EXPLANATORY NOTES

1. New or Recent Changes in Presentation

(*a*) *Standard Regions, Conurbations, Aggregate Summaries by type of area.*

All figures given for regions relate to the Standard Regions whose constitution is set out on page vii.

Six conurbation areas are distinguished in certain tables. For definition of " conurbation " and the list of conurbations, *see* Note 14 on page vii.

National aggregate summaries by type of area relate to aggregates of (a) conurbations, and (b) areas outside the conurbations, including separately:— Urban Areas with (i) populations of 100,000 and over, (ii) populations of 50,000 and under 100,000 and (iii) populations under 50,000 ; and Rural Districts. For this purpose " Urban Areas " includes Boroughs and Urban Districts as defined under the Local Government Acts, and Rural Districts are as defined under those Acts.

(*b*) *New and Revised Tables.*

In 1952 a new series of tables was introduced for the fertility analyses. Details are given in Note 4 (b) below.

Three marriage tables have been extended. Tables **K** and **L** now show separate figures for divorced persons, while Table **N** includes a comparison of marriage incidence by calendar months.

2. Populations

The estimates of population appearing in this volume and described as " Home " or " Total " populations, have the following content :—

Home population—the population, of all types, actually located within England and Wales, distributed by area according to residence.

Total population—the home population *plus* members of H.M. Forces belonging to England and Wales and serving overseas but *excluding* members of the Armed Forces of the Commonwealth or Foreign Countries temporarily in the country.

The mid-1954 estimates of population, both national and local, have been based upon final figures from the full tabulations of the 1951 Census.

3. Births

The births recorded and analysed for England and Wales for periods from 1939 onwards are those which occurred during the period. The numbers registered in 1954 are shown in the footnote to Table **B.**

For the classification by regions and local areas (Table **E**), the births have been assigned to the home address or area of permanent residence as in previous years.

4. (*a*) Birth Rates

The national rates for 1954 shown in Tables **C** and **D** are obtained by relating birth occurrences to the *total* population, while the rates in Table **E** are based on birth occurrences and *home* populations (*see* Notes 2 and 3 above).

The birth rate area comparability factors and the ratios of the local adjusted birth rates to the national rate shown in cols. (9) and (10) of Table **E** serve a similar purpose to those shown for death rates, as explained in Note 7 below. A commentary upon the factor and its use is given on page 131 of the Statistical Review, Text, Civil, 1946-1950. The factors have been based on 1951 Census populations by sex and age with later adjustment for boundary changes, and for changing population structure by sex and age in the case of rapidly expanding areas.

(*b*) Fertility Analyses

The fertility analyses in Tables **AA–TT** are based on information obtained under the Population (Statistics) Act, 1938, which operated from the 1st July, 1938. Tables **AA** to **QQ** and Table **TT** are based upon birth occurrences. Tables **RR** and **SS** are based upon death registrations.

A new Tabulation scheme was adopted for 1952 and subsequent years, and a fresh series of tables was introduced in the 1952 volume.

Tables **AA** to **EE** are, with a few modifications, similar to the corresponding tables in the previous series. Table **FF** (previously **GG**) now includes live and stillbirth rates per 1,000 legitimate maternities. Tables **RR, SS** and **TT** correspond to those previously designated **VV, XX** and **YY.** The former Table **WW** is discontinued.

A new table (Table **GG**) shows birth rates by age of mother for Standard Regions, Conurbations and Aggregates Summary (by type of area) ; it also includes legitimacy, sex and stillbirth proportions which were formerly given in Table **HH.**

The analysis of legitimate maternities by mother's age, marriage duration and previous liveborn children in Tables **HH, II** and **LL,** is confined to maternities to women married once only. Table **MM** relates to legitimate maternities to women married once only, distinguishing parity, age and year of marriage for successive marriage cohorts.

Tables **JJ** and **NN** show estimates of the numbers of married women (married once only) at risk of childbearing in the calendar year (a) according to age and duration of marriage and (b) according to age at marriage and year of marriage. There is a fundamental difference between the figures in these tables. Table **JJ** is required for the production of legitimate maternity rates *per year of risk* (shown in Table **KK**) and each married woman exposed to risk for a fraction of a year only counts as this fraction. Table **NN** is required for the production of legitimate maternity rates *per married woman* (shown in Table **OO**) and each married woman exposed to risk at any time in the calendar year counts as a full unit. Table **PP** shows average family size (liveborn children) at the end of 1954. This table has been compiled by adding to the family sizes at the end of the previous year live birth rates derived from Table **OO**. The original base was provided by the 1946 Family Census. The families recorded in the 1946 Family Census included some children born before marriage and, to prevent discontinuity, arbitrary adjustment for this feature has been made to the families of women married in 1946 and later.

In Tables **AA, HH, II, LL** and **MM,** the " not stated " cases have been proportionally distributed and included with the " stated " cases. Table **QQ** shows the numbers of cases so distributed and the proportions per 10,000 total legitimate maternities. Cases where the number of liveborn, now dead, children was not known by the informant at the registration of the birth have not been treated as " previous children not stated " since the current level of child mortality is sufficiently low to permit it to be assumed without risk of serious error that in these cases there were no such children.

5. Marriages

An analysis of marriages by manner of solemnization was included in the Statistical Review, Part II, for 1952. The next analysis will appear in the volume for 1957.

Three marriage tables (K, L and N) have been revised (*see* Note 1 (b) above).

6. Marriage Rates

The national marriage rates of Tables **C** and **D** are based upon *total* populations while the rates in Table **F** are based upon *home* populations (*see* Note 2 above).

7. Deaths

The deaths recorded (Tables **E, RR** and **SS**) are the total registered (i.e., including non-civilians) in the calendar period, the time lag between the date of occurrence and the date of registration being usually only a day or two. They have been assigned to the area of usual residence of the deceased. The definition of usual residence for this purpose was modified in 1953, the main change being that persons dying in hospitals for the chronic sick and in mental and mental deficiency hospitals were in that year regarded as having been resident in the hospital. Such a change with regard to persons dying in accommodation provided under Parts III and IV of the National Assistance Act, 1948, had already been brought into effect during 1952. The method of classification of chronic sick hospitals for these purposes was slightly modified in 1954 and numbers of deaths for the areas affected are therefore not comparable with those for 1953.

8. Death Rates

The general death rates of Table **E** are based upon total deaths and home populations. The Infant Mortality rates for the local areas of Table **E** are based upon the combined births of the associated and preceding year to which they relate.

The crude death rates for local areas in Table E (col. 14) may not be comparable one with another for two reasons ; the populations on which they are based may have widely differing structures by sex and age, and they may include a disproportionate number of invalids where there are certain types of hospitals in the area. With a view to eliminating the first, a comparability factor is provided in column (15) of the table for each area, and this, when multiplied by the crude death rate of the area, produces an adjusted rate which may be regarded as allowing roughly for any difference in the population constitution by sex and age of the area from that for England and Wales as a whole. Factors are based on 1951 Census figures. For a fuller description of the comparability factor, reference should be made to the Statistical Review for the year 1951, Text Volume, page 86. The guide to the relative incidence of mortality after taking account of differences in population constitutions by sex and age, provided by column (16), does not however take account of any high mortality due to the presence in the area of resident institutions for invalids. In 1953 all deaths in hospitals for the chronic sick and in mental and mental deficiency hospitals were for the first time assigned to the area of the hospital, whether or not the patients had originally been admitted from that area. This practice inflated the death rates for certain areas. (The method of classification of chronic sick hospitals for this purpose was slightly modified in 1954—*see* Note 7). Information about the extent of such inflation can normally be obtained from the Medical Officer of Health for the area concerned.

9. Register of Electors

Table **U** shows the acreage and the number of parliamentary electors on the March, 1954, Register for each parliamentary constituency as constituted at the date of the last preceding general election (which for the purposes of this table for 1954 was that held on 25th October, 1951). For constituencies whose boundaries have

been altered by Orders in Council made between 25th October, 1951, and 15th March, 1954, which become effective at the next general election, total electorates for the redefined areas are shown in footnotes. The number of votes cast at by-elections held on the March, 1954, Register are also shown.

The numbers of local government electors are shown in Table V together with an analysis of local elections.

10. Changes in Boundaries

Areas which have undergone a change of boundary during the year are identified in Table **E** by an asterisk (*). Statistics for these areas combine the " before change " and " after change " positions for the respective parts of the calendar year. Part **(iii)** of the Appendix shows the population of each area as constituted after the change of boundary, while column (2) of Table **E** shows the composite estimate used as a base for the birth and death rate calculations.

11. Indication of Significance

Rates based upon less than 20 births or deaths are distinguished by italic type as a warning to the user that the smallness of the experiences may affect their significance.

Rates given as 0 indicate that the rate is insignificant. A dash (—) in tables showing rates indicates that there were no births or deaths.

12. Definition of Areas

London=Administrative County of London which consists of the City of London (including the Inner and Middle Temples) and the Metropolitan Boroughs.

C.B.=County Borough ; M.B.=Municipal Borough ; U.D.=Urban District ; R.D.=Rural District.

14. Conurbations

The conurbation areas used in this volume were agreed by an interdepartmental committee, representing the principal Departments preparing statistics, as a means of securing uniformity and comparability in statistics published by Government Departments in the United Kingdom.

Conurbation is the word used to describe those areas of urban development where a number of separate towns have grown into each other and become linked by such factors as a common industrial or business interest, or a common centre of

shopping, education, etc. The conurbations each consist of an aggregation of entire local authority areas and are constituted as follows :—

" The estimates for England and Wales, except those in Table E, have been based upon the final tabulations by sex, age and marital condition of the 1951 Census. This final census data became available after the mid-1953 estimates of population for local areas (shown in Table E) had been prepared. The figures for regions and other aggregates in Table A4. have been adjusted approximately to those for England and Wales as a whole."

*A census was not taken in Ireland in 1921 or 1931. The figures inserted are estimates of the mid-year populations, based upon the results of the censuses of 1926 (Northern Ireland, Males 1507 (Females 1465) ; 1936 (Irish Republic, Males 1520, Females 1448) and 1937 (Northern Ireland, Males 623, Females 657).

†Six Counties viz., Antrim, Armagh, Down, Fermanagh, Londonderry and Tyrone.

¶For these years, the estimates in respect of England and Wales, Scotland and Northern Ireland are of total populations, i.e. *inclusive* of their respective members of the Armed Forces and Merchant Navy overseas and *exclusive* of the Armed Forces of the Commonwealth and Allies temporarily present in the home populations.

* These figures relate to passengers to and from ports in the Irish Republic and ports in the United Kingdom. The movement over the land frontier between the Irish Republic and Northern Ireland cannot be furnished.
† Approximate figures only.
†† Excluding air passengers prior to 1949.
‡ Excluding Air Passengers.
§ This figure cannot be reconciled with the separate totals because it includes air movement which cannot be allocated to specific areas.

(c) Balance of Permanent Migration; Citizens of the Commonwealth and the Irish Republic only (from Board of Trade Returns).
Outward balances are shown in Roman type, inward balances in Italics.
The United Kingdom excludes the Irish Republic as from the 1st April, 1923.
The criterion of Permanent Migration is a declared intention to reside for at least a year in the country of destination. The permanent migration of part (*c*) is included in the passenger movement of part (*b*) and relates to movement by sea only.

TABLE U.— Parliamentary Electors on the 1954 Register, with number of votes cast at By-Elections held thereon, (shown in footnotes). } { **England and Wales, County and Borough Constituencies.**

Note:—(1) The Register of Electors, 1954, was prepared in respect of the qualifying date 20th November, 1953, and came into force on 16th March, 1954. The figures are for constituencies as constituted at the date of the General Election held on 25th October, 1951. The figures given in columns 6, 7 and 8 relate to persons entitled to vote at elections held on or after 2nd October, 1954 and before 16th February, 1955 ; they are not included in columns 3, 4 and 5.

(2) For constituencies whose boundaries have been altered by Orders in Council made since 25th October, 1951, which become effective at the next general election, the total electorates which will follow redefinition are shown in footnotes.

See Explanatory notes on page vi.

TABLE AA.—Maternities and Births of all Types, distinguishing legitimacy and, in the case of births, sex and whether live or stillborn.

England and Wales 1954 Occurrences.

Note : The term " Maternity " is used to denote a pregnancy which has terminated in the birth of one or more live or stillborn child(ren), the definition of a stillborn child being that contained in Section 41 of the Births and Deaths Registration Act, 1953. The Maternity record differs from the Birth record in that multiple births from a single pregnancy are counted as one maternity, while for the birth record each child born is reckoned as a separate unit.

TABLE II.—Legitimate Maternities to women married once only by mother's age at maternity and marriage duration.

England and Wales 1954 Occurrences.

Note: (i) The classification by marriage duration now presented differs from that of 1951 and earlier years. As the month only and not the day of the mother's marriage is obtained at a birth registration the marriage duration cannot be exactly identified. The assignment procedure is now designed to secure that numbers shown in the table correspond as nearly as possible to the durations to which they are assigned.

(ii) Cases in which the mother's age or year of marriage were not stated (see Table QQ) have been proportionally distributed and included with the stated cases.

(a) Classification by marriage duration and maternity age in single years.

TABLE RR.—Infertilty of Deceased Married Women distinguishing certain **Causes of Death.**

England and Wales
1954 Registrations.

Note.—The columns distinguish deaths according to whether the deceased was reported:
(*a*) as having had no children by any husband, i.e. Infertile,
(*b*) as having had children by a husband, i.e. Fertile.
Deaths in which the record of fertility was not reported are excluded from the table.
In view of the unreliability of inferences based upon small numbers, proportions based on less than 50 cases (Infertile plus Fertile) have been omitted, and proportions based on between 50 and 250 cases are shown in italics.

†The population of the transferred area was wrongly enumerated at the 1951 Census as if the area already formed part of Alderley Edge U.D.; no adjustment should therefore be made to 1951 Census populations for these two areas as given in the County Report for Cheshire.

NOTE: On 24th May, 1954 the Urban Districts of Harrow (Middlesex), Whitley Bay (Northumberland) and Solihull (Warwickshire) were created Municipal Boroughs by Charters of Incorporation.

(iii) Population of areas as constituted after the boundary changes shown in (ii) (Supplementary to Table E).

Census, 1951

COUNTY REPORTS

These reports contain the definitive 1951 Census populations for Local Authority areas, wards, civil parishes, parliamentary constituencies and petty sessional divisions. Local populations are analysed by sex, age, marital condition, birth-place and nationality, numbers in full-time education, and social class.

The analysis of local housing conditions includes the number of dwellings, their size in rooms and size of households in occupation, and the household arrangements (viz. piped water, cooking stove, kitchen sink, watercloset, fixed bath) possessed by each household.
