SPEZIALE VERSLAG NO. 189.

AMPTELIKE EN HUISTALE EN GELETTERDHEID
VAN NATURELLE.

Inleiding. Die syfers wat in die hieropvolgende tabelle aangegee word, is uit Boekdeel IV van die verslag oor die Bevolkingsensus van 1946 geneem. Hierdie Boekdeel, wat tot dusver nog nie gepubliseer is nie, handel oor:-

- (a) Spreekkennis van die Amptelike Tale (alle rasse)
- (b) Huistale (alle rasse) en
- (c) Geletterdheid van Naturelle

Hierdie verslag word gepubliseer as 'n voorafgaande opsomming van Boekdeel IV, aangesien dit nog 'n geruime tyd kan duur alvorens die boekdeel in die vorm van 'n blouboek vir die publiek beskikbaar gestel sal kan word.

Statistieke in verband met amptelike tale (tweetaligheid) is in 1918, 1921, 1926, 1936, 1941 en 1946, ten opsigte van die blanke bevolking; in 1936 en 1946, ten opsigte van kleurlinge en asiats; en in 1946 van naturelle ingesamel.

Statistieke van huistale is in 1936, 1941 en 1946 van blankes, en in 1936 en 1946 van kleurlinge en asiats en in 1946 ten opsigte van naturelle ingesamel.

Besonderhede in verband met die vermoë van naturelle om te lees en/of skryf is in die sensus van 1946 vir die eerste keer getabelleer.

J.I. RAATS.

DIREKTEUR VAN SENSUS EN STATISTIEK.

Julie, 1951.

SPECIAL REPORT NO. 189.

OFFICIAL AND HOME LANGUAGES
AND LITERACY OF NATIVES.

Introduction: The figures shown in the tables following have been extracted from Volume IV of the Report on the Census of Population, 1946. This Volume which has as yet not been published deals with:

- (a) Official languages spoken (all races)
- (b) Home Languages (all races) and
- (c) Literacy of natives.

This report is being published as an advance summary of Volume IV as it may take some time before Volume IV is available to the public in blue book form.

Statistics of official languages (bilingualism) have been collected in respect of Europeans in 1918, 1921, 1926, 1936, 1941 and 1946; in respect of coloureds and Asiatics in 1936 and 1946 and for Natives in 1946.

Statistics of home languages have been collected in 1936, 1941 and 1946 for Europeans; in 1936 and 1946 for Coloureds and Asiatics and in 1946 for Natives.

The 1946 population census constitutes the first census from which information regarding the literacy of natives has been tabulated.

J.I. RAATS.

DIRECTOR OF CENSUS AND STATISTICS.

July, 1951.

OPSOMMING.

1. AMPTELIKE TALE WAT GEPRAAT WORD (bevolking van 'n leeftyd van 7 jaar en hoër).

(a) Blankes. In 1946 was 69 persent van die blanke bevolking in staat om sowel Engels as Afrikaans te praat; 17 persent het slegs Engels gepraat en byna 14 persent slegs Afrikaans. Tweektaligheid was hoër onder die mans (71.3 persent) as onder die vrouens (66.6 persent).

In 1936 het 66.4 persent albei amptelike tale gepraat, in 1936 was dié persentasie 60.4.

In onderstaande tabel word die vermoë van die blanke bevolking (1946) om die amptelike tale te praat, volgens stedelike en plattelandse gebiede en die provinsies ingedeel en in persentasies aangedui.

Table with 11 columns: Amptelike tale gepraat, Unie (Stad, Flat), Kaap (Stad, Flat), Natal (Stad, Flat), Transvaal (Stad, Flat), O.V.S. (Stad, Flat). Rows include Albei, Engels, Afrikaans, Geen van beide, and Totaal.

Deur sal opgemerk word dat die persentasie persone wat albei amptelike tale kan praat, in elke provinsie, met uitsondering van Natal, hoër in die stedelike as in die plattelandse gebiede is. Die stedelike en plattelandse gebiede van die Oranje-Vrystaat toon die hoogste persentasie tweektaligheid (76.7 persent in die stedelike en 72.4 persent in die plattelandse gebiede), en dié in Natal die laagste (48.7 persent in die stedelike en 56.4 persent in die plattelandse gebiede). In die Oranje-Vrystaat is die persentasie wat slegs Engels praat en in Natal dié wat slegs Afrikaans praat, betreklik klein.

Amptelike tale en leeftye. Onderstaande tabel toon, volgens leeftydsgroepe, die persentasie (a) van die blanke bevolking van 7 jaar en ouer wat albei die amptelike tale, (b) slegs Engels, (c) slegs Afrikaans en (d) nóg Engels nóg Afrikaans praat.

Table with 6 columns: Leeftyds-groep in jare, Albei, Slegs Engels, Slegs Afrikaans, Nie een daarvan nie en ongespesifiseerd, Totaal. Rows range from 7-9 to 80+ and a Totaal row.

Bostaande tabel toon dat die persentasie van die bevolking wat albei amptelike tale praat, styg van 46.8 persent ten opsigte van die leeftydsgroep 7-9 jaar tot die maksimum van 85.2 persent in die geval van die leeftydsgroep 15-19 jaar. Daarna word die persentasies kleiner na gelang die leeftye hoër word, en dit daal tot 32.4 persent in die geval van leeftye van 80 jaar en hoër. Tot die leeftydsgroep 15-19 jaar, is die persentasie wat slegs Afrikaans praat, hoër as dié wat slegs Engels praat. Dit is veral duidelik in die geval van die leeftydsgroepe 7-9 en 10-14 jaar. Van 20 jaar af is die persentasies, met uitsondering van die leeftye van 80 jaar en ouer, in elke groep wat slegs Engels praat, groter as dié wat slegs Afrikaans praat.

(b) Kleurlinge. Ongeveer 43 persent van die kleurlingbevolking praat albei tale. Drie persent praat slegs Engels en 54 persent slegs Afrikaans. Met ander woorde, 97 persent was in staat om Afrikaans en 45 persent om Engels te praat. In teenstelling met die ander rasse, is die vrouens meer tweektalig as die mans (sien tabel 1).

In 1936 kon 37 persent van die kleurlingbevolking sowel Engels as Afrikaans praat.

(c) Asiate. In 1946 kon 13 persent van die Asiatiese bevolking albei tale praat, vergeleke met byna 12 persent in 1936. Byna 55 persent het slegs Engels gepraat, omtrent 1 persent slegs Afrikaans en 31 persent kon nie een van die twee amptelike tale praat nie. In teenstelling met die ander rasse, waar die verskil ten opsigte van tweektaligheid of eentaligheid tussen die geslagte nie baie groot is nie, toon die Asiatiese ras 'n merkbare afwyking. Agtien persent van die Asiatiese mans, vergeleke met 45 van die Asiatiese vrouens, het nie een van die amptelike tale gepraat nie (sien tabel 1).

(d) Naturelle. Ongeveer 74 persent van die naturellebevolking praat nie Engels of Afrikaans nie. Naastenby 6 persent is tweektalig, 7 persent praat slegs Engels en 13 persent slegs Afrikaans.

2. HUISTALE. (Alle leeftye).

(a) Blankes. Tabel 4 toon dat, tydens die sensus van 1946, 57.3 persent van die blanke bevolking (2,373,000 persone) verklaar het dat Afrikaans hul huistaal was; 39.4 persent het verklaar dat Engels hul huistaal was; 1.3 persent dat hulle beide Afrikaans en Engels in die huis praat, en 2.0 persent dat hulle nóg Afrikaans nóg Engels in hul huise praat.

In die stedelike gebiede was die persentasie wat Engels en dié wat Afrikaans as huistaal praat, ongeveer dieselfde (48.5 persent Engels en 47.8 persent Afrikaans). Aan die ander kant is Afrikaans in die plattelandse gebiede die taal wat verreweg in die meeste huise gepraat word. (82.4 persent Afrikaans en 15.3 persent Engels). Engels is die vernaamste huistaal in Natal - 78.2 persent in die stedelike gebiede, 55.2 persent in die plattelandse gebiede en 74.1 persent in die stedelike en plattelandse gebiede. In die Oranje-Vrystaat is Afrikaans die vernaamste huistaal - 80 persent in die stedelike gebiede, 93.0 persent in die plattelandse gebiede en 86.7 persent in die stedelike en plattelandse gebiede.

Afrikaans is ook die vernaamste huistaal van die blanke bevolking in die Kaap (58.8 persent) en in Transvaal (58.4 persent).

Twee persent van die bevolking praat 'n ander huistaal as Afrikaans en Engels, naamlik Duits: 0.6 persent; Joods (met inbegrip van Hebreus): 0.6 persent; Nederlands: 0.2 persent; en Frans, Italiaans, Grieks en Portugees: elkeen 0.1 persent.

Vernaamste stedelike gebiede. Tabelle 5(a) en 6 toon die huistale van blankes (getal en persentasie) in die vernaamste stede en hul voorstede en in ander gebiede van die Unie.

Groei van Afrikaans as huistaal in die vernaamste stede:

Onderstaande tabel toon die verhouding van Engels tot Afrikaans as huistaal in 1946 en 1936 in die 18 vernaamste stede (en hul voorstede) en ander gebiede van die Unie.

DIE
NG
FRIKA

| Stedelik en ander gebiede | Verhouding - Huistaal Afrikaans tot Engels (Engels = 100) | | Stedelike gebiede Witwatersrand | Verhouding - Huistaal Afrikaans tot Engels (Engels = 100) | |
|---------------------------|---|------|---------------------------------|---|------|
| | 1946 | 1936 | | 1946 | 1936 |
| Kaapstad | 40 | 32 | Witwatersrand: | 72 | 54 |
| Port Elizabeth | 61 | 46 | Johannesburg | 47 | 38 |
| Oos-Londen | 26 | 21 | Boksburg | 124 | 89 |
| Kimberley | 89 | 47 | Benoni | 78 | 55 |
| Durban | 16 | 10 | Brakpan | 154 | 113 |
| Pietermaritzburg | 27 | 20 | Germiston | 157 | 127 |
| Bloemfontein | 251 | 159 | Springs | 87 | 70 |
| Pretoria | 192 | 126 | Nigel | 95 | 66 |
| Witwatersrand | 72 | 54 | Roodepoort | 118 | 68 |
| | | | Krugersdorp | 197 | 151 |
| Totaal | 63 | 46 | Randfontein | 154 | 72 |
| Ander stedelike gebiede | 322 | 248 | | | |
| Alle stedelike gebiede | 99 | 79 | | | |
| Plattelandse gebiede | 528 | 602 | | | |
| Unie | 145 | 142 | | | |

By die berekening van die verhoudings hierbo aangedui, is persone wat nóg Afrikaans nóg Engels praat, buite berekening gelat terwyl dié wat beide Engels en Afrikaans in hul huise praat, gelyk aan Engels en Afrikaans onderskeidelik toegewys is.

Die tabel toon dat Afrikaans as huistaal in die vernaamste stedelike gebiede toegeneem het in die verhouding 100 Engels: 46 Afrikaans in 1936 tot 100 Engels: 63 Afrikaans in 1946. In elkeen van die vernaamste stedelike sentrums wat in die lys genoem word, het die verhouding van Afrikaans tot Engels oor die afgelope 10 jaar groter geword. In Durban, waar Afrikaans die minste in die huis gepraat word, het die verhouding toegeneem van 100:10 in 1936 tot 100:16 in 1946. In Bloemfontein het die verhouding van Afrikaans tot Engels van 1936 tot 1946 toegeneem van 159 tot 251: 100 Engels.

In die kleiner dorpe en dorpieë het die verhouding toegeneem van 248 tot 322 en in alle stedelike gebiede van 79 tot 99. In 1946 was die getal persone woonagtig in die stedelike gebiede wie se huistaal Engels was, omtrent net soveel as die getal wie se huistaal Afrikaans was (verhouding 100: 99).

Hoewel die huistaal in die plattelandse gebiede nog oorwegend Afrikaans is, het die verhouding van 100:602 in 1936 tot 100:528 in 1946 gedaal omdat daar 'n betreklik groter trek van Afrikaners uit die plattelandse gebiede na die stede was.

(b) Kleurlinge. Van die kleurlingbevolking van 928,484 wat tydens die sensus van 1946 opgeneem is het 89.1 persent verklaar dat Afrikaans hul huistaal is (83.8 persent in die stedelike en 96.6 persent in die plattelandse gebiede); 9.4 persent dat Engels hul huistaal is; 0.7 persent dat beide Engels en Afrikaans hul huistaal is, en 0.8 persent dat hulle 'n ander taal (met inbegrip van 'n ongespesifiseerde taal) in hul huise praat.

'n Aansienlike gedeelte van die stedelike kleurlingbevolking woon in Kaapstad en sy voorstede. Daar is die verhouding van Engels tot Afrikaans as die huistaal 100:358. (Sien tabel 3(b)).

(c) Asiate. Drie-en-dertig en een-derde persent van die 285,260 Asiate (1946) se huistaal is Tamil; daarna volg (in persentasies uitgedruk) Hindi 23.9; Gujerati 10.3; Telegu 8.5 en Urdu 5.5. Nege en 'n half persent praat ander Indiese tale tuis, en 9 persent ander tale as Indies. (Sien tabel 3(c)).

Tamil, Hindi en Telegu is oorwegend die huistale in Natal en Gujerati die in Transvaal.

(d) Naturelle. Die naturelletale wat die meeste gepraat word, is (persentasies van die totale naturelbevolking tussen hakies aangetoon) Xhosa (30.0), Zoeloe (26.0), Suid-Sotho (11.1), Sepedi (9.8) Tswana (7.4) en Shangaan (4.7).

Xhosa is die vernaamste taal in die Kaapprovinsie. Van die 2,354,000 Xhosas, woon 2,007,000 of 85 persent in die Kaap. Vyf-en-tagtig persent van die naturelle in die Kaap is Xhosas. Zoeloe is die vernaamste naturelletaal in Natal. Van die 2,035,000 Zoeloes, woon 1,589,000 of 78 persent in Natal. Drie-en-negentig persent van die naturelle in Natal is Zoeloes. Suid-Sotho is die taal wat die meeste in die Oranje-Vrystaat gepraat word. Van die 866,000 Suid-Sotho's, woon 425,000 of 49 persent in die Oranje-Vrystaat. Vier-en-sestig persent van die naturelle in die Oranje-Vrystaat is Suid-Sotho's. Die meeste van die naturelerrasse is goed verteenwoordig in die Transvaal waar daar, gedurende die sensus van 1946, 3,122,000 naturelle opgeneem is. Die volgende rasse is egter hoofsaaklik tot Transvaal beperk (persentasies tussen hakies): Sepedi (99), Venda (99), Ndebele (98), Shangaan (97), Swazi (95) en Tswana (63) - Sien tabel 3(d).

Huis- en amptelike tale.

Tabel 7(a) toon, ten opsigte van alle leeftyd van die bevolking, die huistale van blankes geklassifiseer volgens die amptelike tale wat gepraat word. Van die 48,048 persone wie se huistaal nóg Engels nóg Afrikaans is, was ongeveer 42 persent in staat om althuis amptelike tale te praat, kon 38 persent slegs Engels praat, 5 persent slegs Afrikaans en 15 persent nóg Afrikaans nóg Engels.

Tabelle 7(a) en (b) sluit persone van alle leeftye in, en kinders onder sewe jaar wie se huistaal as "ongespesifiseer" opgegee is, is onder die huistaal van die moeder ingedeel. In tabel 7(b) word die syfers tot persentasies herlei, maar persone wat nie een van die amptelike tale kon praat nie en ook persone wat "ongespesifiseer" is, is buite rekening gelaat.

Tabel 7(b) toon dat 55 persent van die getal persone wie se huistaal Engels is, in staat was om Afrikaans te praat, en ongeveer 65 persent van die getal persone wie se huistaal Afrikaans is, kon Engels praat.

Tabel 7(c), wat uit ongepubliseerde gegewens opgestel en gedeeltelik verwerk is, is soortgelyk aan tabel 7(b) behalwe dat persone onder die leeftyd van 7 jaar by die berekening van die persentasies uitgelat is. Hierdie tabel toon dat 60 persent van die bevolking wie se huistaal Engels is en ongeveer 75% van die bevolking wie se huistaal Afrikaans is, tweetalig is. Met ander woorde, in die geval van persone met 'n leeftyd van 7 jaar en ouer, is 40 persent van die Engelssprekende bevolking nie in staat om Afrikaans te praat nie en ongeveer 24 persent van die Afrikaanssprekende bevolking nie in staat om Engels te praat nie.

3. GELETTERDHEID VAN NATURELLE. (Leeftyd van 10 jaar en ouer).

Tabel 8 toon, in getalle en persentasies, die geletterdheid van naturelle in die Unie ten opsigte van (a) 'n Naturelletaal, (b) Engels en (c) Afrikaans, geklassifiseer volgens geslag en stedelike en plattelandse gebiede.

Unie (a) Naturelletale. In die Unie as 'n geheel, was 27 persent van die naturelbevolking wat 10 jaar en ouer is, in staat om te lees en te skryf (volkome geletterdheid en hierna genoem geletterdheid), kon 1.9 persent slegs lees, was 69.0 persent ongeletterd en het 2.1 persent versuim om te meld of hulle geletterd is.

6
1
DIE
NG
AFRIKA

Die persentasie geletterde mans is ietwat hoër as die syfer vir vrouens (27.8 teenoor 26.1 persent). Geletterdheid in stedelike gebiede (43.8 persent) is relatief meer as tweemaal so hoog as in plattelandse gebiede (21.4 persent). Hoewel die geletterde mans in plattelandse gebiede slegs ietwat meer as geletterde vrouens is (21.6 teenoor 21.1 persent), is die persentasie geletterde vrouens in die stedelike gebiede (50.9) betekenisvol hoër as die persentasie geletterde mans (40.5). Die rede hiervoor, soos later aangetoon sal word, is gedeeltelik die hoër persentasie ongeletterdheid onder die mans in die Witwatersrandse gebied, veral onder die naturelle wat in die myne werk.

(b) Engels en (c) Afrikaans. Tien en 'n half persent van alle naturelle wat tien jaar en ouer is, is in staat om Engels te lees en te skryf en 4.6 persent kan Afrikaans lees en skryf. Geletterdheid in verband met beide Engels en Afrikaans is hoër in die stedelike as in die plattelandse gebiede, en wat die stedelike gebiede betref, is dit byna tweemaal so hoog in die geval van vrouens as in dié van mans.

Provinsies. (a) Naturelletaal. Die hoogste persentasie geletterdheid word in die Kaapprovinsie aangetref (28.8 persent), en kort daarop volg Transvaal (28.4 persent). Natal toon die kleinste persentasie geletterdheid (22.5 persent). Die Oranje-Vrystaat, met 'n geletterdheid van 25.8 persent, toon die hoogste geletterdheid in stedelike gebiede (50.0 persent) maar die laagste in plattelandse gebiede (18.3 persent). Sien tabel 9.

(b) Engels en (c) Afrikaans. Die vermoë om Engels te lees en te skryf, is relatief tweemaal so hoog in die Kaap en Transvaal (12 persent) as in Natal (6.6 persent). Die vermoë om Afrikaans te lees en te skryf, is die hoogste in die Oranje-Vrystaat (7.2 persent) en die laagste in Natal (1.7 persent). In die Kaapprovinsie is 26.6 persent en in Natal 14.9 persent van die stedelike naturelle geletterd vir sover dit Engels betref, en in die Oranje-Vrystaat is 19.8 persent en in Natal 1.9 persent van die stedelike naturelle geletterd vir sover dit Afrikaans betref. Geletterdheid in die ander provinsies val binne bostaande perke.

Geletterdheid in 'n naturelletaal, volgens leeftydsgroepe

Tabel 11 toon die vermoë van naturelle om 'n naturelletaal te lees en te skryf, ingedeel volgens geslag, leeftyd, stedelike en plattelandse gebiede en provinsies.

(a) Naturellemens in stede. In die Unie as 'n geheel, was geletterdheid die hoogste onder die laagste leeftydsgroep - 10 tot 19 jaar (44.2 persent). In elkeen van die tienjaar-leefydsgroepe van 20-29 tot 50-59, was geletterdheid taamlik bestendig (ongeveer 40 persent), hoewel die verskil in die geletterdheid van die leeftydsgroepe aanmerklik is wanneer hulle volgens provinsies ingedeel word. In die Kaapprovinsie was die leeftydsgroep 20-29 die meeste geletterd (51.4 persent); in Natal die groep 20-29 (40.9 persent); in Transvaal die groep 40-49 (45.6 persent); en in die Oranje-Vrystaat die groep 10-19 (60.6 persent). Laasgenoemde provinsie het die hoogste persentasie geletterde persone wat tien jaar en ouer is (52.7 persent) en Natal die laagste (37.6 persent).

(b) Naturellemens in plattelandse gebiede. In elkeen van die tienjaar-leefydsgroepe van 10-19 tot 50-59, het die persentasie geletterdheid gevarieer tussen 19 en 24 persent. Die Kaap is die enigste provinsie waarin die geletterdheid van die leeftydsgroep 10-19 hoër was (27.8 persent) as dié van die leeftye oor 19 jaar. Ten opsigte van alle leeftydsgroepe toon Natal en die Oranje-Vrystaat die laagste persentasie geletterdheid (onderskeidelik 17.7 en 18.8).

(c) Naturelle vrouens in stedelike gebiede.

Die geletterdheid van vrouens in stedelike gebiede is aanmerklik hoër as dié van mans in stedelike gebiede (50.9 teenoor 40.5 persent). In sowel die Unie as in elkeen van die provinsies, was die persentasie geletterdheid die hoogste in die laagste leeftydsgroep, en dit het, in teenstelling met dié van die stedelike man, progressief met elke leeftydsgroep gedaal (van 60.3 persent vir die leeftydsgroep 10-19 tot 32.9 persent vir die leeftydsgroep 50-59).

(d) Naturelle vrouens in plattelandse gebiede.

Die geletterdheid van vrouens in plattelandse gebiede is ongeveer dieselfde as dié van mans in plattelandse gebiede - 21.1 teenoor 21.6 persent. Dit was algemeen hoër (in die Unie en in die provinsies) in die geval van die leeftye 10-29 jaar, maar in die geval van die leeftye 30 jaar en ouer laer as dié van manlike naturelle in plattelandse gebiede.

Vernaamste stedelike gebiede. Tabelle 12(a) en (b) toon, volgens geslag, die vermoë van naturelle wat 10 jaar of ouer en in elkeen van die vernaamste stedelike gebiede van die Unie woonagtig is, om (a) 'n naturelletaal, (b) Engels en (c) Afrikaans te lees en te skryf.

(a) Naturelletaal. Ongeveer 42 persent van die mans en 57 persent van die vrouens wat in die vernaamste stedelike sentrums van die Unie opgeneem is, was in staat om 'n naturelletaal te lees en te skryf. Die rede vir die betreklik laer geletterdheid van die mans in vergelyking met dié van vrouens, is grotendeels die hoër mate van ongeletterdheid onder die naturellemens in die dorpe waaruit die Witwatersrand (met uitsondering van Johannesburg), bestaan waar 'n aansienlike deel van die naturellebevolking in die myne werk en in kempongs woon waar hulle min in aanraking met die buitewêreld kom. In hierdie dorpe (Germiston, Benoni, Boksburg, Brakpan, Nigel, Springs, Roodepoort, Krugersdorp en Randfontein) het die geletterdheid van naturellemens gevarieer tussen 25.4 en 39.2 persent vergeleke met die geletterdheid van vrouens, wat van 48.0 tot 60.4 persent gevarieer het. Die twee groot dorpe in Natal, waar die gemiddelde geletterdheid van die naturellemens ver onder 40 persent en dié vrouens ver oer die 50 persent was, het ook daartoe bygedra dat die persentasie geletterdheid onder die mans betreklik laag is. In elkeen van die ander vernaamste stedelike sentrums (Kaapstad, Port Elizabeth, Oos-Londen, Kimberley, Bloemfontein, Pretoria en Johannesburg) was die persentasie geletterde mans hoër as 50.

Vir sover dit naturelle vroue betref, het drie van die agtien dorpe wat in tabel 12(b) genoem word, 'n geletterdheid van ietwat minder as 50 persent getoon, 11 'n persentasie van tussen 50 en 60, en 4 'n hoër persentasie as 60.

(b) Engels. Die geletterdheid van naturelle ten opsigte van Engels het 'n gemiddelde persentasie in die vernaamste stedelike gebiede van 16.6 en die geval van mans en 32.5 in dié van vrouens getoon. In alle dorpe, met uitsondering van Bloemfontein, was die geletterdheid van die vrouens aanmerklik hoër as dié van die mans, veral in die dorpe van Transvaal waar daar goudmyne is.

(c) Afrikaans. Die geletterdheid van naturelle ten opsigte van Afrikaans was gemiddeld 6.4 persent in die geval van mans en 12.6 persent in die geval van vrouens. Dit was die laagste in Oos-Londen, Durban en Pietermaritzburg (mans: van 0.9 tot 1.9 en vrouens: van 1.2 tot 2.9 persent, en die hoogste in Bloemfontein, Pretoria, en Johannesburg (mans: van 9.6 tot 20.4 en vrouens: van 14.9 tot 17.4 persent).

DIE

NG

AFRIKA

x
SUMMARY.

1. OFFICIAL LANGUAGES SPOKEN (population 7 years of age and over).

(a) Europeans. In 1946, 69 per cent of the European population were able to speak both English and Afrikaans; 17 per cent spoke English only and nearly 14 per cent, Afrikaans only. Bilingualism among males was higher (71.3 per cent) than among females (66.6 per cent).

In 1936, 66.4 per cent and in 1926, 60.4 per cent spoke both official languages.

The following table shows, in percentages, the ability of the European population (1946) to speak the official languages, according to urban and rural areas and provinces.

| Official Languages Spoken | Union | | Cape | | Natal | | Transvaal | | O.F.S. | |
|---------------------------|-------|-------|-------|-------|-------|-------|-----------|-------|--------|-------|
| | Urb. | Rur. | Urb. | Rur. | Urb. | Rur. | Urb. | Rur. | Urb. | Rur. |
| Both | 70.5 | 64.5 | 72.6 | 60.0 | 48.7 | 56.4 | 73.6 | 67.3 | 76.7 | 72.4 |
| English | 20.8 | 6.5 | 18.0 | 4.8 | 49.5 | 38.8 | 18.2 | 4.8 | 3.1 | 1.2 |
| Afrikaans | 8.3 | 28.8 | 9.1 | 35.1 | 1.5 | 4.1 | 7.9 | 27.5 | 20.1 | 26.4 |
| Neither | .3 | .2 | .3 | .1 | .3 | .7 | .3 | .4 | .1 | - |
| Total | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

It will be observed that in the urban areas of each province, with the exception of Natal, the proportion of persons speaking both official languages, exceeds that in rural areas. Urban and rural Orange Free State show the highest percentages of bilingualism (76.7 per cent urban and 72.4 per cent rural) and Natal the lowest (48.7 per cent urban and 56.4 per cent rural). In the Orange Free State, the proportion speaking English only, and in Natal the proportion speaking Afrikaans only, is relatively small.

Official Languages and Ages. The following table shows, by age groups, the percentage of the European population 7 years and over, who speak (a) both of the official languages, (b) English only, (c) Afrikaans only and (d) neither English nor Afrikaans.

| Age group in years. | Percentage of European Population speaking: | | | | |
|---------------------|---|---------------|-----------------|--------------------------|-------|
| | Both | English only. | Afrikaans only. | neither and unspecified. | Total |
| 7 - 9 | 46.8 | 16.0 | 37.1 | .1 | 100.0 |
| 10 - 14 | 71.0 | 9.2 | 19.7 | .1 | 100.0 |
| 15 - 19 | 85.2 | 6.9 | 7.7 | .2 | 100.0 |
| 20 - 24 | 85.0 | 6.9 | 5.9 | .2 | 100.0 |
| 25 - 29 | 83.0 | 10.4 | 6.4 | .2 | 100.0 |
| 30 - 34 | 78.5 | 14.2 | 7.1 | .2 | 100.0 |
| 35 - 39 | 73.4 | 18.5 | 7.9 | .2 | 100.0 |
| 40 - 44 | 68.4 | 22.5 | 8.9 | .2 | 100.0 |
| 45 - 49 | 64.6 | 24.6 | 10.6 | .2 | 100.0 |
| 50 - 54 | 61.0 | 24.1 | 14.6 | .3 | 100.0 |
| 55 - 59 | 54.7 | 26.2 | 18.8 | .3 | 100.0 |
| 60 - 64 | 47.6 | 30.2 | 21.8 | .4 | 100.0 |
| 65 - 69 | 40.4 | 36.1 | 22.9 | .6 | 100.0 |
| 70 - 74 | 35.3 | 37.4 | 26.5 | .8 | 100.0 |
| 75 - 79 | 33.7 | 35.4 | 30.0 | .9 | 100.0 |
| 80+ | 32.4 | 30.8 | 35.7 | 1.1 | 100.0 |
| Total | 69.0 | 17.0 | 13.8 | .2 | 100.0 |

The/

The above table shows that the percentage of the population speaking both official languages advanced from 46.8 per cent for the age group 7-9 years to a maximum of 85.2 per cent for the age group 15-19 years. Thereafter, the percentages decreased with the increase in ages, falling to 32.4 per cent for the ages of 80 years and over. Up to the age group 15 to 19, the percentages speaking Afrikaans only, exceeds that speaking English only. This is particularly evident for the age groups from 7-9 and 10-14. From 20 years onwards, excepting for ages 80 years and over, the percentages in each age group speaking English only exceeds those speaking Afrikaans only.

(b) Coloureds. About 43 per cent of the coloured population speak both languages; 3 per cent English only and 54 per cent Afrikaans only. In other words, 97 per cent were able to speak Afrikaans and 45 per cent English. In contrast to the other races, females are more bilingual than males (see table 1.)

In 1936, 37 per cent of the coloured population were able to speak both English and Afrikaans.

(c) Asiatics. In 1946, 13 per cent of the Asiatic population were able to speak both languages, as compared with nearly 12 per cent in 1936. Nearly 55 per cent spoke English only, about 1 per cent Afrikaans only and 31 per cent were unable to speak either of the official languages. In contrast to the other races, where the difference in bilingualism or unilingualism between the sexes is not very pronounced, the Asiatic race shows a marked variation. Eighteen per cent of the Asiatic males, as against 45 per cent of the Asiatic females spoke neither of the official languages. (See table 1.)

(d) Natives. About 74 per cent of the native population do not speak English or Afrikaans. Roughly, 6 per cent are bilingual, 7 per cent speak English only and 13 per cent, Afrikaans only.

2. HOME LANGUAGES. (all ages)

(a) Europeans. Table 4 shows that at the 1946 census, 57.3 per cent of the European population (2,373,000 persons) stated Afrikaans as their home language, 39.4 per cent, English, 1.3 per cent both English and Afrikaans and 2.0 per cent neither English nor Afrikaans.

In urban areas, the proportion of English and Afrikaans as home language, was about the same (48.5 per cent English and 47.8 per cent Afrikaans). In rural areas on the other hand, Afrikaans as home language predominates (82.4 per cent Afrikaans and 15.3 per cent English). English is the leading home language in Natal - 78.2 per cent urban, 55.2 per cent rural and 74.1 per cent urban and rural. In the Orange Free State, Afrikaans is the predominant home language - 80.0 per cent urban, 93.0 per cent rural and 86.7 per cent urban and rural.

Afrikaans is also the predominant home language of the European population in the Cape (58.8 per cent) and the Transvaal (58.4 per cent).

Two per cent of the population have languages other than English or Afrikaans as their home language, namely German, 0.6 per cent; Yiddish (including Hebrew) 0.6 per cent; Netherlands, 0.2 per cent; and French, Italian, Greek and Portuguese, each 0.1 per cent.

Principal Urban Areas. Tables 5(a) and 6 show the home languages of Europeans (number and per cent) in the principal towns and their suburbs and in other areas of the Union.

Growth/

6
1
DIE
NG
AFRIKA

Growth of Afrikaans as Home Language in the Principal Towns:

The following table shows the ratio of English to Afrikaans as home language in 1946 and 1936 in the 18 principal towns (and their suburbs) and other areas of the Union.

| Urban and other areas. | Ratio - Home Language Afrikaans to English (English = 100). | | Urban Areas Witwatersrand | Ratio - Home Language Afrikaans to English (English = 100). | |
|------------------------|---|------|---------------------------|---|------|
| | 1946 | 1936 | | 1946 | 1936 |
| Cape Town | 40 | 32 | Witwatersrand | 72 | 54 |
| Port Elizabeth | 61 | 46 | Johannesburg | 47 | 38 |
| East London | 26 | 21 | Boksburg | 124 | 89 |
| Kimberley | 69 | 47 | Benoni | 78 | 55 |
| Durban | 16 | 10 | Brakpan | 154 | 113 |
| Pietermaritzburg | 27 | 20 | Germiston | 157 | 127 |
| Bloemfontein | 251 | 159 | Springs | 87 | 70 |
| Pretoria | 192 | 126 | Nigel | 95 | 66 |
| Witwatersrand | 72 | 54 | Roodepoort | 118 | 68 |
| Total | 63 | 46 | Krugersdorp | 197 | 151 |
| Other urban areas | 322 | 248 | Randfontein | 154 | 72 |
| All urban areas | 99 | 79 | | | |
| Rural Areas | 528 | 602 | | | |
| Union | 145 | 142 | | | |

In calculating the ratios shown above, persons speaking neither English nor Afrikaans were not taken into account and those speaking both English and Afrikaans in their homes were allocated equally to English and Afrikaans respectively.

The tabulation shows that Afrikaans increased as home language in the principal urban areas in the ratio of 100 English to 46 Afrikaans in 1936 to 100 English to 63 Afrikaans in 1946.

In each of the principal urban centres listed, the ratio of Afrikaans to English increased over the past 10 years. In Durban, where Afrikaans is least spoken at home, the ratio increased from 100: 10 in 1936 to 100: 16 in 1946. In Bloemfontein the ratio of Afrikaans increased from 1936 to 1946 from 159 to 251: 100 English.

In the smaller towns and villages, the ratio increased from 248 to 322, and in all urban areas from 79 to 99. In 1946, about as many persons, living in urban areas, have English as Afrikaans as their home language (ratio 100:99).

Although the home language in rural areas is still preponderantly Afrikaans, the ratio has decreased from 100: 602 in 1936 to 100:528 in 1946, due to the relatively heavier migration of Afrikaners from rural areas to towns.

(b) Coloureds. Of the 328,484 coloured population enumerated at the 1946 census, 89.1 per cent stated Afrikaans to be their home language (83.8 per cent urban and 96.6 per cent rural), 9.4 per cent English; 0.7 per cent both English and Afrikaans and 0.8 per cent, other languages including unspecified.

A considerable proportion of the urban coloured population live in Cape Town and its suburbs. There the ratio of English to Afrikaans as home language, is 100: 358. (see table 3(b)).

(c)

(c) Asiatics. Thirty three and one-third per cent of the 285,260 Asiatics (1946) have Tamil as their home language, followed by, in percentages, Hindi, 23.9; Gujarati, 10.3; Telegu, 8.5 and Urdu 5.5. Nine and one half per cent speak other Indian languages at home and 9 per cent languages other than Indian (see table 3(c)).

Tamil, Hindi and Telegu are the predominant home languages in Natal and Gujarati predominates in Transvaal.

(d) Natives. The predominant native languages are (percentages to total native population shown in brackets), Xosa, (30.0); Zulu, (26.0); South-Sotho (11.1); Sepedi (9.8); Sechuana (7.4); and Shangaan (4.7).

Xosa is the leading language in the Cape Province. Of the 2,354,000 Xosas, 2,007,000 or 85 per cent, live in the Cape. Eighty five per cent of the natives in the Cape are Xosas. Zulu is the leading native language in Natal. Of the 2,035,000 Zulus, 1,589,000 or 78 per cent, live in Natal. Ninety three per cent of the natives in Natal, are Zulus. South-Sotho predominates in the Orange Free State. Of the 866,000 South-Sothos, 425,000 or 49 per cent, live in the Orange Free State. Sixty four per cent of the natives in the Orange Free State are South-Sothos. Most of the native races are well represented in the Transvaal, where, at the 1946 census, 3,122,000 natives were enumerated. However, the following races are essentially confined to the Transvaal - (percentages shown in brackets) - Sepedi (99); Venda (99); Ndebele (98); Shangaan (97); and Sechuana (63). Swazi 95;

Home and Official Languages.

Table 7(a) shows, for all ages of the population, the home languages of Europeans, classified according to official languages spoken. Of the 48,048 persons whose home language is neither English nor Afrikaans, approximately 42 per cent were able to speak both official languages, 38 per cent English only; 5 per cent Afrikaans only and 15 per cent neither English nor Afrikaans.

Tables 7(a) and (b) cover persons of all ages, and children under 7 years of age returned as "unspecified" have been allocated to the home language of the mother.

In table 7(b) the figures are reduced to percentages, but persons who were unable to speak either of the official languages, as well as persons "unspecified" have not been taken into account.

Table 7(b) shows that 55 per cent of the number of persons whose home language is English, were able to speak Afrikaans and about 65 per cent of the number of persons whose home language is Afrikaans were able to speak English.

Table 7(c) derived from unpublished data and partly estimated, is similar to table 7(b) except that persons under 7 years of age have been omitted from the calculation of the percentages. This table shows that 60 per cent of the population whose home language is English and about 75 per cent of the population whose home language is Afrikaans, are bilingual. In other words, for ages 7 years and over, 40 per cent of the English speaking population are unable to speak Afrikaans and about 24 per cent of the Afrikaans speaking population are unable to speak English.

LITERACY OF NATIVES; (10 years of age and over).

Table 8, shows in numbers and percentages the literacy of natives in the Union in respect of a) a native language, b) English and c) Afrikaans, classified by sex and urban and rural areas.

Union (a) Native Language. For the Union as a whole, 27 per cent of the native population, 10 years and over, were able to read and write (complete literacy and hereinafter referred to as literacy), 1.9 per cent were able to read only,

69.0/

69.0 per cent were illiterate and 2.1 per cent failed to state their literacy.

The percentage literacy among males is somewhat higher than among females (27.8 as against 26.1 per cent). Literacy in urban areas (45.8 per cent) is relatively more than twice as high as in rural areas (21.4 per cent). Although the literacy of males in rural areas is only slightly higher than that of females (21.6 as against 21.1 per cent), the literacy of females in urban areas (50.9 per cent) significantly exceeds that of males (40.5 per cent). The reason for this, as will be shown later, is in part to be ascribed to the high proportion of illiteracy among males in the Witwatersrand area, in particular the mine native.

(b) English and (c) Afrikaans. Ten and one half per cent of all natives, 10 years of age and over, are able to read and write English and 4.6 per cent, Afrikaans. Literacy with respect to both English and Afrikaans, is higher in urban than in rural areas and as far as urban areas are concerned, nearly twice as high for females as for males.

Provinces. (a) Native Language. The highest percentage of literacy is to be found in the Cape Province (28.8 per cent) followed closely by the Transvaal (28.4 per cent). Natal shows the smallest percentage of literacy (22.5 per cent). Orange Free State with a literacy of 25.8 per cent, shows the highest literacy in urban areas (50.0 per cent) but the lowest in rural areas (18.3 per cent). See table 9.

(b) English and (c) Afrikaans. The ability to read and write English is relatively nearly twice as high in the Cape and Transvaal (12.0 per cent) as in Natal (6.6 per cent). The ability to read and write Afrikaans is highest in the Orange Free State (7.2 per cent) and lowest in Natal (1.7 per cent). In the Cape Province, 26.6 per cent and in Natal 14.9 per cent of the urban natives are literate in English and in the Orange Free State, 19.8 per cent and in Natal 1.9 per cent of the urban natives are literate in Afrikaans. The literacy in the other provinces falls within the above limits.

Literacy in a native language by age-groups

Table 11 shows the ability of natives to read and write a native language, classified according to age, sex, urban and rural areas and provinces.

(a) Native males - urban. For the Union as a whole, literacy was highest amongst the lowest age group - 10-19 years (44.2 per cent). For each of the ten-year age groups, from 20-29 to 50-59, the literacy remained fairly constant at around 40 per cent, although by provinces, the variation in the age groups was pronounced. In the Cape Province, the highest percentage literacy was for the age group 20-29, (51.4 per cent); Natal 20-29 (40.3 per cent); Transvaal 40-49 (45.6 per cent); and Orange Free State 10-19 (60.6 per cent). The latter province had the highest percentage literacy for persons 10 years of age and over (52.7 per cent) and Natal the lowest (37.6 per cent).

(b) Native males - rural.

For each of the 10 year age groups from 10-19 to 50-59, the percentage of literacy varied between 19 and 24 per cent. The Cape is the only Province in which the literacy for ages 10-19 was higher (27.8 per cent) than for ages above 19 years. For all age groups Natal and the Orange Free State show the lowest percentage literacy (17.7 and 18.8, respectively).

(c) Native females - urban. Literacy among urban females is considerably higher than that for urban males (50.9 as against 40.5 per cent). For the Union as well as for each of the provinces, the percentage literacy was highest in the lowest age group and in contrast to the urban male - fell progressively with each age group from (60.3 per cent for the age group 10-19 to 32.9 per cent, for the age group 50-59).

(d) Native females - rural. Literacy of rural females is about the same as that of rural males - 21.1 as compared with 21.6 per cent. It was generally higher - Union and provinces, - for the ages from 10-29 years but lower for the

ages/

ages 30 years and over, than rural males.

Principal urban areas. Tables 12(a) and (b) show by sex, the ability of natives 10 years of age and over, to read and write a) a native language, b) English and c) Afrikaans, in each of the principal urban areas of the Union.

(a) Native Language. Approximately 42 per cent males and 57 per cent females enumerated in the principal urban centres of the Union were able to read and write a native language. The reason for the relatively lower literacy of males, as compared with females is largely to be ascribed to the high proportion of illiteracy of native males in the towns comprising the Witwatersrand (excluding Johannesburg), where a considerable proportion of the natives are employed on the mines and live in compounds with little contact with the outside world. In these towns (Germiston, Benoni, Boksburg, Braakpan, Nigel, Springs, Roodepoort, Krugersdorp and Randfontein), the male literacy varied between 25.4 and 39.2 per cent as compared with a female literacy of from 48.0 to 60.4 per cent. The two large towns in Natal, where the average male literacy was well below 40 per cent, and that of females well above 50 per cent, also contributed to the relatively low literacy of males. In each of the other principal urban centres (Cape Town, Port Elizabeth, East London, Kimberley, Bloemfontein, Pretoria and Johannesburg) the percentage male literacy was above 50.

As far as native females are concerned, three of the 18 towns listed in table 12(b) showed a literacy of somewhat less than 50 per cent, 11, a percentage literacy between 50 and 60 and, 4 above 60.

(b) English. Native literacy in respect of English averaged for the principal urban areas, 16.6 per cent for males and 32.5 per cent for females. For all towns, with the exception of Bloemfontein, female literacy was considerably higher than that of males, particularly in the goldmining towns of the Transvaal.

(c) Afrikaans. Native literacy in respect of Afrikaans averaged 6.4 per cent for males and 12.6 per cent for females. It was lowest in East London, Durban and Pietermaritzburg (male: from 0.9 to 1.9 and female: from 1.2 to 2.9 per cent), and highest in Bloemfontein, Pretoria and Johannesburg (male: from 9.6 to 20.4 and female: from 14.9 to 17.4 per cent).
