July 6th 1899.

I have felt disinclined to write
in my diary, deriving nothing objectionable
to write & having lost the habit of
intimate confidences in a
joint diary such as we have been
keeping during our journey & as the writer
he can't run on into self-analysis
forming gossip & indiscreet descriptions
if some one else however dear, is to
solemnly read it then & there. He presumes
the sort of kindly tolerance he tolerates
between intimates he will accept
the rest entirely - & this feeling will
be chief mode it should be possible
to write without (as he says) mind
of the time without thought of the
tomorrow of his criticisms

As regards our friends & relations
we find only three (as far as I am concerned)
altered. I know 2 Charlotte was
married - the former a chronic
invalid the latter a devoted nurse
living in a charming house up at
his head. She still writes but -

Mark is pretty somewhat unusual for he
 has a hot home life not being able
 to walk & get among his equals.
 He is ^{as} cheery & witty as of old: but
 now and again a flash of jealousy
 & vain written passes over his countenance.
 Charlotte ~~is~~ ~~difficult~~ under pressure
 of anxious affection has broadened out
 into a ~~disregarding~~ motherly
 devoted woman, but her anarchic
 desire to shift the scene, for day &
 night she is never absent from him.
 There are, in fact, some compensations
 for the burden of his the sudden
 cutting off of his activity.

The other transformation is in Rosie
 Williams - the transformation from an
 hysterical invalid into a - well I
 don't like to tell the tale as fully
 as now she is in the eve of
 marriage to a respectable young man.
~~It~~ Good fortune protect him! the
 driving cause of nature is against
 him! Rosie's life is a proof-
 that the absence of good nature

will - to see mean the presence of evil.
 Circumstances have been against her &
 have intensified the evil side of her
 nature: "~~Her nature is evil~~" but I still
 believe the best of circumstances could have made her
 otherwise than (unhappily being) bringing unhappiness
 to those about her. Her mother who regards her
 as the flower of the family! The burden of
 the business has fallen on the country & back

March 9th ^{is my diary}
 Interrupted for a whole month would
 be continued. Now that I take notes regularly
 all the morning of. It divides of two columns
 as well as notes such letters as are
 absolutely necessary. I have an inclined
 to take up to go in the afternoon.
 Today has been principally engaged in
 engineering to do on school with its proper
 plan: to let the individual carrying attendance
 with the Commission to receive a
 school of the Government of the ^{State} Faculty
 of Science & Political Science with
 the D & B to know their Faculty
 & into Pass more I'd want to ^{present it to the} ~~submit it~~
 quickly serve to be going ^{excellently}.

Meanwhile we are well into our new Enquiry:
 have obtained a syllabus for the
 of investigations & have engaged a clever
 ambitious elementary school teacher as
 secretary or assistant. We tried a "trial
 run man" straight from the University but
 he was a slow failure not ~~for~~ realising
 that constitutes a day's work. By
 present we seem to be hitting the
 extreme corner of our subject
 but I suppose in a few time we shall
 feel that we have got some kind of
 proof of it.

You talk about of living the
 student's life & with training from any
 social context which is inevitable
 with system only a regular routine
 plain food & about one of sleep.
 But still remember that we do not -

April 28th W. P. Dyer Boston.

Some of the dependents for Thursday before
 & those dead as on Boston
 Sunday (on S. had promise & presence of
 the conference ^{known} to be held this a long time. His speech
 & the conference itself were an unexpected success:
 all the papers given full reports. But otherwise the first
~~three~~ ^{weeks} ~~from~~ ^{of} ~~days~~ ^{of} ~~was~~ ^{of} ~~written~~ ^{of} ~~as~~ ^{of} ~~all~~ ^{of} ~~the~~ ^{of} ~~speeches~~
 were very good to P. Dyer's class. Some of
 his are exceptionally good also & the hearing seems
 to have been a very strong change for one held
 with home. In ~~the~~ ^{the} ~~last~~ ^{of} ~~year~~ ^{of} ~~there~~ ^{of} ~~will~~ ^{of} ~~have~~

 For another ^{well} (S. W. Spencer & I were here &
 with the documents, they be treated to
 with Mr. C. G. of W. Dyer, W. Dyer &
 Jackson & School Board of Dyer. In the middle
 of the term Dyer has to return to Dyer, leaving
 me & on his society V. Spencer & friend
 of an hour or so.

W. Spencer who we expect to help help
 us in the enquiry, is an elementary
 teacher who has for two years been an assistant
 student at the Dyer School, & is his spare time

Lectured in Dominion for the West End Capital Corp.
 He is a tall pleasant looking fellow, serious &
 reserved, but an admirable sea-assistant
 & the sort of work, concise & methodical in
 abstracting & extracting from 2 sessions
 of temperant. He has not Galton's attractiveness
 & responsive mind, & executive 'dash',
 but on the other hand, he strikes me as
 far better trained & into far more intellectual
 persistence. (While he was with me) Galton, I
 never lost the testlessness of the
 down "Garnier" & the better part of his
 time this testlessness combined with a certain
 mechanical (he was always quick in an emergency)
 of conscientiousness & hard work
 a somewhat casual assistant. He has
 more drifted into the career of a political
 organizer for which he is admirably fitted
 with his bright attractive personality, his versatile
 mind & his extraordinary swiftness & execution.
 I should like to think that he is a better
 investigator; because his heart is in the work
 for its own sake & not simply as a Galtonian
 because he wishes to "put through" the job
 efficiently & quickly.

The personality of the sea

Leeds & its inhabitants seeing it as a great
 country. "Setting up" means in L.S.D. is the one
 side of the ordinary Leeds man: the other is
 conventional & firm-faced & the ordinary man

 any hesitating spirit, the Tory spirit ~~is~~
 it very rarely seems there, more the latter

fair than measure of the absence of it
 it even more than does liberal. ~~The~~ ^{liberal} ^{is} ⁱⁿ ^{fact}

 The same man who has apparently kept
 Leeds municipal life decent since (the only
 would name efficient) has been the chief
 victim who makes to rising Leeds self keeper
 down to her himself called "Al Jernoe" still
 more "the low mayor": Social ambition has
 just perverts democracy self-interest from American
 Leeds conditions. Social ambition is a form of violence

In something better than profit - the
lowest form view of its loss - but still
containing that wonderful lesson of ~~Business~~
appreciation for what is superior to ~~itself~~ itself -
You know yourself & he.

We are obviously going through no difficulty
- getting at our material; our difficulty will
be in determining what to select & where to
stop. Between ~~myself~~ ^{myself} & this diary, I
get a better of the actual work of unintentional
the diary is at them; he is shy in ^{Cross-examination} ~~only~~
officials - who depend ^{on being uncorrupted} ~~on being uncorrupted~~
~~for information~~ ~~to~~ ~~do~~ hates the life in
divinical looking, & dealing every-day with
fresh people - & this refugence works on me

sed him into a casual adventure. In the case
of accounts he far more efficient than I; but in
the manipulation of intricate - but a view to
extract to trust confidential information -
his his shyness & skepticism - gives me the
advantage. As I am more talkless & faster
this advantage, the he is at them to catch
& criticize me! ~~But~~ However that I can
find my whole mind to the work, he is
pre-occupied with details & administrative
matters - the present one being to

 he has built up his structure; but he is not
 one who keeps going to structures to stand &

May 16"

Mrs May of "Grass Court" was a
 charming hostess ^{in York} of an almost-beautiful woman
 with fine features 2 green like tints, the
 generous sympathy 2 warm hearted of same spirit,
 Harvard attitudes 2 totally untrained mind.
 The old house built into the walls of York
 2 including the Dean's garden was a
 welcome change from the dead building House
 about as up provision 2 still as her
 "inherents". But the infinite pleasures
 the few days I spent there were hardly
 so fruitful, because I had to "talk"

for my entertainment & came there every
 morning & the "Minutes": His play
 on a "Jurisdiction" & for that of the
 by: the. seldom when an administration
 of the Jurisdiction of the District) confirms the
 impression I gain watching the
 behavior of the Leeds Board of Jurisdiction,
 that representatives must, a low Court-
 to administer that they be a ~~large~~
~~great~~ definite body of that.

From York I went on to Beverley
 to look into the Sect. Burying C.C.
 John Dickson with whom I stayed is the
 son of a Bishop & married to a "Lady" Jones:
 (a fine old maid ^{with some} ~~person~~) He is an athletic
 attractive ^{member of the} County gentleman ~~man~~ by the
 name, who by day sits in Beverley
 about 11 o'clock & comes out by 2.30
 train: takes life in a casual fashion
 & looks with kindly tolerance on
 the "little people" who have joined the
 County gentleman since an elected
 C.C. look over County affairs.
 He is a Yorkshire Whig: for too

gentlemanly (have the social prejudices
 but first was one of the best forms of education
 professional. Fortunately he gave me all
 his Prefats, otherwise my visit would have been
 fruitless for he insisted on "entertaining"
 me to such times & eventually, I, finding I
 took, I went off for a nice visit, &
 extracts out "Shop" I could between
 present chat about news & affairs.
 He took me to see the Town clerk of Beverly -
 a cynical vulgar but able solicitor who
 on arriving directed to call the assistant
 C. C. clerk "Beckwith". The grey haired plain
 lady Margaret, on, like her play, a Jewess!
 The next morning she became confidential
 as to their plans for getting some London
 appeal basis. I'm John Beckwith! It
 found it's days are gone when a fine fellow
 & first-class sportsman can be jelled into
 22 over a year "a present Defiant."

How much have I heard of
 my six weeks investigation? A vision of
 the tangle of dual government: of the independence
 of County Board, the recalcitrant Jefferson
 of the Home County Board & the shadow of authority

known over the

of H. Compt Com at the proceedings of
the District Com at the C.C. proceedings,
the effects of Parish Com at the
of the H. District Com - the universal
rivalry & sometimes the actual litigation
between ^{various} ^{uses} ^{of} ^{the} ^{same} ^{authorities} over Extensions

& Incorpations, water drainage
travellers & ~~concepts~~ ^{hospital}: then again of
the mechanical grounds of the School
Board & the tax sentimentality or

short sighted dogmas of Board of
Sanitation: & the distance, that all ^{mechanical} ^{problems}
~~mechanical problems are also the~~

L.S.B.: Theatres, Delays, Enquiries
& Auditing ~~and other reports~~ ^{the} ^{one}
a ^{the} ^{of} ^{the} ^{local} ^{authorities}. It is
not a vision of beauty: but it is
intensely human.

I take such full notes of
interviews & meetings that there seems little
left to connect into one trying to ~~reach~~ ^{reach} ^{later} ^{is}
the man ^{pieces} ^{now}. Whilst I am
mainly absorbed in this ^{subject} ^{of} ^{the} ^{day}
is engineering to School, & to a ^{less}
extent ~~the~~ ^{the} ^{subject}. He is not to be

point is that Compt Comal, perhaps because he has
 been so long away, is perhaps because he is more
 a man considered a specialist in Education.
 In Educational matters he leads without dispute;
 of J. S. D. & the Comal. Doing anything that
 he ^{thinks} is right. He no longer seems to evince hostility;
 "moderates" respect him, ~~propose~~ he hardly
 proposes ask his advice but do not regard
 him as a rival. He doubt this is due
 to his growing disinclination to compete in the
 struggle for leadership or to take any steps
 to start on a career of political advancement.
 His interests for ~~the~~ personal strife become
 fewer & fewer: he is as energetic & persistent
 as ever but his energy is perpetually seeking
 the line of least resistance for the cause he has
 at heart & the best resistance is not to
 be found, for him, in political leadership.

Halverson done with us last night & tells
 me several things - especially the possibility
 of getting money to conduct some of his
 missions. We looked at what he said at
 Pittsburgh ~~that~~ ^{he} explained that we could not personally
 approach "the republic" but after the time
 loss a paper differently - ~~perhaps~~ John Parley

Halsome spent a ^{personal} ~~very~~ ^{long}

for instance - might feel able to affect (him) ^{personally}
In Sunday evening - draft some kind of
description of what might be done & send it to
Halsome. The letter on Sun-headers -

from Donhead that I have seen has
a lot to do with prospects of the Liberal party:
he tried to explain away Rosebery's
last speech - crying pity & Home rule, Socialism,
temperance, & all other ^{kind of} reforms - but could not
do it, even when one identifies. The
position of ~~the~~ the leader "Strike" is becoming
ludicrous, ~~but~~ no one understands what they
are striking against ^{unless it be} each other!

Halsome brought a cordial invitation of
Herbert Gladstone to Sidney & I stand for
Duff from a very other kind of consideration -
- all depends on the hour of day -
& size of place but of some extent.

"The thought of standing up to them good"
said Halsome "but I like them" "he called me a
~~white~~ half-breed, half playful tone: "Not you
" were like Rosebery, you'd rather come
" & don't go out " "Growth or power
" this is to be the company, V. Halsome"
"I relate" in speech continues to stand
"in the same way" ^{help to} block it up too

standing there!

Two days in London he has benefited
 by social duties. For three days I had to wait
 to Herbert Spencer in Brighton he became
 insistent that I must visit him. I'm also
 a gentleman I very believe that he regards
 it a "luxury" for me to spend so many hours
 at his seaside in his stuffy house & sitting in
 on his stringy horse keeping - so stringy that sometimes
 I have spent 20 cents ⁱⁿ (traveling) walking
 & will be with which manufacturing an
 excuse to get a good square meal "out"? However
 if you had the time: no actual
 deprivation of nourishment. Two comfortable
 young women - one a friend, the other a
 housekeeper, are in perpetual attendance -
 the ~~same~~ ^{same} society. I servants 2 - excellent
 - set at 4 o'clock of 11 for the man's money.
 He told me he was dining & know of.
 J. says 2 to let the go, I know the go to
 America, J. his bank & all his savings are
 in the Lyndalton Co (which he wants to
 sell to White & Trade Union) being a very
 large % so he is more than well to do
 considering his various needs. For all that he's
 overman

There is, in his life, the stamp of heroism:

He has ^{at 80} still ~~undoubtedly~~ ^{been} revising his Biology: and so he does his utmost, - it is from faith that his ~~work is done~~ ^{work is done} ~~is done~~ ^{is done} in incarnate truth.

June 15th Birmingham.

The show week here Sunday having started the a fortnight now returns to his C.C. work.

We get straight into our Enquiry & have been writing every day, I mean at the moments of the Town Council & Sunday & I at intervals

~~and official~~ ~~in~~ ~~reference~~ ~~from~~ ~~our~~ ~~letters~~.

Two delightful Sundays we spent - at the lanes of Chesham - one night at Warburton then 7 yr. ago he & I stayed at an engaged couple with W. Green as chairman.

Those Sundays were very happy days:

honey-moon rambles, dodging the dog's round & finding ~~the~~ ^{the} ~~camp~~ ^{camp} & farm-yard!

[At times we got discouraged at the

business of our undertaking: this we consider led then of referring "Will you or can't do it as we can!" a concerted attitude of mind. Now I am feeling somewhat-

loafy - it looks long: a side fortnight

away from him. When I am at work I do not
 feel otherwise than happy & contented
 I am well & can work six hours.
 But after dinner when a cigarette is at
 end of either feel depression or my
 cursed habit of sentimental letter-writing
 leads me ~~unpleasantly~~ to dark back in to
 past: And then there is the mental reactions
 Scenes the vividness of which seem to
 make them real & I'm rich by their ~~unpleasantness~~,
 & I lose for moments at least, my self-control...
 Oh! the mysteries of human feelings! ~~What a~~
~~strange & wonderful world of emotions!~~

BW Diary
Vol. 20

Mulholland May 22^o 1900.

I have not my diary written, but I feel more
to write. The last 3 months have not been
thoroughly satisfactory - my work has not been
my best thought & feeling: foolish earth thinking
on the basis of Self consciousness & vanity -
foolish worrying over the inevitable & the
Pecho (or some other) (the & dead loss &
to make us a legal complications)
& certain physical symptoms & intellectual
effort - hence all combined to make my
work half hearted & unwell. Sidney is
free from all these defects & every day
I live with him the more I love & honor
the single-mindedness of his public career
& his single-hearted devotion to his wife!
And every year I appreciate more fully
the extraordinary good luck which led me
to know & my lot with him. Just as
it was the worst part of my nature

It led me to become passionately affected & -

~~AMMUNITION~~ so it was to last part of my
return which brought me to a well Sunday,
after much doubt & delay. And certainly
just as I was well furnished for to me

I have been richly rewarded for the other.

~~Nothing~~ And yet not understanding this

conviction I find my thoughts constantly

banding to the great man & his family

betching his career with sympathy & interest

& desiring his welfare. Sometimes I think

I shall like to meet him again: at

other times I reject the thought as a needless

affliction of feeling. But all

this is only "Sentimentalism" in itself to do not feel

I am at most times buoyantly happy.

in my love for my boy & in my

interest in my work. My Sentimentalism is

a keen play thing - but play things

also take time & thought - and

thought, of that time, is limited.

The best of your new idea to settle
how useful we shall be to our generation.

One effort is now directed to our end

But if we are to think of the development
 of local government, in all its different phases,
 from our Charter Acts; it is clear that I
 must be free from the instructions to
 do so. Relations, of course,

 such as it is, is distinctly a disadvantage
 than L.S. work: it matters as to
 get quickly at any official or

 going to be any trouble in getting on
 material: the best will be to select from

I was peculiar about the letters note
 of Allen Dett - an unconscious testimony
 to the rightness of our marriage. Also he
 was not true with me, unless
 he has been honestly steady to me, &
 his evidence is worth having. It is now 2
 years since I have seen him: we have ^{see again} ~~seen~~

Five weeks in Manhattan: we & letters

 We are now intended & elsewhere & then

Enquiry into Trade Unions; the problems

 the best-organized ~~part~~ part of the subject matter
 are the persons engaged in local government -
 a singular lack of charm & industry,
 & poor efficiency.

The Manchester Town Council fears
 that no man satisfactorily the 1st Dec.
 The most striking feature is that
 the volume & importance of its work
 has increased its organization - the
 different parts of the machine are out-
 of joint: it resembles along a some
 sort of fashion become outside from
 control & to be feared but it is always
 making some showing that to be
 inefficient & corrupt & both. And
 yet the men in the town council
 working to organize are not a bad
 lot: one or two for official are
 dishonesty all, and I don't doubt that
 an appearance of that are corrupt. But

Councillors

Members of the various Departments meet as
 consultants they are not administrators
 & have no one Department, for which
 they are responsible: Treasurer is a
 promoted clerk, the chief councillor is a
 promoted policeman. The ~~rest~~ ^{with one exception} administrators
 officers are ~~not~~ ^{all} the Secretaries of the
 various Departments: the Secretary of the Police, the
 Secretary of the Treasury, the Secretary of the
 Prison Department - these officials are
 clerical clerks with no professional training
 except that their service under the Committee
 has given them. In fact there is only one
 real executive official - the Director General -
 Brodie Superintendent of the Savings
 Department, who has been entered the Council
 service at 50/ a week & has a
 real effect on his work. One may be
 safely taken to see with the right
 & inception of the policy & the best
 instructions under the law. To make
 comparison with the Committee all
 things themselves as independent commercial
 companies relating to each other
 are a troublesome body - the
 Town Council, meeting once a month.

These committees nominated themselves & then
 is a somewhat closed tradition but they
 the members of the meet always show a
 united front before the Council. Hence an
 atmosphere of Secretiveness towards the
 Council & Suspicion from the Council.
 In some cases the Committee is dominated
 by some individual who is jealous of
 control - for instance of Paulus O'Brien
 he has been an excellent Tailor in the
 Church. In other cases the Council is run
 by a very able & efficient man, but
 even then he finds himself a victim
 of "as if it were my own business" &
 results negatively any disapproval of his policy
 or methods. In that there is no coordination
 of or official Church business & the
 the secret part of the mechanism is a good one -
 Church & a reform. Hence friction & petty
 Scandals, accusations & false accusations.
 And all this secrecy & resentment of
 intrusion does not achieve its object:
 Most ^a reluctant members & ^{and} Elected
 and top stories are forced of penitence &

We then work with them. I am glad that my ^{life} ~~work~~ becomes every day more that of students & teachers in intercourse with general society stretching up into far-between acts of casual acquaintance. We soon know & again, to remember an exercise. It is so easy & so slow to slip out of the ken of the greater folk whom one has for chance met, they are completely responsive to indifference.

A cloud hangs over our little set: from
 Costelloe, Surgeon's friend & colleague in G. D.C.C.

 is a painful suspense about the transition of opinion:
 the cleavage separates persons directly written, &
 writes them by constitutions & training dissolved.
 As we know he is his friend & he is his
 enemy. Sidney does not care to take either side
 & is therefore suspected of both: he is against the
 policy that led to war but that issue being
 passed, he is prepared for a policy of
 "through" in dealing with the Doers. And he can
 not be depressed by the universal dislike
 of English in the Continent: it is pleasant to say
 to put it down to envy & jealousy but not
 convincing? To know like Leonard Robinson
 Messingham & Zouvi Harris - do that the dislike
 fully justified at times like the, & the fact
 that the they are accustomed to see it, but after that
 in suffering from a kind of hysteria does not
 to in their spirits or impair their temper. To
 by means the Doers being fully armed & confident -

 But whether they are now to be have allowed

Torquay July 31 1900.

Have for the night already got engaged into Boro extension.

A month with Susan at Plymouth: just at work every day at Plymouth Road with Susan & self as. Two days wandering about Dulrose in mist & rain to be in an afternoon on a hot walk in the Heights of Incheon, Kent-Batten "constitutions" done in "Hole" at Sandstone after the days work on done: otherwise one day was lost in deciphering minutes interviews & writing away one evening in "Pudd" in one lodgings. During the whole of that month I never found time to do all essential business to write in my diary & try to sum up the year's life. For us however it is long been a time of contented work & delightful companionship. I remember that we were 15 months ago steering through the topics I studied the thought of the coming year with technical reading in in towns: found that both my spirit & my health were back under severest strain with a sleepless sleep & characteristically dumb

Without long days & 12 months. But if you re-
 turned at half hour: the enquiry has proved
 as a naturally interesting my health has been excellent
 & the ~~one~~ delight & joy of an occasional 48
 hour & 12 months has almost none at all
 regular holiday. Then some, has been well, interested
 & happy: every day brings us no more confidence
 & 12 months children of our slow steady
 facts & careful reasoning from them.

But the last six months & especially the
~~last~~ days at D'Yonville have been darkened
 (the height of a war. The horrible
 consciousness that as a nation we have at the
 best, shown ourselves to be unscrupulous in methods
 vulgar in manners & inefficient in 'Med. Supp'
 is an unpleasant background
 to our personal life. ~~There~~ This thought is
 always present; we walk to it with regret
 & return to it every hour of the day. The Boers
 are ^{now far more} superior in every direction, &
 peaceful - yes in capacities - that is the
 kernel of their admissions. It may be that
 conflict was inevitable: I incline to think so
 yes: but that it should have come about
 through muddy intrigues & capricious pressure
 & that we should have shown ourselves so

And mean while we are working in wealth:
 almost any class, except the middle class
 unless, but more than they are accustomed to.
 Pleasure a ~~primary~~ aim, & even a pleasure
 an hour that is chiefly desired of men & women:
 Science & literature - even the social
 ambition & party feeling - seem to have been
 ousted by the desire for mental excitement &
 physical enjoyment. If we find ourselves for
 a few minutes and dinner did we shall
 have to nerve & ~~our~~ persistence to stand
 up to it? That is the question that
 haunts me?

From all accounts matters are going from
 bad to worse with the Liberal party. Prescott,
 Halcome says, has made up his mind that
 the Liberals are no good as an instrument for him,
 & the bulk of the Liberals are angry at his absorption
 & upsetting interventions. Complete Dominion
 Democracy & "some Imperialist" is at heart
 a "Pica man" who will see the old Liberal
 leadership "fanning of the wind" & heaves for competition
 at home & abroad. The latter class of Imperialists
 - Gwynne, Gray, Halcome - have been carried
 out in the year in a somewhat undignified
 manner & condemn the methods of the present
 they appear of its policy. The latter kind of
 thoroughgoing opponents of the Liberal
 themselves feel in the "Centre" of the policy has been

shows of Leonard Courtney & Sir Stuart Clark -
 to 'Winnits'. Whence 'to a thea' which
 are gathered together. There is a struggle
 which ends in a 'black ball' or a motion
 for expulsion. As the friction is made, more
 deep scars by the cleavage transverse, but
 a social question: to do things with
 again being left of a school part
 which some of the most thorough social
 reformers are fighting with impetuosity.
 In a result - all turned to P. in such
 of the House of Commons & no longer fear
 their promising young friends to enter in.

Research on later schemes with regard
 to the Government ^{proposed} prosper. We have got
 a school recognized in the Faculty of Sciences,
 we have secured a site & a building for

 from the Faculty of Sciences: Sir John
 will be a member of the Faculty & will
 probably represent the Council on the Senate
 & best of us are hence definitely friends
 of the Faculty of Sciences; & intend that
 the preliminary ^{studies} degree should be mainly biology

A week with Herbert Spencer at Brompton.
 Cambridge & visit to him over some days

 He is better & more benign than I have
 seen him for years. He tells me firmly
 about the world in general & England in
 particular. "Heeding, though for military
 purposes; & he feels all set with by-
 dence. I remember being angry many
 years ago, with our Irishman for saying
 that the English were stupid: I shall
 not be angry now I shall say only
 "they are brutal and stupid" He still
 claims his old affection for me - more
 out of habit I think. For every year
 he has been suspicious of our aims

I am given a of riches, from him. His ~~house~~
 has become quite complete - two large young
 persons as housekeeper & ^{whereby} I need,
 a lady, & society & a ~~small~~ ^{small} ~~country~~ ^{country}

 His society has not had a holiday for 10
 years & his two young ladies are well-
 clothed at all day & every day - "keeping a
 pleasant circle for me" as he says it. He
 is despotic - humbly so - anxious for
 their health & for his own view of their
 happiness; but intensely suspicious that
 he is being "done" by his housekeeper

 Don't know: it is somewhat painful

 long continued atmosphere of flattery &
 servitude. He is slighter visits, not a
 thoroughgoing epistolary, de Jambic & halloo man -

 now with a good natured interest in Tracy's songs.
 The "fly in the ointment" in the Playes life
 is the personality of their daughter - her: Annie
 (he' henned her) a somewhat uneducated
 salby tempered young person, into plain &
 money, poor physique and cynical temperament,
 with whom Mary, in our meetings, has
 "got along". It is not see Annie's fault;
 Miss Mary's society, by taking the
 place of ^{resident} daughter of the house, Mary
 O'Moore has a high favour, is the
 "beloved" daughter with cheer; there is no
 place left for a children woman, with
 a poor temper and pretensions, who happens
 to be the son's wife. It is a ^{constant} trouble
 to Mary Playe; but she bears against
 the 2 Dicks, especially to Miss Wren who
 has no pretensions & does her best best
 to be hospitable & agreeable to the
 unloved daughter in law. The Dicks both
 were then into the two ladies, & Barbara
 Kennedys, who her friends - a steady young fellow

From Cairn Brown: Dying of loneliness
 just as she had achieved success & filled her
 school through. A heroic woman who has worked
 hard for our child hood - a glorious family
 history with her intellectual interests & warm
 affection. As before she went to the colonies
 she had charm & distinction: in the
 Tongue & manner of a school mistress, like
 among the vulgar rich folk of the ~~country~~
 Queensland, she lost the charm & some of the

to her insane ideas for killing & physical violence,
 & her manner her deceitfulness & her persistent
 brutalities. Then seems to me but a
 phony dream

June 12th Licenti

Staying in young Boarding house - the best
 & Licenti for a thorough investigation. It is full
 of a woman of character & intelligence but
 a hard heartedness - hard deal, tricks
 tough & monstrous & service inefficient
 but willing. We pay 2 pence a week each,
 & have good kitchen & small sitting room,
 one table but some 1/2 days after lodgers -
 4 harmless women me & two women
 for mail boarding house. Everyone is
 good temper & well mannered & the other
 lodgers either do not feel the tough way
 or are too good temper to object to it.
 Sunday July 14th In comfort from the
 Do: a curious welcome of the specu-
 lation of the man for the
 poor of surroundings orientally like
 them & I pursue various interests.
 It will be of great interest to
 Enquiry: makes up for a good deal

family characteristics dominate each year
him completely by a richer ~~intention~~ and
to live in the places.

The 4 days of Primi Brown -
that hope for the future - thinking
and of them as the day dying -
2 the fact that she came to see me
2 the message I gave her a time to
express me into being understood. And
this the day dying I am still at
the Brown House just like she is
Sally: a home into work but small
to rest. A minor element of discomfort
on an uncomfortable feeling that we
had been in her imposed conclusion in
the house 2 that should show did not
specially want to see us. The however was
I think a somewhat similar feeling. But
it is clear that she has the happiest
nature of mind not presence in her
somewhat impulsive hospital 2 good
natured appearance in our presence.
All the more she is to get to
with eyes - to enjoy it meant that
of herself in the house of home
relationships - except that one ideal

out of definition & my secret ^{qual} involvement
 in the ^{reflexive} results. It is a ^{most} front
 whether we gain or we lose by it -
 is called "personal magnetism" - like
 passion & hope. It is wd how much
 it is connected with his genuine
^{independent} qualities of character & intelligence. It seems
 simply safer-imposed as to good & the evil
 of his return: it was a gift &
 a drawback.

And it is fact of the same nature that
 makes me subject to elements of
 self-complacency or self-deprecation. Just now
 I am in a state of some state of self-doubt.
 As presently he will I shall be back you
 in my usual self-complacency. ~~Part~~ A modest
 low state of vitality, the consciousness of
 my life & that terrible state - (a realization
 of what the world has of to family) - Some
 letters show that separation & even friends
 do not let me, a realization of my foolish
 vanity of anti-credence, a true love, &
 who remember it to the - all these things
 have produced a state of permanent state of
 mind. Consequences I shall present

become better: intellectual curiosity & freedom
 spirit, kindly feeling & others & devoted
 love to society, will become the very content
 of my consciousness. These temptations will
 come again in the admiration of others, and
 in their willing subordination to my will,
 & again, to happy state of mind will
 be absent & I shall relapse into vanity.
 That is why a ~~simple~~ life & to great works
 one has been fated by temptation: I
 need have not & desiring to keep
 myself in good moral condition. The one
 happiness which have seen & injured me
 is Sidney's adoring love: that encourages
 me when I am dependent & holds me
 back when I am elevated into vanity: it
 is surely blessed.

June 2nd 1840

Address Mr. Dill's "Socialism" in the
 last number of the "North American". It is true
 I have sufficient energy now to read books
 unconnected with my own subject, but when I
 do I "taste" them as to mere. The pictures
 of the Roman Seneca's claim, etc. to be a

working by time - also of some one to lunch
 & dinner & dining-out & calling - some
 distraction - taking one's thoughts away from
 profitable working, one could say. For one
 present work - pushing to schedule & one
 enquiring into d.s. Some social connections
 are helpful - the same as follows
 has made sacrifice of personal effort -
 to make a personal influence? In English
 all forms to establish her undertakings
 texts as given influence over the various
 teaching classes - the same classes, you
 are - and with this emphasis
 lay down foundations. In it others
 have your power for good depends
 on the way you use your power for
 your special period - & the best depends
 on what hereto depends upon subject.
 The sort of compromise I make is to
 take these summer weeks - holidays, &
 by holiday & to have to time that
 will be holidays into periods of sustained
 work. But we both look forward to the
 time when long months & 4 countries
 will give us at one time for work -
 all of it to be done.

The School of Business occupies the largest portion of Sidgwick's thoughts & is his chief anxiety. He has sailed into financial responsibilities which if he had not good help of extracting money from the Public would be more than he ought to take.

But it is up to Teste that he makes enterprises succeed & I do not suppose Teste for the sake of some public object.

We have seen much of Mr Leonard Courtney this spring. Leonard's advocacy of the Boer War for independence even from his denunciation of the war, has especially alienated him from the doctrinal parties. The Tories regard him now as a really interested person; the vast majority, I think, look on him as a socialist crank - even the small section of No-Boer radicals regard him as often "out of doors" with his speeches & manifestoes. Yet the I.D.P. & S.D.F. value him as enthusiastic follower of his anti-government policy - a change from of the wheel of doctrinal Scholasticism.

But he is going down with his colossal things:
 he is too absorbed in the sense of a great-
 ness and ~~in his~~ too enormous that there
 is not ^{one} way out - of his tragedy - to give
 much for his own career. Perhaps that
 hurts him that with large, & is social
 together - for demand he always enjoyed
 the business society of persons of culture &
 positions. & how they find themselves to say
 after they without imitation. There for
 demand has advanced his own & a
 open position. If the disinterested men &
 volunteers of his curriculum, he improved
 some the love of moral indignation, & that
 a discipline of moral superiority has emerged
 & initiated a scandal-critical practice. At
 the time it is the face of a nominal, Christian
 but real unbelieving broad through faith
 in God: & the majority of persons have
 resented it, because they have not dared
 to say even to themselves that they have
 secretly felt that such a faith in God
 implies & has the position of truth for
 an independent relation. This very morning
 they produced for out of a blue book
 a truly capital & really feel- letter of.

Khrushchev - an Englishman - the sincerity of his religious conviction is the arrow of his feet healthy - very true. "Khrushchev really believes in God & is God's servant - 1st Part" I cheerfully admitted & a sentimental review of Khrushchev as if, who then was I too? I thought then what for now.

"While it was to be that he is an 'unofficial' person to take over a very important part of the work he is to do" I added. Khrushchev (who) shocked & pained a student - rose to distinction he. I saw that this is a good soul, but he is an 'unofficial' sentimentalist. Not a sign of humor or shrewdness - He has given his personal happiness & self assurance but he has sacrificed his tendency to think that the Soviet Union is a radical movement a hopeless unemployment. All to some there are few characters for whom I have had a permanent & genuine respect & affection & a few former countries & his loving satellites.

Political opinion is becoming more & more chaotic.
 The Tories are, in a part, some serious attempts
 made by an old hand, after some years
 & a demagogue claim to be prepared. But at
 least they understand the game of "Follow the
 Leader". The great Liberal party - "the enemy
 of progress" has lost all settled conviction
 as to the need of Justice & the progress
 lies ^{ahead} in the rank & file are rapidly
 becoming impatient in the measure of
 contempt they take out to see their
 past & present official leaders. Captain
 Bonington on balance, better & more able
 local vote and investigations & this is
 an enthusiastic support of the Gov. S. A
 policy is standing as a head candidate
 for the 'Cull' for Morley's 11th constituency!
 Meanwhile, J. Hall & Leonard Courtney are
 declining as to any honest politician by

(74) July 31

Spent Sunday with Alfred at Parmer.

He ~~has~~ been had a hard time of it this
 spring: started into one accident of influenza,
 which left him a nervous wreck for a few
 weeks & somewhat hysterical for a
 many months. Then he & his boys set
 out upon his ^{last educational} travels - at the top of these
 domestic travels came the affront of
 Curran as Solicitor General & the spiteful
 comments of newspapers with reference
 to days of being a "son" & a "knave"
 boy. (See cartoon in Westminster). Whether or not
 it ever came to the point of his large
 income for ~~the~~ the Solicitor General is
 a question: but it is certain that
 he would have been ^{of} to reform. I think that
 feeling physically unwell & being somewhat
 weary of professional strain he would have
 accepted it. Any way he felt himself for
 a few years in his life, unsuccessful:
 he had succeeded in literature, or literature
 & could have given up his life for it by
 his letter to Westminster Scholarship & his
 turn over to Parliamentary & the
 Journal but in entering Parliament.
 It is hard for a man just passing

affairs / the notes & the way he thinks
 himself. He does not like the ~~transformation~~
 himself: he is content with a dignified &
^{butiful} person in fact or already have a
 way of seeing: his kind of a modern
 relation is enlarged by the other 2 bulging
 his intentions w/ always he to make
 a satisfactory compromise between them &
 he always accepts the better litigating
 interest. (The capacity for an impartial
 survey of his opponents fosters a readiness
 to draw a compromise in it (he has strong
 faith in a lawyer). His natural tendency
 to the search: preservation of the
 exists rather than proper a reaction,
 than the interest of Chamberlain.

I don't know what is going on
 up: It is usually to say all -
 2 contains letters & papers that are
 private. Possibly I may continue to
 the special justice notes.

one or two friendships, I was
convinced intelligent interest, some religious
feeling, controlled by intellectual interests
much cognition as ~~direct~~ & direct

of society, no philanthropy - feeling - ~~that~~
saw ^{was} the contents of my constant visit
father's death. Then came the spring into
death & vision & a rich seed-time of the
intelligence: I read after, truth, hope to be
society the love in excitement of fact,
life keeps for its future. At home,

free performance of duty, ^{an effort} ~~an effort~~
to a limited companionship with Father ^{and me} ~~and me~~

My life became inspired by the
spirit of modern science & feeling that
I could alter humanity of hope & love
it. This phase was connected with
my relations to what I call: enormous
admiration for his intellect - on my side
& affection for my personality on his.

Thenceforward was the time to celebrate
of my life. At a dinner I once gave
I met Joseph Chamberlain. At once, I
thought, we were Swiss than above the ^{superior} ~~superior~~
of marriage. He was public & wife - attractive
death & capital. I was ~~not~~ ^{not} ~~to~~ ^{to} ~~love~~ ^{love}:

~~feeling~~ ~~was~~ ~~the~~ ~~same~~ & full blow
of my unnumbered, revealing in nearly equal
death & freedom, my intelligence was weak,
my heart unclimbed. I was ambitious,
had ambitions like perhaps I tried - to
play a part - it was he had the energy
& fervent magnetism ⁱⁿ ~~the~~ passionate force
~~to~~ - to an almost perfect degree:
his instantaneous dominance of emotion
& my passion: but my intellect was
not as free but dogmatic. In
our talks together I found no common
intellectual ground: he had no faith in
Science, no understanding of its methods:
he had no interest in philosophy or metaphysics,
no care for music or inspired prose.
I did not ever recognize in him the faint
shimmer of a noble spirit - ~~could~~ ~~be~~ ~~his~~
~~feeling~~ ~~for~~ ~~such~~ ~~things~~ ~~intense~~ ~~drive~~ ~~to~~
remedy the base drives forms of social
things I am then in recall of affecting;
as I was ^{seen} bound up & the ~~part~~ ~~only~~
of dynamic individualism. As I. &
can pass 184 impulse & great attraction
in both sides as I did not ~~more~~ ~~use~~
other & hot after five years: storm & stress

I am left - Missing 2 wounded which he
departed to seek ^{more attacks, need} ~~his~~ ~~own~~ ~~land~~. What
happened in his sin I do not know; perhaps
it took place in an unexpected incident.

^{underneath} This piece was written in 6 first volume,
and he felt that he had been smitten by my
penitence & finally by myself: afterwards his
letters were unscripted. The last visit to
the region in 1857 he ^{saw} a woman who
longer young, living without the shadowings
of wealth & social position, being dressed
& what any apparent distinction. And
in spite of knowing that I loved him
desperately, he turned away & left me!

At the time, I am ready to condemn him.
But that condemnation has very soon passed
away. A truer definition of love has taught
me that the one mortal sin towards another
is to enter into the intimacy of friendship
(with a virtual ceremony) without love
- virtual faith is your enduring love.

And after a period of 16 years there remains
only a tenderness for the man I loved &
an almost ceasing due to his success
& happiness before 1853-54.

Meanwhile my intellect has been having

c part Defiant life, about unconfused
by emotions. The physical & mental ~~trials~~
of unconfused passion interrupts my intellectual
life & affects of drawing from out
things enough if it is not all of it.

I have yielded one side of ground to
Chamblain: my faith in the Dialectic
method as to basis for ~~solid~~ action
remains intact. Indeed my drive &
humiliation seem to intensify my
drive to push forward on my own
lines. That collection is wholehearted,
but to common opinion is democratic,
my investigations with Charles Booth, on
law, reading & thinking is to each hour
of the hours of home are all different
ways of pursuing my one aim, the
driving of the car. An excellent social
action. In all this business of life
I remain however a child, using the
firmness which I possessed to further
my intellectual ends. Sentimental relations
I had, but the sentiment was sharp on
the other side. Poorly I was a
child to Chamblain & what the absolute
the whole social end of my nature, but

I saw him at 2 or 3 intervals & loved
him ^{more} for things he imagined; that made
my intercourse with other men absolutely
flat from personal preferences & deliberate
contacts was a view to end.

As my home-life tho' gloomy was
admittedly suited to my intellectual training.
Then on ^{January 1st} ~~July~~ that kept me occupied
for a certain number of hours a day
in a mechanical way, he was even going
to the railway terminals in front of Father's
then on an affectionate relationship
with dependents but then on a call
to an hour of 'excursions' & then on
absolute physical comfort. All this left
my whole term force of the intellect
of my intellect.

So then see how of Father's illness
was no. Passion "burnt itself out"
& ended in the winter of 1888-9 is an
almost religious resignation of the woman's life.
Intellectual interest grew year by year,
& from the substance of a letter in
the Pall Mall is 1886 was far by a somewhat
moral reason. ~~at the~~ ^{time} ~~moment~~ of
deepest domestic Aug. 1887 was the beginning

 I think of the ~~years~~ ~~interim~~

Passion conquered, the woman's drive
^{trampled under foot} ~~trampled~~, rather practically dead, the focus

 enjoyed - friendly separation I had
 known, but I had to look forward to
