* In the other cases the column of the Register headed "Age" is filled in by the Officiating Minister with the words "of full Age," "Minor," "Under Age," as the case may be; thus losing the additional means of identification afforded by a precise statement of the age of persons at the time of marriage.

* The Registration Counties consist of groups of entire Registration Districts; which Districts are, in general, identical with the Poor Law Unions. As the principle adopted has been to place a District or Union which extends into more than one County with the County in which either the principal town or the greater part of the population is located, the limits of the Registration Counties differ more or less from the boundaries of the Counties proper.

* The Districts are collections of contiguous Parishes or Places combined for purposes connected with the Registration of Births, Deaths, and Marriages; and are generally identical with the Poor Law Unions of the same names. The Districts, 625 in number, are arranged according to their local position under the Registration Counties.

† For a table of the Deaths in the principal Public Institutions situated in the Districts of London see page 85.

Note. Wherever the minus sign is prefixed to the number in the column headed "Excess of Births over Deaths," it denotes that the Births in the District, instead of exceeding the Deaths, were, in fact, less than the Deaths to the extent stated.

* The Density of Population in each Division and County according to French Measure is here inserted for the convenience of Persons who may be more accustomed to the

"Hectare" than to the "Acre" as a measure of surface; and it may be here stated that a French Hectare is equivalent to 2·471143 (nearly 2½) English Acres, or, expressed in other terms, an English Acre represents ·404671 (rather more than 4-10ths) of a French Hectare.

I. LONDON.—DENSITY of POPULATION, ANNUAL MORTALITY, and EXCESS of DEATHS over 17 in 1000 Persons living, in the DISTRICTS of ENGLAND, 1841-50.

Table with columns for DISTRICTS, DENSITY, Annual Mortality, and Excess in the Number of Deaths over those that would have happened if the Mortality had been 17 in 1000 living. Includes districts like MIDDLESEX (part of), SURREY (part of), and KENT (part of).

II.—SOUTH EASTERN COUNTIES.

NOTE.—In calculating the mortality of the London districts, an approximate correction has been made for hospitals, by taking the number of deaths and inmates in 1851 as the basis, and assuming that the mortality was uniform during the 10 years 1841-50; the numbers were then deducted from the deaths and population of the districts in which each hospital is situated, and distributed proportionally over every district of London.

† This correction for the Medway district has been obtained by taking the average deaths in Fort Pitt and Fort Clarence during three years (1841, 1845, and 1850), as indicating approximately the average annual mortality during the 10 years 1841-50; the aggregate number of deaths thus obtained, together with the arithmetical mean of population enumerated in the same institutions in 1841 and 1851, were then subtracted from the deaths and population of the entire district.

In calculating the mortality of the London Districts an approximate correction has been made for Hospitals by taking the number of Deaths and Inmates in 1851 as the basis, and assuming that the mortality was uniform during the 10 years 1841-50. The numbers were then deducted from the Deaths and Population of the Districts in which each Hospital is situated, and distributed proportionately over every District of London.
