In group washing there is no point in letting every user of hot water make a blend of his own in the wash-basin. It eads to great waste. Hot water is best supplied to the washing fountains or the basins at a fixed temperature. If workpeople in a factory make the blended water for shower baths themselves there is also bound to be waste. Even when they have at last got the temperature to suit them, if somebody opens another valve elsewhere in the system, down goes the pressure and

Washing troughs supplied by a Leonard Valve in workers' washroom.

pressure or temperature occur in the supplies, the valve will deliver water only at the temperature for which it is set.

Leonard-Thermostatic Mixing Valves are coming into use more widely every day. In factories for showers, ranges of hand-basins and washing troughs, circular fountains, A.R.P. Cleansing Rooms. In Hospitals for showers, infants' baths, continuous treatment baths, surgeons' hand-basins.

Militia Camps and Military Barracks are fitted with them.

They have been adopted as standard equipment by thirty County Councils and two hundred Municipalities. All the Evacuation Camps and most of the

or through any bookseller

In peace time when fats are plentiful and cheap, this does not greatly matter but NOW when a scarcity exists it becomes the national duty of all to conserve available supplies.

Horton Liquid Soap served drop - by - drop from HORTON DISPENSERS ensures each user receiving a supply of fresh uncontaminated soap. A wide range of dispensers is available both tilting and rigid models, to suit all purposes.

HORTON LIQUID SCRUBBING SOAP

A concentrated and highly efficient soap with strong detergent qualities. Its action goes further than ordinary soap; it scours, disinfects, deodorises and removes grease and stains all at the same time. Amazingly economical—only a small cupful to a bucket of hot water is required. Supplied in 5, 10, 20 and 40 Gallon Returnable Drums.

The Mysto Pump is recommended by H.M. Home Office and has been supplied to that and

other Government Departments as well as to

Municipal Authorities, Railway Companies, Shipping Companies and the general public. It is all that is required for dealing with bombs and fires. Most ironmongers, hardwaremen and stores can supply the Mysto Pump.

STAFF SICKNESS A New Insurance at a Low Cost

To-day with the necessity for maximum output, in many cases with reduced staffs, the necessity for keeping the staff at work is even more apparent. Unfortunately, although much has been achieved in cutting down absenteeism due to illness, infections such as the common cold and contagious skin diseases such as impetigo, are still a real enemy to economic output.

One of the surest ways of passing on such infections is the communal towel, however frequently changed. Yet to-day every organization can insure itself against this danger at a low annual premium.

The Cresco Service provides a clean, dry, absorbent paper towel, which is dispensed from an attractive, hygienic container, used once and then thrown away.

CONSIDER THE COST OF THIS INSURANCE PREMIUM

Statistics show that, taking the average consumption of a number of different industries using the Cresco Service, each employee used 191.4 towels per annum at a cost of approximately 1/4 for the whole year. This low cost is only made possible by the supreme efficiency of the Cresco Service. Take out this insurance premium now. Install the Cresco Service, and reduce your staff sickness to a minimum.

EMPLOYMENT, WAGES, COST OF LIVING, AND TRADE DISPUTES IN DECEMBER.

EMPLOYMENT AND UNEMPLOYMENT.

EMPLOYMENT at 11th December showed an improvement as compared with 13th November.

Numbers Wholly Unemployed (excluding Persons normally in Casual Employment).—At 11th December, 1939, there were 1,170,798 persons on the registers of Employment Exchanges in Great Britain who were out of a situation. This was 42,547 less than at 13th November, 1939, and 303,221 less than at 12th December, 1938.

Numbers Temporarily Stopped.—At 11th December, 1939, there were registered as unemployed in Great Britain 143,065 persons who were on short time or otherwise temporarily suspended from work. This was 7,832 more than at 13th November, 1939, but 151,643 less than at 12th December, 1938.

Numbers unemployed normally in Casual Employment. —At 11th December, 1939, there were on the registers in Great Britain, 47,662 unemployed persons who normally seek a livelihood by means of jobs of short duration. This was 6,348 less than at 13th November, 1939, and 14,983 less than at 12th December, 1938.

Applicants for Benefit or Allowances.—The total of 1,361,525 persons on the registers at 11th December, 1939, included 1,187,910 applicants for benefit or allowances and 173,615 non-claimants. As compared with 13th November, 1939 there were reductions of 16,589 in the number of applicants for benefit or allowances and of 24,474 in the number of non-claimants.

Percentages Unemployed.—Among insured persons, aged 16–64, the percentage unemployed in Great Britain and Northern Ireland at 11th December, 1939, was $9\cdot1$ as compared with $9\cdot2$ at 13th November, 1939, and $12\cdot7$ at 12th December, 1938. For persons insured under the general scheme the corresponding percentages were $9\cdot1$ at 11th December, 1939, $9\cdot5$ at 13th November, 1939, and 12·9 at 12th December, 1938. For persons within the agricultural scheme the percentages were $7\cdot4$, $5\cdot1$ and $8\cdot9$ respectively.

Industries in which the Principal Variations occurred.— There were reductions, between 13th November and 11th December, in the numbers unemployed in the distributive trades, hotel and boarding house service, dock, harbour, etc., service, the cotton industry, printing and bookbinding, the entertainment, sport, etc., industries, motor vehicle, cycle and aircraft manufacture, engineering, ship building and repairing, and the road transport and shipping services. On the other hand, unemployment increased for seasonal reasons in agriculture, horticulture, etc., and the building industry; there was also some increase, due to temporary causes, in the numbers suspended from work in the coal mining industry.

WAGES.

In the industries for which statistics are regularly compiled by the Department, the changes in rates of wages reported to have come into operation in December are estimated to have resulted in an increase of about $\pounds 250,000$ in the weekly full-time wages of 2,155,000 workpeople, and in a decrease of $\pounds 350$ in those of $\pounds 6,000$ workpeople.

The principal groups of workpeople whose wages were increased included coal miners in Northumberland, Yorkshire, North Derbyshire, Cannock Chase, North Staffordshire, Leicestershire, and Warwickshire; iron puddlers and millmen in the Midlands; women and girls employed in federated engineering establishments; tinplate makers in South Wales, Monmouthshire and Gloucestershire; workers engaged in heating and domestic engineering; workers employed in cement manufacture; drug and fine chemical workers; paint, colour, and varnish workers; brickmakers; linen workers in Northern Ireland; workers employed in the ready-made and wholesale bespoke tailoring trades; shirtmakers; boot and shoe makers; building trade operatives; civil engineering construction workers; and employees of municipal tramway, trolleybus and omnibus undertakings in Great Britain. The decrease affected coal miners in Nottinghamshire.

The changes reported to have come into operation in 1939 are estimated to have resulted in a net increase of about £900,000 a week in the full-time wages of nearly $5\frac{1}{2}$ million workpeople, and in a net decrease of £10,000 in those of 68,000 workpeople.

COST OF LIVING.

At 1st January, the average level of retail prices of the commodities taken into account in the statistics compiled by the Ministry of Labour (including food, rent, clothing, fuel and light, and miscellaneous items) was approximately 74 per cent. above the level of July, 1914, as compared with 73 per cent. at 1st December, 1939.

The rise of one point in the index figure at 1st January, as compared with 1st December, was due mainly to increases in the prices of clothing and of gas. The index figure for food was the same at 1st January as at 1st December, viz., 57 per cent. above the level of July, 1914.

Further particulars are given on page 28.

TRADE DISPUTES.

The number of trade disputes involving stoppages of work, reported to the Department as beginning in December, was 40. In addition, 12 disputes which began before December were still in progress at the beginning of that month. The approximate number of workpeople involved in these 52 disputes, including workpeople thrown out of work at the establishments where the disputes occurred, was 16,000, and the aggregate duration of the disputes in December was about 36,000 working days.

The aggregate duration of all disputes in progress during 1939 was about 1,344,000 working days, and the total number of workpeople involved in these disputes was about 337,000.

January, 1940. THE MINISTRY OF LABOUR GAZETTE.

EMPLOYMENT, WAGES, HOURS OF LABOUR, COST OF LIVING, AND TRADE DISPUTES IN 1939.

EMPLOYMENT.

Employment in 1939 showed a marked improvement, on the whole, as compared with the previous year. After the usual seasonal increase in unemployment in January, there were substantial reductions in the numbers unemployed, month by month from February to August, and during the later months of that period the numbers in employment were the highest ever recorded. 14th August, the number of persons registered as unemployed in Great Britain showed a reduction of over 527,000, and the number of insured persons in employment showed an increase of about 650,000, as compared with 15th August, 1938. The outbreak of the war, however, while creating new demands for labour, caused some dislocation affecting the employment of workpeople in many directions, and resulted in a sharp increase in the numbers registered as unemployed in September and October. The increase occurred mainly among women and girls, and was partly due to the registration of evacuated women and others who were offering their services for work in connection with the war, a large proportion of whom had not previously been in insured employment. In November and December there was some reduction in unemployment, and at 11th December the total number registered as unemployed, though higher by about 130,000 than at 14th August, was 470,000 lower than at 12th December, 1938.

The Table below shows the estimated numbers of insured persons, aged 16-64, in employment in Great Britain at one date in each month from December, 1938, to August, 1939. The figures headed "Old Series" exclude, while those headed "New Series" include, workpeople insured under the agricultural scheme, and persons in the classes of domestic employments which were brought within the scope of the unemployment insurance scheme in April, 1938. Since the outbreak of the war, some of the information required for the compilation of monthly estimates of the numbers of insured persons in employment has not been available, and corresponding figures cannot, therefore, be given for dates subsequent to August,

39.					
ni hallo and harrist			Old Series	New Series	
1938			11 400 000	10.077.000

14th August	12.2.2.2.10	ALC: N	12.110.000*	12.944.000*	

In each month, from February onwards, the numbers in employment showed large increases as compared with those for the corresponding date in 1938, ranging from 97,000 in February to 699,000 in July, and the figures for May to August were the highest ever

The average numbers of insured persons, aged 16-64, in employment in Great Britain in each year since 1924 were as shown below. The figures given are those of the "Old Series," exclusive of persons within the agricultural scheme and persons in the domestic employments which first became insurable in April, 1938; corresponding figures for the "New Series," *i.e.* including these classes, are not available for any date prior to July, 1938.

1924	 9,526,000	1932	9,348,000
1925	 9,611,000	1933	9,681,000
1926	 9,062,000	1934	10,139,000
1927	 10,015,000	1935	10,377,000
1928	 10,019,000	1936	10,912,000
1929	 10,220,000	1937	11,497,000†
1930	 9,797,000	1938	11,410,000
1931	 9,421,000	1939 (Jan	11,769,000

Aug.).

The average for the first eight months of 1939 was considerably higher than that for the corresponding period of either 1938 or 1937, and was much higher than the average for any previous year.

The average percentage unemployed among insured persons, aged 16-64, in Great Britain and Northern Ireland in 1939 (including persons within the general and agricultural schemes and the special schemes for the banking and insurance industries) was 10.3, as compared with 12.6 in 1938. For the general scheme (including the special schemes) the percentages were 10.5 in 1939 and 12.9 in 1938; for the agricultural scheme the figure was 6.1 in both years.

As the agricultural scheme of unemployment insurance did not come into operation until May, 1936, the percentages of unemploy-ment among workpeople covered by that scheme are not available for any year prior to 1937. The following Table, however, gives for

* Approximate figure, exclusive of about 50,000 militiamen and reservists who had been called up for military training. + Comparability of the figures for 1937 and subsequent years with those for earlier years is affected by the introduction, in September, 1937, of a for earlier years is affected by the introduction, in September, 1937, of a revised procedure for counting the unemployed (see the October, 1937, issue of this GAZETTE, page 379). The figure of 11,497,000 given in the Table is the average of figures (a) for January to August, 1937, compiled on the basis of the old procedure for counting the unemployed, and (b) for September to December on the new basis. It is estimated that if the old procedure had been in force throughout the year the average for 1937 would have been about 11,480,000. If the new procedure had been in operation throughout that year, the average would have been about 11,530,000 and this figure is com-parable with the average of 11,410,000 for 1938.

each of the years 1921 to 1938 the average percentages unemployed among insured persons, aged 16-64, exclusive of agricultural workers, (a) in Great Britain and (b) in Great Britain and Northern Ireland :

	Perce	ercentage employed.			Percentage unemployed.		
Year.	Great Britain.	Great Britain and Northern Ireland.	Year.		Great Britain.	Great Britain and Northern Ireland.	
1921 1922 1923 1924 1925 1926 1927 1928 1929 1929	$ \begin{array}{c} 16 \cdot 6 \\ 14 \cdot 1 \\ 11 \cdot 6 \\ 10 \cdot 2 \\ 11 \cdot 0 \\ 12 \cdot 3 \\ 9 \cdot 6 \\ 10 \cdot 7 \\ 10 \cdot 3 \\ 15 \cdot 8 \end{array} $	$ \begin{array}{r} 17 \cdot 0 \\ 14 \cdot 3 \\ 11 \cdot 7 \\ 10 \cdot 3 \\ 11 \cdot 3 \\ 12 \cdot 5 \\ 9 \cdot 7 \\ 10 \cdot 8 \\ 10 \cdot 4 \\ 16 \cdot 1 \end{array} $	1931 1932 1933 1934 1935 1936 1937 1938 1939		$21 \cdot 1 21 \cdot 9 19 \cdot 8 16 \cdot 6 15 \cdot 3 12 \cdot 9 10 \cdot 6* 12 \cdot 5* 10 \cdot 3* $	21.3 22.1 19.9 16.7 15.5 13.1 10.8* 12.9* 10.5*	

The percentages unemployed at one date in each month of 1939, and the numbers of unemployed persons on the registers of Employ-ment Exchanges at the same dates, are given in Tables on page 18. At 14th August, 1939, the percentage unemployed among all insured persons, aged 16-64, in Great Britain and Northern Ireland was 8.5, as compared with 12.2 at 15th August, 1938; and at 11th December, 1939, it was 9.1, as compared with 12.7 at 12th December, 1938. The percentage unemployed at 14th August was the lowest recorded since the summer of 1927.

The total number of unemployed persons (insured and uninsured) on the registers of Employment Exchanges in Great Britain and Northern Ireland at 12th December, 1938, was approximately 1,919,000, of whom 1,619,000 were wholly unemployed (including persons normally in casual employment) and 300,000 were temporarily stopped. After a seasonal increase to 1,748,000 in January, the numbers wholly unemployed (including casuals) decreased to 1,078,000 in August. This was the lowest figure recorded for any date since November, 1929. After the outbreak of the war the total rose to 1,350,000 in October but declined to 1,295,000 in December, 1939, showing a decrease of 324,000 as compared with December, 1938.

The numbers temporarily stopped increased to 386,000 in January but thereafter declined to 197,000 in July. There were increases in August and September, followed by marked reductions in October and November; and although there was a further increase at 11th December, the total of 146,000 at the latter date was less than half of that for 12th December, 1938.

The number of unemployed men and boys on the registers of Employment Exchanges in Great Britain and Northern Ireland at 11th December, 1939, was approximately 992,000, showing a decrease of over 500,000 compared with 12th December, 1938. The total number of women and girls registered at 11th December, 1939, was 449,000, showing an increase of 23,000 as compared with a year earlier. This increase was due to a rise of over 39,000, between the same dates, in the number of women and girls who were not claiming unemployment benefit or allowances. The great majority of these had not previously been in insured employment, and a considerable proportion were offering their services for work in connection with the war.

The Table below shows for the years 1938 and 1939 the average Divisions as constituted prior to the provincial reorganisation of the Ministry of Labour and National Service on 25th August, 1939.† The special schemes for the banking and insurance industries, for which divisional figures are not available, are shown separately.

Comparison of the figures for 1937 and subsequent years with each other and with those for earlier years is affected by the introduction, in September, 1937, of the revised procedure for counting the unemployed, and by the inclusion from July, 1938, of persons in certain classes of domestic employ-ments first brought into insurance in April, 1938. The effect of these changes on the figures at the time of their introduction was, however, relatively slight (see diagram on page 19).
 † See page 335 of the September, 1939, issue of this GAZETTE.

January, 1940.

EMPLOYMENT IN THE PRINCIPAL INDUSTRIES. The improvement in employment from February to August industry experienced the usual seasonal fluctuations, but was slightly extended to nearly all the principal industries and services, but was most marked in those which were affected by the defence probetter on the whole than a year before. Employment in the boot and shoe industry showed little change on the whole during the first eight months of 1939, but there was gramme. The decline later in the year occurred mainly in certain industries which normally experience a seasonal recession in a marked improvement later. The average percentage unemployed the autumn and winter, including agriculture and horticulture, was 8.6 in 1939, compared with 12.4 in 1938. building, brickmaking, hotel and boarding house service, laundries and dry cleaning, the distributive trades, and road transport; but it extended also to a number of other industries, including the Leather Trades .- In the leather tanning, currying and dressing trade and the fur-dressing trade, and also in leather goods manuprinting trades, entertainments and sport, most of the woodworking facture, employment declined in January, but subsequently imindustries, some of the clothing trades, and stone and slate quarrying, proved; it was better on the whole in 1939 than in the previous year. which were adversely affected by the war. Building, Woodworking, etc.-After a setback in January employment in the building industry improved almost continuously until A summary of the course of employment in some of the principal industries is given below :----

Mining .-- In the coal mining industry employment showed little change in the first seven months of the year; but a considerable improvement began in August. There was some increase in unemployment in December owing to temporary causes. After the first quarter employment was consistently better than in the corresponding period of 1938, and at 11th December, 1939, the percentage rate of memployment was 8.5, as compared with 14.4 a year earlier. The average rate of unemployment was 11.1 per cent. in 1939 compared with 15.5 per cent. in 1938.

In the iron mining industry employment was slack at the beginning of 1939, but showed marked improvement in the course of the year; the percentage unemployed at 11th December, 1939, was 5.4, compared with 21.1 a year earlier. At slate quarries employment was worse in 1939 than in 1938, but there was some improvement in most of the other mining and quarrying industries.

Metal Trades .- In pig iron manufacture employment declined in January, 1939, but improved almost continuously throughout the rest of the year; it was much better on the whole than in 1938. The average percentage unemployed among insured workpeople was 11.8 in 1939, compared with 16.2 in 1938. Employment in iron and steel manufacture showed almost continuous improvement until September; during the last three months of 1939 there was little change, and employment was very good. The average percentage unemployed was 10.6 in 1939, compared with 21.2 in 1938.

Employment in the tinplate industry was very bad at the beginning of the year 1939, but improved rapidly until August; there was a decline in the next three months, but a slight improvement in December. Employment was very much better than in 1938. The average percentage rate of unemployment decreased from 39.7 in 1938 to 16.9 in 1939.

In most branches of the engineering industry employment showed a considerable improvement in 1939, especially during the later months of the year. The average percentage rate of unemployment in the engineering industry (excluding the motor vehicle, etc. industry) was 5.4 in 1939, compared with 7.3 in 1938. The corresponding percentages for the various sections of the industry were respectively: general engineering, 5.4 and 7.4; electrical, 3.7 and 5.1; marine 6.7 and 8.3; constructional 8.8 and 11.0. In the motor vehicle, cycle and aircraft industry the corresponding figures were 4.3 in 1939 and 6.8 in 1938.

Employment in the shipbuilding and ship-repairing industry improved slowly, but steadily, during the first eight months of 1939. A marked improvement began in September, and employment continued at a relatively high level. The average percentage unemployed was 17.2 in 1939, compared with 21.1 in 1938. Apart from a recession in January, employment in most of the other metal trades improved steadily throughout 1939 and was better on the whole than in 1938.

Textile Industries.—In the cotton industry, the improvement in employment which began in the last quarter of 1938 continued almost without interruption during 1939; both in the spinning and in the weaving sections employment was much better in 1939 than in the previous year; shortages of skilled workers, especially weavers, were reported during the latter part of the year. The average percentage rate of unemployment in the cotton industry as a whole fell from 26.3 in 1938 to 13.9 in 1939.

After a decline in January employment in the woollen and worsted industry showed considerable improvement in 1939, especially during the later months of the year; all sections of the industry shared in the improvement, and employment at the end of the year

In the industries for which statistics of changes in rates of wages are regularly compiled by the Department*, the changes reported during the year are estimated to have resulted in an aggregate was very good. The average percentage rate of unemployment declined from 19.6 in 1938 to 8.9 in 1939. In the carpet industry employment, after being fairly good on the whole during the first eight months of 1939, showed a marked net increase of about £900,000 in the weekly full-time rates of wages of nearly $5\frac{1}{2}$ million workpeople, and in an aggregate net decrease of about £10,000 in those of about 68,000 workpeople. By the end of August over 1,300,000 workers had received net increases estimated decline in September, but thereafter improved and was good in December. In the hosiery industry employment improved consider-ably in 1939. In the lace and silk and artificial silk industries to amount to £114,000 a week, and nearly 400,000 had sustained improvement during the first half of the year was followed by a net decreases amounting to £40,000 a week. From the beginning of sharp decline in the late summer; employment recovered, however, September to the end of the year, nearly $4\frac{3}{4}$ million workpeople in these industries, some of whom had already received increases earlier in the towards the end of the year. There was an almost continuous improvement in the jute industry; while in the linen trade employ-ment, though slack, showed a tendency to improve. In the textile year, had their rates of wages raised by an aggregate of nearly £830,000 a week. These figures are exclusive of changes in rates of wages bleaching, printing, dyeing, etc., trades employment improved ulture and certain other employments, in which there w considerably and short-time working was much reduced. also some increases in wage-rates during 1939. In all the industries (including agriculture) for which information is available, the Clothing Trades.- Employment in the tailoring and dressmaking average level of weekly full-time rates of wages at the end of 1939

trades followed the usual seasonal trend during the first eight months of 1939. On the outbreak of war there was a sharp decline, followed, however, by a recovery later. The average percentage unemployed in tailoring was 10·1 in 1939, compared with 13·3 in 1938; the corresponding figures for dressmaking were 11·3 and 7·3 respectively. An improvement in the shirt and collar trade between January and June was followed by a decline in July, but employment improved again during the last quarter of the year. In the glove and corset of 1939. On the outbreak of war there was a sharp decline, followed,

THE MINISTRY OF LABOUR GAZETTE.

trades employment showed improvement in 1939. Apart from a marked decline in September, employment in the hat and cap

3

September, but there was a decline, partly seasonal, during the last quarter of the year. Employment was better, on the whole, than in 1938; the average percentage unemployed among insured workpeople in the industry as a whole was 14.4 in 1939, compared with 15.1in 1938.

There was a considerable reduction in the numbers of persons recorded as unemployed in public works contracting during 1939; the average percentage rate of unemployment was 29.9 as compared with 36.7 in 1938. After a decline in January, employment in brick, tile and pipe manufacture improved until August, but a recession occurred in the latter part of the year; the average rate of unemployment was 10.0 per cent. in 1939, compared with 9.6 per cent. in 1938.

After a recession in January employment in the furnishing trades improved until August, but declined sharply in September; there was, however, some recovery in the last quarter of the year. With millsawyers and coachbuilders employment declined in January; thereafter it improved on the whole until the late summer, but declined again towards the end of the year.

Paper Manufacture, Printing and Bookbinding .- In paper manufacture the improvement in employment which began in the second half of 1938 continued throughout 1939, although there was a slight decline in October. After a setback in January, employment in printing and bookbinding improved until August; it declined in September and October, but improved in the next two months.

Pottery and Glass.-Employment in the pottery industry followed the usual seasonal trend; it remained slack on the whole; the average percentage unemployed was 20.5 in 1939, compared with 19.5 in 1938. In the glass trades there was a marked decline in January, but thereafter employment showed a continuous improvement.

Transport Services .- Employment among seamen improved during 1939, but with dock workers it was still slack. The average percentage unemployed in shipping service as a whole was 21.4 in 1939, compared with 24.2 in 1938; the corresponding figures for dock, harbour, etc., service were 24.7 and 26.6 respectively. Employment was again very good in tramway and omnibus service; in other road transport services it improved for the greater part of 1939, but declined to some extent in the last quarter of the year.

Agriculture.—The average percentage rate of unemployment among workpeople, aged 16-64, insured under the agricultural scheme, showed little change in 1939 as compared with 1938. In farming, forestry, etc. the percentage for 1939 was 6.4 compared with 6.5 in 1938; in market gardening, horticulture, etc. the corresponding figures were 7.8 and 7.9.

Other Industries and Services .- Employment in the distributive trades, although showing some decline in the autumn, was slightly better on the whole in 1939 than in 1938; the average percentages unemployed for the two years were 8.8 and 9.4, respectively. In the food and drink industries also employment was slightly better in 1939 than in the previous year. In hotel, boarding house, etc. service and in entertainment, sport, etc. improvement during the first eight months of 1939 was followed in September by a sharp decline, and the level of unemployment continued very high during the last quarter of the year.

RATES OF WAGES.

During the first eight months of 1939 there was little change in the general level of wage rates. After the outbreak of the war, however, and particularly during November and December, increases in wages were granted in many industries, mainly on account of the rise in the cost of living.

is estimated to have been between 4 and $4\frac{1}{2}$ per cent. higher than at the end of 1938. This is the largest increase in rates of wages recorded in any year since 1920.

The following Table shows the approximate numbers of workpeople affected by the changes in rates of wages reported to the Department in 1939, and the net amount of the change in their weekly rates of wages, in each of the principal groups of industries for which detailed statistics are available.* Corresponding figures are also given for 1938.

PRINCIPAL CHANGES IN 1939.

It will be seen from the above Table that of the workpeople whose rates of wages were changed in 1939, all but a very small proportion obtained a net increase during the year. In the following paragraphs particulars are given of the principal changes in rates of wages in individual industries.

In the coal mining industry the changes in wage rates during the first eight months of the year varied in different districts, in accordance with the fluctuations in the proceeds of the industry. At the end of August they showed increases, as compared with the beginning of the year, in Leicestershire, Warwickshire, North Staffordshire, Cannock Chase, the Forest of Dean, and Scotland, and reductions in Northumberland, Nottinghamshire, North Derbyshire and Somerset; in the principal other districts rates of wages were at the same level as at the beginning of the year. In November a general flat-rate increase was granted, of 8d. per shift to men and of 4d. per shift to youths and boys, with the result that the level of wage rates at December. 1939, was higher by 5 to 10 per cent., for most of the workers, than at December, 1938.

In the chemical industries workers engaged in the manufacture of heavy chemicals received increases early in October of 1d. to 13 d. an hour for adult male time workers, and drug and fine chemical workers received increases, in December, of 4s. a week for men and 2s. 6d. a week for women. In the pottery industry flat-rate increases were granted, in November, of 8d. a day for men, 6d. a day for women, and 4d. for workers under 21 years of age.

In the heavy iron and steel industry, in which wages fluctuate in accordance with movements in selling prices, the changes during the first eight months of the year, for workers engaged in steel melting and rolling, resulted in a small net reduction in most districts. In November, however, a decrease due under the sliding-scale was waived, and future increases were anticipated to the extent of 10 per cent., with the result that there was a net increase during the year of about 5 per cent. In the case of blastfurnace workers in most districts. iron puddlers and millmen in the North of England and Scotland. and the higher-paid workers in steel sheet and tinplate manufacture, there were net decreases during the first eight months of the year, and at the end of 1939 the level of wage rates was slightly lower than at the beginning of the year. In the engineering industry there was a general increase, in June, of 2s. a week for men, with proportionate amounts for apprentices, boys and youths; and alterations and adjustments in the standard scales of pay for women and girls resulted in increases of various amounts in October and December. In the shipbuilding and repairing industry a general increase of 2s. a week for men on time work and of approximately 4 per cent. for those on piece work was granted in September in settlement of a claim made in July.

In the textile industries, workpeople in the preparing and spinning section of the cotton industry received an increase in October of 221 per cent. on standard piece price lists (equivalent, in most cases to an increase of 12.64 per cent. on current wages), with additional

of 3s. and 2s. a week on time rates for men and women respectively, and of 4¹/₄ per cent. on piece rates. In the ready-made and wholesale bespoke tailoring trades, rates of wages were increased, also in December, by 1¹/₄d. an hour for men and ³/₄d. an hour for women.

increases to certain classes of workers, including ring spinners, ring

doublers and piecers; while workpeople in the manufacturing

section received an increase of 5 per cent. on current wages in November, with a further increase of $7\frac{1}{2}$ per cent. to operate on 1st

January, 1940. Woollen and worsted operatives in Yorkshire received

Building trade operatives received a general increase on 1st December of $\frac{1}{2}d$. an hour, for both craftsmen and labourers, except in the Liverpool and Birkenhead district where wage rates were increased in January, 1939. In addition there had been increases in certain districts in February, ranging from $\frac{1}{2}d$. to $1\frac{1}{2}d$. an hour, as a result of upgradings under the grading scheme of the National Joint Council. In the civil engineering construction industry, rates of wages were increased by $\frac{1}{2}$ d. an hour in December, and in Scotland there was an additional increase of 1d. or 1d. an hour as from 1st January, 1939.

In the transport industries, seamen were granted "war risk noney" of £3 a month or 14s. a week in September, and dock labourers received an increase of 1s. a day or 6d. per half-day in November. In the railway service there were increases of 1s. or 2s. a week in July for certain classes of lower-paid workers in the traffic grades, resulting from the adoption of a minimum rate of 45s. a week. In October the minimum was increased to 50s. in London, 48s. in

industrial areas and 47s, in rural areas. Other classes of workers whose rates of wages were increased during the first eight months of 1939 included flour millers, outside steelwork erectors, and tool makers at Sheffield. Since the beginning of September increases have also been granted to shale miners and oil workers in Scotland; brick makers; glass bottle workers in Yorkshire; cement workers; cast stone and cast concrete product workers; paint, colour and varnish makers; soap and candle makers; match makers; tinplate makers (lower-paid workers); lock, latch and key makers; file makers at Sheffield; heating, ventilating and domestic engineers; workers in the precious metal trades at Sheffield and Birmingham; jute and flax and hemp workers; silk workers at Leek and Macclesfield; linen workers in Northern Ireland, workers in the wholesale mantle and costume trade; workpeople employed in the manufacture of beet sugar; workpeople employed in seed rushing : furniture trade operatives in many districts; coopers; electricity supply workers; employees of tramway and omnibus undertakings; leather tanners and curriers and workers employed in various branches of the made-up leather trade; and workers in the non-trading departments of local authorities in London and certain other districts. In electrical cable making, and in the paper-making industry, there were increases in both periods. In chain making, and in brush and broom manufacture, there were increases and decreases of equal amounts prior to September and increases after that date. There were also ome increases in the baking trade in England and Wales in September, and in the rubber manufacturing trade in Great Britain in November, as a result of the application of the Trade Boards Acts to these trades and the adoption of general minimum rates of wages.

Agricultural Labourers and Government Industrial Employees .- The statistics given in the foregoing Table are exclusive of changes in the rates of agricultural labourers, Government employees, shop assistants, clerks and domestic servants. As regards agricultural abourers, in 6 of the 47 Agricultural Wages Committee Areas in England and Wales there were increases, during the first eight months of 1939, of 6d. or 1s. a week in the minimum rates fixed under the Agricultural Wages (Regulation) Act, 1924, for adult male labourers. From the beginning of September to the end of the year, increases ranging from 1s. to 3s. 6d. a week were granted in 30 areas. At the end of 1939, the average of the minimum rates for ordinary abourers was 35s. 6d. a week, compared with 34s. 7d. at the end of 1938 and 34s. 9d. at the end of August, 1939. In Scotland the minimum rates of wages fixed under the Agricultural Wages (Regulation) (Scotland) Act, 1937, remained generally unchanged during the year 1939. As regards Government industrial employees, a number of classes of workpeople employed in H.M. Dockyards and other Government industrial establishments received increases in June, usually of 2s. a week.

INDUSTRIES IN WHICH THERE WAS NO GENERAL CHANGE IN 1939.

Among the more important groups of workpeople whose rates of wages remained generally unchanged during 1939 were quarry workers in many districts; railway shopmen; brass workers in Birmingham and district; vehicle builders; lace makers; carpet makers; printers and bookbinders; road motor goods transport workers; manual workers employed in the non-trading departments of local authorities in many areas; waterworks employees in various areas; and gas workers. The statutory minimum rates fixed by many of the Trade Boards (e.g. those for cutlery, hollow-ware, tin box, laundering, retail bespoke tailoring, dressmaking, boot and shoe repairing, stamped or pressed metals, and milk distribution) also remained unchanged. In some of these cases, however, increases have been arranged to take effect in January, 1940.

January, 1940.

The following Table shows the approximate numbers of workpeople, in the industries and services for which detailed statistics available,* whose rates of wages were increased or reduced (so far as reported) in each of the years 1925–1939, and the net amount of increase or decrease in their weekly rates of wages :---

Approximate Number of separate Individuals† reported as affected by			Estimated Amount o Rates o	Estimated Net Weekly Increase (+) or Decrease (-) in Rates of		
	Net Increases.	Net Decreases.	Increases.	Decreases.	Wor	kpeople ected.
The second second	1 Contraction	1	£	1 £	1	£

1926	420,000	740,000	133,000	83,700	+	49,300
1927	282,000	1,855,000	30,700	388,500	-	357,800
1928	217,000	1,615,000	21,800	163,800	-	142,000
1929	142,000	917,000	12,900	91,700	-	78,800
1930	768,000	1,100,000	59,500	116,100	-	56,600
1931	47,000	3,010,000	5,150	406,300		401,150
1932	33,500	1,949,000	2,600	251,800	-	249,200
1933	179,500	894,000	17,250	82,500	101 - 1	65,250
1934	1,344,000	85,500	95,500	4,000	+	91,500
1935	2,366,500	49,600	198,900	6,800	+	192,100
1936	4,062,400	800	493,075	175	+	492,900
1937	5.161.200	4,400	788,250	1,350	+	786,900
1938	2,381,500	322,200	262,100	18,800	+	243,300
19391	5,481,900	68,200	910,000	10,800	+	899,200

In view of the limitations to which attention has been drawn above.* and especially of the fact that certain large groups of workpeople (notably agricultural labourers) are not covered by the statistics, the figures given in this Table should not be regarded as affording more than a general indication of the movement of wages in any year in comparison with that in other years, and special significance should not be attached to small differences in the amount of change as between one year and another. It will be seen, however, that the numbers of workpeople affected by increases in rates of wages in the industries covered by the statistics, and the net amount of increase in weekly rates of wages, were greater in 1939 than in any previous year in the period covered by the Table.

HOURS OF LABOUR.

and between 1st September, 1959, and 1st Sandary, 1910, the total increase was nearly 14 per cent. raising the index-figure from 38 per cent. to 57 per cent. over the level of July, 1914. The following Table compares the average retail prices at 1st January, 1940, with those immediately before the outbreak of war (*i.e.*, those on 1st September, 1939) and those a year ago. The total number of workpeople whose normal weekly hours of labour were reported as having been changed during 1939‡ in the industries and services for which statistics are regularly collected§ was about 380,000. The normal working time of these workpeople was reduced by a little over $3\frac{1}{2}$ hours a week, on average. The largest group affected were juvenile workers under 16 years of age in the great majority of manufacturing industries, whose weekly hours were reduced to a maximum of 44 as from 1st July, 1939, under one of the provisions of the Factories Act, 1937. Other workpeople whose normal weekly hours were reduced included surface workers, not handling coal, employed at coal mines in Cumberland, and certain classes of surface workers employed at shale mines in

The following Table shows the number of workpeople, in the industries covered by the statistics,§ whose hours of labour were reported as changed in each of the years 1925 to 1939, and the aggregate net amount of the change :---

Year.			Approximate Number of Workpeople whose Hours of Labour were					
		Increased.	Reduced.	Increase (+) c Decrease (-) i Weekly Hour				
1925		1,300	3,925	-	11,750			
1926		934,200	340	+	3,984,650			
1927		18,700	1,700	++	59,000			
1928		1,400	2,000	-	200			
1929		4,050	1,050	+	8,750			
1930		13,175	349,225	- 1	873,500			
1931		294,000	111,000	+	142,000			
1932		6,000	3,750	+	7,000			
1933		2,500	12,500	- 11	36,000			
1934		520	5,000	- 1	11,500			
1935		2,450	43,700	- 1	153,850			
1936		600	160,600	125-1	804,500			
1937		1,500	390,650	4.25	960,000			
938		1,950	166,650	2	371,100			
19391			380,000	-	1.388.000			

As regards the individual articles included in the above Table. and 1931 were mainly coal miners. In 1937 they were mainly printers, coal miners and flour millers, and in 1938 mainly boot and there were no noteworthy changes in food prices in the first eight months of the year, apart from the increase in prices of sugar, partly due to the increased duty of ¹/₄d. per lb. in April. During the war period there were marked increases in the prices of sugar, bacon, shoe operatives. eggs, fish, cheese and butter. There was also an advance in the prices of beef and mutton. The prices of flour, bread, tea, milk, COST OF LIVING. margarine and potatoes showed only small increases, on the average. During the first eight months of 1939, there was relatively little Of the increase of 11d. per lb. in the prices of sugar since the outbreak of war, 1d. was due to the increased duty; the increases in the prices of eggs were largely seasonal.

change in the general level of the cost of living, the movements of the official index-number ranging within the narrow limits of 53 to 56 per cent. above the level of July, 1914. At 1st September, as at the beginning of the year, the figure was 55 per cent.

After the outbreak of the war there was a marked increase, the index-figure rising to 65 per cent. above the level of July, 1914, at

See footnote * in the second column on page 3.
* In addition to the workpeople for whom figures are given in this Table there were considerable numbers in most years whose wages during the year were increased and reduced by equal amounts.
* The figures given for 1939 are preliminary and subject to revision.
* The statistics are exclusive of changes affecting agricultural labourers, Government employees, domestic servants, shop assistants and clerks. Clothing .-- Retail prices of working-class clothing, and clothing materials, showed little change in the first eight months of 1939. * Where this kind is seldom sold, the returns relate to another kind locally

CHANGES IN WAGES IN THE YEARS 1925-1939.

30th September, 69 per cent. at 1st November, 73 per cent. at 1st December and 74 per cent. at 1st January, 1940. The total rise of 19 points from 1st September, 1939, to 1st January, 1940, is equivalent to about 12 per cent. on the level of prices at the outbreak of the war. The following Table shows, month by month during the period under review, the index figures for each of the five groups of items (food, rent, clothing, fuel and light, and miscellaneous other items) included within the scope of the statistics :--

Average Percentage Increase in Retail Prices, Rents, etc., over the level of July, 1914.

Date.	Food.	Rent (in- cluding Rates).	Clothing.	Fuel and Light.	Other Items included.	All Items included

1940. 1st January	57	62	150	100	90	74

The index-figure for 1st January, 1940 (74 per cent. above the level of July, 1914) is the highest recorded for any date since January, 1927.

Food.—At the beginning of 1939 the index-figure relating to the average level of retail prices of food was 38 per cent. above the level of July, 1914. At 1st September, 1939, it was the same as at the beginning of the year, after having declined early in the year and risen in July, mainly owing to seasonal movements in the prices of eggs and potatoes. In the first month of the war there was a marked increase, the index-figure of food prices indicating a rise of about 9 per cent. during the month. In the following months the increase was smaller, and between 1st September, 1939, and 1st January, 1940, the total

Rents.—There was little movement, on the average, in workingclass rents (including rates) during 1939. The average increase, as compared with July, 1914, was 61 per cent. at the beginning of the year and 62 per cent. at the end.

^{*} See footnote * in second column on page 3.

See footnote - in second could on page 3.
 The figures given for 1939 are preliminary and subject to revision.
 Changes affecting workpeople employed in railway engineering workshops are included under " Engineering " and not under " Transport."

an increase, in November, amounting generally to 11.84 per cent. for timeworkers and 10.87 per cent. for pieceworkers. In the hosiery manufacturing industry in the Midlands the cost-of-living bonus was increased in November from 6d. to 7d. on each shilling earned. In the textile bleaching, dyeing and finishing trades, in which wages fluctuate under the operation of cost-of-living sliding-scales, there were small net increases in the first eight months of the year, followed by a larger increase in November, with the result that at the end of the year wages had advanced by about 6 per cent. in Yorkshire, and by 3s. 1d. or 3s. 3d. a week for men and 1s. 11d. a week for women in other districts, as compared with December, 1938. In boot and shoe manufacture, increases were granted, in December,

remaining, as nearly as can be estimated, between 105 and 110 per cent. above the level of July, 1914. During the four months 1,334,000 in 1938. September to December, however, prices rose, on average, about 20 per cent. For men's suits and overcoats the average increase during the four months was about 11 per cent., for woollen materials, underclothing and hosiery 25 per cent., for cotton materials and hosiery 26 per cent., and for boots and shoes 22 per cent. Owing to the wide range of quotations, to changes in qualities, and to variations in the extent to which different articles have been affected by price-changes, it is impracticable to make an exact comparison of the retail prices of clothing and clothing materials over a long period of years, but on the basis of the available information it is estimated that at the end of 1939 the average rise over the level of July, 1914, was about 150 per cent.

Fuel and Light.—Retail prices of coal, which early in 1939 were about 100 per cent. above the level of July, 1914, were reduced to between 85 and 90 per cent. above that level in the summer. By 1st September there had been a slight advance, and between 1st September and 1st January there was a rise of about 7 per cent., on average, to about 108 per cent. above the level of July, 1914.

In the pre-war period of 1939 the average price of gas rose slightly, from about 50 per cent. above the 1914 level to about 55 per cent. above it. In November and December there were substantial increases, and at the end of the year the price of gas averaged about 15 per cent. higher than at 1st September and about 78 per cent. higher than in 1914.

The prices of oil, candles and matches remained practically unchanged up to the outbreak of the war; between then and the end of the year the prices of oil rose by 19 per cent., of candles (cheap wax) by 59 per cent., and of matches by 7 per cent., on the average.

Miscellaneous Other Items included .- In this group of items the most important changes in 1939 were in the prices of tobacco and cigarettes, following increases in duty imposed in April and September; over the whole year, the average increase in the prices of tobacco and cigarettes was about 24 per cent. Prices of domestic ironmongery, brushware and pottery remained practically unchanged during the first eight months of 1939 and subsequently rose by about 14 per cent. Changes during the year in the prices of other items included in this group, viz. soap, soda, newspapers and fares were relatively unimportant.

Comparison with previous years.—The following Table compares the averages of the percentage increases recorded for the beginning of each of the twelve months of 1939 with the corresponding averages for the years 1924 to 1938 :—

Average Percentage Increase over the level of July, 1914.

Year.	Food.	Rent (including Rates).	Clothing.	Fuel and Light.	Other Items included.	All Items included.
1924 1925 1926 1927 1928 1929 1930 1931 1932 1933 1934 1935 1934 1935 1937 1938 1939	$\begin{array}{c} \% \\ 70 \\ 71 \\ 64 \\ 60 \\ 57 \\ 54 \\ 45 \\ 31 \\ 26 \\ 20 \\ 22 \\ 25 \\ 30 \\ 39 \\ 40 \\ 41 \end{array}$	$\begin{array}{c} 9_{6}'\\ 47\\ 47\\ 49\\ 51\\ 51\\ 52\\ 53\\ 54\\ 56\\ 56\\ 56\\ 56\\ 56\\ 56\\ 56\\ 56\\ 56\\ 60\\ 62\\ \end{array}$	% 125 129 121 114 119 118 118 111 96 89 84 89 84 86 87 89 102 109 114	% 86 82 105 83 69 71 72 74 72 70 70 70 70 70 74 81 81 84	80 80 80 80 80 80 77 75 73 72 75 70 70 70 70 70 74 75 79	$\begin{array}{c} \% \\ 75 \\ 76 \\ 72 \\ 667 \\ 66 \\ 64 \\ 58 \\ 47 \\ 44 \\ 40 \\ 41 \\ 43 \\ 47 \\ 54 \\ 56 \\ 58 \end{array}$

The foregoing figures are designed to indicate the average per-centage increase in the cost of maintaining unchanged the standard of living prevailing among working-class households prior to August, 1914, no allowance being made for the effect of any alterations in the standard since that date.

TRADE DISPUTES.*

The number of disputes involving stoppages of work, reported to the Department as having begun in 1939 in Great Britain and Northern Ireland was 930, as compared with 875 in the previous year. The great majority of the stoppages affected only individual establishments.

The number of workpeople directly involved (*i.e.*, on strike or locked out) in the disputes beginning in 1939 was about 245,000, while about 91,000 were indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, but not themselves parties to the disputes). In addition about 1,000 workpeople were involved, either directly or indirectly, in 8 disputes which began in 1938 and extended into 1939. The total number of workpeople involved, either directly or indirectly, in all disputes which were in progress in 1939 was thus about 337,000[†]; the corresponding total for 1938 was 275,000.†

At the establishments where disputes were reported the aggregate time lost in 1939 on account of disputes in progress during the year

The disputes of 1939 were approximately evenly proportioned as between the eight pre-war months and the four wartime months.

The following Table shows by industries the number of disputes reported as beginning in 1939 and in 1938, together with the approximate number of workpeople involved in, and the estimated aggregate duration of, all disputes in progress in each year :---

		1939.	44.53		1938.	- Martin

All otherIndustries		4,000	23,000	28	3,300	39,000
Total	930	336,600*	1,344,000	875	275,300*	1,334,000

Of the total numbers of workpeople shown above as involved in all disputes which were in progress in the two years, approximately 91,500 in 1939 and 63,400 in 1938 were only *indirectly* involved (*i.e.*, thrown out of work at the establishments affected, but not themselves parties to the disputes).

As will be seen from the above Table, disputes in the coal mining industry accounted for more than two-fifths of all the disputes recorded for each of the years 1939 and 1938, and for over three-fifths of all the workpeople involved in the disputes; nearly all of these stoppages, however, affected only individual collieries.

Principal Disputes in 1939 .- There were no disputes of major importance during 1939, and in only four instances were 5,000 or importance during 1939, and in only four instances were 5,000 or more workpeople involved. A stoppage of tinplate workers at a number of establishments in South Wales and Monmouthshire affected about 7,000 employees, and about 40,000 working days were lost. Nearly 6,000 workpeople at collieries owned by one firm in Glamorganshire were involved in a dispute which lasted three days. About 25,000 working days were lost by about 5,400 building trade operatives during a dispute in Dorsetshire. Five thousand colliery workers employed by several firms in North Wales were involved in a short stoppage in which 12,500 days were lost. were involved in a short stoppage in which 12,500 days were lost. One protracted dispute affecting nearly 5,000 employees of a London firm of electrical engineers and cable makers resulted in the loss of about 60,000 working days.

Summary for 1924-39.—The following table gives comparative figures for each of the years 1924 to 1939 :—

Year.	Number of Disputes beginning in	Numl	Approximate Aggregate Dura- tion in Working Days of all Dis- putes in progress		
Year.		Directly.	Indirectly.	Total.	during Year (to nearest 10,000).
1924	710	558,000	55,000	613,000	8,420,000
1925	603	401,000	40,000	441,000	7,950,000
1926	323	2,724,000	10,000	2,734,000	162,230,000
1927	308	90,000	18,000	108,000	1,170,000
1928	302	80,000	44,000	124,000	1,390,000
1929	431	493,000	40,000	533,000	8,290,000
1930	422	286,000	21,000	307,000	4,400,000
1931	420	424,000	66,000	490,000	6,980,000
1932	389	337,000	42,000	379,000	6,490,000
1933	357	114,000	22,000	136,000	1,070,000
1934	471	109,000	25,000	134,000	960,000
1935	553	230,000	41,000	271,000	1,960,000
1936	818	241,000	75,000	316,000.	
1937	1,129	388,000	209,000	597,000	3,410,000
1938	875	211,000	63,000	274,000	1,330,000
1939	930	245,000	91,000	336,000	1,340,000

The magnitude of the figures for 1926 was due to the prolonged general dispute in the coal mining industry and the "general strike".

* For the purpose of these totals workpeople are counted in the total for each year as many times as they were involved in a dispute during that year. The resulting duplication is mainly confined to the coal mining industry, with the addition in 1926 of other industries involved in the "general strike." Since 1926 the more considerable duplications in the totals for all industries have been as follows:--1931, 57,000; 1932, 70,000; 1935, 59,000; 1936, 66,000; 1937, 181,000; 1938, 66,000; 1939, 90,000.

In the issues of this GAZETTE for November and December, 1939, CHANGES IN INDIVIDUAL INDUSTRIES, 1938-1939. statistics were given showing the changes during the period from The Table below shows the increases between June, 1938, and 1923 to 1939 in the estimated numbers of persons insured against June, 1939, in the estimated numbers of insured persons, aged 14-64, in employment in Great Britain and Northern Ireland in the unemployment, and in their industrial and geographical distribution. The figures related to the total numbers insured at the beginning of ndustries in which the greatest numerical changes occurred :----July, including the unemployed as well as those in employment, as estimated on the basis of the information obtained at the annual exchange of unemployment books. Those statistics furnish a valuable indication of the expansion

or decline of industry, both generally and in particular areas, over a term of years, but as a more precise measure of variations during shorter periods there is an advantage in using figures representing the number of insured persons in employment.

The numbers of insured persons recorded as unemployed are regularly ascertained in respect of a date about the middle of each month, and an approximate indication of the changes, from year to year, in the numbers of insured persons in employment can accordingly be obtained by deducting the numbers unemployed in June of each year from the estimated numbers insured at the beginning of July. The figures given below, and in the detailed Table on pages 26 and 27, have been compiled on this basis, by the simple deduction of the numbers unemployed from the numbers insured, no allowance having been made for persons absent from work through sickness and other forms of unrecorded non-employment, or for those involved in trade disputes. As comparable figures for the agricultural scheme are not available over an extended period, persons insured under that scheme have been excluded throughout.

CHANGES BETWEEN JUNE, 1938, AND JUNE, 1939.

aged 14 to 64 (exclusive of agricultural workers) in employment in Great Britain and Northern Ireland, computed on the basis indicated above, increased by 630,000, or 4.8 per cent. The following Table gives figures for the various age groups for which they are available :---

Great Britain and Northern Ireland

etween June, 1938, and June, 1939, the numbers of insured males in employment increased by 401,000, or over 4 per cent., and the in employment increased by 401,000, or over 4 per cent., and the numbers of females by 229,000, or nearly 6 per cent. The large increases in the 18-20 age-group were due mainly to the increase in the total population of those ages, as a result of the rise in the birth-rate in the period immediately after the last war, while in the age-groups 14-15 and 16-17 there were considerable decreases in the total numbers insured, due to the fall in the birth-rate after the abnormal post-war increa

The increase of 630,000, between June, 1938, and June, 1939, in the total number in employment, resulted mainly from a reduction of 465,000 in the numbers of insured persons unemployed, the balance being accounted for by the absorption into employment of a net increase of 165,000, during the twelve months, in the total number of persons insured against unemployment. The following Table gives corresponding figures for males and females, respectively :---

Increase in Insured Persons aged 14-64 in Employment.

a souther apple a <u>n err</u> picture and when a	Males.	Females.	Total.
Increase between 1938 and 1939 in total numbers insured Decrease between June, 1938, and June, 1939, in numbers unemployed	81,000 320,000	84,000 145,000	165,000 465,000
Total increase between June, 1938, and June, 1939, in numbers in employ- ment	401,000	229,000	630,000

Of the increase in the numbers of males in employment, approximately four-fifths was represented by a reduction in unemployment. Among females, over three-fifths of the total increase was represented by a reduction in the numbers unemployed. The balance in each case was accounted for by the absorption into employment of the net increase during the year in the total numbers insured.

CHANGES IN THE NUMBERS OF INSURED PERSONS IN EMPLOYMENT, 1923-1939.

ANALYSIS BY INDUSTRIES AND AREAS.

Between June, 1938, and June, 1939, the numbers of insured persons

	Estimated numbers of insured	Increase as compared with June, 1938.			
Industry.	persons aged 14–64 in employ- ment at June, 1939.	Number.	Per cent.		
Motor vehicles, cycles and aircraft Cotton	468,090 341,830 269,970 661,360 174,520 205,150 422,750 207,930 755,280 237,860 283,550 188,430 82,740 24,870 126,700 135,010	85,210 70,270 45,980 34,020 32,840 30,870 29,230 29,130 24,000 22,860 21,990 12,060 11,680 11,640 11,300 11,140	22:3 25:9 20:5 5:4 23/2 17.7, 7:4 16:3 3/3 10:6 8:4 6:8 16:4 8:0 9:8 9:0		
Linen	63,650	10,800	20-4		

The industry showing the greatest increase, between June, 1938. and June, 1939, in the numbers in employment, was motor vehicle. cycle and aircraft manufacture, in which employment has been expanding rapidly for several years. There were also marked increases in the numbers in employment in some other industries and services affected by the defence programme, in some of the principal textile industries, and in coal mining.

The largest increase occurred in the manufacturing group of industries (471,740, or 7.7 per cent.); this group accounted for three-quarters of the total increase between June, 1938, and June, 1939. There were also substantial increases in the National and Local Government services (60, 100, or 10.6 per cent.), in the building and contracting industries (47,580, or 4.1 per cent.), and in the mining and quarrying group (23,680, or 2.9 per cent.). The changes in the other main groups were relatively small.

DIVISIONAL CHANGES, 1938-39.

The next Table shows the changes between June, 1938, and June, 1939, in the estimated numbers of insured persons in employ-ment in each of the main administrative areas. For persons insured under the special schemes for the banking and insurance industries an analysis on this basis is not available, and the numbers of these persons are accordingly shown separately in the Table.

There was an increase between June, 1938, and June, 1939, in the number of insured persons in employment in each Administrative Division, and in every case the increase was greater-in most cases much greater-than the corresponding increase in the total numbers insured. The numerical increase was greatest in the North-Western Division, where it amounted to 140,000 (7.5 per cent.), but the greatest relative increases occurred in Wales (11.3 per cent.) and Northern Ireland (10.9 per cent.). The London and South-Eastern Divisions had the smallest relative increases, viz., 1.8 per cent. and 2.7 per cent. respectively. In the other Divisions the increases varied between 4 and 6 per cent.

* The figures for the fishing industry do not include share fishermen, who are The figures for the fishing industry do not include share instermen, who are outside the scope of the unemployment insurance scheme. † The figures are exclusive of considerable numbers of persons excepted from unemployment insurance under certificates of exception. ‡ This group includes professional services; entertainment, sport, etc.; hotel, public house, restaurant, boarding house, etc., service; laundries; and dyeing and dry cleaning.

CHANGES IN THE PERIOD 1923-39.

As boys and girls under 16 years of age were not insurable against unemployment until September, 1934, comparable figures for earlier dates are available only in respect of insured persons aged 16 years and over. In the following Tables, and in the detailed Table on pages 26 and 27, figures are given indicating the changes between 1923 and 1939 in the estimated numbers of such persons in employment, as shown by the figures for June of each year.

The changes are measured from June, 1923, because that is the earliest date for which comparable figures for individual industries are available. The proportions of insured workers unemployed at any particular date vary considerably in different industries, and while employment in the great majority of industries at June, 1923, was not so greatly affected by abnormal circumstances as to render that date unsuitable as a basis for comparison, it should be borne in mind that the relative levels of the index numbers for the different industries in subsequent years, as given in the Table on pages 26 and 27 may be affected by differences in the state of employment in those industries in June, 1923.

In the Table below, index numbers are given showing the changes in the estimated total numbers of insured persons, aged 16-64 years, (exclusive of agricultural workers) in employment in June of each year since 1923 (except 1926, when employment was affected by the general stoppage of work in the coal mining industry) :---

		Numbers = 100).		Index Numbers $(1923 = 100).$		
Year.	Great Britain	Great Britain and Northern Ireland.	Year.	Great Britain	Great Britain and Northern Ireland.	
1923 1924 1925 1927 1928 1929 1930	100.0 103.8 103.1 108.6 107.3 110.4 106.2 101.8	100.0 103.8 102.9 108.6 107.2 110.5 106.1 101.7	1932 1933 1934 1935 1936 19377 19387 19397	100.8 105.2 109.6 111.9 117.7 124.8 121.8 128.2	100.7 105.0 109.5 111.7 117.6 124.6 121.5 128.1	

During the period covered by this Table, certain changes have taken place in the scope of the unemployment insurance scheme. In particular, in January, 1928, persons aged 65 and over, who had previously been included, ceased to be insurable against unemployment; and in April, 1938, certain classes of domestic employments, which had not hitherto been insurable, were brought within the scheme. Data were available, however, as to the approximate numbers of persons affected by these changes, and in compiling the index numbers given in the above Table the necessary adjustments have been made, so as to provide a comparable series of figures unaffected by the changes in the scope of unemployment insurance.

Comparison of the estimated numbers of insured persons in employment in June, 1937, and June, 1938, obtained by subtracting, from the numbers insured, the numbers recorded as unemployed at those dates, is also affected by the introduction in September, 1937, of a revised procedure for counting the unemployed, under which persons on the registers subsequently found to have been in employment on the day of the count are excluded from the figures (see page 379 of the October, 1937, issue of this GAZETTE). In September, 1937, however, the numbers unemployed were obtained on both the old and the new basis, and these figures have been utilised to enable the index numbers for 1938 and 1939 to be linked with those for earlier years on an approximately comparable basis.

The total numbers insured, aged 16-64, in Great Britain and Northern Ireland (particulars of which were given on pages 382-3 of the November, 1939, issue of this GAZETTE), increased continuously throughout the period 1923-39, and were over 26 per cent. higher in 1939 than in 1923. It will be seen from the foregoing Table that the numbers in employment increased by over 10 per cent. between

* The figures relate to the areas as at June, 1939(*i.e.* prior to the alteration in Divisional Areas which was made on 24th August, 1939). † See first two paragraphs of text below the Table.

June, 1923, and June, 1929, but subsequently declined, and at June, 1932, were little higher than in 1923. Between 1932 and 1937 there was a marked recovery, with the result that at June, 1937, the number of insured persons in employment was about 241 per cent. above the figure for June, 1923. Between June, 1937, and June, 1938, there was a decline in employment, but a further increase during the following year brought the figures for June, 1939, to over 28 per cent. above the level of June, 1923.

ANALYSIS BY INDUSTRIES, 1923-1939.

In the detailed Table on pages 26 and 27 figures are given showing, industry by industry, the percentage changes no a comparable basis, in the estimated numbers of insured persons aged 16-64 (exclusive of agricultural workers) in employment in Great Britain and Northern Ireland at the end of June in each of the years 1929 to 1939, the numbers in employment at June, 1923, being taken as = 100. In the Table below, index numbers are given showing the percentage changes during this period in the estimated numbers of such persons in employment in each of the nine industry groups in which the figures on pages 26 and 27 are classified :--

manufacture of the state	Index numbers (June, $1923 \Rightarrow 100$).					
Industry Group.	June, 1929.	June, 1932.	June, 1938.	June, 1939.		
Fishing*	117·4 76·5 110·4	112.0 54.9 93.5	116.7 62.7 114.9 163.2	116·3 64·7 124·8 170·2		
tracting rransport and Distribution† Gas, Water and Electricity Supply† Miscellaneous Services†	$ \begin{array}{r} 128 \cdot 0 \\ 125 \cdot 9 \\ 100 \cdot 3 \\ 130 \cdot 2 \end{array} $	117.8 133.0 101.8 138.8	$163 \cdot 2$ $147 \cdot 6$ $134 \cdot 2$ $177 \cdot 3$	148.7 135.6 180.6		
Commerce, Banking, Insurance and Finance	103·4 100·3	107·4 107·2	121·9 126·2	121·7 139·7		
All industries and Services	110.5	100.7	121.5	128.1		

The Table shows that between 1923 and 1939 there were substantial increases in the estimated numbers of insured persons, aged 16-64, in employment in each of the main groups except mining and quarrying, in which the numbers fell by over one-third. The greatest proportionate increases occurred in the "miscellaneous services," in building and contracting, and in transport and distribution. In the ten -year period from 1929 to 1939, there were marked increases in "miscellaneous services," National and Local Government, gas, water, and electricity supply, and building and contracting, but a reduction in mining and quarrying.

The effect of these changes on the industrial distribution of the The effect of these changes on the industrial distribution of the total number of insured persons in employment is revealed in the following Table, which shows the percentage proportions of the total numbers of insured persons, aged 16-64, employed in the different industry groups, in Great Britain and Northern Ireland, at the end of June in each of the years specified :--

Industry Group.	Percentages of the total number of insured persons, aged 16-64, in employment in different industry groups at the end of June.							
A Contraction of the second			1932.	193	88	1070

All Industries and Services	100.0	100.0	100.0	100.0	100.0	100.0		

Comparison of the figures for 1938 and 1939 with those for earlier years is slightly affected by the extension of the unemployment insurance scheme, in 1938, to cover certain classes of domestic workers which had not hitherto been insurable against unemployment. These workpeople were almost wholly in the "miscellan services " and National and Local Government groups, and the effect of their inclusion will be seen from a comparison of the two columns of figures given for 1938.§ The Table shows, however, that in June, 1939, nearly one-half of all insured workpeople in employment were engaged in manufacturing industries, about one-fifth in transport and distribution, and nearly one-tenth in building and contracting; these three groups accounted for over three-fourths of the total number of insured persons, aged 16-64, in employment. Of the total number of insured persons in employment, the proportion engaged in the mining and quarrying industries had fallen from nearly 13 per cent, in 1923 to little more than 6 per cent. in 1939. On the other hand, the proportions engaged in building and contracting, transport and distribution, and in the "miscellaneous services" group, had increased during that period.

* † ‡ See footnotes in second column on page 7. § Of the two series of figures given for 1938, those marked (a) exclude the classes of domestic workers who were brought into insurance in April of that year, and are comparable with the figures given for previous years, while those marked (b) include the newly insured classes of domestic workers and are directly comparable with the figures given for 1939.

January, 1940.

Particulars of the percentage changes between June, 1923, and June, 1939, in the estimated numbers of insured persons in employ-ment in individual industries are given in detail in the Table on pages 1932 were the heavier industries, the personnel of which is pre-dominantly male. Since 1932, the increase has been considerably greater among males than among females, and in June, 1939, the 26 and 27. The industries in which the greatest relative increases or proportions of males and females included in the total numbers of decreases have occurred during that period are shown below :--insured persons in employment were much the same as in June, 1929. The following Table shows the percentage changes between 1923 and 1939 in the estimated numbers of insured males and females, aged 16-64, in employment in each of twelve industry groups. The

ANALYSIS BY SEX, 1923-1939. The following Table shows, for insured males and females separately, the estimated numbers, aged 16-64, in employment in Great Britain and Northern Ireland at June in each of the years

1923, 1929, and 1932 to 1939 :-

Date.	Male	28.	Fema	les.	Total.		
(June)	Number.	Per cent. of total.	Number.	Per cent. of total.	Number.	Per cent

The increase between 1923 and 1933 in the proportion represented by females was largely due to the fact that the depression of 1929 to 1932 was much more acute in the industries in which men are largely employed than in those which include large numbers of women. From 1933 to 1938 the percentages represented by males increased year by year while those for females declined; between 1938 and 1939, however, there was a reversal of this trend, and the extension of unemployment insurance, in 1938, to cover certain classes of domestic employment also had the effect of slightly raising the proportion of females, and reducing the proportion of males, represented in the total numbers insured.

In the following Table the numbers of insured males and females, aged 16-64, in employment in June of each of the years 1929 and 1932 to 1939 are expressed as percentages of the numbers in 1923, on a comparable basis throughout, adjustments having been made in order to allow for the effects of the extension of unemployment insurance to certain classes of domestic employments in 1938.[†]

	June, 1929.	June, 1932.	June, 1933.	June, 1934.	June, 1935.	June, 1936.	June, 1937.	June, 1938.	June, 1939.
Males Females									
Total	110.5	100.7	105.0	109.5	111.7	117.6	124.6	121.5	128.1

Over the whole period from 1923 to 1939, the estimated numbers of males, aged 16-64, in employment rose by over 26 per cent., while the numbers of females rose by nearly 33 per cent. Up to 1929, the rease in the numbers of males in er nent was r than in the case of females, and the decline between 1929 and 1932 was proportionately greater among males. This was mainly due to the heavy fall, between 1923 and 1929, in the numbers employed in the coal mining industry and to the fact that the industries most severely affected by the decline in employment between 1929 and

* See first two paragraphs of text below the second Table in the first column on page 8. $\uparrow \pm See$ footnotes in second column on page 7. \sharp This group includes professional services, entertainment, sport, etc., laundries and dyeing and dry cleaning. column on page 8.

Industry Group.	between J and Jun in esti	Increase crease (-) une, 1923, e, 1939, mated ers in	Estimated numbers aged 16-64 in employment at June, 1939.		
Fishing [†] Mining and Quarrying Manufacturing Building and Contracting Transport and Contracting Distributive Trades Gas, Water and Electricity [†] Hotels, Boarding Houses, etc Other Miscellaneous Services [§] Commerce, Banking, Insurance and Finance National Government Service Local Government Service	$\begin{array}{c} \mbox{Males.} \\ + & 17 \cdot 4 \\ - & 35 \cdot 4 \\ + & 28 \cdot 4 \\ + & 70 \cdot 4 \\ + & 18 \cdot 5 \\ + & 67 \cdot 6 \\ + & 33 \cdot 8 \\ + & 82 \cdot 6 \\ + & 83 \cdot 2 \\ + & 21 \cdot 6 \\ + & 22 \cdot 6 \\ + & 62 \cdot 2 \end{array}$	$\begin{array}{c} {\bf Females.} \\ + & 27 \cdot 1 \\ - & 43 \cdot 3 \\ + & 16 \cdot 4 \\ + & 64 \cdot 1 \\ + & 41 \cdot 3 \\ + & 62 \cdot 4 \\ + & 77 \cdot 2 \\ + & 67 \cdot 2 \\ + & 97 \cdot 2 \\ + & 92 \cdot 3 \\ + & 22 \cdot 1 \\ - & 34 \cdot 0 \\ + & 56 \cdot 3 \end{array}$	Males. 25,370 814,570 4,071,780 1,175,630 748,240 1,142,170 195,810 16,870 215,450 167,870 168,790 330,710	Females. 640 5,450 2,080,720 14,930 40,150 781,680 11,420 277,830 305,050 94,860 29,990 86,800	
GRAND TOTAL	+ 26.4	+ 32.6	9,223,260	3,729,510	

It will be seen that in every group distinguished in the Table, except National Government Service, the movement of employment between 1923 and 1939 was in the same direction for females as for males, and in most cases the relative increases or decreases were not widely different in magnitude. In manufacturing industries, the distributive trades and hotel, boarding-house, etc. service (which together account for more than four-fifths of the total number of females employed) the proportionate increase among males was greater than among females, while in "other miscellaneous servicess" (the only other group with more than 100,000 females employed) the increase was greater among females. Exclusive of the mining and quarrying group, where there has been a large reduction among males and where the number of females employed is very small, the increase among males in all industries and services combined was substantially in excess of that for females, the percentage increase for males being 39.5, as compared with 33.0 for females.

CHANGES IN GEOGRAPHICAL DISTRIBUTION, 1923-1939.

The Table below shows the estimated numbers of insured persons, aged 16-64 (other than agricultural workers), in employment in each administrative area at June in each of the years 1923, 1929, 1932, 1938 and 1939. These figures are exclusive of workers insured under the Special Schemes for the banking and insurance industries, for whom a geographical analysis is not available. For the year 1923, when persons over 65 years of age were insured, approximate estimates have been made of the numbers aged 16-64 years.

Administrative I	aged	16–64, in Itural wor	ber of ins employm kers and j special sch	ent, exclu	ding	
	M. S. Constants	June, 1923.	June, 1929.	June, 1932.	June, 1938.	June, 1939.
London South-Eastern South-Western Midlands North-Eastern North-Restern North-Western Northern Seotland Wales Northern Ireland		1,856 628 633 1,453 1,101 1,653 644 1,078 564 207	(* 2,235 797 738 1,608 1,158 1,797 635 1,130 477 222	Thousands 2,192 798 719 1,467 1,014 1,579 498 981 387 192	2,735 1,032 915 1,880 1,264 1,264 1,218 463 1,218 468 213	2,798 1,064 976 1,997 1,336 1,891 694 1,278 524 237
Great Britain and Ireland 1	Northern	9,817	10,797	9,827	12,132	12,795

The figures for 1938 and 1939, given in the above Table, are not strictly comparable with those for earlier years, owing partly to the change in the method of counting the unemployed introduced in September, 1937, and partly to the inclusion of persons in certain classes of domestic employment which were brought within the scope of the unemployment insurance scheme in April, 1938. Information which was available, however, as to the approximate effect of these changes has enabled a continuous series of index numbers to be compiled for each administrative area, reflecting the percentage changes in the numbers, aged 16-64, in employment, on a comparable basis. These index numbers are given in the first column on the next page.

During the sixteen years from 1923 to 1939 there were increases in the estimated numbers of insured persons, aged 16-64, in employment in every division except Wales, where there was a decrease of 10

over 9 per cent. The increases were greatest in the South-Eastern, South-Western, London and Midland Divisions. These Divisions, comprising the Southern section of the country, now include about 53:4 per cent. of all insured persons, aged 16-64, in employment (exclusive of agriculture), as compared with 46.6 per cent. in 1923. Between June, 1938, and June, 1939, however, the increase was compilerable mestre in the Neuthern section them in the Southern considerably greater in the Northern section than in the Southern section. In the North of England, Scotland, Wales and Northern Ireland, taken together, the increase during the past year amounted to 7.0 per cent. as compared with 4.2 per cent. in the Southern section of the country.

NATIONAL JOINT ADVISORY COUNCIL.

THE third meeting of the National Joint Advisory Council, composed of representatives of the British Employers' Confederation and the Trades Union Congress General Council, which was set up to advise the Government on matters in which employers and workers have a the Government on matters in which employers and workers have a common interest, was held at the Ministry of Labour and National Service on 3rd January. The Minister of Labour and National Service was in the chair. The Minister was accompanied by the Parliamentary Secretary and senior officers of the Department, and there were also present representatives of the Treasury, the Board of Trade, the Mines Department and the Ministry of Food. General discussion was resumed of the statement made to the Council at its meeting in December by the Chancellor of the Exchequer on the problems involved in the financing of the war, and this subject will be further considered at the next meeting of the Council to be

will be further considered at the next meeting of the Council to be held on 31st January. During the discussion the Trade Union representatives laid stress on the objections to the control of wages otherwise than by the voluntary negotiating machinery now in existence, and indicated that they were submitting the whole problem to detailed examination.

The Council received and considered a statement relating to the construction of the Ministry of Labour cost of living index number.

The Council also considered the advice to be tendered by it to the Government as to the date for the re-introduction of official " summertime" this year.

UNIVERSITY JOINT RECRUITING BOARDS.

In an article in the September issue of this GAZETTE (page 334) reference was made to the Joint Recruiting Boards and the Technical Committees which have been set up at Universities and University Colleges to assess the suitability for training as officers of undergraduates and resident University graduates under the age of 25 who volunteer for service in His Majesty's Forces. The scope of the arrangements thus made has now been extended

to include students in certain subjects of a technical or scientific nature at an earlier stage in their course than was previously the case and also students in certain additional subjects. The classes of men who may now be dealt with are the following :

(1) Men with University degrees in Engineering (including naval architecture) Metallurgy, Chemistry, Physics, Geology, the Biological Sciences (including Agriculture) and Mathematics (including Statistics).

(2) Men with Higher National Diplomas or Higher National Certificates in Mechanical or Electrical Engineering, or with the Associateship of the Institute of Chemistry. (3) (i) Men who have completed to the satisfaction of the

University at least one year's work of a course for a specialised honours degree in Engineering (including Naval Architecture) Metallurgy, Chemistry, Physics, applied Mathematics, Geology, and the Biological Sciences (including Agriculture). and t

(ii) Men who have started or are about to start their final year's study for a pass degree in Engineering or Metallurgy.

(4) Men who have started or are about to start their final year's study for the Higher National Diploma or Higher National Certificate in Mechanical or Electrical Engineering or for the Associateship of the Institute of Chemistry.

Men under the age of 25 falling within any of the above classes may apply to a Local Office of the Ministry of Labour and National Service for forms of application and the address of the nearest Joint Recruiting Board.

SERVICE IN THE ARMED FORCES.

January, 1940.

On 1st January, 1940, a Proclamation was made by His Majesty the King, under the National Service (Armed Forces) Act, directing that (with certain exceptions) all male British subjects within Great Britain or entering Great Britain after that date who were not already registered under the Act or under the Military Training Act and who, on 1st January, 1940, had reached the age of 19 but had not reached the age of 28, are liable to be called up for service in the Armed Forces of the Crown.

This is the third Royal Proclamation to be made under the National Service (Armed Forces) Act and its effect is to extend the liability for military service to-

(i) men of 19 years of age (but these men will not be called up until they reach the age of 20 (see below);
(ii) men who have reached the age of 20 since the 1st December, 1939 (the date of the last Proclamation made under the Act); and

(iii) men whose ages on 1st January, 1940, were 23, 24, 25, 26 and 27.

It is estimated that the number of men made liable for service by the Proclamation is approaching two millions. The first two Proclamations under the Act were signed by His

Majesty the King on 1st October and 1st December, 1939, and the numbers of men registered under these Proclamations were 229,794 and 252,806 respectively. In addition, there were registered under the Military Training Act, last June, 240,757 men whose liability for training was superseded by a liability for service under the provisions of the National Service (Armed Forces) Act. The total number of men who since the introduction of compulsory military service have been registered, or have a liability to be called up for service, now reaches a total, therefore, of between $2\frac{1}{2}$ and $2\frac{3}{4}$ millions. This is, of course, in addition to men who were members of the Regular, Reserve or Auxiliary Forces before the outbreak of war and those who have entered as volunteers since the war.

The registration of the men covered by the Proclamation of Inc registration of the men covered by the Proclamation of Ist January will not take place immediately, nor will all the men be required to register at the same time. The registration and calling up will follow a carefully worked-out plan and the speed at which it will take place will be regulated in the light of the man-power requirements of the three fighting forces. It is contemplated that the men will be registered at intervals, and all those affected will be the men will be registered at intervals, and all those affected will be informed by public announcements and by widespread publicity when a registration day for their particular age group is to take place.

No change is contemplated in the present procedure of registering successive age-groups in an ascending scale. The first age-group to be registered in 1940 will, therefore, be those aged 23 on 1st January, 1940. Men who have reached the age of 20 since 1st December, 1939, or who reach the age of 20 during 1940 will also be registered at intervals throughout the year, but no person will be required to register (and consequently will not be called up for service) until he has at least reached the age of 20.

The procedure for registration, medical examination and calling up will be substantially the same as on previous occasions.

HOURS OF EMPLOYMENT OF YOUNG PERSONS.

UNDER the provisions of the Young Persons (Employment) Act, 1938, the maximum working hours of young persons under the age of 16, engaged in certain occupations, were reduced from 48 to 44 after 31st December, 1939. The persons affected are :--

(1) those employed about the business of a shop or in connection with retail trade elsewhere, who are subject to the Shops Act, 1934, and

(2) those wholly or mainly employed in such occupations as van boys, outside messengers, page boys at residential hotels and clubs, messengers in newspaper offices, attendants at theatres, cinemas and other places of public entertainment, assistants to cinema operators, lift boys (except those in private houses) and young persons employed in receiving offices for laundries or dyers and cleaners, who are subject to Part I of the Young Persons (Employment) Act, 1938.

The only exception from the statutory 44 hour week for these young persons is that the hours of those subject to the Shops Act, 1934, may be averaged over two weeks at Christmas, provided that they do not work more than 48 hours in either of those weeks nor more than 88 hours in the fortnight. There is no exception in the case of those subject to Part I of the Young Persons (Employ-ment) Act 1972 ment) Act, 1938.

Full particulars of the provisions regulating the hours and con-ditions of work of young persons in the various employments referred to are contained in a Memorandum on the Shops Act, 1934 (as amended by Part II of the Young Persons (Employment) Act, 1938), which will be published shortly, and in a Memorandum on Part I of the Young Persons (Employment) Act, 1938, which is already on sale. A special edition of each memorandum is published for Scotland. Copies of these Memoranda (price 2d. net each) may be purchased directly from H.M. Stationery Office or through any bookseller.

The new provisions come into operation by virtue of Section 1 (1) (b) and Section II of the Young Persons (Employment) Act, 1938, and apply throughout England, Wales and Scotland.

January, 1940.

WAGES OF ROAD HAULAGE WORKERS.

THE Minister of Labour and National Service has made an Order under Section 3 of the Road Haulage Wages Act, 1938, giving statutory effect to the proposals submitted to him by the Road In the issue of this GAZETTE for October and November, 1939, particulars were given of a number of Orders made by the Ministry of Food prescribing maximum retail prices. Haulage Central Wages Board for fixing remuneration and for Since then, prices of fresh meat (but not chilled and frozen meat) of margarine and "cooking fats," and of eggs produced in Great Britain and Northern Ireland, have been de-controlled, and Orders Hamage Central wages board for fixing reinuneration and for allowing holidays with pay to road haulage workers employed in connection with vehicles specified in an "A" licence or a "B" licence granted under the Road and Rail Traffic Act, 1933 (see page 361 of the issue of this GAZETTE for October, 1939). The provisions of the Order become effective on 29th January. have been made relating to canned salmon, butter, sugar, bacon and meat. The Canned Salmon (Provisional Maximum Prices) (No. 2) Order, provisions of the Order become ellective on 25th January. The Road Haulage Central Board was set up in February last, the Area Boards for Scotland and for each of the other Traffic Areas formed under the Road and Rail Traffic Act, 1933 having been formed a few weeks earlier. The Central Board has the duty, 1939, which was dated 22nd December and came into force on 27th December, amended the maximum prices of certain descriptions of salmon, prices of other descriptions remaining unaltered. The Butter (Maximum Prices) Order, 1940, which was dated after consultation with the Area Boards, of submitting to the Minister 1st January and came into force on 8th January, made no change of Labour and National Service proposals for fixing remuneration and in the maximum retail price of butter, viz., 1s. 7d. per lb., but made for giving holidays with pay for road haulage workers, and such prothe provision that in calculating the price, any fraction of a farthing posals, subject to confirmation by the Minister, have statutory force. As it was found impossible to secure general observance of conis to be regarded as one farthing. The Sugar (Maximum Prices) (No. 4) Order, 1939, has been amended by an Order, dated 6th January, providing that in cal-culating the retail price of sugar, any fraction of a farthing is to be As it was found impossible to secure general observance of con-ditions of employment in this industry by means of voluntary machinery the National Joint Conciliation Board, representing employers and Trade Unions, approached the Minister of Labour and National Service with a request that the voluntary machinery should regarded as one farthing. The Bacon (Prices) Order, 1940, which was dated 6th January be strengthened by a statutory scheme. Subsequently, a Depart-mental Committee under the chairmanship of Sir James Baillie and came into force on 8th January, prescribes maximum retail prices, which for boneless bacon and ham, uncooked, range from was appointed to enquire into the position, and their recommenda-tions were embodied in a Bill which became law in July, 1938. ls. 2d. to 2s. 2d. per lb., according to cut, etc. Maximum prices also operate for "picnics" and cooked bacon and ham. The Order The proposals which are now given statutory force have been framed after consultation with the Area Boards, and have been includes a provision that in calculating the retail price, any fraction

under active discussion with the haulage industry since March of last year. The proposals now to be put into effect thus represents the findings of the industry itself after long and exhaustive con-sideration and full examination of objections.

The broad effect of the Order will be to give statutory effect for an initial period up to 5th May, 1940, to the rates agreed between the organisations of employers and workers represented upon the former voluntary National Joint Conciliation Board for the Road Transport Industry (Goods) subject to some adjustments in the grading of certain Areas. Whereas, however, the rates previously agreed were

certain Areas. Whereas, however, the rates previously agreed were on a voluntary basis the payment of those prescribed by the Order will be compulsory. Provision is also made, under the Holidays with Pay Act, for holidays with pay. Provisions applying to Scotland in the interim period are set out in a separate part of the Order. The wages payable for this period correspond roughly with grade 2 rates for England and Wales and apply to the whole country without distinction of grading. After the 5th May, 1940, however, Scotland will be included in the general scheme, with the grading as provided in the general hody of the Order. scheme, with the grading as provided in the general body of the Order. After the initial period, which will end on 5th May, 1940, whilst no change is provided in general wage levels, changes are made as

regards overtime and certain other of the surrounding conditions. e.g. subsistence allowances and payment for night work. e.g. subsistence anowances and payment for night work. In conformity with the provisions of the Act the Minister has made an Order bringing Part II of the Act into operation on 29th January. This part of the Act contains provisions with respect to the remuneration of road haulage workers employed in connection with "C" licensed vehicles. As from the above date, if such a worker's remuneration is considered to be unfair, application for the mether the arfamed for settlement under the Act are the methe the matter to be referred for settlement under the Act may be made The prices for Scotland, on account of differences in the cuts, to the Minister of Labour and National Service by the worker differ slightly from the above, but the general price level is the concerned, or by his trade union or by any trade union which represame there. sents a substantial number of road haulage workers. The Minister has Maximum retail prices are also scheduled for home-killed and for made regulations prescribing the manner in which application shall imported offal, *i.e.*, heart, liver, kidney, tongue, sweetbreads, tripe, etc. Sausages and sausage meat are included in the schedules for be made beef and pork.

PRICES OF GOODS ORDER.

THE Prices of Goods (Price-regulated Goods) (No. 1) Order,* made by the Board of Trade on 18th December under the provisions of Seciton 2 of the Prices of Goods Act, 1939, † contains a list of goods to which that Act will apply in the first instance. The Order came into effect on 1st January, 1940.

The goods specified in the Order include a large number of articles of clothing, certain classes of piece goods, household textiles, domestic ironmongery, domestic turnery, etc., table cutlery, domestic glassware, domestic pottery, knitting yarn, electric torches and acces-sories, sandbags, and the textile and leather materials used in the manufacture of the clothing, piece goods and household textiles specified (except materials the prices of which are controlled by Orders made under the Emergency Powers (Defence) Regulations, 10300 1939).

The Board of Trade state that the intention in drawing up the list of articles which is scheduled to the Order has been to include articles which are widely and necessarily used by large sections of the TRADE BOARDS ACT: PROPOSED population. It follows that the list does not, and is not meant to. APPLICATION TO FURNITURE nclude anything of a luxury nature. Indeed, the list is not exhaustive even so far as articles which everybody uses are concerned. It MANUFACTURING TRADE. was thought essential to apply the Act, in the first instance, to those goods which were most necessary, and to give consideration in due THE Minister of Labour and National Service has given Notice course to modifying and extending the list as and when it appears of a draft Special Order applying the Trade Boards Acts, 1909 and 1918, to the Furniture Manufacturing Trade. desirable to do so. It is probable, therefore, that further Orders will be made from time to time. A copy of the Notice and of the draft Special Order is reproduced

The provisions of the Act apply to the goods specified in the schedule to the Order, whether they are sold retail or wholesale.

Statutory Rules and Orders, 1939, No. 1813. H.M. Stationery Office. Price 2d. net. † See the December issue of this GAZETTE, page 410.

FOOD CONTROL.

MAXIMUM RETAIL PRICES OF FOOD.

of a farthing is to be regarded as one farthing. The *Meat* (Maximum Retail Prices) Order, 1940, and the Meat (Maximum Retail Prices) (Northern Ireland) Order, 1940, which were dated 13th January and came into force on 15th January, prescribe maximum retail prices for the various joints, cuts, etc., of beef, mutton, lamb, veal and pork, distinguishing home-killed and imported meat and, for home-killed beef and mutton, first and second quality meat.

From the large number of prices scheduled, the following maximum retail prices in England and Wales have been extracted :-

indiana de la ser ante	Beef (per lb.).					
entrant babinen etenin	Sirloin.	Fore Ribs.	Brisket.	Thin Flank.		
Home-killed, 1st Quality Home-killed, 2nd Quality Imported	s. d. 1 5 1 2 1 2	s. d. 1 4 1 1 1 1	u. 10 7 7	а. 10 6 6		
the Alley depends that there a	М	utton and La	mb (per lb	.).

FOOD RATIONING.

Under the Rationing Order, 1939, dated 27th December, and subsequent Orders, the rationing of sugar, butter, bacon and ham began on 8th January. The amount of the domestic ration per person per week is :-

Sugar			 		12 oz.
Butter			 		4 oz.
Bacon or	ham,	uncooked	 	Sa	4 oz.
,,	,,,	cooked	 		31 oz.

The quantities stated for bacon or ham are obtainable free of bone. Canned bacon and canned ham are included in the ration, but chaps and chawls, fore-leg knuckles, hind-leg knuckles and parts of shoulders known as "picnics" are free of ration.

on page 40 of this GAZETTE.

In the event of objections being made to the draft Special Order on or before 31st January, 1940, which are not met or withdrawn it will be necessary before the Order is made for a Public Enquiry to be held. In this event public notice will be given.

THE MINISTRY OF LABOUR GAZETTE.

CO-OPERATIVE SOCIETIES IN 1938.

THE following particulars have been compiled by the Chief Registrar of Friendly Societies from statutory returns furnished to his Department. The figures are exclusive of agricultural societies (the transactions of which will be summarised in an article in a subsequent issue of this GAZETTE) and relate only to societies which are cooperative in character, so that, in effect, the article deals with the transactions of societies operating within the co-operative movement.

The societies are divided into two classes, viz., those which deal directly with the consumer and those which do not. The two categories are described for convenience as "Retail" and "Wholesale and Productive " respectively.

(A) DISTRIBUTION.

(1) GENERAL.

At the end of 1938 there were 1,244 registered industrial cooperative societies in Great Britain mainly engaged in the supply of commodities. Of these 1,124 were retail societies and 120 were

wholesale and productive societies. The sales made by such societies in each of the last five years are shown in the following Table :---

	Sales o		Wholesale and	d Productive	Societies.
Year.	Retail Societie	A REAL PROPERTY	S.C.W.S.*	E. & S. J. C.W.S.*	Other Societies.
1934 .	£1,000		£1,000's 17,674	£1,000's 7,590	£1,000's 6,496
1935 . 1936 . 1937 .	218,99 232,31 248,27 261,50	1 98,284 7 107,692 3 119,852	18,645 20,592‡ 22,447 27,354†	5,864§ 7,538 8,297 8,762	6,969 7,491 8,021 7,980

In considering the above Table, it should be borne in mind that the sales of the wholesale societies in the main are made to the retail societies for resale to their members and that, in consequence, any aggregation of the figures would be misleading. Further, the sales of the English and Scottish Joint Co-operative Wholesale Society, Ltd. (which is the separately registered joint tea, etc., department of the Co-operative Wholesale Society, Ltd., and the Scottish Cooperative Wholesale Society, Ltd.) include goods invoiced to the two principal wholesale societies for resale. In 1938 the value e goods so invoiced was £7,614,000.

The number of persons employed in distribution by the retail and wholesale and productive societies was 208,000 (127,000 males and wholesale and productive societies was 200,000 (127,000 males aged 18 years and over, 38,000 females aged 18 years and over and 43,000 persons under 18 years of age), and the amount paid in salaries and wages was £28,388,000.

(2) RETAIL SOCIETIES.

Of the 1,124 retail societies engaged in distribution, 1,068 were general supply stores.

The sales of the general supply stores (including revenue from service departments) totalled £261,101,000 and represented an increase of £13,213,000 over 1937. These societies had 8,316,000 shareholding members at the end of the year, with share capital amounting to £153,747,000. They returned an aggregate surplus on the year's working of £30,829,000, of which £5,139,000 was distributed as interest on share capital and £23,545,000 as divided on sales. Their investments totalled £141,506,000, of which £100,197,000 was invested in other co-operative societies, mainly in the Co-operative Wholesale Society, Ltd.

The number of persons employed in distribution by the general supply stores was 192,000 (116,000 males aged 18 years and over, 35,000 females aged 18 years and over and 41,000 persons under 18 years of age), their salaries and wages totalled £25,588,000, and the dividends distributed on sales averaged 1s. 93d. in the £, compared with 1s. 10¹/₄d. in 1937.

The remaining 56 retail co-operative societies were various in character and their sales in 1938 amounted to only £399,000.

(3) WHOLESALE AND PRODUCTIVE SOCIETIES.

There were 120 wholesale and productive societies at the end of 1938. The bulk of the business of the group, however, was con-ducted by the Co-operative Wholesale Society, Ltd., the Scottish Co-operative Wholesale Society, Ltd., and the English and Scottish Joint Co-operative Wholesale Society, Ltd.

The sales of the three wholesale societies in 1938 (excluding goods invoiced by the Joint society to the two parent societies) amounted to £153,518,000. They had a total shareholding membership of 1,791, of which 1,251 were retail societies and 540 were employees of the Scottish wholesale society, an aggregate share capital of £16,681,000 (excluding £499,000 share capital provided by the English and Scottish wholesale societies for the Joint society), loan capital of £81,754,000 and a balance of reserves and undivided profit amounting to £12,092,000. Most of the capital was not required for trading; their investments totalled £10,824,000 and in addition, the English wholesale society had £77,603,000 deposited with its banking department. The aggregate surplus (before deducting £658,000 share interest) amounted to £5,295,000.

* Co-operative Wholesale Society, Ltd., Scottish Co-operative Wholesale ciety, Ltd., and English and Scottish Joint Co-operative Wholesale Society, Society, Ltd., and English and Sectors Ltd., respectively. † The figure for this year covers 62 weeks. † The figure for this year covers 53 weeks. § The figure for this year covers 40 weeks.

The number of persons employed in distribution by the three wholesale societies (including those engaged in the buying depart-ments) was 14,500 (9,700 males aged 18 years and over, 3,300 females aged 18 years and over and 1,500 persons under 18 years of age), and their salaries and wages amounted to £2,584,000. A dividend of 4d. in the £ on sales was distributed by the English

January, 1940.

wholesale society for 1938 together with an additional dividend of 3d. in the £ on sales of its own products. Dividends at the same rates were distributed for 1937. The Scottish Wholesale Society distributed a dividend of 4d. in the £ for 1938, as compared with a dividend of 5d. for the first half and 4d. for the second half of the year 1937. The dividends of these two societies aggregated £2,911,000.

(B) PRODUCTION.

Among the registered industrial co-operative societies which were mainly engaged in the supply of commodities there were 960 societies whose activities in 1938 included the production of commodities. The number of persons employed in production was 111,000 (65,000 males aged 18 years and over, 29,000 females aged 18 years and over and 17,000 persons under 18 years of age); the amount paid as salaries and wages was £15,575,000 and the value of productions (including materials) was £104,004,000. In the following Table the productive work undertaken in 1938

is analysed by industry, the value of productive work undertaken in 2000, i.e., including the cost of materials used. Totals also are given for each of the five years 1934-8.

January, 1940.

operations than those of the retail societies. In the retail societies, the dominating productive operation is baking, which in 1938 accounted for about one-half of the aggregate net value created. In the wholesale societies the outstanding productive department is that of milling, which accounted for over one-seventh of the aggregate net value. Some of the productive operations of the wholesale societies which are either not undertaken by the retail societies at all or only to a negligible extent are tea and coffee; oil and cake; soap, candles and starch, chemicals; margarine and lard, and textiles.

Between 1934 and 1938, the total number of employees engaged in production rose by nearly 18,000 (or about 19 per cent.), and the amount of salaries and wages paid in the year rose by over £3,400,000 (or about 28 per cent.). The net value of production in 1938 was higher than in 1934 by about £4,640,000 (or nearly 19 per cent.). Of the increase in the net value of production during this period, about nine-tenths was accounted for by the wholesale and productive societies, and about one-tenth by the retail societies.

When allowance is made for the surplus earned and expenses chargeable to distribution, it is estimated that in 1938 nearly onesixth of the wholesale value of the goods sold by the retail societies was created within the co-operative movement.

Farming.—Farming is carried on by a number of retail societies. During 1938 there were 87 societies undertaking farming operations, apart from those which maintained land for accommodation and grazing purposes only. In only 37 cases did these operations result in a surplus. The total acreage of the farms was 31,000 (as com-pared with 30,000 for 1937) and the total capital invested in farm land and buildings, implements, stocks, etc., was about £1,262,000. The sales or transfers of farm produce, etc., totalled £554,000, as in 1937.

The farms owned by the two principal wholesale societies covered 18,000 acres, which was 300 acres more than in 1937. Capital invested in their farms by these societies totalled £925,000, and the sale or transfer value of farm produce increased by £21,000 to £359.000.

Share of Employees in Membership, Capital and Management of Societies.—In the retail societies generally, employees have no prescribed right as employees to share in the capital and management, although they may become shareholding members in the ordinary way. In the wholesale and productive societies (other than the three principal wholesale societies), however, the registered rules frequently provide for the employees, as such, not only to share in the capital but also to become members of the committee of management. In 1938 there were 51 societies in which em-ployees shared both in capital and in management. The societies had a shareholding membership totalling 15,048 of whom 5,833 were employees; share capital amounting to £518,000 of which 29 per employees; share capital amounting to £518,000 of which 29 per cent. was held by employees; and loan capital amounting to £454,000 of which 26 per cent. was due to employees. Of 509 ommitteemen 251 were employees.

(C) SERVICES.

The services provided by the co-operative movement are varied in character, but the principal are banking, insurance and laundering.

Banking .- The Co-operative Wholesale Society, Ltd., has a banking department which provides all banking services and con-ducts the banking business of almost all the societies in the co-operative movement in England and Wales. Receipts on deposit and current account in 1938 totalled £409,854,000 and the aggregate balances of deposit and current accounts at the end of the year amounted to £86,051,000 and £21,729,000 respectively. There were 73,382 separate accounts of which 877 were in the names of co-operative societies, 10,329 trade unions, 1,044 clubs, 11,308 other mutual organisations and 49,824 individuals. Of the total amounts held on deposit and on current account, £65,000,000 and £12,603,000 respectively represented the balance of the society's own trade department. The assets of the bank totalled £113,589,000, of which £104,855,000 was invested in Government, municipal and other securities.

Insurance.—The Co-operative Insurance Society, Ltd., is owned by the Co-operative Wholesale Society, Ltd., and the Scottish Co-operative Wholesale Society, Ltd. The society does extensive business in all the main branches of insurance with the exception of marine risks. The total premium income for all departments in 1938 amounted to £9,059,000, an increase of £643,000 over 1937. More than one-half of the premium income was in respect of industrial assurance. Collective life assurance, which is undertaken largely in conjunction with the retail societies, accounted for £557,000 of the premium income. The total of the insurance funds at the end of the year was £28,982,000. Profit on the year's working amounted to £402,000 of which £1,000 was allocated as interest on shares to the two constituent societies and £51,000 as dividends on premiums. Salaries and wages payable in 1938 totalled £552,000 and commission £1,657,000.

Laundering.—Many retail societies themselves undertake laundering but others have combined to form separately registered federal laundry societies to perform this service in the areas covered by the retail societies concerned. At the end of 1938 there were 16 such societies during the year. Charges for work done amounted to £1,489,000 and resulted in an aggregate net surplus on the year of £146,000. Share, loan and reserve capital totalled £1,901,000. Salaries and wages amounted to £730,000.

THE MINISTRY OF LABOUR GAZETTE.

INTERNATIONAL LABOUR ORGANISATION.

ACTIVITIES SINCE THE OUTBREAK OF WAR.

For some time prior to the outbreak of war, the International Labour Organisation had had under consideration what its policy should be "in the event of acute international crisis". In February, 1939, it appointed an Emergency Committee which was to have a dual function. First, it was to consider immediately the problems that would face the Organisation in time of war and report to the Governing Body; secondly, if war broke out, the powers of the Governing Body were to be delegated to the Committee, if the Governing Body could not itself meet. The Committee comprised four representatives of Governments (those of France, Great Britain, Norway and the United States of America) together with two representatives each from the Employers' and the Workers' Groups on the Governing Body.

Immediately after its establishment, the Committee began its examination of the problems which would arise in the event of war. It presented two reports to the Governing Body which the latter adopted on 22nd April and 13th June respectively. Following the adoption of the second report the Governing Body decided to communicate certain of the decisions reached to the International Labour Conference which was then in session. The following is an extract from the communication made to the Conference :

"The Emergency Committee took cognisance of the replies from a certain number of Governments to the communication addressed to them by the Office forwarding the report which the Governing Body had adopted on some of the problems which would arise as regards the International Labour Organisation at a time of grave international crisis. It noted with particular satisfaction that a number of these replies, including those from Great Britain, Rumania and Sweden, reaffirmed the principle that the International Labour Organisation should endeavour to function as completely as possible if an international crisis should intervene, and even if such a crisis should unfortunately develop into war. The Committee also received with great satisfaction similar declarations made on behalf of their Governments by the representatives of France and the United States of America."

In compliance with the "principle" referred to in this extract the International Labour Organisation has continued to function since the outbreak of war although necessarily a considerable number of its activities have had to be curtailed or in some cases abandoned. Two meetings of the Emergency Committee (invested with the powers of the Governing Body) have been held and, in addition, the plans previously made for the convening in Havana in November, 1939, of the Second Regional Conference of the American States Members of the Organisation have been carried through successfully. There are set out below a summary of the proceedings at the two meetings of the Emergency Committee, some notes regarding the Havana Conference, statements made on 23rd November, 1939, by the Foreign Secretary and the Minister of Labour and National Service in reply to questions asked in the House of Lords and House of Commons respectively, and, finally, a brief note regarding the proceedings, in so far as they relate to the International Labour Organisation, at the Session of the Assembly of the League of Nations held in December, 1939.

The Third and Fourth Sessions of the Emergency Committee of the Governing Body, September and October, 1939.

The 89th Session of the Governing Body, which was to have taken place in Oslo in the early days of October, 1939, was cancelled, but in its place two sessions of the Emergency Committee were held in Geneva, the first on 20th-21st September, and the second from 10th to 12th October. Both were well attended, representatives of many Governments other than the four with seats on the Committee being present, as well as many members of the Employers' and Workers' Groups. His Majesty's Government was represented at both meetings by Mr. G. Myrddin Evans, an Assistant Secretary of the Ministry of Labour and National Service. The following are the more important

United States of America, was unanimously elected Chairman of the Governing Body in place of Mr. Berg (Norway) whose year of office had expired.

The Committee took note of the fact that the Governments of 31 States Members of the Organisation had informed the Office in writing of their support of the principle that the International Labour Organisation should continue to function as completely as possible during the war. In addition to these written statements, it may be added that the representative of the United States Government took the opportunity to say that the question of the future of the International Labour Office during the war had been considered by the highest authorities of his country and he read a written instruction which he had received in Washington from Miss Frances Perkins, the Secretary of Labour. This urged the vigorous continuation of the Organisation's work, practically adapted to the conditions of the present period, and concluded : "The continued existence of the International Labour Organisation as an instrument of co-operation between Governments, Employers and Workers will be of the highest value both during the war itself and during the difficult period that is likely to follow immediately upon the termination of ostilities."

The Committee approved the proposal of the Director of the Office to proceed without alteration with the plans for the holding of the Second Regional Conference of the American States Members of the Organisation at Havana in November It was also decided

14

that the opportunity of this Conference should be taken to convene a meeting of the American Members of the Permanent Agricultural Committee, the meeting of the latter, which had been fixed for the end of 1939, having been unavoidably postponed. The meetings of various other committees which had been arranged were postponed. These included the meeting of the Committee of Experts on Safety in Coal Mines and also the Preparatory Technical Conference on Safety in Coal Mines

in Coal Mines and also the Preparatory Technical Conference on Safety in Coal Mines. Apart from consideration of the revised budget of the Organisation for 1940, to which reference is made below, the principal subject considered by the Committee related to the activities of the Organisa-tion during the war. A long discussion took place on this matter, in the course of which the representatives of many Governments, as well as spokesmen of the Employers' and Workers' Groups, indicated from different exacts. and with varying degrees of emphasis their well as spokesmen of the Employers' and Workers' Groups, indicated from different aspects, and with varying degrees of emphasis, their opinion that the normal activities of the Organisation, supplemented and adapted as might be necessary as a consequence of the war, could and should be pursued. While no final decisions were taken as to a programme of work, general approval was given to a note submitted by the Office indicating various questions which could usefully by the Office indicating various questions which could usefully be studied in the existing circumstances. Amongst these matters may be mentioned the following:—Methods of supervising the engagement and re-engagement of workers; vocational retraining of the unemployed and vocational retraining of disabled men; influence of special war time conditions of employment on the frequency of accidents in industry; methods of collaboration between Governaccidents in industry; methods of collaboration between Govern-ments, Workers' Organisations and Employers' Organisations in war time; influence on output of the extension of normal working hours and the extensive utilisation of overtime. In the course of the discussion the question of the holding of the International Labour Conference in 1940 was raised. Various speakers indicated their view that the Conference should be held, although perhaps not in June and probably with a modified agenda.

Conference in 1940 was raised. Various speakers indicated their view that the Conference should be held, although perhaps not in June and probably with a modified agenda. In view of the special circumstances resulting from the outbreak of war, the Emergency Committee, at the request of the Supervisory Commission of the League of Nations, considered the financial problems involved. A revised budget for 1940 was adopted to replace that which the Governing Body had approved in May and which had subsequently been approved by the Supervisory Com-mission also for presentation to the Assembly. The estimates (less supplementary receipts) included in the former budget had been for 9,090,000 Swiss france. In the new budget as revised by the Emergency Committee they were for 7,858,000 Swiss francs, repre-senting an economy of 1,232,000 Swiss francs. As the former figure of 9,090,000 Swiss francs had already constituted a saving compared with the budget for 1939 of 1,088,000 Swiss francs, the total saving as compared with 1939 represented by the revised budget is 2,320,000 Swiss frances, or 22.8 per cent. As the reduction of the budget even to this extent would not necessarily provide a final solution of the financial problem, since receipts sometimes fall short of the sums budgeted for, the Emergency Committee also gave consideration to means whereby expenditure should not exceed the amount of contributions actually received. Another matter considered by the Council of the League of Nations by the special Committee set up by the Council of the League of Nations by the special Committee set up by the Council of the League of Nations by certain members of the Workers' Group—notably M. Jouhaux (France) and M. Mortens (Belgium)—lest the proposals made by the Special Committee for the establishment within the framework of the League of a new "Central Committee for Economic and Social Questions" would involve encroachment in any way on the work of the International Labour Organisation. The Emergency Com-mittee agreed that th

any resolution on the subject it might adopt to make it clear that the autonomy and competence of the International Labour Organisation On this understanding, it was left to the Directo

were not allected. On this understanding, it was left to the Director of the Office to deal with the matter. Finally, the Committee agreed that if possible a Session of the Governing Body should be held in January, 1940. (It is the present intention to hold such a Session at the beginning of February.)

The Second Regional Conference of American States Members of the International Labour Organisation, Havana, November-Decen 1939.

1939. This Conference was opened by Mr. Goodrich, Chairman of the Governing Body, on 21st November, and it concluded its work on 2nd December. It was attended by delegations from all the sixteen American States Members of the Organisation, eight of the delegations being "full" ones, i.e., comprising representatives of the Government, of employers and of workers. Three other American States were represented by Observers, as also was the British Empire in the person of Mr. F. A. Norman, O.B.E., an Assistant Secretary of the Ministry of Labour and National Service, at present seconded as Labour Adviser to the Government of Jamaica. The Secretary-General of the Conference was Mr. J. G. Winant, the Director of the International Labour Office.

There were three items on the agenda, viz. :

1. Discussion of the Director's Report;

2. Examination of the effect given to the resolutions adopted by the First Regional Conference held at Santiago, Chile, in January, 1936 (particularly as regards the work of women and children and social insurance);

Organisation of official institutions dealing with immigration and settlement.

A meeting of the American Members of the Permanent Agricultural Committee was also held during the Conference.

While the discussion of the Director's Report was undertaken at plenary sessions of the Conference, three Committees were appointed to consider the detailed items on the agenda, namely, Social Insurance, the Work of Women and Children, and Immigration. Reports, containing several Resolutions, were presented by each of these Committees, and the Conference adopted all of them. There was also a special Resolutions Committee of the Conference, which presented twenty seven Resolutions to the Conference on a diversity also a special Resolutions committee of a conference on a diversity presented twenty-seven Resolutions to the Conference on a diversity of topics, all of which were adopted. One of these, given the title of of topics, all of which were adopted. One of these, given the title of the Declaration of Havana, contained a "pledge of unwavering support" from the Governments and peoples of the American Continent "for the continuance with unimpaired vigour of the efforts of the International Labour Organisation to accomplish its high purpose of achieving social justice." Another referred to the danger that it might be "impossible to hold the next general session of the International Labour Conference in Geneva in normal and satisfactory conditions," and suggested that, if so, the "possibility that the said general meeting of the Conference be held in the capital of some American country" should be considered by the Governing Body.

Early in the proceedings, the President of the Conference read a letter which he had received from the President of the United States as follows :---

The White House, Washington, November 15, 1939.

January, 1940.

November 15, 1959. "My dear Mr. Chairman, It is extremely fitting that the sister States of the Western Hemis-phere who are members of the International Labour Organisation should assemble at this time to consider those fundamental problems of human living that concern every citizen of every nation. This Conference is another significant example of the effectiveness of an agency, like the International Labour Organisation, which even in times like these can serve the people of various nations without regard to boundary lines or battlefront. The twenty years of the I.L.O.'s existence has proven the usefulness of such an organisation in time of peace. I am confident that it

of such an organisation in time of peace. I am confident that it can and will be of service to its members, indeed to society as a whole, in time of war. Its many activities make it the focal point from which should come the constant reminder, in these tragic times, that a humane civilization can flourish only under conditions of just human relationships.

May I express the sincere hope of the Government of the United States of America that there will be no lessening of the activities of the International Labour Organisation during the existing world emergency. We pledge ourselves to continue our full part in its constructive, non-political, international effort for the betterment of living standards.

Very sincerely yours, FRANKLIN D. ROOSEVELT."

Also early in the proceedings, Mr. Norman communicated to the onference a message from the British Government, as follows: -"It is a matter of great satisfaction to His Majesty's Govern-ment in the United Kingdom that in the difficult circumstances in which the world is at present situated, this Conference of American States is taking place in Havana as part of the normal functioning of the International Labour Organisation. His Majesty's Government in the United Kingdom, closely associated with its foundation, has always given the warmest support to the Organization and it does not propose to diminish this Majesty's Government in the United Kingdom, closely associated with its foundation, has always given the warmest support to the Organisation and it does not propose to diminish this support owing to the misfortune that it is now involved in war. The vital labour problems which are the concern of the Organisa-tion are in no way diminished in the present circumstances and indeed in some respects they are intensified. The Organisation doubtless has at present many special difficulties to face, but given goodwill—and of the existence of this not only among Governments, but also among Employers' and Workers' Organisations there is abundant evidence throughout the world—equally doubtless they will be overcome. To those who desire this end, nothing could give greater satisfaction than the signal proof of the strength of the ties which the Organisation has forged with the free nations in the Americas now afforded by the holding of this important Conference. The first Regional Conference held at Santiago in Chile in 1936 was a great success. It is the hope of His Majesty's Government in the United Kingdom that this second Conference in Havana will repeat that success and they are confident that the hope will be fulfilled."

Statements made on 23rd November, 1939, by the Foreign Secretary and the Minister of Labour and National Service.

the Minister of Labour and National Service. In reply to a Question in the House of Lords on 23rd November, 1939, Lord Halifax made the following statement :--"I am glad to be able to assure the noble Lord that His Majesty's Government in the United Kingdom maintain their full interest in all the activities which the League of Nations can carry on in present circumstances. In particular His Majesty's Government have shown their full approval of the decision of the Governing Body of the International Labour Office to attempt to continue its work as completely as conditions will allow. The two meetings of the Emergency Committee of the Governing Body have both been attended by a representative of His Majesty's Government, and an official observer has been sent to the Regional Conference of the American States Members of the International Labour Organisation now in session at Havana.

These are examples of the sympathetic interest which His Majesty's These are examples of the sympathetic interest when his majesty's Government continue to take in the work of the International Lakour Office, and they trust that other Governments will demonstrate the same interest, particularly in regard to the provision of funds to enable

January: 1940.

the organisation to maintain its efficiency. This question of the finances of the International Labour Organisation, as indeed of the League as a whole, will, by an agreement just reached between the members of the Assembly, be discussed by the Fourth Committee on December 4, and His Majesty's Government's representative on that Committee will naturally bear in mind the importance which His Majesty's Government attach to seeing the work of the International Labour Organisation carried on as effectively as possible in present acreditions " As was noted in the December issue of this GAZETTE (page 412), it was provided by an agreement concluded on 8th November, 1939, between the confederations of employers and workers in Italian

In reply to a Question in the House of Commons on 23rd November, 1939, the following statement was made by Mr. Ernest Brown, Minister of Labour and National Service :--

So, all following is defined in this matter by the transfer brown, nister of Labour and National Service :-" As has been stated by representatives of His Majesty's Government at meetings of the Governing Body of the International Labour Office on more than one occasion in the past year, the Government fully approve the decision reached by the Governing Body at its meeting in February, 1939, that in the event of war, it should attempt to function as completely and efficiently as possible. Since the outbreak of war, there have been two meetings of the Emergency Committee of the Governing Body and a representative of the Government has travelled to Geneva to attend each of them. He has had the opportunity of reaffirming at those meetings the Government's intention of co-operating to the fullest extent possible in present circumstances with the Organisation. There is being held at present in Havana the Second Regional Conference of the American States Members of the Organisation has been further demonstrated by the attendance of an observer at this Conference. It follows, from what I have said, that, in the view of His Majesty's Government, it is important that funds should be available to enable the work of the Organisation to continue on as effective a basis as possible, and it is their hope that all States Members, as they themselves with he operating heat all States Members, as they as possible, and it is their hope that all States Members, as they themselves, will be prepared to do their part in this respect. The representative of His Majesty's Government on the Fourth Committee, which is meeting early in December to discuss the League budget as a whole, including that of the International Labour Office, will be instructed to bear in mid the importance of such considerations, with a view to overcoming such difficulties

In the issues of this GAZETTE for November and December, 1939. accounts were given of recent legislation in Germany whereby all limitations on the working time of adult male workers were removed, limitations on the working time of adult male workers were removed, the normal restrictions on the working time of other categories of workers were relaxed, and employers were required to withhold from the workers and pay over to the Federal Exchequer the supplements normally payable, over and above the regular rates of pay, for overtime, night work, Sunday work and work performed on holidays. This legislation has now been revised in certain respects. As regards wages, an Order of the Federal Minister of Labour dated 16th November, 1939, prescribes that, in view of the special difficulties and the extra expenditure which have to be met by workers employed at night, on Sundays or on holidays, the prohibition of the payment to the workers concerned of wage supplements for such work is with-drawn, with effect as from 27th November, 1939. For ordinary overtime work, the payment of the wage supplements is regulated as may arise in the course of the coming year.' The 20th Session of the Assembly of the League of Nations, Geneva, December, 1939. The Assembly, as proposed in the Report of its Fourth Committee, approved the "revised and reduced" Budget of the International Labour Organisation as adopted by the Emergency Committee of the Governing Body in October (see above). The Report of the Fourth Committee, which was adopted as a whole by the Assembly, also referred to the special financial difficulties of the time, which required the Organisations of the League of Nations (including the Inter-national Labour Organisation) to curtail their expenditure substantially below even the level of the authorised credits in their budgets. In order to meet certain special difficulties which this December, 1939. overtime work, the payment of the wage supplements is regulated by a further Order dated 12th December, 1939, amending in certain respects the earlier legislation respecting the extension of working hours. According to an official summary of the Order, the process hours. According to an official summary of the Order, the process of the adaptation of the economic system to war requirements was sufficiently advanced to permit of the relaxation of the more stringent regulation of working conditions which it had been necessary to introduce as an exceptional measure. The Order in question is, therefore, designed to obviate unduly long working hours, and, above all, to afford protection to working women and young workers. Accordingly, the principle of the normal eight-hour working day is maintained, but, as hitherto, exceptions are permitted. The Order prescribes that the daily working time is not to be extended to more than 10 hours a day, except in connection with the alternation of budgets. In order to meet certain special difficulties which this might involve for the International Labour Organisation, the Assembly approved a proposal by the Secretary-General of the League to make an advance to the International Labour Office out of the Secretariat's share of the Working Capital Fund. It was also noted that steps were to be taken to study the relations between the two organisations with a view to promoting economies. The Report of the Special Committee on the Development of International Co-operation in Economic and Social Affairs (see above) was approved by the Assembly in a Resolution which, inter alia, "requested the Bureau to take the most appropriate steps for setting up the Central Committee proposed in the Report to unify the economic and social work of the League . . ., co-ordinating its work where necessary with that of the International Labour Office, which retains its present autonomy and competence." than 10 hours a day, except in connection with the alternation of shifts in continuous working; however, for male workers over 18 years of age the daily working time may be extended up to 12 hours if it includes regular and considerable periods of waiting for work (*Arbeitsbereitschaft*). The working of overtime is inconsistent with the intention of the Order if it can be obviated by improved arrangements within the undertaking, the engagement of additional workers or by other means. The head of the undertaking is, morethan 10 hours a day, except in connection with the alternation of workers or by other means. The head of the undertaking is, more-over, responsible for ensuring that the health and working capacity of the employed persons are not impaired by undue strain. Excep-tions from the foregoing limits of 10 or 12 hours a day are to be permitted only in exceptional cases by authorisation of the Federal Minister of Labour, or, if the exceptions are for a short period, by the Factory Inspectors. The worker's right to overtime pay at time and a curate metae in external for hours worked in energy of 10 c **INCREASED FAMILY ALLOWANCES** IN ITALY. On 1st December, 1939, the Italian Minister of Corporations announced 'that, in view of the needs of the workers in the present economic situation and the favourable position of the Family Allowances Fund, increased rates of family allowances would become operative on 1st December for non-manual workers, and on 4th December for manual workers in industry, and compared without each increase and a quarter rates is restored for hours worked in excess of 10 a day, except where the working hours include periods of waiting for work. For working hours up to 10 a day, the existing regulations are to remain operative, so that the overtime supplement is not payable to the workers concerned, but is to continue to be paid to the Federal Exchequer. The Order also prohibits the employment of women and young

Ist December for non-manual workers, and on 4th December for manual workers, in industry and commerce, without any increase in the rate of contribution. The compulsory payment of family allowances in industry, commerce and other branches of activity is regulated by the Royal Decree-Law dated 17th June, 1937 (see this GAZETTE for November, 1937). The increased rates of family allowances are compared with the old rates in the following Table :--

No. of dependent	hildre		Manual v	vorkers.	Non-manu	al workers
No. of dependent of	cimarei	1.	New rate.	Old rate.	New rate.	Old rate.
Industry :			lire.	lire. Rate per el	lire.	lire.
1 child			4.20	3.60	6.60	4.80
2 or 3 children			6.00	4.80	8.70	6.00
4 or more children			7.80	6.00	10.50	7.20
Commerce :			· (R	ate per ch	ild per mon	th.)
1 child			16.80 1	14.40	26.40	19.20
2 or 3 children	200.002		24.00	20.40	34.80	24.00
4 or more children	2 Houter	-	31.20	26.40	42.00	28.80

between the confederations of employers and workers in Italian industry, that the worker's contribution towards the cost of family allowances, namely one per cent. of his wages, should be borne by the employer so long as the agreement remained in force. The same interconfederal agreement made provision for the payment, from funds to be supplied by the employers, of allowances in respect of the wives and dependent parents of industrial workers who are heads of families. The allowance for a wife was fixed at the weekly rate of 7.20 lire for manual workers and 10.20 lire for non-manual workers. The allowance for a dependent parent was fixed at 4.20 lire and 6.60 lire a week for manual and non-manual workers, respectively, to become payable when a father attains the age of 60 years or a mother 55 years, or when either is permanently incapacitated. These provisions, together with corresponding provisions applicable to commercial and agricultural workers in industrial undertakings, were to take effect at the beginning of December, 1939. December, 1939.

December, 1939. In virtue of other recent collective agreements, allowances in respect of wives and dependent parents have been granted to workers in commercial undertakings and officers and men of the mercantile marine, and the family allowances payable to banking and insurance workers have been increased

WAR-TIME LABOUR LEGISLATION IN GERMANY

persons on night shifts. Exceptions from this prohibition are, however, to be permitted in exceptional cases by authorisation of the Federal Minister of Labour or, if the exceptions are for short periods, of the Factory Inspectors.

The Order is operative as from 1st January, 1940, except as regards the provisions respecting overtime supplements, which are to have effect as from 18th December, 1939. Applications for exceptions.under the Order are to be submitted to the Factory Inspectors by 1st January, 1940.

TAXATION OF WAGES IN FRANCE : Correction.

The sentence : " If the income does not exceed 10,000 francs a year, The sentence: If the income also hol exceed 10,005 frances a gent, the special tax is paid on the first 7,000 frances only," which occurs at the end of the first paragraph on page 411 (first column) of the issue of this GAZETTE for December, 1935, should read: "If the income does not exceed 10,000 frances a year, the special tax is paid only on that portion of the income which exceeds 7,000 frances."

WAGES AND HOURS MOVEMENTS OVERSEAS.

BELGIUM.

Working Hours in Coal Mines.—The application of a Royal Decree dated 15th December, 1939, modifying the working hours of under-ground workers in Belgian coal mines, was the cause of a short stoppage of work in the Hainaut coal-field in December. By a Royal Decree, dated 27th January, 1937, the normal working time of underground workers in coal mines was limited to 7½ hours a day and 45 hours a week (see this GAZETTE for February, 1937). The new Boyal Decree authorised the working of 2.312 hours in a

The new Royal Decree authorised the working of 2,312 hours in a year, subject to a maximum of 8 hours on any one day. On the assumption that there are 51 weeks of work in the year (coal miners being entitled to a statutory paid holiday of one week annually), 2,312 working hours a year would correspond to an average duration of working time of 45 hours 20 minutes a week. The Government, in promulgating the Royal Decree, pointed out that the new provisions involved a slight increase only in average weekly working hours, and that the possibility of extending working time to 8 hours on any one day would permit of the more effective recovery of time lost owing to national and local holidays, and so tend to improve the output of coal and reduce its cost.

The National Mine Workers' Federation requested the coal owners not to enforce the terms of the new Royal Decree until the Federation had defined its attitude at a meeting to be held on 29th December. A number of coal owners, however, announced that the new regulations would be applied on 26th December, and, in consequence, about 45,000 coal miners in Hainaut refused to work on this and the following day.

A provisional settlement was effected on 27th December, when it was agreed that the mines should be open for work on the old terms, pending the outcome of the meeting to be held on 29th December. At this meeting, the National Mine Workers' Federation decided to refer the terms of the new Royal Decree to the local organisations, and stated that, in its view, the Decree should be revised so as clearly to indicate its limitation to the present period of emergency, that the new arrangement of working hours should be applied generally and in such a manner as to secure to underground workers rest days after 17 days' work and to safeguard surface workers against loss of earnings, and that, meantime, the Government should suspend the application of the Decree.

DENMARK.

Wage Regulation in War-Time .- Although the majority of collective agreements in Denmark are not due to expire until 1st March, 1940, the Danish Confederation of Trade Unions, as early as September last, raised with the Employers' Confederation the question of the adjustment of wages to war-time increases in the cost of living. As the result of negotiations between the two organisations, a draft collective agreement laying down the bases for the war-time regulation of wages was drawn up and eventually approved by a ballot of the members of the organisations towards the middle of November. The agreement, which is stated to be the most comprehensive agreement of its kind ever concluded in Denmark, and will, it is anticipated, directly or indirectly regulate the wages of Danish workers generally, provides for the extension until 1st March, 1941, of all agreements due to expire on 1st March, 1940, subject to the adjustment of wages according to the following rules : on the basis of the official cost-of-living index figure, all time and piece rates of pay are to be adjusted in such a way that, for every point by which the index figure rises above or falls below the index figure at the date at which wages were last fixed, the rates are to be increased or reduced by 0.85, 0.55 and 0.35 ore an hour for adult male, women and young workers, respectively. The revision of wage rates is, however, to be effected only in respect of changes of at least 3 points in the index figure. The first adjustment, to be applied in and from the pay-week ended on 17th November, 1939, is to be made on the basis of a six points increase in the cost-of-living index figure to 190 in October, 1939 (July, 1914 = 100), and subsequent adjustments are to be based on the figures for January, April, July and October, 1940, and January, 1941. Increases in wage rates resulting from the agreement are to be regarded as cost of living supplements and, accordingly, the rates may not in any circumstances be reduced below the pre-war level.

The agreement does not cover agricultural workers, seamen and workers paid wholly or partly on a percentage basis or by tips, but it is anticipated that agreements covering these workers will eventually be concluded.

SWEDEN.

National Agreement for the Adjustment of Wages to War-Time Conditions.—An agreement which was concluded on 16th December, 1939, between the Swedish Employers' rederation and the National Federation of Trade Unions lays down the following basic principles ment of wage rates in Sweden to war-time increases in the cost of living. If, between 1st January and 1st April, 1940, there is a rise of at least six points in the official cost-of-living index figure, wage rates are to be adjusted at 1st May, and similar adjustments may be made at subsequent three-monthly intervals. The adjustment is to take the form of a supplement to normal wages representing about three-fourths of the actual percentage rise in the cost of living, and is to be calculated on the basis of the average wage rates, for male and female workers respectively, prevailing in the undertaking or undertakings concerned, in the area covered by the agreement or in specific localities. Should the cost of living fall, the supplement is to be reduced in a similar manner.

The two Federations recommend that these basic principles for wage regulation be incorporated in all collective agreements to be concluded between affiliated organisations, and that such agreements remain in force for at least one year.

It is anticipated that negotiations for the renewal of a large number of collective agreements, covering over half-a-mill workers, will shortly be resumed, and that the principles laid down in the national agreement will also be adopted in the case of agreements between unaffiliated organisations.

WAGES IN THE METAL, ENGINEERING AND SHIPBUILDING INDUSTRIES IN THE NETHERLANDS.

STATISTICS of wages at 1st July, 1939, and in the preceding six months, of workers employed in the metal, engineering and ship-building industries in the Netherlands are contained in the issue for October, 1939, of the official monthly journal of the Netherlands Central Bureau of Statistics, from which the figures in the following Tables have been extracted.

The first Table shows the average hourly rates of wages at 1st July, 1939, and the actual average hourly earnings during the first half of 1939 of skilled, semi-skilled and unskilled workers in the upper age classes, employed in undertakings affiliated to the *Metaalbond*, an important association of employers in the Netherlands metal, engineering and shipbuilding industries. Separate particulars are given for the three groups of industrial centres according to which the constituents of the Metaalbond are classified for purposes of wage regulation. The first of these groups comprises Amsterdam, Rotterdam and Schiedam, the second group, Utrecht, Hengelo, Haarlem, Velsen, Dordrecht and nine other centres, and the third group, Breda and nineteen other centres of minor importance.

Les all	Ind	ustrial Centr	
Class of Worker.	First Group.	Second Group.	Third Group.
Skilled workers (30 to 65 years, inclusive) :	Cents.	Cents.	Cents.

Semi-skilled workers (28 to 65 years,			
inclusive) : Average hourly time rate at 1st July, 1939	57	50	45
Average hourly earnings during first half of 1939	69	59	50
Unskilled workers (26 to 65 years, inclusive) :		and the second	
Average hourly time rate at 1st July, 1939	51	47	40
Average hourly earnings during first half of 1939	61	53	44

The particulars above relate to 23,602 workers, belonging to the upper age classes, of whom 10,939 were skilled, 7,906 were semi-skilled and 4,757 were unskilled. In all groups of workers, the actual average hourly earnings were slightly higher in the first half of 1939 than in the corresponding period of the previous year.

The second Table shows the average hourly earnings, in the first half of 1939, in some of the principal occupations and centres of the Netherlands metal, engineering and shipbuilding industries. The figures which relate, as before, to skilled, semi-skilled and unskilled workers in the upper age classes, cover constituents of the Metaalbond, as well as certain other undertakings.

An article dealing with wages in the Nether and shipbuilding industries in 1938 appeared in this GAZETTE for January, 1939.

* Together with some other localities.

EMPLOYMENT AT 11th DECEMBER, 1939-GENERAL REVIEW.

The following Table gives an analysis of the numbers* of persons on the registers at 11th December, 1939, with comparative figures for 13th November, 1939, and 12th December, 1938 :---

-	-	Wholly Unemployed (including Casuals).	Temporarily Stopped.	Т

Total	1,294,605	146,318	1,440,923	- 36,663
crease (+) or Decrease (-) as compared with : 13th November, 1939 12th December, 1938	- 44,240 - 324,032	+ 7,577 - 153,628	- 36,663 - 477,660	

There were reductions, between 13th November and 11th December, in the numbers unemployed in the distributive trades, hotel and boarding house service, dock, harbour, etc. service, the cotton industry, printing and bookbinding, the entertainment, sport, etc. industries, motor vehicle, cycle and aircraft manufacture, engineering, ship building and repairing, and the road transport and shipping services On the other hand, unemployment increased for seasonal reasons in agriculture, horticulture, etc., and the building industry; there was also some increase, due to temporary causes, in the numbers suspended from work in the coal mining industry.

The following Table shows the numbers of unemployed persons, aged 14 and over, on the registers of Employment Exchanges in each administrative division at 11th December, 1939, and the increases or decreases compared with 13th November, 1939 :---

Division.	Numbers on Register at 11th Dec., 1939.	Inc. (+) or Dec.(-) as compared with 13th Nov., 1939.	Division.	Numbers on Register at 11th Dec., 1939.	Inc. (+) or Dec. (-) as compared with 13th Nov., 1939.
London Eastern South-Eastern	286,754 60,200 41,407	-16,468 + 3,967 + 20	Scotland Wales	177,028 111,425	$\left \begin{array}{c} - & 8,797 \\ + & 924 \end{array}\right $
Southern South-Western	38,661	-3,835 + 42	Great Britain	1,361,525	- 41,063
Midlands North- Midlands	73,298	-3,992 + 5,976	Northern Ireland	79,398	+ 4,400
North-Eastern North-Western Northern	104,393	$\begin{vmatrix} + & 3,510 \\ - & 2,606 \\ - & 17,818 \\ + & 1,524 \end{vmatrix}$	Great Britain and North- ern Ireland	1,440,923	- 36,663

The decrease in the numbers unemployed occurred mainly in the London, North-Western and Scotland Divisions : there were also decreases in the Southern, Midlands, and North-Eastern Divisions. Unemployment increased in the North-Midlands, Eastern, Northern and Wales Divisions and in Northern Ireland. In the South-Eastern and South-Western Divisions there was little change.

Among insured persons, aged 16-64, the percentage unemployed in Great Britain and Northern Ireland at 11th December, 1939, was 9.1, as compared with 9.2 at 13th November, 1939, and 12.7 at 12th December, 1938. For persons within the general scheme the corresponding percentages were 9.1 at 11th December, 1939, 9.5 at 13th November, 1939, and 12.9 at 12th December, 1938. For persons within the agricultural scheme the percentages were 7.4. $5 \cdot 1$ and $8 \cdot 9$ respectively.

CHANGES IN THE PRINCIPAL INDUSTRIES.

Mining and Quarrying .- In the coal mining industry there some increase, due to temporary causes, in the numbers suspended from work. The percentage unemployed (including those tem-porarily stopped) among insured workpeople, aged 16-64, was 8.5 at 11th December, 1939, as compared with 7.4 at 13th November, 1939, and 14.4 at 12th December, 1938. Employment in the iron mining industry again showed little

* The numbers and percentages unemployed have probably been affected to some extent by the withdrawal of men from the industrial field owing to the recent expansion of H.M. Forces, but the information necessary to enable an estimate to be made of the effect of this factor is not available.

Increase (+) or De-crease () as compared with 13th Nov., 1939. 'otal. 97,984 55,418 77,168 50,955 923 5,042 28,007 8,937 51,525 41,063

41,063 69,847

AND.

EMPLOYMENT at 11th December showed an improvement as compared with 13th November. The following Table gives an analysis of the numbers* of persons quarries and also at slate quarries, where short-time working persisted. In the other mining and quarrying industries employment showed little change.

> Pig Iron, Iron and Steel and Tinplate .- Employment in the pig iron industry continued very good, and there was some reduction in unemployment in most of the principal producing areas. The per-centage unemployed at 11th December, 1939, was $5 \cdot 8$ as compared with 6.5 at 13th November, 1939, and 21.5 at 12th December, 1938,

> In iron and steel manufacture employment showed little change, on the whole, and continued at a very high level. At 11th December, 1939, the percentage unemployed among insured persons was 6.0 as compared with 5.9 at 13th November, 1939, and 24.5 at 12th December, 1938.

> Employment in the tinplate industry showed an improvement and continued fair. The percentage rate of unemployment among insured persons was 10.9 at 11th December, 1939, as compared with 12.8 at 13th November, 1939, and 37.5 at 12th December, 1938.

> Engineering, Shipbuilding and Other Metal Industries.-In the engineering industry the numbers unemployed showed a further decrease on the whole. Employment improved in the general, electrical, marine and constructional engineering sections of the industry in nearly all districts. In motor vehicle, cycle and aircraft manufacture, also, there was a decrease in the numbers of insured persons recorded as unemployed. In most branches of the industry unsatisfied demands for skilled labour continued; and there was an increase in the number of firms working overtime and night shifts. The percentage unemployed among insured persons in the engineering industry as a whole (excluding motor vehicle, cycle and aircraft manufacture) was $3 \cdot 2$ at 11th December, 1939, as compared with 3.4 at 13th November, 1939, and 7.8 at 12th December, 1938. At these dates the corresponding percentages in the motor vehicle, cycle and aircraft industry were 4.2, 4.8 and 5.0, respectively.

> Employment in the shipbuilding and ship-repairing industry showed a further slight improvement. The percentage unemployed among insured persons was 9.4 at 11th December, 1939, as compared with 10.1 at 13th November, 1939, and 22.5 at 12th December, 1938.

> There was a slight decrease in the numbers unemployed in most of the other metal industries. Employment again declined slightly, however, in the stove, grate, pipe and general ironfounding industry, with considerable short-time working.

> Textile Industries .- At 11th December there was a further reduction in the numbers unemployed in the cotton industry, affecting both the spinning and the weaving sections. It was reported that there was a serious shortage of juveniles in the spinning section and that the shortage of skilled weavers still continued. The percentage unemployed among insured persons in the industry as a whole was 7.0 at 11th December, 1939, as compared with 8.1 at 13th November, 1939, and with 21.2 at 12th December, 1938. In the preparing and spinning departments the corresponding percentages were 6.3, 7.1 and 19.7, and in the manufacturing department they were 7.7, 9.1and 22.8.

In the wool textile industry employment continued at a high level, although a decline occurred in the woolcombing department and in the rag trade. Shortages of skilled workers were again reported from many areas and it was stated that overtime was being worked by many firms. The percentage unemployed at 11th December, 1939, was 3.4, compared with 3.6 at 13th November, 1939, and 13.6 at 12th December, 1938. In the carpet industry there was a further improvement: the percentage unemployed fell from 11.3 at 13th November to 7.5 at 11th December, 1939; the corresponding figure for 12th December, 1938, was 7.2

There was a decrease in unemployment in most of the other textile industries, especially in the lace trade, where the percentage unemployed declined from 10.1 at 13th November to 7.7 at 11th December. An increase in the numbers unemployed was recorded in the jute trade, and in the textile bleaching, printing, dyeing, etc. trades. Shortages of skilled labour continued to be reported in respect of some of the textile trades, particularly in the hosiery industry.

Clothing Trades.—In the tailoring trades employment showed a further seasonal decline in London, but this was partly offset by increased activity at other centres. In the dressmaking and millinery trades there was some improvement; but there was little change in the hat and cap trade. Employment improved slightly in the other dress industries. In the clothing trades as a whole (exclusive of the boot and shoe industry) the percentage rate of unemployment among insured workers at 11th December, 1939, was 10.6. as compared with 10.5 at 13th November, 1939, and 11.9 at 12th December, 1938.

In the boot and shoe industry the numbers unemployed showed a further reduction. At 11th December, 1939, the percentage unemployed in Great Britain and Northern Ireland was 4.4, as compared with 5.0 at 13th November, 1939, and with 10.9 at 12th December, 1938.

Leather Trades.—In the leather tanning, currying and dressing trade (including fur dressing) the numbers unemployed showed a slight decrease in most areas. In other sections of the industry the numbers unemployed showed little change on the whole as compared with a month ago. For Great Britain and Northern Ireland, the percentage rate of unemployment in the leather trades as a whole decreased from 5.0 at 13th November, 1939, to 4.8 at 11th December, 1939; at 12th December, 1938, the corresponding figure was 8.7.

Building, Woodworking, etc.—The numbers unemployed in the building industry showed a further seasonal increase at 11th December, 1939. The increase affected all occupations excepting slaters and tilers, and was most marked with carpenters, bricklayers and painters. In the building industry as a whole the percentage unemployed at 11th December, 1939, was 15.8, as compared with 14.6 at 13th November, 1939, and 18.6 at 12th December, 1938.

In brick manufacture the numbers unemployed increased slightly. The percentage unemployed rose from 9.9 at 13th November, 1939, to 10.3 at 11th December, 1939; the figure for 12th December, 1938, was 11.8.

Employment in the furnishing trades showed little change; it again declined slightly in the sawmilling industry, but showed a slight improvement among coachbuilders.

Paper Manufacture, Printing and Bookbinding.-Employment in the paper-making industry showed little change as compared with the previous month and was much better than a year ago. The improvement reported in November in the printing and bookbinding industries continued in December but there was still some shorttime working. The percentage unemployed in the paper and paper-board industries was 3.5 at 11th December, 1939, compared with 3.6 at 13th November, 1939, and with 7.1 at 12th December, 1938. The corresponding figures for printing and bookbinding were 10.8, 12.2 and 7.3, respectively; for the cardboard box, paper bag and stationery industries they were 4.8, 5.0 and 5.0, respectively.

Pottery and Glass .- In the pottery industry unemployment showed an increase, mainly due to the completion of Christmas orders. The percentage unemployed among insured persons, aged 16-64, was 17.5 at 11th December, 1939, compared with 16.9 at 13th November, 1939, and with 23.0 at 12th December, 1938.

Employment in the bottle-making section of the glass trades, showed little change; in other sections there was a slight improvement.

Fishing.-Employment with fishermen showed little change. The percentage rate of unemployment in the fishing industry at 11th December, 1939, was 23.8, compared with 22.7 at 13th November, 1939, and 28.9 at 12th December, 1938.

Dock Labourers and Seamen.—Among dock labourers employment in December fluctuated to some extent, but was better, on the whole, than in the previous month. The percentage unemployed in dock, harbour, river and canal service was 20.6 at 11th December, 1939, compared with 23.3 at 13th November, 1939, and with 25.3 at 12th December, 1938. In harbour, river and canal service the corresponding percentages were 6.3, 7.0 and 10.8, respectively; in dock, wharf and lighterage (port transport) service, they were 23.3, 26.4 and 27.9, respectively.

There was a decrease between 13th November and 11th December in the number of seamen recorded as unemployed. Shortages of certain classes of ratings, especially deck hands and engineers, were reported from several areas. The percentage unemployed in shipping service was 18.0 at 11th December, 1939, compared with 19.3 at 13th November, 1939, and 26.8 at 12th December, 1938.

UNEMPLOYMENT SUMMARY BY DISTRICTS.

THE following Table shows, for each administrative division, the estimated numbers of insured persons, aged 16-64, at July, 1939, and the percentages of these totals represented by the numbers of insured persons recorded as unemployed at 11th December, 1939 :--

* See footnote * in previous column. † Up to and including June, 1939. these are revised percentages calculated on the basis of the estimated numbers insured at the dates referred to (see article on page 409 of the December, 1939, issue of this GAZETTE); those for later months are based on the estimated numbers insured at the beginning of July, 1939, and may be subject to slight revision. (The percentages for November, 1938, to October, 1939, given in the corresponding Table on page 414 of last month's issue of the GAZETTE, were based on the numbers insured at July, 1938, and not, as stated in the footnote, on the numbers insured at the dates referred to in the footnote to the Table.) ‡ Including the Special Schemes for the banking and insurance industries.

• From July, 1938, the figures include persons in the domestic employ-ments brought into insurance in April, 1938; the effect of this is shown by the two points for July, 1938. [†] The method of counting the unemployed was altered in September, 1937 (see article on page 379 of the October, 1937, issue of this GAZETTE). The effect of the change is shown by the two points for that month. [‡] Excluding the period April, 1926, to March, 1927, and agricultural workers, for whom no figures were available. § See explanation on page 20. • The figures for *Divisions* relate to the areas constituted after the pro-vincial reorganisation of the Ministry of Labour and National Service (see page 335 of the September, 1939, issue of this GAZETTE). † The figures for Ruthergien are included.

January, 1940.

UNEMPLOYMENT AMONG INSURED PERSONS, AGED 16-64, AT 11th DECEMBER: INDUSTRIAL ANALYSIS.

stopped (i.e., suspended from work on the understanding that they were shortly to return to their former employment). The Unemployment Insurance Acts provide, subject to certain

exceptions, for the compulsory insurance against unemployment of substantially all employed persons. The principal classes of excepted employments are indoor private domestic service, employment otherwise than by way of manual labour at a rate of remuneration exceeding in value £250 a year, employment as female professional nurse, and, subject to certain qualifications, employment in the teaching profession and in the police forces. Employment under public or local authorities, railways and public utility companies may, in certain circumstances, also be excepted. Persons aged 65 and over, and certain other classes, are excluded from insurance. The Unemployment Insurance Acts do not apply to persons serving in an established capacity in the permanent service of the Crown. Some persons employed in agricultural occupations are outside the scope of the agricultural scheme. These include sons, daughters, and other near relatives of the employer, persons not working under a contract of service, and persons engaged in such casual harvesting work as hop-picking, or gathering flowers, fruit, peas or potatoes (unless they normally undertake other insurable work). Persons not domiciled in Great Britain, such as Irish migratory labourers, are not included in the figures. Prior to September, 1934, juveniles under 16 years of age were also excepted, and they are excluded from the statistics in these Tables; particulars of the numbers of these juveniles recorded as unemployed at 11th December, 1939, are, however, given on page 24.

An unemployment book, on which is recorded the industry in which he is employed, is issued to every insured person, and this book must be lodged at an Employment Exchange whenever the insured person makes a claim for unemployment benefit or for an unemployment allowance, or registers as unemployed without claiming benefit or an allowance.

The statistics here presented show, industry by industry, the estimated number of persons, aged 16-64, insured against unemploy-ment at July, 1939, and the total number and percentage of such persons unemployed on 11th December, 1939,* distinguishing those wholly unemployed (*i.e.*, out of a situation) from those temporarily stopped (*i.e.*, we remedied from work on the understanding that the situation of the information on these points is lacking, the books remain in the "lodged" files, and are included in the statistics of unemployment, for a period of two months from the date on which the insured person was last in touch with the Exchange.

The numbers unemployed given in the following Tables relate only to persons, aged 16-64, insured against unemployment. They include insured persons of those ages maintaining registration at Employment Exchanges, together with those whose unemployment books remain lodged in the "two months" file referred to above. The figures given on pages 17, 18 and 19 relating to persons registered of Employment Exchanges include uninsured as well as insured persons at Employment Exchanges include uninsured as well as insured persons who are maintaining registration for employment, but not insured persons whose books are in the two months file. A Table showing the composition of the two series of figures is given on page 19.

The estimated numbers of insured persons in each industry are computed once a year, about November, on the basis of information obtained at the annual exchange of unemployment books. The figures relate to the beginning of July, and similar statistics are not available for other dates in the year. In considering the figures on pages 22 and 23 it should be borne in mind that the percentage rates of unemployment at November and December, 1939, have been calculated on the basis of the estimated numbers of insured persons at July, 1939, while the figures for December, 1938, used for the purpose of comparison, have been calculated on the basis of the estimated numbers of insured persons at July, 1938 (but see footnote * on page 23 regarding the percentages for all industries combined). In an industry in which a relatively large change has occurred between July, 1938 and July, 1939, in the estimated number of insured workpeople, this change may have an important effect on the relative percentage rates of unemployment.

• The numbers and percentages unemployed have probably been affected to some extent by the withdrawal of men the recent expansion of H.M. Forces, but the information necessary for making an estimate of this effect is not available.

TOTAL, GENERAL SCHEME†

TOTAL, GENERAL AND AGRICUM TURAL SCHEMEST ...

The percentage for all industries and services combined for December, 1938, used for this comparison, is the revised figure based on the estimated number insured at that date—see article on page 409 of the December, 1939, issue of this GAZETTE. The percentages for November and December, 1939, are based on the numbers insured at July, 1939.
 † Persons insured under the Special Schemes for the banking and insurance industries are included in these figures.

1939, by 1,000 or more :---

Industry.

Industries in which the total numbers unemployed decreased :---Distributive Trades Hotel, Public House, Restaurant, Boarding House, Club, etc., Ser-vice

PRINCIPAL CHANGES IN NUMBERS UNEMPLOYED.

The following Table shows, for Great Britain and Northern Ireland, the variations in unemployment in those industries in which the total numbers of insured persons aged 16-64 recorded as unemployed at 11th December, 1939, differed from the figures for 13th November,

-	Males.	Fe	emales.	T	otal.	Industry.		Males.	Fer	nales.	Total.

The figures above include those boys and girls whose unemployment books were in the "two-months' file " of lodged books, i.e., boys and girls who had registered as unemployed at some date within the previous two months and were not known to have found work, but were not maintaining registration as applicants for employment.

• Persons insured under the Special Schemes for the banking and insurance industries are included in these figures.

January, 1940. THE MINISTRY OF LABOUR GAZETTE.

EMPLOYMENT OVERSEAS.

[N.B.—The following paragraphs include an abstract of such official and other information as is available with regard to the state of employment abroad, in order to indicate, as far as possible, the fluctuations in employment in each country from period to period. The bases of the statistics published in the various countries are, however, not the same as those of the statistics relating to this country; and therefore the figures quoted below cannot properly be used with those on pp. 17-18 to compare the actual level of employment in Great Britain and Northern Ireland with that in other countries.] ÉIRE.*

THE number of persons on the live registers of the Employment Exchanges fell from 118,130 at 25th November, 1939, to 108,180 at 30th December. At 2nd January, 1939, the corresponding figure was 97,814.

GERMANY.†

The number of persons wholly unemployed in Greater Germany at the end of December, 1939, is officially stated to have been 128,000, as compared with 126,000 in the preceding month. The increase is attributed to seasonal influences. In neither month, it is stated, were there more than 18,000 unemployed persons included in the above formers who were fully employed above figures who were fully employable.

NETHERLANDS.1

Figures compiled by the State Department of Unemployment Insurance and Employment Exchanges show that, of 513,741 members of subsidised unemployment funds making returns for the week ended 28th October, 1939, $17 \cdot 2$ per cent. were unemployed during the whole week and 2.3 per cent. for less than 6 days. In the corresponding week and 2.3 per cent. for less than 6 days. In the corresponding week of the preceding month the percentages were 17.2 and 2.4, and in the last week of October, 1938, 21.5and 3.0. At the end of October, 1939, 265,332 applicants for work were registered at public Employment Exchanges, of whom 198,395 were unemployed; at the end of the previous month the corresponding totals were 267,753 and 203,823, and at the end of October, 1938, 335,784 and 318,674.

HUNGARY.§ Unemployment declined during September. The number of applications for employment registered at Employment Exchanges at the end of the month was 41,712, as compared with 42,670 at the end of the previous month, and 47,413 at the end of September, 1938. SWITZERLAND.

SWITZERLAND.|| Unemployment continued to decline during October. At the end of that month, 23,823 applications for employment (14.7 per thousand of the employed population according to the census of 1930) were registered at Employment Exchanges, as compared with 25,275 (15.7 per thousand) at the end of September, 1939, and 57,405 (40.0 per thousand) at the end of October, 1938. The monthly figures for 1939 are not fully comparable with those for 1938 owing to the exclusion from the statistics, as from January, 1939, of applicants for work provided with employment in their 1939, of applicants for work provided with employment in their normal occupation on relief works. Offers of situations at the dates mentioned above numbered 2,674, 2,631 and 1,506, respectively. Returns from unemployment insurance funds show that, of a total membership of 544,753, $4\cdot 2$ per cent. were wholly, and $2\cdot 8$ per cent. partially, unemployed at the end of September, 1939, the corresponding percentages being $4 \cdot 4$ and $2 \cdot 7$ at the end of June, 1939, and $6 \cdot 3$ and $4 \cdot 3$ at the end of September, 1938.

NORWAY¶

Returns furnished by ten trade unions with a total membership of 94,669 show that 15.0 per cent. of this membership were unemployed at the end of October, 1939, as compared with 13.1 per cent. at the end of September, 1939, and 18.5 per cent. at the end of October, 1938.

UNITED STATES.**

UNITED STATES.** There was a further increase in employment during October. According to returns received by the Bureau of Labour Statistics from employers, covering over one-half of the aggregate number of wage-earners in manufacturing industries, the number of work-people employed at the middle of October, 1939, showed an increase of 3.3 per cent., as compared with the previous month. Aggregate weekly earnings in the establishments covered rose during the same period by 8.2 per cent. If the average monthly index of employment in manufacturing industries for the three years 1923-1925 be taken as 100 the corresponding index for October 1939 was be taken as 100, the corresponding index for October, 1939, was $103 \cdot 3^{++}_{1,3}$ as compared with $100 \cdot 0^{++}_{1,3}$ for the previous month, and $92 \cdot 4$ for October, 1938.

Reports received by the American Federation of Labour from affiliated trade unions in 24 cities showed that, in November, 1939, 11^{††} per cent.of the membership of these unions covered by the returns

1177 per cent.of the membership of these unions covered by the returns were unemployed, as compared with 11 per cent. also in October, 1939, and 16 per cent. in November, 1938. According to the estimates of the American Federation of Labour, the total number of unemployed persons in the United States in October, 1939, was 9,221,000,†† as compared with 9,451,000‡‡ in September, 1939, and 10,371,000 in October, 1938. The National Industrial Conference Board assesses the total number of unemployed persons in October 1939, at 8,149,000 ‡‡ a decline of 47,000 as persons in October, 1939, at 8,149,000, †† a decline of 47,000 as npared with the previ is month, and of over one million as compared with October, 1938.

CANADA.*

Industrial employment showed a further increase at the beginning November. The total number of workpeople employed at 1st ovember, by 11,914 firms from which returns were received by N the Dominion Bureau of Statistics, was 1,206,183, as compared with 1,187,269 at the beginning of October, 1939. If the average with 1,137,259 at the beginning of October, 1939. If the average number of workpeople employed by the reporting firms in the year 1926 be represented by 100, the index of employment for November, 1939, was 123.6, as compared with 121.7 at 1st October, 1939, and 114.6 at 1st November, 1938. At the end of November, 1939, 9.7 per cent. of the aggregate membership (approximately 244,000) of trade unions making returns were unemployed, as compared with 9.0 per cent. at the end of October, 1939, and 13.7 per cent. at the end of November, 1938.

RETAIL PRICES OVERSEAS.

N.B.—While the percentages given in the following Summary Tables are derived from the most authoritative sources of statis-tical information, certain differences in the nature and scope of the data used, in the methods of combining such data and in the periods for which the rise is measured, suggest the need for caution in drawing conclusions from a comparison between the figures for any two countries or cities. In every case, the percentage calculation is based on the cost of a fixed list of commodities taken in identical quantities. quantities.

All the figures given in the Table are exclusive of (a) invenies under 16 years of age, and (b) persons insured under the Agricultural Scheme.
 Persons aged 65 and over, who were insurable against unemployment prior to 2nd January, 1928, eased to be insurable as from that date. Information was available, however, which enabled estimates to be manployed in September, 1937 (see the October, 1937, issue of this GAZETTE, page 379). Since that date, persons on the registers who are subsequently found to have been in employment on the date of the count are excluded from the unemployment for June, 1937, and the secret of the old procedure for counting the unemployed was introduced in September, 1937 (see the October, 1937, issue of the old procedure for counting the unemployed was introduced in September, 1937 (see the October, 1937, issue of the old procedure for counting the unemployed was introduced in September, 1937 (see the October, 1937, issue of the old procedure for counting the unemployed was introduced in September, 1937 (see the October, 1937, issue of the old procedure for counting the unemployed was introduced in September, 1937, issue of the old procedure, see as to provide a comparable series of "index "numbers on the basis of the new procedure, lave been equated to those obtained on the basis of the old procedure, so as to provide a comparable set of the industries concerned (and also for the totals for the industry groups affected) two figures are shown for 1935; of these, the figures for June 1938 have been equated to those on the date is of index numbers, unaffected by the change in the (a) so as to provide a comparable series of index numbers, unaffected by the change in the (a) so as to provide a comparable series of index numbers, unaffected by the series in the (b) for the year 1938 have been equated to those on the date of the change of index numbers, unaffected by the change in the secope of the Unemployment. FOOD.

THERE was no appreciable change in the average level of retail prices of food at 1st January, 1940, as compared with a month earlier.

There were small increases during the month in the average prices of cheese, butchers' meat and bacon. On the other hand, there were seasonal reductions in the prices of eggs. The average prices of flour, bread, tea, sugar, milk, butter, margarine and potatoes were practically the same at the two dates.

The following Table compares the average retail prices in the United Kingdom generally at 1st January, 1940, as shown by the returns collected for the purpose of these statistics, with the corresponding prices at 1st December and 1st September, 1939 :--

On the basis of these figures, the average level of retail food prices at 1st January, 1940, was about the same as a month earlier,

• A rise of 1 point on a total of 173, for "all items," is equivalent to a little

representative. [‡] The increase in price as compared with 1st December was slight, but sufficient to alter the average, expressed to the nearest [‡]d. [§] Mostly Canadian or New Zealand cheese, but in some districts the returns relate to another kind, locally representative.

but showed a rise of nearly 14 per cent. (19 points on a total of 138) since the beginning of September, 1939.

January, 1940.

ITEMS OTHER THAN FOOD.

There has been no change since the beginning of September, 1939, in the general level of working-class rents (including rates). As compared with July, 1914, the average increase is estimated at about 62 per cent.

As regards *clothing*, information collected from representative retailers in a number of the principal towns indicates that at 1st January, 1940, the prices of clothing of the kinds generally bought by working-class families averaged about 2 per cent. higher than at 1st December, 1939, and about 20 per cent. higher than at 1st Sep-tember, 1939. For men's suits and overcoats, the average increase during December was about 2 per cent.; for woollen materials, underclothing and hosiery the increase was about 3 per cent.; for cotton materials and hosiery it was about 3 per cent.; and for boots and shoes it was about 3 per cent. Owing to the wide range of quotations, to changes in qualities, and to the variations in the extent to which different articles have been affected by price changes, it is not possible to make an *exact* comparison over a long period of years, but on the basis of such information as is available it is estimated that at 1st January, 1940, the average rise over the level of July, 1914, was about 150 per cent.

In the *fuel and light* group, the average level of coal prices was about 1 per cent. higher at 1st January, 1940, than at 1st December, 1939, 7 per cent. higher than at 1st September, 1939, and about 108 per cent. higher than in July, 1914. The corresponding per-centages for gas were 8, 15 and 78, respectively. Prices of lamp oil and of candles rose by about 5 and 11 per cent., respectively, during December, while those of matches showed practically no change. For the fuel and light group, as a whole the average level of prices For the fuel and light group as a whole, the average level of prices at 1st January, 1940, was about 3 per cent. higher than at 1st December, 1939, 10 per cent. higher than at 1st September, 1939, and about 100 per cent. higher than in July, 1914.

As regards other items included in these statistics, there were increases during December in the prices of domestic ironmongery, brushware and pottery, averaging about 2 per cent. The prices of soap, soda, newspapers, tobacco and cigarettes, and fares remained generally unchanged during the month. For the "miscellaneous" group of items, as a whole, the average level at 1st January, 1940, was about 1 per cent. above that at 1st December, 1939, 6 per cent. above that at 1st September, 1939, and about 90 per cent. above the level of July, 1914.

ALL ITEMS.

If the average increases in the cost of all the foregoing items are combined in accordance with their relative importance in workingclass family expenditure prior to August, 1914, the resultant general average increase at 1st January, 1940, is approximately 74 per. average increase at 1st January, 1940, is approximately 74 per. cent. over the level of July, 1914, as compared with 73 per cent at 1st December, 1939, and 55 per cent. at 1st September, 1939. The result of this calculation (in which the same quantities and, as far as possible, the same qualities of each item are taken at each date) is to show the average increase in the cost of maintaining unchanged the standard of living prevailing in working-class families prior to August, 1914, no allowance being made for any changes in the standard of living since that date, or for any economies or re-adjustments in expenditure which may have been effected since the outbreak of the war.

The rise of 19 points since the beginning of September, 1939, (i.e., from 155 to 174 when July, 1914, is taken as 100) is equivalent to about 12 per cent. Of these 19 points, between l_2^1 and 2 points are due to the increases, since that date, in the taxes on sugar and tobacco.

SUMMARY TABLE : ALL ITEMS.

The following Table shows the average percentage increase, as compared with July, 1914, for all the items included in the statistics, at the beginning of each month, 1920 to 1940 :--

A detailed account of the method of compilation of these statistics, "The Cost of Living Index Number: Method of Compilation," is obtainable, price 3d. net (32d. post free), from H.M. Stationery Office at any of the addresses shown on the cover of this GAZETTE.

January, 1940.

Number, Magnitude and Duration.—The number of disputes volving stoppages of work, reported to the Department as beginning a December in Great Britain and Northern Ireland, was 40, as involving stoppages of work, reported to the Department as beginning in December in Great Britain and Northern Ireland, was 40, as compared with 79 in the previous month and 30 in December, 1938. 1,700 workpeople, work was resumed pending negotiations. In these 40 new disputes about 11,000 workpeople were directly In the following Table is given an analysis, by groups of industries, involved, and 2,300 workpeople indirectly involved (*i.e.*, thrown out of work at the establishments where the disputes occurred, though not themselves parties to the disputes). In addition, about 2,500 of all disputes in progress in December :-workpeople were involved, either directly or indirectly, in 12 disputes which began before December and were still in progress at the beginning of that month. The number of new and old disputes was thus 52, involving 15,800 workpeople, and resulting in a loss, during December, estimated at 36,000 working days.

Causes.—Of the 40 disputes beginning in December, 11, directly involving 1,100 workpeople, arose out of demands for advances in wages, and 9, directly involving 2,800 workpeople, on other wage questions; 2, directly involving 2,700 workpeople, on questions as to working hours; 8, directly involving 2,500 workpeople, on to working hours; 8, directly involving 2,500 workpeople, on questions respecting the employment of particular classes or persons; 8, directly involving 1,600 workpeople, on other questions respecting working arrangements; and one, directly involving 100 workpeople, on questions of trade union principle. One dispute, directly involving 200 workpeople, arose out of the issue of summonses to certain workpeople for breach of contract.

Results.—Final settlements of disputes which terminated during December have been effected in the case of 33 new disputes, directly involving 9,100 workpeople, and 9 old disputes, directly involving 2,200 workpeople. Of these new and old disputes, 6, directly involving 1,200 workpeople, were settled in favour of the workpeople; 26,

PRINCIPAL DISPUTES INVOLVING STOPPAGES OF WORK DURING DECEMBER.

* Disputes involving less than 10 workpeople, and those which lasted less than one day, have, as usual, been omitted from the statistics, except when the aggregate duration (*i.e.*, number of workpeople multiplied by number of working days, allowing for workpeople replaced, etc.) exceeded 100 days. † *I.e.*, thrown out of work at the establishments where the disputes occurred but not themselves parties to the disputes.

In accordance with the provisions of the agreements under which wages are regulated, the increase in the selling-price of pig iron in the Nottingham District resulted in increases in the wages of blastfurnacemen in Nottingham and Leicestershire, and of ironstone and limestone quarrymen in Leicestershire and certain adjoining parts of Lincolnshire. In the case of blastfurnacemen, ironstone miners and quarrymen in North Lincolnshire, the ascertainment warranted a reduction in wages, but it was agreed that wages should continue to be paid at the same level.

In the case of Siemens steel workers in South-West Wales and iron puddlers and millmen in the West of Scotland, the ascertainments did not warrant a change in wages, but it was agreed that advances in wage rates should be granted in November in anticipation of future advances under the sliding scales.

Details of the changes in wages referred to above were given on pages 430 and 431 of the December, 1939, issue of this GAZETTE.

CHANGES IN RATES OF WAGES AND HOURS OF LABOUR IN DECEMBER.

Rates of Wages.

In the industries covered by the Department's statistics,* the changes in rates of wages reported to have come into operation in December in Great Britain and Northern Ireland resulted in an increase estimated at about £250,000 in the weekly full-time wages of 2,155,000 workpeople, and in a decrease of £350 in those of 46,000 workpeople.

The particulars are analysed by industry groups below :--

In the mining and quarrying group there were increases in the rates of wages of coal miners in Northumberland, Yorkshire, Derbyshire (except South Derbyshire), Cannock Chase, North Staffordshire, Leicestershire, and Warwickshire, and a decrease in Nottinghamshire, the changes being due to fluctuations in the proceeds of the industry as shown by the district ascertainments. Other workpeople in this group whose rates of wages were increased included quarrymen in several districts, shale miners in Scotland, and cokemen and byproduct workers in South Yorkshire.

The principal increases in the brick, chemical, etc. group affected workpeople employed in cement manufacture in Great Britain and Northern Ireland, drug and fine chemicals workers, brickmakers, and paint, colour and varnish workers. Other workpeople whose wages were increased included glass workers in various districts, and timeworkers employed in match manufacturing in Great Britain.

In the metal group the principal change affected women and girls employed by federated firms in the engineering industry, for whom a standard minimum schedule of wage rates was adopted. Other workpeople whose wages were increased included workpeople employed in heating, ventilating and domestic engineering, wire makers, lock, latch and key makers in England, metal bedstead makers and metal pen makers in Birmingham and district, gold and | of this issue of the GAZETTE.

silver workers at Birmingham and Sheffield, iron puddlers and millmen in the Midlands, South Yorkshire and South Lancashire, tinplate makers in South Wales, Monmouthshire and Gloucestershire, and electrical cable makers (timeworkers).

In the clothing group there were increases for workpeople employed in the ready-made and wholesale bespoke tailoring trades, shirtmakers, glove makers and boot and shoe makers. Building trade operatives in Great Britain and Northern Ireland

received an increase of ¹/₂d. per hour. Other workpeople in this group whose wages were increased included men employed by civil engineering contractors, and asphalt workers. The principal increases in the other industry groups affected

workpeople employed by electricity supply undertakings in Great Britain and Northern Ireland, coal trimmers at various ports, and employees of municipal tram, omnibus and trolleybus undertakings in Great Britain and Northern Ireland. Other workpeople whose wages were increased included linen workers in Northern Ireland, those employed in flannel manufacture in Wales, silk workers at Macclesfield, lace and net dressers and curtain finishers at Nottingham, asbestos makers, sawmill workers in various districts, furniture trade operatives in a number of towns, brush and broom makers, employees of waterworks undertakings in the Midlands, Home Counties, and South Wales and Monmouthshire areas, and manual workers employed in the non-trading departments of local authorities in certain districts.

Of the estimated total increase of £250,100 per week, £23,700 was due to the operation of sliding scales based on selling prices or on the proceeds of the coal mining industry; £127,940 was due to arrangements made by joint standing bodies (including £62,550 under cost-of-living sliding-scales arranged by such bodies); £20,750 was due to the operation of other sliding scales based on the cost of living; £10 was due to mediation; and the remaining £77,700 was the result of direct negotiations between employers and workpeople or their representatives.

The whole of the estimated decrease of £350 per week was due to the operation of a sliding scale based on the proceeds of the coal mining industry.

Hours of Labour.

No important changes in normal weekly hours of labour were reported as having come into operation in December, 1939.

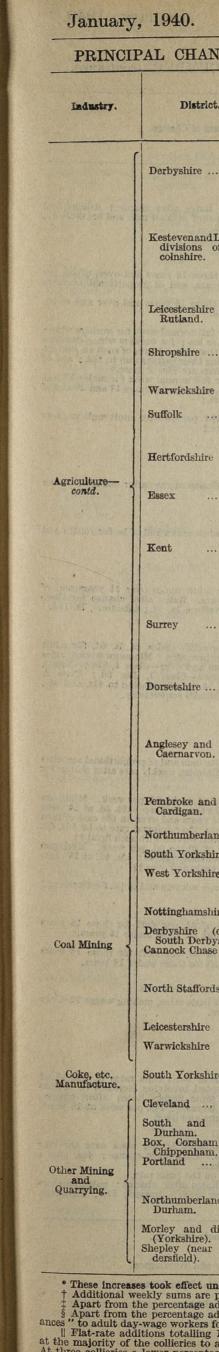

Changes in Wages and Hours in 1939.

A special article dealing with these changes appears on pages 3 to 5

The particulars of numbers affected and amount of change in the weekly wages and hours of labour exclude changes affecting Government employees, agricultural labourers, shop assistants and clerks, for which classes the information available is not sufficient to form a basis for statistics. Where information is available, however, details of changes in the wages and hours of these classes are shown in the list of principal changes recorded. The estimates of the effects of the changes on weekly wages are based on normal conditions of employment and do not take into account the effect of short-time working, etc.
 These increases took effect under Orders issued under the Agricultural Wages (Regulation) Act, 1924.

UNEMPLOYMENT ALLOWANCES.

As from 1st April, 1937, the cost of Unemployment allowances in Great Britain is met from the Unemployment Assistance Fund which is reimbursed by the Exchequer.

As from 6th September, 1939, the class of persons to whom allowances may be paid under the Unemployment Assistance Act, 1934, has been extended by the provisions of the Unemployment Assistance (Prevention and Relief of Distress) Regulations, 1939, (see article on page 360 of the October, 1939, issue of this GAZETTE).

For the period of five weeks ended 30th December, 1939, expendi-ture on unemployment allowances (excluding the cost of adminis-tration) amounted to approximately $\pounds 2,399,000$ compared with $\pounds 1,948,000$ during the four weeks ended 25th November, 1939, and $\pounds 3,549,000$ during the five weeks ended 31st December, 1938.

Owing to the extension referred to above, the figures for November and December, 1939, are not comparable with those for December, 1938.

LEGAL CASES AFFECTING LABOUR.

MASTER AND SERVANT-RIGHT OF SERVANT EMPLOYED ON HOURLY BASIS TO WAGES DURING SICKNESS.

This was a claim by a radial driller for wages in respect of two periods (of approximately three weeks and five weeks respectively) when he was unable to work owing to sickness. The workman had been engaged on the basis of being paid 39s. 0d. a week for a 47 hours week plus the national bonus of 16s. 6d. a week. After a few days he was put on piece-work, and if his pay then amounted to less than he would have received if working on time, the amount was made up to him and he also received the bonus.

position of persons engaged in various forms of National Service. whether in the Armed Forces or otherwise, who are not provided for under the normal Unemployment Insurance statutory provisions. A Regulation has also been made postponing until further notice the operation of the "holiday provisions" of the Unemployment Insur-ance Act, 1939, and the amendments of the "continuity rule" The workman's contention was that, where the contract of service was subsisting, his right to wages was not suspended merely because he was away ill unless there was an express or implied term in which were to have come into operation on 18th January, 1940. his contract of employment to that effect.

The employers' case was that men in the plaintiff's position were Regulation 3 makes a minor change in the principal Regulations designed to enable a refund of contributions paid in error to be made in certain cases where application was made prior to the date employed on the terms of no work, no pay. If a man was sick, or there was a public holiday, or he applied for leave for family reasons, he was not entitled to pay. The men must be assumed to be enof the principal Regulations. gaged on terms which were universally recognized as the practice throughout the trade. Also, a notice was conspicuously displayed which stated that employment was on an hourly basis, which meant that a man would only be paid for the hours on which he worked. If that was the basis of the contract, the plaintiff was not entitled Regulation 4 introduces a drafting amendment to Regulation 10 of the principal Regulations. Regulation 5 adds additional Regulations (19 to 24) to the principal Regulations. to receive pay while sick.

Mr. Justice Atkinson, in giving judgment dismissing the workman's claim, said that the action was brought on a misunderstanding of what was decided by the Court of Appeal in Marrison v. Bell. There had been two lines of cases running side by side from time imme morial, one being those in which an employee had been held entitled to pay when he was ill on the basis that his engagement was for a month, or a year, and the consideration was his readiness and willingness to work; and the other where the consideration was the work done, in which, if the work was not done, the pay was not earned.

After reviewing the evidence his Lordship said that it seemed too clear for argument that it was a term of the plaintiff's employment that he should only be paid for the work which he did. He (his Lordship) was satisfied that that was a custom of this particular trade or industry and that the plaintiff understood it to be so. Then came the decision in Marrison v. Bell which led the plaintiff to suppose that, as a matter of law, he was entitled to something, and so he made the present claim. The question was purely one of fact; he (his Lordship) found that the plaintiff was only entitled to be paid for the work which he did. There must be judgment for the defendants. *Hancock* v. B.S.A. Tools, Limited. High Court of Justice, King's Bench Division. 11th December, 1939.

INDUSTRIAL COURTS ACT, 1919 AND CONCILIATION ACT, 1896. **Recent Proceedings.**

INDUSTRIAL COURT AWARD.

ARTIFICIAL LIMB MAKERS :- The Staff Representation Committee of the employees of J. E. Hanger and Company Limited, and Arti-ficial Limb Makers Limited, claimed an adjustment of wages in relation to the increased cost of living owing to the war. They claimed, for the first 10 points increase on the August, 1939, cost-of-living figures, as issued by the Ministry of Labour, a bonus of 2d. an tinuous unemployment. hour in the case of employees of 21 years of age and over, of $1\frac{1}{2}d$. an THE UNEMPLOYMENT INSURANCE (SUBSIDIARY hour in the case of employees of 18 and under 21 years of age, and EMPLOYMENTS) ORDER, 1939. of 1d. an hour for those under 18 years of age. The employers submitted that the bonus should be assessed at 1d., $\frac{3}{4}$ d., and $\frac{1}{2}$ d., an hour, or alternatively 4s., 3s., and 2s. a week at the respective ages. The Court decided in favour of the proposal of the employers, viz., that the wages of the employees concerned should be increased by 4s., 3s. and 2s. a week and that for each rise or fall of 5 points in the full of 5 points in the section of the proposal of the employees for the section of the point is the section of the point of A Subsidiary Employments Order was made at the same time as the above Regulations, excepting from insurance part-time members of the Air Ministry Observer Corps and part-time Coast Auxiliary Watchers. the cost-of-living figure the wages at the respective ages should be increased or decreased by 2s., 1s. 6d. and 1s. a week.—Award No. 1742; dated 4th December, 1939. TRADE BOARDS ACTS AND HOLIDAYS WITH PAY ACT.

THE Home Secretary has made the following Regulations :--

UNEMPLOYMENT INSURANCE.

THE UNEMPLOYMENT INSURANCE (EMERGENCY POWERS) AMENDMENT) REGULATIONS.

The Minister of Labour and National Service made the above Regulations on 20th December, 1939, amending the principal Unemployment Insurance (Emergency Powers) Regulations, which were made on 6th September. One main object of these Regulations is to regularise the insurance

The details are as follows :---

Regulations 19 and 20 amend Sections 95 (2) and 96 of the Unemployment Insurance Act, 1935, which provide insurance rights for members of the Armed Forces. Previously Reservists, Territorials and men enlisted for the duration were only insured during their first four months of service if they were previously insured (Section 95 (2)). If they served beyond four months, however, they received a credit of contributions at the rate of one for every week of service, irrespective of their previous insurance status (Section 96). This has been amended so that all members of the Armed Forces, apart from Officers, will receive a credit of contributions on discharge, irrespective of their length of service. Officers will continue to be insured for their first four months of service, if they were previously insured. The amended provisions of Sections 95 and 96 are also extended to Officers and members of certain auxiliary organisations serving with the Armed Forces, such as the Women's Royal Naval Service, the Auxiliary Territorial Service, and women members of V.A.Ds.

Regulation 21 provides for the insurance of temporary members of Police Forces, or of the Police War Organisations, recruited for service during the emergency. Previously certain members of these Forces were not insurable.

Regulation 22 brings into insurance nursing auxiliaries serving in hospitals or in connection with the Civil Defence Scheme, while leaving professional nurses outside insurance. Women who take up nursing duties as a form of National Service are regarded as in a different position to professional nurses, and they have therefore been given insurance rights.

Regulation 23 extends the Regulations regarding employment abroad to persons who go abroad to take up work in certain specified "war occupations," whether or not they were previously insured.

Regulation 24 postpones the operation of Sections 1 (1-6) and 3 of the Unemployment Insurance Act, 1939, which were to have come into operation on 18th January, 1940, until such date as the Minister may appoint. Section I empowered the Minister, in conjunction with the Minister of Health, to make Regulations defining "holidays" and "remuneration in respect of holidays" for the purpose of the Unemployment Insurance Acts, while Section 3 dealt with certain amendments in the "centin ity rule" for reckoning periods of con-tinuous unemployment

NOTICES OF PROPOSAL.

Rubber Reclamation Trade Board (Great Britain). Proposal R.R. (1), dated 5th December, 1939, to fix minimum

Notice of Intention to make a Special Order applying the Trade Boards Acts, 1909 and 1918, to the Furniture Manufacturing Trade.

facturing Trade. The Minister of Labour and National Service hereby gives notice that he intends, pursuant to the powers conferred by Sections 1 and 2 of the Trade Boards Act, 1918, and by virtue of the provisions of the Minister of National Service Order, 1939, to make a Special Order applying the Trade Boards Acts, 1909 and 1918, to the Furniture Manufacturing Trade as set out in the Special Order. Copies of the Draft Special Order may be obtained on application in writing to the Secretary, Ministry of Labour and National Service, Sunnyside Mansions Hotel, Knowsley Road, Southport, Lancs. Objections to the Draft Special Order must be sent so as to reach the Minister of Labour and National Service at the above address within 40 days from the twenty-second day of December, 1939, that is to say, on or before the thirty-first day of January, 1940. Every objection must be in writing and must state :---(a) the specific grounds of objection; and

(a) the specific grounds of objection; and (b) the omissions, additions or modifications asked for.

Given under the Official Seal of the Minister of Labour and National Service this eighteenth day of December in the year one thousand nine hundred and thirty-nine. (L.S.)

T. W. PHILLIPS. Secretary of the Ministry of Labour and National Service.

DRAFT SPECIAL ORDER. TRADE BOARDS.

Furniture Manufacturing Trade.

Whereas the Minister of Labour is empowered under and by virtue of subsection 2 of section 1 of the Trade Boards Act, 1918. Whereas the Minister of Labour is empowered under and by virtue of subsection 2 of section 1 of the Trade Boards Act, 1918, to make a Special Order applying the Trade Boards Acts, 1909 and 1918, to any specified trade to which they do not at the time apply if of opinion that no adequate machinery exists for the effective regulation of wages throughout the trade and that accordingly having regard to the rates of wages prevailing in the trade or in any part of the trade it is expedient that the Trade Boards Acts, 1909 and 1918, should apply to that trade. And whereas the Trade Boards Acts, 1909 and 1918, do not apply to the trade specified in the Appendix to this Order. And whereas by virtue of the provisions of the Minister of National Service Order, 1939, the functions exercisable by the Minister of Labour under the Trade Boards Acts, 1909 and 1918, are now being exercised concurrently by the Minister of National Service and the Minister of Labour and the Minister of Iabour and National Service. And whereas by the said Order it is provided that so far as may be necessary for such concurrent exercise any reference to the Minister of Labour in any of the documents therein specified passed or made before the date of that Order shall be construed as a reference to the Minister of Labour and National Service. And whereas the Minister of Labour and National Service is of the service the date of the Order shall be construed as a reference to the Minister of Labour and National Service.

And whereas the Minister of Labour and National Service is of the aforesaid opinion. Now therefore the Minister of Labour and National Service by

virtue of the powers and provisions aforesaid and of all other powers in that behalf hereby makes the following Special Order :---

1. The Trade Boards Acts, 1909 and 1918, shall apply to the

1. The Trade Boards Acts, 1909 and 1910, shall apply to the trade specified in the Appendix hereto. 2.—(i) This Order may be cited as the Trade Boards (Furni-ture Manufacturing) Order, 1940. (ii) The Interpretation Act, 1889, applies to the interpretation of this Order as it applies to the interpretation of an Act of Basliement

Parliament. (iii) This Order shall come into force on the

day of 1940.

Given under the Official Seal of the Minister of Labour and National Service this day of is day of in the year one thousand nine hundred and forty

Secretary of the Ministry of Labour and National Service.

APPENDIX TO DRAFT SPECIAL ORDER.
