## BOARD OF TRADE

THE REPORT ON THE CENSUS OF PRODUCTION FOR 1958

Part 64
MOTOR CYCLE, THREE-WHEEL VEHICLE AND PEDAL CYCLE MANUFACTURING

Presented by the Board of Trade to Parliament in pursuance of the
Statistics of Trade Act, 1947 ( 10 \& || Geo. 6 Ch.39, Sec.7)

LONDON : HER MAJESTY'S STATIONERY OFFICE<br>1960

These notes give only the main information which is needed for interpreting the census figures.
$r$ explanations are given in a separate booklet of Introductory Notes (Part 1 of of the Report on the Fuller explanations are given
Census of Production for 1958). Changes in the 1958 Census

Some changes were introduced in the 1958 ensus,
and 1958 figures.
Returns in full detail were required only firms employing 25 or more persons, instead of,
as previously, from firms employing 11 or more aersons.
The
any cases rather wider then for 1954 . In both ears the census was based on the estabi ishment,
 ar address (e. g. a factory or mine), but of fices,
rehouses, laboratories, etc. at addresses separat warehouses, 1aboratories, etc. at addresses separate
from the works were treated as part of the establ.
ishment. For 1958, but not for 1954, fi firms were shment. For 1958, but not for 1954, firms were
asked to include al so, in all sections of their asked to include also, in aling sections of their factoring, canteens operated by them, and other
ancillary activities, such as bottling, packing, and
the manufacture of containers for packing their own ancilirary activities, such as bottling, packing, and
the manuacture of containers for packing their own
products, whether or not these activities were products, whe ther or not these activities were
carried on at. the same address as the works, unles

APITAL EXPENDITURE
The expenditure on new building work shown
excludes the cost of 1 and and existing buil dings ew and second-hand items are included. The valu s that charged to capital account during the year,
nclualing any transport and installation cost nvolved. Capital expendi ture in respect of estab-
ishments in Great Britain where production had not ishments in Great Britain where production had not
started before the end of the year is included in

CHARACTERISTIC PRODUCTS (See the description of the
nethod of classification before List of Tables) EMPLoymen
(i) Working proprietors
mployed' for National Insurance purposes self members of their families who worked in the busines ithout receiving fixed wages or salaries; but
ersons working less than half the normal hours are
$\qquad$
Employees are classified under the two main headings of (a) administrative, technical and
clerical employees and (b) operatives. The figures
celate to persons on the pay-roll (i.e. whos.
 ational Insurance cards were held by employers, igures for 1958 include, but those for 195 xclude, persons engaged in merchanting or factor
and canteen workers. dministrative
loyees include managers, superintendents, and works echnical and design employees (other than opera ivess); draughtsmen and tracers; travellers; and include all other class loyes, that is, broadly speaking, all manual wag
They include those employed in mnd he factory or works; operatives employed in powe houses, transport wrik, stores, warehouses and, fo
1958, canteens; inspectors, viewers and simila orkers; maintenance workers; and cleaners
peratives engaged in outside work of erection, itting etc. are also included, but outworkers ( $i$.e.
ersons
they were conducted by a separate company, or by a building and engineering maintenance departments were treated similarly. Selling and transport
departments were treated in this way and 1958. While the effect of including these
further further ancillary activities was generglily to
produce higher figures for employment etc. produce higher figures for employment et., ethe
reporting of separate fi gures for merchanted goods
led to the exclusion of led to the exchusion of some firms who proved to be
merchants with only minor productive activities. cherchants with only minor productive activities.
Chande for 198 in the instructions governing the making of returns for two or more
establishments operated by the same fi fm permitted combined returns to be made more freely than in
combevious censuses. Combined returns were accepted
pren previous censuses. Combined returns were accepted
covering establi shments in the same census industry,
and situs in covering estabishments in the same cessus industry,
and situated in the same country (i.e. England,
Scotland or Wales). The 1954 figures have been re-tabulated to
espond as closely as possible to those for 1958 , correspond as clo sely as possible to those for 1958,
but because of the chanes described above the
currespondence is
census reports
supplied by the firm in thed
excluded.
(iii) Total enployment
This is the sum of the average number of em ployees and the number of average number of em
outworkers are excluded proprietors Enterphise
mean one term enterprise is used in this report to mean one or more firms under conmon ownership or
control as defined in the Companies Act, 1948 . An
enterprise normally enterprise normally consists either of a single
firmor of a holding company together with its
subsidiary companies. subsidiary companies.
entaies
The number of entries shown in Tables 4, 5 and
7 is the number of return on which figures against 7 is the number of returns on which ingures against
a particular output or production heading were
recorded. The number of entries is less than the corresponding number of establi shments to the extent that combined returns were made cov
one of the establ ishments concerned.

Establishment
In most cases an establi shment comprises the whole of the premises under the same ownership or
menagement at $a$ particular address (e.g. a factory or mine). Off pars, warehouses, 1 aboratories and
other ancillary places of busines at a separate other ancillary places of business at a separate
address from the works were treated as part of the
establi shment.

INTE RMEDIATE PRODUCTS
For some industries figures are given showing
the total quantities made during the year of importthe total quantities made during the year of import-
ant intermediate products, i.e. products which may be further processed in the establishments in whi ch sometimes pold. They include also they are also
from materials supplied by other fi mons. materials and
The totals shown include the cost of all pur-
chases chases of materials and components for use in
production, and of fuel (including
electricity) for electricity) for all purposes including heasting 1 ighting and transport (where carried out hy firms, lighting and transport (where caried out by firms
own staff included in the return); all packing
naterials, including the full cost of returnable materials; office materials; water charges; materials for repairs to firms' own buildings, plant
and vehi cles when cartied out by their own workeople included in the return; consumable tools;
nd parts for machinery purchased during the year as
eeplacements. Purchases of goods for merchanting or

 stomers for processing are excluded for both years
The values shown include any duty paid less rebate, etc.) but exclude trade di socounts allowed.
The cost of transport was included only if included to transport organisations, including firms, pown
eparate transport organisations, for delivery of separate transport organisations, for delinery of
materials and fuel are therefore excluded. Mater1als purchased overseas were entered at their c.i. f.
cost plus any duty if the cost of transport from the cost plus any duty if the cost of transport from the
docks was not included in the invoiced price, and at
their full delivered cost if invoiced carriage paid net output The net output of an industry represents the duction and includes for 1998 the process of pro-
nargin on
net merchanted or factored goods sold; it conany merchanted or factored goods sold, it con-
stitutes the fund fram which wages, salaries, rents,
rates and taxes advertising and other selling ates and taxes, advertising and other, selliling
expenses, and ali other similar charges have to be expenses, and all other similiar charges have to be
met, as well as depreciation and profits. There is
no appreciable duplication in net output. no appreciable dupli cation in net output.
Net output was noomally obtained by tak ing the
total value of sales and work done (including, for total value of sal es and work done (including, for
1958, the value of merchanted goods sold and canteen
takings); adding the value of stocks at the end of the year and deducting their value at the beginning fthe year; and deducting al so the cost of of
materials and fuel purchased (including, for 1958 ,
he value of goods purchased for merchanting and the value of goods purchased for merchanting and
canteen supplies), payments for work given out to
other fi firms, and payments for transport. The net other firs, and payments for transport. The net
amount of duty paid was deducted, and the net amount
of subsidy received added.
NET OUTPUT PER PERSON EMPLOYED
The figures for net output per person employed
are derived by dividing net output by total employ-
ment (see above).
PRINCIPAL PRODUCTS (See the description of the
method of classification before List of Tables)
sales
Sales include goods made by the business
covered by the return, those made for it by outcovered by the return, those made for it by out-
workers or by other firms from materials given out
to them (sometimes described as goods made to them (sometimes described as goods made on
comission, and waste protucts sold. Any machinery
or other capital items produced. or other capital it tems produced for use in thery the
business covered by the return are also included
 Seing subjected to any purposes. Goods sold without
chanted or factored) and canteen taking process (merchanted or factored) and canteen takings are in-
cluded for 1958 but not for 1954 , where the total
sales of merchanted or factored goods were 1 ess than
s5 sales of merchanted or factored goods were less than
s. 0 , 00 , firms were permitted to innclude them with th he figures for sales of goods of their own pro-
huction. The value shown for sales is the net selling

materials
duplication.
STOCKS and work in progress
The values shown are the income tax values of stocks of products on hand for sale, and of
materials and fuel, at the beginning and end of
the the year of return. For 1958 , but not for 1954 ,
they include any stocks of goods held for mer-
chanting or factoring. The value of progress at the two dates is also usually shown. This excludes any progress payments made to sub.
contractors, and no deduction is made on account of progress payments received.
thansport payments
These represent the total amount paid or
credited during the year for both outwards transport credi ted during the year for both outwards transport
of fini shed goods sold and inwards transport of materials and fuel porchased. They include payments
to other firms, and to any separate transport to other firms, and to any separate transpor
organisation of the same firm, not covered by the return, but exclude the value of transport servi ces
provided by the business covered by the return. The
tems included are payments for hired cartage and provided by the business covered by the return. The
items included are payments for hired cartage and
for inwards and outwards carriage by all forms of for inwards and outwards carriage by all forms of
inland transport, that is railways, road haulage inland transport, that is railways, road haulage
canals, coast-wise shipping, air, etc. Payment
made for sea freight on toods sold to customer made for sea freight on goons sold to customers
overseas and on materials and fuel purchased from
overseas suppliers are excluded. overseas and on materials and
overseas suppliers are excluded.
wages and salaries
These are the amounts paid during the year to
operatives and to administrative, technical clerical employees. Payments to working procerical employees. Payments to working pro-
prietors, whether called salaries or not, are
excluded. The values shown include all overtime excluded. The values shown include al overtime
paments, bonuses and commsions, whether paid
regularly or not and no deductios. payments, bonuse, and commissions, whether paid
regularly or not, and no deduction is made for in
come tax, insurancs, contributor come tax, insurances, contributory pensions, etc.
The value of any payments in kind, travelining expenses, odging allowances, etc. is excluded.
Figures are also shown for aver Figures are also shown for average salaries
paid per head for the week ended 25th october,
958. For staff paid monthy, the figures are 1958. For staff paid monthly, the figures are
based on payments made in Otober, 1958 . Where payments related to periods other than a week or only those bonuses and commissions actually paid in
work given out
The figure
The figures shown represent the total amount
paid for work done by other firms
supplied supplied to them, and also by firms' own establish-
nents for do not include separate returns were made. They payments for business and other services.

## Rounding of figures

The figures in the tables have, where necessary, therefore, be apparent siight discrepancies betwen
the sums of the constituent items and the totals
shewn

The Report on the Census of Production for 1958
Part 64
MOTOR CYCLE, THREE-WHEEL VEHICLE AND PEDAL CYCLE MANUFACTURING

This report on the Motor Cycle. Three-wheel Vehicle and Pedal Cycle Manufacturing Industry elates to establishments engaged in the manufacture of motor cycles, three-whee 1 vehicles (except and accessories for such vehicles including chassis, frames, bodies, engines, carburettors, axles and accessories for such vehicles including chassis, frames, bodies, engines, carburettors, axles,
brakes and clutches (other than linings), gear boxes, wheels, windscreen wipers (not electrical) and other non-electrical parts and accessories except instruments, gaskets and jointings. The ndustry corresponds to minimum list heading 382 of the second (1958) edition of the Standard ndustrial Cqassification, which has been used for the first time in the 1958 Census.

This industry formed part of Industry 31 in the reports on the last detailed Census of
Inder Industry 3 I , now corresponds to minimum list heading 381 and is the subject of a separate report. art 63. for 1958. Electrical accessories and other electrical equipment form part of minimum ist heading 369 and are included in the report on the Miscellaneous Electrical Goods Industry Part 61); instruments, gaskets and jointings form part of minimum list heading 349 and are For 1958, returns in full detail were required only from firms employing twenty-five or more persons and most of the tables in this report relate only to these larger firms. This is an
important change from previous censuses when returns in full detail were required from firms important change from previous censuses when returns in full detail were required from firms mploying eleven or more persons on productive
The figures given for 1954 correspond as closely as possible to those collected for 1958 but the correspondence is not exact, especially in respect of the small firms who gave only limited information. Some other changes introduced in the 1958 Census also offect the comparability There were no establishments in this industry in Northern Ireland in 1954 or in 1958.

## METHOD OF CLASSIFICATION

This industry is defined in terms of its 'principal products' which are those shown in Table 4. A census return was classified to this industry if the sales of the principal products of this industry accounted for a greater proportion of its output than the principal products of
any other industry. Where, however, the application of this rule would have resulted in a change of classification between 1954 (on the revised basis) and 1958, the return was classified to the same industry as for 1954 unless the output of principal products in the new industry was one third more than in old: this modification of the general rule was designed to avoid dismerchanted products and takings were not taken into account in classifying returns. A slightly different procedure was followed in classifying to the sub-divisions of the industry shown in Table 2, the sub-divisions being defined in terms of their 'characteristic products is number shown against each item in Table 4 identifies the sub-division of which the
division only if more than 50 per cent. of census return was classified to a particular submerchanted goods and canteen takings) consisted of characteristic products of the sub-divisions. If the value of characteristic products in no case exceeded 50 per cent, of the total, the return was classified to remainder of industry. The total value of sales of characteristic products
shown in Table 2 includes, besides the products which define the sub-divisions output assumed to be closely related to them, e.g. waste products and non-specific work done but such items were not generally taken into account in determining the classification to subdivisions.
