# SEE RED 1984 Calendar

To liberate ourselves from all forms of oppression by creating a new social and economic order all over the world means the involvement of women in national liberation struggles, local and global strategies for radical change.

In 1983 the western powers were still invading

Lebanon, Nicaragua, Grenada. How many more women and children are going to die in their hands?

On this calendar we have only space for 12 countries suffering and struggling against it, there are countless more like Korea, Sri Lanka...

Thanks to all that helped us in producing this calendar.
