Government Statistical Service

A service of statistical information and advice is provided to the Government by specialist staffs employed in the statistics divisions of individual Departments. Statistics are made generally available through their publications and further information and advice on them can be obtained from the Departments concerned. Enquiries about this publication should be made to the Directorate of Statistics, Department of the Environment, 2 Marsham Street, London SW1P 3EB.

Local Housing Statistics

England and Wales

1. **Local Housing Statistics** is prepared by the Department of the Environment and the Welsh Office to provide figures for individual local authority areas in a quarterly publication.

The tables relating to the provision of new permanent housing, slum clearance and, from the beginning of 1972, renovation grants, appear regularly in each issue. They show annual cumulative figures. Before 1972 annual totals for renovation grants were published in supplementary tables.

Supplementary tables on various other housing matters are included as data become available.

Supplementary tables so far published are listed on page iv.

2. **Definitions.** Detailed definitions of the terms used are to be found in the Notes and Definitions Supplement to "Housing and Construction Statistics". It may be noted that:

"Dwellings" include all permanent houses and flats.

"Housing Progress" by local authorities and new towns includes dwellings intended for sale or lease and dwellings for renting.

"Local authorities" include local housing authorities and new town authorities.

"Other public sector" includes Government departments, county councils and housing associations.

"Regions" are the standard regions for statistical purposes, revised following local government reorganisation on 1 April 1974.

"Counties" are the areas specified in the London Government Act 1963 and the Local Government Act 1972; the Isles of Scilly are included with Cornwall for statistical purposes.

3. **Local authority areas.** Local housing authorities may provide housing either within or outside their own areas. The figures shown in table 5 against the name of the authority include dwellings situated outside its area, for which particulars of starts and completions are given separately in table 6. Table 7 shows the distribution within and outside Greater London of dwellings started and completed by the Greater London Council, or by housing associations assisted by the Greater London Council. Authorities shown in tables 6 and 7 are indicated in table 5 by the following footnotes:

² An authority which started or completed dwellings in the area of another authority during the period.

³ An authority in whose area another authority started or completed dwellings during the period.

Other public sector and private sector dwellings are shown against the name of the authority in whose area they are situated.

4. **New Towns.** Against the name of each new town in table 5 are shown the dwellings built for the development corporation or for the Commission for the New Towns. These are all situated within the new town area and are not included in the figures for any other local authority. Private sector building on land made available by the new town is included against the name of the authority or authorities in whose area it is situated, but is also shown separately in italics against the name of the new town and included in the new town total.

5. **Adjustments to earlier returns** may occasionally result in a negative figure for an individual authority, when, for example, dwellings reported as started are subsequently withdrawn or there is a transfer from one sector to another.

6. **Slum clearance.** The figures in table 5 show the number of dwellings (whether or not unfit) demolished in or adjoining clearance areas under Part III of the Housing Act 1957, and the number of unfit dwellings demolished or closed elsewhere under Part II of the Act or certain other powers. When dwellings previously reported closed are demolished under Part III of the Act, the addition to demolitions in or adjoining clearance areas is balanced by a deduction from the numbers demolished or closed elsewhere. This may result in a negative figure in the final column for an individual authority. Demolitions under Part II of dwellings previously reported closed are balanced by a similar deduction, the effect of which is to exclude them from table 5. In table 3, all demolitions of dwellings previously reported closed are balanced by a deduction from the numbers "closed". The London Borough distribution of dwellings demolished by the Greater London Council is shown in table 8. Slum clearance statistics are now collected annually instead of quarterly. The next figures to appear will be for the year ended 31 March 1981.

7. **Population.** These figures are the latest available estimates of the home population published by the Office of Population Censuses and Surveys.

8. **Renovation grants.** Table 9 shows the number of local authority and county council for which government assistance in the form of subsidy or contribution will be given, the number of dwellings approved for housing association grant by the Secretary of State for the Environment or the Secretary of State for Wales, and the number of other dwellings for which grants were paid by local authorities during the period. In the case of conversions the number of dwellings is the total available after completion of the work; no account is taken of the number before work began.

9. **Housing action areas.** Introduced in Part IV of the Housing Act 1974, are to consist mainly of areas of housing accommodation where the local authority consider housing and social conditions are unsatisfactory and arrangements can be made within a period of five years to improve dwellings and the well-being of persons and to secure the proper and effective management of housing accommodation within the area.

Numbers of dwellings shown as, converted, improved or repaired with government assistance in the form of subsidy or grant are also included with the renovation figures appearing in table 9.

Directorate of Statistics
Department of the Environment
2 Marsham Street
London SW1P 3EB
November 1980

10. **General improvement areas.** Part II of the Housing Act 1969 as amended by the Housing Act 1974 confers powers on local authorities in England and Wales to deal with the improvement of living conditions in predominantly residential areas by declaring general improvement areas and improving the amenities of such areas, or dwellings therein, or both. Numbers of dwellings shown as converted, improved or repaired with government assistance in the form of subsidy or grant are also included with the renovation figures appearing in table 9.

11. **Homeless Households.** Since the implementation of the Housing (Homeless Persons) Act in December 1977, 'Acceptances' covers those households for whom local authorities assume the responsibility of securing accommodation (either temporary or permanent) under the provisions of the Act. This includes households found to be homeless (or threatened with homelessness within four weeks) and in one of the seven designated 'Priority Need' categories for whom local authorities have a duty to secure accommodation; it also includes any homeless households not in priority need for whom they have nevertheless undertaken to secure accommodation. Cases are reported to the Department at the stage when first accommodation is secured; these include a small proportion of households threatened with homelessness but able, through the local authority's intervention, to retain their accommodation. The figures in the table can be taken only as a general guide to the distribution of homelessness because of differences in recording practices and definitional problems associated with the introduction of the new statistical system.

A final revised table of local authority acceptances is available from SHB division at the address below.

12. **Index of local authority districts, London boroughs and new towns: England and Wales.** (H.M.S.O. 1974. 50p net) lists alphabetically all local authorities and new towns and shows the county and statistical region in which each is situated; sub-divisions of regions are the counties with certain exceptions in Wales, which are described in the foreword to the index. Maps showing district, county and regional boundaries are included.

A comprehensive description of the new system of local government, including the relationship between the old and new authorities, is given in "Local Government in England and Wales: A guide to the new system" (H.M.S.O., 1974, £4.00 NET).

13. **Symbols used.** The following symbols are used throughout:

- ... = not available.
- = nil or less than half the final digit shown.
- R = revised figure.
