Cousin looking Smyle The

My dear Miss Stuckey

In reading yr enclosed, first let me
tell yr that I don't know if the writer, my
niece Elizabeth Williams, ~~the~~ an astronomer,
mathematician who lectures at University
College, is a member of your society & the
awful thing is that I can't remember its
official name. So that, by shame, I must
begin by asking for a leaflet abt it, giving
terms of membership & etc. data.

I cannot think that yr can put the names
of people who are panting for employment in
yr books unless asked to do so by a member
& I am quite sure my niece would be
enchanted to belong - & if yr will, in the
meantime, enter this "Fredora Leontinoff
in yr books, I will guarantee they will
do all that is needful - such as (I
imagine) becoming a member, and gladly undertake to
pay up if the efforts of Soc' are crowned with
success as regards Miss Leontinoff (for I imagine

That is the custom.)

Elizabeth, who is also a friend of Virginia,
is a great dear. Very dear & a member of
the R.A.S. I suppose - as she seems to
do all her work write all her letters there!

She (Elizabeth) is quite fairly off. I think
& this no doubt very dear but not very attractive
looking young Russian Jewess, is a great
friend of hers, & like most other people
is longing for employment.

I believe it's quite true that - her main
object is to get some brain-work to do -
that's more an object than the size of
the fee she will get.

Yours very sincerely

Edmund Smith

I'm so thankful the world is being
that (now extremely dangerous looking
stade! Leonard also told Elizabeth he
would do his best to find something
