Explanatory Notes.

1. New or Recent Changes in Presentation

Arising from War Conditions

Estimates of total population are not available for Regions or Local Government divisions of the country (see Section 2 below).

Tables **U** and **V**, omitted during the years 1940–44 owing to the suspension of the revision of Electoral Registers, are now included in a modified form, in respect of the October, 1945 Register. Details of Parliamentary Bye-elections are shown in Table **U**, and an analysis of Local Elections in Table **V**.

Certain regional analyses of the fertility data (Tables **FF**, **LL**, **NN**, **TT** and **UU**) have been suspended.

Change of Practice

The interval between marriage and maternity in the first year of marriage is divided into periods of 0–8 months and 9–11 months in Tables **PP**, **QQ**, **RR** and **SS**. Table **OO** is extended to detail each month separately.

2. Populations

The 1945 estimate of the total population of England and Wales shown in Table **A** includes members of its Armed Forces and Merchant Marine at home and overseas; it excludes the Armed Forces of Dominions, Colonies and Foreign countries temporarily present in the country. For years prior to 1940 the figures exclude Armed Forces and Merchant Seamen absent from the country approximating to 180 thousands in recent pre-war years. The national total cannot be apportioned amongst areas within the country.

The national and local estimates of civilian resident populations (Table **E**) are derived from the National Register enumeration of 29th September, 1939, after allowance for subsequent births, civilian deaths, migration, intake into and discharge from the Armed Forces obtained from the National Register and other sources of information.

3. Births

Owing to the considerable time lag between the occurrence and the registration of a birth and its variation under War conditions (from a peace time average of about a month to less than a fortnight at the present time), the births recorded and analysed in the Statistical Review in respect of the year or other periods after 1st January, 1941, are those occurring in the period instead of those registered as has been the practice hitherto. For the occurrences of the period 1st July, 1938, to 31st December, 1940, see Tables **YY** in the Reviews for 1938 and 1939 and Tables **EE** and **YY** in the 1940 Review. The numbers Registered in 1945 are shown in the footnote to Table **B**.

For the classification by regions and local areas (Table **E**), the births have been assigned to the home address or area of permanent residence as in previous years.

4. (a) Birth Rates

The national rates for 1945 shown in Tables **C** and **D** are obtained by relating birth occurrences to the *total* population, while the rates in Table **E** are based on birth occurrences and *civilian* populations (see Sections 2 and 3 above). For the country as a whole the ratio of estimated civilian population to total population is 0.8949 by which the live birth rates of Table **E** may be multiplied to produce rates approximately comparable with those of years prior to 1940.

(b) Fertility Analyses

The fertility analyses in Tables **AA–YY** are based on information obtained under the Population Statistics Act 1938 which operated from the 1st July, 1938. Tables **AA** to **SS** are based upon birth occurrences. Tables **VV**, **WW** and **XX** are based upon death registrations.

5. Marriage Rates

The national marriage rates of Tables **C** and **D** are based upon total populations while those of Table **F** are based upon civilian population (see Section 2 above). For the country as a whole the ratio of estimated civilian population to total population is 0.8949 and the rates of Table **F** may be multiplied by this factor to produce rates approximately comparable with those of years prior to 1940.

6. Deaths

The deaths recorded (Tables **E** and **VV** to **XX**) are those registered in the period, the time lag between occurrence and registration being usually only a day or two. The said deaths are those of civilians only and are classified according to the area of residence of the deceased, the following conventions being adopted in the special circumstances (evacuation, industry transfers, etc.) of the war period, viz. (a) where a temporary address was recorded as well as a former permanent address the death was assigned to

the area of the temporary address and (b) where the death occurred in a non-evacuation area (otherwise than in an institution) and only one address was recorded which was in an evacuation area the death was assigned to the non-evacuation area.

Civilian War Deaths identified in Table E (col. 13) are mainly those registered under the special emergency procedure applicable to deaths due to war operations.

7. Death Rates

The general death rates of Table E are civilian rates based upon civilian deaths and civilian populations. The Infant Mortality rates for the local areas of Table E incorporate an adjustment, derived from the national experience, to allow for the difference between rates based on the registered births and on the combined births of the current and preceding year to which they relate.

8. Changes in Boundaries

There were no changes in boundaries in 1945.

9. Significance Indication

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experience may affect their significance.

10. Regions

The constitution of the Regional Divisions of England and Wales used throughout the volume is as follows:—

<p><i>Greater London</i> The area coincident with the City of London and Metropolitan Police Districts — approximately 15 miles' radius from Charing Cross.</p> <p><i>South East</i> Bedfordshire. * These figures relate to passengers to and from ports in Eire and ports in the United Kingdom. The movement over the land frontier between Eire and Northern Ireland cannot be furnished.

† The figures which appeared in this table in the Statistical Review, Pt. II. for the years 1939, 1940 and 1941 are not reproduced here because they may be liable to considerable error by reason of missing returns and other war-time difficulties.

(c) Balance of Permanent Migration: British subjects only (from Board of Trade Returns).

Outward balances are shown in Roman type, inward balances in Italics.

The United Kingdom excludes Eire as from the 1st April, 1923.

The criterion of Permanent Migration is a declared intention to reside for at least a year in the country of destination. The permanent migration of part (c) is included in the passenger movement of part (b).

TABLE AA. Maternities and Births of all Types, distinguishing legitimacy and, in the case of births, sex and whether live or still-born.

**England and Wales
1945 Occurrences.**

NOTE: The term "Maternity" is used to denote a pregnancy which has terminated in the birth of one or more live or still-born child(ren), the criterion of still birth being that defined in the Births and Deaths Registration Act, 1926. The Maternity record differs from the Birth record in that multiple births from a single pregnancy are counted as one maternity while for the birth record each child born is reckoned as a separate unit.

TABLE OO. Legitimate Maternities }
distinguishing the Interval }
since Marriage.* } England and Wales
1945 Occurrences.

*Note:—Interval since marriage. As the month only and not the day of the mother's marriage is obtained at a birth registration, the interval between marriage and birth of child has been calculated on the assumption that both events take place at the middle of month; and the true interval may accordingly be a month greater or less than the calculated interval. The groups thus overlap though the records are not duplicated thereby and for statistical purposes the calculated intervals as shown in the tables may be regarded as equivalent to mutually exclusive intervals as follows:—

0 month(s) = 0-1/2 month(s).
1 month(s) = 1/2-1 1/2 month(s).
2 month(s) = 1 1/2-2 1/2 month(s), etc.
0 year(s) = 0-11 1/2 months.
1 year(s) = 11 1/2 months-1 year 11 1/2 months.
2 year(s) = 1 year 11 1/2 months-2 years 11 1/2 months, etc.

TABLE VV. Infertility of Deceased Married Women distinguishing certain Causes of Death. } England and Wales
1945 Registrations

Note:—The columns distinguish deaths according to whether the deceased was reported

(a) as having had no children by any husband, i.e. Infertile,

(b) as having had children by a husband, i.e. Fertile.

Deaths in which the record of fertility was not reported are excluded from the table.

In view of the unreliability of inferences based upon small numbers, proportions based on less than 50 cases (Infertile plus Fertile) have been omitted, and proportions based on between 50 and 250 cases are shown in italics.
