# Thirty-Fourth Session of the International Labour Conference

THE Thirty-Fourth Session of the International Labour Conference was held in Geneva from 6th to 29th June, 1951. His Majesty's Government was represented by Sir Guildhaume Myrddin-Evans, K.C.M.G., C.B., Deputy Secretary, Ministry of Labour and National Service, and United Kingdom Government representative on the Govern-ing Body of the International Labour Office, and Mr. C. G. Dennys, C.B., M.C., Under-Secretary, Ministry of National Insurance. Sir John Forbes Watson, K.C.M.G., Director of the British Employers' Confederation and Vice-Chairman of the Governing Body of the International Labour Office, was appointed to represent the United Kingdom employers, and Mr. Alfred Roberts, C.B.E., Chairman of the General Council of the Trades Union Congress, General Secretary of Council of the Trades Union Congress, General Secretary of the Amalgamated Association of Card, Blowing and Ring Room Operatives and Member of the Governing Body of the International Labour Office, was appointed to represent the United Kingdom workers.

The Conference elected as its President Mr. William Rappard, Swiss Government Delegate, Professor of Economics and Director of the Institute of Higher International Studies, Geneva.

Delegations from 60 member countries attended the Conference, which adopted two Conventions and four Recommendations.

#### Membership of the Organisation

The Conference had before it applications for membership of the Organisation from the Federal Republic of Germany and from Japan. The Conference decided to accept both these applications. In the case of Japan the Conference was informed that before the Government of Japan the Connerence was informed that before the Government of Japan could make the necessary formal declaration accepting the obligations of the Constitution of the Organisation the approval of the Diet would be required; the Conference therefore decided that the re-admission of Japan to membership of the Organisa-tion would be accepting when a declaration the approval tion would become effective when a declaration accepting the obligations of the Constitution and accepting the terms of the Conference resolution granting re-admission had been made by the Government of Japan. The Conference was also informed that Yugoslavia had resumed membership of

the Organisation with effect from 23rd May, 1951. No decision by the Conference was necessary in this case since Yugoslavia was entitled by virtue of her membership of the United Nations to resume membership of the Organisation upon making a declaration formally accepting the obligations of its Constitution

The number of States who are members of the Organisation is now 64, and will be 65 when the re-admission of Japan becomes effective.

#### **Report of the Director-General**

The Director-General's Report, continuing the practice begun by the Director-General in 1950 of concentrating

begun by the Director-General in 1950 of concentrating attention upon a special subject, this year paid particular attention to the question of wages policy in conditions of full employment. The Report received a very full discussion in which 109 speakers took part. The Minister of Labour and National Service, the Rt. Hon. Alfred Robens, M.P., attended the Conference and spoke on 21st June during the debate on the Director-General's Report. Referring to the Report, Mr. Robens said that the subject of wages policy in conditions of full employment, chosen for special attention in the Report, was one of the fundamental economic problems of the modern world. While each country must solve this problem in its own way in the light of its own historical development and its own traditions he thought that the experience of the United Kingdom was of some value in showing how the danger of inflation in a society in which full employment had been Kingdom was of some value in showing how the danger of inflation in a society in which full employment had been secured had been met. In the United Kingdom, Mr. Robens went on, the Government had adopted financial policies designed to secure a proper balance between domestic pur-chasing power and the available supply of goods. While these measures had done much to prevent the development of inflationary pressure the dangers of wage inflation still remained and the policy of the Government had been directed towards the stabilisation of incomes and prices. Mr. Robens towards the stabilisation of incomes and prices. Mr. Robens pointed out that no direct wages control had been established but that the Government had relied, and successfully relied, on the sense of responsibility of the employers' and workers' leaders in industry. The response of the trade unions and the

employers to the 1948 Command Paper on Personal Incomes, Costs and Prices (referred to in the Director-General's Report) had been remarkable and for a period of 18 months from April, 1949, there had been almost complete stability of wages. So far as prices were concerned, the Government had been able to keep these steady partly by price control and partly by subsidies ; these measures taken together had prevented a runaway rise in the price of necessities. Since the summer of 1950, however, the situation had changed again ; following world-wide rises in the prices of food and raw materials wage claims had again been pressed and there had been a round of increases affecting more or less the there had been a round of increases affecting more or less the whole of industry. The Director-General's Report recognised that wage increases which did not exceed improvements in productivity were not inflationary in their effect. Industrial production in the United Kingdom rose 40 per cent. between 1946 and 1950 and there had been an average annual improvement of seven per cent. over the past three years. However, the country was now, again, facing a potentially inflationary situation but the Government was confident that, provided that sufficient raw materials could be obtained and that the workers retained their confidence in the continuance of full employment the necessary confidence in the continuance of full employment, the necessary increase in productivity would be achieved and the danger of inflation would be avoided.

Mr. Robens also referred to the keen interest which the Conference always took in the question of conditions in non-metropolitan territories. As the Director-General had pointed out, the basic problems in most of the British territories were those arising from under-developed economies. Many important development schemes were now in operation in British territories, particularly in the agricultural field. These might bring substantial and rapid changes in the pattern of life, and the Government recognised that in the se of development it was of the first importance that sound ties in the field of labour should be progressively established. policies in the field of labour should be progressively established. Mr. Robens referred in particular to the attention given to the problems of technical training and productivity, to legislation on minimum wage-fixing machinery and workmen's compensation and to the encouragement being given to the development of employers' and workers' organisations and of effective systems of industrial relations.

Concluding his speech, Mr. Robens pledged the full support of Concluding his speech, Mr. Robens pledged the full support of the United Kingdom Government to the work of the Organisation. He spoke of the increasing scope for international action afforded by problems in the labour and social field. These problems, he said, could not be efficiently solved by unco-ordinated and wasteful competition in the international field. He therefore appealed for a properly co-ordinated effort, within which each organisation would retain full discretion in regard to the framing of its programme and the priorities falling within the programme the priorities falling within the programme.

The Conference approved a net expenditure budget of 6,224,922 United States dollars for 1952. The Conference also approved a scale of contributions for the States Members under which the United Kingdom will pay 818,468 dollars as compared with 804,120 dollars for 1951.

### Social Security

The Conference had to deal with the question of "Objectives and Minimum Standards of Social Security". As there was not time to discuss both subjects comprising this item, the Conference discussed only the question of minimum standards, and it was decided to postpone consideration of the subject of "Objectives and Advanced Standards of Social Security" until the 35th Session of the Conference in 1052 of the Conference in 1952.

The Conference adopted conclusions concerning minimum standards of social security on which a Convention could be based, and it was decided that these should be the basis of a second dis-cussion to be held at the 35th session. The proposed Convention would be on the following lines :---

The main branches of social security (nine in number) would be listed, and the requirements to be satisfied in respect of each of these branches would be specified. These requirements include provisions dealing with :--

(1) The scope of the schemes (persons protected) :

- (2) Conditions for right to the benefits; and
   (3) Content and rate of the benefits, and their duration. In addition, there would be standards common to all branches in respect of rights of appeal, financial resources and administration. The Convention could be satisfied either by contributory social The convention could be satisfied either by contributory social insurance schemes or (subject to certain safeguards) by schemes of the social assistance type or (for medical care) either by a public health service or by a medical benefits insurance scheme. The schemes should cover either : (a) specified percentages of gainfully accurate accurate the schemes and accurate the schemes are scheme to be a scheme occupied persons; or (b) in some cases, all residents subject to a means test. There would be temporary relaxations from these requirements in the case of countries whose economic development or medical resources would not permit them to satisfy the normal minimum conditions. States Members would be entitled to ratify the Convention if their schemes fulfilled the requirements of the Convention in respect of three or more of the branches of social

### Collective Agreements, Voluntary Conciliation and Arbitration

The Conference had to consider two draft Recommendations. The first dealt with collective agreements and the second with voluntary conciliation and arbitration. The drafts were based on the conclusions adopted by the Conference at its 33rd Session when it held a first discussion on these questions.

The Recommendation concerning Collective Agreements provides that machinery appropriate to the conditions in each country should

### Ministry of Labour Gazette. July, 1951

be established by means of agreement or laws or regulations to negotiate collective agreements or to assist the parties in the negotiation of such agreements. It is laid down that collective agreements should bind both the signatories and those on whose behalf the agreements are concluded. More particularly employers and workers covered by such an agreement should not be able to include in contracts of employment stipulations contrary to the collective agreement. The Recommendation makes it clear that terms and conditions more favourable to the workers than those provided for in the collective agreement are not to be regarded as contrary to it. The Recommendation provides for measures to be taken, where appropriate, having regard to established collective bargaining practice, for the extension of collective agreements to all employers and workers included within the industrial and territorial scope of the agreements. On the subject of disputes arising out of the interpretation of collective agreements the Recommendation says that these should be submitted to an appropriate procedure for settlement established either by be established by means of agreement or laws or regulations to agreements the Recommendation says that these should be submitted to an appropriate procedure for settlement established either by agreement between the parties or by laws or regulations. The supervision of the application of collective agreements should be ensured by the employers' and workers' organisations parties to the agreement or by the bodies existing in each country for the purpose or by bodies established *ad hoc*.

The Recommendation concerning voluntary conciliation and arbitration is in two parts. The first part deals with conciliation and provides that voluntary conciliation machinery appropriate to national conditions should be made available to assist in the to hardonal conditions should be made available to assist in the prevention and settlement of industrial disputes between employers and workers. The procedure should be free of charge and expeditious, and provision should be made for it to be set in motion by any of the parties to the dispute or *ex officio* by the voluntary conciliation authority. The parties in a dispute should be encouraged to refrain from strikes and lockouts while the conciliation procedure is in progress. With record to voluntary achieves the parties of is in progress. With regard to voluntary arbitration, the Recom-mendation provides that, where a dispute has been submitted to arbitration for final settlement with the consent of all parties, the parties should be encouraged to refrain from strikes and lockouts while the arbitration is in progress and to accept the arbitration award. The Recommendation states that its provisions are not to be interpreted as limiting in any way the right to strike.

#### Co-operation between Public Authorities and Employers' and Workers' Organisations

The Conference Agenda contained for a first discussion an item dealing with the question of co-operation between public authorities and employers' and workers' organisations. The Conference had before it three sets of draft conclusions prepared by the International Labour Office dealing with co-operation at three levels, the level of the undertaking, the level of the industry and the national level. The Conference was unable in the time available to complete its discussion of these draft conclusions and decided that the questions discussion of these draft conclusions and decided that the questions of co-operation at the level of the industry and at the national level should be placed on the agenda of the 35th Session of the Conference for a first discussion. On co-operation at the level of the undertaking the Conference adopted general conclusions with regard to a possible recommendation. These conclusions provide for the encouragement of or the establishment by legislation of machinery for consultation and co-operation between employers and workers at the level of the undertaking on matters of mutual concern not within the scope of collective bargaining machinery. The Conference also decided to ask the Governing Body of the International Labour Office to ask the Governing Body of the International Labour Office to instruct the Office to prepare for submission to Governments, with a view to a first discussion at the 35th Session, a draft text containing, as model guiding principles, examples of good practice concerning consultation and co-operation at the level of the undertaking.

### Equal Remuneration for Men and Women Workers for Work of Equal Value

Following a first discussion at its 33rd Session the Conference had a second discussion on the subject of Equal Remuneration for Men and Women Workers for Work of Equal Value. It had before it the following alternative draft texts prepared by the International Labour Office :--(1) A Convention embodying general principles and a supplementary Recommendation dealing with methods of application of the principles ; and (2) a Recom-mendation embodying both general principles and methods of application application.

After consideration of these draft texts the Conference decided to adopt a Convention supplemented by a Recommendation. The Convention provides that States Members which ratify it shall, by means appropriate to the methods in operation for determining rates of remuneration, promote, and insofar as is consistent with those methods ensure, the application to all workers of the principle those methods ensure, the application to all workers of the principle of equal remuneration for men and women workers for work of equal value. The principle is defined in the Convention as "rates of remuneration established without discrimination based on sex". The Convention also provides that, where they would assist in applying the principle, measures shall be taken to promote the objective appraisal of jobs on the basis of the work to be performed. It is stipulated that differential rates which correspond, without regard to sex, to differences as determined by such objective appraisal are not to be regarded as contrary to the principle of equal remuneration. equal remuneration.

The Recommendation deals with methods of application of the principle. It includes provision for the application of principle to public servants, encouragement of its application to employees of State, provincial or local Government Depart-ments where these have jurisdiction over rates of remuneration, and its application in other occupations where rates of remuner-ation are subject to statutory regulation or public control

### Ministry of Labour Gazette. July, 1951

(e.g., cases where minimum wage rates are determined under public authority, nationalised industries, and work executed under the terms of public contracts). Other paragraphs of the Recommendation deal with : The progressive application of the principle where it cannot be applied immediately by such measures as decreases in differentials in remuneration or the granting of standard of living. In achieving this the wage-fixing body should take into consideration such factors as the cost of living, fair and reasonable value of services rendered, wages paid for similar or comparable work under collective agreements in agriculture, and the general level of wages in other industries for work of comparable skill. The Recommendation also deals with such equal increments; the taking of measures where appropriate to raise the productive efficiency of women workers; and the promotion of public understanding of the grounds on which it is considered that the principle of equal remuneration should be matters as : The participation of employers' and workers' repre-sentatives and of independent persons in the wage-fixing machinery; the revision of minimum rates; the appointment of inspectors; publicity for the minimum rates; and the main-tenance by employers of appropriate records of the wages which mplemented. they have paid.

### Minimum Wage-Fixing Machinery in Agriculture

The Conference adopted a Convention and a Recommendation concerning minimum wage-fixing machinery in agriculture. Member States who ratify the Convention will pledge themselves to create or maintain adequate machinery whereby minimum rates of wages can be established for workers in agricultural undertakings and related occupations. The determination of the undertakings and related occupations. The determination of the undertakings, occupations or categories of workers to which the minimum wage-fixing machinery will be applied is left to the competent authority of each country, subject to consultation with the most representative organisations of employers and wedges approximate Marshar States who work the Converties workers concerned. Member States who ratify the Convention are also left free to decide for themselves the nature and form of the minimum wage-fixing machinery and the methods by which it should be operated. This freedom is, however, subject to the observance of certain essential conditions. Before a decision is taken with regard to the nature and form of the machinery there must be full preliminary consultation with the most repre-sentative organisations of employers and workers concerned; employers and workers have also to take part in the operation of the minimum wage-fixing machinery, or have the right to be heard in such manner and to such extent as may be determined be ard in such manner and to such extent as may be determined by national laws or regulations but in any case on a basis of complete equality. The minimum rates fixed by the machinery set up under the Convention must be binding and not subject to abatement, though there is a special provision for lower rates in the case of mentally or physically handicapped workers. Ratifying countries will also be pledged to take steps to ensure that the minimum rates of wages fixed are known to the employers and workers concerned and that wages are, in fact, paid at rates not lower than those fixed by the wage-fixing machinery; these steps must include such provision for supervision, inspection and sanction as may be necessary in the conditions of the country concerned. Workers in countries which ratify the Convention will be entitled to recover by judicial or other proceedings any amounts by which they are underpaid in relation to the minimum rates of wages in force. Partial payment of wages in kind is permitted by the Convention subject to certain safeguards. The Recommendation contains suggested bases by re

The Recommendation contains suggested bases by reference to which minimum wages in agriculture should be fixed. These provide that the wage-fixing body should take account of the necessity of enabling the workers concerned to maintain a suitable

### **REVIEW OF THE MONTHLY STATISTICS**

The following is a summary of the principal statistics of the month. Further details and analyses will be found on pages 277 to 296.

#### Employment

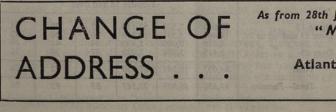

It is estimated that the number of persons in civil employment in Great Britain rose during May by 46,000 (13,000 males and 33,000 females), the number at the end of the month being 22,256,000. The basic industries (mining, gas, electricity and water supply, transport, agriculture and fishing) showed an increase of 25,000, manufacturing industries fell by 5,000 and other industries and services rose by 26,000. The total working population, including H.M. Forces, the unemployed, and men and women on release leave who have not taken up employment, is estimated to have increased by 20,000 from 23,267,000 to 23,287,000.

#### Unemployment

The number of persons registered as unemployed at Local Offices of the Ministry of Labour and National Service in Great Britain fell from 215,682 to 190,776 between 21st May and 18th June. There was a fall of 16,501 in the case of males and 8,405 in the case

#### **Rates of Wages**

The index of weekly rates of wages, based on June, 1947 (taken as 100), was 119 at the end of June, compared with 118 at the end of May. The changes in rates of wages reported to the Department

security listed

### Holidays with Pay in Agriculture

The Conference had a first discussion on the question of Holidays with Pay in Agriculture, and adopted certain provisional con-clusions. On the basis of these conclusions there will be further consultation with Governments prior to a second discussion at the 35th (1952) Session of the Conference.

the 35th (1952) Session of the Conference. The conclusions adopted envisage the possible adoption of a Convention supplemented by a Recommendation. So far as the proposed Convention is concerned the main provisions embodied in the conclusions were as follows. Every worker covered by the proposed Convention would be entitled after continuous service to an annual holiday with pay. The length of the qualifying period of service and the duration of the holiday would be determined by national laws or regulations, collective agreements, arbitration awards or any other method approved by the competent authority of the country concerned. It is proposed that wherever possible the duration of the holiday should be increased with the length of service. Where it is appropriate for them to do so, the competent of service. Where it is appropriate for them to do so, the competent authority would ensure that public holidays, periods of sickness and weekly rest periods did not count as part of the annual holiday. It is also proposed that where a worker does not qualify holiday. It is also proposed that where a worker does not qualify for the full period of annual holiday he would be entitled to a holiday proportionate to his length of service or to payment of remuneration in lieu. With regard to the amount of remuneration to be paid during the full holiday period it is proposed that this should be the worker's usual remuneration or such other remuneration as may be prescribed. Any agreement to relinquish the right to a holiday would be void.

The conclusions with regard to the proposed Recommendation would provide for a minimum holiday period of one working week for a period of one year's continuous service ; young workers under 16 years of age would however be entitled to two working weeks for a period of one year's continuous service. The continuity of the service required to qualify for the holiday would not be regarded as broken by temporary interputions for such not be regarded as broken by temporary interruptions for such reasons as sickness or accident. It is further proposed that the Recommendation should contain a clause providing that the holiday would increase progressively with the duration of the continuous service by regular stages. Division of the holiday period would be subject to safeguards designed to preserve the recuperative quality of the holiday quality of the holiday.

during June resulted in an aggregate increase estimated at £314,000 in the weekly full-time wages of 1,176,000 workpeople. The principal increases affected workpeople employed in retail distribution by co-operative societies, in the iron and steel industry, the printing industry, the manipulative grades of the Post Office (outside the London Postal area) and boot and shoe manufacture.

#### **Industrial Disputes**

The number of workers involved during June in stoppages of work arising from industrial disputes (including those thrown out of work at the establishments where the stoppages occurred) was about 85,000. The aggregate time lost during the month at the establishments where the stoppages occurred was about 204,000 we him days. The number of stoppages which began in the 304,000 working days. The number of stoppages which began in the month was 159 and, in addition, 25 stoppages which began before June were still in progress at the beginning of the month. The stoppage involving the greatest loss of time during the month was that of colliery workers in Glamorganshire.

### **Retail Prices**

At 19th June the interim index of retail prices, based on 17th June, 1947 (taken as 100), was 125, compared with 124 at 22nd May and with 114 at 13th June, 1950. The rise in the index during the month under review was mainly due to higher prices for some articles of food, and to increases in the prices of many articles of clothing.

As from 28th July, 1951, the address of the Advertisement Section will be :--"Ministry of Labour Gazette", (Room D57), His Majesty's Stationery Office, Atlantic House, Holborn Viaduct, London, E.C.I. Phone: CITy 9876. Extensions 147 and 148.

### DURATION OF UNEMPLOYMENT, AGE AND TURNOVER AMONG THE UNEMPLOYED

### Duration of Unemployment and Age of Unemployed

The regular monthly returns of unemployment which are published in this GAZETTE (see, for instance page 280) are supplemented periodically by other returns, one of which analyses the register of wholly unemployed persons according to age and the duration of their last spell of continuous unemployment. It is obtained every six months, and a detailed analysis for 18th June is given in the following Table\* :--

Duration of			Age	Groups			Total num- bers wholly unem- ployed

The Table shows that nearly 37,000, or 31 per cent., of the wholly unemployed men at 18th June, were aged 56 and over, and that nearly 38,000, or 32 per cent., were aged 41–55. Thus, nearly two-thirds of the total number were over 40 years of age.

\* The figures exclude unemployed casual workers, persons temporarily stopped and registered severely disabled persons who are unlikely to obtain work other than under special conditions.

Among those who were under 41 years of age, more than one-half had been continuously unemployed for not more than 4 weeks and the number who had been on the registers for the whole year was very small. In the higher age-groups, on the other hand, there was a much greater tendency for unemployment to persist, and there were 10,000 men in the age-group 41–55 and 12,700 in the age-group 56 and over who had been continuously on the registers for the whole year.

Among women, nearly one-half of the total were in the agegroup 21–40. As regards duration of unemployment, the figures show similar features to those for men, but the numbers who had been unemployed for the whole year were very small, even in the higher age-groups.

The seasonal decrease in unemployment in June compared with December is reflected in all age-groups in the Table, both for men and women. It is also reflected in all the "duration" categories, and even among the men who had been unemployed for more than a year there was a decrease of over 5,000.

### Turnover Among the Unemployed

The "duration of unemployment" analyses for successive quarterly dates can be used to show how many of those who were registered as unemployed at the beginning of a quarter had found work (or otherwise ceased to register) by the end of the quarter. This is done by comparing the number in, say, the 0-13 weeks category at one date with the number in the 13-26 weeks category three months later, and so on. An analysis on these lines is given in the Table below ; the numbers who went off the register in the quarterly period March–June are expressed as percentages of the numbers on the register in March and corresponding percentages are given for the preceding quarter and for the March–June, 1950, quarter.

The Table shows that 69 per cent. of the males and 81 per cent. of the females who were wholly unemployed at 12th March had found work or ceased to register within the next three months, compared with 62 per cent. for males and 73 per cent. for females in the preceding quarter. The figures indicate that young persons under 18 years are more readily absorbed into new employment than older persons; in fact, all except a few hundreds of the juveniles who were unemployed in March had found work by June.

### Ministry of Labour Gazette. July, 1951

### RECRUITMENT AND TRAINING FOR THE YOUTH EMPLOYMENT SERVICE

The Committee on Recruitment and Training for the Youth Employment Service have recently presented their Report\* to the Minister of Labour and National Service.

Minister of Labour and National Service. In a foreword the Report states that the development of a comprehensive Youth Employment Service as provided for in the Employment and Training Act, 1948 (see the issue of this GAZETTE for August, 1948, page 263), depends very largely upon the Service being staffed by well qualified and suitably trained officers. The Minister of Labour and National Service, in consultation with the Minister of Education and the Secretary of State for Scotland, appointed a committee to consider and make recommendations concerning the qualifications, recruitment and training of officers for the Youth Employment Service, including the provision of training courses for persons already employed in that Service. The Minister, however, is not committed to adopting the recommendations which have now been made, on some of which consultation will be necessary with interested bodies.

As a result of changes effected under the Employment and Training Act the administration of the Youth Employment Service, the Report says, is being undertaken by the local education authorities in 129 out of 181 areas in Great Britain, compared with 65 before the passing of the Act. In those areas where the local education authorities have not exercised their powers, the Service is administered directly by the Ministry of Labour and National Service. The immediate difficulties of recruitment and training of staff in the transitional period have been met by special arrangements; the Committee have considered the long term problem.

ments; the Committee have considered the long term problem. The Report reviews the present staffing position of the Service, the qualifications and experience of existing officers and the types of training now provided, and estimates that an annual intake of 40 new Youth Employment Officers is necessary to meet future staffing requirements. The duties of the Youth Employment Officer are defined, his appropriate status is discussed, and consideration is then given to the recruitment, qualifications and training of future entrants, and to the provision of training courses for officers already employed in the Service.

The Committee recommends that new entrants to the Service should be drawn from a variety of occupations and be not less than 23 years of age. They should undergo a one year's full-time training course at a further education establishment within easy reach of facilities for practical work. A training board should be set up to help the training establishment to choose candidates and to assess students' work, issue certificates and advise on the development of training. Arrangements should be made to give financial assistance to students. The existing forms of training for officers already employed in the Service should be supplemented, the Committee suggests, by refresher courses arranged on both a national and a regional basis.

The Report is followed by Appendices giving details of the courses which have already been provided by the education authorities in Kent and an outline of the syllabus of the training course which the reporting Committee advocates.

### TRAINING AND EMPLOYMENT OF BLIND PERSONS

Under the provisions of the Disabled Persons (Employment) Act, 1944, the Minister of Labour and National Service has assumed financial responsibility for the training of blind persons in workshops for the blind, and also gives financial assistance to Local Authorities in respect of the cost of the employment of blind persons in such workshops (*see* the issue of this GAZETTE for November, 1948, page 378). On 31st March, 1950, 70 workshops had been approved by the Minister under the scheme for training and/or employment. Of these workshops 19 were managed directly by Local Authorities and 51 by voluntary organisations acting on behalf of Local Authorities. During the year ended 31st March, 1950, Local Authorities expended the sum of approximately 548,000 on the provision of employment for some 4,014 workers, The amount of grant payable by the Ministry in respect of this expenditure is approximately £290,000.

The cost to the Ministry of Labour and National Service of providing training for 407 adult blind persons in workshops for the blind during the year ended 31st March, 1950, was a little over £101,000. An analysis of the accounts of workshops for the blind for the same year shows that the value of goods made by the blind workers totalled over £1,500,000.

### PROPOSED WAGES COUNCIL FOR RETAIL BREAD AND FLOUR CONFECTIONERY TRADE

In view of an objection made with respect to the draft Order relating to the establishment of a Wages Council in respect of workers and employers in England and Wales in the Retail Bread and Flour Confectionery Trade, the Minister of Labour and National Service has decided to refer the draft Order to a further Commission of Inquiry for inquiry and report and has notified the objection to the Commission. The objection is to the inclusion of

\* Report of the Committee on Recruitment and Training for the Youth Employment Service. H.M. Stationery Office; price 9d. net. (10½d post free).
(99241)

bakers' roundsmen within the scope of the Wages Council. A review of the Report of the original Commission was published in the January issue of this GAZETTE (page 7).

The Commission, whose address is 1 Bryanston Square, London, W.1., has published a notice in the *London Gazette* stating the questions which it is its duty to consider and specifying 31st August as the end of the period within which representations to the Commission can be made.

### COAL MINING

### **Reconstitution of National Coal Board**

In a statement in the House of Commons on 2nd July, the Minister of Fuel and Power referred to the retirement of Lord Hyndley and to the expiration on 15th July of the present appointments of the Chairman and of the full-time members of the National Coal Board.

Coal Board. The Minister stated that, following the retirement of Lord Hyndley, and in view of the change in the character of the Board that was explained to the House during the debates on the Amending Act of 1949 (see the issue of this GAZETTE for September, 1949, page 310), the Board would now be reconstituted as follows : Chairman : Sir Hubert Houldsworth ; Deputy Chairmen : Mr. W. J. Drummond and Sir Eric Coates ; full-time members : Mr. Ebby Edwards, Sir Charles Ellis, Sir Geoffrey Vickers and Sir Andrew Bryan ; Part-time members : Mr. J. H. Hambro, Sir Geoffrey Heyworth, Mr. Gavin Martin, Sir Godfrey Mitchell and Alderman Sidney Jones.

The Minister added that the new appointments would date from 1st August.

### Earnings in the Coal Mining Industry in the Fourth Quarter of 1950 and in the Year 1950

A Statistical Statement of the costs of production, proceeds and profit or loss of collieries in Great Britain for the fourth quarter of 1950 and for the year 1950 has been published by the National Coal Board. The statistics relate to the mines worked by the Board and exclude those relating to mines licensed in accordance with Section 36 of the Coal Industry Nationalisation Act, which in the fourth quarter of 1950 and in the year 1950 produced about 0.9 per cent. of the total quantity of saleable coal.

The estimated average earnings, including the value of allowances in kind, for all *adult* male workers in Great Britain during the fourth quarter of 1950 amounted to 38s. 0d. per manshift worked and 199s. 8d. per week. The corresponding amounts for the year were 36s. 11d. and 190s. 0d. **REPORT OF NATIONAL DOCK LABOUR BOARD FOR 1950** 

The National Dock Labour Board have recently presented their Fourth Annual Report to the Minister of Labour and National Service. The report covers the year ended 30th December, 1950. The Board state that the dock labour force averaged 75,264 men

The Board state that the dock labour force averaged 75,264 men throughout the year and that voluntary absenteeism averaged 1.5 per cent. of the labour force. As many of the absences were afterwards explained, the Board regard the figure as most satisfac-tory. There was a slight increase in the proportion of younger workers; in July, 1950, men under 40 formed 30.2 per cent. of all daily workers, compared with 28.5 per cent. a year before. During the year 4,570 men left the industry and there was an intake of 5.577 of when 2 667 ware dockers' cons

of 5,577, of whom 2,667 were dockers' sons. For the year as a whole the average daily labour surplus was 6,895. Employment reached an unusually high level during January, but by March, owing to seasonal declines in the volume of traffic passing through the ports, surplus labour rose steeply to over 9,000 men daily. Employment improved thereafter and surplus labour rapidly declined to about 6,000 men a day. In June shortages of labour labour occurred and caused serious concern, particularly in Liverpool. During the second half of the year a decline in antici-pated timber imports and coal exports, and troubles in the near pated timber imports and coal exports, and troubles in the near Continental ports, affected employment in the docks. The numbers of men surplus to requirements increased in some ports to more than 20 per cent. of the Register; at the same time, heavy pressure elsewhere existed and a transfer of 500 men to Liverpool had to be made at the end of November. Port traffic reached very high levels at the end of the year; surplus labour throughout the country was reduced to 2,500 daily in the week before Christmas; and, marked

shortages of labour occurred, causing serious delays. The one major dispute of the year occurred during April in London. No change was made during 1950 in the National Agreements

Ministry of Labour Gazette, July, 1951

No change was made during 1950 in the National Agreements governing wages, attendance money and guaranteed weekly pay-ments. The average pay-roll and weekly earnings of daily workers during 1950 were 58,871 and £8 12s. 10d., respectively, compared with 58,160 and £8 8s. 11d. during 1949. An application from the trade unions for a wage increase was under consideration by the National Joint Council for the industry at the end of the year.\* Agreement was reached in December between the Board and the National Joint Council on a new form of marantee to non-registered National Joint Council on a new form of guarantee to non-registered labour engaged for cargo work.

Certain submissions concerning canteens and sanitary arrange-Certain submissions concerning canteens and sanitary arrange-ments at the docks were made to the Minister of Labour and National Service towards the end of 1950. Port medical services were extended during the year by the opening of six new centres, making 24 in all, and the work of rehabilitation centres was maintained. There were twelve dock workers' clubs in existence by December, of which six had been opened during 1950 with funds loaned by the Board. Week-end residential schools for dock workers were held in five areas during the year ; and a scheme for evening classes on port working was agreed nationally with the Technical Colleges, the National Joint Council and the Port Authorities.

Annexed to the Report are the Balance Sheet of the Board at 30th December, 1950, and Income and Expenditure Accounts for the year in respect of the Management, Welfare and General Reserve Funds.

### NATIONAL INSURANCE

### **Persons Employed in Tying and Training Hops** or in Bulb Cleaning

The National Insurance Advisory Committee have been asked to consider and report upon the preliminary draft of Regulations under which occasional employment in the tying or training of hops or in the cleaning and splitting of bulbs would be treated as self-employment for national insurance purposes. The Regulation would not apply to persons who, ordinarily, are working as employed persons or are encaged in arrighture or

The Regulation would not apply to persons who, ordinarily, are working as employed persons or are engaged in agriculture or horticulture and who, when undertaking this employment, produce to their employers satisfactory evidence that they fall within either of these groups. Such persons would be entitled to have employed persons' contributions paid for their employment in the operations specified in the Regulations, subject to the ordinary rules. Copies of the preliminary draft of the Regulations, which are entitled The National Insurance (Classification) Amendment (No. 2) Regulations, 1951, can be purchased from H.M. Stationery Office, price 2d. net  $(3\frac{1}{2}d. \text{ post free})$ .

### Members of H.M. Forces

The National Insurance Advisory Committee have been asked to consider and report upon the preliminary draft of Regulations amending in minor respects the provisions of the National Insurance (Members of the Forces) Regulations, 1949, which deal with persons serving in the Forces (*see* the issue of this GAZETTE for June, 1949, page 201).

June, 1949, page 201). Special provisions relating to national insurance contributions and benefits apply to persons who are treated as members of the forces for national insurance purposes, and the draft Regulations would extend these provisions to cover women serving in the Women's Royal Naval Volunteer Reserve and the Women's Royal Naval Reserve (List Reserve). The Regulations would also extend the provisions which except certain members of the forces serving in local overseas units from compulsory insurance during their in local overseas units from compulsory insurance during their service and would exclude from such compulsory insurance persons from the Channel Islands who perform their national service with the regular forces.

Copies of the preliminary draft of the Regulations, which are entitled The National Insurance (Members of the Forces) Amend-ment Regulations, 1951, can be purchased from H.M. Stationery Office, price 2d. net  $(3\frac{1}{2}d. \text{ post free})$ .

### **Contributions for Foreign Seamen**

The National Insurance Advisory Committee have been asked to consider and report upon the preliminary draft of Regulations which would increase the national insurance contributions payable

which would increase the national insurance contributions payable by employers for seamen on foreign-going ships who are not domiciled and have no place of residence in the United Kingdom. The payment of contributions for such seamen is covered by special Regulations (The National Insurance (Mariners) Regulations, 1948) under which the employers pay at a reduced rate, and the seamen themselves are excused from the liability to pay contribu-tions (*see* the issue of this GAZETTE for May, 1948, page 165). An increase in the rate of contributions is made necessary by the general increase in contribution rates which is to come into force on Sum increase in contribution rates which is to come into force on Ist October, 1951 (as provided for under the National Insurance Act, 1946). It is proposed to increase the contribution rate for these seamen by an amount similar to the increase of the employer's contribution for other employed persons. Copies of the preliminary draft of these Regulations, which are entitled The National Insurance (Mariners) Amendment Regula-tions, 1951, can be purchased from H.M. Stationery Office, price 3d. net (41d. post free).

### Liability for Insurance of Members of National Hospital Service Reserve

On 1st June the Minister of National Insurance, in conjunction with the Treasury, made the National Insurance, in Conjunction Amendment Regulations, 1951. A preliminary draft of these Regulations had been submitted to the National Insurance Advisory Committee (see the issue of this GAZETTE for April, page 146),

Committee (see the issue of this GAZETTE for April, page 146), who approved the draft subject to a recommendation for the amendment of the specified period of employment. The recom-mendation was accepted and the appropriate provision incorporated in the Regulations now made. The Report of the Committee has been published as a House of Commons Paper. The new Regulations, which came into operation on 11th June, amend the National Insurance (Classification) Regulations, 1948, by including, among the employments in respect of which persons are treated as non-employed persons, employment as a member of the National Hospital Service Reserve. The effect of the Regula-tions is that nurses and nursing auxiliaries engaged in periods of training or taking refresher courses in the National Hospital Service Reserve will not, while so engaged, be liable to pay national insurance contributions as employed persons except when they render services in the Reserve for 24 hours or more in any contribu-tion week. The Regulations do not affect the liability for payment tion week. The Regulations do not affect the liability for payment of industrial injuries contributions, which are payable no matter how short the period of employment. Copies of the Regulations (S.I. 1950 No. 993) and of the Repor

(House of Commons Paper No. 200) can be purchased from H.M. Stationery Office, price respectively 2d. and 3d. net (3<sup>1</sup>/<sub>2</sub>d. and 4<sup>1</sup>/<sub>2</sub>d. post free).

### Workmen's Compensation (Supplementation) Scheme, 1951

Scheme, 1951 The Workmen's Compensation (Supplementation) Act, 1951,† which received the Royal Assent on 21st March, empowered the Minister of National Insurance, with the consent of the Treasury, to make a scheme which would provide for the payment of allowances supplementing the compensation payable to workers in respect of accidents which happened before 1924. In exercise of these powers the Minister of National Insurance, with the consent of the Treasury, made, on 27th June, the Work-men's Compensation (Supplementation) Scheme, 1951, which came into force on 11th July. The Scheme, which is purely supple-mentary, deals solely with people who have rights under the Workmen's Compensation Acts on account of an accident or disease which happened before 1 January, 1924. It gives them allowances out of the Industrial Injuries Fund to bring their compensation up to about the level it would have stood at if compensation up to about the level it would have stood at if the later Workmen's Compensation Acts had applied to them. The rights and obligations of workers and employers under the Workmen's Compensation Acts themselves, in so far as they still

workmen's Compensation Acts themselves, in so far as they sum continue in force, are not altered in any way. The Scheme will be administered by the newly-appointed Work-men's Compensation Supplementation Board, at 30 Euston Square, London, N.W.1. Copies of the Scheme (S.I. 1951 No. 1150) can be purchased

from H.M. Stationery Office, price 6d. net ( $7\frac{1}{2}$ d. post free).

\* As a result an increase in wage rates took effect in February, 1951. † 14 and 15 Geo. 6. Ch. 22. H.M. Stationery Office; price 6d. net (7ad. post

### NATIONAL ASSISTANCE IN 1950

The Report of the National Assistance Board for the year ended 31st December, 1950, has been published by H.M. Stationery Office as a Command Paper (Cmd. 8276), price 1s. 9d. net (1s.  $10\frac{1}{2}$ d. post free)

The Chairman of the Board, in presenting the Report to the Minister of National Insurance, refers to the enlargement of the scope of the Board's work during the year to include the assessment under the Legal Aid and Advice Act, 1950, and the Legal Aid and Solicitors (Scotland) Act, 1950, of the resources of persons seeking aid under the Acts. The Board also undertook, at the request of the Minister of Health and the Secretary of State for Scotland, to investigate the means of patients who asked for payments under investigate the means of patients who asked for payments under the National Health Service Acts to meet the costs of travel to and from hospitals. The main responsibility of the Board, however, continued to be the administration of national assistance. The new Regulations, which came into operation on 12th June, 1950 (see the issue of this GAZETTE for May, 1950, page 162), brought increases in the allowances paid to all but a small minority of the increases in the allowances paid to all but a small minority of the 1,225,000 persons then receiving assistance from the Board, and were partly responsible for the increase in the number of allowances to about 1,350,000 at the end of the year, compared with 1,150,000 at the end of 1949. With their wives and young children, the 1,350,000 recipients of these allowances represented about two million persons dependent wholly or partly on assistance. A steep rise in the number of applications for assistance during the latter part of the year is partly attributable to the publicity given to the increased rates to the increased rates.

### **Functions and Expenditure**

The statutory functions of the Board are, briefly :-- the grant of The statutory functions of the Board are, briefly :—the grant of assistance, mainly cash allowances, in accordance with Part II of the National Assistance Act, 1948 ; the administration of non-contributory old age pensions, payable under the Old Age Pensions Act, 1936 ; the provision of reception centres for persons without a settled way of living ; the provision of accommodation for Poles under the Polish Resettlement Act, 1947 ; the investigation, under the Legal Aid and Advice Act, 1949, and the Legal Aid and Solicitors (Scotland) Act, 1949, of the resources of certain persons applying for legal aid, and the determination of their maximum contribution to the Legal Aid Fund — The Board also carry out contribution to the Legal Aid Fund. The Board also carry out various duties as agents for other Government Departments.

During 1950 the total net expenditure of the Board was about  $\pounds 86,375,000$ , including  $\pounds 56,430,000$  paid as national assistance grants,  $\pounds 25,230,000$  for non-contributory old age pensions,  $\pounds 485,000$  in respect of the maintenance of Poles and  $\pounds 4,230,000$  as administrative

### National Assistance

During 1950 the Board received about 2,770,000 applications for assistance. Of these applications, 1,550,000 were dealt with by a single payment to meet a temporary need, and 870,000 resulted in the grant of a weekly allowance. No assistance was granted in the remaining cases. About 680,000 allowances terminated during the year. The number of allowances in payment at the end of the year was 1,349,902, compared with 1,157,403 at the end of 1949 and 842 304 shorthy after the introduction of patients. was 1,349,902, compared with 1,157,403 at the end of 1949 and 842,304 shortly after the introduction of national assistance in July, 1948. This was an increase, in less than two and one-half years, of more than 500,000, or 60 per cent. After allowing for dependants, the increase, the Report says, must have been about three-quarters of a million persons. It is pointed out that the increase of over half-a-million in the number of persons receiving allowances has not taken place evenly. The two periods when the greatest increases took place were the second half of 1948 and the second half of 1950, which accounted for about 170,000 and over 120,000 respectively over 120,000, respectively

Of the 1,349,902 persons receiving allowances on 19th December 1950, nearly 76,000 were registered at Employment Exchanges and over 1,273,000 were outside the industrial field. Those registered for work at Employment Exchanges included 36,800 who were drawing assistance in supplementation of unemployment benefit. The remainder, many of whom were handicapped in some way, were required to register so that they could take suitable work if and when it became available.

The Report gives the results of a detailed investigation based on The Report gives the results of a detailed investigation, based on a five per cent. sample, which was made in September, 1950. The inquiry showed that of 1,284,560 persons then receiving assistance, 1,188,400 were outside the industrial field. Of these 794,520, or nearly 62 per cent. of the total number in receipt of assistance, were of pensionable age, and 217,760, or 17 per cent., were sick or incapacitated persons under pensionable age. The remaining 176,120 were mainly women with domestic responsibilities.

More than three-quarters of the allowances paid were in More than three-quarters of the allowances paid were in supplementation of non-contributory pensions, retirement pensions or other insurance benefits. The allowances paid to old people included 95,960 in supplementation of non-contributory old age pensions and 640,880 in supplementation of retirement pensions. Of the allowances paid to sick or incapacitated persons, 7,180 were in supplementation of non-contributory pensions and 108,560 in supplementation of sickness and industrial injury benefit. The number of allowances paid in supplementation of widows' benefit was 93,160 and those in supplement of unemployment benefit were 31,020.

The investigation also showed that more than 130,000 of the total number of persons receiving allowances were 80 years of age or over, nearly 40,000 of them being 85 or over ; on the other hand, less than one in ten, both of men and women, were under 35 years of age. Women, of whom over half-a-million were widows, out-(99241)

numbered the men in every age group. In all, there were 801,680 women and 482,880 men. The number of blind persons who were in receipt of special allowances was 45,580, of whom 16,040 were in receipt of assistance in supplementation of non-contributory old age pensions and 24,600 in supplementation of retirement pensions. Tuberculous 24,600 in supplementation of refirement pensions. Tuberculous persons who qualified for the special scale totalled 30,060, of whom 23,060 received assistance in supplementation of sickness benefit. There has been a steady increase, by about 100 a week, since 5th July, 1948, in the number of tuberculous persons receiving

special assistance. The 1,550,000 single payments made during the year were in respect of cases of temporary need or cases in which the desirability of making a weekly payment was in doubt. Of 36,690 such pay-ments made during the week ended 25th November, 1950, 14,681 were made to able-bodied persons because of unemployment; 8,119 were made to persons, mainly between 20 and 30 years of age, who had just started or were about to start work, but needed assistance because they were unable to draw wages at the end of the first week; 7,463 were made because of sickness, including 4,873 made pending payment of sickness benefit : and 3.532 were 4,873 made pending payment of sickness benefit ; and 3,532 were made to separated wives.

made to separated wives. The Report gives particulars of the amounts paid to the persons receiving assistance, the rents (for which allowance is made separately in the assistance) paid by those persons, the resources which they own, and the extent to which the assistance granted was increased by the use of the Board's discretionary power to provide for special expenses

### Non-contributory Old Age Pensions

The number of persons in receipt of old age pensions continued to decline and fell from 440,190 at the end of 1949 to 421,953 at the end of 1950. Just over a quarter of these pensions were supple-mented by national assistance allowances, 89,821 under the ordinary scale and 16,033 under the special scale for blind persons.

#### Legal Aid

From the beginning of October, 1950, the Board became responsible for the investigation and determination of the resources of applicants for legal aid. During the period ended 19th December, the Board received 17,160 applications under the arrangements applicable to England and Wales, and had assessed 13,462 by the applicable to England and Wales, and had assessed 13,462 by the end of the period. The applicants found to be outside the financial limits of the scheme numbered 468; applicants found to be entitled to free legal aid numbered 4,547. In the same period 404 applications were received under the arrangements applicable to Scotland and, of the 179 cases decided, 97 were entitled to free legal aid and 11 were found to be outside the financial limits of the enhance

### Persons without a Settled Way of Living

The number of persons sleeping in reception centres, which had shown a slight decrease at December, 1949, again showed a reduction by about 100 at December, 1950, in which month a nightly average of 2,239 persons were accommodated in reception centres. The of 2,239 persons were accommodated in reception centres. The men using the centres were to a large extent quite young and able-bodied men who ought to have been working and keeping them-selves. During the year the Board's officers continued their efforts of re-establishment and 9,556 persons in reception centres were placed in employment; 1,539 old or infirm persons were admitted to residential accommodation; 572 sick persons were admitted to heavital : 478 persons were persuaded to return to their families. hospital; 478 persons were persuaded to return to their families; and 235 young men were sent to re-establishment centres.

During the year the Board made use for the first time of their powers to bring before the Court any person who had to be assisted under the Act because of persistent refusal or neglect to maintain himself. Four men, who were habitual users of reception centres and had, in the past, been given every opportunity to establish themselves in regular employment but had failed to do so, were prosecuted at Birmingham. They were each sentenced to terms of imprisonment. Other cases were being prepared at the end of the year. The Board comment that all these men, and there were many others like them, were young and fit and had abused countless opportunities to establish themselves in regular employment. The effort to help men to settle in employment had not diminished and no one was being prosecuted without being warned and given another chance.

#### **Polish Resettlement**

The number of Poles residing in 26 hostels at the end of 1950 was 14,263, compared with 13,865 at the beginning of the year. The increase was due to the admission during the year of a number of refugee Poles from East Africa and the Lebanon. The cost of maintaining the hostels, exclusive of expenditure incurred by other Government Departments, was about £595,000, of which £370,000 was recovered through charges made for board and lodging to Poles in employment and occupation charges from residents catering for themselves. At the end of the year nearly four-fifths of the total number of

At the end of the year nearly four-fifths of the total number of residents was accounted for by employed persons and their wives and dependants. The men were employed mainly in building, engineering, food preparation and railway service and the women in hosiery and textiles, food preparation and other factory work. Despite the fact that many of those admitted to the hostels from Fact A frize and the Lebanon were too old or feeble to work.

East Africa and the Lebanon were too old or feeble to work, only 700 residents were registered as unemployed at the end of the year. Of these 300, including 180 disabled, were fit for light work only. The Report surveys the organisation of the Board and is followed by appendices containing statistics, brief reports of welfare cases and other relevant information.

### INTERNATIONAL LABOUR ORGANISATION

### 34th Session of International Labour Conference

The 34th Session of the International Labour Conference was held in Geneva from 6th June to 29th June. An article on the work of the Session appears on pages 267 to 269 of this GAZETTE.

### 115th Session of Governing Body

The 115th Session of the Governing Body of the International Labour Office was held in Geneva on 1st and 2nd June, and on 21st and 22nd June, 1951. M. Leon Eli Troclet (Government reprentative, Belgium) was in the Chair. The Session was preceded meetings of the Committees of the Governing Body. The by meetings of the Committees of the Governing Body. The United Kingdom representatives were Sir Guildhaume Myrddin-Evans, K.C.M.G., C.B., Deputy Secretary of the Ministry of Labour and National Service, Mr. Alfred Roberts, C.B.E., Chairman of the General Council of the Trades Union Congress, General Secretary of the Amalgamated Association of Card, Blowing and Ring Room Operatives, and Mr. C. Bellingham-Smith of the British Employers' Confederation (representing Sir John Forbes Watson, K.C.M.G., Director of the Confederation). The Governing Body paid tribute to the memory of Mr. Ernest Bevin and asked the Director General of the International Labour Office to convey to the United Kingdom Government and people the sympathy of the Governing Body on the great loss which they had sustained by his death.

had sustained by his death.

The following paragraphs contain notes on some of the more important subjects dealt with by the Governing Body at this Session.

### Agenda for the 36th (1953) Session of the International Labour

The Governing Body took a provisional decision concerning the Agenda of the 36th (1953) Session of the International Labour Conference. It was noted that the Agenda would necessarily contain three standing items : the Report of the Director-General ; Financial and Budgetary Questions ; and Information and Reports on the Application of Conventions and Recommendations. It was on the Application of Conventions and Recommendations. It was also noted that the following items which were on the Agenda of the 35th Session of the Conference might be carried over to the 36th Session for a second discussion : Protection of the Health of Workers in Places of Employment; and Regulation of the Employment of Young Persons in Underground Work in Coal Mines. The Governing Body decided provisionally to add two new items to the Agenda. These are : the Organisation and Working of National Labour Departments; and Holidays with Pay. It was understood that the discussion of the first of these items would not necessarily lead to the adoption of international regulations not necessarily lead to the adoption of international regulations but that it might lead to the adoption of broad conclusions which but that it might lead to the adoption of broad conclusions which would be of assistance to those countries where national labour departments are still in their formative stages. Holidays with Pay was included in the Agenda with a view to the adoption of a general Recommendation. It was also decided that, while a separate item would not be included in the Agenda for the purpose, there would be a review of and an opportunity to discuss the technical assistance activities of the International Labour Organisation. The Governing Body is expected to reach a final decision with regard to the Agenda at its 117th Session which will probably take place in the autumn of this year. of this year.

### Meeting of Experts on Systems of Payment by Results

The Governing Body had before it the report of a meeting of The Governing Body had before it the report of a meeting of experts on systems of payment by results which was held in Geneva from 10th to 18th April, 1951. The conclusions adopted by the meeting dealt with : the advantages and disadvantages of systems of payment by results ; scope for the application of such systems ; types of systems suited to different circumstances ; and principles which should be applied both in the introduction and in the operation of systems of payments by results. As suggested by the meeting of experts, the Governing Body authorised the Director-General to communicate the conclusions of the experts : (a) to Governments with the request that they draw the attention of

General to communicate the conclusions of the experts : (a) to Governments with the request that they draw the attention of employers' and workers' organisations and other interested bodies to these conclusions ; (b) to the Industrial Committees of the International Labour Office ; (c) to the International Committee of Scientific Management with the suggestion that this Committee bring them to the notice of its constituent organisations. The Governing Body also agreed that the Director-General should transmit to Governments a suggestion of the experts that Governments should be requested to collect from time to time statistics on the respective use of systems of payment by results and payment by time. The Governing Body also took note of certain suggestions made by the experts for action by the International Labour Office on some of which the Director-General will take action or will make further proposals to the Governing Body. Body

### 16th Session of the Joint Maritime Commission

The Governing Body considered the report of the 16th Session of the Joint Maritime Commission which met in Geneva from 21st to 24th May, 1951. The Commission had considered the question whether a special maritime conference should be held to discuss the conditions of employment of Asian seafarers, and had adopted a resolution calling for the collection of further information on the subject. The resolution proposed that this

further information should be considered by a meeting of the Joint Maritime Commission early in 1952, at which a final decision would be taken on the question whether to recommend the Govern-ing Body to convene the proposed Conference. Subject to consideration of the financial implications at its next Session, the Governing Body approved the proposal to call a meeting of the Joint Maritime Commission early in 1952. On the recommendation of the Commission, the Governing Body also agreed to refer to a sub-committee of the Commission for further study the possible convocation of a Conference concerning conditions in the short-sea trades of West and North-West Europe. Another resolution adopted by the Commission dealt with the problem of refugee seafarers. The Governing Body approved this resolution, which the Director-General will bring to the notice of the United Nations High Commissioner for Refugees, the Governments of Member States and the International Transport Workers' Federation with a view to appropriate action. view to appropriate action.

Ministry of Labour Gazette. July, 1951

#### **Financial Matters**

The Governing Body considered what recommendation it should make to the 34th Session of the International Labour Conference with regard to the allocation of the expenditure of the Organisation in 1952 between the States Members. It was decided that the Director-General should prepare for submission to the Conference a scale which would be based on that in operation for 1951 but which would take into account certain principles in connection with the amount of relief to be allowed to existing members in the light of certain the states of the prepare to the terms of terms of the terms of the terms of contributions assessed on new members.

#### Staff Matters

In connection with the application to the staff of the International Labour Office of the United Nations the salary and leave scheme adopted by the General Assembly in December, 1950, the Governing Body adopted new salary scales for the higher staff. These concerned Assistant Directors-General, Principal Chiefs of Division and Chiefs of Division. The Governing Body also decided to upgrade a number of posts.

### **Relations** with the Council of Europe

Relations with the Council of Europe The Governing Body had before it a draft relationship agreement with the Council of Europe. This was based on certain principles which the Governing Body had formulated at its 113th Session for the guidance of the Director-General in seeking to establish satisfactory relationships with the Council of Europe. The draft agreement includes provisions for the following : mutual consulta-tion ; proposal of items for the Agenda of the Governing Body by the Committee of Ministers of the Council and proposals of items for the Agenda of the Committee of Ministers by the Govern-ing Body ; arrangements for regional tripartite meetings and regional technical meetings ; technical assistance ; co-ordination of effort in the assembling and publication of statistical and legislative information ; and exchange of information and docu-ments. The Governing Body approved the draft agreement.

### Maintenance or Restoration of International Peace and Security

The Governing Body had before it the resolution on "Uniting for Peace" which was adopted by the General Assembly of the United Nations at its 5th Session. This provides that the General Assembly may make recommendations to members of the United Assembly may make recommendations to members of the United Nations for collective measures for the maintenance of inter-national peace and security if the Security Council fails to act. At its 12th Session, the Economic and Social Council had requested the Secretary-General of the United Nations to consult with the specialised agencies as to the specific arrangements which the latter might make in order to provide for the furnishing of information and assistance to the United Nations in the maintenance or restora-tion of international peace and security. The Governing Body decided to recommend the 34th Session of the International Labour Conference (6th to 29th June, 1951) to adopt a resolution to co-operate with the General Assembly and the Security Council in the maintenance or restoration of international peace and security in the maintenance or restoration of international peace and security and for this purpose to furnish all appropriate information and assistance to those organs of the United Nations.

### Human Rights

The Governing Body considered the draft Covenant of Human Rights as revised by the Human Rights Commission at its 7th Session. After a full discussion, the Governing Body decided that certain considerations should be brought to the notice of the Economic and Social Council when the draft Covenant comes before the Council at its next Session. Apart from some detailed observations on the Articles of the draft Covenant which deal with the rights themselves, the principal observations made by the Governing Body deal with the provisions relating to implementa-tion. In particular, the Governing Body considered that : (a) the provisions in Part IV of the draft Covenant concerning the setting up of a Human Rights Committee should not apply to the economic, social and cultural rights dealt with in Part III of the Covenant ; and, (b) with regard to the submission of reports on the application of the Covenant, reports made by members of Specialised Agencies on matters falling within the competence of the Specialised Agencies should be made to the Agencies concerned. The Governing Body considered the draft Covenant of Human should be made to the Agencies concerned.

#### **Full Employment**

The Governing Body considered what instructions should be given to the International Labour Office representative at the

### Ministry of Labour Gazette. July, 1951

Economic and Social Council when the Council considers the guestion of full employment at its next session. The Governing Body decided that the International Labour Office representative should draw attention to a number of points, which included the following : (a) the desirability of financing rearmament expenditure in a manner which is at the same time equitable as between different sections of the community and conducive to the maximum productivity of resources; (b) the discussion at the 34th Session of the International Labour Conference (6th to 29th June, 1951) on the the International Labour Conference (6th to 29th June, 1951) on the problems of wages policy in conditions of full employment together with the Director-General's Report to the conference; (c) certain Recommendations of the International Labour Conference which have special relevance to problems of labour shortages and frictional unemployment; (d) action taken by the International Labour Office to promote international comparability of employ-ment and unemployment data. (See the issue of this GAZETTE for February, 1951, page 57.)

#### **Other Matters**

Other matters discussed by the Governing Body included : the report of the 3rd Inter-American Conference on Social Security ; two reports of a Committee on the working of the Governing Body and its Committees ; proposals for simplifying and expediting the production of conference documents ; and the reports of a number of Governing Body Committees.

### Fourth Session of Coal Mines Industrial Committee

The fourth session of the Coal Mines Committee was held in Geneva from 7th to 19th May. The meetings were attended by representatives from the United Kingdom, Belgium, Canada, France, India, the Netherlands, Turkey, the United States of America, and the Union of South Africa. Tripartite delegations of observers were also present from Japan, the German Federal Republic and the Saar. Mr. V. K. R. Menon (India), one of the representatives of the Governing Body of the International Labour Office, was chairman. The agenda comprised :--

1. General Report, dealing particularly with: (a) Action taken by various countries in the light of the conclusions of the previous session; (b) Steps taken by the Office to follow up the studies and enquiries proposed by the Committee; and (c) Recent events and developments in the coal industry.

### 2. Hours of work in and age of admission to coal mines.

### 3. Productivity in Coal Mines.

The Committee appointed a Steering and Resolutions Committee which examined and adopted three resolutions. The first requested the Governing Body of the International Labour Office to instruct the Director-General to consult the Governments and international bodies concerned on the question of convening a tripartite meeting bodies concerned on the question of convening a tripartite meeting of coal-producing countries, and to study the difficulties to be overcome before such a meeting could function effectively. The second invited the Governing Body to examine what has been done, in the countries concerned, to provide adequate pensions for retired mineworkers, and to submit its conclusions to the next session of the Coal Mines Committee. The third invited the Governing Body to expedite the consultation of the Governments concerned on the question of the co-ordination of social security provisions for European miners.

The purpose of Convention No. 95 is to ensure that workers receive the full benefit of their wages and are protected from certain abuses. The Government propose to ratify the Convention, but after ratification the appropriate organisations of employers and workers will have to be consulted with a view to excluding one mercel and domestic workers from certain provisions of the Sub-committees were set up for the separate discussion of items 2 and 3 of the agenda. One resolution of the Hours of Work Sub-Committee invited the Governing Body to place the question on the agenda of a future session of the International Labour Conference, the agenda of a future session of the International Labour Conference, and suggested that the aim of the Conference should be the prepara-tion of a Recommendation for the guidance of Governments in settling the daily hours of work in coal mines on the basis of a normal 40-hour week with provision for overtime work with premium payments. On the question of age of admission, a resolu-tion was carried by the same sub-committee in favour of a minimum age of 16 years, together with a rider to the effect that young persons of 16 to 18 should not be employed underground in coal mines except for training purposes (a) under adequate supervision or and workers will have to be consulted with a view to excluding non-manual and domestic workers from certain provisions of the Convention which cannot be applied to them on the basis of the existing law in this country. The exclusion of such workers, from any or all of the provisions of the Convention, is permitted by the Convention subject to consultation with the organisations of employers and workers directly concerned. Recommendation No. 85 contains proposals of a more detailed nature and, subject to reservations on certain points, the Government propose to accept the Recommendation. (b) under conditions determined by the competent authority prescribing the place of work and occupations permitted, and the measures of systematic medical supervision to be applied.

The Sub-Committee on Productivity resolved that employees should be given a just share of the benefits of increased productivity, and that measures for increased productivity should be accompanied by measures for increasing the safety and improving the health conditions of miners, with particular reference to safeguards against the dangers of dust. To these ends the resolution further invited the Governing Body to instruct the International Labour Office to carry out studies concerning joint consultation, productivity conditions and statistics and technical training in the applied conditions and statistics, and technical training, in the coal industries of the countries concerned, and to investigate the possibility of organising international missions among these countries.

All of the six resolutions passed by the Steering Committee and the two Sub-Committees were adopted with minor amendments in plenary session, and will be submitted for consideration by the Governing Body of the International Labour Office. (99241)

### **Proposed Government Action on Certain Conventions and Recommendations**

In two recently issued White Papers\* the Government have announced their proposed action on certain Conventions and a Recommendation which were adopted by the International Labour Conference at its 32nd Session held in June and July, 1949, and their proposed acceptance of a Recommendation adopted by the Con-ference at its 33rd Session held in June and July, 1950 (see the issues of this GAZETTE for July, 1949, and July, 1950, pages 227 to 229 and 223 to 225, respectively).

### Protection of Wages

#### Fee-Charging Employment Agencies

The object of Convention No. 96 is to prevent abuses which may arise from the engagement of workers through Fee-Charging Employment Agencies. Ratifying States may apply the Convention either by abolishing such agencies or by supervising and controlling them. The Government have come to the conclusion that it would be in the public interest to provide some measure of supervision and control over Fee-Charging Employment Agencies and propose to ratify the Convention on that basis and to introduce the

necessary legislation in due course. The measures of supervision and control laid down in the Convention are as follows :----

1. Agencies to be in possession of a yearly licence renewable at the discretion of the competent authority.

2. Fees and expenses not to be in excess of a scale submitted to and approved by the competent authority or fixed by the competent authority.

3. The placing or recruiting of workers abroad to be carried on only if the competent authority permits.

### Vocational Training of Adults including Disabled Persons

The Government propose to accept Recommendation No. 88 concerning the vocational training of adults including disabled persons. The Recommendation sets out the principles which should govern the provision of vocational training for adults and lays down detailed provisions for the application of those principles. Special sections deal with the training of disabled persons and international co-operation in the training of adults.

### LABOUR OVERSEAS Earnings in Norway in 1949

A report on the earnings of workers in Norway in 1949 has recently been published by the Norwegian Central Statistical Bureau. The report is based upon information supplied quarterly by undertakings, numbering nearly 2,900 at the end of 1949, which are members of the Norwegian Employers' Federation and the Paper Industry Employers' Federation. The earnings taken into account comprise time wages, piecework earnings and extra payments for overtime. payments for overtime.

The Table below shows the average hourly earnings, in Norwegian The Table below shows the average nourly earlings, in Norwegian kroner, of men and women employed in the principal groups of industries in Norway in 1949, with comparative figures for the previous year. The figures represent the means of the averages for the four quarters of each year. (Provisional figures for 1948 were published in the issue of this GAZETTE for January, 1950, near 18.) page 18.)

analogy and the second of the second	Average Hourly Earnings							
Industry Group	1	.949	1948					
in and internet in the second second	Men	Women	Men	Women				
Mining and Smelting of Metals	Kr. 3 · 16 3 · 19 2 · 79 3 · 14 2 · 79 3 · 27 3 · 13 2 · 83 2 · 90 2 · 94 3 · 12 3 · 09	Kr. 1.75 1.87 2.01 1.93 2.25 1.91 2.04 2.00 1.93 1.97 2.04 1.93 1.97 2.04 2.09	Kr. 3.01 2.96 3.20 2.81 3.02 2.68 3.23 3.01 2.70 2.74 2.77 2.95	Kr. 1.70 1.88 1.91 2.10 1.83 2.03 1.87 1.87 1.86 1.96 1.96				
All Above Groups	3.09	1.98	2.93	1.89				

Average hourly earnings increased during 1949 by about 5 per cent. for both men and women in all industry groups. In 1948 an addition of up to 10 øre an hour had been granted to workers whose average hourly earnings did not exceed 2.60 kroner for men and 1.70 kroner for women in Oslo and 2.50 and 1.60 kroner elsewhere. The collective agreements which were renewed in 1949 embodied this networks with amendments the limiting former of elsewhere. The collective agreements which were renewed in 1949 embodied this provision with amendments, the limiting figure of hourly earnings being raised to 2.75 kroner for men and 1.80kroner for women in Oslo and 2.65 and 1.70 kroner elsewhere. An addition of 5 øre an hour was granted also to more highly paid workers whose average hourly earnings did not exceed 2.90 kroner for men and 1.95 kroner for women in Oslo and 2.80 and 1.85kroner elsewhere.

The report also contains statistics of earnings in some of the craft occupations (printing and bookbinding, building, baking and confectionery, and the meat trade). In 1949 the average hourly earnings of skilled workers in these occupations were 3.60 kroner for men and 2.11 kroner for women, compared with 3.39 and 1.98 kroner in 1948. For assistants the corresponding averages were 3.33 and 1.74 kroner in 1949 and 2.97 and 1.57 kroner in 1948.

Ministry of Labour Gazette. July, 1951

### Earnings in Ferrous Foundries in the United States, 1950

The results of an enquiry into the earnings, in the summer of 1950, of men employed in selected occupations in ferrous foundries in the United States were published in the issue of the Monthly Labor Review for December, 1950. The enquiry, which was carried out by the Bureau of Labor Statistics of the United States Department of Labor, extended to foundries in 22 cities producing grey-iron, malleable-iron and steel castings and employing 21 or more workers each. Approximately 67,000 workers were employed in undertakings of this size in the areas studied.

Average hourly straight time earnings (*i.e.*, earnings during normal working hours, exclusive of extra payments for overtime and night work) in the summer of 1950 in the selected occupations for six of the cities covered by the survey are given below.

Occupation	Birmingham	Chicago	Detroit	Milwaukee	Philadelphia	Pittsburgh
Chippers and grinders Coremakers, hand Moulders, floor " hand, bench " machine Patternmakers, wood Truckers, hand	\$ 1.15 1.15 1.15 1.21 1.04 0.98	\$ 1.51 1.76 1.76 1.74 1.73 2.10 1.37 1.25	\$ 1.74 1.95 1.92 1.90 1.95 1.62 1.38	\$ 1.66 1.82 1.83 1.66 1.91 1.75 1.36 1.17	\$ 1.47 1.92 1.70 1.68 1.78 1.92 1.29 1.19	\$ 1.52 1.73 1.69 1.61 1.66 1.78 1.35

Most of the occupations showed increases in earnings, ranging from one to five per cent., compared with those reported in a similar study in June, 1949 (see the issue of this GAZETTE for December, 1949, page 417).

Two-shift working was reported in nearly all the 22 areas studied, and three-shift working in 14 areas. Additional payments were received by the great majority of late-shift workers in virtually all areas. The most typical premium payment for night work was 5 cents an hour. Both second and third shift workers were paid differential rates as high as 10 per cent. above day work rates.

A scheduled working week of 40 hours was most prevalent in A scheduled working week of 40 hours was most prevalent in the industry, but in some cases weeks of from 43 to 48 hours were reported. Payment for six, or in some cases seven, public holidays a year was reported in most of the areas. An annual holiday with pay, usually of one week after one year's service and two weeks after five years' service, was common in all the areas surveyed.

### Fatal Industrial Accidents in Canada in 1950

Preliminary statistics of fatal industrial accidents in Canada Preliminary statistics of fatal industrial accidents in Canada reported during 1950 are contained in an article published by the Canadian Department of Labour in the April issue of *The Labour Gazette*. The accidents recorded are those which occurred to gainfully employed persons during the course of, or arising out of, their employment. The statistics, which also include deaths from industrial diseases, are based on data obtained from the provincial Workmen's Compensation Boards, the Board of Transport Com-missioners, and certain other official sources, supplemented by press reports. In the case of industries not covered by workmen's compensation legislation, *e.g.*, agriculture, fishing and trapping and certain service groups, for which press reports only were available, the information may be less complete than for the remainder. During 1950 the total number of industrial fatalities and deaths

During 1950 the total number of industrial fatalities and deaths from industrial diseases recorded was 1,240, compared with 1,385 (revised figure) in the previous year. Fourteen accidents in 1950 caused the death of three or more persons in each case. The total number of both fatal and non-fatal accidents reported by the provincial Workmen's Compensation Boards rose from 412,378 (revised figure) in 1949 to 414,075 in 1950.

Accidents falling within the category "moving trains, vehicles, etc.", accounted for 359 of the total number of deaths in 1950; of these, 194 occurred in connection with automobiles and other power vehicles and implements. Falls of persons accounted for 184 fatalities and falls of objects for 160, of which more than one-third occurred in the logging industry. Dangerous substances caused 162 deaths, including 51 cases of electrocution. Industrial diseases, strain, etc., accounted for 141 deaths.

diseases, strain, etc., accounted for 141 deaths. Among the Provinces, the largest number of fatal accidents occurred in Ontario, where 434 fatalities were recorded, a decrease of 81 compared with the number in 1949. In Quebec and British Columbia the numbers of deaths reported in 1950 were 247 and 235 respectively. In all industry groups other than logging, fishing and trapping, construction, electricity, gas and water production and supply, and wholesale and retail trade, fewer fatal accidents were recorded in 1950 than in 1949. The largest decreases occurred in transportation, storage and communications, agriculture, and mining and quarrying. The number of deaths recorded in 1950 in the manufacturing industries group was 243, which represented 19.6 per cent. of the total, compared with 18.0 per cent. in 1949.

# Employment in Great Britain in May

### GENERAL SUMMARY

It is estimated that the total working population\* increased during May by 20,000 (all women). An increase is not usual in this month when there are few school leavers entering the employment field.

The size of the Forces rose during May by 4,000 to a total of 822,000. Z reservists recalled for 15 days training are not included in this figure. The number of ex-Service men and women on release leave at the end of the month was about 6,000.

The number of unemployed persons registered for employment at 18th June, 1951, was 190,800, compared with 215,700 at 21st May. The June figure represented about 0.9 per cent. of the estimated total number of employees, compared with 1.0 per cent. in May. The corresponding percentage in June, 1950, was 1.4.

The total number in civil employment (industry, commerce and rvices of all kinds) rose during May by 46,000 (13,000 men and 33,000 women).

There was an increase of 25,000 during the month in the number employed in the basic industries, including an estimated seasonal rise of 20,000 in agriculture. The number of wage earners on colliery books fell by 700 during the month. During May the number employed in the manufacturing industries decreased by 5,000, the main change being a decline of this amount in the metals, engineering and vehicles group.

There was an estimated increase of 5,000 in the number employed in building and contracting.

There was practically no change in the level of employment in the distributive trades, but there was an increase of 22,000 in the professional, financial and miscellaneous services group, the largest element being an increase of 18,000 in catering, hotels, etc.

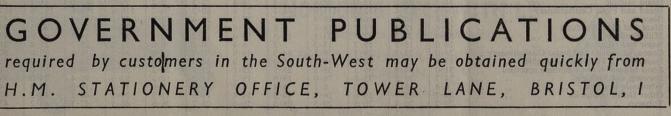

### **GENERAL MAN-POWER POSITION**

The broad changes in the man-power position between mid-1948 and the end of May, 1951, are shown in the following Table :---

Men           Women           Total           .M. Forces and Women's Services       Women's         Men           Women           Total           Total           Ien and Women on Release       Leave who have not yet         taken up employment          egistered Unemployed			222	1	'housand

	21,684	22,100	22,210	22,256	+46

# \* The total working population represents the total number of persons aged 15 and over who work for pay or gain or register themselves as available for such work. The figure includes the Forces, men and women on release leave not yet in employment, the registered unemployed, and all persons—employers and persons working on their own account as well as employees—in civil employment (including private indoor domestic servants and gainfully occupied persons over pensionable age). Part-time workers are counted as full units.

### ANALYSIS OF CIVIL EMPLOYMENT

An analysis of the total numbers in civil employment by broad industrial groups is given in the Table below. The industries are classified according to the Standard Industrial Classification.

Industry or Service	Mid- 1948	End- 1950	End- April, 1951	End- May, 1951	Change during May, 1951
Basic Industries Coal Mining		- Barrison April 1		King guilt.	antina ang

### NUMBERS EMPLOYED: INDUSTRIAL ANALYSIS

The Table on the next page shows, for those industries for which The Table on the next page shows, for those industries for which comparable figures are available, the numbers employed at mid-1948, end-1950, and April and May, 1951. The figures relate to employees only; they exclude employers and persons working on their own account, and they are thus different in scope from those given in the preceding paragraphs. Satisfactory estimates of the changes in the numbers within the latter classes cannot be made at monthly intervals for the individual industries.

made at monthly intervals for the individual industries. The figures are based primarily on the estimates of the total numbers of employees and their industrial distribution at the middle of each year which have been computed on the basis of the counts of insurance cards. In the case of all industries other than coal mining, building and civil engineering and gas and electricity, use has also been made of the monthly returns rendered by employers under the Statistics of Trade Act, 1947. Certain industries and services which are not covered by employers' returns (or are only partially covered), or for which figures are not available in the same form as for those shown below, are omitted from the Table. Persons registered as unemployed and ex-Service men and women on release leave are not included.

\* Cotton-335,000. Wool-216,000. Other textiles-486,000. † Revised figures;

# Unemployment at 18th June, 1951

### SUMMARY FOR GREAT BRITAIN

The numbers of persons registered as unemployed at 21st May and 18th June, 1951, were as follows :---

236-C-+2-682	Men 18 and over	Boys under 18	Women 18 and over	Girls under 18	Total
21st May	137,995	3,969	69,961	3,757	215,682
18th June	122,070	3,393	62,201	3,112	190,776

These figures include all unemployed persons on the registers of Employment Exchanges, with the exception of registered severely disabled persons who are unlikely to obtain work other than under special conditions.

It is estimated that the number of persons registered as unemployed at 18th June represented 0.9 per cent. of the total number of employees. The corresponding percentage at 21st May was 1.0.

The analysis of the figures for 18th June is as follows :---

State and State	Wholly U	Jnemployed	(including C	Casuals)	123 1 64	Par la
	Unem- ployed for not more than 2 weeks	Unem- ployed for more than 2 weeks but not more than 8 weeks	Unem- ployed for more than 8 weeks	Total	Tempor- arily Stopped	Total
Men 18 and over Boys under 18 Women 18 and	29,511 1,949	25,434 958	62,486 392	117,431 3,299	4,639 94	122,070 3,393
over Girls under 18	20,063 1,633	17,135 816	22,493 447	59,691 2,896	2,510 216	62,201 3,112
Total	53,156	44,343	85,818	183,317	7,459	190,776

The total of 190,776 includes 33,974 married women.

The changes between 21st May and 18th June, 1951, in each administrative Region were as follows :---

### NUMBERS UNEMPLOYED IN THE UNITED KINGDOM: REGIONAL ANALYSIS

The total number of unemployed persons on the registers of Employment Exchanges in the United Kingdom at 18th June, 1951, was 214,524, including 139,640 men, 4,332 boys, 67,064 women and 3,488 girls. Of the total, 206,686 (including 4,406 casual workers) were wholly unemployed and 7,838 temporarily stopped. The temporarily stopped are persons suspended from work on the understanding that they are shortly to return to their former employment.

The numbers of unemployed persons † on the registers in each Region at 18th June, 1951, are shown below.

Region	Men 18 years and over	Boys under 18 years	Women 18 years and over	Girls under 18 years	Total

### DISABLED PERSONS (EMPLOYMENT) ACT

The number of persons registered under the Disabled Persons (Employment) Act, 1944, at 16th April, 1951 (the last date on which a count was taken), was 906,008, compared with 926,144 at 15th January, 1951.

The number of disabled persons on the register who were unemployed at 18th June, 1951, was 44,522, of whom 40,423 were males and 4,099 were females. The total included 21,888 persons who had served in H.M. Forces and 22,634 who had not served. An analysis of these figures is given in the Table below.

1 21 1 1	- 1.99		Males	Females	Total

Ministry of Labour Gazette. July, 1951

### NUMBERS UNEMPLOYED : INDUSTRIAL ANALYSIS

The statistics given below show, industry by industry, the numbers of persons who were registered as unemployed at 18th June, 1951, distinguishing those wholly unemployed (*i.e.*, out of a situation) from those temporarily stopped (*i.e.*, suspended from work on the understanding that they were shortly to return to their former employment). The figures include all unemployed persons on the registers of Employment Exchanges with the

## Placing Work of the Employment Exchanges

The Table below shows for the four-week periods ended 9th May and 6th June, 1951, the numbers of vacancies filled by Employment Exchanges and other Local Offices of the Ministry of Labour and National Service in Great Britain, together with the numbers remaining unfilled at the end of each period. The figures include placings, etc., by the Youth Employment Offices of certain Local Authorities.

	9th	eks ended May, 951	6th	eks ended June, 951	Total Number of Placings, 21st Dec.,
	Placings	Vacancies Unfilled	Placings	Vacancies Unfilled	1950, to 6th June, 1951 (24 weeks)
Men aged 18 and over Boys under 18 Women aged 18 and	116,533 12,543	209,880 64,096	105,886 7,993	219,393 69,839	656,840 98,331
over Girls under 18	58,844 11,736	120,688 72,822	52,915 7,667	121,539 76,617	314,894 97,331
Total	199,656	467,486	174,461	487,388	1,167,396

The figures of vacancies filled relate only to those vacancies which were filled by applicants submitted by Employment Ex-changes, *i.e.*, they do not include engagements of workpeople by employers that were made without the assistance of Employment

Exchanges. The figures are therefore not comparable with the percentage rates of engagements, given in the "Labour Turnover" Table on the next page, which relate to engagements of all kinds during the period in question.

Ministry of Labour Gazette. July, 1951

The figures of vacancies unfilled represent the numbers of vacancies notified by employers to Employment Exchanges and remaining unfilled at the specified dates. They do not purport to represent the total number of vacancies which require to be filled, to represent the total number of vacancies which require to be filled, and they in fact fall short of the total number for several reasons. In the first place, it is probable that some employers do not notify their vacancies to Employment Exchanges and prefer to rely on other methods for finding the workpeople whom they require. Secondly, employers who do use the Employment Exchange system may, in certain circumstances (e.g., when they require large numbers of additional workpeople, or where labour of the kind they require is scarce), have a "Standing Order" with the Employ-ment Exchange to submit all suitable applicants to them without "notifying" any specific number of vacancies, and the vacancies remaining unfilled in such cases will not be included in the figures. Nevertheless, comparison of the figures for various dates provides some indication of the change in the demand for labour. The next Table shows the numbers of vacancies filled during the four weeks ended 6th June, 1951, in each of the industry "Orders" of the Standard Industrial Classification and in certain selected industries within the Orders, together with cumulative

selected industries within the Orders, together with cumulative totals for the period 21st December, 1950, to 6th June, 1951.

The Table below shows labour turnover rates (per 100 employees) in the manufacturing industries during the four-week \* period ended 28th April, 1951, with separate figures for males and females. The figures are based on information given by employers with more than 10 employees on returns which they render every month to the Ministry of Labour and National Service. Each return shows (a) the numbers of males and females on the pay-roll at the date of the return and also (b) at the date of the previous return, and an additional item shows (c) the numbers on the pay-roll at the later of the two dates who were not on the pay-roll at the earlier date. The figures in item (c) are adopted as representing engagements during the period, and the figures of discharges and other losses are obtained by adding the numbers engaged during the period to the numbers on the pay-roll at the beginning of the period and deducting include persons engaged during the period who were discharged or otherwise left their employment before the end of the same period, and the percentage rates both of engagements and of discharges, etc., in the Table below accordingly understate, to some extent, the total intake and wastage during the period. In spite of this limitation, in the rand wastage during the period. In spite of this limitation, however, the figures enable comparisons to be made between the turnover rates of different industries and also between the figures for consecutive months for the same industry, in the latter case after allowance is made for any difference in the length of period covered. It is also important to note that the figures for any industry represent the aggregated totals of the numbers engaged and dis-charged by all firms rendering returns in the industry. Some of the period were probably engaged by other firms in the same industry, and the net numbers of engagements and losses of an industry, considered as one unit, will be less in every case than the sum of the figures for the individual firms. numbers on the pay-roll at the beginning of the period and deducting from the figures thus obtained the numbers on the pay-roll at the end of the period. It must be borne in mind, however, that the figures of engagements obtained in the way indicated above do not

\* The figures for March which appeared in the June issue of this GAZETTE related to a five-week period. Note,-Establishments whose industrial classification has changed during the period as a result of a change in their activities are excluded from these calculations (c) Per 100 employees (males and females).

(b) Per 100 females employed. (a) Per 100 males employed.

### Labour Turnover

### Labour Turnover Rates in Manufacturing Industries : 4 weeks ended 28th April, 1951\*

Thousands

# Unemployment Benefit and National Assistance

### **Unemployment Benefit**

For the period of thirteen weeks ended 30th June, 1951, expenditure on unemployment benefit in Great Britain (excluding the cost of administration) amounted to approximately £3,074,000. During the thirteen weeks ended 31st March, 1951, the corresponding figure was £4,283,000 and during the thirteen weeks ended 1st July, 1950, it was £4,564,000.

### National Assistance

From 5th July, 1948, with the coming into operation of the National Assistance Act, the local Offices of the Ministry of Labour

and National Service undertook the payment of national assistance to persons who were required to register for employment and who were entitled to national assistance. The amount of national assistance thus paid during the thirteen weeks ended 30th June, 1951, was approximately £1,160,000. The corresponding amount paid during the thirteen weeks ended 31st March, 1951, was £1,510,000 and during the thirteen weeks ended 24th June, 1950, it was approximately £1,260,000. Comparison of the figures for the quarters ended 30th June, 1951, and 31st March, 1951, with those for the earlier quarter is affected by the increases in the scale rates which came into force on 12th June, 1950, under the National Assistance (Determination of Need) Amendment Regulations, 1950.

Need) Amendment Regulations, 1950.

### Insured Persons Absent from Work owing to Sickness or Industrial Injury

The Table opposite shows the numbers of insured persons in the various Regions of England, in Scotland and Wales, and in Great Britain as a whole, who were absent from work owing to sickness or industrial injury on 19th June and 15th May, 1951, with the corresponding figures for 20th June and 16th May, 1950. The statistics have been compiled by the Ministry of National Insurance from claims to sickness or industrial injury benefit under the National Insurance Act, 1946, and the National Insurance (Industrial Injury). Injuries) Act, 1946, respectively.

A relatively small number of claims do not result in the payment of benefit, but, because they indicate certified incapacity for work, such claims are included in the Table. Injury benefit is payable in respect of both industrial accidents and prescribed industrial diseases. The large majority of persons in receipt of industrial disablement benefit who are also incapable of work qualify for sickness benefit and are therefore included in the columns of the Table which relate to absences due to sickness and not in those relating to absences due to industrial injury.

### Work of Appointments Services

The particulars given below relate to the work of the Appoint-ments Services of the Ministry of Labour and National Service.

### **Technical and Scientific Register**

The Technical and Scientific Register operates centrally on a national basis from York House, Kingsway, London, W.C.2 (Telephone number, Temple Bar 8020), but it also has a representative in Scotland at the Glasgow District Appointments Office, 450 Sauchiehall Street, Glasgow, C.2 (Telephone number, Glasgow Douglas 7161)

the in scolarid at the Glasgow District Appendiments Onice, 450 Sauchiehall Street, Glasgow, C.2 (Telephone number, Glasgow Douglas 7161).
The Register, which is assisted by Advisory Committees composed of members of the professions concerned, provides a placing and advisory service for physicists, mathematicians, chemists (other than pharmacists), metallurgists, agriculturists, biologists and other scientists, professional engineers, architects, surveyors, town planners, estate agents and valuers. The qualification for enrolment is in general a university degree or membership of the appropriate professional institution. A register of vacancies is maintained, which includes a wide range of oversea vacancies.
The total number of persons enrolled on the Technical and Scientific Register at 18th June, 1951, was 5,467\*; this figure included 3,711 registrants who were already in work but desired a change of employment, 667 students provisionally registered, and 1,089 registrants who were unemployed.
The numbers of vacancies notified, filled, etc., between 22nd May and 18th June (4 weeks) are shown below.

cancies	outstanding at 22nd May	and another	(New ap	3,902

### **Appointments Register**

The Appointments Register is concerned with the placing of persons having professional, administrative, managerial or executive experience or qualifications, and those having technical qualifications not appropriate to the Technical and Scientific

\* This figure includes 793 registrants who were also registered at District Appointmen's Offices and 113 unemployed registrants who were also registered at Employment Exchanges.

Register. The registers are maintained at the London Appoint-ments Office and at the District Appointments Offices in the towns shown in the Table below.

The total number of persons on the registers of the Appoint-ments Offices at 18th June was 18,961\*, consisting of 17,224 men and 1,737 women. The number on the registers included 11,689 men and 1,013 women who were in employment, while 5,535 men and 724 women had registered as unemployed at some date in the preceding two months and were not known to be in employment at 19th June

at 18th June. The following Table shows the numbers of registrations at each of the Offices :—

Appoin	tments	Office		In Emp	oloyment	Unemployed		
				Men	Women	Men	Women	
London		-		4,186	483	3,410	361

Registrations of nurses and midwives are also excluded. † This column includes vacancies for which employers were willing to accept either men or women

Ministry of Labour Gazette. July, 1951

# Employment Employment Overseas in the Coal Mining Industry in May

The statistics given below in respect of employment, etc., in the coal mining industry in May have been compiled by the Ministry of Fuel and Power from information provided by the National Coal Board.

The average weekly number of wage-earners on the colliery books in Great Britain during the four weeks ended 26th May was 702,700, compared with 703,300 for the four weeks ended 28th April and 700,400 for the four weeks ended 27th May, 1950.

The total numbers who were *effectively* employed were 650,000 in May, 652,300 in April and 647,700 in May, 1950; these figures exclude wage-earners who were absent for any reason (including holidays) for the whole of any week. The Table below shows the numbers of wage-earners on the colliery books in the various Districts in May, together with the increase or decrease\* in each case compared with April, 1951, and May, 1950.

# Average Numbers of Wage-earners on Colliery Books—Analysis by Districts

Scotland	82,600	- 300	+ 500
Great Britain	702,700	- 600	+ 2,300

It is provisionally estimated that during the four weeks of May about 4,280 persons were recruited to the industry, while the total number of persons who left the industry was about 5,110; the numbers on the colliery books thus showed a net decrease of 830. During the four weeks of April there was a net increase of 390.

The average number of shifts worked per week by coal-face workers who were effectively employed was  $4 \cdot 78$  in May,  $5 \cdot 18$  in April, and  $4 \cdot 95$  in May, 1950. The corresponding figures for all workers who were effectively employed were  $5 \cdot 14$ ,  $5 \cdot 52$  and  $5 \cdot 29$ .

With regard to absenteeism in the coal mining industry, separate figures are compiled in respect of (a) voluntary absenteeism (absences for which no satisfactory reason is given) and (b) in-voluntary absenteeism (absences due mainly to sickness). The figures for May and April, 1951, and May, 1950, which are given in the next Table, represent the numbers of shifts lost through absenteeism, expressed as percentages of the total numbers of shifts that could have been worked.

### Percentages of Shifts lost through Absenteeism

is and over, and by 1st.	May, 1951	April, 1951	May, 1950
Coal Face Workers :	Thereases alternation	and and and and have	When extended
Voluntary	7.45	7.18	5.94
Involuntary	6.97	6.85	7.35
All Workers :			
Voluntary	5.40	5.32	4.36
Involuntary	6.07	6.13	6.51

For face-workers the output per man-shift worked was  $3 \cdot 14$  tons in May, compared with  $3 \cdot 18$  tons in the previous month and  $3 \cdot 11$  tons in May, 1950.

The output per man-shift calculated on the basis of all workers was  $1 \cdot 19$  tons in May; for April, 1951, and May, 1950, the figures were  $1 \cdot 22$  tons and  $1 \cdot 19$  tons, respectively.

\* "No change " is indicated by three dots. † As from 1st January, 1951, the districts shown conform to the organisation of the National Coal Board.

### UNION OF SOUTH AFRICA

According to the general index of employment compiled by the Office of Census and Statistics, the number employed in manu-facturing, transportation and mining (other than alluvial gold diggings) in January was  $1\cdot 3$  per cent. lower than in the previous month, but slightly higher than in January, 1950.

### UNITED STATES OF AMERICA

UNITED STATES OF AMERICA The number of civilians in employment as wage or salary earners in industries other than agriculture and domestic service in April is estimated by the Department of Labor to have been approxi-mately 45,937,000. This was 0.2 per cent. higher than the figure for the previous month and 7.0 per cent. higher than for April, 1950. The index figure of wage-earners' employment in manu-facturing industries (base, average of 1939 = 100) showed a decrease of 1.5 per cent. in April compared with the previous month but an increase of 12.6 per cent. compared with April, 1950. The Bureau of the Census estimate that the total number of unemployed persons at the middle of April was about 1,744,000, compared with 2,147,000 at the middle of the previous month and 3,515,000 at the middle of April, 1950.

### BELGIUM

The average daily number of persons recorded as wholly or partially unemployed during April was 187,052, compared with 185,801 in the previous month and 219,955 in April, 1950. The numbers of persons wholly unemployed included in these figures were 146,696, 154,842 and 177,987, respectively. The number of working days lost in April as a result of unemployment was over 5,240,000, compared with 4,270,000 in the previous month and nearly 6,160,000 in April, 1950.

### DENMARK

At the end of May returns received by the Danish Statistical Department from approved unemployment funds showed that 29,962, or 4.6 per cent. of a total membership of about 648,000, were unemployed, compared with  $6 \cdot 6$  per cent. at the end of the previous month and  $4 \cdot 2$  per cent. (revised figure) at the end of the may 1950. Of the total, 14,178 had been unemployed for seven days or more and the remainder had been unemployed for less than seven days or were ineligible for employment on account of are etc. of age, etc.

### GERMANY

In the Federal Republic the number unemployed at the end of May was 1,386,916, compared with 1,446,131 (revised figure) at the end of the previous month and 1,668,318 at the end of May, 1950. In the Western Sectors of Berlin the corresponding figures at the same dates were 286,744, 290,035 and 273,816.

### IRISH REPUBLIC

The number of unemployed persons on the live register of Employment Exchanges at 23rd June was 37,021, compared with 49,187 at 26th May. The decrease between the two dates is stated to be due partly to the operation of an Order made under the Unemployment Assistance Act, 1933, restricting during the period 13th June, 1951, to 23rd October, 1951, the eligibility for unemployment assistance of a particular class of persons living in rural areas. At 24th June, 1950, the number of persons on the live register was 39,881; this total is comparable with the figure for 23rd June, 1951. for 23rd June, 1951.

### NETHERLANDS

The number of persons registered at Employment Exchanges at the end of May was 69,383, of whom 46,832 were wholly un-employed, 277 were temporarily stopped and 22,274 were relief workers. At the end of the previous month the number registered was 81,633 (53,423 wholly unemployed) and at the end of May, 1950, it was 76,558 (53,338 wholly unemployed).

### NORWAY

The number of persons registered for employment who were wholly unemployed was 17,034 at the end of April, compared with 22,521 in the previous month and 10,627 in April, 1950.

### SWEDEN

Preliminary information received by the Swedish Social Board from trade unions with a total membership of about 1,003,000 showed that  $2 \cdot 2$  per cent. of their members were unemployed at the end of February, 1951, compared with  $2 \cdot 7$  per cent. at the end of the previous month and  $4 \cdot 0$  per cent. at the end of February, 1950.

### SWITZERLAND

The number of registered applicants for employment at the end of April who were wholly unemployed was 1,800 or 1.2 per thousand of the employed population (exclusive of apprentices) according to the census of 1941, compared with 4,397 or 2.9 per thousand at the end of the previous month and 9,222 or 6.1 per thousand at the end of April, 1950.

\* This regrading was the result of a decision of the National Joint Industrial Council for Local Authorities (Manual Workers) and applies to those authorities which are affiliated to the Constituent District Joint Councils. It does not apply to Glamorganshire and Monmouthshire where conditions of service are governed by other

# Index of Rates of Wages

Date

The index figure of rates of wages measures the movement, from month to month, in the level of full-time weekly rates of wages in the principal industries and services in the United Kingdom com-pared with the level at 30th June, 1947, taken as 100. The industries and services covered by the index and the method of calculation were described on page 41 of the issue of this GAZETTE for February, 1948. The index is based on the recognised rates of wages fixed by collective agreements between organisations of employers and workpeople, arbitration awards or statutory orders. The percentage increases in the various industries are combined in accordance with the relative importance of the industries, as measured by the with the relative importance of the industries are combined in accordance total wages bill in 1946. The index does not reflect changes in earnings due to such factors as alterations in working hours, or in piece-work earnings due to variations in output or the introduction of new machinery, etc.

Where necessary the figures have been revised to include changes arranged with retrospective effect or reported too late for inclusion in the current figures.

The figures, on the basis of 30th June, 1947=100, are shown in the next column.

### **DISPUTES IN JUNE**

The number of stoppages of work \* arising from industrial disputes in the United Kingdom, reported to the Department as beginning in June, was 159. In addition, 25 stoppages which began before June were still in progress at the beginning of that month. The approximate number of workers involved, during June, in these 184 stoppages, including workers thrown out of work at the establish-ments where the stoppages occurred, though not themselves parties to the disputes, is estimated at about 85,000. The aggregate number of working days lost at the establishments concerned during of working days lost at the establishments concerned, during June, was about 304,000.

### Industrial Disputes

classes or persons; 46, directly involving 7,700 workers, on other questions respecting working arrangements; and 3, directly involving 600 workers, on questions of trade union principle. Two stoppages, directly involving 11,200 workers, were in support of workers involved in other disputes.

### DISPUTES IN THE FIRST SIX MONTHS OF 1951 AND 1950

The following Table gives an analysis, by groups of industries, of all stoppages of work through industrial disputes in the United Kingdom in the first six months of 1951 and 1950 :---

### PRINCIPAL DISPUTES DURING JUNE

### U.K. Index of Retail Prices

### FIGURES FOR 19th JUNE, 1951

At 19th June the retail prices index was 125 (prices at 17th June, 1947 = 100), compared with 124 at 22nd May and with 114 at 13th June, 1950. The rise in the index during the month under review was mainly due to higher prices for some articles of food, and to increases in the prices of many articles of clothing. of food, and to increases in the prices of many articles of clothing. The interim index of retail prices measures, for the United Kingdom, the average changes, month by month, in the prices of the goods and services which entered into working-class expenditure before the war, the goods and services covered being those recorded in family budgets collected during 1937-38. The index started from 17th June, 1947 (taken as = 100), and measures the changes in the prices of these goods and services from that date. As some goods and services are much more important than others, the relative changes, since 17th June, 1947, in the price levels of the various items included are combined by the use of "weights". These "weights " represent the proportions in which these items entered into working-class expenditure in 1937-38, adjusted to take account of the broad changes in prices between 1937-38 and mid-June, 1947. mid-June, 1947.

The price comparisons used in compiling the index figures relate to a fixed list of items, and steps are taken to ensure that, so far as possible, the index figures reflect real changes in price levels but not changes in the prices quoted which are attributable to variations in quality.

The following Table shows the indices at 19th June, 1951, for each of the main groups of items and for all the groups combined, together with the relative weights which are used in combining the group indices into a single "all items" index :---

	GROUP		101	INDEX 1 19th J	WEIGH		
I.	Food		0.2.5	136	(135.9)	Againer	348
	Rent and rates			104	(103.8)		88
	Clothing	12 . Same		139	(138.6)	in the sa	97
IV.	Fuel and light	1	1	126	(125.6)		65
V.	Household dur	able go	oods	134	(134.2)	3	71
VI.	Miscellaneous g	oods		130	(130.4)		35
	Services			117	(116.8)	Dan 1	79
VIII.	Drink and toba	cco		107	(106.8)	1 de tar	217
	All items			125	(124.5)	an training a	1,000

The group indices, as calculated to the nearest first place of decimals, are shown in brackets in the above Table because these are the figures to which the weights have been applied for the purpose of computing the "all items" index. These decimal figures are shown only in order that, if desired, calculations may be made of the effect of combining particular groups and excluding others.\* The information available as to price changes, however, is such that no precise significance can be attributed to the decimals, and for any other purpose, therefore, the figures should be used to the nearest whole number.

#### Food

Between 22nd May and 19th June there were increases in the average prices of apples, potatoes, tea and flour, but the average prices of tomatoes and green vegetables, rabbits and some kinds of fish declined. For the food group as a whole there was a small rise in the level of prices, amounting to less than one-half of 1 per cent., but this was sufficient to raise the index, when expressed to the nearest whole number form 125 at 22nd Meru 126 at to the nearest whole number, from 135 at 22nd May to 136 at 19th June.

### Clothing

During the month under review increases were reported in the prices of many articles of clothing, but most of these increases were small. The articles mostly affected were knitted wear and men's outer clothing. There was a fall in the average price of knitting wool. For the clothing group as a whole the level of prices rose by about  $1\frac{1}{2}$  per cent. and, expressed to the nearest whole number, the index figure was 139 at 19th June, compared with 137 at 22nd May.

### **Fuel and Light**

Lower summer prices for coal came into force on 1st June and the average price of coal fell by nearly 3 per cent., but the effect of this reduction was partly offset by an increase in the price of coke, by higher charges for gas in a few areas and by an increase in the average price of candles. The latter increase followed a rise of 3d. per lb. in the maximum permitted price. For the fuel and light group as a whole the level of prices fell by about 1 per cent. and the index figure, expressed to the nearest whole number, was 126 at 19th June, compared with 127 at 22nd May.

### Household Durable Goods

There were small increases, during the month under review, in the average prices of sheets, blankets, towels, curtain material and some articles of furniture and household appliances. For the household durable goods group as a whole the average rise in prices was nearly 1 per cent. and the index figure, expressed to the nearest whole number, was 134 at 19th June, compared with 133 at 22nd May.

\* The combination of any two or more group indices is effected by multiplying the respective indices by their corresponding weights and dividing the sum of the resulting products by the sum of the weights used.

### Ministry of Labour Gazette. July, 1951

#### Services

In the group covering various services the index for the travel section showed a small rise as a result of increases in bus or tram fares in a few areas. There were also small increases in the average charges for boot and shoe repairs and for men's hairdressing. For the group as a whole the level of charges rose by less than one-half of 1 per cent., but this was sufficient to raise the index figure, when expressed to the nearest whole number, by 1 point from 116 at 22nd May to 117 at 19th June.

### Other Groups

In the three remaining groups covering rent and rates, miscel-laneous goods, and drink and tobacco, respectively, there was little change in the level of prices during the month under review. The index figures for these groups, expressed to the nearest whole number, were 104, 130 and 107, respectively, each of these figures being the same as at a month earlier.

### FIGURES FOR 1947-51

The Table below shows the index figures for "all items" and for food from June, 1947, onwards. The figures normally relate to the Tuesday nearest to the 15th of each month.

### Fatal Industrial Accidents

The number of workpeople (other than seamen) in the United Kingdom whose deaths from accidents in the course of their employment were reported in June was 105, compared with 203 (revised figure) in the previous month and 123 (revised figure) in June, 1950. In the case of seamen employed in ships registered in the United Kingdom, 12 fatal accidents were reported in June, compared with 16 in the previous month and 29 in June, 1950. The figures below show the progress made under the Further Education and Training Scheme (a) during the quarter ended 30th June, 1951, and (b) during the period since the inception of the Scheme in April, 1943, up to 30th June, 1951. figures for separate industries are given below for June, 1951.

## Vocational and Disabled Training

The statistics of the Vocational and Disabled Training Schemes given below relate to the four weeks ended 28th May, 1951. The number of applicants admitted to training during the period was 475, and 3,801 persons were in training at the end of the period. The latter figure included 3,227 males and 574 females ; of the total 2,737 were disabled persons. During the period 518 trainees were placed in employment. An analysis of these figures is given in the Table below. is given in the Table below

### **Conditions of Employment and National Arbitration Orders**

### National Arbitration Tribunal Awards

During June the National Arbitration Tribunal issued 13 awards. Nos. 1677 to 1689\*. Ten of the awards are summarised below; the others related to individual employers.

Award No. 1678 (5th June) .- Parties : Members of the Fibre Textile Accessories Manufactures' Association, and members of the National Union of Leather Workers and Allied Trades in their employment. *Claim*: For a further workers and Anied Thades in their employment. *Claim*: For a further week's holiday with pay and for higher starting rates for non-productive workers. *Award*: In their *Award No.* 1589 dated 9th January, 1951 (*see* the issue of this GAZETTE for February, page 84), the Tribunal awarded an increase of 1d on hour in theorem. of 1d. an hour in the rates of non-productive workers and referred back to the parties for settlement by negotiation the claim for a week's holiday. The parties were unable however to reach agree-ment and the Tribunal were requested to determine the issue. In their Award No. 1678 the Tribunal awarded an additional week's holiday with pay with effect as from the annual holiday period for 1951

Award No. 1679 (5th June) .- Parties : Members of the Motor Agents' Association Ltd., which comprises the Employers' Side of the National Joint Industrial Council for the Motor Vehicle Retail and Repairing Trade, and members of the trade unions constituting the Workpeoples' Side of the Council in their employment. *Claim*: For an additional week of paid annual holiday. *Award*: The Tribunal found in favour of the claim with effect as from the beginning of the annual holiday period for 1952

Award No. 1680 (6th June).—Parties: Members of the North East and East Coast Master Riggers' and Ship Transporters' Association, and members of the National Union of General and Municipal Workers employed by them as riggers and lumpers. Claim: For a minimum rate of 21s. a day and for certain specified conditions of employment. Award: The Tribunal awarded that the minimum rate of wages of the workers concerned should be 21s. a day. The Tribunal also awarded certain conditions of employment for details of which reference should be made to the employment, for details of which reference should be made to the award

Award No. 1681 (6th June) .- Parties : Members of the North East and East Coast Master Riggers' and Ship Transporters' Association, and members of the National Union of General and Municipal Workers in their employment. *Matter in dispute*: The dispute arose out of a difference regarding the deduction to be made from the daily rate of pay when a transportation is begun during the day's work. *Award*: The Tribunal found against the claim of the employers for a change in the present basis of payment.

Award No. 1682 (11th June) .- Parties : Members of the Buffalo Picker Manufacturers' Association, and members of the Amalga-mated Society of Leather Workers and Kindred Trades in their ent. *Claim*: For an additional week's holiday with pay. The Tribunal found in favour of the claim with effect employment. from 1951 onwards.

from 1951 onwards. Award No. 1683 (11th June).—Parties : Members of the Surgical Instrument Manufacturers' Association (Inc.), and members of the National Union of Furniture Trade Operatives in their employment. Claim : That the terms of a specified agreement relating to artificial limb workers should be applied to orthopædic appliance makers. Award : The Tribunal awarded that the terms of the agreement dated 30th March, 1951, between the Surgical Instrument Manufacturers' Association (Inc.) and the National Union of Furniture Trade Operatives should be applied to orthopædic appliance makers as from 1st July, 1951. appliance makers as from 1st July, 1951.

Approace makers as from 1st July, 1951. Award No. 1685 (15th June).—Parties: Members of the Sunderland Tugowners' Association, and members of the National Union of General and Municipal Workers employed by them as tugboatmen. Claim: For an increase in wages and certain variations in conditions of employment. Award: The Tribunal awarded that the basic wages of the workers concerned should be increased by 12s. 6d. a week. The Tribunal also awarded certain variations in the existing conditions of employment, for details of which reference should be made to the award. Award No. 1686 (18th June). Parties: Markars of the H H

Award No. 1686 (18th June).—Parties: Members of the Hull Fish Merchants' Protection Association Ltd., and members of the Transport and General Workers' Union and of the National Union of General and Municipal Workers employed by them in fish curing houses. Claim: For an increase of 15s. a week in the minimum rates for adult males, a substantial increase in those for adult females with corresponding increase in those for adult females, with corresponding increases in those for juveniles. *Award*: The Tribunal awarded the following increased minimum weekly rates of wages :—Males : unskilled workers 21 and over 110s.; filleters and motor drivers 125s.; splitters 135s.; night

\* See footnote \* in first column on page 302.

smokers/chargehands 125s.; assistant night smokers 110s.; un-skilled boys and youths 40s. a week at age 15 rising to 94s. at age 20. Females : herring splitters and regular fish washers 81s. 6d.; unskilled workers 36s. a week at age 15 rising to 75s. at age 20 and over.

Award No. 1688 (22nd June).—Parties : Members of the Grimsby Ship Repairers' Association, and members of the United Society of Boilermakers and Iron and Steel Shipbuilders in their employment. *Claim* : For the payment of certain specified increased rates of wages to various classes of skilled workers when employed on work which cannot be related to piece work prices Award : The which cannot be related to piece work prices. AwTribunal found that the claim had not been established. Award : The

Award No. 1689 (27th June) .- Parties : Members of the Linoleum and Felt Base Employers' Federation, and members of the National Union of General and Municipal Workers in their employment. For a shorter working week and for an extension of the paid annual holiday from one to two weeks. Award: The Tribunal awarded that as from the beginning of the first full pay week following 1st August, 1951, the normal working week should be reduced to 45 hours without reduction in pay. The Tribunal also awarded two weeks' annual holiday with pay with effect as from the beginning of the annual holiday period for 1952.

### National Arbitration Tribunal (Northern Ireland) Awards

Since the last issue of this GAZETTE was prepared the National Arbitration Tribunal (Northern Ireland) issued four awards, none of which related to a substantial part of an industry.

### **Civil Service Arbitration Tribunal**

During June the Civil Service Arbitration Tribunal issued two awards, Nos. 152 and 153\*, which are summarised below.

Award No. 152 (26th June).—Parties : The Civil Service Radio Officers' Association and the Air Ministry. Claim : For an increase in scales of pay of radio mechanics Class I and Class II ; for a In scales of pay of radio mechanics Class I and Class II; for a common scale of pay to apply to both Class I and Class II mechanics and for the scale to be expressed as an annual scale instead of a weekly scale. *Award*: The Tribunal awarded that the existing scales should be increased by 10s, a week at all points for radio mechanics Class I, and by 7s. a week at all points for radio mechanics Class II, effect to be given to the award as from 1st February, 1951, except that overtime payment should be excluded from such retrospection. The Tribunal found against the remainder of the claim and awarded accordingly.

Award No. 153 (28th June).—Parties: The Institution of Professional Civil Servants and the Lords Commissioners of H.M. Treasury. Claim: That the London salary scale for estab-lished male senior assistant (scientific) should be £520 by £25 to £675, the new scale to operate from 1st February, 1951. Award : The Tribunal awarded that as from 1st July, 1951, the scale should be £480 by £20 to £500 by £25 to £650 subject to the usual arrangements for provincial differentiation.

### Industrial Courts Act, 1919, and **Conciliation Act**, 1896

### **Industrial Court Awards**

During June the Industrial Court issued six awards, Nos. 2326 to 2331. One of these awards was an interpretation of an earlier award; the remaining five are summarised below.

Award No. 2326 (7th June) .- Parties : Staff Side and Manage-Award No. 2326 (7th June).—Parties : Staff Side and Manage-ment Side of the Whitley Councils for the Health Services (Great Britain) Professional and Technical Council "B". Claim : For determination of a difference as to payment of medical laboratory technicians employed in the Blood Transfusion Centres when such technicians undertake "on call" or "stand by" duties outside their normal hours of work. Award : The Court awarded that, as from the beginning of the first full pay period following 7th June, the technicians covered by the claim should be paid, irrespective of grade, a night duty allowance of 10s. when undertaking "stand by" duty overnight at the Centre and 10s. in respect of equivalent duty overnight at the Centre and 10s. in respect of equivalent spells of stand by" duty at the Centre during the day time at week-ends outside normal working hours. Work done as a result of an emergency call during "stand by" duty at the Centre or during "stand by" or "on call" duty at home should be paid 7s. 6d. for the first hour or part thereof and at the rate of 5s. for each ent hour, travelling time to and from home or Centre to be included.

\* See footnote \* in first column on page 302.

#### Ministry of Labour Gazette. July, 1951

Award No. 2328 (13th June) .- Parties : Staff Side and Management Side of the Whitley Councils for the Health Services (Great Britain), Professional and Technical Council "A". *Claim*: For determination of a difference as to the salaries which should apply to physiotherapists, remedial gymnasts, therapeutic dietitians, speech therapists, orthoptists, almoners and psychiatric social workers. Award: The Court noted that the present salaries of the medical auxiliary staff concerned have been in operation since 1948 or earlier—in some cases since as long ago as 1946 and also that, though based upon different considerations, each Side of the Council holds the view that the present salary structure for these grades needs revision and adjustment. It appeared to the Court that a considerable time must elapse before such revision and adjustment could be completed. In these circumstances the Court awarded that as from 1st April, 1951, the present scales of the grades concerned in the claim should be increased by £50 at all points and in any negotiations which might hereafter take place for the alteration of the scales due regard should be had to the increases awarded. The Court were of opinion that the question of a London weighting allowance ought only to be decided in conjunction with the general consideration of salary structures and, without prejudice to the principle of such an allowance, found against that part of the claim and awarded accordingly.

Award No. 2329 (19th June) .- Parties : Staff Side and Manage-Award No. 2329 (19th June).—Parties : Staff Side and Manage-ment Side of the Whitley Councils for the Health Services (Great Britain) Professional and Technical Council "A". Claim : For determination of a difference as to the salaries which should be paid to biochemists and physicists employed in laboratories and scientific departments of hospitals within the Health Service. Award : The Court awarded the following salary scales, without mainding to the writing salary of any officer in past assimilation Award : The Court awarded the following salary scales, without prejudice to the existing salary of any officer in post, assimilation to be a matter for negotiation between the parties :—Provincial Scales. Basic Grade—Probationary period, (a) with 1st or 2nd Class Honours degree £425 by £25 to £475, (b) other entrants £375 by £25 to £475 (where applicable, plus one increment for each completed year of post-graduate study in either case); after probationary period £550 by £30 to £730. Senior Grade—£800 by £40 to £1,080. Principal Grade—£1,125 by £50 to £1,375. Top Grade—Salary scale to have four increments of £75; commencing salary to be fixed by the employing authority according to the Grade—Salary scale to have four increments of  $\pounds75$ ; commencing salary to be fixed by the employing authority according to the responsibilities of the post, subject to agreement of the Minister of Health/Secretary of State for Scotland, provided that it shall be at least £1,425. The following additions per annum to be made to the scales in the Metropolitan Area and City of London :— Salaries up to and including £760—Age 21–25 £20; 26 and over £30; £761 to £800 (inclusive) £30; £801 to £1,000 (inclusive) £40; over £1 000 £50 over £1,000 £50.

Award No. 2330 (19th June).—Parties : The Midland Wholesale Meat Supply Association Ltd., and the Union of Shop, Distributive and Allied Workers. Claim : To determine (a) a claim by the employers that the work of allocators in connection with the export of meat outside the Midland Association Area forms part of their normal duties; (b) a claim by members of the trade union that the work of allocators in connection with the handling of that the work of allocators in connection with the handling of meat for export outside the Midland Association Area is an additional duty; (c) whether or not the interchangeability of allocators and scalesmen clerks as between scales within a depot and as between depots and/or scales within a depot and as between depots and/or scales within the Birmingham Market is a normal condition of their service. Award : The Court were unable to say that the work of allocators in connection with the export of meat outside the Midland Association Area forms part of their normal duties. With regard to part (c) of the terms of reference, the Court found that interchangeability of allocators and scalesmen clerks as between scales within a depot and as between depots and/or scales within the Birmingham Market was a normal condition of their service. The Court awarded accordingly.

Award No. 2331 (21st June).—Parties : The Transport Salaried Staff's Association of Great Britain and Ireland, and the Railway Executive. Claim : To determine the right of the Railway Executive to take into consideration dependants' benefits in addition to the individual's personal benefit payable under the National Insurance Act, 1946, when calculating payments to railway salaried staff absent owing to sickness. *Award*: The Court were unable to find that there was any agreement the terms of which deprived the Railway Executive of the right to take into consideration dependants' benefits in addition to the individual's personal benefit payable under the National Insurance Act, 1946, when calculating payments to railway salaried staff absent owing to sickness. The Court awarded accordingly.

### Single Arbitrators and ad hoc Boards of Arbitration

During June four awards, one of which related to an individual undertaking, were issued by Single Arbitrators appointed under the Industrial Courts Act, 1919. The remaining awards, including one under the Conditions of Employment and National Arbitration Orders, 1940-1950, are summarised below.

(1) Parties: National Union of Leather Workers and Allied Trades and the Fibre Textile Accessories Manufacturers' Association. Claim: Whether the three months' notice of variation of a wages agreement concluded on 26th February, 1951, should be permissible at three months or only at the conclusion of the six months' period. Award: The Arbitrator decided that six months should elapse before any variation of the agreement was made.

(2) Parties : United Society of Boilermakers and Iron and Steel Shipbuilders and the Iron and Steel Trades Confederation. Claim : The objection by the Society to the continued employment in a particular repair shop of burner erectors of the Confederation as

not being recognised craftsmen. Award : The Arbitrator decided that the claim of the Society had no validity.

(3) Parties: Joint Committee of Light Metal Trades Unions and the National Light Castings Ironfounders' Federation. Claim: Whether certain unskilled male adult time workers were entitled to an advance of 8s. a week under a National Wages Settlement of 1950. Award: Claim not established.

### Wages Councils Acts, 1945-1948

### Notices of Proposal

During June notices of intention to submit to the Minister of Labour and National Service wages regulation proposals were issued by the following Wages Councils :—

Hairdressing Undertakings Wages Council (Great Britain).— Proposal H.U.(7), dated 1st June, for fixing revised minimum remuneration for male and female workers.

Paper Bag Wages Council (Great Britain).—Proposal P.(49), dated 31st May, for fixing revised general minimum time rates for male and female workers and piece work basis time rates for female workers employed on piece work.

Paper Box Wages Council (Great Britain).-Proposal B.(47), dated 1st June, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

Retail Furnishing and Allied Trades Wages Council (Great Britain).—Proposal R.F.A.(9), dated 8th June, for fixing revised minimum remuneration for male and female workers.

Perambulator and Invalid Carriage Wages Council (Great Britain).—Proposal I.(50), dated 12th June, for fixing revised general minimum time rates and piece work basis time rates for male and female workers.

Laundry Wages Council (Great Britain).—Proposal W.(66), dated 22nd June, for fixing revised general minimum time rates and piece work basis time rates for male and female workers. Further information concerning any of the above proposals may be obtained from the Secretary of the Council in question, at Ebury Bridge House, Ebury Bridge Road, London, S.W.1.

### Wages Regulation Orders

During June the Minister of Labour and National Service made the following Wages Regulation Orders\* giving effect to the proposals submitted to him by the Wages Councils concerned :—

The Rubber Manufacturing Wages Council (Great Britain) Wages Regulation (Holidays) Order, 1951 : S.I. 1951 No. 1080 (R.U.(34)), dated 20th June and effective from 6th July. This Order prescribes revised provisions for the allowance of holidays and holiday remuneration

The Milk Distributive Wages Council (England and Wales) Wages Regulation (Holidays) Order, 1951: S.I. 1951 No. 1087 (M.D.(62)), dated 22nd June and effective from 11th July. This Order prescribes the annual holidays to be allowed to all workers for whom statutory minimum remuneration has been fixed and fixes payment for such holidays.

The Rubber Reclamation Wages Council (Great Britain) Wages Regulation Order, 1951 : S.I. 1951 No. 1102 (R.R.(27)), dated 25th June and effective from 16th July. This Order prescribes new minimum time rates and amends the current Order relating to holidays and holiday remuneration.

The Retail Food Trades Wages Council (England and Wales) Wages Regulation Order, 1951: S.I. 1951 No. 1103 (R.F.C.(9)), dated 25th June and effective from 18th July. This Order prescribes revised minimum remuneration for male and female workers.

The Retail Drapery, Outfitting and Footwear Trades Wages Council (Great Britain) Wages Regulation (No. 2) Order, 1951: S.I. 1951 No: 1114 (R.D.O.(10)), dated 26th June and effective from 23rd July. This Order prescribes revised minimum remunera-tion for male and female workers.

The Retail Newsagency, Tobacco and Confectionery Trades Wages Council (Scotland) Wages Regulation (Amendment) Order, 1951: S.I. 1951 No. 1115 (R.N.T.S.(8)), dated 26th June and effective from 16th July. This Order amends the current order fixing statutory minimum remuneration for workers in relation to whom the Wages Council operates and prescribes revised minimum remuneration for male and female workers.

### Wages Councils Act (Northern Ireland), 1945

### Notices of Proposal

During June notices of intention to submit to the Ministry of Labour and National Insurance wages regulation proposals were issued by the following Wages Councils :—

Linen and Cotton Handkerchief and Household Goods and Linen Piece Goods Wages Council (Northern Ireland).—Proposal N.I.H.H.G. (N.106), dated 22nd June, relating to the fixing of revised general minimum time rates, piece work basis time rates and general minimum piece rates for male and female workers.

Wholesale Mantle and Costume Wages Council (Northern Ireland).—Proposal N.I.W.M. (N.30), dated 22nd June, relating to the fixing of revised general minimum time rates and piece work basis time rates for male and female workers.

\*See footnote \* in first column on page 302.

Paper Box Wages Council (Northern Ireland).—Proposal N.I.B. (N.46), dated 29th June, relating to the fixing of revised general minimum time rates for male and female workers, and the piece work basis time rate and general minimum piece rates for nale workers.

Baking Wages Council (Northern Ireland).—Proposals N.I.Bk. (N.142) and N.I.Bk. (N.143), dated 29th June, relating to the fixing of revised general minimum time rates and overtime rates

Further information concerning any of the above proposals may be obtained from the Secretary of the Council concerned, at Tyrone House, Ormeau Avenue, Belfast.

### Wages Regulation Orders

During June the Ministry of Labour and National Insurance made the following Wages Regulation Order\* giving effect to the proposals made by the Wages Council concerned.

The Dressmaking and Women's Light Clothing Wages Council (Northern Ireland) Wages Regulation (No. 2) Order, 1951 (N.I.W.D. (N.65)), dated 31st May, and effective from 11th June. This Order prescribes increases in general minimum time rates and piece work basis time rates for female workers in the retail branch of the trade.—See page 290.

### **Catering Wages Act**, 1943

### **Notices of Proposal**

During June notices of intention to submit to the Minister of Labour and National Service wages regulation proposals were issued by the following Wages Boards :---

Licensed Non-Residential Establishment Wages Board.-Proposal (L.N.R.(21)), dated 19th June, for amending statutory minimum remuneration relating to overtime and holidays with pay for workers (other than managers and club stewards) who ordinarily work for the employer for less than 18 hours a week.

Licensed Non-Residential Establishment Wages Board.-Proposal (L.N.R.(22)), dated 19th June, for amending statutory minimum remuneration (i) for the wife of a club steward who carries out his duties while he is absent on holiday and (ii) relating to overtime

#### Ministry of Labour Gazette. July, 1951

and holidays with pay for club stewards, club stewardesses and the wives of club stewards who ordinarily work for the employer for less than 18 hours a week.

Licensed Residential Establishment and Licensed Restaurant Wages Board.—Proposal (L.R.(13)), dated 22nd June, for fixing revised weekly minimum remuneration for male and female workers.

### Wages Regulation Orders

During June the Minister of Labour and National Service made the following Wages Regulation Orders\* giving effect to the proposals made to him by the Wages Boards concerned :---

The Wages Regulation (Licensed Residential Establishment and Licensed Restaurant) Order, 1951: S.I. 1951 No. 1031 (L.R.(12)), dated 11th June and effective from 1st July. This Order prescribes statutory minimum remuneration and holidays and holiday remuneration and includes revised minimum remuneration for night porters and provisions regarding payment for spreadover of hours of work, for time worked on customary holidays and on rest days, and for the temporary performance of higher grade work.

The Wages Regulation (Industrial and Staff Canteen Undertakings) Order, 1951 : S.I. 1951 No. 1156 (I.S.C.(19)), dated 28th June and effective from 25th July. This Order prescribes revised minimum remuneration for male and female workers and includes provisions as to holidays and holiday remuneration.

### **Agricultural Wages Act**, 1948

### Orders relating to Wages, etc., in England and Wales

The following Orders were made on 6th June, with effect on 10th June, 1951, by the Agricultural Wages Board for England and

(1) No. 1829 determines new values at which, for the purposes of minimum rates of wages fixed under the Act, board and lodging may be reckoned as payment of wages in lieu of payment in cash for workers employed in agriculture in England and Wales.

(2) No. 1830 varies the values at which board and lodging may be reckoned as a benefit or advantage in lieu of payment of wages in cash for male and female inexperienced workers, other than wives, sons and daughters of agricultural workers, during their first two months of employment in agriculture in England and Wales.

### Decisions of the Commissioner under the National Insurance Acts, 1946-1949

The Commissioner is a judicial authority independent of the Ministry of National Insurance and appointed by the Crown (see Section 43 of the National Insurance Act, 1946, and Section 42 of the National Insurance (Industrial Injuries) Act, 1946). His decisions† are final.

Appeals to the Commissioner under the National Insurance Acts may be made by an insurance officer, or by an association of which the claimant is a member, or by the claimant himself with the leave of the tribunal or the Commissioner, or without such leave if the decision of the local tribunal was not unanimous.

Appeals to the local tribunal was not unanimous. Appeals to the Commissioner under the Industrial Injuries Acts may be made by an insurance officer, or by a person whose right to benefit is or may be, under the Fourth Schedule to the 1946 Act, affected by the decision, or by an association of which the claimant or the deceased was a member or by the claimant himself. No appeal may be made without the leave of the tribunal or of the Commissioner of the Commissioner

A recent decision of general interest is set out below.

### Decision No. R(U) 10/51 (28th May)

Decision No. R(U) 10/51 (28th May) Regulations 14B (2) (d) of S.I. 1948 No. 1467 as amended by S.I. 1949 No. 301 : Whether claimant and 21 other share fishermen had proved that there was no work available on or in connection with their vessels and in particular whether there was good cause which necessitated abstention from fishing : All the vessels remained in port under an agreement to that effect by all the masters of the local vessels or their representatives because it was not considered that prices fixed by the authorities for fish they would catch would provide reasonable return for work done by share-fishermen. Commissioner rules that willingness on part of individual fishermen to go to sea is not effective to support their claims : Then he considers certain other special grounds of appeal raised by certain claimants : On general ground of claims, Commissioner holds that in circumstances of case the decision of claimants' Associa-tion to abstain from fishing because of their inability to obtain prices demanded disallowed.

"My decision is that for the period in question the claimant was not entitled to receive unemployment benefit in respect that the additional conditions prescribed by Regulation 14B of the National Insurance (Mariners) Regulations, 1948 [S.I. 1948 No. 1467], as amended by the National Insurance (Mariners) Amendment Regulations, 1949 [S.I. 1949 No. 301], were not satisfied satisfied.

"The claimant's case has been appealed as a test case, the decision being applicable to his claim and the claims of 21 other share fishermen fishing from the port of P. There are before me, however, appeals in a very considerable number of other cases relating to claims by share fishermen for unemployment benefit

#### \* See footnote \* in first column on page 302.

† Selected decisions of the Commissioner are published periodically in the following series :--Series "R(U)"--decisions on unemployment benefit; Series "R(P)"--decisions on retirement pensions; Series "R(S)"--decisions on sickness benefit; Series "R(G)"--decisions on guardian's allowance, maternity benefit; death grant and widow's benefit; Series "R(I)"--decisions on all benefits and on any other questions arising under the Industrial Injuries Acts. Applications and enquiries should be addressed to H.M. Stationery Office at any of the addresses shown in the second column on page 302.

for the same period-the claims in most cases having been disallowed by the local tribunals but in some cases allowed. In all the cases under appeal the vessels on which the claimants under normal conditions would have been at sea remained in the local harbours under an agreement to abstain from fishing in accordance with a decision to that effect by all the masters of the local vessels or their representatives. It is maintained by or on behalf of the claimants that the abstention from fishing so arranged was 'necessitated' in the sense of Regulation 14B(2)(d) of the regulations aboveunder which share fishermen would have had to engage in fishing and that accordingly 'good cause' within the meaning of sub-paragraph (d) of Regulation 14B(2) had been shown for the paragraph (a) of Regulation 14B(2) had been shown for the abstention. So far as the claims before me are based on that ground alone, they all fall to be disallowed in accordance with my decision in the present case but in some of the cases additional grounds of appeal were submitted and it is convenient to refer to those specialties now.

to those specialties now. "In quite a number of cases an additional argument was submitted for a claimant as a member of the crew of a fishing vessel to the effect that he was 'prepared to go to sea' during the period in question but was prevented by the decision that none of the fishing vessels should engage in fishing. But the point is not effective to support the claims referred to. For all the claimants in all we have a superior of the fishing and the superior of the members. cases covered by the appeals before me were masters or members of the crews of fishing vessels 'of which either the master or a of the crews of fishing vessels of which either the master of a member of the crew is owner or part owner ' and accordingly all the claimants who were members of any of the crews require to satisfy the condition prescribed by Regulation 14B(2) that ' there was no work on or in connection with the fishing vessel available for them on the days in question for one or other of the reasons stated in sub-paragraphs (a), (b), (c) and (d)'. The only sub-paragraph relied on is sub-paragraph (d) and proof of willingness on the part of individual members of the crew to go to see would not show of individual members of the crew to go to sea would not show, what is clearly required by the terms of sub-paragraph (d), that the vessel had not been engaged in fishing for a reason that constituted good cause

Another additional and special ground of appeal was submitted "Another additional and special ground of appeal was submitted on behalf of claimants who are described as members of 'the black squad', that is men who although members of crews are engaged in a special capacity—engineman, fireman or cook. It is main-tained on their behalf that they are not share fishermen as they do not receive a share of profits like ordinary members of the crew. But information obtained at my request and now before me shows that as members of the crew they are 'remunerated in part by a share in . . the gross earnings of the fishing vessel', and accord-ingly they are covered by the definition of 'share fisherman' in the Regulations. the Regulations.

The only other special ground of appeal is one applicable only to claimants who were masters or members of the crew of two vessels, the 'G.R.' and the 'C'. In the earlier stages of the cases those claimants had relied only on the general ground of

\* See footnote \* in first column on page 302.

### Ministry of Labour Gazette. July, 1951

claim, but in the present appeals it is submitted on their behalf that, as regards the period during which the agreement not to fish that, as regards the period during which the agreement hot to hish was in operation, or at any rate part of it, the condition stated in sub-paragraph (b) prevailed, as the vessels were undergoing repairs and there was no work available for them. This ground of appeal— which is supported as regards the claimants to whom it relates by the insurance officer concerned with the appeals-will be more conveniently dealt with in dealing with the appeals in which it is submitted

"In explaining the circumstances, relating to what may be called the general ground of claims, which led to the agreement to abstain from fishing for the period in question, I feel that I need do no more than state that the share fishermen were dissatisfied with the price conditions prevailing and that as they failed to obtain from the responsible authorities price conditions which, as they maintained, were necessary to make their fishing 'economic' in the sense that they would give a return for their work that could be regarded as reasonable, the decision to stop fishing already mentioned was come to. The question for consideration under the general ground of claim is whether the maintenance of those price conditions described as 'uneconomic'—in view of the evidence before me of the resulting yield to the masters and crews of the vessels constituted good cause for abstention from fishing within the meaning of sub-paragraph (d) for the period in question.

"In relation to all the cases before me against disallowance of benefit the appeals are taken by the Scottish Herring Producers Association, and their solicitors have submitted two financial statements for the 'G.R.' which I have been informed may be regarded as 'typical' for all. One statement relates to a period of 14 weeks and the other to one of 6 months, but in relation to the grounds of my decision it will suffice to take the effect of the figures for the shorter period as summarised in the statement of ounds of appeal by the claimant's Association. It is there stated this means that each member of the crew received rather less in all than £3 a week' for the period covered by the statement, but the meaning and scope of sub-paragraph (d) of the Regulations, in my judgment, make a difference between average earnings for a member of a crew of  $\pounds 3$  a week for the period of abstention and (say) £6 or £8 an irrelevant consideration in relation to the appeals efore me. I do not assume that 'market conditions never constitute 'other good cause necessitating abstention from if their vessel had brought in fish the fish *could not have been sold*. But, making the opposite assumption, I find it impossible to interpret the terms of sub-paragraph (d) as entitling me to allow unemployment benefit on proof that on a particular day or for a period a vessel or a number of vessels remaining in port could not by putting to sea have obtained a catch or catches that on market prices would have yielded a weekly wage exceeding (say) £2 a week for each member of a crew (after allowing for expenses). I express that opinion of course without any reference to the question whether conditions giving such a result would be fair, but simply on the view that on consideration of Regulation 14B as a whole and the terms of sub-paragraph (d) I think that it is clear that it was not intended or contemplated that the statutory authorities should entertain and dispose of claims based on such a ground—even if it could be regarded as practicable for them to do so. (Some of the practical difficulties were indicated in the course of Commissioner's decision C.S.U. 1/50 (unreported) and that aspect of the matter need not be elaborated.) The opposite view of the scope of sub-paragraph (d) would contemplate the somewhat embarrassing situation of the statutory authorities under the National Insurance Act, 1946, disapproving in effect of the price conditions fixed for share fishermen—by a body with special qualifications and holding special authority to do so—as conditions calculated to ensure for them a fair return for their labour. Apart, however, from such considerations such an interpretation of sub-paragraph (d) would give it a meaning and effect in violent contrast to the meaning and effect of the other sub-paragraphs (a), (b) and (c) of Regulation 14B(2). For those provisions plainly contemplate and provide that there will be days and that there may be periods when unemployment benefit will not be payable although, after a vessel has put to sea (and whether it has engaged in fishing or not) or during a period in which the vessel has not put to sea because of repairs, the master and crew earn nothing—or their earnings are small or negligible. Again although it would not be reasonable small of hegigible. Again although it would not be reasonable to confine the application of sub-paragraph (d) to circumstances which made abstention from fishing legally or from a practical standpoint compulsory—for example (in some circumstances) in respect of prohibition by an order of the Government or in respect of a case of smallpox amongst the crew—the use of the word necessitated ' is, I feel, of some significance in relation to the contention that the sub-paragraph was intended to cover or could reasonably be read as covering abstention by agreement of the crew of a vessel, or—as in the cases before me—the crews of a number of vessels, on the ground that they regarded the price conditions prevailing, whether under free market conditions or under conditions wholly or partly controlled, as so discouraging as to justify abstention from fishing. In that connection it must of course be kept in view, as I have already indicated, that the question for my decision is not whether the price conditions were fair, but whether the decision of the Association to abstain because of their inability to obtain the prices which they demanded constituted 'good cause' which 'necessitated abstention from fishing' within the meaning of Regulation 14B(2)(d). On any reasonable interpretation of the terms and scope of the sub-paragraph I am satisfied that it did not. Accordingly I disallow the appeal of the claimant's

### STATUTORY INSTRUMENTS

Since last month's issue of this GAZETTE was prepared, the undermentioned Statutory Instruments,\* relating to matters with which the Ministry of Labour and National Service are concerned, either The formula of the series of statutory and reaction of the series of statutory instruments. The list also includes certain Regulations, etc., published in the series of Statutory Rules and Orders of Northern Ireland, additional to those contained in the lists appearing in previous issues of the GAZETTE.
