The Registrar General's Statistical Review
of England and Wales
for 1952

Supplement on Cancer

This volume is concerned with the development and treatment of nearly 85,000 cases of cancer of the Breast (women only), Cervix uteri, Prostate, Stomach, Intestine, Rectum, Lung, and Skin (epithelioma). The data used was obtained between 1945 and 1952 from the National Cancer Registration Scheme. Records of cases registered in the years 1945 to 1947 and followed up for a period of five years form the basis for an analysis of the factors which influence survival.

Introduction

The system of collecting mental hospital statistics which was introduced at the beginning of 1949, and which has already been described elsewhere ⁽¹⁾, continued during 1952 and 1953. From 1951 onwards the figures for mental hospitals relate to voluntary, temporary and certified patients only, and those for mental deficiency hospitals exclude patients outside the provisions of the Mental Deficiency Acts. In the present report some changes have been made from the presentation of 1949 and 1950-51 ⁽²⁾:

(a) Some serial tables have been started, which will eventually show trends in admissions, discharges and deaths over the years.

(b) A number of tables are presented for first admissions and for second and subsequent admissions. The latter group includes, for any year:-

(1) readmissions of patients first admitted in that year.

(ii) second and subsequent admissions of patients first admitted in a previous year.

In subsequent reports it is hoped to make this division in all tables.

(c) Where rates are shown they are based on the estimated home population of England and Wales at mid-year, unless otherwise stated. The home population is composed of civilians and members of any Armed Forces actually located within England and Wales ⁽³⁾.

The report is divided into two parts; the first gives summary tables with comments on some of the more interesting features, and the second gives detailed tables mostly in the form of raw data. For readers' convenience, where tables in this report correspond to tables in the two preceding reports (1, 2), references are supplied.

Considerable interest was shown in the admission rates by social class which appeared in former reports. As a result, a further analysis has been made for certain occupational groups within each social class. Admissions for the five years 1949 to 1953 have been combined to give larger frequencies.

The results are shown on pages 29 - 92.

(b) MENTAL DEFICIENCY HOSPITALS

Year	Direct Admissions		Discharges and Removals (1)		Deaths		Residents Dec. 31st	
	M	F	M	F	M	F	M	F
1949	1,634	1,078	432	460	368	292	28,127	25,671
1950	1,694	1,345	482	518	437	391	28,382	25,774
1951	1,543	1,326	572	633	415	393	28,944	26,104
1952	1,776	1,562	633	591	389	378	29,658	26,701
1953	1,754	1,346	664	540	400	371	30,236	27,147

* Not available. The number of first admissions including patients other than voluntary, temporary and certified was:-

1949: M 16,074; F 21,843

1950: M 16,171; F 21,872

(1) Excluding transfers out and deaths.

Table M.1 shows the trend in hospital population from 1949 to 1953. For mental hospitals total direct admissions increased by 22-23 per cent over the five years and discharges by 28-29 per cent. The population resident on December 31st increased by 2½ per cent for males and by nearly 4 per cent for females. First admissions, which usually form nearly two-thirds of the whole, were 11 per cent more in 1953 than in 1951.

For mental deficiency hospitals, male direct admissions were 7 per cent more in 1953 than in 1949 and female, 25 per cent. The peak year for admissions was 1952, when the total reached 3,338. Male discharges and removals increased steadily over the five years and in 1953 were more than half as much again as in 1949; female discharges have been decreasing since 1951. The number of female deaths, however, was 27 per cent higher in 1953 than in 1949. The number of residents at the end of 1953 was 57,383.

(83616)

Diagram I. Mental Hospitals. Admission Rates, distinguishing First and Other Admissions, 1953
Rates per 100,000 Estimated Home Population

Table M.2 shows the sex-age distribution of direct admissions in 1952 and 1953, and the first and subsequent admission rates. At ages 16 to 35, when large numbers of young schizophrenics are admitted, the rates increased sharply. Male rates then declined, but female rates continued to increase, owing to the admission of middle-aged manic-depressives. The large numbers of admissions of senile patients caused a sharp rise in the first admission rates from age 55, whereas the rates for patients readmitted decreased in the highest age-groups (see Diagram I).

Table M.3. Mental Hospitals. Estimated Sex and Age Distribution of Resident Population at December 31st (1)
and Rates per 100,000 Home Population, 1952 and 1953

(1949: Table M.2; 1950-51: Table M.6)

Age Groups	1952				1953			
	Numbers		Rates		Numbers		Rates

(1) Taking into account admissions, deaths, discharges and departures and the ageing of the resident population.

Diagram II. Mental Hospitals. Estimated Residence Rates per 100,000 Estimated Home Population, 1953

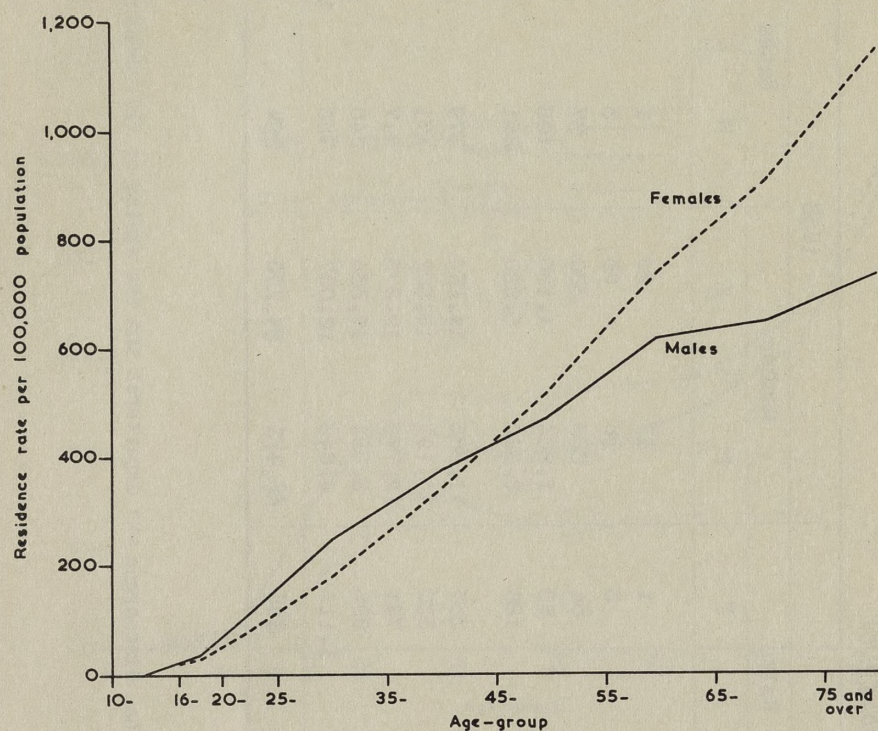

Table M.3 shows the estimated age distribution of the resident population in mental hospitals at the end of 1952 and 1953. These estimates are based on the count of long-stay patients made during 1949 and allow for admissions and discharges and the ageing of those who have remained in hospital. The rates for young people under 25 were a little less for both sexes in 1953 than in 1952; for elderly people of 65 and over the 1953 rates exceeded those for 1952. Male residents aged 16-44 exceeded females both in numbers and rates, but at ages 45 and over females predominated and the female rates increased much more steeply than the male (see Diagram II).

(83616)

Table M.4 gives the trends in first admissions by sex and age from 1951 to 1953. In each year the proportion of first admissions was lowest at ages 25-44 for men and 45-64 for women. More than four-fifths of admissions of old people of 75 and over were first admissions. Male first admission rates at ages 25-64 have increased steadily over the three years as also have those for women aged 25-44 and 65-74. For both sexes the first admission rate in 1953 for those aged 75 and over was higher than in 1952 but lower than in 1951.

Table M.5. Mental Hospitals. Trends in Estimated Residence Rates per 100,000 Estimated Home Population on December, 31st, 1950-1953⁽¹⁾
(1949: Table M.2; 1950-51: Table M.6)

Year	Sex	Age Group at Admission										All Ages
		0-	10-	16-	20-	25-	35-	45-	55-	65-	75 and over	
1950	M		4	45	112	242	348	492	601	657	633	288
	F		3	40	89	189	339	548	750	895	1,010	360
1951	M		4	42	112	245	355	483	606	644	677	289
	F		3	35	88	187	338	542	742	887	1,073	362
1952	M	1	6	43	112	248	363	474	609	641	700	290
	F	1	5	34	86	188	337	530	741	895	1,115	365
1953	M	1	3	37	108	251	379	471	617	646	738	294
	F	1	4	29	82	181	344	526	740	910	1,151	368

(1) The rates for 1950 and 1951 differ from those in the 1950-51 Supplement, owing to revision in population figures.

Table M.5 shows the trend in estimated residence rates from 1950 to 1953. Female rates at ages 20-24 decreased from 89 to 82; male rates were at first stationary at 112 and then fell to 108. Male rates increased over the four years in the age-groups 25-34, 35-44 and again at 75 and over, but decreased at ages 45-54. Female rates decreased at ages 45-64 but increased at 75 and over from 1,010 to 1,151.

Mental Hospitals

Diagnosis

Table M.6. Mental Hospitals. Numbers of First and Subsequent Admissions in Diagnostic groups and Proportions per 1,000 first admissions, 1951-1953
(1949: page 75; 1950-51: Table M.17)

Diagnostic Group	Sex	Numbers						Proportionate Distribution of 1,000 First Admissions		
		1951		1952		1953		1951	1952	1953

	F	15,800	9,695	15,789	10,707	17,468	11,527	70.2	69.9	71.1
Psychoneuroses	M	2,834	984	3,034	1,161	3,335	1,244	175	183	183
	F	4,048	1,452	4,177	1,725	4,377	1,779	180	185	178
Behaviour, character and intelligence disorders	M	1,204	741	1,214	932	1,332	872	74	73	73
	F	694	455	621	466	612	448	31	27	25
Others	M	1,961	763	2,048	871	2,069	920	121	123	113
	F	1,954	778	2,004	814	2,099	834	87	89	86
All diagnoses	M	16,193	8,219	16,604	9,351	18,234	10,044	1,000	1,000	1,000
	F	22,496	12,380	22,591	13,712	24,556	14,588	1,000	1,000	1,000

Table M.6 shows first and other direct admissions in four diagnostic groups. Those admissions classed as 'subsequent' in this table may not necessarily have had the same diagnosis at their first admission. The proportion of women first admitted with a diagnosis of psychosis was higher than that of men - 70 to 71 per cent compared with 62 to 63. A higher proportion of males than females first admitted had a diagnosis of behaviour, character and intelligence disorders. The proportions in the four groups did not vary greatly from year to year for either males or females.

Table M.7. Mental Hospitals. First Admission Rates per million Estimated Home Population in Sex and Age Groups, for Schizophrenia, Manic-Depressive Reaction and Senile and Presentile Psychoses, 1952 and 1953

	Sex	Year	Age Groups										All Ages
			10-	16-	20-	25-	35-	45-	55-	65-	75 and over		
Schizophrenia	M	1952	20	231	429	411	195	80	48	24	5	150	
		1953	24	222	461	451	208	90	48	20	10	161	
	F	1952	28	193	322	311	198	127	92	42	18	137	
		1953	18	195	306	345	214	145	98	40	20	145	
Manic-depressive reaction	M	1952	2	35	74	137	201	295	403	290	131	161	
		1953	4	31	98	180	247	375	466	346	154	198	
	F	1952	5	58	150	231	407	485	492	339	103	260	
		1953	2	64	165	350	476	523	571	449	129	312	
Senile and presentile psychoses	M	1952	-	-	-	-	0	11	76	534	1,813	97	
		1953	-	-	-	-	0	7	66	531	1,798	95	
	F	1952	-	-	-	-	1	12	103	734	2,147	170	
		1953	-	-	-	-	1	11	93	717	2,080	167	

Table M.7 compares first admission rates in 1952 with those in 1953, for schizophrenia, manic-depressive reaction and senile and presentile psychoses. For schizophrenia the first admission rates for both sexes were highest at ages 20-34, but male rates at these ages were about one-third higher than female rates. At ages 45 and over, female rates were considerably in excess of those for men. Most rates in 1953 were higher than those in 1952.

Admission rates for manic-depressive reaction reached their peak at ages 55-64 for both sexes, but for women aged 45-54 the rates were not far short of the maximum rate. At ages 55-64 the female rates were nearly one-quarter as high again as the male. Rates in 1953 exceeded those in 1952 for males aged 20 and over and for females aged 16 and over.

For senile and presentile psychoses the female rates were in excess of the male. At ages 65 and over, the admission rates showed some reduction compared with 1952.

Diagram III. First Admission Rates for Schizophrenia and Manic-Depressive Reaction by Sex and Age, 1953. Rates per 100,000 Estimated Home Population

Table M.8. Mental Hospitals. Direct Admissions in 1953, showing number of Previous Admissions
(1949: Table M.16; 1950-51: Table M.23)

Diagnosis	Sex	Number of Previous Admissions						First Admissions per cent of total	1949	
		0	1	2	3-6	7 and over	Total		Total	% of first admissions
Schizophrenia	M	3,421	1,778	801	548	51	6,599	52	5,495	57
	F	3,316	1,770	773	644	55	6,558	51	4,979	60
Manic-depressive reaction	M	4,194	1,566	643	508	93	7,004	60	5,449	62
	F	7,148	3,087	1,350	1,369	307	13,261	54	10,532	58
Senile psychosis	M	1,899	231	53	32	5	2,220	86	2,152	86
	F	3,624	460	129	89	14	4,316	84	3,594	87
All diagnoses	M	18,234	5,955	2,238	1,630	221	28,278	64	23,596	68
	F	24,556	8,087	3,172	2,856	473	39,144	63	32,189	68

Table M.8* shows that the proportion of admissions in 1953 which were first admissions was lower than in 1949 for all except males with senile psychosis. In 1953, for every 100 male and female schizophrenics who were admitted for a first visit, there were 52 males and 53 females making a second and 23 of each sex making a third visit. Comparable figures for patients with manic-depressive reaction were 100, 37, 15 for males and 100, 43, 19 for females. For each 100 patients having a first admission for senile psychosis there were 12 males and 15 females admitted for a second stay and 3 males and 4 females making a third visit

* See Appendix Table M.10 on page 122.

Diagram IV. Mental Hospitals. Admission Rates by Patient's Place of Residence, 1953. Rates per 100,000 Estimated Home Population

Fig. I. Schizophrenia

Diagram IV - (Contd.)

Fig. II. Manic-Depressive Reaction

Table M.9 shows first admission rates for schizophrenia and manic-depressive reaction per 100,000 estimated home population in different types of areas. (For other diagnoses see Appendix Table M.15(b), page 134.) At the more critical ages for schizophrenia, 16-34, the highest rates for both males and females occurred among people living in Greater London or a county borough, and the lowest rate among those living in rural areas. This was also roughly true of people aged 35-54. For men aged 20-24 the admission rate in Greater London and the county boroughs was two-and-a-quarter times the rate for those living in rural areas, and at ages 25-34 the rate for residents in county boroughs was twice that for rural residents.

Male first admission rates for manic-depressive reaction at ages 20-74 were highest among those living in urban areas, as also were female rates at ages 25-54. For both sexes the rates for those aged 45-74 were lowest among rural residents. At the ages of highest incidence, 45-64, there was not the same variation between rates for different types of areas of residence as was observed at the ages of maximum admission rates among schizophrenics.

Admissions of patients in the Registrar General's five social classes are discussed in detail in a separate section on page 29. Table M.10 shows the variation in the admission rates per million males aged 20 and over for certain diagnostic groups during 1951-1953.

Table M.10. Mental Hospitals. Admission Rates per million Males aged 20 and over by Social Class in Diagnostic groups, 1951-1953
(1950-51: Table M.25)

Diagnostic Group	Year	Social Class					Not stated per cent of total stated
		I	II	III	IV	V	
Schizophrenia	1951	164	164	294	315	803	8.9
	1952	174	173	318	318	804	9.8
	1953	164	170	332	365	872	10.6

	1952	182	184	263	238	411	4.4
	1953	164	201	294	280	407	5.1
Behaviour, character and intelligence disorders	1951	158	64	81	83	223	14.0
	1952	160	82	89	101	255	11.2
	1953	217	85	91	89	253	12.0
All diagnoses	1951	1,227	1,062	1,331	1,381	2,814	9.6
	1952	1,198	1,149	1,368	1,420	2,859	10.0
	1953	1,326	1,187	1,502	1,587	3,049	10.2

Admission rates for schizophrenia were higher in 1953 in Social Classes III, IV, and V than in 1951 and 1952. In each year the rates in Classes I and II and in Classes III and IV were similar, but there was a heavy excess in Class V. For manic-depressive reaction there were higher rates in 1953 in each social class than in 1951 and 1952. There was an excess in Class V but not as great as for schizophrenia, and the rates in Class I were higher each year than in Classes II and III. Admission rates for disorders of behaviour, character and intelligence increased during 1951 to 1953 in Classes I, II and III but in Classes IV and V there was a reduction in 1953 from the 1952 rates. The rates in Social Class I were higher each year than in Classes II, III and IV, mainly due to the excess number of admissions for alcoholism in this class.

Deaths, Departures and Discharges

In 1953 65,351 people left mental hospitals, compared with 60,912 in 1952 and 58,659 in 1951; these figures include 11,487 deaths in 1953, 11,661 in 1952 and 12,446 in 1951.

	F	6,689	25,304	309	5	134	3,640	2,125	38,206

*These figures include details of patients admitted outside the provisions of the Acts

†Patients discharged by order of members of Hospital Management Committee.

Table M.11 shows the number of deaths, departures and discharges according to different methods of discharge, for 1949 to 1953. The number who left, other than by death, was 27 per cent higher in 1953 than in 1949.

Table M.12 shows the duration of stay of all patients who departed or were discharged in 1952 and 1953.

Table M.12. Mental Hospitals. Duration of Stay of All Patients leaving by Discharge or Departure in 1952 and 1953, irrespective of year of admission

(1949: Table M.22; 1950-51: Table M.26)

1952

	Under 1 week	1 week-	1 mth.-	2 mths.-	3 mths.-	6 mths.-	9 mths.-	12 mths.-	18 mths.-	
Males	1,160	4,718	4,315	2,623	3,733	1,267	682	569	259	
Females	1,121	5,897	6,752	4,064	5,708	1,882	943	811	367	
	2 yrs.-	3 yrs.-	5 yrs.-	10 yrs.-	15 yrs.-	20 yrs.-	25 yrs.-	30 yrs. and over	All durations	
Males	274	283	197	113	55	25	27	43	20,343	
Females	395	342	253	158	77	45	33	60	28,908	

1953

	Under 1 week	1 week-	1 mth.-	2 mths.-	3 mths.-	6 mths.-	9 mths.-	12 mths.-	18 mths.-	
Males	1,329	5,439	5,042	2,790	3,962	1,349	676	615	261	
Females	1,372	6,927	7,596	4,318	5,871	1,904	954	881	408	
	2 yrs.-	3 yrs.-	5 yrs.-	10 yrs.-	15 yrs.-	20 yrs.-	25 yrs.-	30 yrs. and over	All durations	
Males	282	224	180	79	48	31	14	26	22,347	
Females	404	356	230	127	63	36	33	37	31,517	

Of those who left in 1952 2,380 people had been in hospital two years or more, and of these 1,086 had been there for at least five years; comparable figures for 1953 were 2,170 and 904. The proportions per 1,000 discharges for various lengths of stay were as follows: *

		Under 1 mth.	1 mth.-	2 mths.-	3 mths.-	6 mths.-	12 mths.-	2 yrs.-	5 yrs.-	20 yrs. and over	All
1952	Males	289	212	129	183	96	41	27	18	5	1,000
	Females	243	233	141	197	98	41	25	17	5	1,000
1953	Males	303	226	125	177	90	39	23	14	3	1,000
	Females	263	241	137	186	91	41	24	13	4	1,000

The median periods of hospitalisation of patients who departed or were discharged are shown in Table M.13

Table M.13. Mental Hospitals. Median Durations of Periods in Hospital of patients leaving by Discharge or Departure, 1949-1953

(1950-51: page 172)

Year	Sex	Duration of Stay			
		Less than 1 year	1 year but less than 5 years	5 years and over	All durations
1949	M	1.87 months	1 year 8.5 months	11 years 4.0 months	2.14 months
	F	2.00 "	1 " 8.2 "	10 " 4.9 "	2.32 "
1950	M	1.94 "	1 " 7.8 "	11 " 5.2 "	2.26 "
	F	2.02 "	1 " 8.3 "	11 " 3.5 "	2.36 "
1951	M	1.90 "	1 " 8.5 "	11 " 6.7 "	2.21 "
	F	1.97 "	1 " 8.5 "	10 " 11.3 "	2.29 "
1952	M	1.78 "	1 " 8.9 "	11 " 5.5 "	2.00 "
	F	1.91 "	1 " 8.4 "	11 " 10.8 "	2.17 "
1953	M	1.70 "	1 " 7.8 "	10 " 6.8 "	1.87 "
	F	1.81 "	1 " 8.1 "	11 " 3.6 "	1.98 "

While five years is too short a time for any definite trend to show, it is of interest that for both male and female patients discharged in 1953 the over-all median duration was for the first time less than two months.

The term 'quittance rate' has been used in a previous report to relate the deaths, departures and discharges in any year to the total number of patients who have been in hospital at any time during the year.

* See Supplements, 1949: page 91; 1950-51: page 172.

Table M.14. Mental Hospitals. Quittance Rates per 100,000 at risk, by Sex and Age, 1951 and 1953
(1950-51: Table M.30)

Year	Sex	Age Groups							All Ages
		20-	25-	35-	45-	55-	65-	75 and over	
1951	M	51,843	37,526	26,045	21,883	22,960	27,960	35,316	28,802
	F	56,408	45,986	34,713	26,992	22,692	22,081	25,882	29,249
1953	M	53,494	40,276	28,187	24,971	23,654	27,884	32,905	30,310
	F	60,256	51,816	37,733	29,658	24,207	22,713	25,167	31,205

Table M.14 compares the quittance rates per 100,000 patients in hospital at any time during the year for 1951 and 1953. There were higher rates of leaving in 1953 than in 1951 for both males and females at ages 20 to 64, and for all ages combined. Quittance rates in 1953 for various individual diagnoses are shown in Appendix Table M.19.

Mental Deficiency Hospitals

Admissions

At the beginning of 1952 there were 28,944 males and 26,104 females resident in mental deficiency hospitals; 29,658 males and 26,701 females at the beginning of 1953; and 30,236 males and 27,147 females at the end of 1953. During the two years the resident male population had increased by 4.5 per cent and the female by 4.0 per cent. There were 3,333 direct admissions in 1952 and 3,100 in 1953. The number of removals and discharges (excluding transfers) increased for male patients from 572 in 1951 to 664 in 1953, and for female patients there was a decrease from 633 in 1951 to 540 in 1953 - 16 and 15 per cent respectively. Deaths decreased for both sexes from 415 males and 393 females in 1951 to 400 and 371 in 1953 (see Table M.1, page 2).

Table M.D.1. Mental Deficiency Hospitals. Trend of Admissions by Sex and Age, and Admission Rates, per million Estimated Home Population 1950-1953
(1949: Table M.30; 1950-51: Table M.6)

65 and over	5	7	4	4	2	3	5	6
All Ages	80	73	84	83	59	58	68	59

In Table M.D.1 the lower numbers and rates in 1951 compared with 1950 may be due in part to the exclusion in 1951 and onwards of patients outside the provisions of the Mental Deficiency Acts. About three-quarters of the males and seven-tenths of the females were admitted before reaching age 25. In 1953, of the 1,754 males admitted, 10 per cent were under 5, 36 per cent between 5 and 16 and 30 per cent between 16 and 25; corresponding proportions for females were 8, 30 and 30 per cent.

The highest admission rates occurred at ages 16 to 20 for both sexes. In 1951 to 1953, male rates exceeded the corresponding female rates at ages under 35. In 1953 the ratio of male to female rates was:

0-2, 150%; 2-5, 149%; 5-10, 169%; 10-16, 140%; 16-20, 142%.

In the younger age-groups admission rates were somewhat higher in 1952 than in 1951 or 1953.

So long as the demand for hospital beds exceeds the supply, admission rates will depend on the accommodation available, whether the latter is due to the provision of new hospitals or to increasing discharge rates freeing more beds. At the beginning of 1953 the Local Health Authorities reported that there were 8,988 on the waiting list for admission to mental deficiency hospitals. It is of interest to compare the intake as between hospital regions (see Appendix Table M.D.1, page 154). Using the 1951 admission rates as base index of 100 per cent and expressing the 1952 and 1953 rates in terms of those for 1951 shows the following results:

Hospital Region	Males			Females		
	1951	1952	1953	1951	1952	1953
Newcastle	100	192	202	100	145	173
Leeds	100	122	135	100	131	106
Sheffield	100	78	127	100	86	94
East Anglia	100	98	62	100	98	76
Metropolitan (combined)	100	112	108	100	106	84
Oxford	100	123	57	100	235	184
South West	100	89	90	100	75	75
Wales	100	248	307	100	140	129
Birmingham	100	107	107	100	131	95
Manchester	100	116	109	100	142	121
Liverpool	100	125	175	100	400	414
All Regions	100	115	114	100	117	102

In the East Anglian and South Western regions there was a decline in rates of intake both in 1952 and 1953 as compared with 1951. The Newcastle, Leeds, Manchester and Liverpool regions and Wales all had admission rates in 1952 and 1953 in excess of those in 1951.

Table M.D.2. Mental Deficiency Hospitals. Admissions by Sex and Age according to the Principal Causes of Admission (classified according to the International Statistical Classification of Diseases, Injuries and Causes of Death), 1949-1953

Table M.D.2 shows the distribution of admissions by sex and age according to the main degrees of defect and other diagnoses from 1949 to 1953. Most admissions of idiots take place before the age of 10 years, nearly half those of imbeciles between five and sixteen years, and the majority of those of the feeble-minded between ten and twenty years. The number of feeble-minded males admitted decreased in 1950 and 1951, but the total for 1952 and 1953 was 10% more than for these two years.

Table M.D.3. Mental Deficiency Hospitals. Percentage distribution by Causes of Admission, 1951-1953

(1949: page 104; 1950-51: Table M.32)

	1951		1952		1953	
	Males	Females	Males	Females	Males	Females
Idiots	10	10	11	14	11	9
Imbeciles	33	32	34	34	34	36
Feeble-minded, morons, high-grade defects	51	51	49	46	49	48
Mongols	3	3	3	3	3	3
Others	3	4	3	3	3	4
Total	100	100	100	100	100	100

Table M.D.3 shows that there is little variation in the proportions in which different grades of defect are represented, either from year to year or between the sexes.

Of the 1,776 males and 1,562 females admitted in 1952, 146 males and 108 females (8 and 7 per cent respectively) were untestable, and for a further 201 males and 229 females (11 and 15 per cent) the results of any tests which may have been made were not stated. Among the 1952 and 1953 admissions, the commonest intelligence quotient for imbeciles under 16 was between 30 and 39 and for the feeble-minded between 50 and 59. For feeble-minded people of 16 and over the commonest mental age was 8 or 9 (see Appendix Table M.D.3 page 158).

Table M.D.4. Mental Deficiency Hospitals. Average Intelligence Quotients and Mental Ages on Admission, 1951-1953

(1949: Table M.36; 1950-51: page 183)

	Average Intelligence Quotients at Ages:-			Average Mental Ages at Ages:-				
	2-	5-	10-	16-	20-	25-	35-	45-54
Males								
1951	33	34	45	8.6	8.0	7.8	7.7	6.5
1952	27	32	42	8.5	8.1	7.8	7.2	6.7
1953	27	31	41	8.6	8.1	7.7	7.1	6.4
Females								
1951	26	33	44	8.4	8.4	7.1	6.1	6.5
1952	28	31	40	8.0	7.8	6.5	6.7	5.8
1953	23	33	42	8.4	7.6	6.9	6.0	6.4

In the three years 1951 to 1953, the average intelligence quotients for male admissions decreased from 33 to 27 for boys aged 2-4 and from 34 to 31 for those aged 5-9. For young men aged 16-19, the average mental age on admission remained much the same during 1951-1953. Average intelligence quotients for girls aged 5-14 were lower in 1952 than 1951 but higher in 1953 than in the preceding year. It is unlikely that these minor annual fluctuations are of significance.

Table M.D.5. Mental Deficiency Hospitals. Sex and Age Group on Admission by Social Class, 1953

(1949: Table M.35; 1950-51: Table M.33)

Social Class	Age Group at Admission											All Ages
	0-	2-	5-	10-	16-	20-	25-	35-	45-	55-	65 and over	
	Males

Not stated	12	48	143	181	189	61	84	75	52	19	7	871
Total	28	141	301	334	383	140	183	126	78	31	9	1,754
	Females											
I and II	3	9	10	11	5	2	7	3	1	1	-	52
III	9	27	36	34	21	9	9	7	4	-	1	157
IV	2	6	17	33	52	31	34	11	7	6	1	200
V	-	8	23	36	56	25	17	8	1	1	-	175
Not stated	4	40	84	115	148	59	95	89	78	35	15	762
Total	18	90	170	229	282	126	118	91	43	17	17	1,346

Efforts to relate patients to either their own social class or, if dependent, to that of the parent, spouse or guardian responsible for them, were vitiated by poor reporting. Table M.D.5 shows that for about half the males admitted and more than half the females, the occupation of patient or guardian, which determines the patient's social class, was not stated. For those cases where the social class could be determined, more than half the feeble-minded males admitted in 1953 were in Social Class V. Sixty-one per cent of the male idiots were in Social Class III compared with only 8 per cent in Social Classes I and II. Forty-two per cent of male imbeciles were in Social Class III and another 43 per cent in Classes IV and V. Among female admissions 47 per cent of the feeble-minded were in Class IV and 38 per cent in Class V, compared with only 3 per cent in Classes I and II, (see Appendix Tables M.D.5 and 6, pages 161 and 162).

In 1953 questions about whether the patient's parents were related by blood brought the reply 'yes' in 38 cases, 'no' in 1,343 cases and 'not known' in 1,719 cases. The mother's age at patient's birth was unknown in 1,384 cases out of 3,100. There was a better response to the enquiry about how many children had been born alive to the patient, but there is no way of checking the accuracy of the information. The results for 1953 are shown in Table M.D.6.

**Table M.D.6. Mental Deficiency Hospitals.

Of the 149 single women admitted at ages 45 and over, only two were stated to have had live children compared with 8 out of 111 at ages 35-44, 25 out of 155 at ages 25-34, and 27 out of 117 at ages 20-24. Of 1,730 single men admitted only one was stated to have been the father of a live-born child.

Discharges and Deaths

In 1952, 633 males and 591 females were discharged from mental deficiency hospitals and in 1953 664 males and 540 females. Table M.D.7 shows that 438 males (66 per cent) and 278 women (51 per cent) discharged were aged 20-34.

**Table M.D.7. Mental Deficiency Hospitals.
Age Groups at Discharge by Diagnosis, 1953**

(1949: Table M.37; 1950-51: Table M.37)

Diagnosis	Sex	Age Group at Leaving												All Ages

Table M.D.8 shows the age distribution at death of 400 males and 371 females who died in mental deficiency hospitals in 1953. Forty-two per cent of the females who died were aged 45 and over, compared with 30 per cent of the males. Sixty-seven per cent of the deaths of male idiots occurred at ages under 16, compared with 31 per cent of all male deaths. Appendix Table M.D.8 page 174 relates the period in hospital before death with the patient's age on admission.

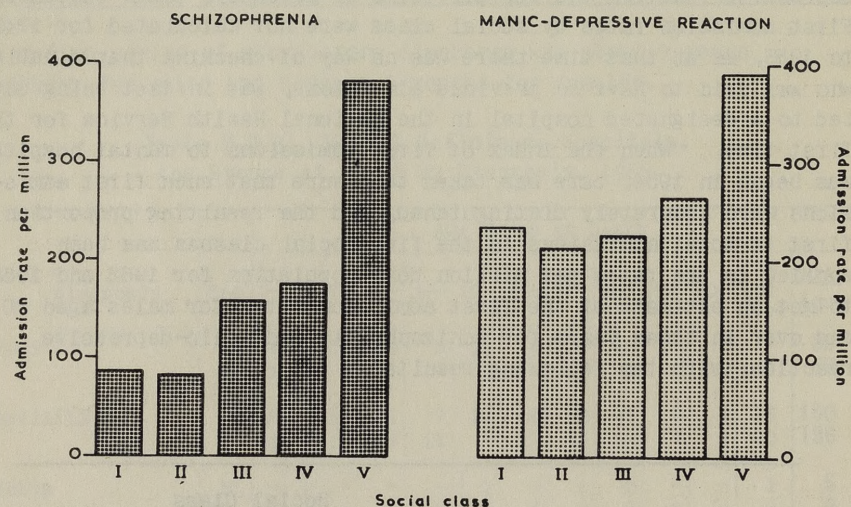

*See Supplements, 1949: page 109; 1950-51: page 108.

Social Class and Occupation

In the two previous reports on Mental Health Statistics, tables were shown of admission rates by age for males aged 20 and over in the Registrar General's five social classes. These tables were based on the social class distribution in the one per cent sample of the 1951 Census. The rates, which were for all admissions, were particularly high in Social Class V for schizophrenia, manic-depressive reaction and for all forms of psychosis taken together. First admission rates by social class were not calculated for 1949 to 1953, as at that time there was no way of checking that a patient, who was said to have no previous admissions, was in fact being admitted to a designated hospital in the National Health Service for the first time. When the index of first admissions to mental hospitals was begun in 1954, care was taken to ensure that such first admissions were accurately distinguished, and the resulting proportion of first to total admissions in the five social classes has been applied to the rates per million home population for 1952 and 1953 to get an estimate of the first admission rates for males aged 20 and over in those years for schizophrenia and manic-depressive reaction, with the following results:

		Social Class				
		I	II	III	IV	V
Schizophrenia	1952	94	83	153	153	353
	1953	88	82	159	176	383
Manic-depressive reaction	1952	182	166	184	218	326
	1953	235	213	229	266	392

Diagram V. Mental Hospitals. Estimated First Admission Rates for Schizophrenia and Manic-Depressive Reaction by Social Class, for Males aged 20 and over, 1953. Rates per million Estimated Home Population

It may be concluded that for first, as for total admissions, there was a considerable excess in Social Class V.

Appendix Tables M.8(a) and (b), pages 114-117, show the numbers of male admissions and rates per million home population by social class in 1952 and 1953, and also the numbers of cases in which there was no occupation stated. These cases, expressed as percentages of the numbers with occupation stated, were for the most part most numerous at ages 20 to 24 and 55 and over, and include, in the younger age-group, a number who have not yet settled down to an occupation, and at the older ages people who have retired. Among the admissions with occupation stated, however, are included those retired people who, on entering hospital, have given their former occupation.

The high admission rates for schizophrenia for men in Social Class V occurred in each of the age-groups shown in the tables, although the excess was less marked at ages 65 and over than among younger men. For several others of the diagnoses shown there was a similar excess of admissions in both years in Social Class V, for example, manic-depressive reaction at ages 20-64, anxiety reaction at ages 25-54, hysterical reaction at ages 20-54, and neurotic-depressive reaction at ages 25-64. Whereas at ages 20-44 the admission rates for schizophrenia increased from Social Class I to V, at ages 55 and over the admission rate for Class I exceeded that for Class II; this excess showed also for manic-depressive reaction in males aged 55 and over.

For alcoholic psychosis the rates were generally highest in Classes I and II. Whereas at ages 25-34 Class V had the highest admission rates for alcoholism, acute, chronic or unspecified, at ages 35 and over the rates in Class I were far in excess of those in any other social class, and it is this factor which accounts for the high rates for Class I in the aggregate of admissions for disorders of behaviour, character and intelligence.

In the Report for 1949, Table M.21, page 90, showed the numbers of admissions according to the patient's type of occupation. The grouping of occupations was that which had been used previously in the Survey of Sickness. It had the defect of having an industrial bias, but as it had to be made roughly midway between the Censuses of 1931 and 1951 - which provide data about the distribution of occupations - there was no up-to-date information available on which to base a purely occupational analysis. A similar table for 1953 follows:

Numbers of Admissions according to Patient's Type of Occupation, 1953

Diagnosis	Sex	Retired and Unoccupied	Agriculture and Forestry	Metal Manufacture	Textile and Clothing	Building and Decorating	Transport	Commerce and Finance	Professional, Technical, Administrative	Personal Service	Clerical	Unskilled	Other Occupations	Not Stated	Total
Schizophrenia	M	194	393	811	164	384	413	293	264	217	480	1,580	810	596	6,599

All causes, 1949	M	482	1,781	2,569	759	1,496	1,848	1,543	1,153	1,239	1,474	3,562	3,368	2,322	23,596
	F	4,165	140	133	926	22	136	690	1,293	3,469	1,380	624	462	18,749	32,189

In all there were 3,012 more males admitted with a psychosis in 1953 than in 1949. Nearly a third of this increase was due to the admission of 1,041 more men from unskilled occupations in 1953, 548 of them being admitted with schizophrenia. The variations shown in the table do not, however, take into account the varying numbers at risk from year to year, nor the age-structure within each occupational group.

In an attempt to find whether, within each social class, there was much variation in admission rates between men in different occupations, all stated first admissions to mental hospitals of men aged 20 and over during the five years 1949 to 1953 were combined, and 5-year admission rates for 99 occupational groups produced by dividing the numbers of admissions in each occupation-age group by the corresponding numbers at the 1951 Census. These rates, per 10,000 in each occupation-age group, are shown separately for single men and for those who have ever been married, and refer to admissions for schizophrenia, manic-depressive reaction and for all other diagnoses (see Tables A. to F. pages 62-91).

When considering these tables a number of facts about the statement and classification of occupations must be taken into account:-

(a) **No statement of occupation.** This may be due simply to omission, to the patient being unemployed or having retired at the time of admission, or to lack of knowledge, either because the patient is unable to reply himself or because an informant does not know the answer.

(b) **Errors.** These may be inadvertent, because the records officer does not understand what the patient has said, the entry may be ambiguous, or the coder may interpret it wrongly and assign it to the wrong category. 'Fitter' is a common example of ambiguity.

Intentional errors may arise from deliberate misstatement for prestige or other reasons, as when a stoker describes himself as a heating engineer. The nature of the illness may cause the patient to make wild statements about his occupation.

(c) **Change of occupation.** In some cases patients have changed their occupation frequently, and it is pure chance which job they happen to be working at when admitted; they may be in different social classes at different admissions. The professions, or skilled jobs requiring an apprenticeship, or established posts with a qualifying entrance examination are, however, unlikely to provide a temporary refuge for those whose mental state prevents them from following their normal occupation, and admissions from them may be regarded as

'belonging' to these occupations. Admissions from semi - or unskilled occupations may be inflated by the inclusion of people whose mental state has led them purposely to seek less demanding jobs, or whose instability has caused them to drift down the occupational scale.

(d) **Age-Incidence of Disease.** Occupations which can be reached only in middle age and as a result of promotion are unlikely to show the same pattern of mental disease incidence as those of lower status.

Despite these and other limitations which may occur, admission rates by occupation may not be completely unmeaningful. In many cases the patient has had only one occupation, so that there may be a relation between his work and his illness or between his choice of occupation and the type of personality most prone to mental breakdown. The criticism of lack of realism which is made of studies of long term patients in relation to occupations followed ten, twenty or more years previously does not apply here.

Schizophrenia

When Tables A, and B, which give the first admission rates for schizophrenia, are compared, the first impression is that rates for single men were considerably higher than for those married, widowed, separated and divorced, a group which will be referred to as 'ever-married'. In each of the 99 occupational groups the all-ages rate at 20 years and over was higher for single men, and this is true also for men aged 25-34, which are usually the ages of maximum admission rates for schizophrenia. At ages 20-24 the rates for single men were also disadvantageous except for four groups, Numbers 1, 47, 63 and 83, whose rates were each based on less than 20 admissions during the five years. At ages 35-44 single men had higher rates except for Groups 42 and 47. At ages 45-54 and 55-64 there were a number of groups in which the ever-married had higher rates than single men, but as in most of these cases the comparison is between rates of 0 and 1, the differences are unimportant.

For each of the occupational groups it can be concluded that, at the ages of 20-44, where first admission rates for schizophrenia are highest, the rates for single men compare very unfavourably with those for men who have married.

The social class gradient which has been noticed for all male schizophrenics applies also when the distinction between single and ever-married is made. The five-yearly first admission rates per 10,000 men aged 20 and over were as follows:

Marital Status	Social Class				
	I	II	III	IV	V
Single	16.4	25.4	30.8	32.1	68.0
Ever-married	2.32	2.34	3.91	4.03	7.99

Diagram VI. Mental Hospitals. Five-yearly First Admission Rates for Schizophrenia by Social Class, for Single and Ever-married Males aged 20 and over, 1949-1953. Rates per 10,000 1951 Census Population

For single men the rate in Class V was 4.1 times that in Class I and for the ever-married 3.4 times. Among single men the admission rates in Classes III and IV were very similar; among the ever-married there was little difference between rates in Classes I and II.

Of the five occupational groups in Social Class I, the rates for single men aged 20 and over were highest in Groups 2, 3 and 4, which consist of professional workers with a high standard of education. Among married men the rate was highest for scientists, including doctors and chemists. In all five occupational groups the rates at ages under 45 for single males were less than the corresponding rates for all single males in England and Wales.

In Social Class II rates for single men at ages 20-44 were high among farmers and bailiffs; miscellaneous professional and technical workers; proprietors and managers of food shops; teachers; and draughtsmen and at ages 20-34 the first three of these groups had rates above the corresponding rates for all single males. The lowest rates were for managers in manufacturing and transport and for 'white collar' managers.

The most striking rates among single men in Social Class III were those for hewers and getters of coal. The rates may however have been inflated by the inclusion of men who on admission were described as 'miners' or 'colliers', particularly since Group 20, which contains subordinate superintending staff and coal cutting and power loading machine men as well as workers in other mines and quarries, and Group 68, Coal miners below ground, had low rates. A separate table of inclusive rates for those engaged in coal mining appears below (Table G. page 92).

Social Class III contains 48 occupational groups. If 10 groups were selected on a random basis from among the 48, each group would have a chance of 10 in 48 of being selected. The odds against any occupational group having rates among the 10 highest in each of the three age-groups between 20 and 44 are therefore nearly 111 to 1. Nevertheless for single men five occupational groups were found to satisfy the condition described and four others had rates in the top ten in two of the three age-groups. It may be concluded that in these cases there is more than a chance relationship between the occupational group and the high admission rate for young single male schizophrenics. The occupational groups concerned were:

	Ages		
	20-	25-	35-44
19 Hewers and getters, coal	67	122	53
27 Machine erectors, millwrights, etc.	33	68	43
36 Textile goods workers	44	80	44
51 Other transport workers in Class III	59	89	50
60 Clerks	38	71	48
35 Leather workers	(25)*	82	64
50 Communications workers (chiefly G.P.O.)	45	60	(37)*
54 Salesmen, shop assistants (not food)	33	(50)*	56
64 Chefs, cooks, waiters	51	85	(31)*

These rates may be compared with the average national rate for all male schizophrenics 29 58 39

Groups with rates among the ten lowest in each age-group were Foremen, engineering and metals; Building foremen; and the mixed group 'Other miners in Class III' referred to above. In addition seven groups had rates among the 10 lowest in two age-groups out of three, Passenger vehicle drivers; Commercial travellers; Roundsmen and van salesmen; Insurance brokers, agents and canvassers; Policemen, firemen etc.; Servicemen (other ranks); and 'Other skilled railway workers'. These occupational groups had rates which were below the corresponding national average in almost every case. The low rates for schizophrenia among foremen are possibly due to the selection of personnel for these jobs. Among salesmen of various types, rates for those in foodstuff shops were low, for those in other shops high.

Among men who had ever married, the highest rates in at least two of the three age-groups were those for Groups 19, 28, 35, 36, 40, 51, 60 and 64. There are therefore six occupational groups in Social Class III with high first admission rates for males aged 20-44, whether married or single, namely, Hewers and getters of coal; Leather workers; Textile goods workers; Clerks; Chefs, cooks and waiters; and Other transport workers in Class III.

Of the 22 occupational groups in Social Class IV the following were distinguished by high rates for single men:

*The rates in brackets were not in the 10 highest in the age-group concerned.

	Ages		
	20-	25-	35-44
66 Gardeners	73	67	65
80 Barmen, counter hands, hall porters	42	80	57
84 Ward orderlies, other domestic servants	60	104	67

In each case these rates were higher than the corresponding national rate. Groups with the lowest rates, and which were well below the national average were:

	Ages		
	20-	25-	35-44
68 Coal miners below ground	7	14	10
79 Coal carmen and hawkers	14	27	14
85 Caretakers and office keepers	-	23	19

As already mentioned, these low rates for coal miners below ground, coupled with the high rates for hewers and getters of coal in Social Class III point to errors in assignment. In Social Class IV high rates were also shown among the ever-married in Groups 80, Barmen etc. and 84, Ward orderlies and other domestic servants.

Among single men in Social Class V, the rates for Kitchen hands, 136; 159; 121; and for 'Other' labourers, 191; 387; 218; exceeded all other rates in this class, the next highest being Group 92, Messengers, liftmen and other porters, 65; 98; 50. On the other hand the rates for Group 89, Craftsmen's labourers (mainly navvies) 4; 9; 5; and for 97, Labourers in engineering trades 18; 35; 15; were very low in comparison. Rates have therefore been calculated for all labourers together and are shown below (page 92). Kitchen hands and 'Other labourers' also had the highest rates among the ever-married in Social Class V. If all labourers were omitted from Class V, the result would be to reduce the rate at ages 20 and over from 68 to 42 per 10,000 for single men and from 8 to 4 for those ever-married. The age-specific admission rates of schizophrenics per 10,000 in Social Class V, compared with the rates for all males would then be as follows:

	Age Groups						
	20-	25-	35-	40-	55-	65 and over	All Ages 20 and over
Single							
Social Class V (excluding labourers)	42	74	49	17	8	-	42
All males	29	58	39	20	10	3	35
Ever-married							
Social Class V (excluding labourers)	10	10	7	3	2	1	4
All males	6	7	5	3	2	1	4

Diagram VII. Mental Hospitals. Five-yearly First Admission Rates for Schizophrenia for Single and Ever-married Males aged 20 and over, distinguishing Social Class V (excluding Labourers), 1949-1953. Rates per 10,000 1951 Census Population

Of the individual occupational groups other than labourers in Social Class V, the following had rates for single men below the national average; Group 96, Warehousemen's and storemen's assistants, aged 20-54; 90, Railway porters, aged 25-44; 93, Costermongers and newspaper sellers, aged 20-34.

Manic-Depressive Reaction

First admission rates for manic-depressive reaction are shown for single males in Table C. and for those married, separated, widowed and divorced in Table D. (page 77). The pattern of admission rates is not so clearly defined here as it was for schizophrenia. Although in many occupational groups the rates for single men were higher than for the ever-married, there are a number of groups in which admission rates for the ever-married were higher, either for all ages 20 and over or in the crucial age-groups 45-54 and 55-64. Maximum admission rates do not appear consistently in one age-group and in some occupations the maximum rate for single men is not in the same age-group as for the ever-married. Where rates for single men exceed those for the ever-married or vice versa, the differences are not so great as in the case of schizophrenics.

In Social Class I rates for single men were highest in Group 4, Public administration and journalism, and for ever-married men in Group 3, Scientists including doctors and chemists. In Class II Teachers; Draughtsmen; and Proprietors and managers of food shops were among the single groups with the four highest rates in both age-groups 45-54 and 55-64 and the first two of these had excessive rates also for ever-married men in these groups. In Social Class III rates among the highest ten in both age-groups were experienced by single men in Group 60, Clerks and 64, Chefs, cooks and waiters and these two groups were among those with high rates also for the ever-married.

In Social Class IV Group 76, Railway workers in Class IV, had disadvantageous rates for both single and ever-married men. Among single men 66, Gardeners, and among ever-married men 70, Semi-skilled workers in metal manufacture, also had high admission rates. Two groups had excess rates in Social Class V for both single and ever-married men, 92, Messengers; and 99, Other labourers. The latter group must however once again be compared with Groups 88 and 89, for which the rates were as follows:

	Single		Married	
	45-54	55-64	45-54	55-64
99 Other labourers	102	104	54	62
88 Labourers, building	19	28	20	34
89 " (mainly navvies)	11	22	7	27

It is difficult to single out occupational groups with minimum rates, but on the whole they seem to show the same tendencies as with schizophrenia, that is, low rates in occupations for which the personnel would have been selected, for example, Group 33, Inspectors, viewers, testers or 42, Building foremen.

Other Diagnoses

Tables E. and F. (pages 82 and 87) show the first admission rates per 10,000 for single and ever-married men respectively, for all remaining diagnoses taken together. Since all diagnoses of causes of admission are grouped according to a Short List of 147 Causes for Mental Health Statistics*, those included in Tables E. and F. combine all terms in the Short List except numbers 22-29, Schizophrenia and 30-32, Manic-depressive reaction. With such an amalgamation of diagnoses it would not be expected that any consistent pattern would show in the admission rates. Leaving out of the discussion Groups 5 and 58, Service officers and servicemen of other ranks, for whom the confusion between acting and retired members is probably greatest, it was found that certain occupational groups had rates in excess of the others in their social class in several of the five age-groups 20-64. In what follows a group has been counted as having high rates if this was so in at least three age-groups out of five. With this criterion, in Social Class I Groups 2, Engineers, surveyors, architects, and 3, Scientists, including doctors and chemists, had high rates. In Class II rates were high for Groups 10, Draughtsmen, and 13, Proprietors and managers of food shops, among single men; for Groups 9, Teachers, and 12, Proprietors and managers of hotels, inns, etc., among the ever-married, and for Group 11, Miscellaneous professional and technical workers, in both cases. High rates in Class III were found among both single and ever-married men in Groups 19, Hewers and getters of coal; 51, Other transport workers in Class III; 54, Salesmen and shop assistants (others); 64, Chefs, cooks, waiters; and 65, Other workers in personal service and entertainment, also in Group 27, Machine erectors, millwrights, etc. among single men and Groups 28, Motor mechanics and other fitters, and 60, Clerks, for ever-married men. In Social Class IV rates were high for Groups 66, Gardeners; 80, Barmen, counter hands, hall porters; and 84, Ward orderlies, other domestic servants, whether single or ever-married, for Group 85, Caretakers, office keepers among single men and group 76, Railway workers in Class IV, among the ever-married. In Social Class V four groups were outstanding among single men, namely 92, Messengers, liftmen and other porters; 93, Costermongers, newspaper sellers; 95, Kitchen hands and 99, other labourers, and among the ever-married groups, 88, Craftsmen's labourers, building; 95, Kitchen hands; and 99, Other labourers, had very high rates.

*See Supplement, 1949: Appendix B.

The rates for Group 95, Kitchen hands, compared with the corresponding rates for all males were:

	Age Groups						All Ages 20 and over
	20-	25-	35-	45-	55-	65 and over	
Single							
Kitchen hands	120	154	188	130	116	201	148
All males	19	41	53	58	67	11	41
Ever-married							
Kitchen hands	-	71	71	76	50	79	67
All males	14	18	20	24	33	74	30

The very high rates for Group 99, 'Other labourers' are to some extent offset by the excessively low rates for Group 89, Craftsmen's labourers, mainly navvies.

In general there was the same tendency for supervisory workers to have low admission rates as was noted for men with schizophrenia and manic-depressive reaction. For example, in Social Class II the groups with low rates were 7, Civil servants (executive) and Local Authority officials; and Managers in Groups 16 and 17. In Class III rates were low for Group 33, Inspectors, viewers and testers; 42, Building foremen; and 21, Foremen engineering and metal. Rates were also low in Social Class III for Group 46, Motormen, signalmen, guards; 53, Salesmen and shop assistants (foodstuffs); and 63, Stationary engine drivers.

Table G. shows the first admission rates per 10,000 obtained by combining some groups in which classification might have been confused. The first group contains occupation Groups 19, Hewers and getters of coal; 68 and 69, coal miners above and below ground. For schizophrenia among single men, instead of the following individual group rates:

	Ages			
	20-	25-	35-	45-54
Group 19	67	122	53	79
" 68	7	14	10	2
" 69	44	42	12	-

the following combined rates were obtained:

30	60	26	25
----	----	----	----

These combined rates are no doubt more meaningful than the excessively high rates for hewers and getters and the very low rates for coal

miners above and below ground. Similar scaling-down effects were produced for single men with both manic-depressive reaction and with "other" diagnoses, and for married men in each of the three diagnostic groups, although here the difference between rates for hewers and getters and for coal miners above and below ground was not so marked.

Another two groups between which there might be confusion in assignment are 80, Barmen, counter hands, hall porters; and 95, Kitchen hands. There are many small catering establishments in which any member of the staff may perform a variety of duties which would bring them into either of the two groups. Since for both schizophrenia and "other" diagnoses men in each of these occupational groups, whether single or ever-married, were already among those with the highest rates in their respective social classes, the combined rates are still high.

The third combined group in Table G. comprises all labourers, irrespective of social class. The result is, that in comparison with the combination of barmen, kitchen hands etc., their rates were:

- lower for schizophrenia, for both single and ever-married men aged 20-44;
- higher for manic-depressive reaction for single men aged 45-64;
- much lower for other diagnoses for single men aged 20-64;
- lower for married men aged 25-64.

Conclusion

From the foregoing analysis it appears that there are certain occupational groups which are associated with first admission rates above the average. Adverse rates appear to be connected with a high standard of education, with clerical work, domestic work, branches of the catering industry and with labouring. Why this should be so is open to speculation and it is difficult to separate cause and effect.

How far the actual work and how far the general living conditions which certain types of industry involve are connected with mental health is uncertain. Detailed ecological studies are required, taking in the workers' whole environment, and that a start might possibly be made among those groups which have been shown to have exceptionally high or low admission rates.

Constitution of Occupational Groups in terms of the
Registrar General's Classification of Occupations Census, 1951

Social Class I - Professional, etc., Occupations

1. Financial Administration
 - 614 Secretaries and Registrars of Companies, Institutions and Charities
 - 650 Bus and Tramway Managers and Superintendents
 - 670 Shipping - Owners, Managers, Brokers and Agents
 - 750 Company Directors (so returned)
 - 751 Bankers, Bank Managers, Inspectors, etc.
 - 752 Stock Brokers, Stock Jobbers
 - 753 Insurance Managers, Underwriters
 - 810 Qualified Accountants
2. Engineers, Surveyors, Architects
 - 786 Civil, Structural, Municipal Engineers
 - 787 Mechanical Engineers
 - 788 Electrical Engineers
 - 789 Chemical and Gas Engineers
 - 790 Mining Engineers
 - 791 Surveyors
 - 792 Architects, Town Planners
 - 793 Ship Designers, Ship Surveyors, Naval Architects
3. Scientists, including Doctors & Chemists
 - 766 Physicians, Surgeons, Registered Medical Practitioners
 - 767 Radiologists
 - 768 Dental Practitioners
 - 801 Metallurgists
 - 802 Biological Scientists
 - 803 Physicists
 - 805 Mathematicians, Statisticians, Actuaries, Economists
 - 809 Other Scientists
4. Public Administration & Journalism (including Lawyers, Civil Servants, Clergy)
 - 610 Civil Service Administrators and Other Higher Officers
 - 760 Clergymen (Anglican Church)
 - 761 Roman Catholic Priests, Monks
 - 762 Ministers of other Religious Bodies
 - 764 Judges, Stipendiary Magistrates, Barristers
 - 765 Solicitors
 - 811 Authors, Editors, Journalists, Publicists
 - 976 Officials (not clerks) of Foreign Governments

5. Service Officers
 - 820 Royal Navy, Royal Marines - Commissioned Officers (Effective)
 - 822 Army - Commissioned Officers (Effective)
 - 824 Royal Air Force - Commissioned Officers (Effective)

Social Class II - Intermediate Occupations

6. Farmers, including Bailiffs, etc.
 - 010 Farmers and Farm Managers
 - 011 Farm Bailiffs and Farm Foremen
7. Civil Servants (Executive) and L.A. Officials
 - 611 Civil Service Executive and Higher Clerical Officers
 - 612 Local Authority Administrators and Executive Officers
 - 830 Police - Chief Constables, Inspectors, Superintendents
8. Costing, Estimating and Accounts Clerks
 - 895 Costing, Estimating and Accounts clerks (including Book-keepers)
9. Teachers
 - 780 Music Teachers
 - 785 Other Teachers
10. Draughtsmen
 - 799 Draughtsmen (not elsewhere specified)
11. Miscellaneous Professional and Technical Workers
 - 020 Land Agents, Estate Managers
 - 759 Finance Occupations (not elsewhere specified)
 - 763 Itinerant Preachers, Mission Workers etc.
 - 769 Veterinary Surgeons and Practitioners
 - 770 Trained Nurses
 - 774 Pharmacists
 - 775 Physiotherapists, Masseurs
 - 776 Radiographers, and Assistants
 - 777 Opticians (Ophthalmic, Consulting, Dispensing)
 - 779 Other Medical Auxiliary Services
 - 794 Industrial Designers
 - 800 Chemists (not Pharmaceutical Chemists)
 - 812 Librarians (not Booksellers)
 - 813 Officials of Political, Industrial and Trade Associations
 - 814 Social Welfare Workers
 - 815 Painters, Sculptors, Engravers (Artists)
 - 819 Other Professional and Technical Occupations
 - 870 Stewards in Schools and other Institutions
 - 970 Managers (not elsewhere specified)

12. Proprietors and Managers of Hotels, Inns, etc.
 - 862 Proprietors and Managers of Restaurants
 - 863 Lodging and Boarding House Keepers
 - 864 Proprietors and Managers of Hotels
 - 865 Publicans, Beersellers, Inn Keepers
13. Proprietors and Managers of Food Shops
 - 720 Proprietors and Managers of Grocery and Provision Shops
 - 721 Greengrocers and Fruiterers
 - 722 Butchers
 - 723 Fishmongers and Poulterers
 - 724 Proprietors and Managers of other Food Shops
14. Proprietors and Managers of Other Shops
 - 725 Proprietors and Managers of Retail Chemist and Photographic Shops
 - 726 Confectioners, Tobacconists and Newsagents
 - 728 Proprietors and Managers of General and Mixed Businesses (Retail)
 - 729 Proprietors and Managers of Retail Businesses for the sale of other Non-Food Goods
15. Proprietors and Managers, Wholesale
 - 710 Proprietors and Managers of Wholesale Businesses
 - 711 Brokers, Agents, Factors (not elsewhere specified)
16. Managers in Manufacturing and Transport
 - 581 Clerks of Works
 - 620 Managers in Mining, Quarrying and the Treatment of Non-Metalliferous Mining Products
 - 621 Managers in Chemical and Allied Trades (incl. Coal Gas Production)
 - 622 Managers in Engineering and Allied Trades
 - 623 Managers in the Production of Textiles, Textile Goods, Leather, Leather Goods
 - 624 Managers in Building and Contracting
 - 629 Managers in other Industrial Undertakings
 - 630 Railway Officials, Passenger and Goods Agents
 - 651 Car and Coach Hire Proprietors and Managers
 - 663 Garage Proprietors and Managers
 - 671 Harbour, Dock, Canal Officials; Piermasters
 - 672 Wharfingers and Stevedores
 - 673 Navigating Officers and Pilots
 - 690 Air Transport - Directors and Managerial Staff
 - 700 Managers and Directors in Transport and Communication
17. 'White-collar' Managers
 - 615 Heads or Managers of Commercial and Industrial Office Departments
 - 712 Buyers (not Manufacturers')

17. White-collar' Managers - (Contd.)
 - 713 Sales Managers (Manufacturers')
 - 714 Advertising Agents and Managers
 - 756 Auctioneers, Estate Agents, Appraisers, Valuers
 - 757 Money Lenders, Pawnbrokers
 - 840 Theatre Managers, Lessees of Theatres, Cinemas, Concert Halls, etc.
 - 841 Producers and Stage Managers in Film Studios, Theatres, etc.
 - 843 Proprietors and Managers of other Entertainments and Sports

Social Class III - Skilled Occupations

18. Skilled Agricultural Workers
 - 013 Market Gardeners, Nurserymen, Seedsmen
 - 014 Market Gardeners', Nurserymen's, etc., Foremen
 - 022 Agricultural Machine, Tractor - Proprietors, Foremen, Drivers, Attendants
 - 030 Foresters and Woodmen
19. Hewers and Getters, Coal
 - 042 Hewers and Getters (including powered hand tool workers)
20. Other Miners in Class III
 - 040 Coal - Subordinate Superintending Staff
 - 041 Coal Cutting and Power-loading Machine Men
 - 050 Other Mines, Quarries, Workings, Brine Pits, Oil Wells - Subordinate Superintending Staff
 - 051 Getters in other Mines and Closed Quarries
21. Foremen, Engineering and Metals
 - 110 Furnace Foremen
 - 111 Foremen in Rolling, Tube and Wire Mills
 - 112 Foundry Foremen
 - 113 Machine Shop, Foremen
 - 114 Foremen - Fitting, Erecting
 - 115 Foremen - Electrical Work
 - 116 Foremen - Watch, Clock and Scientific and Surgical Instrument Making
 - 117 Overseer - Precious Metals, Gem Setting
 - 119 Other Foremen
22. Workers in Iron and Steel Foundries and Heavy Engineering
 - 121 Puddlers, Shinglers
 - 122 Blast Furnacemen, Steel Melters and their Teams
 - 125 Other Furnacemen and their Assistants
 - 126 Rollers and their skilled Assistants
 - 128 Tube Drawers and their Teams

22. Workers in Iron and Steel Foundries and Heavy Engineering
- (Contd.)
- 129 Wire Drawers and Makers
 - 130 Other Skilled Workers
 - 131 Iron or Steel Moulders and Core Makers
 - 132 Non-Ferrous " " " "
 - 137 Non-Ferrous Foundry Furnacemen
23. Smiths and Forgemen
- 145 Blacksmiths
 - 146 Forgemen, Pressmen
 - 149 Other Skilled Smithy and Forge Workers
 - 150 Annealers, Hardeners and Temperers
24. Sheet Metal Workers
- 155 Coppersmiths
 - 156 Sheet Iron and Sheet Metal Workers
 - 157 Metal Spinners
 - 160 Platers
 - 162 Riveters, Caulkers
 - 164 Shipwrights
25. Metal Machinists
- 171 Press Tool Setters
 - 172 Brass Turners
 - 173 Turners (not Brass)
 - 176 Machine Setters, Setters Operators
 - 177 Shipyard Metal Machinists
26. Fitters and Tool Makers
- 181 Precision Fitters, Tool Makers, Machine Tool Fitters
 - 182 Gunsmiths, Gun Lock and Action Makers
27. Machine Erectors, Millwrights etc.
- 183 Machine Erectors, Millwrights, Maintenance Engineers
28. Motor Mechanics and other Fitters
- 184 Motor and Motor Cycle Mechanics
 - 185 Fitter-Assemblers
 - 188 Other Fitters
29. Plumbers and Pipe Fitters
- 200 Plumbers (not Chemical)
 - 202 Gas Fitters
 - 203 Pipe Fitters
 - 204 Lead Burners and Chemical Plumbers
30. Other Skilled Engineering Workers
- 193 Electro Platers, Nickel Platers
 - 205 Repairers of Railway Wagons, Mine Trams and Tubs
 - 209 Other Skilled Vehicle Makers and Repairers

30. Other Skilled Engineering Workers - (Contd.)
- 210 Scientific Instrument Makers and Repairers
 - 211 Surgical and Dental Instrument Makers
 - 212 Watch, Clock and Chronometer Makers and Repairers
 - 219 Other Skilled Workers - Watches, Scientific Instruments, etc.
 - 221 Engravers, Chasers - Precious Metals
 - 222 Goldsmiths, Gem Setters
 - 223 Polishers, Scratch Brushers - Precious Metals and Gems
 - 224 Pressers, Saw piercers, Stampers - Precious Metals
 - 225 Silver and White Metal Smiths; Mounters
 - 229 Other Skilled Workers in Precious Metals
 - 261 Oxy-Acetylene or Electric Welders and Cutters
 - 262 Textile Machinery Fittings and Accessories Makers (not elsewhere specified)
 - 263 Constructional Engineers (not Professional), Steel Erectors, Structural Iron Workers
 - 264 Cutlers
 - 265 Die Sinkers and Engravers (not Precious Metals)
 - 266 File Cutters (Machine or Hand)
 - 268 Edge Tool Grinders
 - 269 Lock, Latch and Keymakers; Locksmiths
 - 273 Wire Weavers, Wire Rope Makers
 - 279 Other Skilled Workers
31. Electrical Apparatus Makers and Fitters
- 231 Armature Winders
 - 232 Accumulator Makers and Pastors
 - 233 Electric Cable and Wire Machine Drivers and Setters-up
 - 235 Electric Lamp and Valve - Machine Setters
 - 237 Radio and Radar Mechanics
 - 239 Other Workers in Electrical Communications and Signalling Systems
 - 241 Electrical Fitters
 - 243 Linemen and Cable Jointers
 - 249 Other Skilled Electrical Workers
32. Electricians (House, Ship, Factory)
- 242 Electricians (House, Ship, Factory)
33. Inspectors, Viewers, Testers
- 251 Inspectors, Viewers of Castings and Forgings
 - 252 Machine Shop Inspectors
 - 253 Fitting Shop Inspectors and Weight Testers
 - 254 Inspectors of Electrical Work
 - 255 Testers of Watches and Clocks; Scientific and Surgical Instruments
 - 259 Other Inspectors, Viewers, Testers

34. Textile Workers

- 280 Foremen, Overlookers - Carders, Combers
- 281 Wool Sorters
- 282 Rag and Wool Carbonisers and Washers
- 290 Spinners', Doublers', Foremen
- 291 Spinners, Piecers
- 300 Winders', Warpings', etc., Foremen
- 301 Winders, Reelers
- 302 Beamers, Warpings
- 303 Sizings, Tapers, Slashers
- 304 Drawers-in, Twisters-in
- 310 Weavers' Foremen, Overlookers
- 311 Weavers (not Carpets)
- 312 Carpet Weavers
- 320 Hosiery Foremen
- 321 Hosiery Frame Tenters and Knitters
- 330 Bleachers', Dyers', Finishers', Foremen
- 331 Lookers, Examiners, Burlers, Menders
- 340 Foremen, Overlookers (Textiles - not elsewhere specified)
- 342 Lace Makers
- 343 Strippers, Grinders, Jobbers, Tacklers
- 346 Textile Printers (including Oil or Floor Cloth Printers)
- 349 Other Skilled Workers

35. Leather Workers

- 350 Foremen, Overlookers - Leather Tanners and Dressers, Fur Dressers
- 351 Lime and Tan Yard Workers
- 352 Curriers, Leather Dressers
- 353 Enamellers, Japanners, Dyers, Stainers, etc.
- 359 Other Skilled Workers in Leather and Fur Dressing
- 360 Foremen, Overlookers - Boot and Shoe Makers
- 361 Boot and Shoe Makers and Repairers (not Factory)
- 362 Boot and Shoe Clickers, Pattern Cutters
- 363 Closers (Boot and Shoe Manufacture)
- 364 Sole and Heel Cutters and Preparers
- 365 Lasters, Bottomers, Heelers
- 366 Finishers, Shoe Room Workers
- 369 Other Skilled Workers in Boot and Shoe Manufacture
- 370 Foremen, Overlookers - Makers of Leather or Substitute Goods (not Clothing)
- 371 Saddlers, Harness Makers
- 373 Makers (by Hand) of other Leather or Substitute Goods
- 374 Cutters (Leather or Substitute Goods)
- 375 Machinists (" " " ")
- 376 Stitchers (Hand) (Leather or Substitute Goods)
- 379 Other Skilled Workers (" " " ")

36. Textile Goods Workers

- 380 Foremen, Overlookers - Garment Workers
- 381 Skilled Cutters - " "
- 382 Knife or Machine Cutters - " "
- 383 Tailors
- 384 Corset Makers
- 385 Dressmakers and other Light Clothing Makers
- 389 Other Skilled Garment Workers
- 390 Foremen, Overlookers - Hat Makers
- 391 Hat Designers and Cutters
- 392 Milliners (Makers)
- 393 Felt Hood, Felt Hat Maker
- 399 Other Skilled Workers - Hat Makers
- 400 Foremen, Overlookers - Upholsterers
- 401 Upholsterers, Coach Trimmers, etc.
- 402 Bedding and Mattress Makers
- 410 Foremen, Overlookers - other Textile Makers
- 411 Furriers, Fur Sewers and Machinists
- 412 Glove Makers (not Knitted or Rubber)
- 413 Artificial Flower and Feather Workers
- 414 Embroiderers, Embroidery Machinists
- 419 Other Skilled Workers

37. Food Workers

- 420 Foremen, Overlookers - Makers of Foods
- 421 Grain Millers
- 422 Bakers and Pastry Cooks
- 423 Dough Mixers, Makers (Bread, Biscuits, Cakes, etc.)
- 425 Milk Processors, Makers of Dairy Products
- 427 Sugar Confectionery Makers
- 428 Cocoa and Chocolate Makers
- 429 Meat and Fish Curers and Smokers
- 430 Slaughterhouse Workers
- 439 Other Skilled Food Workers
- 440 Foremen, Overlookers - Makers of Alcoholic Drinks
- 450 Foremen, Overlookers - Makers of Non-Alcoholic Drinks
- 459 Other Skilled Workers - Non-Alcoholic Drinks
- 460 Foremen, Overlookers - Makers of Tobacco, Cigars, Cigarettes, Snuff

38. Carpenters and Joiners

- 472 Carpenters and Joiners

39. Other Skilled Woodworkers

- 470 Foremen, Overlookers - Workers in Wood, Cane and Cork
- 471 Cabinet Makers
- 473 Coach, Carriage, Van and Cart Builders, Body Builders
- 474 Coopers, Hoop Makers and Benders
- 476 Pattern Makers (Wood or undefined)

39. Other Skilled Woodworkers - (Contd.)
- 477 Converting Mill Sawyers
 - 478 Wheelwrights
 - 479 Other Sawyers, Wood Turners, Wood Cutting Machinists
 - 480 Basket Makers, other Cane Workers
 - 489 Other Skilled Workers
40. Printers
- 520 Foremen, Overlookers
 - 521 Compositors (Hand or Machine)
 - 523 Stereotypers, Electrotypers
 - 524 Process Engravers, Photographers (Printing Trades)
 - 525 Lithographic Artists and Transferers
 - 526 Letterpress or Litho Printing Machine Minders and Setters
 - 528 Printers (so returned)
 - 529 Machine Rulers
 - 530 Bookbinders
 - 531 Wall paper Printers
 - 532 Silk Screen Workers
 - 533 Gold and Silver Blockers and Stampers; Bronzers
 - 539 Other Skilled Workers
41. Workers in Various Other Materials
- 060 Foremen, Overlookers - Pottery
 - 062 Refractory Goods Makers
 - 064 Potters; Pottery Makers and Casters
 - 065 Pottery Finishers and Decorators
 - 066 Kiln and Oven Men; Kiln Setters and Placers
 - 070 Foremen, Overlookers - Glass and Glassware
 - 071 Teazers, Founders
 - 072 Blowers (not Machine Hands or Bench Glass Workers)
 - 074 Moulders and Pressers - Glass
 - 075 Optical Lens and Prism Grinders and Polishers
 - 079 Other Skilled Workers - Glass and Glassware
 - 080 Foremen, Overlookers - other Non-Metalliferous Mining Products
 - 090 Foremen, Overlookers - Coal Gas and Coke
 - 100 Foremen, Overlookers - Chemical and Allied Trades
 - 101 Mixers, Blenders, Grinders - Chemical and Allied Trades
 - 102 Distillers, Stillmen - Chemical and Allied Trades
 - 103 Furnacemen, Kilnmen - Chemical and Allied Trades
 - 500 Foremen - Paper, Paperboards
 - 501 Breakers, Boilermen, Beatermen - Paper, Paperboards
 - 502 Vatmen, Couchers - Paper, Paperboards
 - 503 Machine Men - Paper, Paperboards
 - 509 Other Skilled Workers - Paper, Paperboards
 - 510 Foremen, Overlookers - Makers of Stationery, Bags and Boxes; Other Workers in Paper

41. Workers in Various Other Materials - (Contd.)
- 511 Pressers, Stampers, Scorers, Punchers, Cutters - Makers of Stationery, etc.
 - 512 Paperboard Box Makers (not elsewhere specified)
 - 513 Machine Minders, Setters - Makers of Stationery, etc.
 - 519 Other Skilled Workers - Makers of Stationery, etc.
 - 540 Foremen, Overlookers - Rubber
 - 541 Mixers, Spreaders, Moulders - Rubber
 - 542 Vulcanisers
 - 549 Other Skilled Workers - Rubber
 - 550 Foremen, Overlookers - Plastics Moulding, etc.
 - 551 Plastics Moulders and Pressers
 - 559 Other Skilled Workers - Plastics
 - 560 Foremen, Overlookers - Makers of Musical Instruments (not Piano, etc., Case Makers)
 - 561 Action Makers, Fitters and Assemblers - Musical Instruments
 - 562 Piano Tuners
 - 569 Other Skilled Workers - Musical Instruments
 - 570 Foremen, Overlookers - Other Products
 - 571 Hair, Bass, Fibre Drafters, and Brush Makers
 - 572 Feather Dressers and Dyers
 - 573 Dental Mechanics
 - 574 Makers of Surgical and Dental Appliances
 - 575 Photographic, etc., Plate, Film and Paper Coaters
 - 579 Other Skilled Workers
42. Building Foremen
- 580 Building Foremen, Gangers
43. Bricklayers
- 583 Bricklayers
44. Other Building Craftsmen
- 585 Plasterers
 - 587 Glaziers
 - 588 Slaters and Tilers
 - 589 Masons; Stone Cutters
 - 592 Slate Workers (not elsewhere specified) and Slate Masons
 - 595 Well and Mine Sinkers and Borers
 - 597 Builders
 - 598 Other Skilled Workers
45. Painters and Decorators
- 600 Foremen, Overlookers
 - 602 French Polishers
 - 603 Sign Writers
 - 609 Other Painters and Decorators

- 46. Motormen, Signalmen, Guards
 - 632 Motormen (Electric and Diesel)
 - 635 Guards
 - 636 Signalmen
- 47. Other Skilled Railway Workers
 - 631 Locomotive Engine Drivers
 - 637 Shunters, Pointsmen, and Level Crossing Men
- 48. Passenger Vehicle Drivers
 - 655 Drivers of Trams
 - 656 Drivers of Trolleybuses
 - 657 Drivers of other Buses and Coaches
 - 658 Drivers of other Self-Propelled Passenger Vehicles
- 49. Goods Vehicle Drivers
 - 659 Drivers of Self-Propelled Goods Vehicles
- 50. Communications Workers (mainly G.P.O.)
 - 701 Foremen, Supervisors
 - 702 Postmen, Post Office Sorters
 - 703 Radio Operators (not elsewhere specified)
 - 704 Other Telegraph Operators
 - 705 Telephone Operators
- 51. Other Transport Workers in Class III
 - 652 Haulage and Cartage Contractors and Managers, Master Carmen
 - 653 Inspectors and Foremen (not Horse Foremen)
 - 674 Engineering Officers, Electricians (on board Ships, Boats, etc.)
 - 675 Petty Officers, Seamen and Deck Hands
 - 676 Radio Officers (on board Ships, Boats, etc.)
 - 678 Pursers, Stewards and Domestic Staff
 - 691 Aircrew
 - 692 Aerodrome Technical Staff
 - 693 Airport Traffic Staff
 - 699 Other Air Transport Workers
- 52. Commercial Travellers
 - 715 Commercial Travellers, Canvassers
- 53. Salesmen and Shop Assistants (Foodstuffs)
 - 730 Salesmen, Shop Assistants selling Grocery, Provisions
 - 731 " " " " Greengrocery
 - 732 " " " " Meat
 - 733 " " " " Fish, Poultry
 - 734 " " " " other Food Goods

- 54. Salesmen and Shop Assistants (Others)
 - 735 Salesmen, Shop Assistants selling Chemists' Wares, Photographic Goods
 - 736 Salesmen, Shop Assistants selling Confectionery, Tobacco, Newspapers
 - 737 Salesmen, Shop Assistants in Variety Chain Stores
 - 738 Salesmen, Shop Assistants in other General and Mixed Businesses
 - 739 Salesmen, Shop Assistants selling other Non-Food Goods
- 55. Roundsmen and Van Salesmen
 - 741 Roundsmen, Van Salesmen
- 56. Insurance Brokers, Agents, Canvassers
 - 754 Insurance Brokers
 - 755 Insurance Agents and Canvassers
- 57. Miscellaneous Professional, Technical and Commercial Workers in Class III
 - 749 Other Commercial Occupations
 - 771 Assistant Nurses
 - 772 Student Nurses
 - 778 Chiropodists
 - 804 Laboratory Assistants, Technologists (not elsewhere specified)
 - 872 Managers, Attendants of Baths and Wash-houses
 - 873 Barbers, Hair Dressers
 - 874 Photographers (not Printing Trades)
 - 880 Chimney Sweeps
 - 881 Funeral Directors and Assistants
 - 961 Inspectors, etc. - Distribution of Gas, Water and Electricity (not elsewhere specified)
 - 971 Foremen, Overlookers (not elsewhere specified)
 - 974 Other Civil Service Officials (not clerks)
 - 975 Other Local Authority Officials (not clerks)
- 58. Servicemen (Other Ranks)
 - 821 Royal Navy, Royal Marines - Other Ratings
 - 823 Army - Other Ranks
 - 825 Royal Air Force - Other Ranks
- 59. Policemen, Firemen etc.
 - 831 Police - Other Ranks
 - 832 Fire Brigade Officers and Men
 - 839 Coast Guards, Park Keepers, Museum Warders, etc.
- 60. Clerks
 - 890 Clerks (not elsewhere specified)
 - 891 Shorthand Typists, Secretaries (not Company Secretaries)
 - 892 Typists
 - 894 Other Office Machine Operators

- 61. Warehousemen
 - 900 Warehousemen
- 62. Storemen
 - 901 Store Keepers
- 63. Stationary Engine Drivers, etc.
 - 910 Stationary Engine Drivers Underground in Mines
 - 911 Other Stationary Engine Drivers
 - 912 Crane Drivers
 - 913 Drivers of Civil Engineering Plant (not elsewhere specified)
 - 918 Switchboard Attendants; Battery Chargers Underground in Mines
 - 919 Other Switchboard Attendants; other Battery Chargers
- 64. Chefs, Cooks, Waiters
 - 867 Waiters, Still Room Hands
 - 882 Chefs, Cooks
- 65. Other Workers in Personal Service and Entertainments
 - 842 Showmen; Fair and Roundabout Workers
 - 844 Actors, Variety Artistes, Entertainers
 - 845 Musicians
 - 847 Cinematograph Operators
 - 848 Race Horse and Greyhound Trainers, Jockeys, Stable Lads, Kennel Attendants
 - 849 Bookmakers
 - 850 Cricketers, Footballers, Golfers, etc.
 - 855 Other Occupations
 - 861 Game Keepers, Game Watchers

Social Class IV - Partly Skilled Occupations

- 66. Gardeners
 - 015 Gardeners (not Market Gardeners)
- 67. Agricultural Workers
 - 012 Shepherds
 - 019 Agricultural Workers (not elsewhere specified)
 - 029 Other Occupations Ancillary or Agriculture
- 68. Coal Miners, below ground
 - 043 Persons conveying Material to the Shaft
 - 044 Persons developing Underground Workings in Rock
 - 045 Persons Repairing and Maintaining Roads
 - 047 Other Workers below ground
- 69. Coal Miners, above ground
 - 049 Workers above ground (not elsewhere specified)

- 70. Semi-skilled Workers in Metal Manufacture and Heavy Engineering
 - 134 Iron or Steel Foundry Furnace and Cupola Men
 - 135 Iron Foundry Labourers
 - 136 Steel Foundry Labourers
 - 138 Non-Ferrous Foundry Labourers
 - 151 Picklers
 - 161 Platers' Labourers
 - 163 Riveters' Labourers
- 71. Drillers, Mechanics, and Fitters' Mates
 - 174 Drillers (Hand or Machine)
 - 189 Machine Erectors', Fitters', Mechanics' Mates
- 72. Miscellaneous Semi-skilled Workers in Engineering (mainly Medium and Light)
 - 191 Galvanisers and Tanners
 - 192 Glazers, Polishers, Buffers and Moppers
 - 194 Japanners, Stove and Vitreous Enamellers
 - 198 Other Skilled Metal Finishers
 - 201 Plumbers' Labourers
 - 234 Electric Cable and Wire Machine Assistants
 - 236 Electric Lamp and Valve - Machine Minders
 - 267 Filers
 - 271 Press Workers and Stampers (not Hot or Hydraulic): Drawers (not Wire or Tube)
 - 272 Solderers and Brazers
- 73. Machine Minders (Engineering)
 - 931 Machine Minders in Engineering and Allied Trades
- 74. Semi-skilled Workers in Gas, Coke and Chemical Industries
 - 099 Coal Gas, Coke Oven Workers
 - 104 Fillers of Explosives
 - 109 Other Skilled Workers
- 75. Workers in Textiles and Textile Goods in Class IV
 - 283 Openers, Blenders, Rag Grinders
 - 284 Carders, Combers, Other Skilled Preparing Room Workers
 - 292 Doublers, Twisters
 - 332 Dye House Workers
 - 333 Hookers, Lappers, Makers-up, Plaiters
 - 339 Other Workers in Bleaching, Dyeing and Finishing
 - 341 Rope, Twine and Net Makers
 - 345 Pattern Card Preparers
 - 386 Machinists
 - 387 Pressers
 - 415 Canvas Goods Makers
 - 416 Sack Makers
- 76. Railway Workers in Class IV
 - 633 Locomotive Engine Firemen
 - 634 Locomotive Running Shed Workers

- 76. Railway Workers in Class IV - (Contd.)
 - 638 Ticket Collectors and Examiners
 - 649 Other Railway Transport Workers
- 77. Bus Conductors and Drivers' Mates
 - 660 Lorry Drivers' Mates, Van Guards, etc.
 - 661 Bus and Tram Conductors
- 78. Other Transport Workers in Class IV (incl. Fishermen)
 - 000 Fishermen
 - 654 Drivers of Horse-Drawn Vehicles
 - 662 Horse Foremen, Grooms and Horse Keepers
 - 669 Other Road Transport Workers
 - 677 Water Transport Workers - Firemen, Trimmers, Greasers and Donkeymen
 - 679 Bargemen, Boatmen, Tugmen
 - 680 Lock Keepers; Bridge, Stage and Pier Men
 - 689 Other Water Transport Workers
 - 709 Other Workers
- 79. Coal Carmen and Hawkers
 - 742 Coal Carmen, Coal Hawkers
- 80. Barmen, Counter Hands, Hall Porters
 - 866 Barmen
 - 868 Restaurant and Refreshment Room Counter Hands
 - 869 Hall and Hotel Porter; Door Keepers and Carriage Attendants
- 81. Laundry Workers, Dry Cleaners, Window Cleaners
 - 877 Laundry Workers
 - 878 Dry Cleaners, Carpet Cleaners
 - 879 Window Cleaners
- 82. Packers and Bottlers
 - 903 Furniture Packers
 - 904 China and Glass Packers
 - 905 Other Case Packers and Balers
 - 909 Other Packers and Bottlers (including Wrappers, Labellers, Ticketers)
- 83. Boiler Firemen and Stationary Engine Attendants
 - 914 Slingers and Riggers
 - 915 Boiler Firemen and Stokers
 - 916 Boiler Scalers
 - 917 Gas Producer Men
 - 920 Oilers and Greasers of Engines and Machinery Underground in Mines
 - 921 Other Oilers and Greasers of Engines and Machinery

- 84. Ward Orderlies and Other Domestic Servants
 - 871 Hospital or Ward Orderlies, Attendants
 - 884 Mess Room, Ward Attendants
 - 885 Other Domestic Servants
 - 888 Others in Personal Service
- 85. Caretakers and Office Keepers
 - 875 Caretakers, Office Keepers
- 86. Platelayers and Paviors
 - 593 Platelayers
 - 594 Paviors, Street Masons and Asphalters
- 87. Other Workers in Class IV
 - 052 Persons conveying Material to the Shaft in Mines (not Coal), Quarries and Workings, etc.
 - 055 Other Workers below ground (not Coal Mines)
 - 056 Getters in Open Quarries, Pits, etc. (not Coal Mines)
 - 059 Other Workers in Mines (not Coal), Quarries, Workings, etc.
 - 061 Brick and Unglazed Tile - Makers, Moulders, Pressers, Cutters
 - 063 Potters' Mill Workers; Slip Makers, Arkmen
 - 069 Other Skilled Workers in Bricks, Tiles, Pottery and Fireclay Goods
 - 073 Bench Glass Workers
 - 076 Blockers-out and Pitchers - Glass and Glassware
 - 081 Kiln Men and Lime Burners
 - 089 Other Skilled Workers - Non-Metalliferous Mining Products
 - 424 Ovenmen (Bread, Biscuits, Cakes, etc.)
 - 426 Sugar and Sweet Boilers
 - 441 Maltsters
 - 442 Skilled Workers in Ale, etc., Brewing
 - 443 Bottlers of Alcoholic Drinks
 - 444 Cellarmen
 - 449 Other Skilled Workers in the Making of Alcoholic Drinks
 - 461 Openers, Strippers, Cutters, etc. (includes all Workers in Tobacco preparation)
 - 463 Cigarette Making Machine Operators
 - 464 Cigarette Packing Machine Operators
 - 465 Cigar Makers
 - 469 Other Workers in Making of Tobacco, Cigars, Cigarettes, Snuff
 - 475 Packing Case Makers
 - 481 Workers in Cork
 - 504 Paper, Paperboard Finishers
 - 514 Machine Assistants, Layers-on - Makers of Stationery, Bags and Boxes
 - 527 Letterpress or Litho Printing Machine Assistants

- 87. Other Workers in Class IV - (Contd.)
 - 596 Tunnel Miners
 - 601 Aerographers, Paint Sprayers
 - 846 Stage Hands
 - 930 Assemblers (not elsewhere specified)
 - 932 Other Machine Minders (not elsewhere specified)
 - 965 Other Workers in the Distribution of Gas, Water and Electricity (not elsewhere specified)
 - 972 Sand Blasters (excluding Shot Blasters)
 - 979 All other and undefined Occupations

Social Class V - Unskilled Occupations

- 88. Craftsmen's Labourers - Building Trade
 - 582 Builders' Labourers
 - 584 Bricklayers' Labourers
 - 586 Plasterers' Labourers
 - 591 Masons' Labourers
- 89. Other Labourers (mainly Navvies)
 - 599 Other Labourers (mainly Navvies)
- 90. Railway Porters
 - 639 Porters (including Lampmen)
- 91. Dockers
 - 681 Dock Labourers
- 92. Messengers, Liftmen and Other Porters
 - 706 Messengers
 - 707 Lift Attendants
 - 708 Porters (not elsewhere specified)
- 93. Costermongers and Newspaper Sellers
 - 743 Costermongers and other Hawkers
 - 744 Newspaper Sellers
- 94. Watchmen and Office Cleaners
 - 833 Watchmen
 - 876 Office Cleaners
- 95. Kitchen Hands
 - 883 Kitchen Hands
- 96. Warehousemen's and Storemen's Assistants
 - 902 Warehouse and Storekeepers' Assistants
(so returned - not Lace Warehouse Hands)
- 97. Labourers in Engineering Trades
 - 127 Assistants to Rollers (not Skilled)
 - 940 Labourers and other Unskilled Workers in Metal Working, Engineering, Electrical, and Allied Trades

- 98. Labourers in other Specified Trades
 - 935 Labourers and other Unskilled Workers in Making of Bricks, Tiles, Pottery, etc.
 - 936 Labourers and other Unskilled Workers in Making of Glass and Glassware
 - 937 Labourers and other Unskilled Workers in Chemical and Allied Trades
 - 938 Labourers and other Unskilled Workers in Coke Ovens and Gas Works
 - 939 Labourers and other Unskilled Workers in Making of Asbestos Goods
 - 941 Labourers and other Unskilled Workers in Textiles (not Textile Goods)
 - 942 Labourers and other Unskilled Workers in Treatment of other Non-Metalliferous Mining Products (not Coal)
- 99. Other Labourers
 - 021 Estate Labourers
 - 950 Labourers and other Unskilled Workers in all Other Industrial and Commercial Undertakings
 - 973 Rag, Bone, Bottle, etc., Sorters
- 100. Other Persons not gainfully employed in England and Wales
 - 980 Students
 - 981 Persons following an Occupation outside the United Kingdom
 - V Retired from Previous Gainful Occupation
 - X Other Persons (No Gainful Occupation Stated)

(83616)

Table A. Schizophrenia. Stated First Admissions of Single Males aged 20 and over, by Occupational Group^b and Age at Admission, 1949-1953. Rates per 10,000 1951 Census Population
Rates based on less than 20 admissions during the 5 years are distinguished by italic type

Occupational Group	Age at Admission							Numbers aged 20 and over	
	20-	25-	35-	45-	55-	65 and over	All Ages 20 and over	Admissions	Population
Social Class I									
1 Financial Administration	7	12	12	-	-	-	8	11	13,650
2 Engineers, Surveyors, Architects	11	29	29	17	-	-	20	50	25,143
3 Scientists, including Doctors and Chemists	18	26	30	10	-	-	22	28	12,954
4 Public Administration and Journalism (including Lawyers, Civil Servants, Clergy)	9	38	6	10	5	12	17	36	21,608
5 Service Officers	2	18	38	47	-	-	12	11	9,437
Social Class II									
6 Farmers, including Bailiffs, etc.	51	64	34	11	8	6	35	154	44,058
7 Civil Servants (executive) and L.A. officials	6	23	8	9	-	-	13	10	7,607
8 Costing, estimating and accounts clerks	10	23	14	10	-	-	15	90	61,781
9 Teachers	36	44	25	29	9	-	35	86	24,645
10 Draughtsmen	19	45	43	14	-	-	28	95	33,848
11 Miscellaneous Professional and Technical workers	93	68	30	19	10	24	64	164	25,796
12 Proprietors and Managers of Hotels, Inns, etc.	21	19	11	-	15	-	13	9	7,025

Tuberculosis Statistics

for England and Wales, 1938-1955

An Analysis of Trends and Geographical Distribution

This study sets out the general situation of tuberculosis morbidity and mortality in England and Wales, and shows the trends in recent years against the background of the pre-war situation. It surveys the notification rates of respiratory tuberculosis from 1938 to 1955, and examines the geographical distribution of notifications of respiratory tuberculosis in 1954 and 1955 with regard to England and Wales as a whole and its larger administrative units.
