Young Persons Entering Employment

NDER the National Insurance Scheme the issue of insurance cards to young persons under 18 years of age is entrusted to Youth Employment Offices, most of which are conducted by Local Education Authorities. By arrangement with the Youth Employment Offices, whenever an insurance card is issued to a boy or girl who has completed full-time education and has just entered or is about to enter insurable employment, there is also compiled a specially designed statistical record card on which the following particulars are entered:—age at the time when full-time education ceased; age at the time of entry into insurable employment; the code number of the employer's industry (according to the Standard Industrial Classification); and the type of occupation. For the purpose of the last item, occupations are grouped under four headings, viz., (a) apprenticeship to a skilled craft (i.e., apprenticeship or learnership with or without an indenture or other form of written agreement); (b) employment leading to recognised professional qualifications (law, accountancy, surveying, nursing, etc.); (c) clerical employment not covered by (b); and (d) other employment. The record cards are sent to the Statistics Department of the Ministry of Labour and National Service for tabulation.

The main limitation to be borne in mind when considering the figures derived from this information is that young persons who had already obtained insurance cards in respect of part-time or holiday work while still at school are excluded from the figures. It is known, however, that the deficiency on this account is fairly small, and its effect on the analyses below can safely be ignored.

below can safely be ignored.

The arrangement for compiling statistics on the basis referred to in the preceding paragraph was started in February, 1950, and an analysis was published in the August, 1951, issue of this GAZETTE relating to the twelve months February, 1950, to January, 1951. In order, however, to bring the series on to the more convenient basis of a calendar year, the second analysis has been made to relate to the whole year 1951, and it thus overlaps to the extent of one month with the previous summary. For all practical purposes, however, the two periods may be taken as roughly comparable.

The total numbers of young persons under 18 years of

The total numbers of young persons under 18 years of age who entered employment in Great Britain during the year 1951 were 277,277 boys and 265,076 girls, compared with 273,169 boys and 263,456 girls in the twelve months ended January, 1951. The great majority were aged 15 at the time when they entered employment, and as there was

little difference between the total numbers reaching that age in the two periods it was not to be expected that there would be much change in the numbers entering employment.

The following Table gives an analysis of the figures for the two periods according to age at leaving school and also according to age at entry into employment:—

Age at leaving	Ag	e at entry in	to employm	nent
school	15	16	17	Total
D. Company		Year	1951	111111111111111111111111111111111111111
Boys: 15 16 17	229,707 — —	4,030 33,635 —	607 1,185 8,113	234,344 34,820 8,113
Total, Boys	229,707	37,665	9,905	277,277
Girls: 15 16 17	215,852	4,436 31,532	1,088 1,568 10,600	221,376 33,100 10,600
Total, Girls	215,852	35,968	13,256	265,076
101 101 101	Fe	bruary, 1950)-January, 1	1951
Boys: 15 16 17	225,170 — —	4,552 32,485	624 1,394 8,944	230,346 33,879 8,944
Total, Boys	225,170	37,037	10,962	273,169
Girls: 15 16 17	214,150	5,140 30,658 —	1,176 1,665 10,667	220,466 32,323 10,667
Total, Girls	214,150	35,798	13,508	263,456

In both periods the number of girls who entered employment at the age of 17 was considerably higher than the corresponding number of boys. This was partly because a larger number of girls who had left school at 15 or 16 delayed their entry into employment till they were 17 years of age, and partly

because the number of girls who left school after reaching 17 and entered employment before reaching 18 was greater than the number of boys. It should be borne in mind in this connection number of boys. It should be borne in mind in this connection that all the figures relate to young persons entering employment before reaching the age of 18; they do not provide any information about the numbers who actually left school, since some of the school-leavers would not be seeking paid employment and others would be proceeding to the universities, or to the Forces for their period of national service. period of national service.

period of national service.

The Table shows that the great majority of young persons enter employment fairly soon after leaving school. Thus, of the total of 234,344 boys, included in the analysis, who left school in 1951 before reaching the age of 16 years, 229,707, or about 98 per cent., also entered employment before reaching that age, and the corresponding proportion among girls was only slightly lower.

As stated above, the figures have been analysed to show the numbers entering (a) apprenticeships to skilled crafts, (b) employment leading to recognised professional qualifications, (c) clerical employment, and (d) other employment. The numbers who entered each of these classes in 1951, with comparable figures for the 12 months ended January, 1951, are shown in the following Table:—

	Age at entry into employment									
Class of Employment Entered		nonths en nuary, 19		7	Year 1951					
	15	16	17	15	16	17				
			Boys	(000's)						
Apprenticeship to Skilled Craft Employment leading to re-	75.9	13-2	3.2	. 77.9	13.8	2.8				
cognised professional qualifications Clerical Employment Other Employment	1·2 13·8 134·3	2·1 10·2 11·5	1·3 2·8 3·7	0·8 14·2 136·8	1·9 10·7 11·3	1·1 2·6 3·4				
Total, Boys	225 · 2	37.0	11.0	229 · 7	37.7	9.9				
			Girls	(000's)						
Apprenticeship to Skilled Craft	17.4	2.6	1.2	14.3	2.2	1.1				
cognised professional qualifications	1·0 51·9 143·8	1·2 20·3 11·7	1·3 6·7 4·3	0·8 55·7 145·0	1·2 21·8 10·8	1·2 7·1 3·9				
Total, Girls	214-1	35.8	13.5	215.8	36.0	13.3				

For the purpose of this analysis the term "apprenticeship" was defined as "apprenticeship or learnership with or without an indenture or other form of written agreement," and the instructions regarding the preparation of the statistical cards provided that "where there is doubt about the status which the young entrants are likely to attain they should not be included in this category."

There was little difference between the two years in the numbers entering the different types of work, the only substantial change being a reduction in the number of girls entering apprenticeships.

entering the different types of work, the only substantial change being a reduction in the number of girls entering apprenticeships to skilled crafts, with a corresponding increase in the numbers taking up clerical employment. In each of the two years approxi-mately one-third of the boys under 16 entered apprenticeships to skilled crafts and about 60 per cent. entered "other employment." Among those who entered employment at age 16 the proportion who became apprentices was slightly higher, but the number who

went into "other employment" was relatively very much lower, and went into "other employment" was relatively very much lower, and the proportion entering clerical employment was 28 per cent. compared with 6 per cent. among those under 16. A much larger proportion of the 16-year-olds also entered employment leading to recognised professional qualifications—over 5 per cent. compared with about ½ of one per cent. in the younger age-group. The proportion entering the "professional" employments was still higher among those who entered employment at 17 (11-12 per higher among those who entered employment at 17 (11-12 per cent.), but the proportion who took up apprenticeships was considerably lower (29 per cent.). Among the girls who entered employment the proportion who became apprenticed was well below 10 per cent. in each of the three age-groups, with little difference between the three, but the proportion entering the "professional" employments rose from ½ of one per cent. among those who started work at 15 to $3\frac{1}{2}$ per cent. among the 16's and 9 per cent. among the 17's. The proportion entering clerical employment also increased from about one-quarter among those who entered employment at 15 to 60 per cent. among the 16's and about 50 per cent. among the 17's, with a corresponding reduction in 50 per cent. among the 17's, with a corresponding reduction in the proportion entering "other employment."

Industrial Analysis

The figures for the period under review have been analysed on the basis of the Standard Industrial Classification, and the Table below shows the numbers in eight broad industrial groups expressed

		ber enterin as percenta			
Industry Group	В	loys	Girls		
	Aged 15	Aged 16 and 17	Aged 15	Aged 16 and 17	
Agriculture, etc. Mining and Quarrying Manufacturing Industries Building and Contracting Transport, etc. Distributive Trades Public Administration, Utilities, Pro-	9 4 49 12 5 14	8 1 37 6 10 9	1 48 1 2 30	$ \begin{array}{c c} 2 \\ \hline 25 \\ 1 \\ 5 \\ 17 \end{array} $	
fessional Services, Entertainments, and Commerce and Finance Hotels, Laundries and Personal Services	5 2	27 2	9 9	43 7	
Total	100	100	100	100	
Total number of entrants (000's)	230	48	216	49	

The percentage distribution in every case shows very little change from the corresponding analysis for the twelve months ended January, 1951. There is again a marked difference between the age-groups as regards the industries that they entered. Nearly one-half of those who entered employment at the age of 15—both boys and girls—went into the manufacturing industries, whereas only 37 per cent. of the boys and 25 per cent. of the girls who entered employment after reaching 16 went into those industries. This is largely counterbalanced by the much larger proportion of who entered employment after reaching 16 went into those industries. This is largely counterbalanced by the much larger proportion of those aged 16 and 17 going into the group Public Administration, Utilities, Professional Services, etc., which attracted 27 per cent. of the boys of those ages and 43 per cent. of the girls. One of the principal differences between the figures for boys and girls is that the number of girls going into the distributive trades was double the number of boys, the proportion of girls going into those trades being 30 per cent. at age 15 and 17 per cent. at 16 and 17.

Young Persons Entering Employment, January to December, 1951: Analysis by Industry Group and Occupational Category.

Total, All Industries and Services	78,678	19,592	14,187	13,284	136,842	14,694	277,277	20,800	84,615	159,661	265,076		

The figures for each industrial group include all entrants into the service of employers in the group, irrespective of the nature of their personal occupations. Thus the figures for the manufacturing group include not only those entering employment in the factories but also clerical and technical staffs and all other ancillary employments with the same employers. In the Table at the foot of the preceding page the groups are further sub-divided, and separate figures are given for each sub-division showing the numbers in each of the occupational categories

(apprentices, etc.) referred to in an earlier paragraph.

This analysis shows no significant change from the corresponding analysis for the twelve months ended January, 1951, apart from a analysis for the twelve months ended January, 1951, apart from a slight increase in the number of boys taking apprenticeships or learnerships in the metal and metal-using industries. Those industries accounted for nearly 42,000 of the 98,000 apprentices and learners, and the building and contracting industries came next with nearly 21,000. Over 4,000 boys entered apprenticeships or learnerships in the woodworking industries and nearly 4,000 in the paper and printing industries and the distributive trades.

The percentage of young persons entering clerical employment varies considerably from industry to industry, but such information as is available (which relates to manufacturing industries only) shows that it bears a close relationship to the percentage that clerical staffs represent of the total numbers of employees. This relationship, however, is shown only by the total figures, and

relationship, however, is shown only by the total figures, and there are marked differences between the separate figures for males and females. Thus in the engineering, shipbuilding, and electrical goods industries the administrative, technical and clerical male staffs represented 18 per cent. of the total number of male employees, but only 6 per cent. but only 6 per cent. of the young male entrants into those industries in 1951 went into clerical work; on the other hand 63 per cent. of the young female entrants into the same industries went into clerical work, although the total number of female employees on such work represented only 34 per cent. of the total number of female employees. There were similar differences between males and females in practically every group of manufacturing industries.

Regional Analysis

The Table in the next column shows the numbers of entrants into employment in each of the nine administrative Regions of England and in Scotland and Wales during the year under review, analysed according to age at the time of entry:

District	Age at e	ntry into em	ployment	W
Region	15	16	17	Total
CONTRACTOR AND ADDRESS OF	FERTAL	Во	ys	ashishia
London and South-Eastern Eastern Southern South-Western Midland North-Midland East and West Ridings North-Western Northern Scotland Wales Total, Great Britain	42,453 13,263 10,887 12,043 22,773 16,514 19,889 31,420 17,311 31,124 12,030	10,243 2,137 2,011 3,053 2,881 2,554 3,281 4,689 2,014 2,855 1,947 37,665	2,985 557 590 738 741 458 577 992 468 1,083 716	55,681 15,957 13,488 15,834 26,395 19,526 23,747 37,101 19,793 35,062 14,693
		Gi	rls	vacarolta:
London and South-Eastern Eastern Southern South-Western Midland North-Midland East and West Ridings North-Western Northern Scotland Wales	39,570 12,529 10,538 11,321 22,072 15,570 19,289 29,515 15,633 29,206 10,609	9,290 2,231 2,012 2,558 2,849 2,394 3,118 4,687 2,146 2,591 2,092	4,077 813 852 963 927 616 751 1,424 607 1,253 973	52,937 15,573 13,402 14,842 25,848 18,580 23,158 35,626 18,386 33,050 13,674
Total, Great Britain	215,852	35,968	13,256	265,076

In the London and South-Eastern and South-Western Regions about one-quarter of the total number of entrants (both boys and girls) were in the 16 and 17 age-group, whereas the corresponding proportion for the country as a whole was 17 per cent. for boys and 19 per cent, for girls. The proportion was lowest in Scotland, where nearly 90 per cent. of the total number of entrants were under 16 entrants were under 16.

As was found in the other aspects of the analysis, the Regional distribution of the young entrants into employment is also very close to the corresponding distribution for the twelve months ended January, 1951. In the great majority of cases the difference between the two periods was very small, and in only one of the categories in the Table does the difference exceed 1,000.

REVIEW OF THE MONTHLY STATISTICS

The following is a summary of the principal statistics of the month. Further details and analyses will be found on pages 348 to 368.

It is estimated that the number of persons in civil employment in Great Britain rose during August by 66,000 (27,000 males and 39,000 females), the number at the end of the month being 22,195,000. The basic industries (mining, gas, electricity and water supply, transport, agriculture and fishing) showed an increase of 14,000, manufacturing industries an increase of 34,000, and other industries and services an increase of 18,000. The total working population, including H.M. Forces, the unemployed, and men and women on release leave who have not taken up employment, is estimated to have increased by 82,000 from 23,319,000 to 23,401,000.

The number of persons registered as wholly unemployed at Local Offices of the Ministry of Labour and National Service in Great Britain rose from 325,865 to 326,513 between 11th August and 15th September, but the numbers registered as temporarily stopped fell from 77,709 to 63,107. In the two classes combined there was a fall of 7,032 among males and of 6,922 among females.

The index of weekly rates of wages, based on June, 1947 (taken as 100), was 131 at the end of September, compared with 130 at the end of August. The changes in rates of wages reported

to the Department during September resulted in an aggregate increase estimated at £707,000 in the weekly full-time wages of about 2,110,000 workpeople. The principal increases affected workpeople employed in the retail distributive trades, electricity and gas supply, company-owned omnibus undertakings and municipal transpay, trallegate and complete undertaking and parameters. cipal tramway, trolleybus and omnibus undertakings, laundries, furniture manufacture and boot and shoe manufacture.

At 16th September, 1952, the retail prices index was 136 (prices at 17th June, 1947 = 100), compared with 137 at 12th August and with 128 at 18th September, 1951. The fall in the index during the month was due mainly to reductions in the prices of fruit and vegetables, but there were a number of other small changes. The net effect of these changes was slight but sufficient to lower the index, when expressed to the nearest whole number, by one point.

The number of workers involved during September in stoppages of work arising from industrial disputes (including those thrown out of work at the establishments where the stoppages occurred) was nearly 29,000. The aggregate time lost during the month at the establishments where the stoppages occurred was about 106,000 working days. The number of stoppages which began in the month was 155, and, in addition, 23 stoppages which began before September were still in progress at the beginning of the month. The stoppage involving the greatest loss of time during the month was that of workers employed in motor body building at Willesden.

Reconstitution of Wages Councils

Articles published in the January, 1951, issue of this GAZETTE (page 7) and some earlier issues referred to the reconstitution of certain Wages Councils by Orders made by the Minister of Labour and National Service under the Wages Councils Act, 1945. On 16th September the Minister made a further Order under the Act in respect of the General Waste Materials Reclamation Wages Council (Great Britain). This Order, which came into operation on 24th September, brings the constitution of the Council into conformity with the provisions relating to the constitution of Wages Councils contained in the Act.

Wages Councils contained in the Act. Copies of the Order, which is entitled The General Waste Materials Reclamation Wages Council (Great Britain) (Constitution) Order, 1952 (S.I. 1952 No. 1693), can be purchased from H.M. Stationery Office, price 2d. net (3½d. post free).

Reconstitution of Wages Board for Licensed Residential Establishments and Licensed Restaurants

The Ministry of Labour and National Service has announced that the Licensed Residential Establishment and Licensed Restaurant Wages Board which was first constituted on 14th December, wages Board which was first constituted on 14th December, 1945 (see the issue of this GAZETTE for January, 1946, page 12), has now been reconstituted. The Board consists of 23 persons to represent employers and 23 persons to represent workers. Sir Richard Lloyd Roberts, C.B.E., Mr. Albert Howard Thomas, B.Com., and Miss Edith Hesling, O.B.E., LL.B., have been appointed as Chairman, Deputy Chairman and Third Independent Member, respectively.

Wage Regulation Proposals

The Minister of Labour and National Service has made Wages Regulation Orders giving effect to the proposals re-submitted to him by Wages Councils for increasing the statutory minimum remuneration of workers in the following trades:—Hairdressing remineration of Workers in the following trades:—Hairdressing undertakings (Great Britain); retail food (England and Wales); retail food (Scotland); laundry (Great Britain); retail drapery, outfitting and footwear trades (Great Britain); retail bookselling and stationery trades (Great Britain); retail newsagency, tobacco and confectionery trades (England and Wales); retail newsagency, tobacco and confectionery trades (Scotland); boot and shee repairing (Great Britain); sugar confectionery and boot and shoe repairing (Great Britain); sugar confectionery and food preserving (Great Britain); fur (Great Britain); retail furnishing and allied trades (Great Britain) (see last month's issue

of this Gazette, page 336, and page 371 of this issue.

In July, the Minister had referred the proposals back to the Wages Councils for reconsideration in the light of the statement made by the Chancellor of the Exchequer to the National Joint Advisory Council on 15th May (see the issue of this GAZETTE for July, page 236). The proposals were reconsidered by the Wages Councils and submitted again to the Minister without amendment. The Minister decided to give effect to them at the earliest practicable

INDUSTRIAL SAFETY, HEALTH AND WELFARE

Accidents to Railway Servants during 1951

The Report of the Chief Inspecting Officer of Railways to the

The Report of the Chief Inspecting Officer of Railways to the Minister of Transport upon the accidents which occurred on the railways of Great Britain during the year 1951 has been published by H.M. Stationery Office, price 2s. net (2s. 1½d. post free).

Statistics contained in the Report are based on information contained in returns made by the Railway Executive, the London Transport Executive, and certain minor railway companies which were not taken over by the British Transport Commission on 1st January, 1948, and also on reports upon certain accidents made after Inquiries by the Ministry of Transport. Accidents have continued to be reported on the same basis as before the nationalisation of the railways, and all figures contained in the Report are therefore comparable with those for earlier years except for the war years 1940–1945, when fatalities and serious injuries only were required to be reported. All casualties to passengers and other persons, excluding railway servants, are required to be reported however slight the injuries may be. Casualties to railway servants are only required to be reported if they cause absence from ordinary work for more than three days. Personal injuries are classified as "serious" or "minor". Serious injuries are defined as "amputation of limbs, a fracture or dislocation, internal injuries, loss of an eye, burns or scalds, and any other injury of similar serious character likely to cause protracted disablement." Any person so severely injured as to die after an accident, but before the date of the Report, is included as a fatality.

The number of railway servants killed during 1951 was 172, compared with 204 in 1950 and annual averages of 226 during 1946–1950 the annual average was 20,569. Of the total number of railway servants injured in 1951, 2,031 were seriously, and 15,532 slightly, injured.

Accidents included in the Report are classified in three main groups:—(1) train accidents (i.e., accidents to trains and rolling stock on or affecting a passenger railway, and failures of rolling stock, track and structures); (2) movement accidents (i.e., those connected with the movement of railway vehicles, exclusive of train accidents; and (3) non-movement accidents (i.e., those on railway)

accidents; and (3) non-movement accidents (i.e., those on railway premises not connected with the movement of any railway vehicles). Four railway servants were killed in train accidents, 154 in movement accidents, and 14 in non-movement accidents during 1951. The corresponding figures for railway servants seriously injured during the year were 42, 656, and 1,333, and for those who received minor injuries 106, 1,678, and 13,748.

Detailed analyses of the figures relating to all railway accidents which occurred in 1951 are given in the Report, which also contains summaries of 14 accidents which were the subject of Inquiry, comments on the causes of various other accidents, and a review of the year. The Report is followed by appendices, containing detailed statistical and other relevant information.

The Factories (Testing of Aircraft Engines and Accessories) Special Regulations, 1952

On 15th September the Minister of Labour and National Service made the Factories (Testing of Aircraft Engines and Accessories) Special Regulations, 1952, under the Factories Acts, 1937 and 1948. The Regulations, which apply to all factories in which the testing of aircraft engines or of carburettors or fuel pumps for aircraft is

of aircraft engines or of carburettors or fuel pumps for aircraft is carried on, prescribe precautions to be taken to minimise the risk of fire and explosion. The provisions contained in the Regulations replace those contained in the Factories (Testing of Aircraft Engines, Carburettors and Other Accessories) Order, 1944 (see the issue of this GAZETTE for May, 1944, page 74), which have been modified in minor respects in the light of experience gained in administering those requirements and of developments that have taken place in the industry. By a separate Statutory Instrument (S.I. 1952 No. 1688) the Order of 1944, which was made under Defence Regulation 60, will be revoked on the day the new Special Regulations come into operation.

Regulations come into operation.

Copies of the Regulations (S.I. 1952 No. 1689), which come into operation on 1st November, may be obtained from H.M. Stationery Office, price 4d. net (5½d. post free).

Building Regulations Exemption Certificate

The Building (Safety, Health and Welfare) Regulations, which came into operation on 1st October, 1948 (see the issue of this GAZETTE for June, 1948, page 196), are designed to safeguard building workers against the more common and serious dangers of their employment. They apply to the construction, structural alteration, repair or maintenance of a building and deal, *inter alia*,

alteration, repair or maintenance of a building and deal, inter alia, with the provision of proper machinery and plant.

Under powers conferred by these Regulations, on 19th June H.M. Chief Inspector of Factories signed the Certificate of Exemption No. 3 (Hoists in Certain Chimneys). This Certificate relates to hoists erected inside chimneys specially for the purpose of operations to which the Regulations apply, in cases where the internal horizontal cross-sectional area of the chimney is less than 120 square feet at any level at which any of the operations have to be carried out. The certificate gives exemption from certain of the Regulations subject to specified conditions set out in the Schedules to the Certificate. The Certificate will remain in force until revoked by the Chief Inspector of Factories.

Copies of the Exemption Certificate (Form 2006, June, 1952) can be purchased from H.M. Stationery Office, price 3d. net (4½d. post free).

PAMPHLETS ON EMPLOYMENT, TRAINING, ETC.

Articles published in the January issue of this GAZETTE (page 10)

Articles published in the January issue of this GAZETTE (page 10) and earlier issues described briefly the contents of pamphlets on employment, training, etc., prepared by the Ministry of Labour and National Service and other Government Departments. Notes on further pamphlets, etc., which have been issued are given below. Copies can be obtained through Local Offices of the Ministry.

In the folder entitled "One year's agricultural training for you" (P.L. 331 (Revised)), brief up-to-date details are given of the Resettlement and General Schemes, the persons eligible for training, the period of training, the rates of pay during and after training, and working hours and holidays.

A new illustrated pamphlet entitled "3 years in a nurse's life" (N.R.L. 12) describes how a nurse is trained and how a student nurse lives. Particulars are given of the hours of duty and of allowances paid to student nurses, and an inset to the pamphlet sets out salary scales for trained nurses. The leaflet "Psychiatric Nursing" (N.R.L. 8) has been revised and contains similar information regarding qualification as a State Registered Mental Nurse.

A revision has been issued as A.D.L. 2 (Revised) of the folder "The Appointments Service" which (see the issue of this GAZETTE for September, 1951, page 352) describes the services offered by the Ministry of Labour and National Service to managers, senior executives and professional men and women.

A new illustrated booklet, "Opportunities for a Career in Engineering" (P.L. 340), has been issued by the Ministry of Supply in conjunction with the Ministry of Labour and National Service. The booklet, which supersedes leaflet P.L.303, explains the Ministry of Supply Apprenticeship Scheme.

NATIONAL INSURANCE

Increased Rates of Contributions

The new weekly rates of national insurance contributions under the provisions of the Family Allowances and National Insurance Act, 1952 (see the issue of this GAZETTE for July, page 239), came into operation from 6th October. The introduction of the higher contribution rates follows the increases for which the Act also made provision in patients in increases for which the Act also made provision in national insurance and industrial injuries benefits.

The increases in the rates of weekly contributions payable by employed persons (Class 1) are 8d. for men and 6d. for women, 5½d. for boys under 18 years of age and 4d. for girls under 18. The employers' contributions are also increased by the same amounts. For self-employed persons (Class 2) the weekly rates of contributions are increased by 11d. for men and 9d. for women, 7d. for boys and 6d. for girls. For non-employed persons (Class 3) the increases are 7d. for men, 5d. for women, and 4d. and 3d. for boys and girls respectively. boys and girls respectively.

A leaflet (N.I.70) setting out the new rates and giving further details can be obtained from local offices of the Ministry of National Insurance and of the Ministry of Labour and National Service and from Post Offices.

Changes in Rates of Contribution for Members of H.M. Forces

The National Insurance Advisory Committee have been asked In National Insurance Advisory Committee have been asked to consider and report upon the preliminary draft of the National Insurance (Members of the Forces) Amendment (No. 2) Regulations, 1952, which would make changes in the special rates of contributions applicable to members of H.M. Forces. These changes in the special rates are proposed in consequence of the increases in the normal weekly national insurance contribution rates which took effect from 6th October (see above).

On account of urgency, Regulations giving effect from 6th October to the proposed changes have been made provisionally pending the receipt of the report upon them from the Advisory Committee. Copies of the Provisional Regulations, which are entitled the National Insurance (Members of the Forces) Amendment (No. 2) Provisional Regulations, 1952 (S.I. 1952 No. 1742), and of the preliminary draft of the Regulations can be purchased from H.M. Stationery Office, price 3d. net and 2d. net respectively (4½d. and 3½d. post free).

Modified Conditions for receipt of Special Hardship Allowance

On 4th September the Minister of National Insurance made the National Insurance (Industrial Injuries) (Benefit) Amendment Regulations, 1952. These Regulations, which amend the National Insurance (Industrial Injuries) (Benefit) Regulations, 1948, modify the conditions for an increase of disablement benefit on the grounds of special hardship. The special allowance, of up to 20s. a week, can be paid to a man whose injury makes him permanently incapable of following his regular occupation or employment of equivalent standard. The new regulations provide that, in determining a claim, any period during which the claimant worked while waiting for surgical treatment for the effects of the injury may be disregarded, as well as periods of rehabilitation, training, or trial.

Copies of the Regulations (S.I. 1952 No. 1633), which came into operation on 10th September, can be purchased from H.M. Stationery Office, price 2d. net (3½d. post free).

INTERNATIONAL LABOUR **ORGANISATION**

Fourth Session of Petroleum Committee

The Petroleum Committee, one of the Industrial Committees set up by the Governing Body of the International Labour Office to deal with conditions in certain major industries, opened its Fourth Session at Scheveningen, Netherlands, on 14th October.

The agenda of the Fourth Session was :-

(1) General Report, dealing particularly with: (a) action taken in the various countries in the light of the conclusions of the previous sessions; (b) steps taken by the International Labour Office to follow up the studies and enquiries proposed by the Committee; and (c) Recent events and developments in the petroleum industry.

(2) Principles and methods used in determining wages in the petroleum industry.

(3) Social services in the petroleum industry (with special reference to supply schemes, transport of workers, recreation facilities and co-operative societies).

The Committee is tripartite in character and the delegation from each country taking part may include two Government representatives and two representatives of each of the Employers' and Workers' groups. The representatives may be accompanied by advisers. The United Kingdom was represented at the meeting by the following delegation:—Government representatives: Mr. J. G. Stewart, C.B.E., Assistant Secretary, Ministry of Labour and

The Third Session of the Committee was held in Geneva in October, 1950 (see the issue of this GAZETTE for December, 1950, page 412).

LABOUR OVERSEAS

National Guaranteed Minimum Wage in France

By an Act of 18th July, 1952, arrangements have been introduced in France for the adaptation in accordance with changes in the cost of living of the national guaranteed minimum wage established under the system of which particulars were given in the issues of this GAZETTE for March, 1951 (page 108) and November, 1951 (page 428).

The Act provides for the setting up by the Higher Commission for Collective Agreements of a sub-committee with responsibility, in co-operation with the National Institute of Statistics and Economic Studies, for studying changes in the cost of living in the light of the information and data used for determining the monthly general consumers' price index for families in Paris, and when this index shows a rise of five per cent. or more the Act prescribes that the national guaranteed minimum wage shall be revised proportionately with the increase recorded. It is, however, expressly stipulated that in the absence of exceptional circumstances no two successive revisions of the wage may take place within a period of four months. The revised national guaranteed minimum wage, together with the index figure on which the revision is based, is to be published in a decree issued jointly by the Minister for Economic Affairs, the Minister of Labour and Social Security and other Ministers concerned. For the purposes of the first revision of the minimum wage to be made under the Act the index figure to serve as the point of departure for the calculations is scheduled at 142 in the current series based on 1949 = 100, and accordingly the current index must show a rise to 149·1 before the first wage increase can take place.

In Algeria, the consumers' price index to be used is that for family consumption which is compiled by the Algerian General Statistical Service; and as regards the application of the Act in the four overseas Départements—Guiana, Guadeloupe, Martinique, and Réunion—special provisions have been laid down in a decree dated 20th August, 1952.

Rates of Wages in France in April, 1952

An enquiry into economic activity and conditions of employment is carried out at quarterly intervals by the French Ministry of Labour and Social Security. In the course of this enquiry statistics are obtained of the average hourly rates of wages of industrial workers. The figures given in the latest available report on the enquiry relate to 1st April, 1952. Returns were obtained by the Ministry's Labour Inspection organisation from 26,000 undertakings each having at least ten wage earners and employing an aggregate of about three-and-a-half million workers, or approximately 58 per cent. of the staff of all the undertakings in the industrial groups which the enquiry covered. Agriculture and the public services were excluded from the scope of the enquiry, which also took no account of isolated workers or domestic staff. The information collected related to the basic wages of male and female time-workers aged 18 years and over.

The decree of 10th September, 1951, which raised the minimum hourly rate of wages in the Paris region from 87 francs to 100 francs (see the issue of this GAZETTE for November, 1951, page 428) was still in force without amendment at the date of the enquiry.

The Table in the next column shows the average hourly wage rates at 1st April, 1952, of manual workers, 18 years of age and over, in the industrial groups covered by the enquiry, in the zone in which the minimum rates fixed for unskilled workers are not subject to any reduction (i.e., the Paris region). The Table also shows the general averages for all groups in that zone taken together, with the corresponding averages in the zones in which the minimum rates are subject to reductions of 3.75, 7.50, 11.25 and 13.50 per cent., respectively. The report of the enquiry gives, in addition to the classes of workers shown in the Table, separate averages for men and women in the unskilled class who are engaged in heavy work and for workers classed as highly skilled.

All the industrial groups covered by the enquiry are not necessarily represented in each of the zones. At the date of the enquiry, the average duration of the working week for manual workers, in all the industrial groups and zones taken together, was 45·3 hours.

The enquiry showed that during the first quarter of 1952 there was an increase in hourly wage rates of 1·1 per cent., the smallest increase during the preceding quarter shown by any enquiry since that for 1st January, 1950. The report gives index figures, on the basis 1st January, 1946 = 100, of the level of hourly wages for all workers, for men, and for women, at each enquiry since 1st January, 1946. At 1st April, 1952, the index figure was 475 for all workers, 461 for men, and 508 for women. The average hourly rate for women, which was 15 per cent, below that for men at the beginning of 1946, is snown to have increased more rapidly than the men's rate until 1951, but the results of the last two enquiries have shown

a slight tendency for men's rates to increase faster than those for women. The rates for men were $7 \cdot 7$ per cent. higher than those for women at 1st April, 1952.

Average Hourly Rates of Wages of Manual Workers at 1st April, 1952

Earnings and Working Hours in Germany

The German Federal Statistical Office carries out, at quarterly intervals, a survey of earnings and hours in the principal industries in the Federal Area. Summaries of the results of the surveys are published in Wirtschaft und Statistik and other publications of the Federal Statistical Office. Some statistics, extracted from the German publications, were given in an article in the issue of this GAZETTE for September, 1951 (page 358), illustrating the course of earnings and working hours up to December, 1950. Later figures in the same series are given below, including figures for February, 1952, for some of the principal industry groups. The statistics relate to the whole Federal Area; previously figures were available for the Bizonal Area only. There was no survey in December, 1951, and the latest survey for which the results are available was carried out in February, 1952. The statistics relate to industrial workers only, and workers not engaged upon production and apprentices (except in mining) are not included within the scope of the enquiries. The earnings quoted are gross earnings before deductions on account of taxes, etc.

The averages for all workers (males and females) show that, in the industries covered by the survey, except coal mining, hourly earnings rose from 136·7 Pfennigs in March, 1951, to 152·6 Pfennigs in February, 1952, and weekly earnings rose from 64·85 Deutsche Marks to 70·82 Deutsche Marks during the same period. The average weekly hours worked fell from 47·4 to 46·4 between March, 1951, and February, 1952.

Rates of Wages in Italy

Particulars of the rates of wages of industrial workers as fixed by agreement in each of the provinces of Italy are published by the Italian Central Statistical Institute in the monthly journal Bolletino Mensile di Statistica. The figures are based upon data collected by the Provincial Labour Offices and represent the gross minimum rates of wages for unmarried workers, for a day of eight hours, inclusive of cost-of-living and other wage supplements regularly received and prior to the deduction of statutory dues for which the workers are liable. The rates of wages are augmented in the case of married workers by family allowances which, up to 16th June, 1952, were at the rate of 68 lire a day for a wife and 115 lire a day for each child, and from 16th June, 1952, onwards, 100 lire a day for a wife and 153 lire a day for each child.

The Table below shows, for the principal industrial groups and classes of worker, the ranges of the gross minimum daily rates of wages in the provinces of Italy as fixed by agreement at the end of June, 1952. The figures have been extracted from the more detailed Tables, showing the rates for each province separately, published in the August issue of *Bolletino Mensile di Statistica*. The actual provinces in which the highest and lowest rates apply vary; general averages for the whole country are not given.

Wage and Price Stabilisation in the United States

Various changes in the extent of the Federal Government's authority to control wages, prices and rents, and to intervene in labour disputes in the United States of America were made by new legislation entitled the Defense Production Act Amendments of 1952, which came into force on 1st July, 1952, after the expiry of the corresponding amending legislation of 1951, particulars of which were given in the issue of this GAZETTE for April, 1952 (page 131).

Under the new measure, provision is made for wage and price controls to continue until 30th April, 1953, and for Federal rent controls under the Housing and Rent Act of 1947 (as amended) to be maintained up to 30th September, 1952, except in so far as, in certain circumstances, authority is given to local government agencies to extend the application of the Act up to 30th April, 1953.

In the matter of wages control the new legislation prohibited the issue by the existing Wage Stabilization Board of any further wage control regulations and orders after 27th June, 1952, except with regard to individual cases pending before the Board prior to that date, and, moreover, provided for the abolition of the Board on 29th July and for its replacement by a new Board composed in equal numbers of representatives of the general public, labour, and business and industry, respectively. Responsibility for making appointments to the Board rests with the President, acting by and with the advice and consent of the Senate; the Chairman and Vice-chairman must be designated from among the representatives of the general public; and the term of office of the members is to run until 1st May, 1953. As regards the stabilisation of wages, salaries and other compensation the Board is authorised to formulate and recommend policies and regulations, which are to be promulgated by the Economic Stabilization Administrator, but express provision has been made that the Board shall have no jurisdiction with respect to any labour dispute or with respect to any issue involved therein.* Other provisions affecting wage controls authorise the exemption from wage stabilisation of certain specific categories of workers, including, in particular, agricultural

workers and employees of small-business enterprises; and professional engineers employed by industrial or engineering firms, are, among others, removed from salary controls.

As regards price stabilisation, the principal new provisions exempt from control the prices of all fruits and vegetables, whether fresh or processed (estimated to represent about 20 per cent. of expenditure on food); require higher price ceilings on most sales of fertilisers to farmers; and relax in certain respects price control on processors of farm products, including milk and other dairy products.

In a formal declaration included in the Act the Congress affirms its policy that the President shall use the price, wage and other powers conferred by the Defense Production Act, as amended, to promote the earliest practicable balance between production and the demand of materials and services for production, and that the general control of wages and prices shall be terminated as rapidly as possible consistent with the policies and purposes set forth in the Act.

Work Stoppages in the United States in 1951

An article published by the Bureau of Labor Statistics of the United States Department of Labor in the May issue of Monthly Labor Review analyses work stoppages due to industrial disputes in the United States of America during 1951. For the purpose of the analysis all known work stoppages were included if they arose from industrial disputes involving six or more workers and continued for at least one full day or shift. The figures relating to numbers of workers involved and of man-days lost include all workers made idle for one shift or longer in establishments directly involved in the stoppages. Workers made idle at other establishments or in other industries as a result of material or service shortages are excluded.

The number of work stoppages which began in 1951 was 4,737, compared with 4,843 in 1950. In addition, 151 stoppages which began in 1950 continued into 1951. The latter were, the article states, generally small and localised stoppages and they accounted for a very small percentage of the total number of man-days lost during 1951. Work stoppages were, in general, shorter in 1951 than in earlier post-war years; the average duration was 17·4 days, compared with 19·2 days in 1950 and 21·8 to 25·6 days during the years 1946 to 1949. The total number of man-days lost in 1951 owing to stoppages of work was 22·9 million, the lowest figure recorded since 1944, and the total number of workers involved, 2·22 million, was lower than in most other post-war years. Stoppages involving 10,000 or more workers numbered 19, directly affecting about half-a-million workers and accounting for a time loss of nearly six million man-days. These extensive stoppages were, however, responsible for a much lower proportion of the total number of workers and of the total loss of time involved in work stoppages than were the large-scale stoppages in previous post-war years.

The national emergency strike provisions of the Labor Management Relations Act were invoked only once in 1951, in connection with a nation-wide dispute affecting the copper and other nonferrous metals industries. In April, 1951, the Wage Stabilization Board was given limited jurisdiction in labour disputes and was authorised to investigate and recommend settlement in any dispute which was not resolved by collective bargaining or by the prior full use of mediation and conciliation facilities, and which threatened to interrupt work affecting the national defence where (1) the parties jointly agreed to submit the dispute to the Board or (2) the President was of opinion that the dispute substantially threatened the progress of national defence and referred it to the Board. Binding decisions were authorised only if agreed upon by the parties in advance. Five important labour disputes, in which there had been stoppages of work, were submitted during 1951 to the Board.

As in 1950 (see the issue of this GAZETTE for November, 1951, page 431) monetary issues (including wages and hours, pensions, social insurance, etc.) were the chief single cause of work stoppages in 1951. They were the principal issues involved in about 44 per cent. of all disputes which led to work stoppages, and the stoppages accounted for approximately 62 per cent. of the total number of man-days lost. Disputes arising from questions regarding working conditions other than wages and hours, e.g., job security, shop conditions and policies, and work load, were responsible for about 28 per cent. of the stoppages and 18 per cent. of the number of man-days lost. Approximately 14 per cent. of the total number of work stoppages were caused primarily by disputes about questions of union organisation.

The industry groups mainly affected by work stoppages in 1951 were the textile mill products and machinery (except electrical) groups, in which the loss of time amounted to 3·49 million and 3·37 million man-days respectively. Other industry groups in which more than one million man-days were lost included primary metal industries; fabricated metal products; electrical machinery, equipment and supplies; transportation equipment; mining; construction; and transportation, communication and other public utilities. The highest number of work stoppages in any single industry group was 651 in the construction industry, compared with the previous highest figure of 615 recorded in 1949. In the mining industry there were 622 work stoppages in 1951, compared with 508 in 1950 and 476 in 1949.

^{*} Excluding Coal Mining.

^{*} In the case of the recent dispute in the steel industry, now settled, the Act specifically requested the President to invoke immediately the national emergency provisions of the Labor-Management Relations Act of 1947 (the Taft-Hartley Act).

Employment in Great Britain in August

GENERAL SUMMARY

It is estimated that the total working population* increased during August by 82,000 (37,000 males and 45,000 females). This rise reflects the large intake of school-leavers into employment which occurs in this month.

The strength of the Forces, excluding reservists recalled for short-period training, fell by 1,000 to a total of 871,000, while the estimated number of ex-Service personnel on release leave who had not entered employment at the end of the month was about 9,000.

The total number of persons registered as unemployed at 15th September was 389,600 (of whom 63,100 were temporarily stopped), a decrease of 14,000 since 11th August. Of the total 131,900 had

The total number of persons registered as unemployed at 15th September was 389,600 (of whom 63,100 were temporarily stopped), a decrease of 14,000 since 11th August. Of the total 131,900 had been unemployed for more than eight weeks. The number of persons registered as unemployed in textiles decreased by 16,600. The September unemployment figure represented 1·9 per cent. of the estimated total number of employees (the same as in August) compared with 1·0 per cent. in September last year.

The number of operatives reported as working short-time in manufacturing establishments rendering returns for the pay-week ended 30th August was 182,000, compared with 304,000 in the May returns. On the other hand, 1,129,000 operatives were working overtime, about the same as in May.

The total number of persons in civil employment (industry, commerce and services of all kinds) increased by 66,000 in the month. During August, employment in the basic industries rose by 14,000, the main element being a seasonal rise in agriculture. The number of wage-earners on colliery books rose by 1,100.

The level of employment in the manufacturing industries increased by 34,000, including 7,000 in vehicles (of which 2,600 was in aircraft); 5,000 in engineering, metal goods and precision instruments; 7,000 in clothing and 5,000 in textiles.

It is estimated that there was little change in employment in building and contracting during August.

There were increases of 11,000 in the distributive trades and 5,000 in the professional, financial and miscellaneous services group (mainly in catering, hotels etc.) during the month.

in the professional, financial and miscellaneous services group (mainly in catering, hotels, etc.) during the month.

GENERAL MAN-POWER POSITION

The broad changes in the man-power position between end-1951 and the end of August, 1952, and in recent months, are shown in the

following table:—	CHARLES THE			T	Thousands
from the property of the prope	End- Decem- ber, 1951	End- June, 1952	End- July, 1952	End- August, 1952	Change during August, 1952

Number in Civil Employment Men	22,221 14,975 7,246	22,141 14,950 7,191	22,129† 14,940† 7,189	22,195 14,967 7,228	+66 +27 +39
Registered Unemployed: — Wholly Unemployed Temporarily Stopped	350 295 55	415 295 120	400 310 90	396 326 70	- 4 +16 -20

A change was made in July, 1952, in the method of estimating the numbers in the total working population, and the figures for earlier dates have been revised accordingly.

This change was necessary because persons registered as temporarily stopped from work are also for the most part included in the employers' returns of numbers employed which are the basis of the employment statistics for the manufacturing and certain non-manufacturing industries. This element of duplication in the total

*The total working population represents the estimated total number of persons aged 15 and over who work for pay or gain, or register themselves as available for such work. The total comprises the Forces, men and women on release leave not yet in employment, all persons—employers and workers on their own account as well as employees—in civil employment (including persons temporarily laid off but still on the employers' pay-rolls) and wholly unemployed persons registered for employment. Part-time workers are counted as full units.

† Revised figures.

‡ End of month estimates. See also the text below the Table.

working population is not significant when the numbers registered at employment exchanges as temporarily stopped remain relatively constant at a low level. When, however, as has happened in recent months, there are substantial changes in the numbers temporarily stopped, the effect of this duplication on the figure for the total working population is appreciable. The method of estimating the total working population was therefore revised with a view to eliminating such duplication. The estimate is now obtained by adding together the number in H.M. Forces and Women's Services, ex-Service men and women on release leave, the number in civil ex-Service men and women on release leave, the number in civil employment and the registered wholly unemployed. The numbers registered as temporarily stopped are omitted from the addition since, as already explained, most, if not all, of them are included in

ANALYSIS OF CIVIL EMPLOYMENT

An analysis of the total numbers in civil employment by broad industrial groups is given in the Table below.

NUMBERS EMPLOYED: INDUSTRIAL **ANALYSIS**

The Table on the next page shows, for those industries for which comparable figures are available, the numbers employed at end-1951 and June, July and August, 1952. The figures relate to employees (including persons temporarily laid off but still on the employers' pay-rolls); they exclude employers and persons working on their own account, and they are thus different in scope from those given in the preceding paragraphs. Satisfactory estimates of the changes in the numbers within the latter classes cannot be made at monthly intervals for the individual industries.

in the numbers within the latter classes cannot be made at monthly intervals for the individual industries.

The figures are based primarily on the estimates of the total numbers of employees and their industrial distribution at the middle of each year which have been computed on the basis of the counts of insurance cards. In the case of all industries other than coal mining, building and civil engineering and gas and electricity, use has also been made of the monthly returns rendered by employers under the Statistics of Trade Act, 1947. Certain industries and services which are not covered by employers' returns (or are only partially covered), or for which figures are not available in the same form as for those shown below, are omitted from the Table. form as for those shown below, are omitted from the Table.

SHORT-TIME AND OVERTIME IN MANUFACTURING INDUSTRIES

Under the Statistics of Trade Act, 1947, monthly employment returns are collected by the Ministry of Labour and National Service from employers with more than ten workpeople in manufacturing industries, and once a quarter the regular monthly figures for all manufacturing industries, other than shipbuilding and shiprepairing, are supplemented by particulars about short-time and overtime. These additional particulars relate to operatives only (i.e., they exclude administrative, technical and clerical staffs). Employers are asked to supply this additional information in respect of the pay weeks to which the quarterly returns relate, the details being as follows: (a) the number stood off for the whole of the week; (b) the number who were on short-time, but worked part of the week and the approximate total number of man-hours lost; and (c) the number who worked overtime during the week and the approximate total number of man-hours of overtime actually worked.

A summary of the information thus obtained in August, 1952, is given in the Table below, separate figures being given for each of the "Orders" of the Standard Industrial Classification which, together, cover the manufacturing group of industries, and also for a number of industries within the Orders. For the purpose of the Table the numbers stood off for the whole week are deemed to have been on short-time to the extent of 45 hours each. The figures of short-time and overtime relate only to those establishments which gave this information on their returns, and for this reason, together with the qualifications referred to above, the figures do not purport to show the total numbers on short-time or overtime in the week in question. The figures in the second column are estimates of the total numbers of operatives at all establishments from which returns were received, including those which reported no short-time or overtime working.

Operatives on Short-time or Overtime in week ended 30th August, 1952 (at establishments which rendered returns)

Unemployment at 15th September, 1952

SUMMARY FOR GREAT BRITAIN

The numbers of persons registered as unemployed at 11th August and 15th September, 1952, were as follows:—

	Men 18 and over	Boys under 18	Women 18 and over	Girls under 18	Total
11th August	204,093	17,189	159,673	22,619	403,574
15th September	203,086	11,164	158,741	16,629	389,620

It is estimated that the number of persons registered as unemployed at 15th September represented 1.9 per cent. of the total number of employees. This was the same percentage as at 11th August.

An analysis of the figures for 15th September according to duration of unemployment is given in the following Table:—

	Wholly U	Jnemployed	d (including	(Casuals)	TOP STORY	
	Unemployed for not more than 2 weeks	Unemployed for more than 2 weeks but not more than 8 weeks	Unemployed for more than 8 weeks	Total	Tempor- arily Stopped	Total
Men 18 and over Boys under 18 Women 18 and over	52,638 4,912 37,684	46,294 4,633 36,237	82,187 1,013 47,052	181,119 10,558 120,973	21,967 606	203,086 11,164
Girls under 18	6,112	6,086	1,665	13,863	37,768 2,766	158,741 16,629
Total	101,346	93,250	131,917	326,513	63,107	389,620

The total of 389,620 includes 83,199 married women.

The changes between 11th August and 15th September in each administrative Region were as follows:-

Loss	ortened by	2.350 date 5	(including	nemploye g Casuals	d)		-

DISABLED PERSONS (EMPLOYMENT) ACT

The number of persons registered under the Disabled Persons (Employment) Act, 1944, at 21st July, 1952 (the last date on which a count was taken), was 880,243, compared with 883,352 at 21st April, 1952.

The number of disabled persons on the register who were unemployed at 15th September, 1952, was 54,957, of whom 47,853 were males and 7,104 were females. The total included 26,547 persons who had served in H.M. Forces and 28,410 who had not served. An analysis of these figures is given in the Table below.

NEB. 10 NEB. 1 - N. 00 NEW 21	Males	Females	Total
Suitable for ordinary employment: Ex-Service Others	23,571 17,860	202 6,290	23,773 24,150
Total	41,431	6,492	47,923
Severely disabled persons classified as unlikely to obtain employment other than under special conditions:* Ex-Service	2,753 3,669	21 591	2,774 4,260
Total	6,422	612	7,034
Grand Total	47,853	7,104	54,957

^{*} These persons are excluded from the statistics of unemployed persons on the registers of Employment Exchanges given in the preceding Tables.

NUMBERS UNEMPLOYED: INDUSTRIAL ANALYSIS

The statistics given below show, industry by industry, the number of persons who were registered as unemployed at 15th September, 1952, distinguishing those wholly unemployed (i.e., out of a situation) from those temporarily stopped (i.e., suspended from work on the understanding that they were shortly to return to their

^{*} The figures for coal mining exclude all the unemployed at 15th September, 1952, who, although previously employed in coal mining, are known to be unfit for employment in that industry. These men are, however, included with "Other persons not classified by industry" on the next page. The total of 1,473 males unemployed includes 296 men registered for underground work.

^{*} The totals include unemployed casual workers (2,768 males and 208 females in Great Britain and 3,959 males and 221 females in the United Kingdom).

Placing Work of the Employment Exchanges

The Table below shows for the four-week periods ended 30th July and 27th August, 1952, the numbers of vacancies filled by Employment Exchanges and other Local Offices of the Ministry of Labour and National Service in Great Britain, together with the numbers remaining unfilled at the end of each period. The figures include placings, etc., by the Youth Employment Offices of certain Local Authorities.

Total	248,825	297,432	275,536	266,734	2,260,455

The figures of vacancies filled relate only to those vacancies which were filled by applicants submitted by Employment Exchanges, *i.e.*, they do not include engagements of workpeople by employers that were made without the assistance of Employment Exchanges. The figures are therefore not comparable with the

percentage rates of engagements given in the "Labour Turnover" Table on the next page, which relate to engagements of all kinds during the period in question.

during the period in question.

The figures of vacancies unfilled represent the numbers of vacancies notified by employers to Employment Exchanges and remaining unfilled at the specified dates. They do not purport to represent the total number of vacancies which require to be filled, and they probably fall short of the total number for several reasons. In the first place, vacancies in employments which are excepted from the provisions of the Notification of Vacancies Order, 1952 (which came into operation on 25th February, 1952), may be filled by direct engagement of workpeople without notifying the Employment Exchanges. Secondly, employers who do use the Employment Exchange system may, in certain circumstances (e.g., when they require large numbers of additional workpeople, or where labour of the kind they require is scarce), have a "Standing Order" with the Employment Exchange to submit all suitable applicants to them without "notifying" any specific number of vacancies, and the vacancies remaining unfilled in such cases will not be included in the figures. Nevertheless, comparison of the figures for various dates provides some indication of the change in the demand for labour.

The next Table shows the numbers of vacancies filled during the four weeks ended 27th August, 1952, in each of the industry "Orders" of the Standard Industrial Classification and in certain selected industries within the Orders, together with the number of vacancies remaining unfilled at 27th August, 1952.

Labour Turnover

The Table below shows labour turnover rates (per 100 employees) in the manufacturing industries during the four-week period ended 26th July, 1952, with separate figures for males and females. The figures are based on information given by employers with more than 10 employees on returns which they render every month to the Ministry of Labour and National Service. Each return shows the numbers of males and females on the pay-roll (a) at the date of the return and also (b) at the date of the previous return, and an additional item shows (c) the numbers on the pay-roll at the later of the two dates who were not on the pay-roll at the earlier date. The figures in item (c) are adopted as representing engagements during the period, and the figures of discharges and other losses are obtained by adding the numbers engaged during the period to the numbers on the pay-roll at the beginning of the period and deducting from the figures thus obtained the numbers on the pay-roll at the end of the period. It must be borne in mind, however, that the figures of engagements obtained in the way indicated above do not

include persons engaged during the period who were discharged or otherwise left their employment before the end of the same period, and the percentage rates both of engagements and of discharges, etc., in the Table below accordingly understate, to some extent, the total intake and wastage during the period. In spite of this limitation, however, the figures enable comparisons to be made between the turnover rates of different industries and also between the figures for consecutive months for the same industry, in the latter case after allowance is made for any difference in the length of period covered.

It is also important to note that the figures for any industry represent the aggregated totals of the numbers engaged and discharged by all firms rendering returns in the industry. Some of the persons who were discharged or left their employments during the period were probably engaged by other firms in the same industry, and the net numbers of engagements and losses of an industry, considered as one unit, will be less in every case than the sum of the figures for the individual firms.

^{*} The figures for June, which appeared in the September issue of this GAZETTE, related to a five-week period.

Unemployment Benefit and National Assistance

Unemployment Benefit

For the period of thirteen weeks ended 27th September, 1952, expenditure on unemployment benefit in Great Britain (excluding the cost of administration) amounted to approximately £6,227,000. During the thirteen weeks ended 28th June, 1952, the corresponding figure was £5,882,000, and during the thirteen weeks ended 29th September, 1951, it was £2,546,000.

National Assistance

Local Offices of the Ministry of Labour and National Service undertake the payment of national assistance to persons who are required to register for employment and are entitled to national assistance. The amount of national assistance thus paid during the thirteen weeks ended 27th September, 1952, was approximately £1,830,000. The corresponding amount paid during the thirteen weeks ended 28th June, 1952, was £1,684,000, and during the thirteen weeks ended 29th September, 1951, it was approximately £975,000.

Comparison of the figures for the quarter ended 27th September, 1952, with those for the earlier quarters is affected by the increases in the scale rates which came into force on 3rd September, 1951, and 16th June, 1952, under the National Assistance (Determination of Need) Amendment Regulations, 1951, and the National Assistance (Determination of Need) Amendment Regulations, 1952, respectively.

Insured Persons Absent from Work owing to Sickness or Industrial Injury

The Table below shows the numbers of insured persons in the various Regions of England, in Scotland and Wales, and in Great Britain as a whole, who were absent from work owing to sickness or industrial injury on 16th September and 19th August, 1952, with the corresponding figures for 18th September and 21st August, 1951. The statistics have been compiled by the Ministry of National Insurance from claims to sickness or industrial injury benefit under the National Insurance Act, 1946, and the National Insurance (Industrial Injuries) Act, 1946, respectively.

A relatively small number of claims do not result in the payment of benefit, but, because they indicate certified incapacity for work, such claims are included in the Table. Injury benefit is payable in respect of both industrial accidents and prescribed industrial diseases.

Work of Appointments Services

The particulars given below and on the next page relate to the work of the Appointments Services of the Ministry of Labour and National Service.

Technical and Scientific Register

The Technical and Scientific Register operates centrally on a national basis from Almack House, 26–28 King Street, St. James's Square, London, S.W.1 (Telephone number, Trafalgar 7020), but it also has a representative in Scotland at the Glasgow Appointments Office, 450 Sauchiehall Street, Glasgow, C.2 (Telephone number, Glasgow Douglas 7161).

The Register, which is assisted by Advisory Committees composed of members of the professions concerned, provides a placing and advisory service for physicists, mathematicians, chemists (other than pharmacists), metallurgists, agriculturists, biologists and other scientists, professional engineers, architects, surveyors, town planners, estate agents and valuers. The qualification for enrolment is in general a university degree or membership of the appropriate professional institution. A register of vacancies is maintained, which includes a wide range of overseas vacancies.

The total number of persons enrolled on the Technical and Scientific Register at 15th September, 1952, was 5,821*; this figure included 4,037 registrants who were already in work but desired a change of employment, and 1,784 registrants who were unemployed.

The number of vacancies notified, filled, etc., between 12th August and 15th September (5 weeks) are shown below.

acancies	outstanding at 12th August	97.000	-	4,475	
,,	notified during period	Applied R		529

Appointments Register

The Appointments Register is concerned with the placing of persons having professional, administrative, managerial or senior executive experience or qualifications, and those having technical qualifications not appropriate to the Technical and Scientific Register. The registers are maintained at the London Appointments Office, which serves the South of England and the Midlands and South Wales; the Northern Appointments Office in Manchester, which serves the North of England broadly as far as the southern borders of Yorkshire and Cheshire, and North Wales; and the Scottish Appointments Office in Glasgow, which covers the whole of Scotland.

The total number of persons on the registers of the Appointments Offices at 15th September was 16,120†, consisting of 14,428 men and 1,692 women. The number on the registers included 8,963 men and 861 women who were in employment, while 5,465 men and 831 women had registered as unemployed at some date in the preceding two months and were not known to be in employment at 15th September.

The following Table shows the numbers of registrations at each of the Offices:—

Appointments Office	In Em	ployment	Unemployed			
	Men	Women	Men	Women		
Condon	5,285 2,506 1,172	561 163 137	4,246 745 474	604 112 115		
Total†	8,963	861	5,465	831		

During the period 12th August to 15th September, 1952, there were new registrations by 1,608 men and 306 women, and during the same period the registrations of 2,139 men and 354 women lansed.

The table below shows the numbers of vacancies (other than those for nurses and midwives) notified, filled, etc., between 12th August and 15th September.

Vacancies	outstanding at 12th August	2,033	236
,, 20mm	notified during period	682	94
,,	cancelled or withdrawn during period	545	56
,,	filled during period	260	44
,,	unfilled at 15th September	1,910	230

Figures of vacancies outstanding and of registrants at 15th September for certain selected professions and occupations are given on the next page.

* This figure includes 687 registrants who were also registered at Appointments Offices and 249 unemployed registrants who were also registered at Employment Exchanges.

Exchanges.

† Excluding 107 persons registered for overseas employment only and 2,154 whose registrations had been referred to the Local Offices for assistance in placing. Registrations of nurses and midwives are also excluded.

‡ This column includes vacancies for which employers were willing to accept either men or women.

FIGURES FOR SELECTED PROFESSIONS AND OCCUPATIONS

The Table below shows, in respect of selected professions and occupations, the number of vacancies outstanding and of registrants at Appointments Offices on 15th September, 1952. A number of the vacancies are overseas.

The general employment position in respect of the grades of workers dealt with at Appointments Offices has not materially changed since the previous publication of comparable figures (see the issue of this GAZETTE for April, page 142). The reorganisation of the service which entailed the closing of eight Appointments

Offices as reported in the June issue of this GAZETTE (page 203), has led to a reduction of about 2,000 in the number of applicants on the Register. The number of vacancies available in any classification is generally smaller than the number of applicants, and within each group there is often a difference in the qualifications and experience an employer is looking for and in the qualifications and experience which registrants possess. Appointments Offices and experience which registrants possess. Appointments Offices report difficulty in placing the registrants from the older age groups; and the Register also contains a proportion of immobile workers.

Anything that Saves Time—

Saves Money!

This Famous Device will Save you Both

More than 75,000 busy business and cofessional men are today using and enefitting from the famous "System" sesk Diary. You can do the same.

The "System" Desk Diary is the most effective time, worry and memory-saver ever devised. It systematises your day's work; records all your appointments, engagements, things to be done, matters to be taken up, etc.—and automatically brings them to your notice on the right dates. Each morning it shows you what you have on for the day; makes notes for future attention. Reference can always be made to past happenings.

Quickly Repays its **Moderate Cost**

Because the "System" Desk Diary saves you time at every point of your day's work, and so enables you to devote more attention to important affairs, it soon pays for itself.

The "System" Desk Diary cannot go wrong or get out of order; is absolutely automatic, needs no filing or posting of records. And it takes only a few seconds to substitute new Refills for the forthcoming year,

ORDER BEFORE THE SUPPLY IS EXHAUSTED

Secure this efficiency device for your own and your manager's use and benefit throughout the entire year before the limited supply is sold out—you can have several for less than one week's salary of a junior clerk. Complete and return this coupon now.

FILL IN AND POST THIS COUPON TODAY SHAW'S EFFICIENCY DEVICES, 180 FLEET STREET, LONDON, E.C.4.
Please send me System Desk Diaries with stands and daily sheets, size 5½-in. by 3½-in., for 1953 at 13s. 1d. each, including Purchase Tax and Postage, and invoice them on despatch

Please send me a special quotation for System Desk Diaries for 1953

Name Address

ADVANTAGES FOR THE LOCATION OF NEW INDUSTRY-

RAW MATERIAL.—Direct services with all world ports . . . River access for inland supplies.

LOCAL INDUSTRIES SUPPLY.—Solvents and plasticisers, oils (mineral and vegetable), pigments, adhesives, leather, coal tar products, chalk, cement, engineering and millwright services, fish meal and fertilizers, grain products, woodware, packing materials.

LABOUR.—Immediately available. Examination of the vital statistics reveals reasonable prospects for future labour supply for several large new industries. (Ask for details.)

MARKETS.—Hull serves an inland area with 14,000,000 population, and exports to all parts of the world.

Employment Overseas in the Coal Mining Industry in August

The statistics given below in respect of employment, etc., in the coal mining industry in August have been compiled by the Ministry of Fuel and Power from information provided by the National

Coal Board.

The average weekly number of wage-earners on the colliery books in Great Britain during the four weeks ended 30th August was 720,400, compared with 719,400 for the four weeks ended 2nd August, and 699,300 for the four weeks ended 25th August, 1951.

The total numbers who were effectively employed were 595,900 in August, 568,300 in July, and 548,700 in August, 1951; these figures exclude wage-earners who were absent for any reason

figures exclude wage-earners who were absent for any reason (including holidays) for the whole of any week. The Table below shows the numbers of wage-earners on the colliery books in the various Districts in August, 1952, together with the increase or decrease* in each case compared with July, 1952, and August, 1951.

Average Numbers of Wage-earners on Colliery Books—Analysis by Districts

District†	Average numbers of wage-earners on colliery	Increase (+) or compared with	r decrease (-)* the average for

tershire Lancashire and Cheshire North Wales North Staffordshire Cannock Chase South Staffordshire, Worcester-	14,700 52,000 9,400 20,500 16,200	+ 100 + 100 + 100 + 100 + 100	+ 3,400 + 400 + 1,500 + 300
shire and Shropshire Warwickshire South Wales and Monmouth- shire	5,700 15,900 104,300	 - 100	+ 300 + 800 + 2,100
Somerset Kent	6,300 6,400	in adot t	+ 100 + 300
England and Wales West Fife East Fife	14,600 8,500	+ 900	+ 17,600
The Lothians Central West Central East West Ayr East Ayr Alloa	13,200 12,200 13,600 7,100 9,400 7,000	+ ··· 100 ···	+ 500 + 500 + 500 + 400 + 100 + 600 + 500
Scotland	85,600	+ 100	+ 3,500
Great Britain	720,400	+ 1,000	+ 21,100

It is provisionally estimated that, during the four weeks of August, about 7,320 persons were recruited to the industry, while the total number of persons who left the industry was about 6,310; the numbers on the colliery books thus showed a net increase of 1,010. During the four weeks of July there was a net increase of

The average number of shifts worked per week by coal-face workers who were effectively employed was 4·72 in August, 4·87 in July, and 4·73 in August, 1951. The corresponding figures for all workers who were effectively employed were 5·11, 5·28 and 5·11. Information is given in the Table below regarding absenteeism in the coal mining industry in August and July, 1952, and August, 1951. Separate figures are compiled in respect of (a) voluntary absenteeism (absences for which no satisfactory reason is given) and (b) involuntary absenteeism (absences due mainly to sickness). The figures represent the numbers of shifts lost through absenteeism, expressed as percentages of the total numbers of shifts that could have been worked.

Percentages of Shifts lost through Absenteeism

	August, 1952	July, 1952	August, 1951
Coal Face Workers:	ges, posedosede au	or Californian s	a participant
Voluntary Involuntary	9·60 7·05	9·05 6·75	8·53 7·33
All Workers: Voluntary	7.39	6.63	
Involuntary	6.32	5.87	6.61

For face-workers the output per man-shift worked was 3.05 tons in August, compared with 3.13 tons in the previous month and 3.09 tons in August, 1951.

The output per man-shift calculated on the basis of all workers was 1·15 tons in August; for each of the months July, 1952, and August, 1951, the figure was 1·16 tons.

"No change" is indicated by three dots. The districts shown conform to the organisation of the National Coal Board.

AUSTRALIA

According to information received by the Commonwealth Bureau of Census and Statistics, the number of persons employed in factories in March was 0.5 per cent. lower than in the previous month and 1.1 per cent. lower than in March, 1951.

Returns received by the Dominion Bureau of Statistics from employers in industries other than agriculture and private domestic service indicate that the total number of workpeople in employment at 1st July, in the establishments covered by the returns, was 1·1 per cent. higher than at the beginning of the previous month and 0·5 per cent. higher than at 1st July, 1951. The number of persons employed in manufacturing industries at 1st July was 0·2 per cent. lower than at the beginning of the previous month and 1·7 per cent. lower than at 1st July, 1951.

UNION OF SOUTH AFRICA

According to the general index of employment compiled by the Office of Census and Statistics, the number employed in manufacturing, transportation and mining (other than alluvial gold diggings) in April was 0·2 per cent. lower than in the previous month, and 3·9 per cent. higher than in April, 1951.

UNITED STATES OF AMERICA

The number of civilians in employment as wage or salary earners in industries other than agriculture and domestic service in July is estimated by the Department of Labor to have been approximately 45,941,000. This was 0·9 per cent. lower than the figure for the previous month, and 1·1 per cent. lower than for July, 1951. The index figure of wage-earners' employment in manufacturing industries (revised series, base 1947–9 = 100) showed a decrease of 3·2 per cent. in July compared with the previous month but a decrease of 6·9 per cent. compared with July, 1951. The Bureau of the Census estimate that the total number of unemployed persons at the middle of July was about 1,942,000, compared with 1,818,000 at the middle of the previous month and 1,856,000 at the middle of July, 1951.

BELGIUM

The Belgian Ministry of Labour and Social Welfare has adopted a new method of presenting statistics of unemployment. According to the report for July, which is the first in the new series, the average daily number of persons recorded as wholly unemployed during July was 158,380, compared with 163,865 in the previous month and 141,242 in July, 1951. Partial unemployment accounted additionally for a daily average loss of 58,623 working days. The number of persons wholly unemployed included 46,787, who, owing to physical incapacity or age, were difficult to place in employment. The total number of working days lost in July by persons wholly unemployed was 3,642,748, and 1,348,326 days were lost as a result of partial unemployment.

FRANCE

The number of persons registered as applicants for employment at the beginning of August was 105,539, of whom 33,615 were wholly unemployed persons in receipt of assistance. Corresponding figures at the beginning of July were 110,506 and 36,103 and 90,802 and 32,989 at the beginning of August, 1951.

GERMANY

In the Federal Republic the number unemployed at the end of August was 1,106,537, compared with 1,155,456 at the end of the previous month and 1,259,311 at the end of August, 1951. In the Western Sectors of Berlin the corresponding figures at the same dates were 266,082, 276,043 and 284,555.

IRISH REPUBLIC

The number of unemployed persons on the live register of Employment Exchanges at 27th September was 47,234, compared with 47,805 at 23rd August and 40,505 at 29th September, 1951.

ITALY

The number registered for employment at the end of July was 2,062,213, of whom 1,231,882 were wholly unemployed with a previous history of employment, and the remainder were young persons, etc., registering for first employment or employed persons seeking other employment. At the end of the previous month the number registered for employment was 2,031,708, including 1,212,921 wholly unemployed, and at the end of July, 1951, it was 1,888,338, including 1,172,087 wholly unemployed.

NETHERLANDS

The number of persons registered at Employment Exchanges at the end of August was 118,534, of whom 88,767 were wholly unemployed, 1,755 were temporarily stopped, and 28,012 were relief workers. At the end of the previous month the number registered was 117,134 (86,927 wholly unemployed) and at the end of August, 1951, it was 79,093 (61,430 wholly unemployed).

SWITZERLAND

The number of registered applicants for employment at the end of July who were wholly unemployed was 1,451 or 1·0 per thousand of the employed population (exclusive of apprentices) according to the census of 1941, compared with 1,417 or 0·9 per thousand at the end of the previous month and 1,159 or 0·8 per thousand at the end of July, 1951.

Changes in Rates of Wages and Hours of Labour

RATES OF WAGES

Changes in September

In the industries covered by the Department's statistics,* the changes in the rates of wages reported to have come into operation in the United Kingdom during September resulted in an aggregate increase estimated at approximately £707,000 in the weekly full-time wages of about 2,110,000 workpeople, and in a decrease of about £330 for 12,000 workpeople.

The principal increases affected workpeople employed in the retail distributive trades, electricity and gas supply, company-owned motor omnibus undertakings and municipal tramway, trolleybus and omnibus undertakings, laundries, furniture manu-facture and boot and shoe manufacture. Others receiving increases included workers engaged in sugar confectionery manufacture and food preserving, hairdressing, and the operating and maintenance staff employed by the Road Haulage Executive. The decreases, which operated mainly under sliding-scale arrangements based on the index of retail prices, affected iron-ore miners and limestone quarrymen in Cumberland, and workers employed in the iron and steel industry in a few districts, and in brush and broom manufacture in Northern Ireland.

The statutory minimum remuneration fixed under the Wages Councils Act for workpeople employed in the retail distributive trades, including the food, drapery, outfitting, footwear, furnishing, newsagency, tobacco, confectionery, bookselling and stationery trades, was increased by varying amounts, according to age and occupation. For shop assistants 21 years or over in the food trades in England and Wales and in the drapery, outfitting and footwear trades in Great Britain the increases were 8s., 9s. or 10s. a week, according to age, for male workers and 6s. to 7s. 6d. for female workers. In the furnishing and allied trades the corresponding increases were 7s. 6d. to 9s. for men and 6s. to 7s. 6d. for women In the bookselling and stationery trades men received 7s. 6d. and women 5s., and in the newsagency, tobacco and confectionery trades in England and Wales the increases were 7s., 7s. 6d. or 8s. for men and 5s., 5s. 6d. or 6s. for women.

For workpeople employed in electricity supply undertakings there was an increase in schedule rates of 2d. an hour. For adult workers, other than craftsmen, in the gas industry the standard hourly rates were increased by 2d. The basic rates of the operating staff employed by company-owned motor omnibus undertakings were increased by 7s. a week, and there was a similar increase in the national standard rates for the operating staff, excluding skilled maintenance workers, employed by municipal tramway, trolleybus and omnibus undertakings. In the laundry trade the general minimum time rates fixed under the Wages Councils Act for men and women were increased by 2d. an hour. In the furniture manufacturing industry, a new cost of living sliding scale are necessary. industry a new cost-of-living sliding-scale arrangement was adopted, which resulted in increases of 1d. an hour for men and

½d. for women. In boot and shoe manufacture there were increases under sliding-scale arrangements based on the index of retail prices of 5s. a week in the day-wage rates for men and of 4s. for

women, with corresponding increases for pieceworkers.

Of the total increase of £707,000, about £466,000 resulted from Orders made under the Wages Councils Acts; about £136,000 was the result of arbitration awards; about £61,000 was the result of arrangements made by Joint Industrial Councils or other joint standing bodies established by voluntary agreement; about £40,000 resulted from the operation of sliding scales based on the index of retail prices; and the remainder resulted from direct negotiations between employers and workpeople or their

Changes in January-September, 1952

The following Table shows the numbers of workpeople in the United Kingdom affected by increases in rates of wages reported to the Department during the nine completed months of 1952, and the net aggregate amounts of such increases.

Industry Group	Approximate Number of Workpeople affected by Net Increases†	Estimated Net Amount of Increase in Weekly Wages
	Liceste E baggered	£
Agriculture, Forestry, Fishing	. 756,000	180,400
Mining and Quarrying	. 61,000	23,400
Treatment of Non-metalliferous Mining Product	S	REGALES STATES
other than Coal		87,900

Public Administration		154,400
Miscellaneous Services	. 286,500	90,000
Total	. 7,963,000	3,057,900

In the corresponding months of 1951 there was a net increase of £4,009,000 in the weekly full-time wages of 8,972,000 workpeople.

HOURS OF LABOUR

No changes in hours of labour were reported during the month.

PRINCIPAL CHANGES IN RATES OF WAGES REPORTED DURING SEPTEMBER

(Note.—The figure in brackets below an item in the column headed "District" relates to the page in the volume "Time Rates of Wages and Hours of Labour, 1st October, 1951," on which details for that date are given.)

Industry	District (see also Note at beginning of Table)	Date from which Change took effect	Classes of Workpeople	Particulars of Change (Decreases in italics)
Forestry	Great Britain (5)	24 June‡	Workpeople employed by the Forestry Commission	Increases of 5s. a week in the minimum wage for men 21 years and over, of 4s. for women 21 and over, and of varying amounts for certain juveniles. Rates after change include: adult male forest workers—Grade III (ordinary workers) 115s. a week, Grade II 118s. 6d., Grade I 122s.; adult female forest workers 87s.
Mining and Quarrying	Cumberland	29 Sept.	Iron-ore miners	Cost-of-living net additions to wages, previously granted, reduced by 1d. a shift (6s. 6d. to 6s. 5d.) for men and youths 18 years and over, and by \frac{1}{2}d. (3s. 3d. to 3s. 2\frac{1}{2}d.) for boys under 18.
	West Cumberland (8)	do.	Limestone quarrymen	Cost-of-living net additions to wages, previously granted, reduced by 1d. a shift (6s. 7d. to 6s. 6d.) for men and youths 18 years and over, and by ½d. (3s. 3½d. to 3s. 3d.) for boys.
	Yorkshire (10)	2 Sept.	Labourers employed in the freestone and sandstone quarrying industry	Rates for labourers increased from 80 per cent. to 82½ per cent. of the Grade 1 workers' rates (calculated to the nearest farthing), resulting in an increase of 1d. an hour. Rates after change: Zone A 2s. 8½d. an hour, Zone B 2s. 7½d.

* The particulars of numbers affected by changes in rates of wages and working hours, and of the amount of change in weekly wages and hours of labour, exclude changes affecting clerical workers, for whom the information available is not sufficient to form a basis for statistics. The estimates of the effect of the changes on weekly wages are based on normal conditions of employment and do not take into account the effect either of short-time or of overtime.

† Workpeople who receive two or more increases in wages during the period are counted only once in this column.

† These rates were agreed in September and made retrospective to the date shown.

§ Under sliding-scale arrangements based on the official index of retail prices.

| Wages are subject to further ad hoc additions of 2s. 6d. a shift for men and of 1s. 3d. a shift for youths and boys.

¶ War bonus, previously granted, of 5s. 1d. a shift for men and youths 18 and over, and of 2s. 6\frac{1}{2}d. for boys, remains unchanged.

* These increases took effect under an Order issued under the Wages Councils Act (Northern Ireland). See page 372.
† This increase was the result of an Industrial Court Award dated 10th September, with retrospective effect to the date shown. It applied to musicians employed theatres and music-halls owned or controlled by the Theatrical Managers' Association Ltd. (including Moss Empires Ltd.).
‡ These increases took effect under an Order issued under the Wages Councils Act. See page 371.
§ These increases took effect under an Order issued under the Wages Councils Act. See page 337 of the September issue of this GAZETTE.

Index of Rates of Wages

The index figure of rates of wages measures the movement, from month to month, in the level of full-time weekly rates of wages in the principal industries and services in the United Kingdom compared with the level at 30th June, 1947, taken as 100. The industries and services covered by the index and the method of calculation were described on page 41 of the issue of this GAZETTE for February, 1948. The index is based on the recognised rates of wages fixed by collective agreements between organisations of employers and workpeople, arbitration awards or statutory orders. The percentage increases in the various industries are combined in accordance with the relative importance of the industries, as measured by the total wages bill in 1946. The index does not reflect changes in earnings due to such factors as alterations in working hours, or in piece-work earnings due to variations in output or the introduction of new machinery, etc.*

Where necessary the figures have been revised to include changes arranged with retrospective effect or reported too late for inclusion in the current figures.

The figures, on the basis of 30th June, 1947 = 100, are shown in the next column.

(end of mont	h)	Men	Women	Juveniles	All Workers

^{*}As indicated on page 303 of the September issue of this GAZETTE, the index of actual weekly earnings in April, 1952, the latest available, was 142 for all workers mbined as compared with 129 for rates of wages in those industries covered by the earnings enquiries (and 128 in all the principal industries and services—corresponding with the Table above).

Industrial Disputes

DISPUTES IN SEPTEMBER

The number of stoppages of work* arising from industrial disputes in the United Kingdom, reported to the Department as beginning in September, was 155. In addition, 23 stoppages which began before September were still in progress at the beginning of that month. The approximate number of workers involved during September in these 178 stoppages, including workers thrown out of work at the establishments where the stoppages occurred, though not themselves parties to the disputes, is estimated at nearly 29,000. The aggregate number of working days lost at the at nearly 29,000. The aggregate number of working days lost at the establishments concerned during September was about 106,000.

The following Table gives an analysis, by groups of industries, of stoppages of work in September due to industrial disputes:—

		of Stoppa ress in Mo	Number of Workers	Aggregate Number of Working		
Industry Group	Started before begin- ning of Month	Started in Month	Total	involved in all Stop- pages in progress in Month	Days lost in all Stop- pages in progress in Month	
Coal Mining	5 3	120	125	17,300	31,000	
Building and Con-				3,000	31,000	
All remaining indus-	3	8	11	2,600	17,000	
tries and services	12	25	37	5,900	27,000	
Total, September, 1952	23	155	178	28,800	106,000	
Total, August, 1952	23	151	174	45,000	168,000	
Total, September, 1951	17	160	177	35,000	113,000	

Of the total of 106,000 days lost in September, 52,000 were lost by 20,000 workers involved in stoppages which began in that month. Of these workers, 16,100 were directly involved and 3,900 indirectly involved (i.e., thrown out of work at the establishments where the stoppages occurred but not themselves parties to the disputes). The number of days lost in September also included 54,000 days lost by 8,800 workers through stoppages which had continued from the previous month.

Duration of Stoppages

Of 154 stoppages of work owing to disputes which ended during September, 68, directly involving 3,200 workers, lasted not more than one day; 34, directly involving 3,600 workers, lasted two days; 19, directly involving 3,500 workers, lasted three days; 15, directly involving 4,600 workers, lasted four to six days; and 18, directly involving 3,400 workers, lasted over six days.

Causes of stoppages

Of the 155 disputes leading to stoppages of work which began in September, 11, directly involving 1,300 workers, arose out of demands for advances in wages, and 49, directly involving 4,400 workers, on other wage questions; 6, directly involving 1,500 workers, on questions as to working hours; 19, directly involving 4,300 workers, on questions respecting the employment of particular classes or persons; 67, directly involving 4,200 workers, on other questions respecting working arrangements; and 2, directly end of the previous year.

involving 100 workers, on questions of trade union principle. One stoppage, directly involving 300 workers, was in support of workers involved in another dispute.

DISPUTES IN THE FIRST NINE MONTHS OF 1952 AND 1951

The following Table gives an analysis by groups of industries of all stoppages of work through industrial disputes in the United Kingdom in the first nine months of 1952 and 1951:—

January to September, 1952 | January to September, 1951

Industry Group Sib	Number of toppages beginning in period	Number of Workers involved in all Stoppages in progress	Aggregate Number of Working Days lost in all Stoppages in progress	Number of Stoppages beginning in period	Number of Workers involved in all Stoppages in progress	Aggregate Number of Working Days lost in all Stoppages in

Total	1,327§	294,100†	1,445,000	1,322	308,900†	1,448,000

The number of days lost in the period January to Septemb 1952, through stoppages which *began* in that period was 1,422,000, the number of workers involved in such stoppages being 292,900. In addition, 23,000 days were lost at the beginning of the year by 1,200 workers through stoppages which had begun towards the

PRINCIPAL DISPUTES DURING SEPTEMBER

Industry, Occupations and Locality	Number of	oximate of Workers olved	Date when	n Stoppage	Cause or Object	Result		
	Directly	Indirectly	Began	Ended	Cause of Copes	Rose		
Coal Mining:— Colliery workers—various Scottish districts	3,270	-	30 Aug.¶	-1	Rejection of a claim for an increase in wages of 30s. a week	1		
Motor Vehicles:— Workers employed in motor body building—Willesden (one firm)	1,100	180	24 June	7 Oct.	Coach finishers' dissatisfaction with piecework rates fixed for a new job, and protest by other workers against the consequent suspension of a number of workers rendered idle	Suspended workers reinstated, and negotiations to be resumed regarding piecework rates.		
Workers employed in vehicle body building—Leeds (one firm)	270	-	17 Sept.	19 Sept.	In sympathy with the workers involved in the above dispute	Work resumed on advice of trade union officials,		
Building and Contracting:— Tubular scaffolders, labourers, joiners, bricklayers, plasterers, etc., employed on the construction of an oil refinery—Ellesmere Port (one firm)	550	840	22 Sept.	15 Oct.	Dispute as to payment of extra height money and bonus allowance	Work resumed by workers, other than scaffolders and scaffolders' labourers. Scaffolding work put out to subcontractors.		

^{*} Stoppages of work due to disputes not connected with terms of employment or conditions of labour are excluded from the statistics. Stoppages involving fewer than 10 workers, and those which lasted less than one day, are also excluded, except any in which the aggregate number of working days lost exceeded 100. The figures for the month under review are provisional and subject to revision; those for earlier months have been revised where necessary in accordance with the most recent information.

[†] Some workers, largely in the coal mining industry, were involved in more than one stoppage and are counted more than once in the totals. The net number of individuals involved in coal mining stoppages in the period under review in 1952 was approximately 130,000, and in the corresponding period in 1951 was approximately 85,000. For all industries combined the corresponding net totals were approximately 255,000 and 260,000.

‡ Less than 50 workers or 500 working days.

§ A stoppage of apprentices which began in March (see the issue of this GAZETTE for April, page 149) involved workers in several industries but has been counted as only one stoppage in the total for all industries taken together.

|| The occupations printed in italics are those of workers indirectly involved, i.e., thrown out of work at the establishments where the stoppages occurred, but not themselves parties to the disputes.

|| Stoppages of work occurred on Saturdays only. Some collieries were affected on more than one Saturday. On 30th August, 8 collieries and 670 workers were involved and varying numbers of collieries and workers were involved on subsequent Saturdays. Saturday working had been resumed at the majority of the collieries by 4th October.

INDEX FOR 16th SEPTEMBER, 1952

ALL ITEMS (17th June, 1947=100) ... 136

At 16th September, 1952, the retail prices index was 136 (prices at 17th June, 1947 = 100), compared with 137 at 12th August and with 128 at 18th September, 1951. The fall in the index during the month was due mainly to reductions in the prices of fruit and wegetables, but there were a number of other small changes. The net effect of these changes was slight but sufficient to lower the index, when expressed to the nearest whole number, by one point.

The interim index of retail prices measures, for the United Kingdom, the average changes, month by month, in the prices of the goods and services which enter into working-class expenditure.

the goods and services which enter into working-class expenditure. As some goods and services are much more important than others, the relative changes in the price levels of the various items included are combined by the use of "weights". The "weights" now used are in proportion to the estimated consumption of the various items in 1950 valued at the prices ruling in January, 1952. Using these weights, the index figure for each month is first calculated as an index with prices at 15th January, 1952, taken as 100.

The price comparisons used in compiling the index figures relate to a fixed list of items, and steps are taken to ensure that, so far as possible, the index figures reflect real changes in price levels but not changes in the prices quoted which are attributable to variations in quality.

variations in quality.

DETAILED FIGURES FOR 16th SEPTEMBER, 1952

The following Table shows, for each of the nine main groups of items and for all the groups combined, the indices at 16th September, 1952, on the basis 15th January, 1952 = 100, together with the relative weights which have been used in combining the group indices into a single "all items" index:—

PRINCIPAL CHANGES DURING MONTH

The principal change in food prices between 12th August and 16th September was a fall in the average level of prices for fruit, due mainly to a substantial fall in the average price of cooking apples and a small fall in the average price of oranges. The average prices of tomatoes and some other vegetables were also reduced and there were small reductions in the average prices of canned ham and tea. For the food group as a whole the average level of prices fell by about one-half of 1 per cent. and the index figure at 16th September, expressed to the nearest whole number, was 106, compared with 107 at 12th August.

Clothing

Small reductions in the average prices of many of the items included in the clothing group were reported during the month under review, but the effect of these reductions was partly offset by a rise in the level of prices for men's outer clothing, particularly men's suits. For the clothing group as a whole the average level of prices fell by about one-half of 1 per cent. but there was no change in the index figure, as expressed to the nearest whole number, which remained at 96.

During the month under review there was a small increase in the During the month under review there was a small increase in the average price of coal, due to a seasonal increase in prices in London and the south of England. In a number of areas the charges for electricity were increased. For the fuel and light group as a whole the average level of prices rose by about one-half of 1 per cent, and the index figure, expressed to the nearest whole number, was 102 at 16th September, compared with 101 at 12th August.

Amongst the items included in the services group, the principal change was an increase in the charges for admission to football matches. There was also a small increase in the cost of railway travel outside the London area, partly offset by some decreases in fares within London. For the services group as a whole the average level of charges rose by about 1 per cent. and the index figure, expressed to the nearest whole number, was 106 at 16th September, compared with 105 at 12th August.

In the five remaining groups, covering rent and rates, household durable goods, miscellaneous goods, alcoholic drink, and tobacco, there was little change in the general level of prices during the month under review. The index figures for these groups, expressed to the nearest whole number, were 103, 98, 103, 101 and 100,

ALL ITEMS INDICES FOR 1947-52

(17th June, 1947 = 100)

The figures in the two preceding sections are index numbers showing changes in the level of prices compared with the level at 15th January, 1952. Before January, 1952, however, the index figures were calculated on a different weighting basis and they showed the changes in the level of prices compared with 17th June, 1947, the date when the Interim Index of Retail Prices was started. The "all items" index numbers in the two series can be linked together, however, in order to produce a continuous series of figures showing the change in the level of prices compared with the level at the starting date of the index, viz., 17th June, 1947.

Thus at 16th September 1952 the "all items" figure in the new

Thus at 16th September, 1952, the "all items" figure in the new series, with prices at 15th January, 1952, taken as 100, was 103·0. This figure has then to be linked to the index figure for 15th January, 1952, in the old series, in order to produce an "all items" figure for 16th September, 1952, comparable with all the indices published for dates up to and including January, 1952, i.e., on the basis 17th June, 1947, taken as 100. The calculation is as follows:—

taken as 100. The calculation is as follows.	
All items index at 15th January, 1952 (17th	
June, 1947 = 100)	132.5
All items index at 16th September, 1952	
$(15th January, 1952 = 100) \dots$	103.0
:. All items index at 16th September, 1952	103.0
(17th June, 1947 = 100)	132·5×
	100

This calculation yields a figure slightly under 136.5 and accordingly the final index figure, to the nearest whole number, is 136.

The Table below shows the figures for "all items" from June, 1947, onwards with prices at 17th June, 1947, taken as 100. The figures normally relate to the Tuesday nearest to the 15th of each

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec

Fatal Industrial Accidents

Ministry of Labour Gazette. October, 1952

The number of workpeople (other than seamen) in the United Kingdom whose deaths from accidents in the course of their employment were reported in September was 120, compared with 81 in the previous month and 106 (revised figure) in September, 1951. In the case of seamen employed in ships registered in the United Kingdom, 16 fatal accidents were reported in September, compared with 7 in the previous month and 8 in September, 1951. Detailed figures for separate industries are given below for September, 1952.

Industrial Disputes Tribunal Awards

During September the Industrial Disputes Tribunal issued fifteen awards, Nos. 229 to 243*. Five of the awards are sum-

fifteen awards, Nos. 229 to 243*. Five of the awards are summarised below; the others related to individual employers.

Award No. 229 (3rd September).—Parties: Members of the Yorkshire Federation of the Baking Industry, and members of the Amalgamated Union of Operative Bakers, Confectioners and Allied Workers, Northern District, in their employment. Claim: For minimum rates of pay higher by certain specified amounts than those laid down by the Baking Wages Council. Award: The Tribunal found that the claim had not been established.

Award No. 236 (22nd September).—Parties: Members of the Jute Carpet Manufacturers' Association, and members of the Scottish Carpet Trade and Factory Workers' Union in their employment. Claim: (1) For an extension of the sliding scale in the cost-of-living agreement on the lines laid down by the National Joint Committee for the Carpet Industry, and (2) for the observance by the Association of agreements reached by that Committee by the Association of agreements reached by that Committee.

Award: The Tribunal awarded that the sliding scale arrangement provided in the agreement between the parties dated 13th July, 1949, as amended on 17th August, 1951, should be extended, and that such extension should operate with effect from the beginning of the

such extension should operate with effect from the beginning of the first full pay day in May, 1952. They referred back to the parties for settlement by negotiation the details of the extension. The Tribunal found that item (2) of the claim had not been established. Award No. 237 (22nd September).—Parties: Members of the Jute Carpet Manufacturers' Association, and members of the Scottish Carpet Trade and Factory Workers' Union in their employment. This dispute was reported by the Association and arose out of a claim made by the Union that the wages structure of the Association should be governed by the National Joint Committee.

Association should be governed by the National Joint Committee for the Carpet Industry. Award: The Tribunal found that the claim had not been established.

Award No. 238 (22nd September).—Parties: Members of the Aberdeen and District Packing Case Manufacturers' Association (1943), and members of the Amalgamated Society of Woodcutting Machinists in their employment. Claim: For an additional week's summer holiday with pay Award: The Tribunal awarded that in summer holiday with pay. Award: The Tribunal awarded that in 1952 and subsequent years workers with at least twelve months' continuous service should be granted two weeks' annual holiday with pay subject to the right of employers to grant the second week at a time convenient to them; that workers with less than twelve months' service should be granted one day's holiday with pay for each completed month's service prior to the commencement of the first week's holiday; and that in respect of 1952 only a week's pay may be granted in lieu of a second week of holiday.

Award No. 242 (29th September).—Parties: Members of the

Award No. 242 (29th Septemoer).—Paries: Members of the Leeds and District Master Bakers' and Confectioners' Association, and members of the Amalgamated Union of Operative Bakers, Confectioners and Allied Workers, Northern District, in their employment. Claim: For minimum rates of pay higher by certain specified amounts than those laid down by the Baking Wages Council. Award: The Tribunal found that the claim had not been

National Arbitration Tribunal (Northern Ireland) Awards

Since the last issue of this GAZETTE was prepared the National Arbitration Tribunal (Northern Ireland) has issued eleven awards,

one of which is summarised below; the others did not relate to a substantial part of an industry.

Award No. 994 (10th September).—Parties: Employers' Side of the Joint Council Furniture Industry (Northern Ireland) and certain members of the trade unions represented on the Trade Union Side of the Joint Council Furniture Industry (Northern Ireland). Claim: For members of the trade unions concerned to be granted two weeks' annual holiday with pay. Award: The Tribunal awarded that the workers to whom the claim relates shall, beginning in 1953, be entitled to two weeks' annual holiday

Civil Service Arbitration Tribunal

During September the Civil Service Arbitration Tribunal issued three awards, Nos. 187 to 189, which are summarised below.

Award No. 187 (16th September).—Parties: Civil Service Union and Commissioners of Customs and Excise. Claim: For increase

* See footnote * in second column on page 374.

in pay, from 1st January, 1952, of Land Preventive Men. Award: The Tribunal awarded, as from the beginning of the first full pay period following the date of the award, that the present undifferentiated basic scale without pay additions of the Land Preventive Men grade shall be 110s. by 3s. to 126s.

Award No. 188 (27th September).—Parties: Telephone Managers' Committee and the Post Office. Claim: For increase in salaries of Telephone Managers and Deputy Telephone Managers with retrospective effect. Award: The Tribunal, as from 1st January, 1951, fixed annual salaries as follows:—Telephone Managers, Class I Areas £1,500, Class II £1,350, Classes III and IV £1,250, London Centre Area £1,500 Other London Areas £1,400: Deputy

London Centre Area £1,500, Class II £1,530, Classes III and IV £1,230, London Centre Area £1,550, Other London Areas £1,400; Deputy Telephone Managers, All Areas £1,250.

Award No. 189 (30th September).—Parties: Civil Service Union and the Forestry Commission. Claim: For increase in salary scale of foremen with retrospective effect. Award: The Tribunal found against the claim.

Industrial Courts Act, 1919, and Conciliation Act, 1896

Industrial Court Awards

During September the Industrial Court issued 12 awards, Nos. 2403 to 2414, which are summarised below.

Award No. 2403 (3rd September).—Parties: The Transport and General Workers' Union and seven road passenger transport undertakings. Claim: That wages paid to, and the conditions of employment of, the persons employed by the road passenger transport undertakings were not in accordance with Section 93(1) of the Road Traffic Act, 1930. Award: The Court found that in order to comply with the provisions of Section 93(1) of the Road Traffic Act, 1930, the rates of wages and conditions of employment of persons employed by each of the undertakings specified in the Schedule in connection with the operation of their public service Schedule in connection with the operation of their public service vehicles should be not less favourable than those of persons vehicles should be not less favourable than those of persons employed in similar capacities in a Group II undertaking in accordance with the agreements and arbitration awards current from time to time, to which the parties are the two sides of the National Council for the Omnibus Industry. The Court found that, in so far as the rates of wages and conditions of employment of the persons employed by the undertakings other than T. France of Llanymynech, Montgomery, specified in the Schedule in connection with the operation of their public service vehicles were on 27th June, 1951, less favourable than those provided for in the above-mentioned agreements and awards they were not in accordabove-mentioned agreements and awards, they were not in accordance with the requirements of Section 93, Sub-Section (1) of the

Road Traffic Act, 1930. The Court awarded accordingly.

Award No. 2404 (9th September).—Parties: Trade Union Side and Official Side of the Miscellaneous Trades Joint Council for Government Industrial Establishments. Claim: Matters arising from Industrial Court Award No. 2388 (see the issue of this GAZETTE for July, page 264) in respect of claim for increase of wages for certain workers employed by the Ministry of Supply. Award: The Court awarded that the wages of the canteen workers concerned in the claim should be increased by 7s. 6d. and 6s. a week for men and women respectively. Effect should be given to this award from the beginning of the first full pay week following 16th June, 1952, the

date of Award No. 2388.

Award No. 2405 (9th September).—Parties: Trade Union Side and Employers' Side of the National Joint Industrial Council for the Paint, Varnish and Lacquer Industry. Claim: For a substantial increase in the Basic National Joint Industrial Council Wage Rate, the same increase to be awarded to both males and females with proportionate increase to juveniles. Award: The Court awarded that Basic National Joint Industrial Council Wage Rates should be increased by 7s. and 5s. for males and females

Rates should be increased by /s. and 5s. for males and females respectively with proportionate increases for juveniles. Effect should be given to this award from the beginning of the first full pay period following the date thereof.

Award No. 2406 (10th September).—Parties: The Musicians' Union and the Theatrical Managers' Association. Claim: To determine a difference regarding the terms and conditions of employment of musicians in theatres and music halls situated outside the West End and suburbs of London whose proprietors outside the West End and suburbs of London whose proprietors are members of the Theatrical Managers' Association. Award: The Court awarded that as from the first full pay week following 17th May, 1952, the existing bonus of £1 a week should be increased by 22s. 6d. a week which should include the Theatrical Managers' Association's offer of 15s. a week. Association's offer of 15s. a week. On the evidence adduced at the Association's offer of 15s. a week. On the evidence adduced at the hearing the Court were unable to make any award in relation to the salaries of musical directors. The Court found against the claim for a single scale to replace the existing four scales embodied in the agreement of 18th February, 1950.

This award shall apply to musicians employed in those theatres in which by agreement between the parties to the present claim the scales contained in Schedule A to the agreement of 18th

February, 1950, now operate and shall further apply to musicians employed in all provincial music-halls of Moss Empires Limited. The Court directed the parties to give consideration in the light of the award to the claims for alterations in the conditions of employment. In the event of failure to reach agreement on these matters within a period of three calendar months from the date of this award either party shall be at liberty to report such failure to the Court and the Court will, after hearing the parties, determine the matters in dispute the matters in dispute.

Award No. 2407 (11th September).—Parties: The National Union of General and Municipal Workers, the Transport and General Workers' Union and the National Service Hostels Corporation, Limited. Claim: For rates of pay of specified grades of labour to be increased by 10s. a week. Award: The Court awarded that the rates of pay of adult non-resident staff in grades of labour named in the list attached to the Terms of Reference should be increased by 5s. a week, the rates for males under the age of 21 and females under the age of 18 should be adjusted proportionately. On the evidence adduced the Court found that the claim in respect of the resident staff had not been established. Effect is to be given to the few the form the beginning of the first full respect to the second of the second of the second of the few the few the second of the first full respect to the few the few the second of the first full respect to the few the second of the few the second of the first full respect to the few the second of the second to this award from the beginning of the first full pay period following the date thereof.

Award No. 2408 (11th September).—Parties: Employees' Side and Employers' Side of the National Joint Council for the Road Passenger Transport Industry (Tramways, Trolleybuses and Motor Omnibuses). Claim: That there should be a substantial increase in the present wage rates to all employees governed by decisions of the above Council. Award: The Court awarded that the rates of the workers covered by the claim should be increased by 7s. a week; effect to be given to the award from the beginning of the first full pay week following the date thereof.

Award No. 2409 (16th September).—Parties: Trade Union Side and Official Side of the Miscellaneous Trades Joint Council for Government Industrial Establishments, *Claim*: That waiters and waitresses employed in Messes of the Air Ministry and War Office be paid a lead rate of 4s. *Award*: The Court awarded that waiters should be paid a lead rate of 2s. The Court found that the claim of waitresses had not been established and awarded

Award No. 2410 (18th September).—Parties: Trade Union Side and Employers' Side of the National Joint Industrial Council for the Electricity Supply Industry. Claim: For 3d. an hour increase to all schedule rates for manual grades. Award: The Court awarded that as from the beginning of the first full pay week following 1st August, 1952, all schedule rates for manual grades in the electricity supply industry should be increased by 2d. an hour

hour.

Award No. 2411 (18th September).—Parties: The Transport and General Workers' Union and the Spitalfields Market Tenants' Association, Limited. Claim: For a pitching payment on all produce at Spitalfields Market. The decision of the Court to be retrospective to 23rd June, 1952. Award: The Court found in favour of the principle of a common payment for pitching on all produce at Spitalfields Market but were, however, of opinion that the terms of the Agreement of 23rd August, 1951, at present applicable to imported produce only, should not be extended to the pitching of home produce. The Court directed the parties to meet for the purpose of negotiating an agreed schedule of pitching charges which should be applicable to all produce at Spitalfields Market. In the event of failure of the parties to reach agreement on this matter within a period of three calendar months from the on this matter within a period of three calendar months from the date of the award either party shall be at liberty to report such failure to the Court and the Court will, after hearing the parties, determine the matter in dispute. The Court awarded accordingly.

Award No. 2412 (25th September).-Parties: Trade Unions' Side and Employers' Side of the National Joint Negotiating Committee (Operating and Ancillary Grades) Road Haulage Executive. Claim: For a substantial increase in wage rates provided for in Appendices B1-10 of a Memorandum of Agreement dated 25th October, 1950, as revised 25th July, 1951, which includes rates of pay for adults and proportionate rates for juniors. Award: The Court awarded that the wage rates provided for in Appendices B1-10 of the Memorandum of Agreement dated 25th October, 1950, as revised 25th July, 1951, should be increased by 8s. a week for adults and the rates for juniors should be increased proportionately; effect to be given to this award from the beginning of the first full pay period following the date of award.

Award No. 2413 (25th September).-Parties: Trade Unions' Side and Employers' Side of the National Joint Negotiating Committee (Maintenance and Repair Grades) Road Haulage Executive. Claim: For an increase of ten per cent, on the rates for adults provided for in Clause 2(a) of a Memorandum of Agreement dated 7th November, 1950, as amended with effect from 8th October, 1951, and for proportionate increases in the rates for juniors provided for in Clause 2(b) of that agreement. Award: The Court awarded that the rates for adults provided for in Clause 2(a) of the Memorandum of Agreement dated 7th November, 1950, as amended with effect from 8th October, 1951, should be increased by 2d, an hour and that the rates for juniors provided for in Clause 2(b) in that agreement should be increased proportionately.

Award No. 2414 (30th September).-Parties: Trade Union Side and Employers' Side of the National Joint Council (Administrative and Clerical Grades) for the Electricity Supply Industry. Claim: That the salaries of employees covered by the Council should be increased by not less than ten per cent. as from 1st March, 1952. Award: The Court awarded (i) that the salaries of male officers in the general Clerical grade shall be on the following scale: Age In the general Clerkar grade shall be on the following scale. Age 16 £160, age 17 £175, age 18 £195, age 19 £215, age 20 £235, age 21 £270, age 22 £290, age 23 £310, age 24 £330, age 25 £350, age 26 £375, thereafter rising on a non-age basis by £20 to £395 by £20 to £415 by £15 to £430 by £20 to £450; (ii) that the salaries of female

officers shall be adjusted on the basis of the proportion which their current salaries bear to the current salaries of comparable officers; (iii) that the salaries of officers in the Higher Clerical, Administrative and Commercial Staff shall be increased £20 per annum; (iv) that effect shall be given to the award from 1st August, 1952.

Single Arbitrators and ad hoc Boards of Arbitration

During September five awards were issued by Single Arbitrators appointed under the Industrial Courts Act, 1919. All the awards related to individual undertakings.

Wages Councils Acts, 1945-1948

Notices of Proposal

During September notices of intention to submit wages regulation proposals to the Minister of Labour and National Service were issued by the following Wages Councils:—

Flax and Hemp Wages Council (Great Britain).—Proposal F.H. (71), dated 9th September, for fixing revised general minimum and guaranteed time rates and piece work basis time rates for male and female workers.

Retail Drapery, Outfitting and Footwear Trades Wages Council (Great Britain).—Proposal R.D.O. (13), dated 12th September, for increasing the amount authorised to be reckined as payment of wages by an employer in lieu of payment in cash where the employer supplies meals and/or lodging to a worker.

Retail Food Trades Wages Council (England and Wales) .-Proposal R.F.C. (12), dated 12th September, for increasing the amount authorised to be reckoned as payment of wages by an employer in lieu of payment in cash where the employer supplies meals and/or lodging to a worker.

Tin Box Wages Council (Great Britain).-Proposal X. (41), dated 19th September, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

Retail Furnishing and Allied Trades Wages Council (Great Britain).—Proposal R.F.A. (13), dated 19th September, for increasing the amount authorised to be reckoned as payment of wages by an employer in lieu of payment in cash where the employer supplies meals and/or lodging to a worker.

Further information concerning any of the above proposals may be obtained from the Secretary of the Council in question, at Ebury Bridge House, Ebury Bridge Road, London, S.W.1.

Wages Regulation Orders

During September the Minister of Labour and National Service made the following Wages Regulation Orders*, giving effect to the proposals submitted to him by the Wages Councils concerned:—

The Fur Wages Council (Great Britain) Wages Regulation Order, 1952: S.I. 1952 No. 1615 (Z. (59)), dated 2nd September and effective from 22nd September. This Order prescribes revised general minimum, guaranteed and piece work basis time rates for male and female workers, and revised general minimum piece rates for hand or machine fleshing.—See page 361.

The Boot and Shoe Repairing Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1952: S.I. 1952 No. 1620 (D. (105)), dated 3rd September and effective from 22nd September. This Order prescribes revised general minimum and guaranteed time rates for male and female workers.—See page 362.

The Laundry Wages Council (Great Britain) Wages Regulation Order, 1952: S.I. 1952 No. 1621 (W. (69)), dated 3rd September and effective from 22nd September. This Order prescribes revised general minimum time rates and piece work basis time rates for male and female workers.—See page 366.

The Retail Newsagency, Tobacco and Confectionery Trades Wages Council (Scotland) Wages Regulation Order, 1952: S.I. 1952 No. 1625 (R.N.T.S.(10)), dated 4th September and effective from 26th September. This Order prescribes revised statutory minimum remuneration for male and female workers and amends the provisions relating to holidays and holiday remuneration.—See

The Retail Newsagency, Tobacco and Confectionery Trades Wages Council (England and Wales) Wages Regulation (Amendment) Order, 1952: S.I. 1952 No. 1626 (R.N.T. (12)), dated 4th September and effective from 26th September. This Order prescribes revised statutory minimum remuneration for male and female workers and amends the provisions relating to holidays and holiday remuneration.

The Retail Food Trades Wages Council (Scotland) Wages Regulation (Amendment) Order, 1952: S.I. 1952 No. 1627 (R.F.C.S. (11)), dated 4th September and effective from 26th September. This Order prescribes revised statutory minimum remuneration for male and female workers.—See page 364.

The Retail Furnishing and Allied Trades Wages Council (Great Britain) Wages Regulation Order, 1952: S.I. 1952 No. 1635 (R.F.A. (12)), dated 5th September and effective from 26th September. This Order prescribes revised statutory minimum remuneration for male and female workers and amends the provisions relating to holidays and holiday remuneration.—See

The Sugar Confectionery and Food Preserving Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1952:

^{*} See footnote * in second column on page 374.

S.I. 1952 No. 1636 (F. (57)), dated 5th September and effective from 24th September. This Order prescribes revised general minimum time rates and piece work basis time rates for male and female workers.—See page 362.

The General Waste Materials Reclamation Wages Council (Great Britain) Wages Regulation (Amendment) Order, 1952: S.I. 1952
No. 1674 (D.B. (44)), dated 12th September and effective from 1st October. This Order prescribes revised general minimum time rates for male and female workers and piece work basis time rates for female workers and also for reduction of the normal working week from 48 to 46 hours.

The Toy Manufacturing Wages Council (Great Britain) Wages Regulation Order, 1952: S.I. 1952 No. 1685 (Y. (49)), dated 15th September and effective from 3rd October. This Order prescribes revised general minimum time rates for male and female

The Linen and Cotton Handkerchief and Household Goods and Linen Piece Goods Wages Council (Great Britain) Wages Regulation (Holidays) Order, 1952: S.I. 1952 No. 1686 (H.L. (40)), dated 15th September and effective from 1st October. This Order prescribes the annual holidays to be allowed and fixes payment for

The Retail Bespoke Tailoring Wages Council (Scotland) Wages Regulation (Amendment) Order, 1952: S.I. 1952 No. 1738 (R.B.S. (37)), dated 25th September and effective from 13th October. This Order prescribes revised general minimum time rates and piece work basis time rates for male and female workers.

Wages Councils Act (Northern Ireland), 1945

Notices of Proposal

During September notice of intention to submit wages regulation proposals to the Ministry of Labour and National Insurance was

Baking Wages Council (Northern Ireland).—Proposals N.I.Bk. (N.160) and N.I.Bk. (N.161), dated 26th September, relating to the fixing of revised general minimum time rates for certain male workers and to the variation in Area A of a condition of apprentice-

Further information concerning the above proposals may be obtained from the Secretary of the Council concerned, at Tyrone House, Ormeau Avenue, Belfast.

Wages Regulation Orders

During September the Ministry of Labour and National Insurance made the following Wages Regulation Orders* giving effect to the proposals made by the Wages Councils concerned:—

The General Waste Materials Reclamation Wages Council

(Northern Ireland) Wages Regulation (No. 2) Order, 1952 (N.I.W.R. (45)), dated 16th September and effective from 25th September. This Order prescribes increases in general minimum time rates and the piece work basis time rate for male workers.—See page 366.

The Boot and Shoe Repairing Wages Council (Northern Ireland) Wages Regulation (Amendment) Order, 1952 (N.I.B.S. (69)), dated 18th September and effective from 30th September. This Order prescribes increases in general minimum time rates for male and female workers.—See page 362.

The Baking Wages Council (Northern Ireland) Wages Regulation (Amendment) (No. 3) Order, 1952 (N.I.Bk. (158)), and The Baking Wages Council (Northern Ireland) Wages Regulation (Amendment) (No. 4) Order, 1952 (N.I.Bk. (159)), dated 18th September and effective from 29th September. These Orders prescribe increases in general minimum time rates for female workers.—See page 362.

The Laundry Wages Council (Northern Ireland) Wages Regulation Order, 1952 (N.I.L. (46)), dated 25th September and effective from 8th October. This Order prescribes increases in general minimum time rates for male and female workers and the piece work basis time rate for female workers.

The Sugar Confectionery and Food Preserving Wages Council (Northern Ireland) Wages Regulation Order, 1952 (N.I.F. (41)), dated 25th September and effective from 8th October. This Order prescribes increases in general minimum time rates and piece work basis time rates for male and female workers.

Catering Wages Act, 1943

Notice of Proposal

During September notice of intention to submit to the Minister of Labour and National Service a wages regulation proposal was issued by the following Wages Board:—

Licensed Non-residential Establishment Wages Board.— Proposal L.N.R. (29), dated 26th September, for amending the provisions relating to guaranteed weekly remuneration.

Wages Regulation Orders

During September the Minister of Labour and National Service made the following Wages Regulation Orders* giving effect to the proposals submitted to him by the Wages Boards concerned:—

The Wages Regulation (Licensed Non-residential Establishment) Order, 1952: S.I. 1952 No. 1634 (L.N.R. (28)), dated 5th September and effective from 5th October. This Order prescribes revised statutory minimum remuneration for certain male and female

The Wages Regulation (Industrial and Staff Canteen Undertakings) Order, 1952: S.I. 1952 No. 1733 (I.S.C. (21)), dated 23rd September and effective from 15th October. This Order prescribes revised statutory minimum remuneration for male and female workers and amends the provisions relating to holidays and holiday remunera-

Decisions of the Commissioner under the National Insurance Acts

The Commissioner is a judicial authority independent of the Ministry of National Insurance and appointed by the Crown (see Section 43 of the National Insurance Act, 1946, and Section 42 of the National Insurance (Industrial Injuries) Act, 1946). His decisions†, which are final, are binding on Insurance Officers and Local Tribunals and must be followed in appropriate cases. They are thus the "case law" which is the principal means of maintaining

Appeals to the Commissioner under the National Insurance Acts may be made by an Insurance Officer, or by an association of which the claimant is a member, or by the claimant himself with the leave of the Tribunal or the Commissioner, or without such leave if the decision of the Tribunal was not unanimous

Appeals to the Commissioner under the Industrial Injuries Acts may be made by an Insurance Officer, or by a person whose right to benefit is or may be, under the Fourth Schedule to the 1946 Act, affected by the decision, or by an association of which the claimant or the deceased was a member, or by the claimant himself. No appeal may be made without the leave of the Tribunal or of the

Recent decisions of general interest are set out below.

Decision No. R(U) 25/52 (16th June)

A director and manager of an insolvent company resigned when the shares were acquired by another company and he was told that he would lose his directorship and could only continue in the company's employment on less favourable terms. Held that he had just cause for voluntarily leaving his employment.

Decision of the Commissioner

"My decision is that the claim for unemployment benefit is

"The claimant was a director and manager of a limited liability company from March, 1950, to 10th January, 1952, when he

* See footnote * in second column on page 374.

* See footnote * in second column on page 374.

† Leading decisions of the Commissioner are published periodically in the following series:—Series "R(U)"—decisions on unemployment benefit; Series "R(P)"—decisions on retirement pensions; Series "R(S)"—decisions on sickness benefit; Series "R(G)"—decisions on guardian's allowance, maternity benefit, death grant and widow's benefit; Series "R(I)"—decisions on all benefits and on any other questions arising under the Industrial Injuries Acts. An Index to Commissioner's Decisions, which is kept up to date by amendments published at monthly intervals, is also available. Applications and enquiries should be addressed to H.M. Stationery Office at any of the addresses shown in the second column on page 374.

resigned from his service with the company and being then unemployed made a claim for unemployment benefit. The claim was disallowed by the local insurance officer who disqualified the claimant for benefit for six weeks on the ground that he had voluntarily left his employment without just cause. The claimant appealed from that decision to the local tribunal, who upheld the insurance officer's decision and dismissed the claimant's appeal. The claimant now appeals to the Commissioner. Hence this

The facts show that the company was in financial difficulties, and that, being pressed for ready money to carry on its business, the idea was conceived of selling the company's shares to another limited company, in order that that company might finance the working of the company with which the claimant was employed. During the negotiations in this respect, however, it was disclosed that the prospective purchaser of the shares, of which the claimant held ten, was not prepared to allow the claimant to remain on the board of directors or to continue to employ him on the terms of the board of directors or to continue to employ him on the terms of the agreement under which he was then serving the company as manager. Thus the claimant would at the most have had security of tenure for one year from 13th March, 1952, and, in any event, would have lost his status as director of the company with all the advantages attaching to that position. In effect, had he continued to be employed by the company his future would have been based on a very insecure foundation. He would have been expected to undertake a great deal of responsibility without having any say in the government of the company.

"At his age—he is fifty-two—he could not hope to secure suitable alternative employment, unless he was free to interview prospective employers, and this he could not very well expect to be able to do whilst he was engaged on the company's business. In the circumstances, I think that he acted wisely in leaving his employment when he did. The company was insolvent, new directors were to be made, and he could not reasonably look forward to any preferent in the future. His prospects seemed to him dim in the extreme ment in the future. His prospects seemed to him dim in the extreme. I think that he had good reason for his views. Virtually, the purchaser of the shares was bringing the employment of the claimant to an end and offering him the crumbs of what had been a livelihood for him. Viewed in this light, the claimant did not neglect to avail himself of a reasonable opportunity of suitable employment, because the new employment would have been on

* See footnote * in second column on page 374.

conditions less favourable than those which he might reasonably have expected to obtain having regard to those conditions which he had up to then obtained or would have obtained had he continued to be employed on the same conditions under which he had previously been employed. For the reasons stated, the claimant does not incur disqualification for benefit under section 13 of the National Insurance Act, 1946, and his appeal is therefore allowed."

Decision No. R(U) 28/52 (3rd September)

A civil servant who had been suspended without pay pending investigation of alleged irregularities was later dismissed from the date of suspension, with no arrears of pay. Held that he was unemployed during the period of suspension. If an employer "stands off" a man with neither work nor pay (apart from recognised holidays) he is unemployed notwithstanding that the contract of service has not been

Decision of the Commissioner

"My decision is that the claimant was unemployed from 11th to 22nd February, 1952, inclusive.

"The claimant is contending that he was entitled to unemployment benefit only in respect of the period commencing on 11th February, 1952, when he first registered for employment and claimed unemployment benefit and ending on 22nd February following, when he ceased to sign the register. It has been contended that the claimant was not unemployed during the period from 11th February to 14th March, 1952, because he was in employment as a general post office telephonist and his contract of service was not terminated until 14th March, 1952, on which date the manager of his area wrote to the claimant informing him that he had been dismissed as from 18th January, 1952, as unsuitable for further employment in the post office. employment in the post office.

"The question to be determined in this the appeal of the claimant is whether he was unemployed during the period 11th to 22nd February, 1952, inclusive. I hold that he was unemployed during that period for the following reasons. The claimant was indefithat period for the following reasons. The claimant was indefinitely suspended without pay from his employment as a telephonist on 18th January, 1952, pending investigation by his employer of alleged irregularities committed by the claimant in the course of his employment. Whether he would be reinstated in his employment depended upon the claimant giving an explanation satisfactory to the employer. The claimant was informed in the abovementioned letter of 14th March that his explanation of the alleged irregularities was not considered satisfactory and that it had been decided to dismiss him as from 18th January, 1952. It appears from the terms of this letter that the irregularities alleged might have amounted to misconduct within the meaning of section 13(2) (a) of the National Insurance Act, 1946, but this question could not be decided without further investigation and in the circumstances of this case I do not think it would be right to consider whether the case falls within section 13(2) (a). consider whether the case falls within section 13(2) (a).

"As was stated in Decision C.U.56/52 (not reported) it has been As was stated in Decision C.U.56/52 (not reported) it has been held under the Unemployment Insurance Acts and under the National Insurance Act, 1946, that if an employer is entitled to stand a man off with neither work nor pay, apart from recognised holidays, such person is unemployed for a period of suspension of service, notwithstanding that the contract of service has not been terminated. Miners (and people in various other employments) can be stood off from their employment and, if they neither have opportunity for work nor receive pay in respect of the day in opportunity for work nor receive pay in respect of the day in question, they are regarded as unemployed for the purposes of unemployment benefit, even though they have attended at the place of employment to see if there was any work. In many cases in which a person is suspended without work or pay, and without attending the place of employment, it has not been argued that such a person is otherwise than unemployed, notwithstanding that he may have had no final discharge. It is obvious from the wording of regulation 6(2) of the National Insurance (Unemployment and Sickness Benefit) Regulations, 1948 [S.I. 1948 No. 1277] that it is contemplated that a person may be treated as unemployed although suspended without having been finally discharged.

"In this case the claimant was notified of his discharge on 14th March, 1952. The principles of Decision C.U.56/52 which I have repeated because that decision has not been repeated are I have repeated because that decision has not been reported are equally applicable to this case and, on the facts before me, I hold that the claimant was unemployed during the period from 11th to 22nd February, 1952, when he was claiming unemployment benefit. It is not suggested that if the claimant's explanation had been satisfactory he would have been entitled under his contract of service to be paid arrears of wages in respect of the period of suspension. In this case therefore I need not consider whether if his contract had included such a provision it would follow that he was not unemployed during the period of suspension. To the extent shown in paragraph one of my decision the appeal of the claimant is allowed."

STATUTORY INSTRUMENTS

Since last month's issue of this GAZETTE was prepared, the undermentioned Statutory Instruments,* relating to matters with which the Ministry of Labour and National Service are concerned, either directly or indirectly, have been published in the series of Statutory Instruments. The list also includes certain regulations, etc., published in the series of Statutory Rules and Orders of Northern Ireland, additional to those contained in the lists appearing in previous issues of the GAZETTE. The price of each Instrument, etc., unless otherwise indicated, is 2d. net (3½d. post free).

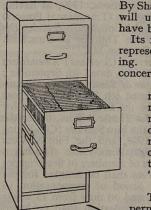

The General Waste Materials Reclamation Wages Council (Great Britain) (Constitution) Order, 1952 (S.I. 1952 No. 1693), made on

* See footnote * in second column on page 374.

Features:

FULL-WIDTH ANGLED TAB • COLOUR-CODED ACCURACY . SELF-ADJUSTING CAPACITY DUAL-PURPOSE LINKING • READY-PRINTED PROGRESSING . SLIDING SIGNALS.

The DUAL PURPOSE filing system

Here is a completely new filing system. By Shannon. When you investigate it you will undoubtedly say: "Just what we have been looking for."

Its name is Shannolink. The "Link"

Its name is Shannolink. The "Link" represents a revolutionary feature in filing. It gives you individual filing and concertina filing—at your option.

Note the top of the file. It goes right across. That means more room for fuller data . . . room for name, telephone number, individuals, addresses, colour-coded to make misfiling impossible. Your make misfiling impossible. Your clerk simply cannot put an "A" in the "B's"—or, for that matter, an "Aa" in the "Ab's."

Note the numerals on the right.
These do a number of jobs. They
permit colour-signalling the day and
month of any file that needs forward action. They permit progressing . . . of running contracts, factory production,

order sequences, component deliveries.

Each file is self-adjusting to any reasonable bulk. Each file is suspended metal on metal. Each hangs neatly and freely—no contact with the cabinet drawer base. And this new wonder file can be fitted into your existing cabinets.

Make a point of checking this NEW FORCE in FILING now. See below.

SHANNOLINK Another (Shannon Systems) Product

There is a great deal to tell you about Shannolink—things which every business executive in search of higher efficiency will want to know. To get a free copy of the booklet, "The New Vision," on the subject, just write "Shannolink" on your letterheading and full details will be sent you by return. Address: The Shannon Limited, 371, Shannon Corner, New Malden, Surrey.
