## EXPLANATORY NOTES

### 1. New or Recent Changes in Presentation

#### (a) Standard regions

In Tables **E**, **E1**, **F**, **M**, **BB**, **HH**, **JJ**, **PP**, and **RR** of the present volume the Geographical Regions remain the same as in previous years. In addition, similar tables based on the new constitution of Regions introduced in 1946 and known as "Standard Regions" are to be found in the Appendix.

#### (b) Death rates

Areal death rate comparability factors, suspended during 1940-47 on account of disturbances of the sex-age composition of local populations, are now resumed in Table **E** (see also Section 7 on page vii).

#### (c) Marriages

Table **G** (Ages and Conditions of Persons Married) has been extended to show marriages of divorced persons separately and Table **H** has been discontinued. Marriages in which the ages of the parties were stated to be "Full Age" have been rateably distributed over the adult ages in a separate section of Table **G**.

#### (d) New or suspended tables

Estimates of the Population by Sex and Age (Tables **A2**, **A3** and Appendix **A3**) have, prior to 1948, only been published in the Parts I, Medical, of the successive Statistical Reviews. Marital condition estimates (Table **A4**) have likewise only been published in the Text portion of the Statistical Reviews. For the convenience of the user these tables are now also presented in this volume.

### 2. Populations

The 1948 estimate of the total population of England and Wales shown in Tables **A1** and **A2** includes members of its Armed Forces and Merchant Navy at home and overseas; it excludes the Armed Forces of Dominions, Colonies and Foreign countries temporarily present in the country. For years prior to 1940 the figures exclude Armed Forces and Merchant Seamen absent from the country approximating to 180 thousands in recent pre-war years. The national total cannot be apportioned amongst areas within the country.

The national and local estimates of civilian resident populations (Tables **A3**, **E**, and Appendix **A3**) are derived from the National Register and Food Office records and other sources of information.

### 3. Births

The births recorded and analysed for England and Wales for periods from 1939 onwards are those which occurred during the period. The numbers Registered in 1948 are shown in the footnote to Table **B**.

For the classification by regions and local areas (Table **E**), the births have been assigned to the home address or area of permanent residence as in previous years.

#### 4. (a) Birth Rates

The national rates for 1948 shown in Tables **C** and **D** are obtained by relating birth occurrences to the total population, while the rates in Table **E** are based on birth occurrences and civilian populations (see Sections 2 and 3 above).

For the country as a whole the ratio of estimated civilian population to total population is 0.9827 by which the live birth rates of Table **E** may be multiplied to produce rates approximately comparable with those of years prior to 1940.

#### (b) Fertility Analyses

The fertility analyses in Tables **AA-YY** are based on information obtained under the Population Statistics Act, 1938, which operated from the 1st July, 1938. Tables **AA** to **SS** are based upon birth occurrences. Tables **VV**, **WW** and **XX** are based upon death registrations.

### 5. Marriage Rates

The national marriage rates of Tables **C** and **D** are based upon total populations while those of Table **F** are based upon civilian population (see Section 2 above). For the country as a whole the ratio of estimated civilian population to total population is 0.9827 and the rates of Table **F** may be multiplied by this factor to produce rates approximately comparable with those of years prior to 1940.

### 6. Deaths

The deaths recorded (Tables **E** and **VV** to **XX**) are those registered in the calendar period, the time lag between the date of occurrence and date of registration being usually only a day or two. The said deaths are those of civilians only and are assigned to the area of residence of the deceased.

### 7. Death Rates

The general death rates of Table **E** are civilian rates based upon civilian deaths and civilian populations. The Infant Mortality rates for the local areas of Table **E** are based upon the combined births of the associated and preceding year to which they relate.

The crude death rates for local areas in Table **E** (col. 12) are not validly comparable by reason of the fact that the areal populations on which they are based may be of widely differing age constitutions. With a view to eliminating this element of variation, a comparability factor is provided in column 13 of the table for each area and this, when multiplied by the crude death rate of the area, produces an adjusted rate which may be regarded as comparable from a mortality point of view with the corresponding adjusted rate for any other area or with the crude death rate for England and Wales as a whole (where the comparability factor is unity). A guide to the relative incidence of mortality in different areas is provided by column 14 which expresses each local adjusted rate as a ratio of the national rate. For a fuller description of the comparability factor, reference should be made to the Statistical Review, Text, 1938/1939, page 5.

### 8. Register of Electors

The number of parliamentary electors for each parliamentary constituency showing separately the numbers borne in the Civilian Residence, Service and Business Premises Registers together with the number of votes cast at bye-elections held on the October, 1948, Register are set out in Table **U**. The number of local government electors and an analysis of local elections are shown in Table **V**.

### 9. Changes in Boundaries

Areas in respect of which boundaries have changed during the year are distinguished in Table **E** by the symbol \* denoting alteration (see also Appendix **Z**).

No populations of areas were affected by changes of boundaries in 1948.

### 10. Significance Indication

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experience may affect their significance.

### 11. Regions

The constitution of the Geographical Regional Divisions of England and Wales used in the volume is as follows:—

<p><i>Greater London</i> The aggregate of the City of London and of the boroughs and county districts falling entirely within the area of the Metropolitan Police District as defined in the Police Act, 1946.</p>	<p><i>North I</i> Durham. Northumberland.</p>	<p><i>Midland II</i> Derbyshire. Leicestershire. Northamptonshire. Nottinghamshire. Peterborough, Soke of.</p>	<p><i>Wales I</i> Brecknockshire. Carmarthenshire. Glamorganshire. \* These figures relate to passengers to and from ports in the Irish Republic and ports in the United Kingdom. The movement over the land frontier between the Irish Republic and Northern Ireland cannot be furnished.

† Approximate figures only.

‡ Excluding air passengers.

§ This figure cannot be reconciled with the separate totals because it includes air movement which cannot be allocated to specific areas.

(c) Balance of Permanent Migration: British subjects only (from Board of Trade Returns). Outward balances are shown in Roman type, inward balances in Italics. The United Kingdom excludes the Irish Republic as from the 1st April, 1923. The criterion of Permanent Migration is a declared intention to reside for at least a year in the country of destination. The permanent migration of part (c) is included in the passenger movement of part (b), and relates to movement by sea only.

FERTILITY ANALYSES

**TABLE AA.—Maternities and Births of all Types, distinguishing legitimacy and, in the case of births, sex and whether live or stillborn. } England and Wales 1948 Occurrences.**

Note: The term "Maternity" is used to denote a pregnancy which has terminated in the birth of one or more live or stillborn child(ren), the criterion of stillbirth being that defined in the Births and Deaths Registration Act, 1926. The Maternity record differs from the Birth record in that multiple births from a single pregnancy are counted as one maternity, while for the birth record each child born is reckoned as a separate unit.

TABLE OO.—Legitimate Maternities distinguishing the Interval since Marriage.\* { England and Wales 1948 Occurrences.

\*Note:—Interval since marriage. As the month only and not the day of the mother's marriage is obtained at a birth registration, the interval between marriage and birth of child has been calculated on the assumption that both events take place at the middle of a month; and the true interval may accordingly be a month greater or less than the calculated interval. The groups thus overlap though the records are not duplicated thereby and for statistical purposes the calculated intervals as shown in the tables may be regarded as equivalent to mutually exclusive intervals as follows:—

0 month(s) = 0— $\frac{1}{2}$  month(s). 0 year(s) = 0—11 $\frac{1}{2}$  months.  
 1 month(s) =  $\frac{1}{2}$ —1 $\frac{1}{2}$  month(s). 1 year(s) = 11 $\frac{1}{2}$  months—1 year 11 $\frac{1}{2}$  months.  
 2 month(s) = 1 $\frac{1}{2}$ —2 $\frac{1}{2}$  month(s), etc. 2 year(s) = 1 year 11 $\frac{1}{2}$  months—2 years 11 $\frac{1}{2}$  months, etc.

TABLE SS.—Legitimate Maternities distinguishing Duration of Present Marriage and Total previous children (surviving, dead or stillborn) by Present Husband.

England and Wales  
1948 Occurrences.

Note:—Statements of numbers of children which were incompatible with the duration of present marriage were not questioned and are recorded without modification. Such children, if incorrectly stated, were presumably illegitimate or offspring of a previous marriage. See also Note to Table OO.

TABLE VV.—Infertility of Deceased Married Women } { England and Wales  
distinguishing certain Causes of Death. } { 1948 Registrations.

Note:—The columns distinguish deaths according to whether the deceased was reported

(a) as having had no children by any husband, i.e. Infertile,

(b) as having had children by a husband, i.e. Fertile.

Deaths in which the record of fertility was not reported are excluded from the table.

In view of the unreliability of inferences based upon small numbers, proportions based on less than 50 cases (Infertile plus Fertile) have been omitted, and proportions based on between 50 and 250 cases are shown in italics.

The Registrar General's

Estimates of the Sex and Age  
Distribution of the Civilian  
Population in Regions and  
Administrative Areas of  
England and Wales

A special publication containing estimates of the sex-age structure of local populations as at 31st December, 1947.

These estimates have been issued to meet a need which has become increasingly evident in many fields of central and local administration, industry and commerce, and are intended to bridge the gap until the results of the next Census can be made known.

The Registrar General's

Estimates of the Population  
of  
England and Wales

A new series of publications issued to meet a general demand for up-to-date figures of local populations.

The latest issue contains estimates of the 'Home' populations of each administrative area at 30th June, 1949. These populations are the resident civilian populations together with the armed forces *stationed* in the area. The estimated numbers of children under fifteen years of age are also given.
