KUZBAS OR COMMUNISM Questions that Must be Answered

Comrade Tom Barker sends us the prospectus of an industrial venture new being advertised under the auspices of the Russian Soviet Government. The scheme is laid in the Kuznets Basin hence the name, "Kuzbas." The printer The printed

the peasants, and the factories to the working man. Through four years of most terriffic struggle, these victories have been maintained. This is the great historic fact that keeps the eyes of all working men on Russia." Yes, that historic fact filled all Communists

with enthusiastic hope, but now the Soviet Go-vernment sells piece-meal the victory won by the blood of Russia's millions. As the prospectus truly observes :

"Soviet Russia offers her industry to the capitalist concessionaire, to world labour, or to both.

The Kuzbas scheme is explained thus :-

"Two of the most valuable concessions in Soviet Russia have been taken off the concession market, and are now held for exploitation by an organisation of American workers." The term, "exploitation" has an ominous sound, but let us examine the scheme :---

" The plan is to develop Concession Number One offered to world capitalists—the Kuznets One offered to world capitalists—the Kuznets Coal and Iron Basin, with its two hundred and fifty billion tons of coal, its iron ore, timber and agricultural land, and to operate Nadej-densks Zavod, a complete steel plant in the north-eastern Urals, which, in pre-war years, produced 20 per cent, of the total steel and cast iron of the Urals, being the largest pro-ducer of charcoal pig iron in the world. It is an opportunity so large and amazing that it takes the breach away. It is as if one were being asked to be the founder of a new America."

It is proposed to induce industrially qualified men from countries outside Russia, mainly America, to emigrate to Russia. Each worker is expected to pay his travelling expenses, to provide himself with clothes for two years, minimum value two hundred dollars, and to pro-wide two hundred dollars or more to pay for his

Each food and tools and so on for two years. worker must therefore find 300 dollars beside his travelling expenses. Additional money must also be raised for other needs. "An endeavour will be made to get the worker to supply this addi-tional capital as far as possible." It is proposed to bring in thus six thousand foreign workers to carry out the first year's programme. Men are chiefly invited, but "Some women and children are desirable, to maintain the proper home life and home atmosphere. The engineers will in many cases be accompanied by their wives and families."

Single women will also be considered, providing they are also industrially qualified, physic-ally fit and politically reliable." Apparently the standards set for women are somewhat stricter than for men. Doubtless it is realised that the proletarian woman able to contribute upwards of $\pounds100$ is practically non-existent, and that, of single women, only the middle class are like'y to apply.

On the face of it it seems regrettable that the Soviet Government should have made it a con-dition that the worker should be a little capitalist before he may go to Kuzbas; but there is worse to come. The scheme entails some of the most ugly features of capitalist exploitation.

Says the prospectus :--"Most of the details of the enterprise were worked out in Russia, so that everything as stated in the following pages is authorita-

Then, in detailing the advantages which the cheme offers to the capitalist-proletarians from

YOUR SUBSCRIPTION.

I merican workers will take over this town of 11,000 population, together with all the dream of controlling their own industry through auxiliary industries. The mining part of the their industrial Soviets? town is on the east bank of the River Tom, "The Russian Revolution gave the land to the? and the industrial part connected with the chemical plant, on the west bank. The town log bungalows of three or four a fenced yards. The houses are bateicity and many have running that the report says "Russian workers well laid out with broad streets and attracrooms with fenced vards. lighted with electricity and many have running water. The town and all buildings have been built since 1913 and five hundred workers can be added to the existing population with but slight repairs to existing buildings. As the immigrant workers arrive, Russian peasant labour, to the amount of about half the population of the town, will return to the village, since this peasant labour has been mobilised for work in the mines.

2

The following municipal industries will be taken over in Kemerovo and operated by the foreign workers' unit :

we'l-built hospital, situated in the ment itself, forest of pine that comes down to the edge of the city, now employing a medical staff of 61, including two doctors, a surgeon, two dentists and two midwives

(Siberia uses white flour.) hotel dining room accommodating 250, fellows.

and employing ten persons.

ays. A grammar school with 25 teachers and term, he justly says:-

A granmar school with 20 500 school children. "Three small brick plants (with no machinery) where 20 thousand bricks are made by 20 workers during the summer months.

One barber shop with two barbers.

' One tailor shop with two tailors.

shoe repair shop with 22 shoe-makers. A five-bench carpenter shop.' And again :

Unskilled labour Russia has in abundance, but because of her free land, the wages must necessarily be above what the peasant labourer an earn in his village."

That reads like a phrase from the report of a capitalist director to his shareholders.

Kuzbas organisation will operate a glass factory and Hoffman brick kilns at Tor The population is 80,000 . . . in 1921 there were 6,000 students at Tomsk University."

It seems that the greater part of Tomsk city-cky Tomsk !—is outside the Kuznets Concession! The report describes within the territory of the concession to be "exploited" by the foreign proletarian-capitalists, stone quarries, es, chemical plants, tinplate works, blast furnaces, iron mines, iron and steel plants, charcoal burning plants, cement plants, brick kilns, timber forests and lumber works, saw-mills, railways and railway locomotive works, flour mills and bakeries. Some of this plant is of first-rate modern type. Moreover, there is the agricultural land and everywhere are the Russian people who are working the land and the industries to a certain extent, and whose wages, as the prospectus says, must necessarily be above what the peasant labourer can earn in his village. What part are the natural inhabitants to have in Kuzbas?

Says the prospectus :-

'All the properties will be operated as a State industry, as an economic unit under the management of the organisation of foreign workers. The organisation will function on the basis of a special statute approved by the Council of Labour and Defence. All the pro-perties will be operated by the Kuzbas Organisation as one property : with one board of managers and one technical staff."

Remember that the foreign workers will form but a tiny proportion of the population of Kuznets territory

What is to become of the Russian workers'

" The Russian Revolution gave the land to the peasants, and the factories to the working men. Through four years of a most terrific struggle,

within the unit shall have the same legal and within the unit shall have the same legal and material rights as the other participants from America and other countries." This, however, evidently does not mean all Russian workers living within the Kuznets 'territory, but all Russian workers able to provide the 300 dollars that are required of the foreign worker.

Is that the case? We ask that question urgently, insistently of Tom Barker and a'l who are pushing this scheme, and of the Soviet Govern-

How is the Russian worker to find 300 dollars? How many million roubles would that amount to? No Russian worker can do this, unless he has two midwives. A bakeshop*now employing four bakers. bis fellow workers. In that case he is a speciailly dangerous person to put in authority over his

and employing ten persons. "Three bath houses, one for miners, one or the general public, and one for old people." But where is the Communism; where is the workers' control of industry in this Kuzbas

For the general public, and one not out people. " The productive organisation is created," says " Two Swedish sawmills of one frame each, which are now in operation—one on each side of the river. " A merica, certainly defy the same and America, certainly defy the of the river. "A blacksmith shop with small equipment and n'ne forges in good condition. "Two theatres of 1,000 eapacity each, and equipped with moving picture machinery, as well as a stage and scenery for the production of plays. I having the transformed and the state of the product of the product of labour. Having exposed the falsity of the

> 'Within the co-operative commonwealth based upon common ownership of the means of production, the producers do not exchange their products; just as little does the labour embodied in products manifest itself as a naterial quality possessed by them; for now (in contrast with what happens in capitalist society) the individual acts of labour no longer exist indirectly, but exist directly as constituents of associated labour. Thus the term ' product of labour,' which to-day is already open to objection, on account of its ambiguity comes totally devoid of meaning." Again, says Marx :-

> When the productive forces of society have expanded proportionately with the multiform development of the individuals of whom society is made up-then will the narrow bourgeois outlook be utterly transcended, and then will society inscribe upon its banners ⁴ From everyone according to his capacities, to everyone according to his needs.² ²¹ But what is to be the fulfilment of the pro-

mise to give, in Kuzbas, its whole product to labour (foreign labour with 300 dollars to invest)? What sort of control of their industry are the

foreign engineers to get? The "Organisation Statute" adopted by the Soviet of Labour and Defence (whose members are the heads of the nine Economic Departments of the Council of People's Commissaries, which is actually the Soviet Government) states :-"The management of the Unit will be in

the hands of a Managing Board of seven members, three to reside in the Kuzbas, three in the Urals, one in Moscow. These members will be selected by the workers in the Unit, subject to the approval of the Soviet authoritie The election will be for a term of one year, with the provision of recall by the workers by the Soviet Government, who will have a representative on the Managing Board."

It would appear that the Soviet Government does not trust these foreign workers much, since it takes the right to dismiss all their chosen managers

The Board of Management is the highest organ of the Unit, and will be responsible to the Soviet authorities. It will appoint and discharge the technical staff, which will supervise all labour, as well as act as adviser to the Board of Management,

"All workers in the Unit will belo their respective industrial unions, which act in an advisory capacity to the Management. All workers in the belong to their respective industrial which again will act in an advisory ca Board of Management and th staff. The Industrial Unions w will constitute a part of the All-Russia sation of Industrial Unions. The members of the Unit pledge t

Corn 18, 1922.

elves, in case of misunderstanding to accept as final the decision of the high State authority in Russia.

The Organisation Statute for Kuzbas, as que above, states that the Board of Managem be responsible to the Soviet authorities, a it may be dismissed by the Soviet, no do The prospectus states under the discipline

nsibility for the progress of all rests with the technical staff, who are sible only to 'he Board of Managemen Board of Management are responsible the workers and to the Russian Socialist tion of Soviet Republics. The work dis and methods will be absolutely de the technical staff or its proper sub-divi superintendents, foremen, etc.

As to Communism, that will not appe Kuzbas: there is to be no application of Marxian standard (which was by no mean ent of Karl Marx) " from everyone acc his capacities, to everyone according Says the prospectus :-

The workers will receive from their duction a satisfactory standard of living, will include a yearly bonus. The remain product (except the customary Soviet t will be used to extend the industrial e ment of the enterprise.

What is meant by a satisfactory sta of living will be determined by the Board Managers who are responsible both workers and to the Soviet Government. minimum, it is a standard based on pro efficiency. For the first two years each will put his labour into Kuzbas. On of production a yearly bonus will be and placed to the individual credit worker. This bonus will consider the rendered, hardships endured, prospects of Kuzbas, and what a simila industry would return to the worken nited States, in the form of savings. What becomes of Communism ; and using of all things in common, with measure, the abolition of wages, the abo buying and selling? Might not Com have been attempted amongst the members Kuzhas co munity?

As to the relations between Kuzbas and Soviet Gover

' Kuzbas will pay the customary State tax in products, especially coal. "The total product of agricultural

building industries is at the disposal of Kuzl Organisation, less the usual taxes. In regard to other industries

Organisation will turn over to the vernment the equivalent of the secured by the Soviet Government which was approximately 10 per ce total capacity); also 50 per cent. of duction over that of 1921. For all turned over to the Soviet Government will be given and an equivalent in ot modities received through exchange commercial basis. The equivalent rece remaining production is at the the Kuzbas Organisation for indiv sumption or the expansion of the en Products at the disposal of Kuzbas xchanged with the peasants or others of the products will be used for a sati standard of living; the remainder for tension of industrial equipment to crea machine industry. The amount reser extension of the whole organisation determined by the Unit as production .

In short, at Kuzbas will be created an o of little capitalists who will be paid some not yet determined, to maintain them. bonus which they can draw out after two

land according to the old customs of the mir, that they have not an absolute title to the owner-ship of the land, and that it is re-divided by the

7

tration of industry by the workers in the shops. "It seems to me that the Russian Revolution of 1917 was the first which was animated by the principle that the people are entitled to an assured subsistence, because they are members of the community, living creatures, and that the where-withal to feed, to clothe, to house them, must be provided freely for them, irrespective of their social, physical, or moral condition, or any services they may perform. The earlier revolu-tions - desired or attempted to provide soup kitchens and public works for the poor, marking them off from the people who could afford to shift for themselves. The Russian was the first ary measures; weapons of the struggle, or slogans intended to appeal to those as yet incapable of grasping the idea of Communism. Personally, command, however, recognised only the necessity of providing freely a bare subsistence. All comforts and extras, they decided, must be earned by wages.

' The Communist Manifesto does not refer to this question of providing for the subsistence of the people. It does not refer to workers' control of industry, which was one the main efforts and incentives of the Russian Revolution, althoust the Soviet Government has gone back on it, and which will undoubtedly be a main factor in the proletarian revolution all over the world.

" I don't think Marx foresaw that these things would come to be the big issues in our time; s. Combination of agricultural and trial labour, in order to remove the distinction between town and country.⁷ "secured mass support was, of course, their pro-"But what about the bloomer?" prompted Barbour. "I want to hear it. You will be

> " The fact is," said Bistre, " those slogans of the Manifesto could only be issued under the impression that Communism was very far away. Marx himself would have changed them had he written a little later.55

THE LABOUR WAR. THE RAND STRIKE.

Our readers will watch with interest the articles on the Rand Strike which L. A. Motler is contributing to our columns from the storm centre. In its war upon Labour in South Africa, Capital is using all the forces of the Government The police and the soldiery are already in action. sailors from British warships at Simonstown will be called in if trouble spreads to Cape Town, at least, so The Times predicts. Bombing from aeroplanes, for which the Germans were so greatly condemned by the Allies, although, of course, the Allies were equally guilty in that respect, is being used by the South African Government against the strikers. An official anfrom Pretoria, dated March 12th, savs :-

All our machines now carry bombs, in order that every advantage may be taken when revolutionary commandos are discovered in the

revolutionary commandos are discovered in the open, or marked down in one of the many plantations on the East Rand. "In two instances to-day (Saturday) com-mandos were successfully bombed, in each cate direct hits being made. The revolutionaries suffered severely on 'hese occasions.'' How the fighting actually started will be | ld

in a subsequent article by our correspondent, L. A. Motler. general strike is apparently only partial as

yet and solidarity has not been shown, as it ought, by the workers in other parts of South The railwaymen, especially, have shown a grievous lack of comradeship in transporting the troops from Cape Town and other parts of South Africa to attack their brothers in Johanne-s The soldiers and police are workers, too, but

they have forgotten that fact so far. The possessing classes have shown more

they have organised a volunteer force solidarity o replace the strikers in transport and other

Labour will not be victorious till it learns the lesson of solidarity and is prepared to fight as a

Labour will not be victorious whilst it merely strikes and starves. It must take control of production and distribution before it can achie/e The South African Labour leaders have played

the old game of trying to prevent united action by all the of the working class. The Nationalist politicians have plainly shown

that they are not on the side of the workers. That was to be expected as a matter of course.

THE BRITISH LOCK-OUT

In Britain. also, the need is for the solidar ty of the workers. The engineers and shipbuilde s cannot successfully fight the employers alone. The workers in all other industries, and especior the workers. The engineers and shipbuilde s cannot successfully fight the employers alone. The workers in all other industries, and especi-ally the main industries, must join the engineers and shipbuilders in their struggle, or the em-ployers must certainly win. Moreover, the war of Labour and Capital hese over they wich to being the surfaces to their

show themselves able and ready to supply their accept employment at any wage and on any con-own needs and those of the proletarian com-ditions. The employers have enlarged the scope

many sections, have been allowed great latitude and scope in monopolising the field of action. The Right-Wing-Parliamentary Communist Pa.**y refrained from advising the formation of rank and file workshop councils. It declared, on the contrary, that the officials of the Trade Unions must be appealed to—that the Union officials must be left to handle the situation. Then on the very eve of the Lock-Out, when the battle was actually joined, out came the Communist, the organ of the Parliamentarians, with this message:

"The rank and file must come together. In every locality affected we must set up Lock-Out Councils consisting of representatives fron every workshop, to control and carry on the workers' struggle in that region."

Very good, very good; but the message is several months late in the day. The warnings were given last year: the organisation shou'd

have been prepared in advance! The Right-Wing C.P. has hitherto opposed this policy. Has it now permanently changed

What a slow lot of people we are in this country, to be sure, "Occupation of the fac-tories!" Why, if we do not wake up all the tories!" Why, if we do not wake up, all the other peoples of the world will have become p.st masters of the art before we even begin to try

The questions the locked-out workers have got

of plenty? "How can we avoid doing so?"

The Engineers' Lock-Out is a serious business. It was firstly and superficially a question of the prestige of the Trade Union official. The issue raised was whether the Trade Union officals should or should not decide when and under what con-ditions their members should work overtime. The A.E.U. officials cling to this privilege, both to uphold their power and that of the Union as whole, and also to limit overtime with a view checking the growth of unemployment.

So far, the issue is not an exalted one : limiting overtime will not greatly limit unemployment. Class conscious workers will refuse to work overtime if the interests of their fellows requires that refusal. Class conscious workers do not require a Trade Union official to say no for them if they have agreed with their fellows that they will refuse

It will be replied that the mass of the Tra?e Union membership is not class conscious enough to stand firm on this issue. Certainly the fact that only 20.1 per cent. of the A.E.U. membership voted against the employers' terms shows how little the members really care for this question. That only 50,240 voted against acceptance of the employers' terms and 35,523 voted in favour of the terms, out of a membership of 425,714 is a significant fact that no degree of desire to discover a fighting spirit in the Union ranks can explain away. Nevertheless we believe that more fighting solidarity will be displayed by the workers for a big and vital issue than for an issue of this kind.

Now that the A.E.U. officials have got the workers into this struggle, they shrink from using the Union machinery and the solidarity of workers to put up an effective fight.

To be effective, the struggle must be conducted on a bolder and broader scale than ever befors. The officials, hide-bound in conservatism, shrink from adopting new methods, the more so as a well-fought struggle would doubtless bring the heavy hand of Government coercion down upon the officials themselves.

bloyers must certainly win. Moreover, the war of Labour and Capital has now so far developed that the workers will gain no real victory by merely going home to starve; they must act if they mean to win. They must them to the plight when they will be ready to correct the workers will gain to the plight when they will be ready to correct the workers will gain to the plight when they will be ready to correct the workers and on a propose munity as a whole. Our settled policy is that the rank and file should form a rank and file workshop organisation able to act in this crisis. The Right-Wing-Parliamentary Communists, by agreement of that is the Union whose officials refused to the struggle; it is not a mere question of over-of the struggle; it is not a mere question of over-time; it is a question of Trade Unionism. The employers refuse now to employ the members of a particular Trade Union—the A.E.U.—because. 10

accede to the employers' terms A.E.U., to-morrow it may be another What the employers are aiming at is to brea power of the Trade Union. They desire that workers shall be a driven herd. The Lock-O a part of the campaign to bring wages and ing conditions down to the lowest possible successful, the attack on the A F I that its members must either join other U or cease to belong to any Unions at all, un the A.E.U. should negotiate itself back into favour of the employers. An organisation formed on industrial lines

18, 1922.

covering every worker in the industry is the fi essential in fighting a struggle of this kir This is clearly illustrated by news items such

yesterday at the Gothic Works, Edmo sympathy with the ten members of the A.I locked-out at that establishment."-I Herald, March 14th, 1922. Suppose the four or five hundred men h thus supported the A.E.U. members?

It requires tremendous solidarity, in these has times, for 400 or 500 men to go on to the street without a prospect of the unemploymen that being refused to strikers, and Trade Union funds so much depleted that st pay is problematical. It requires great solida when the issue is not a clear cut and noble of The issue, remember, is not 'hat there shall no overtime whilst there is unemployment no overtime for the men in our workshop

ve all decide that there shall be overtime." No: the issue for which the 500 have stri whether ten men shall work overtime by permission of a Trade Union official whom the 500 have no connection. The time of the 500 is not at present in ques though potentially it is involved.

The members of the 47 other Unions connected with the engineering industry are no balloting on the employers' overtime proposal Their ballot papers are not returnable till Mar the 23rd. The A.E.U. might actually be beat before the decision of the other workers made known! What criminal misman of the situation!

Here is another striking news it should cause every worker to ponder the units of the honesty and efficiency of the Unit officials

"A resolution asking the Executive to out all members of the A.E.U., except th employed in hospitals, was passed yesterda a mass meeting of locked-out men in Willes where about 1,500 men are affected."-Da

Herald, March 14th, 1922. So there is not even unity of action within the .E.U. itself!

That the rank and file should find it ne to make such appeals to the Union officials in course of a great struggle like "his, and with example of the recent miners' defeat befor ws the lack of initiative of the rank and t also raises the question as to whethe Union officials, or some of them. have en into a deliberate conspiracy with the empl to bring about a smashing defeat of the in the engineering industry. The min A.E.U. Executive Committee meet make instructive reading just now. An about that underground organisation str the Coal Association, with which some Lab leaders have been so closely in touch?

The supreme questions of the present great struggle are, whether the rank and file workers are going to see to it that their struggle efficiently and honestly conducted, and, still n moortant, whether the struggle is to that are substantially worthy errible hardships which the struggle will upon the Trade Union officials, com out upon the workers.

Our appeal to the workers is to form their official organisation and to make their terms.

Our appeal to the workers is not "Wi Your Leaders," but : "Do It Yourselves!" NOW IN STOCK.

THE WORKERS' DREADNOUGHT

and the lives of the men still at work in the runes. Note that the good editor always juts property first, and throws in a few lives as an afterthought. As is usual, the workers are being well watched, whilst the Fat Men of the Chamber of SOUTH AFRICAN RAILWAYS AND HARBOURS.

REWARD

An altempt was made to dynamite the railway line near Anzac Halt on the 27th January, 1922, but was frustrated. On the night of the 2nd or morning of the

3rd February, 1922, dynamite was exploded on the railway line between Geduld and Welgedacht. and certain damage done.

As outrages of this description may endanger the lives of the travelling public and cause serious damage to Government property, the Adminis-tration hereby offers a reward of £300 for in-formation (which should be given to the nearest Police Station) leading to the arrest and convic-tion of any present or performed and the state of the second of the second seco tion of any person or persons responsible for the above-mentioned offences.

A reward will also be given for information which leads to the prevention of any such con-templated outrages in the future, and to the conniction of the guilty parties. W. HOY.

General Manager's Office. annesburg, 3rd February, 1922. Johannesh

When the alleged dynamite outrage was re-ported in the press, it was also suggested that it was the work of strikers. The authorities promptly offered a reward, as outlined above, obviously aimed at the strikers. Somebody wrote to the press, and this was repeated by certain Labour leaders, that the "outrage" may have been the work of *provocateurs*. But the police didn't issue a notice, in English and Dutch, in the papers read specially by the Fat Men of the When the alleged dynamite outrage was :ethe papers read specially by the Fat Men of the Clamber of Mines, nor was such a notice posted outside the notorious Rand Club.

Next day a raid was made by the police on strikers on picket duty at Robinson Deep (Gold Mine) and seven men arrested. These being of the rank and file, they were allowed out on bail What I want to draw your attention to is this. The last paragraph states that "A reward will also be given for information . . . of any such CONTEMPLATED OUTRAGES IN THE £20 each. And all the Executive of the S.A. FUTURE. as ." I want to point out what a temptation this is to anyone to report "con-templated outrages " that have no existence in Industrial Federation does is to ask the men to "stand fast and fight on." fact

The public roads here commonly cross the railways at points just outside the thickly populated areas, on a level crossing. What would be easier than for some strikers to be seen crossing the railway where some dynamite would be subsequently "discovered" and a "con-templated outrage" frustrated?

Point is lent to this by the fact that the ard " notice was first published in English No reports having transpired from the Reward ' only. No reports having transpired from the English section, it was thought advisable to tempt the cupidity of the Dutch. A notice in the out mess the section is supported from the tempt the cupidity of the Dutch. A notice in the out mess the section is sympathy with the com-press has reverted to its sympathy with the com-to the out mess the section is urged not to Unfortunately for the authorities, this met with no better success than the first. Both Dutch and English are standing solidly together and are not to be divided by racial appeals.

This week (February 9th) we have reports of another "outrage" on the railway. This time i it happened some 70 miles from Johannesburg. But even there, by a peculiar coincidence, the thing was noticed in time, as in other cases. It seems that the Rhodesian mail train was

It seems that the Rhodesian mail train was partially derailed on the Zeerust portion of the line. A piece of rail on one side was found to ntly. I now want to point out how events partially detailed on the Zeerust portion of the followed on the outcry in the press, against line. A piece of rail on one side was found to

the commandoes, as I outlined in my previous have been taken up. The engine fell on one letter. First, amused tolerance; then, as strikers began to do other things than merely marching up and down the Reef, a venomous leading article driver saw what was coming-just a little too late. That is all.

late. That is all. I do not wish to be thought prejudiced about these "outrages"; but I cannot help noticing queer coincidences. Take this one. An old buffer plate was found between the joints of the Rand). Here, again, the reporter observes: "Fortunately it was discovered before any un-toward accident occurred." Now this was exactly the case at Anzac Halt. How did the authorities manage to "discover" rages before an accident happened? these out

Another item. Two current-carrying standards have this week been damaged near our old friend, Anzac Halt. Three explosions took place at the supposed time of the "outrage." These were noticed by a policeman, who was fortunately awake at that time of night. He at say "proceeded." (All good policemen "pro-ceed.) On arriving there, or thereabouts, he suddenly came across six white men, who fired three shots at him. Our gallant frend in blue promptly took to cover, and the six white men took to their heels. It is unfortunate that the i oliceman had no corporeal proof of this. I say it is unfortunate, that is a'l.

The Rand has had police imported from all over the Union, yet all these "outrages" (the affair at Maraisburg is boldly described by the Rand Daily Mail as "sabotage," although foul play is only "suspected)—these outrages, I say, have brought no arrests.

There have been arrests of a sort, however. Immediately after Truter's "Warning," five arrests were made amongst the officials of the S.A. Miners' Union. Be it noted that there were no arrests among the Executive of the S.A. Industrial Federation, which is conducting the strike, and under whose orders the Miners' Union is. Even the "revolutionary", 30b-Waterston is still at large. These seven men

strikers' daily meetings in the Town Hall. A resolution was passed, asking the Industrial Fderation to call a general strike and demand the release of the prisoners. The Federation turned down the proposal.

As regards the "outrage" to the Rhodesian mail train, although an actual derailment oc-curred, no reward has been offered for the apprehension of the "*misdaadigers*." No notices whatever have been issued by the S.A. Railways save to state that the line would be in running order the next day. (The derailment occurred somewhere about seven in the evening.)

somewhere about seven in the evening.) This is the position to-day. As to develop-ments: although Bob Waterston is now talking of a general strike, I do not anticipate anything will happen. The strike will simply proceed on

mandos. The Government is urged not to suppress peaceable bodies that provide the strikers with something to keep them out of mischief. No references are made to "Waterston's Army." No references are made to "waterston's Army," Commandos now march to the Fort (the local prison) to sing "The Red Flag" and oheer the imprisoned officials of the S.A. Miners' Union. The only anti-"scab" activity now apparent is women. among the

THE GERMAN ONE BIG REVOLU-TIONARY UNION CONSTITUTION All Proletarian Schools should obtain it fro

THE WAGE SYSTEM. By Peter Kropotkin. III. "To each according to his deeds," say the Collectivists, or rather, according to his share of service rendered to society. This is the principle they recommend as the basis of ecoomic organisation, after the Revolution shall ave made all the instruments of labour and all

is necessary for production, common that Well, if the Social Revolution should be so unfortunate as to proclaim this principle, it would be stemming the tide of human progress; it would be leaving unsolved the huge social problem cast by past centuries upon our shoulders. would be leaving unsolved the huge It is true that in such a society as ours, where the more a man works, the less he is paid, this principle may seem, at first sight, a movement towards justice. But at the bottom it is but cration of past injustice. It is with this principle that the wage-system began, to end where it is to-day, in glaring inequalities and all the abominations of the present state of things. It has ended thus because, from the day on which ssociety began to appraise services in money or any other sort of wages; from the day on which it was said that each should have only what he could succeed in getting paid for his work, the whole history of Capitalism (the State aiding therein) was written beforehand; its germ was enclosed in this principle.

Must we, then, return to our point of departure and pass once more through the process of capitalist evolution? These theorists seem to desire it; but happily it is impossible; the Revo-lution will be Communistic; or it will be drowned in blood, and must be begun all over again.

Service rendered to society, be it labour ir ctory or field, or moral service, cannot be valued in monetary units. There cannot be an exact measure of its value, either of what has been improperly called its "exchange value," its value in use. If we see two individuals, both working for years. for five hours daily, for the community, at two different occupations equally pleasing to them, we can say that, taken all in all, their labours are roughly equivalent; but their work could not be broken up into fractions, so that the product of each day, each hour, or each minute of the labour of one should be worth the produce of each minute and each hour of that of the other.

Broadly speaking, we can say that a man who, during his whole life, deprives himself of leisure for ten hours daily, has given much more to society than he who has deprived himself of but five hours a day, or has not deprived himself of any leisure at all. But we cannot take what one man has done during any two hours and say that this produce is worth exactly twice as much as roduce of one hour's work from another individual, and reward each proportionately. To do this would be to ignore the extent to which this would be to ignore the extent to mer individual work is the outcome of the former f conjuty as a whole. It and present labours of society as a whole. build be to fancy oneself in the Stone Age, when we are living in the Age of Steel.

Go into a coal mine and see that man stationed at the huge machine that hoists and lowers the cage. In his hand he holds a lever whereby to r reverse the action of the machinery. He lowers the handle, and in a second the cage changes the direction of its giddy rush up or shaft. His eyes are attentively fixed upon an indicator in front of him, which shows the point the cage has reached; no exactly the point the cage inas reaction, his sooner does it touch the given level than, at his gentlest pressure, it stops dead short, not a foot above or below the required place. And scarcely are the full trucks discharged, or the empties oaded. before, at a touch to the handle, the cage is again swinging up or down the shaft. For eight or ten hours he thus concentrates his

attention. Let his brain relax but for an instant,

rings from below the signal for the mounting reward.

of the cage? Or is it the miner who risks his life every moment in the depths of the mine, and are to-day in a blind alley from which there is bit are taget. Or is it the depths of the mine, and will end one day by being killed by fire-damp. Or, again, the engineer who would lose the coal seam and set men hewing the bare rock, if he merely made a mistake in the addition of his reactive made a mistake in the addition of his calculations? Or, finally, is it the owner, who has put all his patrimony into the concern, and who, perhaps, has said, in opposition to all previous anticipations: "Dig there, you will find excellent coal"?

All the workers engaged in the mine contri-bute to the raising of coal in proportion to their strength, their energy, their knowledge, their intelligence and their skill. And we can say that all have the right to live, to satisfy their needs, and even gratify their whims, after the more imperious needs of every one are satisfied. But how can we exactly value what they have each done?

Further, is the coal that they have extracted entirely the result of their work? Is it not also the work of the men who constructed the railway leading 'to the mine, and the roads branching off on all sides from the stations; and what of the work of those who have tilled and sown the fields which supply the miners with food, smelted iron, cut the wood in the forest, made the machines which will consume the coal, and so on?

No hard and fast line can be drawn between the work of one and the work of another. To measure them by results leads to absurdity. To divide them into fractions and measure them by hours of labour leads to absurdity also. One course remains : not to measure them at all, but to recognise the right of all who take part in productive labour, first of all to live, and then to the work of one and the work of another. productive labour, first of all to live, and then to enjoy the comforts of life.

Take any other branch of human activity; take our existence as a whole, and say which of us can claim the highest reward for his deeds? The doctor who has divined the disease, or the

nurse who has assured its cure by her sanitary cares? The inventor of the first steam engine, r the boy who one day tired of pulling the cord which formerly served to open the valve admitting the steam beneath the piston, tied his cord to the lever of the machine, and went to play with his 'companions, without imagining that he had invented the mechanism essential to that he had invented the mechanism essential to all modern machinery—the automatic valve? The inventor of the locomotive, or that New-castle workman who suggested that wooden sleepers should take the place of the stones which were formerly put under the rails and threw trains off the line by their want of elasticity? The driver of the locomotive, or the signalman who store the train or oness the way for it?

who stops 'he train or opens the way for it? To whom do we owe the Trans-Atlantic cable? To whom do we owe the Trans-Atlantic cable? To the engineer who persisted in declaring that the cable would transmit telegrams, whilst the learned electricians declared that it was impos-sible? To Maury, the scientist, who advised the disuse of thick cables and the substitution of one no bigger than a walking stick? On after all disuse of thick cables and the substitution of one no bigger 'han a walking stick? Or, after all, is it to those volunteers, from no one knows where, who spent day and night on the deck of the Great "Eastern. minutely examining every yard of cable and taking out the nails that the shareholders of the maritime companies had stupidly caused to be driven through the isola-tion coff the orbits to render it useless?

tion coat of the cable, to render it useless? And, in a s⁺ll wider field the vast track of human life, with its joys, its sorrows, and its varied incidents, cannot each of us mention some one who during his life has rendered him some carries so great as important, that if he uses service so great, so important, that if he were service so great, so important, that if he were proposed to value it in money he would be in-dignant? This service may have been a word, nothing but a word in season, or it may have been months or years of devotion. Are you going to estimate these, the most important of all services, in labour notes?

"The deeds of each "! But human societies attention. Let his brain tool and shatter the wheels, and the cage would five up and shatter the wheels, break the rope and crush the men, bring all the work of the mine to a standstill. Let him lose three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever, and, three seconds upon each reverse of the lever and the lever is the provide the lever is the provide the lever is the lever is the lever is the provide the lever is the leve preserve her children; if every man did not give Well, is the who renders the greatest service some things without counting the cost, if human beings did not give most where they look for no

institutions of the past, that is just because have calculated too much. It is just because have allowed ourselves to be drawn into givi that we may receive; because we have desired

Moreover, the Collectivists know it. They vaguely comprehend that a society cannot exist if it logically carries out the principles, "To each according to his deeds." They suspect that the according to his deeds." individual do not always correspond to his deeds Accordingly, De Paepe tells us :---

" Even Collectivists suspect that a man of forty, the father of three children, has greate needs than a youth of twenty. . They suspec that a woman who is suckling her child an spends sleepless nights by its cot, cannot g through so much work as a man who has e joved tranquil slumber.

" They seem to understand that a man woman, worn out by having perhaps worked vorhard for society in general, may find ther selves incapable of performing so mar ' deeds' as those who take their hours our quietly and pocket their ' notes ' in th privileged offices of State statisticians.

"And they hasten to temper the principle. Oh, certainly, they say, society w feed and bring up its children. Oh, certai it will assist the old and infirm. Oh, c tainly, needs not deeds will be the measure the cost which society will impose on itself temper the principle of deeds."

What, Charity? Yes, our old friend, 'Christian Charity,'' organised by the State.

Improve the foundling hospital, organise surance against old age and sickness, and principle of deeds will be "tempered" "Wo that they may heal," they can get no further

Thus, then, after having forsworn Commu after having sneered at their ease at the form 'To each according to his needs,'' is it bvious that they have forgotten somet i.e., the needs of the producers. And there they hasten to recognise these needs. Only to be the State by which they are to be estim is to be the State which will undertake to fi out if needs are disproportionate to deeds

It is to be the State that will give alms to hi who is willing to recognise his inferiority. From thence to the Poor Law and the Workhouse i but a stone's through

There is but a stone's throw, for even step-mother of a society, against which we are in revolt, has found it necessary to temper i individualistic principle. It, too, has had to make concessions in a Communistic sense, and this same form of charity.

It also distributes halfpenny dinners to prethe pillage of its shops. It also builds hospita often bad enough, but sometimes splendid, prevent the rayages of contagious disease prevent the ravages of contagious disease. also, after having paid for nothing but the h of labour, receives the children of those who has itself reduced to the extremity of distr It also takes account of needs—as a charity.

Poverty, the existence of the poor, was first cause of riches. This it was which create the earliest capitalist. For, before the sur value, about which people are so fond of talki could begin to be accumulated, it was necess that there should be poverty-stricken wret-who would consent to sell their labour force ra than die of hunger. It is poverty that has the rich; and if poverty had advanced by rapid strides by the end of the Middle Ag was chiefly because the invasions and wars creation of the States and the detheir authority, the wealth gained by expli-tion in the East, and many other causes of a nature, broke the bonds which once agrarian and urban communities, and led t in place of the solidarity which they once tised, to adopt the principle of the wage-sys

Is this principle to be the outcome of the R volution? Dare we dignify by the name volution? Social Revolution-that name m dear to

While we are demolishing, we shall be ing," as Proudhon said; and we shall build e name of Communism and Anarchy.

PROLETARIAN SCHOOLS. BY TOM ANDERSON

A PRINCESS.

Very few of you girls and boys have had the opportunity of seeing a real princess. You have all heard about them in your fairy tale book.

"Oh, a princess," a little girl exclaims; "she will be wonderful; she will be beautiful. Is she a fairy? What world does she come from? Oh, La muŝoj murmuretis, la pasero manĝis la if I could see a princess, it would be so nice."

La musoj murmuretts, la pasero manĝis la musojn kaj la akcipitro manĝis la paseron. La abeloj serĉante mielon gratadis en 'a floroj, la leono kriegis, la birdoj kantadis, la rivereto mur-muradis, la herbo kreskadis kaj verdiĝis. La raboj murmuretts per siaj branĉoj, dum iliaj radikoj suĉis la sukon el la tero La floroj bonedoris kaj floradis. Subit ĉie altero La floroj

Subite ĉio silentiĝis, kvazaŭ ĉiuj haltigus la nor is she very beautiful; she is not made of pure A princess is not a fairy; she is not wonderful, Subite cio sitentigis, kvazau ciuj natigus ia spiron, stariĝus kaj auskultus. - La murmuro de la branĉoj mutiĝis, la violo vekiĝis el sia revedo kaj mirigite supren rigardis. - La leono levis la kapon kaj aŭskultante stariĝis. vekiĝis el sia revedo kaj mirgite supren rigardis. La cervo ĉesis paŝtiĝi; la aglo ripozis alte en la aero je siaj flugilegoj. La malgranda muso elvenis el sia truo kaj atente aŭskultis. Trans la arbaro du estuloj marŝis, kiuj estis tute aliaj kiel la ceteraj kaj kiujn neniu ankoraŭ vidis. vidis. Ili marŝis rekte, iliaj fruntoj estis altaj, iliaj okuloj klaraj. Ili prenis unu la alian per la mano kaj sciviole ĉirkaŭrigardis, kvazau ili ne scius, kie ili estas. mano kaj sciviole ĉirkaŭrigardis, kvazau ili ne scius, kie ili estas.
— Kiuj povas esti tiuj-ci? demandis la leono.
— Ili estas bestoj, diris la cervo ili povas iri.
Sed ili havas strangan iradon. Kial ili ne slatadas per ĉiuj iliaj kvar piedoj, ĉar ili havas kvar? Tiamaniere oni marŝadas pli rapide.
— Eh, diris la serpento, mi tute ne havas krurojn kaj tamen mi tre bone antaŭeniras, mi pensas.
— Mi tute ne kredas, ke ili estas bestoj, diris — Mi tute ne kredas, ke ili estas bestoj, diris la najtingalo. Ili ja ne havas plumojn, nek harojn, ĉar la kelkajhareroj sur ilia kapo ne estas vrinarolindaj Ankaŭ skvamojn ili ne havas diris la ezoko, speaks to a poor woman whose husband was killed in the war. The princess takés a litue child in her arms at one of the shelters for the homeless. The princess gets married, and it takes 15 priests to marry her; the streets are decorated along the way on which she will pass 'brough; a'l the slaves' children are given a holiday from Ankau mi ne navas voston, diris la buto,
 kaj tamen neniu malkonfesos, ke mi estas besto.
 Rigardu, rigardu nur, diris la leono, nun in
 Tian great and wonderful affair; so great and wonder-ful that it mkes he slaves forget their poverty - Sed mi jes, diris la orangutango, tio ne estas and misery, and they line the pathway and shout

The slaves crawl back to their homes, and - Eble ili demetis ĝin, opiniis la orangutango. their priests te'l them it is God's will, and the slaves are content.

WRIT ON COLD SLATE. BY E. SYLVIA PANKHURST. Price 1s. 7d., Post Free.

This verse was written on the prison slate by the author during her six months' imprisonment in Holloway Gaol, and is printed as then conceived, as a memory and as a document.

THE LOCK-OUT. OUESTIONS FOR YOU.

Here are three questions for you to consider, fellow workers. They are important questions to you : consider them well.

1 .--- What are the engineers fighting for?

2. How are the engineers fighting

3.—What are you going to do to help the engineers, to help the shipyard workers who will presently be locked-out also, and to help yourselves, to help the entire working class? The answer to the first question is that the engineers are fighting to maintain the old cou-

d tions: to keep things as they are, when they ought to be fighting for better conditions. The answer to the second question is that the engineers' struggle is not being properly conducted

ducted. It is not a united fight : only some of the workers engaged in the industry have joined in the struggle. Only some of the members of the A.E.U.—the organisation the employers have attacked—have been called out by the A.E.U officials to stand by the rest. The fight is conducted by officials who are old-fashioned in their methods of meeting the attacks of the employers, who will use all the most modern tactics. It is a fight conducted by officials, some of whom have been publicly and privately proved to be employers' men. In plain words that means that some of the Union leaders are traitors to the workers. The traitors are doubtless in a minority, but determined unscrupulous people working for determined unscrupulous employers are able to do as they please with timed bundlets. bunglers

The third question is : what are you going to do to help yourself and your comrades who are locked out

The rank and file must get toge ber: you and the others who work. The rank and file workers must decide how the struigle shall be run and what the strugge shall be for. It is an urgent question : speak to the workers in your shop. Hold a meeting with them :

do it at once

The rank and file ought to have prepared their organisation already. Begin it now; it is never too late to choose the right way. THE SEARCHLIGHT.

THE WORKERS' DREADNOUGHT

BOOK SERVICE. 152, FLEET STREET

(ENTRANCE, FIRST DOOR ON LEFT IN BOLT COURT FROM FLEET STREET.)

We can spply you with any book, magazine, or newspaper you desire, new or second-hand, from British Colonial, or, foreign publishers Give us all particulars you have, and send a deposit.

buying books from us, irade discount is transferred to propaganda; for this reason, send your order direct to us. and not through other societies.

At our office you may consult publishers' cata logues and place your order for any book not in stock.

If you order by post, you must add. . . the average, one penny for every shilling, to cover postage

We charge the postage of foreign books, from London only, and fix price vt current rate of exchange. Purchasers will save themselves trouble by opening an account of 10/- or 20/-with us, in order to avoid the repeated sending of small postal orders, which means paying useless conders to the Conservation poundage to the Government

KUZBAS OR COMMUNISM.—Continued from page 2 and may re-invest in some other capitalist enter-I ris

rise. The little foreign capitalists of Kuzbas will cmploy the native Russian workers as wage bourers, giving them no share in the manage-n ent of the enterprise or that of the colony.

The Management of the vast territory will be carried on by seven persons, only three of whom will be anywhere near flue scene of operations, and all of whom must be appointed with the at proval of the Soviet Government and may be dismissed at will by it.

The ultimate power of decision over the man-agement and even over the wages and bonus of the little capitalists who are to run this colony will therefore rest theoretically with the Sovie Government. If, however, the colony become Government. If, however, the colony becomes strong and prosperous, we do not believe the little American capitalists will submit to such dictation. The little proletarian-capitalists of will once more be displayed by the hard-headed Yankees unless the constitution of Kuzbas he changed. The little proletarian-capitalists of Kuzbas may yet join the bigger Yankee and other concessionaires in fighting the Soviet Government. Since the Yankees are appealed to commercially, they will respond commercially. The Kuzbas constitution does not appeal to them as

Kuzbas constitution does not appeal to them as Communists

As for the natives of Kuzbas, it seems that arother Revolution will be needed to free them from the proposed voke. The prospectus states that S. J. Rutgers,

Dutch engineer who has worked in America, and H S. Calvert, an American expert in machine production, prepared the Thesis from which this scheme has arisen

We should find it difficult to believe that Comrade Rutgers, whom we know is responsible for proposing these anti-Communist provisions. E. SYLVIA PANKHURST.
