THE MOVIE

## A feature-length documentary arguing for Britain to LEAVE the EU

**BREXIT: THE MOVIE** makes the case for an open, prosperous, democratic, and independent Britain ... outside the bureaucratic, insular, unaccountable EU.

**BREXIT: THE MOVIE** shows the terrible damage done to Europe by the EU's suffocating regulation and self-defeating trade restrictions.

**BREXIT: THE MOVIE** highlights the dangers of tying our fate to countries which are close to financial ruin, drifting towards scary political extremism, and suffering long-term, self-inflicted economic decline.

**BREXIT: THE MOVIE** looks to Britain's bright future outside the EU, arguing that it is safer and wiser to live in a country which is independent, self-governing, confident and global.
