Dear Dr. Wilson,

I beg to acknowledge receipt of

your favour of the 27th inst, and would only say,

that the work (Statistics), Mr. Flexner said would be translated into English, was part of our Report, containing Statistics published in connection with the Report already 1910. The book by Prof. Johansson has been published only some weeks ago and is based on the official statistics he worked out for the Regulation Committee, but brought forward up to date. I had a letter from Mr. Flexner the other day, in which he gave me to understand, that the translation he had made was merely for his own use, and he did not know whether it would be published separately. Thus an English translation of the book I sent you would not be a duplicate. I must have expressed myself not quite clearly in my article in the Bulletin.

You know we always look to old England for support in matters relating to the Federation, and - who knows - what need you will have of the only irrefutable statistic on the subject when Your Government Committee assembles and the English regulationists will do their worst.

Yours very faithfully

Please observe my altered address:
17 Jakobsbergsgatan
Stockholm.

noted.

P.S. Short chronology about by immovability... will be left in an article to be written.
