have been increased in greater proportion than prices. No allowance is made in the figures for any such alterations in the standard of living, as to which trustworthy statistics are not available.

SUMMARY TABLE: 1915 TO 1923.

The following Table shows the average percentage increase, as compared with July, 1914, for all items included in the statistics, at the beginning of each month since January, 1915 :-Average Percentage Increase since July, 1914-All Items.

NOTE.

THE LABOUR GAZETTE for February, 1921, contained a full account of the scope and method of compilation of the above

* If the amount of increased taxation on commodities is deducted, the average increase at 1st February, 1923, is about 5 per cent. less.

EMPLOYMENT IN JANUARY.

GENERAL SUMMARY.

EMPLOYMENT during January showed little general change as compared with previous months, but was better, on the whole, at the end of the month than at the end of December. It coninued good in the coal mining industry, in steel sheet manufacture and in the worsted industry, fairly good in the tinplate trade, and fair in the hosiery, woollen, jute, carpet, ready-made clothing and paper trades. In most of the other principal indusries it was still very slack; but a further improvement was eported at iron and steel works, and slight improvements were also reported in some centres in the engineering and shipbuilding ndustries, and in certain other sections of the metal trades.

SUMMARY OF STATISTICS.*

Among 1,205,143 members of Trade Unions from which returns were received, the percentage unemployed was 13.7 at the end of January, as compared with 14.0 at the end of December and 16.8 per cent. at the end of January, 1922. Among workpeople covered by the Unemployment Insurance Acts, numbering approximately 11,750,000 and working in practically every injustry except agriculture and private domestic service, the perentage unemployed at 22nd January was 12.7, as compared with 2.2 at 18th December and 16.0 per cent. at the end of January, 1922. For males alone the percentage was 14.4 at 22nd January, as compared with 14.0 at 18th December; for females, he corresponding figures were 8.2 and 7.3. The number of workpeople on the Live Register of the Employment Exchanges at 29th January was approximately 1,460,000, of whom men numbered 1,138,000 and women 226,000, the remainder being boys and girls. The corresponding total for 1st January was 1,542,000, of whom 1,199,000 were men and 255,000 women. It ould also be noted that some unemployed persons, e.g., some those who have not valid claims to unemployment benefit or ho are not insured under the Unemployment Insurance Act, do ot register at the Employment Exchanges, and the Live Register igures, therefore, do not indicate the total number unemployed.

EMPLOYMENT IN THE PRINCIPAL INDUSTRIES.

Mining and Quarrying.—Employment in the coal mining ndustry continued good, and showed a further improvement. The total number of wage-earners on the colliery books it 27th January was 1,134,476, an increase of 0.5 per cent., as compared with a month ago, and of 66 per cent., as compared with a year ago. The average number of days worked per week by the pits in the fortnight ended 27th January was 5.56, the same as in December, and 0.4 days more than in January, 1922.

At iron mines employment showed some improvement, but was still bad in the Cleveland district and moderate in other districts. At the mines covered by the returns received, the numbers employed during the fortnight ended 27th January showed an increase of 5.4 per cent., as compared with December and of over 70 per cent., as compared with January, 1922. The average number of days worked per week by these mines was 5.53, as compared with 4.66 in January, 1922. At shale mines employment continued fair; at limestone quarries it was fairly good in the Clitheroe and Buxton districts, but bad in the Weardale area. At whinstone quarries in East Scotland employment was moderate; it was bad at quarries producing building stone and road material in the Clee Hill, Stanton-in-Peak and Rowsley districts. With slate quarrymen in North Wales and with granite quarrymen employment continued fair; with china clay workers it continued fairly good.

Manufacture of Pig Iron, Iron and Steel, and Tinplate.—In the pig iron industry employment was still bad, but showed a further improvement. Of a total of 487 furnaces, the number in blast at the end of January was 183, as compared with 169 at the end of December and 90 at the end of January, 1922. In the iron and steel trades employment showed a further improvement, but was still moderate on the whole. A further improvement was also reported in the tinplate trade, where employment was fairly good; in the steel sheet trade it continued good. At the end of January, 500 tinplate and steel sheet mills were reported to be in operation, as compared with 501 at the end of December and 436 at the end of January, 1922.

Engineering, Shipbuilding and Other Metal Trades.-Employnent in the engineering trades, though still bad, was better than in the previous month; in the shipbuilding and ship-repairing slight improvement was also reported, but employment still continued very bad. In the other metal trades employment continued slack generally. Improvement was reported, however, the sheet metal, wire, brass and bedstead trades, in the andore and Newport tube trade, and with makers of ranges and stoves. In the gold, silver and jewellery trades there was a

Textile Trades.-In the cotton trade employment continued bad, except in the Egyptian spinning section, which worked

* The figures relate to Great Britain and Northern Ireland.
† The corresponding figure for the end of December is not available, but the tal number unemployed at the latter date is known to have been greater than

practically full time; in the section spinning American cotton there was a slight improvement, but the organised short time working, which had been in operation since the end of September, continued until the end of the month. In the weaving department employment showed a decline. In the woollen trade employment continued fair on the whole, and was much better than a year ago. In the worsted trade employment continued good with wool sorters and wool combers; in the spinning branch there was little change, but in the weaving branch an improvement was reported at some centres. In the hosiery trade employment showed a slight decline and was fair; in the silk trade it continued fair in the Eastern Counties, but was bad and worse than a month ago in the Macclesfield district. Employment in the lace trade continued bad generally, except in the curtain section, where it was reported as fair. In the carpet trade there was a slight improvement, and employment was fair; it also continued fair in the jute industry; in the linen trade it continued bad. In the textile bleaching, printing, dyeing, etc., trades employment continued slack on the whole.

Clothing Trades.—Employment in the bespoke branch of the tailoring trade was slack on the whole; in the ready-made branch it was generally fair; in both branches short-time working was reported from some districts. In the felt-hat trade employment was quief, but slightly better than in the previous month; with shirt makers at Manchester it was bad. In the boot and shoe trades employment continued slack, and short time was still very prevalent in nearly all the principal centres. In the leather trades employment continued moderate in the tanning and currying section, and fair in the portmanteau, trunk and fancy leather sections; with saddle and harness makers it continued bad.

Building, Woodworking, etc.-In the building trades employment continued very slack and showed a further decline, especially with painters, plasterers and slaters. It was very bad generally with painters, builders' labourers and workpeople on construction of works. In the brick trade employment continued moderate on the whole.

Employment was quiet in the furnishing trades. With coachbuilders it was moderate on the whole, though fair in London; with mill sawyers it was also moderate, but showed some improvement; with coopers and packing-case makers it was slack; with brushmakers it showed a decline, but was fair.

Paper Manufacture, Printing and Bookbinding.—Employment in the paper trade was fair on the whole, and showed a further slight improvement as compared with the previous month. In the printing trade employment was generally slack and worse than a month ago; it was still reported as good, however, with electrotypers and stereotypers in London, and letterpress printers at Leicester and Nottingham reported a slight improvement. Employment showed a decline in the bookbinding trade and was bad generally, with much short time; in London it was affected by a dispute in the latter part of the month.

Pottery and Glass.-In the pottery trades employment continued bad on the whole; in china manufacture, however, a slight improvement was reported. In the glass trades employment also continued bad.

Agriculture and Fishing.—In agriculture the supply of labour was ample for all requirements and there was increased unemployment amongst the less skilled men. Employment in the fishing industry was fair on the whole with fishermen and fish dock labourers, and continued moderate generally with fish

Dock Labour and Seamen .- Employment with dock labourers was quiet and showed a slight decline as compared with the previous month. With seamen it was moderate on the whole, and at most of the ports large numbers of men failed to get

The following Table shows the percentages unemployed (a) among members of those Trade Unions from which returns are obtained and (b) among workpeople covered by the Unemployment Insurance Acts in Great Britain and Northern Ireland month by month during the present year :-

UNEMPLOYMENT IN INSURED TRADES.

THE percentage unemployed among workpeople insured under the Unemployment Insurance Act in Great Britain and Northern Ireland was 12.7 per cent. at 22nd January, as compared with 12.2 at 18th December. A Table showing the estimated number insured and the numbers and percentages unemployed in the principal industries appears on page 59.

SUMMARY OF EMPLOYERS' RETURNS.

INFORMATION as to the state of employment in certain industries in January, derived from returns furnished by employers and employers' associations, is summarised below. Further details are given on pages 53 to 57.

- * Short time and broken time are not reflected in the figures. In the mining and textile industries a contraction in the demand for labour is generally met by short-time working. Persons on strike or locked-out are also excluded.

 † The percentage is based on returns relating to woodworkers and plumbers.

 ‡ In addition to those totally unemployed, a large number of the members of the unions reporting were "paid off part of each week, or alternate weeks or fortnights" or on "temporary stoppage benefit."

 § The figure for December has been revised.

 || The returns for the tobacco trade are supplied by unions whose members are mainly cigar makers.

mainly cigar makers. ¶ Comparison of earnings is affected by reductions in rates of wages.

EMPLOYMENT CHART.

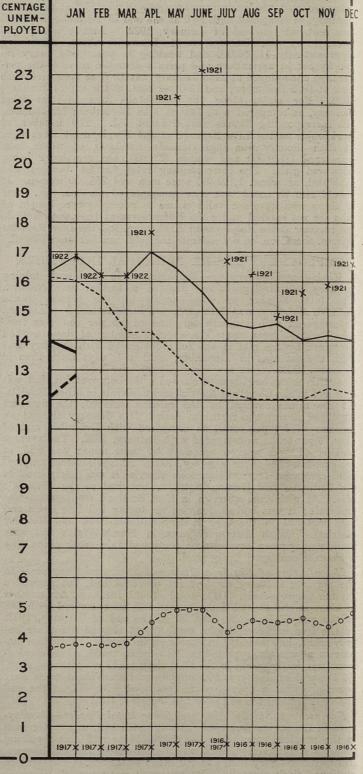

(1) PERCENTAGE UNEMPLOYED AT THE END OF EACH MONTH AMONG MEMBERS OF TRADE UNIONS MAKING RETURNS :-

Thick Curve -= 1923.Thin Curve = 1922. Chain Curve $- \circ - \circ - \circ = Mean of 1913-22$.

× The crosses indicate the maximum and minimum percentages of Trade Union members unemployed, in the months named, during the years 1893-1922.

(2) PERCENTAGE UNEMPLOYED AMONG WORK. PEOPLE INSURED AGAINST UNEMPLOYMENT UNDER THE UNEMPLOYMENT INSURANCE ACT:-

> Thick Dotted Curve ---- 1923. Thin Dotted Curve ---- 1922.

NOTE.

The Trade Union returns are furnished by various Trade Unions which pay unemployment benefit to their members. Persons on strike or locked out, sick or superannuated, are excluded from the figures. Detailed figures are given in the previous column.

The figures for insured workpeople relate to Great Britain and Northern Ireland, and exclude the Irish Free State. Detailed figures are given on page 59.

DETAILED REPORTS ON EMPLOYMENT IN SOME OF THE PRINCIPAL INDUSTRIES.

NOTE.—The numbers of workpeople given in the following Tables represent the numbers covered by the Returns received and (except as regards coal mining) not the total numbers employed in the various industries. The comparisons of numbers employed and wages paid at different dates relate to the same firms at each date, and cover all the wage-earners, irrespective of age, sex, or occupation, employed by these firms. In comparing the earnings in different industries, it should be remembered that any averages calculated from these figures will be affected not only by the variations in the state of employment and in rates of wages, but also by differences in the proportions of males and females, of adults and juveniles, and of skilled and unskilled workers in the respective industries. The particulars given relate only to Great Britain and Northern ireland.

COAL MINING.

February, 1923.

EMPLOYMENT during January continued good generally; it showed a slight improvement as compared with the previous month, and was better than a year ago. Employment in the Lancashire and Cheshire district, however, was still only fair. The average weekly number of days (5.56) worked by the pits in the fortnight ended 27th January showed no change as compared with the fortnight ended 16th December, 1922, but an increase of 0.40 of a day on a year ago. The total number of wage-earners on the colliery books at 27th January showed an increase of 0.5 per cent. on the number at 16th December, and of 6.6 per cent.

The proportion of workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 45 per cent. at 22nd January, 1923, as compared with 46 per cent. at 18th December, 1922.

The following Table shows, for the principal districts, the total number of wage-earners on the colliery books, and the average number of days worked by the collieries, as indicated by the returns obtained by the Mines Department. Small numbers of workpeople employed at coal mines in raising or handling minerals other than coal are included in the totals :-

The average weekly number of coal-winding days lost by the pits in the fortnight ended 27th January was 0.21 of a day, of which 0.17 of a day was due to transport difficulties and want of trade, and showed little change from the time lost in the fortnight ended 16th December, 1922. In the fortnight ended 28th January, 1922, the average time lost was 0.60 of a day, of which over half a day was due to want of trade and transport difficulties. The non-winding time was about one-quarter of a difficulties. The non-winding time was about one-quarter of a day in each period.

The output of coal in Great Britain in the four weeks ended 27th January, 1925, was returned to the Mines Department at 21,219,200 tons, compared with 22,413,100 tons in the four weeks ended 23rd December, 1922, and with 17,692,300 tons in the four weeks ended 28th January, 1922. Particulars of the output, costs of production and proceeds of the industry in the quarter

weeks ended 28th January, 1922. Particulars of the output, costs of production and proceeds of the industry in the quarter ended 30th September, 1922, are given on page 44.

The exports of coal, including coal shipped for the use of steamers in the foreign trade and the coal equivalent of coke and manufactured fuel, amounted in January to 7,890,143 tons, or 312,203 tons more than in December, 1922.

• The figures in this and the following article show the number of days (allowace being made in all the calculations for short days) on which coal, iron, ace, was got and drawn from the mines included in the returns. It is not necessarily implied that all the persons worked every day the mines were open. Mines not working are omitted in computing the average number of days worked.

† Including Cannock Chase.

IRON AND SHALE MINING.

Iron.—Employment was bad in the Cleveland district, and moderate in other districts. On the whole, however, it was somewhat better than in December, and much better than in

The following Table summarises the information received from those employers who furnished returns for the three dates

Shale.—Employment continued fair. Returns received from firms employing 4,196 workpeople in the fortnight ended 27th January, 1923, showed an increase of 0.2 per cent. in the total number employed as compared with the previous month, and an increase of 25.5 per cent. compared with January, 1922. The average number of days* worked per week by the mines was 5.90 in January, 1923, 5.79 in December, 1922, and 5.98 in January, 1922.

PIG IRON INDUSTRY.

EMPLOYMENT during January was still bad, but showed a further

The total number of furnaces in blast at the end of January, as shown by the returns collected by the National Federation of Iron and Steel Manufacturers, was 183, compared with 169 at the end of December.

Returns received by the Federation from 86 firms employing 21,788 workpeople at the end of January showed an increase of 8.7 per cent. compared with the number employed at the end of December, 1922, when the number of workpeople employed was 20,050. At the end of January, 1922, 15,033 workpeople were employed by these firms.

The following Table shows the total number of furnaces in blast at the end of January 1923, December, 1922, and January, 1922, according to returns collected by the Federation:—

The production of pig iron in January amounted to 567,900 tons, as compared with 533,700 tons in December and 288,000 tons in January, 1922.

^{*} See * footnote in previous column.

TINPLATE AND STEEL SHEET TRADES.

EMPLOYMENT continued fairly good in the tinplate trade; it showed a further improvement as compared with the previous month, and was much better than a year ago. At the end of January 385 mills, about four-fifths of the total number in existence, were reported to be in operation, as compared with 383 at the end of December, 1922, and with 334 a year ago. Employment in the steel sheet trade continued good. At the end of January the number of mills in operation at the works covered by the returns was 115, as compared with 118 at the end of December, 1922, and with 102 a year ago.

The number of workpeople unemployed, as indicated by the unemployment books lodged at the Employment Exchanges, was 2,623 at 22nd January, 1923, as compared with 2,569 at 18th December, 1922.

The following Table shows the number of works reported to be open and the number of mills in operation at the works covered by the returns received at the end of January, 1923:—

TOTAL	87	- 1	+ 8	500	- 1	+ 64

The exports of tinned and galvanised plates and sheets in January, 1923, amounted to 94,413 tons, or 3,484 tons more than in December, 1922, and 4,578 tons more than in January, 1922.

IRON AND STEEL WORKS.

EMPLOYMENT at iron and steel works, though it showed a further improvement, continued moderate on the whole. As compared with a year ago there was a marked general improvement.

According to Returns received from firms employing 75,674

According to Returns received from firms employing 75,674 workpeople, the volume of employment during the week ended 27th January (as indicated by the number of workpeople employed at each works, combined with the number of shifts during which work was carried on in each case) showed an increase of 6.0 per cent. on the previous month, and of 34.0 per cent., as compared with a year ago. The average number of shifts during which the works were open in the week was 5.3, as compared with 5.2 in December, 1922, and 4.9 in January, 1922.

The following Table summarises the information received from those employers who furnished returns for the three dates under comparison:—

^{*} The figures relate to the number of shifts during which the works were in operation, allowance being made for the numbers of men employed. No account is taken of the time lost by individuals owing to absenteeism, etc., and it is not intended to imply that the number of shifts shown was actually worked by all the men employed.

The production of steel ingots and castings as returned to the National Federation of Iron and Steel Manufacturers amounted to 624,300 tons, compared with 546,100 in December, 1922, and 327,500 tons in January, 1922.

FNGINEERING.

EMPLOYMENT in this industry during January continued bad, but showed a further improvement in some districts.

On the North-East Coast employment continued very bad, but was rather better than in December. In Yorkshire a further slow improvement was reported. In Lancashire and Cheshire there was an improvement at several centres, but a decline was reported at Bolton and Accrington. At Oldham employment was fair on the whole, some overtime being worked on export orders in the textile section; with foundry workers, however, it was bad. At Barrow, though an improvement was shown, employment remained very bad.

There was a noticeable improvement at Derby, and some improvement at Leicester and Nottingham; in the hosiery section at Nottingham employment was fairly good. At Norwich an improvement was reported. In the Birmingham and Coventry district the improvement in the motor industry was maintained; at Birmingham a shortage of pattern-makers was reported, while at Coventry a good deal of overtime was worked, though many workpeople were still unemployed. In the London district, the Southern Counties and South Wales a further slight improvement was reported.

In Glasgow and on the East Coast of Scotland employment was still bad, but showed a slight improvement. In Belfast it continued had

The following Table shows the numbers and percentages of workpeople registered as unemployed, according to the Unemployment Insurance records, at 22nd January, as compared with 18th December:—

Divisions.	Number of Unemployment Books remaining lodged at 22nd January, 1923.	Percentage of Unemploy- ment at 22nd January, 1923.	Inc. (+) or Dec. (-) in percentage as compared with 18th Dec., 1922.

SHIPBUILDING.

EMPLOYMENT in the shipbuilding and ship-repairing trades during January continued very bad, but showed a further slight improvement in some districts.

The following Table shows the numbers and percentages of workpeople whose Unemployment Insurance Books were lodged at Employment Exchanges at 22nd January:—

Divisions.	Number of Unemployment Books remaining lodged at 22nd January, 1923.	Percentage of Unemploy- ment at 22nd January, 1923.	Inc. (+) or Dec. (-) in percentages as compared with 18th December, 1922.

Males Females	122,557	84·7	- 1:3
	46 7	8·3	- 0:9

On the North-east Coast employment continued very bad generally, though compared with December some improvement was shown. On the East and South Coasts it was still bad. At the Bristol Channel Ports there was a considerable improvement on repair work. An improvement was reported on the Mersey, and a slight improvement at Barrow, where, however, employment remained very bad. In Scotland employment continued very bad, though there was an improvement with ship joiners on the Clyde. At Belfast and Londonderry employment was bad, but improving.

COTTON TRADE.

February, 1923.

DURING January employment continued bad, except in the section spinning Egyptian cotton, which worked practically full time. In the section spinning American cotton there was a slight improvement. The question of continuing, during February, the organised short time (to the extent of 13 hours a week) which had been in operation in this section was submitted to a ballot of the employers concerned, in January, and as the proportion of employers in favour fell short of that (80 per cent.) required for its continuance on an organised basis, the Federation of Master Cotton Spinners' Associations notified their members that they would be at liberty to take what action they might individually think proper, after 31st January, with regard to the continuance of short-time working. The Federation, however, recommended all firms who could continue the short-time movement to do so.

In the weaving department about 30 per cent. of the looms were reported to be stopped, and employment was worse than in December. It was, however, appreciably better than in January of last year.

The percentage of workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 11.7 on the 22nd January, as compared with 9.1 on the 18th December, 1922.

In the Oldham, Ashton, Stockport, and Rochdale districts employment in the spinning department continued bad. In the weaving department also it continued very slack, and short time was prevalent.

At Bolton employment was reported as fair with spinners; with card-room workers it showed little change. In the weaving department there was also little change: a large number of operatives were unemployed; and of the remainder, more than half were on short time, or were minding less than their usual complement of looms or other machines. At Leigh and at Chorley employment with spinners was good; in the Bury district it was bad.

In the Blackburn, Burnley, Preston, and Darwen districts employment with weavers continued slack: there was much short time; many looms and other machines were stopped; and there was much under-employment in other forms. Conditions were, however, appreciably better than in January of last year.

The following Table summarises the information received from those employers who furnished returns for the three dates inder review:—

Total	92,134	- 2.0	+ 8.8	156,132	- 3.4	- 7.0

In the week ended the 27th January about 26 per cent. of the workpeople covered by the returns were working short time, to the extent of about 13 hours a week on the average.

The *imports* (less re-exports) of raw cotton (including cotton linters) were 119,909,300 lbs. in January, 1923, compared with 195,833,100 lbs. in the previous month, and with 128,943,600 lbs. in January, 1922.

The exports of cotton yarn were 12,814,700 lbs. in January, 1923, compared with 11,711,600 lbs. in December, 1922, and 14,806,200 lbs. in January, 1922.

The exports of cotton piece goods were 399,988,200 square yards, as compared with 360,517,300 square yards in the previous month, and with 339,117,400 square yards in January, 1922.

WOOLLEN AND WORSTED TRADES.

EMPLOYMENT in the wool textile industry in January showed little change on the whole as compared with a month earlier, but was decidedly better than a year ago.

The percentage of workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 4.4 per cent. on the 22nd January, as compared with 4.1 on the 18th December, 1922.

WOOLLEN TRADE.

During January there was a further improvement in the Huddersfield district. In the Dewsbury and Batley district employment in the low woollen trade was bad, and in the fine woollen trade moderate. In the Morley district, and in the low woollen manufacturing branch of the Leeds trade, there was an improvement; the numbers employed in these two sections have been increasing during the last few months, and during January the change was marked. Employment continued fairly good in the blanket and fancy rug trade; in the rag and shoddy trade it showed little change. In the tweed trade there was much variation as between one firm and another, but on the whole there was an improvement in January; many firms were working full time, and some, overtime. In the flannel trade employment continued fairly good in the Rochdale and Stockport districts, though not all firms were able to maintain full time. In Scotland employment on the whole continued fairly good, though many firms were unable to keep all their looms employed.

The following Table summarises the information received from those firms who furnished returns for the three dates under review:—

In the week ended 27th January about 20 per cent. of the workpeople covered by the returns received from employers were working short time, to the extent of 9 hours a week on the average.

WORSTED TRADE.

With wool sorters and wool combers employment continued good, and overtime was reported with sorters. In the worsted spinning trade there was no appreciable change during the month, and in the manufacturing trade there was also little general change, though there was a slight improvement in the Huddersfield and Halifax fine cloth trade.

The following Table summarises the information received from those employers who furnished returns for the three dates under review:—

In the week ended 27th January about 3 per cent. of the workpeople covered by the returns were working short time, to the extent of about 10 hours a week on the average. In the previous month approximately the same proportion of workpeople were working a similar amount of short time.

The imports (less re-exports) of raw wool (sheep or lambs) were 54,705,300 lbs. in January, 1923, compared with 33,329,100 lbs. in December, 1922, and 62,259,700 lbs. in January,

The exports of woollen and worsted yarns were 3,878,500 lbs., compared with 3,657,300 lbs. in December, 1922, and 3,809,600 lbs. in January, 1922.

The exports of woollen and worsted tissues were 22,063,500 square yards, compared with 17,428,900 in December, 1922, and 15,669,500 square yards in January, 1922.

The exports of blankets were 160,307 pairs, 74,048 pairs, and 52,079 pairs in January, 1923, December, 1922, and January, 1922, respectively.

BOOT AND SHOE TRADE.

DURING January employment in this trade continued slack. In some districts it was slightly better on the whole than in December, but in others it was worse. Short time was still very prevalent at nearly all the principal centres.

There was a marked improvement at Stafford, and some improvement at Leicester and Northampton, as well as at one or two other towns. On the other hand, there was a decline in a number of districts, including the Leicestershire country district, Wellingborough, the Bristol and Kingswood district, the Leeds district, and Scotland.

The percentage of workpeople unemployed in the boot, shoe and slipper making and repairing trades, as indicated by the unemployment books lodged at Employment Exchanges, was 8.8 on the 22nd January, 1923, as compared with 8.3 on the 18th

The following Table summarises the information received from those employers who furnished returns for the three dates under

[·] Comparison of earnings is affected by reductions in rates of wages.

Returns received from firms employing 31,500 workpeople showed about 34 per cent. on short time at the end of the month, to the extent of about 10½ hours a week on the average. At the end of the previous month, about 38 per cent. of the work-people covered by the returns then received were on short time, to the extent of about 13 hours a week, on the average.

The exports of boots and shoes in January, 1923, amounted to 73,211 dozen pairs, or 6,609 dozen pairs more than in December, 1922, and 29,182 dozen pairs more than in January, 1922.

BUILDING AND CONSTRUCTION OF WORKS.

EMPLOYMENT in these trades continued to show a decline during January, and was very slack at the majority of centres. Short time working, partly due to bad weather, was reported from a number of districts. In all the geographical divisions shown in the Table given below there was an increase in the percentage unemployed as indicated by the unemployment books remaining lodged at Employment Exchanges, and for the whole of Great Britain and Northern Ireland the percentage unemployed was 20.7 at 22nd January, as compared with 19.0 at 18th December.

Employment declined, on the whole, with all classes of skilled operatives in these trades, the decline being most marked with painters, plasterers and slaters. It was very bad generally with painters, builders' labourers and workpeople on construction of works and bad or slack with all other classes.

The following Table shows the numbers and percentages of workpeople claiming unemployment benefit at 22nd January and the increase or decrease in the percentage, as compared with 18th

Occupation.	Number of Unemployment Books Remaining Lodged at 22nd Jan., 1923.	Percentage of Unem- ployment at 22nd Jan., 1923.	Inc. (+) or Dec. (-) in percentage as compared with 18th Dec., 1922.

BRICK TRADE.

EMPLOYMENT in the brick trade in January was again only moderate on the whole. In the Birmingham and Nottingham districts it was bad. As compared with a year ago there was a decline in employment.

The percentage of workpeople unemployed in the brick, tile, etc., trades, as indicated by the unemployment books lodged at Employment Exchanges at 22nd January, 1923, was 151 per cent., as compared with 140 per cent. at 18th December, 1922.

The following Table summarises the information received from those employers who furnished returns for the three dates under comparison :-

Returns from firms employing 4,668 workpeople show that 24 per cent. of the workpeople were on short time, to the extent of 7½ hours on the average, during the week ended 27th January.

POTTERY TRADES.

EMPLOYMENT in the pottery trades during January continued bad on the whole, and showed little change as compared with the previous month. In china manufacture, however, a slight improvement was reported in the Potteries district.

The percentage of workpeople unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 15.5 at 22nd January, 1923, as compared with 16.3 at 18th

The following Table summarises the information received from those employers who furnished returns for the three dates under

Returns from employers relating to short-time working showed that of 8,681 workpeople covered, 45 per cent. were working, on an average, about 18 hours less than full-time in the week ended

DOCK AND RIVERSIDE LABOUR.

EMPLOYMENT among dock labourers during January was quiet, and showed a small decline as compared with the previous month. The percentage of workpeople unemployed in the canal, river, harbour, dock and wharf service, as indicated by the unemployment books lodged at Employment Exchanges at 22nd January, 1923, was 191, as compared with 184 at 18th December, 1922.

London.—Employment was not so good as in December. The following Table shows the average daily number of dock labourers employed at the docks and at the principal wharves in each week of the month:—

	Average Dai Docks and	ly Numbe	r of Lab	ourers en arves in I	aployed in condon.

Comparison of earnings is affected by reductions in rates of wages.

Tilbury.—The mean daily number of dock labourers employed in January was 978, as compared with 1,041 in the previous month, and with 1,279 in January, 1922.

East Coast.—On the Tyne and Wear employment with coal trimmers and teemers was reported as good; with other classes it was generally moderate, and worse than in the previous month. At Blyth it was still slack, but a little better than in December. Employment was fair at Middlesbrough and Hull, at the latter port an improvement being reported. At other East Coast ports it was fair to slack.

Southern and Western Ports.—At the South Wales ports employment was reported as better than a month ago, the movement of ships being greater. The average weekly number of dock labourers employed at Liverpool during the five weeks ended 29th January was 14,958, compared with 15,796 in the four weeks ended 25th December, 1922, and 14,006 in the corresponding point of last sponding period of last year.

Scottish and Irish Ports.—At Glasgow employment was moderate, and good at Dundee and Leith. At Belfast it showed a further improvement and was good.

SEAMEN.

EMPLOYMENT with seamen during January was moderate on the whole. Generally speaking, the demand improved in the first two weeks and then declined, except for a temporary revival in the week ended 27th January. At most of the ports large numbers of men failed to obtain engagements.

The percentage of seamen unemployed, as indicated by the unemployment books lodged at Employment Exchanges, was 22.3 at 22nd January, 1923, as compared with 21.6 at 18th December,

On the Thames employment was moderate, and showed an improvement in comparison with December. On the Tyne the demand for men was quiet in the first half of the month and fair afterwards. Employment was dull on the Wear and quiet on the Tees. The demand at Hull was good in the first fortistic of the first fortist fortist of the first fortist fo night of January and declined subsequently. At Southampton there was a slight improvement up to the middle of the month, and employment was very quiet afterwards. The demand at Bristol improved in the first half of the month and was quiet subsequently. At Avonmouth the demand was moderate on the whole. Employment at Cardiff was moderate in the first half of January, declining in the third week and becoming fairly good after. A fair demand at Swansea declined towards the close of January. Employment at Newport was good. In the foreign-going trade on the Mersey employment improved and was reported as moderate at the end of the month.

The demand on the Clyde and at Belfast was quiet, and at Leith it was moderate.

The following Table shows the number of seamen shipped in British registered foreign-going vessels at the principal ports of Great Britain and Northern Ireland during January:—

[•] It will be understood that the numbers given are the numbers of separate engagements, and not of separate individuals.
† Including Avonmouth and Portishead.
† Including Barry and Penarth.

THE number of persons remaining on the "live registers" of Employment Exchanges in Great Britain and Northern Ireland—
i.e., of applications for employment outstanding from workpeople—at 29th January, 1923, was 1,460,418, of whom 1,137,847
were men, 52,451 boys, 226,265 women, and 43,855 girls. Compared with 1st January there was a decrease of 81,117. The
men's and women's "live registers" decreased by 61,163 and
28,567 respectively, but in the case of juveniles there was an
increase of 8,613.

During the four weeks ended 29th January the number of

During the four weeks ended 29th January the number of vacancies filled by Employment Exchanges was 64,474, of which 38,275 were for men, 15,905 for women, and 10,294 for

The following Table summarises the work of the Exchanges during the four weeks ended 29th January, 1923:—

Alberton te canta	Applica-		Applications outstanding at end of week.			
Week ended	tions by Employers.	Vacancies Filled.	From Workpeople (Live Register.)	From Employers.

Total (4 weeks)	77,013	64,474		-		

A detailed analysis of the figures in the preceding paragraphs is not yet available, but statistics for the five weeks ended 8th January are dealt with below :-

January are dealt with below:—
Applications from Workpeople.—The total number of applications (722,860) from workpeople during the five weeks ended 8th January showed a daily average of 26,773—an increase of 2,175, or 8.8 per cent., compared with the daily average of the previous month. Of this daily average, men accounted for 17,519, women for 6,713, and juveniles for 2,541—increases of 3.1 per cent., 21.8 per cent., and 21.3 per cent., respectively, in the case of 21.8 per cent., and 21.3 per cent., respectively, in the case of men, women and juveniles

Vacancies Notified.—During the five weeks ended 8th January there were 74,873 vacancies notified, representing a daily average of 2,773, as compared with 2,790 during the preceding period. Of this daily average, 1,564 were for men, 826 for women, and

Vacancies Filled.—The total number of vacancies filled during the period was 63,578—a daily average of 2,355, as compared with 2,338 during the previous statistical month. Of this daily average, men accounted for 1,449, women for 568, and juveniles 383 for juveniles

Juveniles.—During the period, 33,929 applications were received from boys and 34,667 from girls. The number of vacancies notified for boys was 4,600, and 4,189 vacancies were filled. In the case of girls 5,742 vacancies were notified, and 4,944 were filled. Of the total vacancies filled by juveniles, 20 6 per cent. were filled by applicants who obtained their first situation. tion since leaving school.

Statistics relating to Building Trades (men) and to Domestic Service occupations (women) for the five weeks ended 8th January have been summarised under the principal occupations,

January have been summarised under the principal occupations, and the outstanding features are dealt with below:—

In the building trades 7,316 vacancies were notified for men and 6,636 vacancies were filled. The principal occupations concerned were:—Carpenters, 1,564 vacancies notified and 1,415 filled; bricklayers, 904 vacancies notified and 810 filled; painters, 1,948 vacancies notified, and 1,767 filled; and builder's labourers, 1,447 vacancies and 1,366 placings.

1,447 vacancies and 1,366 placings.

The number of men on the "live register" in the building trades was 151,764+ at 8th January, compared with 132,392+ at

The number of vacancies notified for women in domestic service during the five weeks ended 8th January was 14,637. Of this number, 5,830 were for resident domestic servants, 3,260 for non-resident domestic servants, 3,884 for charwomen, and 881 for waitresses; other domestic occupations accounting for

Of the 9,394 vacancies filled, 2,537 were placings in resident domestic service, 2,245 as non-resident, 3,320 as charwomen,

The total number of women remaining registered on 8th January for work in domestic services was 32,205, compared with 34,996 on 4th December. and 731 as waitresses.

with 34,996 on 4th December.

The figures above, except those in the first three paragraphs, are exclusive of dock labourers and coal labourers. The number of casual jobs found for workpeople in these occupations during the period of five weeks ended 8th January was 2,028.

Post Office Christmas Work.—The Department, as usual, recruited temporary labour for the General Post Office to cope with the Christmas pressure. The number of applicants registering solely for this class of work was 3,973, while the number found work, including applicants registered for work in their normal occupations, was 28,096—men 28,059, boys 26, women 11—compared with 25,088 in the previous year. These figures are compared with 25,088 in the previous year. These figures are not included in the statistics given above.

The following Table shows for each of the Employment Exchange administrative areas and for the principal towns therein the number of persons remaining on the "live registers" at the Employment Exchanges in Great Britain at 29th January, 1923. In certain cases, e.g., Bristol, Birmingham, Sheffield, Liverpool, Glasgow, etc., the figures cover more than one Exchange Area:—

Area.	Number Live Re	Inc. (+) or Dec. (-) as compared with			
	Men.	Women.	Juveniles.	Total.	1st January, 1923.

IINEMPLOYMENT IN INSURED INDUSTRIES IN GREAT BRITAIN AND NORTHERN IRELAND.

UNDER the Unemployment Insurance Acts, 1920 and 1921, substantially all persons for whom Health Insurance contributions have been paid, except outworkers and persons employed in agriculture and private domestic service, must be insured against agriculture and private domestic service, must be insured against unemployment. Employees of local authorities, railways and certain other public utility undertakings, members of the police forces, and persons with rights under a statutory superannuation scheme, may, in certain circumstances, be excepted. Persons employed otherwise than by way of manual labour at a rate of remuneration exceeding in value £250 per annum are excepted, as are also juveniles under 16 years of age. An applicant for unemployment benefit must, *inter alia*, prove continuous unemployment, and it is provided that two periods of unemployment of not less than two days each, separated by a period of not of not less than two days each, separated by a period of not

February, 1923.

more than two days, during which the insured contributor has not been employed for more than 24 hours, or two periods of unemployment of not less than six days each, separated by an interval of not more than six weeks, shall be treated as continuous unemployment for this purpose. Persons employed in establishments where, owing to trade depression, the number of working days has been reduced on a systematic basis in such a manner as to fall within the above provision are accordingly eligible for benefit. Payment of unemployment benefit is subject to certain statutory conditions and disqualifications. The procedure requires the "lodging" of an unemployed person's unemployment book, and the record of books "lodged" thus affords a measure of the extent to which unemployment is prevalent in the insured

[•] In addition to the figures given for total unemployment there were 60,147 persons, or 0.5 per cent., working systematic short time in such a nanner as to entitle them to Unemployment Insurance benefit.

^{*} The figures in the first column relate to Great Britain and Northern Ireland. The figures for Great Britain alone, as already published in the Press, show that on 29th January. 1923, there were on the Live Registers 1,105,000 men, 209,000 women, and 96,000 juveniles, compared with 1,165,000 men, 235,000 women, and 85,800 juveniles at 1st January, 1923.

† Workmen on short time are not included.

† These figures relate to the fortnight ended 1st January, 1923.

TRADE DISPUTES.*

Number, Magnitude and Duration.—The number of trade disputes involving a stoppage of work, reported to the Department as beginning in January, in Great Britain and Northern Ireland, was 54, as compared with 21 in the previous month and 47 in January, 1922. In these new disputes 14,700 workpeople were directly involved and 2,400 indirectly involved (i.e., thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, 1,900 workpeople were involved, either directly or indirectly, in 17 disputes which began before January, and were still in progress at the beginning of that month. The number of new and old disputes was thus 71, involving 19,000 workpeople, and resulting in a loss during January of 117,000 working days.

The following Table analyses the disputes in progress in January, in Great Britain and Northern Ireland, by groups of

industries, and indicates the number of workpeople involved (whether directly or indirectly) at the establishments concerned, and the approximate time lost during the month in all the disputes

The principal new dispute was that which began on 20th January in the bookbinding industry in the London district. This dispute arose out of the refusal of bookbinding employers to adopt the rates of wages for warehousemen, packers, porters, etc., agreed upon by the London Master Printers' Association. It is estimated that at the end of January approximately 2,500 workpeople were involved in the dispute, but the number was considerably increased in February. On 13th February it was agreed to refer the dispute to arbitration. The dispute involving over 500 teachers in elementary schools at Gateshead, which arose out of a proposed reduction of salaries from Burnham Scale No. III. to Scale No. II., was settled on 9th January, after lasting over two months; the Scale No. III. is to be retained until 31st March, 1924, subject to a reduction of 5 per cent. accepted nationally as from 1st April, 1923.

Causes.—Of the 54 disputes beginning in January, 22, directly involving 4,600 workpeople, arose out of proposed reductions in wages; 12, directly involving 2,500 workpeople, on other wages questions; 6, directly involving 1,500 work-people, on questions respecting the employment of particular classes or persons; 6, directly involving 1,300 workpeople, on details of working arrangements; 5, directly involving 4,300 workpeople, on questions of Trade Union principle; and 3, directly involving 500 workpeople, on other questions.

Results.—Settlements were effected in the case of 28 new disputes, directly involving 7,100 workpeople, and 5 old disputes, directly involving 600 workpeople. Of these new and old disputes, 10, directly involving 5,400 workpeople, were settled in favour of the workpeople; 11, directly involving 1,500 workpeople, in favour of the employers; and 12, directly involving 800 workpeople, were compromised. In the case of 8 disputes, directly involving 1,500 workpeople, work was resumed pending negotiations.

^{*} Disputes involving less than 10 workpeople, and those which lasted less than one day, have, as usual, been omitted from the statistics, except when the aggregate duration (i.e., number of workpeople multiplied by number of working days, allowing for workpeople replaced by others etc.) exceeded 100 days.

† I.e., thrown out of work at the establishments where the disputes occurred, but not themselves parties to the disputes. The statements of cause and result do not apply to these persons.

17.8.5 mown out work of the transport apply to these persons.

1 A further stoppage of work occurred in February.

Estimated number involved by the end of January, subsequently increased.

The schools re-opened on 15th January.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR.

[Based on Returns from Employers and Workpeople.]

the industries covered by the Department's statistics* the anges in rates of wages reported to have come into operation January, in Great Britain and Northern Ireland, resulted in aggregate reduction of nearly £56,000 in the weekly full ime wages of about 500,000 workpeople, and in an increase of 42,000 in the wages of 650,000 workpeople.

The groups of industries principally affected are shown in the

Table given below :-

Group of Industries.	Appro Number people af		Amount of Changes in Weekly Wages.		
	Increases.	Decreases.	Increases.	Decreases.	
Mining and Quarrying Metal, Shipbuilding, etc Transport	615,000 20.000 3,000 16,000	56,000 245,000 44,000 153,000	£ 40,300 750 500 - 650	450 23,550 7,000 24,800	
Total	654,000	498,000	42,200	55,800	

In the mining and quarrying group there were increases in the wages of coal miners of about 2 per cent. on current rates in the Yorkshire and East Midland area, $2\frac{1}{2}$ per cent. in Durham and nearly 7 per cent. in Scotland. There was also an increase of eather over 1 per cent. in the wages of ironstone miners in Cleve-and. Coal miners in Northumberland, with the exception of the west paid men, sustained a slight decrease (equivalent to less han 0.05 per cent. on current rates).

Amongst the workpeople in the metal trades affected by re-Amongst the workpeople in the fleval trades affected by teductions in rates of wages were men employed in federated ship-yards, of whom all but the lower-paid grades of timeworkers sustained decreases ranging, according to the amount of their wages, from 2d. to 2s. 6d. per week, this being the last of four equal instalments by which their wages have recently been re-Men in non-federated shipyards at Belfast and on the Mersey also sustained reductions. Tron puddlers and millmen in the North of England and West of Scotland sustained decreases of nearly 4 and 2 per cent. respectively on current rates, while there was a small reduction in the wages of iron and steel workers in South Wales and Monmouthshire. Men employed in lead

smelting, rolling, etc., had their wages reduced by ½d. per hour, and those in the bobbin making industry by 6s. per week. There were decreases in the minimum rates fixed under the Trade Boards Acts in the case of workpeople employed in the wrought hollow-ware and the stamped or pressed metal ware trades. The increases in wages in the metal industries mainly affected blastfurnace workers in Cleveland, Cumberland, Northamptonshire and the West of Scotland, whose wages were increased by amounts varying from under 4 to over 3 per cent. on current rates.

In the transport group the reductions mainly affected road vehicle drivers, etc., at various towns in Yorkshire and Lancashire, the amount of decrease varying from 2s. to 4s. per week.

In trades other than the above there were reductions

in the wages of house painters in Scotland, men employed by electrical contractors, soap and candle makers, and brewery workers at Burton. There were also decreases in the minimum rates fixed under the Trade Boards Acts in the linen and cotton handkerchief and household goods and linen piece goods trade; the perambulator and invalid carriage trade; the ostrich and fancy feather and artificial flower trade; the aerated waters trade (England and Wales only); the milk distributive trade (Scotland only); and the toy trade

Of the increases taking effect in January, twenty, amounting to £40,000 per week, took effect under sliding scales based on the proceeds of the industry or on selling prices; three, amounting to nearly £600 per week, took effect under cost of living sliding scales; one, amounting to over £500 per week, was arranged by arbitration; and the remaining increases were arranged by direct negotiation between the parties. Of the decreases, seventy-eight, amounting to £34,000 per week, were arranged by direct negotiation between the parties; thirty, amounting to £17,000 per week, were arranged by Standing Joint Bodies, including Trade Boards (£1,500 taking effect under cost of living sliding scales arranged by such bodies); twenty-seven, amounting to £2,300 took effect under sliding scales based on proceeds or selling prices; fifteen, amounting to £2,200, under cost of living sliding scales; and six, amounting to £1,700, were arranged by arbitration. Reductions in wages preceded by disputes involving stoppages of work accounted for only £100.

Hours of Labour.

No important changes were reported in January.

PRINCIPAL CHANGES IN RATES OF WAGES REPORTED DURING JANUARY, 1923.

NOTE.—The following Table relates mainly to changes which came into operation in January, with effect either from that month or from earlier dates. Certain earlier changes, however, of which particulars were received during January are also included. The weekly rates quoted are in respect of a full ordinary working week and do not take into account the effect of short time working.

WAGES OF BOYS AND YOUTHS IN THE ENGINEERING, FOUNDRY, Etc., TRADES AT BIRMINGHAM AND WOLVERHAMPTON,

Erratum.—Particulars were given on pages 492 and 493 of the December GAZETTE relating to a revised scale of wages for boys and youths in the engineering, foundry, etc., and various other metal trades in the Birmingham and Wolverhampton Districts, with a note to the effect that the scale had been agreed to by the Engineering and National Employers' Federations. It has since been ascertained that the Federations were not a party to the Agreement, which was made by the Engineering and Allied Trades Employers' Association of the Birmingham and Wolverhampton Districts.

CHANGES TAKING EFFECT IN FEBRUARY, 1923.

The following groups of workpeople are affected by reductions already reported as having been arranged to take effect in February:—Iron puddlers and millmen in the Midlands; steel smelters and millmen in various districts; metallic bedstead workers; silversmiths, etc., at Sheffield; workpeople in the jute, ready-made and wholesale bespoke tailoring, and wholesale mantle and costume trades (under Trade Board Orders); coopers; flint glass cutters; and flour millers.

MISCELLANEOUS STATISTICS.

POOR LAW RELIEF IN GREAT BRITAIN.

Data supplied by the Ministry of Health in England and the Board of Health in Scotland.

THE number of persons relieved on one day in January, 1923, in the 31 selected areas named below corresponded to a rate of 560 per 10,000 of population, showing an increase of 6 per 10,000 on the previous month, and an increase of 31 per 10,000 on a year

As compared with December, 1922, the total number relieved showed an increase of 10,403 (or 1·1 per cent.). The number of indoor recipients of relief was higher by 1,223 (or 1·0 per cent.), while the number of outdoor recipients increased by 9,180 (or 1·1 per cent.). One district showed no change, thirteen districts showed decreases, and every other district showed an increase. The most marked changes were increases in the Coatbridge and Airdrie district (54 per 10,000), in the East Metropolitan district (53 per 10,000), and in the Glasgow district (48 per 10,000); and a decrease in the Liverpool district (46 per 10,000).

As compared with January, 1922, the total number relieved showed an increase of 53,734 (or 5.8 per cent.). The number of indoor recipients decreased by 650 (or 0.5 per cent.), and the number of outdoor recipients increased by 54,384 (or 6.9 per cent.). Fourteen districts showed decreases, and every other district showed are increases. The greatest increases were in the trict showed an increase. The greatest increases were in the Paisley and Greenock district (463 per 10,000), in the Glasgow district (362 per 10,000), and in the West Ham district (271 per

Five districts showed increases ranging from 68 to 178, and nine districts showed increases ranging from 3 to 39 per 10,000 of population.

*These urban areas include in the case of England and Wales more than one poor-law union, except in the Leicester, Birmingham, and West Ham districts; and more than one parish in the case of Scotland, except in the Aberdeen district.

† Exclusive of Casuals: of Patients in the Fever and Small-pox Hospitals of the Metropolitan Asylums Boards; of Lunatics in Asylums, Registered Hospitals and Licensed Houses; and of persons receiving out-door medical relief only. The figures for Scotland include destitute able-bodied unemployed in receipt of poor-law relief.

‡ The numbers included for the Middlesbrough Union do not cover changes which have taken place since the 13th January, 1923.

DISEASES OF OCCUPATIONS.*

-February, 1923.

The total number of cases of poisoning and of anthrax in Great Britain and Northern Ireland reported under the Factory and Workshop Act during January, 1923, was 41. Two deaths due to lead poisoning were reported during the month, one in the pottery industry and one in electric accumulator works.

Six cases of lead poisoning (including one death) among house painters and plumbers came to the knowledge of the Home Office during January, but notification of these cases is not obligatory.

Pig Iron.—The rise in the ascertained selling price of Cleve-and pig iron for the quarter ended December, 1922, resulted land pig iron for the quarter ended December, 1922, resulted in an increase of 23 per cent. on standard wages of blastfurnacemen (with effect from 7th January, 1923). The rise in the ascertained price of Cumberland pig iron for November resulted in an increase of 2d. per shift in the bargain price and minimum wage of iron ore miners; the wages of limestone quarrymen were also increased by 1d. per shift, while blastfurnacemen had their wages increased by 1 per cent. on standard rates. The ascertainment for Cumberland pig iron in December resulted in an increase of ½d. per shift for limestone quarrymen, and of ¼ per cent. on standard rates for blastfurnacemen, no alteration being made in the wages of iron ore miners. The Northamptonshire ascertainment resulted in an increase, from 17th January, of 1½ per cent. for blastfurnacemen and ironstone and limestone quarrymen in that county. In Nottinghamshire and limestone quarrymen in that county. In Nottinghamshire the wages of blastfurnacemen, and in Leicestershire and Linolnshire, the wages of ironstone miners were not subject to my alteration as a result of the above ascertainment. West of Scotland ascertainment for the same quarter resulted in an increase, generally from 28th January, of 4 per cent. on standard rates

Manufactured Iron.—In consequence of the fall in the selling price of manufactured iron for November and December in the North of England, the wages of puddlers and millmen were reduced by 5 per cent. on standard rates from 29th January, while in the West of Scotland, the ascertainment for the same two months resulted in a decrease of $2\frac{1}{2}$ per cent. on standard rates as from 29th January.

EMPLOYMENT OVERSEAS.

72

[N.B.—The following paragraphs include an abstract of such official information as is available with regard to the state of employment abroad, in order to indicate, as far as possible, the fluctuations in employment in each country from period to period. The bases of the official statistics published in the various countries, are, however, not the same as those of the United Kingdom statistics, and therefore the figures quoted below cannot properly be used with those on pp. 51-52 to compare the actual level of employment in the United Kingdom with that in other countries. For further information on the subject of the bases of the unemployment statistics of the various countries see Report issued in 1922 by the International Labour Office under the title, "Methods of Compiling Statistics of Unemployment" (Studies and Reports, Series C., No. 7.)]

FRANCE.*

FRANCE.*

Unemployment in January.—The total number of unemployed remaining on the "live register" at the Employment Exchanges in the week ended 27th January was 13,235 (9,330 men and 3,905 women). The total number of vacancies remaining unfilled was 7,275 (3,690 for men and 3,585 for women). During the week under review the exchanges succeeded in placing 26,019 persons (20,989 men and 5,030 women) in situations, and, in addition, found employment for 2,251 foreign immigrants.

Out-of-Work Benefit in January.—According to the latest returns, 6 departmental and 35 municipal unemployment funds were in operation throughout France on 1st February, the total number of persons in receipt of out-of-work benefit through their agency being 2,674 (2,378 men and 296 women). This total shows an increase of 199 when compared with the corresponding figure (2,475) for the preceding week. It is to be noted that these figures do not fully indicate the number of persons out of employment, since some localities are without unemployment funds, and where they do exist their record of unemployed persons is not complete.

The total number of unemployment funds established is 264 of

persons is not complete.

The total number of unemployment funds established is 264, of which 31 are departmental and 233 municipal. The maximum number of persons in receipt of donation (91,225) was reached in March, 1921.

BELGIUM +

BELGIUM.+

Unemployment in November and December.—The most recent figures available are provisional in character and relate to December. Returns received by the Belgian Ministry of Industry and Labour from 1,739 approved unemployment funds, with a total membership of 680,269, show that 25,748 of these were either wholly or partially unemployed on the 31st of that month. The aggregate days of unemployment in December numbered 363,766, as against 364,249 in November.

Revised and final figures are given for November, when 1,701 funds, with an aggregate membership of 695,998, reported 10,121 (or 1.5 per cent.) wholly unemployed and 16,439 partially so on the last working day of the month.

During December 14,646 applications for employment were received at Employment Exchanges, as compared with 13,745 in November. Vacancies notified by employers numbered 11,773 (11,266 in November). For every 100 situations registered as vacant there were thus 124 applications, as compared with 122 in November.

SWITZERLAND.

Unemployment in December.—According to figures compiled by the Central Employment Department of Switzerland, on the basis of returns from Employment Exchanges, the number of applicants for work remaining on the "live register" on the 31st December, 1922, was 53,463 (as compared with 51,128 at the end of the preceding month, and 88,967 at the end of December, 1921). Of these, 14,057 were employed on relief works, leaving 39,406 entirely without work. Among the applicants for employment were 10,319 normally engaged in the building trades, 7,192 in the metal, engineering and electrical trades, 6,537 in the watch, clock and jewellery trades, and 3,928 in the textile trades. In addition to the foregoing persons entirely without work, 20,429 were reported as only partially employed, including 7,352 in the textile trades, 5,236 in the metal, engineering and electrical trades, and 2,478 in the watch, clock and jewellery trades. The vacancies offered by employers remaining unfilled on the same date numbered 1,178.

During the month of December, on an average, 587 applications were made for each 100 vacancies for men, and 283 for each 100 for women. In November the figures were 525 and 251 respectively. Unemployment in December.—According to figures compiled by

251 respectively.

ITALY.

Unemployment in January.—According to a report received from H.M. Commercial Secretary at Rome, 381,968 persons were reported to be totally unemployed on 1st January, as compared with 354,238 on 1st December, 1922. In addition, 42,558 were partially unemployed at the later date and 43,140 at the beginning of December. On 1st January the number of totally unemployed in receipt of benefit was 72,812, as compared with 69,300 on 1st December.

Employment in November.—The issue for 1st February of the German official journal Reichs-Arbeitsblatt, reporting on employment in December, states as follows: The end of the year brings with it regularly a marked drop in employment. This was clearly so in December, 1922, but at the same time certain with an energy ways were at work which were independent of the second other causes were at work which were independent of the season. The inferences to be drawn from the various sets of statis The inferences to be drawn from the various sets of statistical data relating to the labour market are not uniform in character. On the whole, employment appeared to be not so good, but in individual industries and localities (such as metal working, the electrical industry, the chemical industry) it was still satisfactory. Employment was less favourable, without being decidedly bad, in the textile industry. In the building trades and in certain food, etc., trades (particularly tobacco), it was bad, as it was also, to a somewhat less degree, in the leather and printing trades

and printing trades.

The number of totally unemployed persons in receipt of out-of. work donation showed a large increase as compared with the preceding month. On 1st January these totalled 82,427, as against 42,860 on 1st December, a rise of 92 per cent. Male recipients increased by almost exactly 100 per cent. and female by 60 per cent.

by 60 per cent.

Returns from trade unions also indicate a further increase of unemployment in December. Out of $6\frac{1}{2}$ million organised workers covered by the statistics, 182,955, or 2.8 per cent., were out of work on the last day of the month, the corresponding figure for the end of November being 2.0 per cent. The following Table gives particulars for the more important unions represented in the returns:—

	Member- ship reported	Percentage of Membership Unemployed.			
Unions.	at end of Dec., 1922.	Dec., 1922.	Nov., 1922.	Dec., 1921.	
All Unions making Returns	6,455,475	. 2· 8	2:0	1.6	
PRINCIPAL UNIONS:— Building (Soc. Dem.) (Christian) Painters (Soc. Dem.) Metal (Soc. Dem.) (Christian) (Christian) (Christian) (Christian) (Christian) (Christian) (Clothing (Soc. Dem.) Boot and shoe Transport (Soc. Dem.) Printing Bookbinding Woodworking (Soc. Dem.) Glass (Soc. Dem.) Baking and confectionery (Soc. Dem.) Brewing and corn-milling Tobacco (Soc. Dem.)	80,574 82,823 94,231	10·2 1 9 22·5	7.9 1.6 16.4	5.5 1.0 6.1	
Factory workers (irrespective of trade)	654,315	2.4	2.5	1.5	
ers (Christian)	126,281 217,371	1.6	2.6 1.6	0·7 1·7	

The above totals do not include persons only partially employed, of whom there were 492,711, or 8.7 of the total membership, in unions making returns on this point. The proportion was greater among women and girls (18.6 per cent.) than

portion was greater among women and girls (18'6 per cent.) than among men (5'1 per cent.).

At public Employment Exchanges 733,243 applications for employment were registered during December, as against 797,348 in November, a decline of 8 per cent. The vacancies notified by employers, however, were 22 per cent. less in number than in the preceding month, with the result that for every 100 vacancies for men there were 219 applications (as against 175 in November), and for every 100 for women 155 applications (148 in November). Statistics of membership of sickness insurance societies show that in 4,835 societies making returns the membership (i.e., the number of persons under obligation to insure, and therefore assumed to be in work) fell from 11,399,654 on 1st December, to 11,222,157 on 1st January, or by 1'6 per cent.

HOLLAND.

Unemployment in January.—H.M. Commercial Secretary at The Hague reports that, according to figures supplied by the State Department of Unemployment Insurance, in the week ended 6th January, out of 330,319 members of unemployment funds making returns, 14·0 per cent. were totally unemployed, and 3·5 per cent. partially so. In the first week of the preceding month (ending 9th December) the corresponding percentages were 10·7 and 2·3 respectively.

Unemployment in December.—According to data furnished through the courtesy of the Norwegian Central Bureau of Statistics, out of 13,590 members of trade unions making returns to the Bureau, 12.9 per cent. were out of work on 31st December, 1922, as compared with 10.6 per cent. on the last day of November and 18.3 per cent. on 31st December, 1921.

DENMARK.*

Inemployment in December .- Out of a total of 256,676 workpole covered by returns supplied to the Danish Statistical artment by trade unions and by the Central Employment hange, 20.5 per cent. were unemployed on 29th December, as pared with 15.2 per cent. on 1st December and 25.2 per cent. he end of December, 1921.

UNITED STATES *

Employment in December.—The Federal Department of Labour Statistics at Washington presents reports concerning the volume of employment in December, 1922, from 3,294 representative establishments, covering 1,587,708 workers in 43 manufacturing industries. A comparison of the figures with those for identical establishments in November, 1922, shows that, on the identical establishments in November, 1922, shows that, on the whole, there was an increase of 2.4 per cent. in the number of persons employed in the later month. Increases are shown in 33 industries and decreases in 10. The largest increase (29.9 per cent.) appears in the pottery industry. Agricultural implements, shipbuilding, men's clothing, foundry and machine shops, and car building and repairing show increases of 14.8, 7.7, 5.4, 4.5 and 4.2 per cent. respectively. Decreases are shown in fertilisers (11.4 per cent.), tobacco (5.9 per cent.), brick (4.5 per cent.), and the flour industry (3.2 per cent.). In respect of aggregate wages, 33 of the 43 industries show increases in December over the preceding month, and 10 decreases. The largest increase (25.7 per cent.) appears in the pottery industry. Increases are also shown in agricultural implements (18.4 per cent.), shipbuilding (10.2 per cent.) and men's clothing and foundry and machine shops (each 9.3 per cent.).

The general increase in the number of persons employed in the 13 industries was 15·1 per cent. Ten industries show increases and 3 decreases. Automobiles, car building and repairing, and iron and steel show the largest increases (31·5 per cent., 28·7 per cent. and 26 per cent. respectively). A decrease of 12·3 per cent. appears in men's clothing.

As regards aggregate earnings also, 10 industries show increases and 3 decreases. An increase of 65·8 per cent. in the iron and steel industry is the largest reported.

CANADA +

Employment in December.—For 1st December, 1922, returns were received by the Employment Service of Canada from 6,369 firms with an aggregate working pay-roll of 780,990. On the 1st November the same firms reported 785,580. If the number 100 be assigned to the week ended 17th January, 1920, the index number of employment for 1st December, 1922, is 95·2, as compared with 95·8 for 1st November and 87·2 on 1st December, 1921.

LEGAL CASES AFFECTING LABOUR.

RADE UNIONS AND THEIR MEMBERS-CONSTRUCTION OF RULES, DECLARATION, AND INJUNCTION.

this case the Plaintiff, a Derbyshire miner, claimed a claration against the Defendants, a registered Trade Union der the Trade Unions Acts, 1871-1876, that the act of the mion in excluding him from membership was ultra vires; a claration that he is still a member of the Union, and an innetion to restrain the Union and the Executive thereof from cluding him. The Plaintiff joined the Defendant Union in me, 1902, when he was working at a colliery which had shafts the in Derbyshire and Yorkshire, and in 1906 he was working a part of the colliery which had a shaft only in Yorkshire. a part of the colliery which had a shaft only in Yorkshire. Plaintiff on joining this Union in 1902 was subject to the on Rules made in 1901, which rules were, however, altered er powers, in 1910, 1916, and 1920, and it was a question bether the alterations of rules after 1910 were validly effected. the 1920 rules, it was provided that "the members shall miss of as many persons employed in or about the arious mines in Derbyshire, excepting South Derbyshire, as may join from time to time" and "any member asing to work in or about a mine in this county shall blonger be a member of this Union."

In 1921, the Union refused to accept further contributions om the Plaintiff, and on the ground that he was working at Yorkshire pit ceased to recognise him as a member. It was

stated that in accordance with the rules a clearance had been offered to the Plaintiff to enable him to join the Yorkshire

Miners' Association.

Mr. Justice Sargant in giving judgment said that three questions arose in this action. The first was whether as a matter of interpretation of the rules of the Union, the Plaintiff had ceased to be a member. The second question only arose if the first question was answered in the affirmative, and was whether as a matter of technicality there was a technically effective alteration of the rules, and the third, if both these questions were answered in the affirmative, whether the alteration was ultra vires. It had been contended that the rules of 1916 and 1920, which were practically identical, defined the members of the Union in terms which excluded the Plaintiff, but the Plaintiff had joined under the rules of 1901, and those rules did not limit membership to persons working in collieries in Derbylimit membership to persons working in collieries in Derby-shire, or provide for a member ceasing to be such on working outside Derbyshire

In His Lordship's judgment not only was the Plaintiff a person entitled to join the Union in 1902, but he remained a member after he went to the Yorkshire colliery, and his status was unaffected by working at that colliery.

In 1910 further rules were made, but again there was no limitation in terms to collieries inside Derbyshire, and even with this, the provision contained in these rules, that the

RECENT CONCILIATION AND ARBITRATION CASES UNDER THE INDUSTRIAL COURTS ACT, 1919.

THE INDUSTRIAL COURT.

RAILWAY SHOPMEN—GREAT WESTERN RAILWAY.—Amalgamated Engineering Union v. Great Western Railway. The rates of pay and conditions of service of members of the Amalgamated Engineering Union employed by the Great Western Railway were set out in Decision No. 249 of the Court, and were also the subject of subsequent agreements between the parties. The rates of pay of men employed on lines, principally in South Wales, which are now included in the Great Western system, were not affected by Decision No. 249, but were matters of local agreement and settlement. The rates of pay and conditions of service of railway shopmen (excluding members of the Amalgamated Engineering Union) in England and Wales were laid down in Decision No. 728, and the Great Western Railway applied that decision to the whole of their shop staff, irrespective of the particular trade unions to which the men belonged. The claim of the Union is that as they were not parties to the decision the company was not justified in applying the terms of the decision and departing from the settlement effected in Decision No. 249 and the subsequent agreements. Decision.—

The Court have fixed for most of the occupations concerned different rates for different centres. This differentiation is based on various considerations, among which the most important are the general, industrial and economic circumstances of the locality and the relative importance of the centre from the railway point of view. The rates and conditions of service laid down are based upon the terms of the decision of the Court referred to above, viz., Decision No. 728. The Court was also asked to determine whether shops attached to running-sheds should be regarded as forming part of the running-shed for the purpose of the payment of the extra 6s, a week payable to men whilst the payment of the extra 6s. a week payable to men whilst employed in the running-shed, and known as the running-shed differential. In the case of the shop attached to the running-shed at Newport (Ebbw Junction), the Court decided that in the case of men continuously employed in the shop as distinct from the shed no claim to the differential of 6s. a week arises. In other cases the Court are clearly of opinion that the matter is one for detailed and expert examination by the parties in respect to each shed or shop and an agreement if possible reached. Where no agreement can be arrived at the matter may again be referred to the Court. In respect of men other than fitters who previous to the operation of Decision No. 728 were in receipt of the running-shed differential the decision of the Court is the same as in the case of coppersmiths, set out in the summary of Decision No. 747, below. Where under the decision an alteration exceeding 2s. is made in any rate of wages it shall take effect to the extent of 2s. as from 1st January, 1923, and at the rate of 2s. or such part thereof as may remain, as from the first day of each succeeding calendar month. Issued 30th December, 1922.

Coppersmiths in Running-sheds—England and Wales.—
National Society of Coppersmiths, Braziers and Metalworkers v.
Certain Railway Companies of England and Wales. A question was raised on Decision No. 728 (Railway Shopmen—England and Wales) as to whether the railway companies had acted within the terms of the decision in withdrawing an extra payment or differential of 6s. a week from coppersmiths employed in running-Decision.—A company has the right to claim the with drawal of an allowance, but until any claim is put forward and settled either by agreement or by decision of the Court the existing position remains unaltered and no change is warranted under the terms of Decision No. 728. Issued 30th December,

CONCILIATORS, SINGLE ARBITRATORS AND AD HOC BOARDS OF ARBITRATION APPOINTED BY THE MINISTER OF LABOUR.

BOOT AND SHOE TRADE WORKERS: LONDON.—In the matter of a difference between the two sides of the Board of Conciliation and Arbitration for the Boot and Shoe Trade of London Difference—As to which of the two general Statements of Wages operating in the London shops should be paid by Messrs. Hitchings and Penny, Ltd., to their employees. Arbitrator-Mr. W. Addington Willis. Award—In so far as Messrs. Hitchings and Penny, Ltd., continued to carry out work of similar nature and grade to that executed by their predecessor, Mr. Hansen, they were bound to follow the established practice of paying for such work according to the First Class Statement, but when work of a lower character or grade than that formerly executed by their predecessor was done, the rates paid should be in accordance with any Statement in the Centre applicable to such work. Issued 30th December, 1922. (I.R.

BOOT AND SHOE TRADE WORKERS: NORTHAMPTON.-The Two Sides of the Joint Board of Conciliation and Arbitration for the Boot and Shoe Trade of the County District of Northam Difference-Application for revision of the award iss by Mr. Frank Sheppard on 25th August, 1922. (See Labour Gazette, September, 1922, Page 392.) Arbitrator—Alderman Frank Sheppard, J.P. Award—No new fact or alteration of the conditions had been elicited to justify an alteration in the terms of the former award. Issued 5th January, 1923. (I.R.

FURNISHING TRADES WORKERS: NORTH-EAST LANCASHIRE. The National Amalgamated Furnishing Trades' Association v The North-East Lancashire Furnishing Trades Employers' Association. Difference—Application by the men concerned for the existing rate of wages of 1s. 9d. to remain in operation until 1st February, 1923, and for a ruling on the question as to whether the basis of calculating wages should be changed from 79 points equalling 1s. 9d. per hour to $82\frac{1}{2}$ points, equal 1s. $8\frac{1}{2}$ d. per hour. Arbitrator—Mr. F. H. McLeod, C. assisted by two Technical Assessors-Messrs. J. Hansen for the employers, and F. Bramley for the workpeople. Award—reduction in wages of ½d. per hour, making the rate 1s. 8½d. should be brought into operation as from 1st February, 1923. Issued 22nd January, 1923. (I.R. 1978/1922.)

GAS MACHINE OPERATIVES: GORSEINON, SOUTH WALES.—The Iron and Steel Trades Confederation v. The South Wales Siemens Steel Association. Difference—Application by the Confederation that tonnage rates be fixed for men employed on the Gas Engines in the Melting Shop Department of the Works of the Grovesend Steel and Tinplate Company, Ltd., Gorseinon. Board of Arbitration-Sir William Mackenzie, K.B.E., K.C. Chairman), Mr. W. Simons (Employers' Representative), W. Dodgson (Employees' Representative). Award—The flowing tonnage rates were fixed for the operatives concerned One gas machine operated by one man on an eight-hours' shift 3½d. per ton; two gas machines operated by two men, 3½d. per ton; three gas machines operated by two men, 2½d, per ton; four gas machines operated by three men, 2¾d, per ton, the said rates being divided among the men employed in proportion to the datal rates in existence, and being exclusive sliding scale rate. Effective as from the beginning of the first pay period following the date of award. Issued 29th January, 1923. (I.R. 389/1923.)

AGREEMENTS NEGOTIATED BY OFFICERS OF THE MINISTRY OF LABOUR.

MINERAL WATER MANUFACTURE WORKERS: LONDON.-Transport and General Workers' Union v. R. White and Son Camberwell. Difference—Dispute arising out of the Conpany's proposal to reduce wages by 7s. 6d. per week as from Is 1923. Agreement—A reduction in wages of 3s. 90 per week should come into operation as from the first full pa day following the 1st January, and a further reduction 3s. 9d. per week should become operative on the first full paday following the issue of the 1923 Budget, provided that the Budget made no reduction in the Table Water Tax. No redu tion should be made if the Tax were reduced. The Agreem also provided that three months' notice of revision should given at any time after 31st July, and the party applying such revision should arrange for a joint conference to be held within one month. Failing a settlement a further conference should take place under the auspices of the Ministry of Labour Signed 15th December, 1922. (I.R. 2046/1922.)

TRAMWAY WORKERS: SUNDERLAND.—The National Union General Workers v. The Sunderland Corporation Tramways Committee. Difference—Application for the withdrawal of ts. per week reduction, which the Committee proposed to bri into operation as from 3rd January, 1923, and for the contin ance of eight days' leave per annum. Agreement-It wa agreed that the shilling per week reduction should be applied as from 3rd January, and that the men concerned should have six days' holiday per annum with seven days' pay, as agains eight days' holiday previously allowed. Agreed 1st January, 1923. (I.R. 1477/1922.)

TRADE BOARDS ACTS, 1909 AND 1918.

ORDERS.

RDERS confirming minimum rates of wages as fixed and/or ried by the following Trade Boards have been made by the inister of Labour under Section 4 (2) of the Trade Boards Act,

Dressmaking and Women's Light Clothing Trade Board (Scotland).

(a) The general minimum time-rates are as follows: (i.) for male workers engaged on certain specified operations who have had the experience specified by the Trade Board, rates ranging from 10³/₄d. to 1s. 7¹/₄d. per hour, according to operation, etc., and experience of worker; (ii.) for all other male workers of 22 and over, 10³/₄d. per hour, with lower rates for younger workers; (iii.) for female workers employed as cutters, trimmers and fitters-up, 6½d. per hour for workers under 19, 7d. per hour for workers of 19 and under 20, and 7 d. per hour for workers of 20 years of age and over; (iv.) for other female workers, except learners, 61d. per hour, with lower rates for female learners.

(b) The piece-work basis time-rates are as follows: -(i.) For the classes of male workers specified in (a) (i.) above, rates ranging from 1s. $0\frac{1}{4}$ d. to 1s. $8\frac{3}{4}$ d. per hour; (ii.) for all other male workers, 1s. $0\frac{1}{4}$ d. per hour; (iii.) for female workers specified in (a) (iii.) above, $7\frac{1}{2}$ d., 8d. and $8\frac{1}{2}$ d. per hour respectively; (iv.) for all other female workers (other than learners occupied in fitting we and hooking up.) $7\frac{1}{4}$ d. per hour in fitting-up and hooking-up), 71d. per hour.

NOTICES OF PROPOSAL.

NOTICES OF PROPOSAL to fix and/or vary minimum rates of wages have been issued by the following Trade Boards:—

Dressmaking and Women's Light Clothing Trade Board (England and Wales).

Proposals (W.D. 16 and 17), dated 12th February, 1923 (i.) to vary by reduction the general minimum time-rates and overtime rates and to cancel the piece-work basis time-rates for female workers in the Retail Bespoke Dressmaking branch of the trade; and (ii.) to vary by reduction the general minimum timerates, piece-work basis time-rates and overtime rates for female workers in any branch of the trade other than the Retail Bespoke

Dressmaking and Women's Light Clothing Trade Board (Scotland).

Proposal (W.D.S. 11), dated 25th January, 1923, to vary by reduction the general minimum time-rates, piece-work basis time-rates and overtime rates for female workers in the Wholesale Manufacturing and all other branches of the trade except the

Jute Trade Board (Great Britain).

Proposal (J. 27), dated 6th February, 1923 (issued with the consent of the Minister), to fix general minimum piece-rates and to vary overtime rates for certain classes of female weavers, in the areas of Aberdeen, Barrow-in-Furness, Dundee, Carnoustie and Tayport (as defined by the Trade Board).

Laundry Trade Board (Great Britain).

Proposal (W. 14), dated 8th February, 1923, to vary by reduction the general minimum time-rates, piece-work basis time-rates, guaranteed time-rates and overtime rates for female workers in Cornwall and the North of Scotland (as defined by

Pin, Hook and Eye and Snap Fastener Trade Board (Great Britain).

Proposal (O. 14), dated 8th February, 1923 (issued with the consent of the Minister), to vary the general minimum timerates, piece-work basis time-rates and overtime rates for male and female workers (other than home workers).

Rope, Twine and Net Trade Board (Northern Ireland).

Proposal N.I.R. (N. 7), dated 17th January, 1923, to vary the general minimum time-rates for certain classes of female workers.

Sugar Confectionery and Food Preserving Trade Board (Northern Ireland).

Proposal N.I.F. (N. 8), dated 16th January, 1923, to vary the general minimum time-rates, piece-work basis time-rates and overtime rates for male and female workers.

Particulars of the minimum rates of wages referred to above, as regards Great Britain, may be obtained by reference to the LONDON and EDINBURGH GAZETTES.

Particulars regarding minimum rates of wages proposed, fixed or varied by Trade Boards established in Northern Ireland, may be obtained from the Secretary, Office of Trade Boards (Northern

UNEMPLOYMENT INSURANCE ACTS.

76

DECISIONS GIVEN BY THE UMPIRE.

Volumes containing the collected decisions of the Umpire appointed under Section 12 of the Unemployment Insurance Act, 1920, respecting disputed claims to benefit, are published by H.M. Stationery Office.

Cases after No. 2000 will not be published in volume form, but summaries of the decisions are printed in pamphlets issued at approximately fortnightly intervals. The pamphlets will be supplied post free, as and when issued, for an annual subscription of 7s. 6d., payable in advance. All applications should be made to H.M. Stationery Office or at any of the addresses shown on the front cover of this GAZETTE.

The following are recent decisions of general interest :-

CASE No. 4035, SECTION 8 (1).—TRADE DISPUTE—MEN REFUSED NEW PIECE RATES—EMPLOYERS BROKE AGREEMENT BY CLOSING PITS WITHOUT RESORT TO CONCILIATION MACHINERY.

The employers, a colliery company, reported that, as the colliery had for some time been working at a loss, the colliers were asked to accept a reduction in certain rates on the price list, and they were informed that unless the reduction was accepted the colliery would be closed down. The men refused to agree to any reduction, and accordingly notices to terminate their contracts in 14 days were served on 14th October, 1922. On the expiration of the 14 days' notices a notice was posted at the colliery signifying the company's willingness to resume work if the men would accept the reductions for a temporary period, but the men declined to accept. Seventy-six colliers were given notice, and 31 daymen lost employment when the colliers ceased work.

The applicant, a miner, stated that he was one of the men affected by the issue of notices. His association representative contended that there was no dispute, because the men were willing to continue work at the old rates, which had been fixed in 1921 under a national agreement, and in his opinion these rates could only be altered by mutual agreement. In September, 1922, the employer had asked for 3 alterations in the price list, and the men had agreed to one of them. The men were prepared to continue working while negotiations were proceeding, but the employers decided to close the colliery. No alternative proposals were made by the men during the currency of the notices, but they had since offered terms which the company would not accept. Negotiations were still proceeding, however, and they would continue until an agreement was reached.

The colliery manager stated at the Court of Referees that several interviews took place before notices were tendered. The colliery was kept going for some time, although run at a loss, but, as the men refused to make any concessions, the company had to give notices. Further meetings which were held during the currency of the notices proved unfruitful, and the company

were obliged to close the colliery.

Recommended by the Court of Referees that the claim for benefit should be disallowed under Section 8 (1). The Court held that all the employees at this colliery had lost employment in circumstances which amounted to a trade dispute. The evidence showed that considerable negotiations had taken place before the men were given notice, and the subsequent stoppage of work was due to the failure to agree on certain items in the price list.

The applicant's Association appealed to the Umpire against the Court's recommendation. At an oral hearing it was submitted that the employer must have been acting on the supposition that the mine was closed through trade depression. According to an agreement between the Workmen's Association and the Association of Employers, of which this employer was a member, machinery was provided for dealing with disputes, and clause 237 of the agreement stated that "No stoppage over questions in dispute must occur at the separate collieries until the machinery outlined above has been exhausted. . . ." The employer refused to make use of the conciliation machinery, but, of course, he could not be prevented from closing the mine simply on the ground that it did not pay. It was admitted that at the date of the hearing work had been resumed on terms which were a compromise between the views of the two parties.

Decision.—"On the facts before me my decision is that the claim for benefit should be disallowed.

"The statement of the employer in reply to questions put to him in writing, and the oral evidence at the Court of Referees given by the employer's representative, appear to me to leave no room for doubt that the applicant lost employment in consequence of the refusal of pieceworkers to accept certain reductions of rates in the Price List. If the reductions had been accepted, the employer was prepared to continue working the mine. I agree with the Court of Referees that in these circumstances there was a stoppage of work which was due to a trade dispute, even though the employer's action may not have been in accordance with an agreement entered into by the Association of which he was a member."

Case No. 4064, Section 7 (1) (iii)—Suitable Employment, Refusal of—Distance of Work from Applicant's Home—Inconvenient and Expensive Travelling Arrangements—Unemployed for Twelve Months.

A number of colliers, who had been unemployed for at least twelve months, were offered employment on 3rd October, 1922,

as colliers at a pit situated at about twelve miles from thein homes. They refused the offers on the grounds that the charge of 7s. per week for conveyance to and from the colliery was excessive, that the pit in question was working only 2½ days per week, and, in some cases, that the temperature of the pit was so high that it would be unhealthy for them to return home by omnibus.

On behalf of the men it was stated that the highest rate to the district was 8s. 5d. per shift, and for 2½ days' work, allowing deductions of 7s. for 'bus fare and 3s. for other stoppages a workman would have only 11s. 4d. left. Some of the applicants were not experienced colliers and would consequently ear less. Further, some of the applicants would have had to wal about 4 to 4½ miles from their homes to the 'bus, about 1½ miles from the 'bus terminus to the pit and a further mile from the shaft to the coal face. In addition, the men were accustomed to non-gaseous, cool, damp mines, and had not worked in deep and hot collieries such as the one at which they were offered work they were not used to carrying safety lamps, having alway used naked lights. It was admitted, however, that the men had not attempted to secure cheaper means of transit, and that the could have adapted themselves to the conditions at this mine.

The colliery manager stated that at the time in question the pit was working on an average of five shifts weekly. Full time, which was 5½ shifts, would probably be worked in future. The minimum wage was 8s. 5½d. per shift, but some men earned 14s. or 15s. per shift. The colliery was not a gassy pit, and the men could soon have accustomed themselves to working in it. The coal face was, on an average, half a mile from the shaft

Recommended by the Court of Referees that the claims for benefit should be disallowed on the ground that the employment offered was suitable. The only doubt which the Court experenced in disallowing the claims was the admittedly heavy confit the conveyance, but they pointed out that no effort to obtain the cheaper means of transport had been made. On this question however, the men were granted leave to appeal to the Umpire.

It was ascertained that the means of conveyance in question were chars-a-bancs which had been provided by the local authorities who were anxious for the men to secure work in view of the time they had been unemployed.

At an oral hearing before the Umpire it was stated the forty men would need to combine to hire a char-a-banc to brin the cost to 7s. per week per man, and any reduction of the number would increase the cost to the rest. The proper solution of the transport difficulty was to have a railway station near to the colliery on a line which already ran near it, and the railway company were willing to have the station if the collier company would pay the cost. The latter company refused, however, to spend any money at all.

Decision.—"On the facts before me my decision is that the claims for benefit should be disallowed for four weeks.

"The unsatisfactory means of conveyance to and from wor would, no doubt, involve hardship, but having regard to the length of time for which the applicants had been unemployed and the poor prospects of work in their own neighbourhood, the should have been willing to accept the employment offered. The period of disqualification may be reduced, however, to forwards."

CASE No. 4070, SECTION 7 (1) (iii)—CAPABLE OF, AND AVAILABLE FOR WORK DURING PERIOD WHEN REDUCTION OF FULL WORKMEN'S COMPENSATION WAS CONTESTED ON GROUND THAT APPLICANTS WERE UNFIT FOR LIGHT WORK.

The Insurance Officer reported that the applicants, two smelters, whose claims for benefit had been disallowed under Section 7 (1) (iii), presented themselves at the local Branch Employment Office of the Ministry of Labour on 23rd January, 1922 and inquired whether there was any light work available. The did not make any formal registration, and deliberately refraine from lodging their unemployment books or claiming benefit because they were at that time prosecuting claims for a continuance of workmen's compensation at the maximum rate, in support of which they contended they were incapable of work, and because they knew that if they claimed benefit they would, effect, declare that they were capable of work, and thus would prejudice their claims for compensation. In support of the claims for compensation they obtained medical certificate showing that they were not capable of work. The employer however, had had a special medical examination before deciding to reduce the compensation rate, and the report was that the applicants were capable of light work. The claims for compensation were withdrawn on 20th March, 1922, and the men claims benefit for the period 23rd January, 1922, to 20th March, 1920 on the ground that they were in fact capable of work and the their claims for compensation were erroneous.

Recommended by the Court of Referees that the claims for benefit should be disallowed on the grounds that the applicants were not capable of, or available for, work, and that they had not lodged their claims in the prescribed manner.

The Insurance Officer agreed with the Court's recommendation, but submitted the case to the Umpire for final decision is accordance with an arrangement made by the Minister of Labour with the applicants' Association.

The Association submitted that this was a test case to ascertain the position of men who had been receiving full compensation for total incapacity, but whose amount of compensation had been reduced on the ground that they had recovered part of their earning capacity and were capable of light work. If it was

lished that the workman was capable of some work then was qualified to claim unemployment benefit from the date which the compensation allowance was adjusted on this d. Some period had to elapse, however, between the date the notice of reduction of compensation and the date when of of the workman's condition was finally established. In period the workman was in the position that if he received loyment benefit it was tantamount to an admission that was capable of some work, and this fact would be used him in his appeal against the reduction of the compensa-If, however, the workman failed to claim benefit, and subsequently decided that he was capable of some work, his compensation was reduced as from the date of the he was unable to secure unemployment benefit for the od in question because he had not made a claim in the ribed manner. The Association therefore submitted that workman applied at an Employment Exchange for light on the date from which it was proposed to reduce his nsation below the maximum rate, that should be regarded claim for benefit lodged in the prescribed manner, even the applicant did not sign the declaration that he was ble of work, and arrears of benefit should be paid if and it should be subsequently established, by the failure of claim for continued full compensation, that the workman was ble of some work at the date of applying for light work at Exchange, and if the workman was able to show that he s available for work, and unable to obtain it.

February, 1923.

Decision.—" On the facts before me my decision is that the claims for benefit should be allowed.

The applicants had had a serious accident in February, 1920, ulting in severe burns, and were incapacitated for nearly two ers, and in receipt of the maximum compensation. uary, 1922, after a medical examination conducted on behalf the employers, they were notified by the employers that the kly compensation payments would be reduced on the ground they had become capable of light work. Through their ociation they contested this reduction of compensation, but red to receive Unemployment Benefit as from the date of reduction in the event of its being upheld. They did not h, however, to make claims for benefit in the ordinary way, ause they would have to state that they were capable of rk, and this might prejudice their claim for continuance of ximum compensation; nor did they wish to receive any benefit ess and until the claim for maximum compensation should decided against them. They explained the situation at the ployment Exchange, but did not sign applications for benefit. After about two months the employers offered the applicants at employment, which they accepted and found they were able perform. They, therefore, withdrew their objection to the ction of compensation as from the date in January on which had been made, and they desired to be paid unemployment nefit as from that date until the date when they obtained For the purpose of allowing a test case to come before the Minister of Labour has, in accordance with his powers,

"Accepting the claim as having been properly made, I have only to consider whether the applicants are disqualified for receipt of Unemployment Benefit on the ground that they were not 'capable of and available for work' during the period when they were contending in connection with the Compensation Claim, that they were not capable of work.

uld accept an informal claim.

greed to accept the informal application as valid. No question rises, therefore, of disallowance on the ground of failure to make application in the prescribed manner, neither have I to onsider whether in circumstances of this kind the Minister

"The fact that in April the applicants proved themselves apable of work by accepting and successfully performing it is not necessarily conclusive evidence that they were so capable in anuary and February. This acceptance, however, in conjunction with the opinion of the medical men who examined the pplicants on behalf of the employer, the fact that the injuries were of a kind of which the extent could probably be fairly rell judged by medical examination, that nearly two years had lapsed since the injuries were received, and that the applicants withdrew their claim for maximum compensation for the period in question, satisfies me in this case that they were capable of work.

"With regard to availability for work, it is an important point against the applicants that they did not call regularly at the Employment Exchange for the purpose of making enquiries about possible work. On the other hand, there is force in the contention that they were in a well-organised trade and their Association was in a position to know of vacancies. I accept the evidence of the Association in this case that it is their policy to encourage men in this position to take work if possible and see if they can do it, and that the Association were, during the period in question, pressing the employers to offer the applicants light work, which ultimately the employers did in spite of the very serious slackness of trade which was experienced at the time. In all the circumstances, therefore, there do not appear to me to be sufficient grounds for disallowance of benefit."

Case No. 4122, Section 7 (1) (iii).—Availability for Work—Boys in Holiday Camp Arranged by Employers—Prospects of Securing Work Not Diminished.

The applicant, a youth 16 years of age, who was suspended owing to trade depression from his usual employment with a

shipbuilding and engineering company in Glasgow, was reported to have been attending a holiday camp which was run by his late employers, for the period 14th July to 24th July, 1922. His claim for benefit was disallowed as a test case under Section 7 (1) (iii) in respect of the camping period.

It was stated that the lads attending the camp were not more than 18 years of age and were usually employed by the firm. They paid 30s. for a period of 10 days in the camp, contributing this sum at the rate of 1s. per week during the year before the camp opened. The camp was situated at the seaside; the discipline was strict, the lads having to conform to fixed hours, and the curriculum included physical training, swimming and general welfare. All the work in connection with the camp was performed by the lads.

It was contended that the boys were available at short notice for any work which might be offered, a telegram to the supervisor being all that was necessary. At the time of the camp, however, the Glasgow Fair Holidays were in progress, and since all places of business in the town were closed it was very unlikely that any work could be offered. Further, the supervisor was in close touch with the firm, and during the camping period the managers and directors of the firm frequently visited the camp.

Recommended by the Court of Referees that the claim for benefit should be allowed. The Court were satisfied that the applicant was available for work during the period in question.

The Insurance Officer formally disagreed with the Court's recommendation in order to obtain an authoritative decision by the Umpire.

Decision.—"On the facts before me my decision is that the claim for benefit should be allowed.

"The camp in question was not an ordinary holiday-making arrangement, but was intended to exercise a beneficial influence on the boys attending it, and the chances of obtaining employment do not appear to have been diminished by attendance thereat. Provided, therefore, that the regulations for claiming benefit can be complied with, there need be no disqualification on the ground of failure to fulfil the requirements of Section 7 (1) (iii) of the Act."
