PURE AIR in BLACKED OUT FACTORIES

A "fuggy" atmosphere is ideal for the breeding and multiplication of infectious germs, and regular purifying of the air is a vital necessity. Horton W.T. Anti-Germ Spraying Fluid offers a simple and effective means of keeping the air clean and pure. It is a safeguard against the spread of infection, loss of labour through illness, and its use is a necessary precaution in all factories and workshops, particularly where two or more shifts are working.

HORTON W.T. ANTI-GERM SPRAYING FLUID

is a highly concentrated germicide which, sprayed from an atomiser, has the triple action of washing, deodorising and disinfecting the air.

Price, 26 |- per gallon, Carriage Paid.
Dilution: I part in 150 parts of water (6 teaspoonfuls to a gallon).
Perfumes: Pine, Eau-de-Cologne, Coal Tar, Bouquet.

Write for Free Sample.

AEROGRAPH ARITHMETIC

SUBTRACT

Don't SUBTRACT from your output capacity by permitting obsolete methods or equipment in your paintshops—so often the "bottleneck" of an otherwise efficient production programme.

Install modern AEROGRAPH spraypainting equipment and save time, money and labour.

In addition to maximum speed of application, it produces a superb finish and it is often the only way to deal with "difficult" articles successfully.

Send for an AEROGRAPH engineer if you have an urgent finishing problem.

SPEED UP WITH
